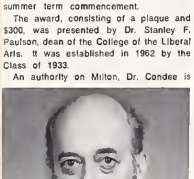
PENN STATE intercom

Volume 5, Number 1 September 4, 1975



An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Dr. Condee given Class of 1933 humanities award

Dr. Ralph W. Condee, professor of English literature and humanities, received the Class of 1933 Award for Outstanding Contributions in the Field of Humanities at summer term commencement.

The award, consisting of a plaque and $300, was presented by Dr. Stanley F. Paulson, dean of the College of the Liberal Arts. It was established in 1962 by the Class of 1933.

An authority on Milton, Dr. Condee is

Dr. Condee

the author of the recently published book, "Structure in Milton's Poetry." He joined the faculty of the University in 1949, after obtaining his Ph.D. in English from the University of Illinois.

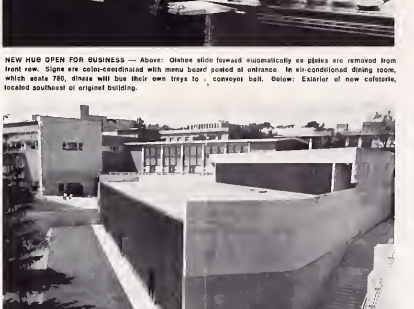
Illinois also awarded him a baccalaureate degree in classics, and he has an M.A. in English from the University of Chicago. He is a native of Chicago.

At Penn State, Dr. Condee served as associate director of the Center for Continuing Liberal Education from 1958 to 1963. He is currently director of the Honors Program in the Department of English, a member of the board of directors of the Faculty Club and director of the Shakespearean Film Project.

During 1969 and 1970, Dr. Condee was a senior research fellow at Glasgow University.

Dr. Condee edited the volume, "Great Modern Short Stories," and was the co-author of three other books, "The Case for Poetry," "Modern Fiction" and "Exploring Religious Ideas."

He has contributed to Encyclopedia Britannica and has published articles in numerous journals. These include Shakespeare Quarterly, The Reporter, The Christian Scholar, Philological Quarterly, Studies in Philology, The Journal of English and Garmanic Philology, The Journal of General Education, The Wilson Bulletin and The Yale Review.



Library instruction may be arranged

In addition to providing tours of Pattee for undergraduate and graduate students, library staff will assist faculty members by arranging for basic instruction in library use for their classes. Arrangements may be made by calling Marietta Plank at 863-0323.

Reference department librarians will provide library instruction to upper-division and graduate classes. Contact Jack Pontius at 865-6368 for this service.

NEW HUE OPEN FOR BUSINESS — Above: Dishes slide forward automatically as plates are removed from front row. Signs are color-coordinated with menu board posted at entrance. In air-conditioned dining room, which seats 780, diners will bus their own trays to conveyor belt. Below: Exterior of new cafeteria, located southeast of original building.

Drivers have obligation to testify

An important reminder is given to all drivers of University vehicles by the University's Insurance Office.

If an accident occurs, the driver is responsible for submitting a report to the University Insurance Office (307 Shields Building, University Park) on the vehicle accident report form to be found in all University vehicles, usually in the glove compartment. This enables the Insurance Office than to file the required report of the accident with its insurance company.

If the University driver is at fault in the accident the insurance company pays the damages to the "other party". At the same time the University pays for its own damages to its car from its self-insured collision fund, charging the first $100 (deductible) to the University department that requested the car.

In an accident where the "other party" is at fault, a claim for the University's damages is made against such party. In many cases where the liability is clearly established (the "other party" is clearly at fault) the University recovers its loss (its claim is paid) by the "other party" or by such party's insurance company and the case is closed. In many other cases, however, the University must enforce its claim by resort to legal action. When this happens and the case comes to trial it is imperative that the University driver in company with the University's attorney be present; otherwise there is little or no chance of recovery for the University's automobile damages. When the University sues, the University's driver (and also, of course, any other witnesses) must be present in court to testify to the facts of the case.

To conclude and reiterate for emphasis, all University drivers necessarily assume the obligation of being ready, with reasonable notice, to testify on behalf of the University in the event of any accident in which a driver is involved.

11,500 freshmen are reporting throughout system

A freshman class of 11,500 students is reporting this week to the various campuses of the University for orientation and registration.

Among the freshman are 3,250 at University Park and 8,200 at the Commonwealth Campuses and Behrend College. The 8,200 include 6,350 enrolling for four-year programs and 1,900 enrolling for the two-year associate degree programs.

The 11,500 freshmen admitted for the Fall Term are in addition to 958 who began their college work at the opening of the Summer Term in June.

New students reporting at University Park, in addition to 3,250 freshmen, are expected to include 330 admitted with advanced standing, transferring from other colleges and universities; 600 former students re-admitted; and 3,460 students transferring from other campuses of the University. Approximately 430 students with advanced standing will be enrolling at Commonwealth Campuses and Behrend, and 390 former students have been re-admitted at these locations.

For the Fall Term, University officials expect an enrollment of about 52,400 resident instruction students at all locations, with 31,600 of them at University Park, according to Provost Russell E. Larson. Total enrollment is expected to increase approximately 1,350, with the increase at University Park expected to total about 425.

Guidelines set to assist students with problems

To assist students with classroom problems, exclusive of grades and grading, new guidelines have been adopted by the University as of Sept. 1.

The complete text of the guidelines will be published in INTERCOM later this month.

The guidelines were developed in accordance with a May 15 recommendation of the University Council, which spent several months studying the matter and apply at all campuses of the University.

The guidelines advise the student that problems often can be resolved by discussion with the faculty member directly concerned, the department head or the student's advisor.

If these avenues are considered inappropriate, the student is advised to seek recourse through the office of the appropriate associate or assistant dean of the College or Division in which the student is enrolled.

The student is assured that confidentiality will be maintained as appropriate.

The guidelines address various classroom situations, including the failure of a faculty member or administrator to uphold such University policies as the prohibition of smoking in classrooms or the prohibition on scheduling of comprehensive examinations on the last class period and early compilation of terms.

Other situations covered might include failure of a faculty member to fulfill his or her instructional obligations by unjustified cancellation of classes, frequent absenteeism or late arrival, failure to keep designated office hours and inappropriate substitution of teaching assistants.

PENN STATE COLLECTION

Fall Term 1975 Calendar
University Park Campus
The Pennsylvania State University

Thursday, September 4
Orientation and advising.
Registration.
College of Human Development Nutrition Program, Dr. Karl Y. Guggenheim, Hebrew University, on "Body Image of Adolescents and the Problem of Juvenile Obesity," 4 p.m., Room 204 Human Development.
Tours of Pattee Library at 9, 10, 11 a.m. and, 2, 3, 4 p.m., lobby of Pattee.
Open House, Pollock South Undergraduate Library, 7 p.m.
"Music of Black America," presented by Pearl William Jones, singer, pianist, concert artist, 8 p.m., Schwab.
Sports: Soccer, vs. Birmingham, 7 p.m., Jeffrey Field.
Graduate student tours of Pattee Library at 10 and 11 a.m., 1 and 3 p.m., E105 Pattee Library.

Friday, September 5
Orientation and Advising.
Registration.
College of Human Development Nutrition Program, Dr. Karl Y. Guggenheim, Hebrew University, on "Nutritional Health In a Changing Society — Studies from Isreel," 4 p.m., Room 204 Human Development.
Tours of Pattee Library at 9, 10, 11 a.m. and 2, 3, 4 p.m., lobby of Pattee.
Introduction to special programs for black students, 6:30 p.m., Cultural Center, Walnut Bldg.
Sports: Soccer, Pre-Season Tournement, 7 p.m., Jeffrey Field.
Graduate student tours of Pattee Library at 10 and 11 a.m., 1 and 3 p.m., E105 Pattee Library.

Saturday, September 6
Registration, until noon.
Hetzel Union Board Jammy, 8 p.m., HUB ballroom.
PSOC Hiking Club, annual Mt. Nittany climb with tube steak supper, meet 1:30 p.m., HUB lawn.
Graduate Student Association social, 8 p.m., Room 102 Kern.

Sunday, September 7
Free U will provide free movies and cartoons, 9-11 p.m., Old Main Lawn.
PSOC Hiking Club, circuit hike on Mid-State Trail System, 9 a.m.
Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Elder Gerald G. Loyd, Pastor, Black Christian Fellowship.

WEEK OF SEPTEMBER 8

Monday, September 8
Classes begin 8 a.m.
Drop-Add sub-station 1-4 p.m., HUB.
Tours of Pattee Library at 9, 10, 11 a.m. and 2, 3, 4 p.m., lobby of Pattee.
Open House, Main Undergraduate Library, W106 Pattee.
Colloquy program, 8 p.m., University Auditorium, Euell Gibbons, edible wild plants expert.
Graduate student tours of Pattee Library at 9:35 and 11:10 a.m., 1 and 2:20 p.m., E105 Pattee Library

Tuesday, September 9
Drop-Adds sub-station 1-4 p.m., HUB.
Tours of Pattee Library at 9, 10, 11 a.m. and 2, 3, 4 p.m., and at 7 p.m., lobby of Pattee.
Graduate student tours of Pattee Library at 9:35 and 11:10 a.m., 1, 2:20 and 7 p.m., E105 Pattee Library.

Wednesday, September 10
Claremont Woodwind Quintet, 8:30 p.m., Music Bldg. recital hall.
Organizational meeting of the Penn State Forensic Team, 7 p.m., Room 13 Sparks.
Free U fall orientation, 7:30 p.m., Findlay Rec Room.
Drop-Adds sub-station 1-4 p.m., HUB.
Tour of Pattee Library, 7 p.m., lobby.
Claretnet Woodwind Quintet, general orientation and recruitment, 7 p.m., HUB reading room.
Noontime Concert, 12 noon, lobby of Kern.
Graduate student tours of Pattee Library at 9:35 and 11:10 a.m., 1 and 2:20 p.m., E105 Pattee Library.

Thursday, September 11
Free U meeting for new course initiators, an introduction to teaching with Free U, 7 p.m., HUB lounge upstairs.
Drop-Adds sub-station 1-4 p.m., HUB.
East Undergraduate Library Open House, 7 p.m., basement of Findlay.

Gallery talk, William Hull, Museum Director, on "200 Years of Royal Copenhagen Porcelain," 10:30 a.m., Museum of Art.
Senate Council meeting, 2 p.m., Room 101 Kern.

No. 67 is Greg Gaille, linebacker and co-captain of the 1975 team who hopes to get opposing quarterbacks in his grasp often before they can throw the ball. Faced with one of the toughest schedules in Penn State history, this year's team will have to mature early, the experts say, to stay high in public rating, and Buttils and other defensemen could be the key.

Wednesday, October 29
Alard String Quartet, 8:30 p.m., Music Bldg. recital hall.
PSDC Ski Clinic, 7 p.m., HUB ballroom.
Noontime Concert, 12:15 p.m., lobby of Kern.

University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.
Commons Videotape Showing, 12 noon, lobby of Kern.

Friday, October 31
Peter Brye, cello recital, 8:30 p.m., Music Bldg. recital hall.
Last day for signing Fall Term NDSL, SEDG, BEOG, and University Long Term Loans, Room 108 Shields.
G.S.A.'s Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.

Saturday, November 1
Sports: Men's Cross Country, PIAA Championships, Men's Central Collegiate Championships.
University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.

Sunday, November 2
PSDC Hiking Club, exploration in Big Kettle and Buck Ridge Area of Rothrock State Forest, 9 a.m.
Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Joseph Faulkner, sociology.
Black Christian Fellowship worship service, 11 a.m., Black Cultureel Center. Elder Gerald G. Loyd, Pastor, Black Christian Fellowship.

WEEK OF NOVEMBER 3

Monday, November 3
Artists Series, Samuel Gallu in "Give 'Em Hell, Harry," one-man show based on the life of Harry S. Truman. 8:30 p.m., University Auditorium.
Colloquy program, 8 p.m., Schwab. Florynce (Flo) Kennedy, attorney and author.

Tuesday, November 4
Sports: Women's Field Hockey, vs. Lock Haven, 3 p.m.
University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.
Artists Series, Fellini Film Festival, "I Vitelloni," 8:30 p.m., University Auditorium.

Wednesday, November 5
Philip Dettra, piano recital, 8:30 p.m., Music Bldg. recital hall.
University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.
Noontime Concert, 12:15 p.m., lobby of Kern.
Colloquy program, 8 p.m., University Auditorium. Betty Friedan, author.

Thursday, November 6
University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.
Commons Videotape Showing, 12 noon, lobby of Kern.

Friday, November 7
Folk and Square Dance Roundup, 7:30 p.m., White Bldg.
G.S.A.'s Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Sports: Soccer, vs. Temple, 7 p.m., Jeffrey Field.
University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.

Saturday, November 8
Sports: Lady Lion Cross Country Classic. Football, vs. North Carolina State, 1:30 p.m.
Hetzel Union Board Annual Jammy. 8 p.m., HUB ballroom.
University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.

Sunday, November 9
Kathy Kellie, oboe recital, 3:30 p.m., Music Bldg, recitel hall.
PSDC Hiking Club, exploration in Big Kettle end Buck Ridge Area of Rothrock State Forest, 9 a.m.
Chapel Service, 11 a.m., Music Bldg. recitel hall, Joseph Rhodes, Jr., State Legislature Representetive, member, Board of Trustees.
Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Rev. David Minor, Pastor, The Gospel Assembly, Coudersport, Pa.

WEEK OF NOVEMBER 10

Tuesday, November 11
Gallery talk, Mary L. Myers, associate curator, Metropolitan Museum of Art, on "Architectural end Ornament Drawings: Juvarra, Vanvitelli, the Bibiena Family, and Other Italian Daughtsmen," 10:30 a.m., Museum of Art.
Senate meeting, 2:10 p.m., Room 112 Kern.

Wednesday, November 12
Concert of Women Composers, 8:30 p.m., Music Bldg. recital hall.
Artists Series, Four Decades of American Film Festival, "All Quiet on the Western Front," 8:30 p.m., University Auditorium.
Noontime Concert, 12:15 p.m., lobby of Kern.

Thursday, November 13
Commons Videotape Showing, 12 noon, lobby of Kern.

Friday, November 14
Last day for signing Fall Term Emergency Loans, Room 108 Shields.
G.S.A.'s Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Sports: Soccer, vs. Pittsburgh, 7 p.m., Jeffrey Field.

Saturday, November 15
Classes end.
Sports: Women's Cross Country USTFF Meet.

Sunday, November 16
Sports. Men's Cross Country Eastern USTFF Championships.
PSDC Hiking Club, hunt for Old Wheeler, Brewer and other trails on Tussey Ridge, 9 a.m.
Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Elder Harold McKenzie, Chairman of Black Christian Fellowship, Board of Elders.

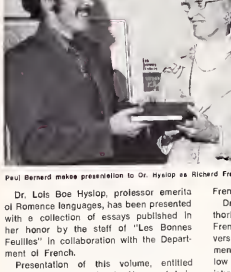
WEEK OF NOVEMBER 17

Monday, November 17
Final examinations.

Tuesday, November 18
Final examinations.
College of Agriculture faculty meeting, 4 p.m., Rooms 301 A and B Ag Administration.
G.S.A. Council meeting, 7 p.m., Room 101 Kern.

Wednesday, November 19
Final examinations.

Thursday, November 20
Central Pa. Soc., AIA, 8 p.m., Room 101 Kern, lecture by E. J. W. Barber, Occidental College, on "Archaeological Decipherment."



Sunday, November 23
Sports. Men's Eastern USTFF High School Championships.

WEEK OF NOVEMBER 24

Monday, November 24
Sports. Men's Cross Country NCAA Championships.

Saturday, November 29
Commencement, 10:30 a.m., Rec Hall.

Dr. Hyslop honored by colleagues

Paul Bernard makes presentation to Dr. Hyslop as Richard Frautschi looks on.

Dr. Lois Boe Hyslop, professor emerita of Romance languages, has been presented with a collection of essays published in her honor by the staff of "Les Bonnes Feuilles" in collaboration with the Department of French.

Presentation of this volume, entitled "Essays on Baudelaire In Honor of Lois B. Hyslop," was made at a reception Aug. 23, attended by colleagues, friends and former students. Dr. Richard Frautschi, professor and head of the Department of French, and Paul Bernard, editor of "Les Bonnes Feuilles," were principal speakers at the presentation.

The essays deal with various aspects of Baudelaire studies, such as art criticism, authorship and attribution, interpretation, literary influences and musical settings. Contributors include several eminent authorities on the work of the 19th century French poet.

Dr. Hyslop, who is a well-known authority on Baudelaire and 19th century French literature, was a member of the University faculty from 1948 until her retirement last year. She also was a senior fellow of the Institute for the Arts and Humanistic Studies. Her works include four books on Baudelaire, written in collaboration with her husband, Francis, who is professor emeritus of art history.

"Les Bonnes Feuilles," now in its third year of publication, is a journal of French literary studies published semi-annually by graduate students under the auspices of the Department of French. "Essays on Baudelaire in Honor of Lois B. Hyslop" is the sixth issue of the journal and is available at $3.00 per copy from the editors of "Les Bonnes Feuilles," 5401 Burrowes Bldg.

Staff vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (Network Line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Thursday, Sept. 11. **Do not contact the area that has the vacancy.**

ADMINISTRATIVE AIDE, (2 positions), COLLEGE OF HUMAN DEVELOPMENT, DIVISION OF BIOLOGICAL HEALTH, DIVISION OF COMMUNITY DEVELOPMENT — University Park

Assist Director in planning and preparing division budget, research budgets, monitor expenditures of funds on various budgets; approve expenditures as funds are allocated by Director; responsible for maintaining divisional personnel information system, student record system and supply data when needed; be aware of and instruct Director, faculty and support staff of University policies; maintain liaison with Office of Administrative Services; administer academic support functions such as class scheduling, registration, seminars and meetings. Bachelor's degree or equivalent in Business Administration or equivalent. Over one year of directly related administrative supervisory experience

PATIENT FOOD SERVICE SUPERVISOR — Hershey

Responsible for operation, scheduling, and supervision of personnel in the Food Service Department High School plus at least two years of formal outside training and 1 to 2 years directly related food service experience.

RESEARCH AIDE-MICROSCOPIST, COLLEGE OF EARTH & MINERAL SCIENCES — University Park

Conduct microscopic analysis of coal samples; interpret data gathered through examination, establish techniques and procedures for obtaining petrographic data; process data by calculator and computer, maintain accurate records and files. Bachelor's degree or equivalent with some courses in physical science plus one year of laboratory-related experience. Geology background desirable.

ASSISTANT TO THE DEAN OF STUDENT AFFAIRS — Berks Campus

Responsible for administration of student activities and cultural program. Provides general assistance to the Dean in administration of Student Affairs programs and services. A Master's degree or equivalent in student personnel work or related field and one to three years of related experience

Funding opportunities

For procedural and funding source information, call 865-1372.

(10-1) The NSF program **Ethical and Human Value Implications of Science and Technology** (EHVIST) has a Jan. 15, 1976, closing date for **case studies** and a Feb. 15, 1976, date for **other projects**. The EHVIST program supports research, education and public understanding projects in: (1) impact of new developments in science and technology in the values of society; (2) impact of societal values on the development of science and technology, and (3) value issues which arise when science and technology. Projects include in-depth case studies, experimental summer workshops or institutes and national conferences or workshops. (Ref. NSF 75-19)

(10-1) The Office of Education has issued proposed rules for its new **Women's Educational Equity Program.** Projects will be funded to develop and disseminate approaches and products of national impact such as: (1) **systemic change** to eliminate sex role stereotyping which limits the aspirations, experiences, and options of women; (2) **institutional change** to eliminate discriminatory practices and policies in educational agencies; and (3) **remediation** for individuals through special opportunities and training to overcome past discriminatory practices. Funding will be made through grants, small grants (up to $15,000), and contracts (technical assistance and workshops). Grant priorities include: training modules to provide preservice and inservice training; exemplary education leadership programs, and development of programs to broaden career options for women. This information has been distributed. (Ref 40FR33801-09, 8/11/75).

(10-1) The National Endowment for the Arts has published guidelines for its **Jazz/Folk/Ethnic Music grants program** (deadline Oct. 1, 1975. Included under the **Jazz category** are: composer/arrangor, instrumentalists/singer, travel/study and preservation/program/residency fellowship grants. The **Folk/Ethnic category** includes: presentations, documentation/preservation/dissemination, pilot study and general grants. Also announced with the same deadline are Opera grant guidelines. Contact for both programs is. Walter Anderson, Director, Music Program, NEA, Washington, D.C. 20506 (202-634-6398). (Ref. 40FR 37101-07, 8/25/75).

(10-6) The **Internamerican Foundation** (1515 Wilson Blvd., Rosslyn, Va 22209) offers learning fellowships on social change to pre-and post-doctoral scholars. Stipend is $550 per month plus maintenance, health and travel allowances for 6-24 months. Fellows are expected to affiliate with an institution in a Latin American or Caribbean country and must speak the host-country language. Program objectives are to contribute to research and scholarship on social change, to learn from Latin American and Caribbean social change programs and to advance academic-practitioner cooperation. The application deadline is Dec. 1, 1975. For application forms and further information, write to the address given above. (Ref. FO 75-23).

(10-7) The **Danforth Foundation** has sent a supply of special forms to be used in applying for Graduate Record Examinations. The application deadline for these fellowships will be announced later. Applications will probably be due in the Graduate School in late October (compare Fellowship Announcement 74-20). All applicants must apply no later than Sept. 22 for aptitude and advanced Graduate Record Examination tests to be given Oct. 18. Persons planning to apply should pick up the forms at 317 Kern and make an appointment for an interview with B. F. Howell, Jr. for the week of Sept. 15. (Forms can be picked up at that time if any are left.) (Ref. FO 75-23).

Faculty notes

Dr. Raymond Ayoub, professor of mathematics, was among six mathematicians honored with Lester R. Ford Awards at the 55th annual summer meeting of the Mathematics Association of America last month. The award is presented annually to six authors of expository articles on mathematical topics judged outstanding by a subcommittee of the association's Committee on Publications. Dr. Ayoub's winning article was "Euler and the Zeta Function" published in the Mathematics Monthly. Head of the Mathematics Department from 1968 to 1971, Dr. Ayoub joined the Penn State faculty in 1962 after serving as Pierce instructor at Harvard University. A specialist in analytic number theory, he is the author of the section entitled "An Introduction to Analytic Theory of Numbers" in the current Encyclopedia Britannica.

Dr. Charles L. Newman, professor of law enforcement and corrections, has received the 1975 Distinguished Service Award of the Kentucky Council on Crime and Delinquency. Dr. Newman was cited for his initiation and development of in-service training for probation and parole personnel and for his continuing contribution to the professional literature in criminal justice.

Dr. James W. Keiz, professor of education and assistant director of the rehabilitation education programs, has been appointed a U.S. delegate to the International Association for Education and Vocational Guidance General Assembly, to meet during the Association's Seminar in Lisbon, Portugal, in September. He will represent the National Vocational Guidance Association, of which he is the current president. This is an organization of 10,000 members and a major division of the American Personnel and Guidance Association.

Two College of Agriculture faculty members, **Dr. Dale E. Baker** and **Dr. Donald A. Jung,** were named Fellows of the American Society of Agronomy at the society's annual meeting last month in Knoxville, Tenn. They were among 20 scientists elected for professional achievements and meritorious service. Dr. Baker is professor of soil chemistry. His career has been largely in research and graduate teaching, with emphasis on soil chemistry and soil plant relationships involving ion uptake by plants. Dr. Jung is research agronomist with the U.S. Regional Pasture Research Laboratory at University Park and adjunct professor of agronomy. His research concerns the interrelationships among climatic, soil-related factors, and genetic factors affecting plant growth and persistence — and animal performance such as growth rate.

Shartel Heads NROTC

Capt. Howard A. Shartel, USN, has assumed command of the Naval ROTC Unit and will head the Department of Naval Science.

A graduate of the U.S. Naval Academy, where he received a B.S. in electrical engineering in 1950, Capt. Shartel has an M.S. in aeronautical engineering from the Massachusetts Institute of Technology. He has extensive flying time in both helicopters and fixed wing airplanes.

He was commanding officer of an aircraft squadron and commander of Carrier Air Group 52, as well as assistant project manager for engineering for the new Lockheed Viking anti-submarine warfare aircraft and branch head of the Helicopter Engineering and Design Section in the Naval Air Systems Command in Washington, D.C.

Orchestra to rehearse

The State College Symphony Orchestra will begin rehearsals Monday, Sept. 8, at 7:30 p.m. in the Band Room of the Westerly Parkway Senior High School under the baton of Donald Hopkins, associate professor of music.

The first two rehearsals will be open to interested persons, with auditions scheduled after that period. Membership is open to any qualified musician in the area. Further information may be obtained from Hopkins at 238-4436; Ann Keller, 466-6902; and Robert Manning, 466-6698.

11 appointed

The following new faculty have been named effective Sept. 1.:

Judith A. Burns, as assistant professor of speech communication at Ogontz. A candidate for a Ph.D. in speech communication from Penn State, she has a B.A. from Depauw University and an M.A. from Indiana State in Terre Haute.

Ronald G. Johnson, as assistant professor of physics at Delaware County. A former instructor at Erindale College of the University of Toronto, he has a B.A. in physics from Gustavus Adolphus College and an M.S. and Ph.D. from Iowa State.

Christopher L. Johnstone, as assistant professor of speech communication at Delaware County. His A.B. in rhetoric is from the University of California at Davis, and his M.A. and Ph.D. in communication arts are from the University of Wisconsin at Madison.

Richard J. Kramer, as assistant professor of mathematics at Delaware County. His B.A. is from Fordham University, his Ph.D. from the University of Pennsylvania. He has been an instructor at University Park and also taught at Rosemont College.

Stephen P. Lagoy, as assistant professor of criminal justice at Delaware County. A member of the Maine and Massachusetts bars, he has a bachelor's degree in international affairs from Georgetown University, an M.S. in criminal justice from Northeastern University and a J.D. from the University of Maine School of Law.

Dr. Charles R. Matthews, as assistant professor of chemistry. He has been a post-doctoral fellow in the Department of Biochemistry at Stanford University Medical Center. He received a Ph.D. in chemistry from Stanford in 1974, and is a graduate of the University of Minnesota. He is a specialist in biophysical chemistry.

Gregory L. Naber, as assistant professor of mathematics at Delaware County. Formerly a member of the faculty at Du-Bois, he was granted his B.S., M.S. and Ph.D. by Carnegie-Mellon.

Dr. Darrell J. Steffensmeier, as assistant professor of sociology. He was graduated from St. Ambrose College and holds advanced degrees from the University of Iowa. He has taught at North Carolina State University since 1971.

Troy Thomas, as assistant professor of humanities and art at Capitol Campus. He is a graduate of the Philadelphia Museum College of Art, earned master's degrees from Bucknell University and the University of Colorado and is concluding a Ph.D. program at the University of California, Berkeley. His specialty is Italian Renaissance art.

Merry Lynn Blount, as instructor in health, physical education and recreation. Former assistant coach of the women's varsity golf team at University Park, she has a B.S. from the University of Arizona and an M.S. from Penn State.

Robert L. Stout, as instructor in economics. A doctoral candidate at Penn State, he also obtained his B.S. and M.A. here.

Dr. Clark retires

Dr. Robert E. Clark, professor of sociology, retired Sept. 1 after 28 years of service. Dr. Clark specialized primarily in the areas of social problems, criminology and penology.

He is the author of a monograph, published in 1969, on "Critical Values in 2X2 Tables," co-editor of "Criminology: A Book of Readings," and in 1972 published a book on "Reference Group Theory and Delinquency."

He also has written a number of technical papers dealing with such subjects as the relationship of occupations to mental disorders, statistics and parole.

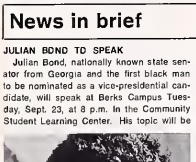
Born in Litchfield, Ohio, Dr. Clark earned his B.A. in sociology at the University of Akron. Both his M.A. and Ph.D. degrees in sociology were conferred by the University of Chicago. He worked as a junior and senior sociologist actuary with the division of pardons and parole of the State of Illinois and served in the United States Navy from 1943 to 1946 as a lieutenant.

PENN STATE intercom

Volume 5, Number 2 September 11, 1975

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Faculty club framework going up on schedule behind Inn



Photos provide evidence that Penn State's new faculty club is on the way at last. Facility is due to open in September, 1976.

News in brief

JULIAN BOND TO SPEAK

Julian Bond, nationally known state senator from Georgia and the first black man to be nominated as a vice-presidential candidate, will speak at Berks Campus Tuesday, Sept. 23, at 8 p.m. in the Community Student Learning Center. His topic will be

Julian Bond

"What's Next." Bond, who helped found the Committee on Appeal for Human Rights and the Student Non-Violent Coordinating Committee, has published his collected speeches under the title, "A Time to Speak, A Time to Act," and has also written a number of poems and articles. Tickets for his talk are available through the Office of Student Affairs at Berks.

PROGRAM TALENT FUND

To provide financial support toward the contractural fees charged by performers appearing in Artists Series events, a Program Talent Sustaining Fund has been established. The plan will also help meet demands for tickets to heavily subscribed events.

Patrons who are uneble to attend a performance are being asked to return their tickets prior to the event, either by mail or in person, to the Artists Series office, 203 Schwab Auditorium. Patrons will receive a receipt for their tickets, which will then be offered for sale at face value.

Receipts from tickets thus sold will be deposited in the Program Talent Sustaining Fund, and patrons will receive a tax deductible receipt for the face value of the ticket as a donation to the fund. Unsold tickets will be returned to their owners.

When making sales, Artists Series ticket sellers have been asked to give priority to tickets which have been turned in.

UNICARE APPROVED

The Pennsylvania Insurance Department has notified Penn State that our UNICARE group medical insurance is considered a qualified plan under the provisions of the new "no-fault" auto insurance law. This means that faculty and staff may elect the option under the law which provides a small discount in the auto insurance premium if UNICARE is designated as the primary plan for paying medical expenses resulting from an accident. Anyone interested in electing this option should contact their insurance agent.

FELDMAN TO PERFORM

Leonard Feldman, associate professor of music and cellist with the Alard String Duartet and the Thalia Trio, will present a cello recital at 8:30 p.m. Wednesday, Sept. 17, in the Music Bldg. recital hall.

Of the six works to be presented by Feldman, four were composed directly for the cello or adapted for that instrument by the composer, as were the two meditations to be performed from Leonard Bernstein's "Mass." Other selections on the program written directly for cello are Rachmaninoff's "Sonata in G Major," "Requiebros" by Spanish cellist Cassado, and "Sonata for Solo Cello" by Philadelphia composer George Crumb.

Arranged for cello from the originals for violin are "Chaconne" by Vitali and "Zapateado," a shoemaker's dance written by Sarasate and arranged by Rose.

Assisting Feldman will be pianist Philip Dettra, assistant professor of music.

(Continued on page two)

Worker influence is topic of Levison lecture

Andrew Levison, the man who shattered some myths about the American blue collar worker in his book, "The Working Class Majority," will speak at the University on Friday, Sept. 19.

He will discuss "Worker Influence in Political and Economic Policy" at 3:30 p.m. in Room 112 Kern Graduate Bldg. The talk is sponsored by the Department of Sociology as part of the department's continuing education program. Levison serves as research associate at the Martin Luther King Jr. Center for the Study of Change, Atlanta, Ga.

"The Working Class Majority" presents American workers as a viable force for political and economic reform. As a critique of the status of workers in a time of inflation and a slackening economy, the book explodes the notion of worker well-being and economic security.

In a review of the book in the summer issue of "Dissent," Jonathon Rieder says:

"'The Working Class Majority' is an unpretentious little book, written with clarity and common sense. Its point of departure is the 1972 desertion of blue-collar workers to Nixon. Levison's audience and the objects of his pique are those left liberals who slighted worker discontent, glamorized blacks and youth and persisted in a destructive liberal confusion about social class. They entertained a variety of myths about the working class: its integration into the middle class, its affluence and its political conservetism.

"Levison proceeds to shatter these myths, fusing personel anecdote, statistical data and trenchant argument."

In his book, Levison concludes that the detection of workers can be attributed to the failures of liberel planners and leaders more than to any other cause.

Everything is on schedule for the Faculty Club building. According to Dr. Donald R. Olson, head of the Department of Mechanical Engineering and club president, the facility should open, as planned, in September, 1976.

"We are just beginning to plan for the interior of the building," says Dr. Olson, pointing out that the firm of Venturi and Rauch, Architects, has been hired for the effort. This is the same firm that designed the building.

Dr. Olson also reminds that the club facility will be "full service," utilizing its own kitchen facilities — not those of the Nittany Lion Inn.

"Later this fall, we will survey a large number of faculty as to their desires for service in the building," says Dr. Olson. "This survey will help guide our planning."

He adds that a membership drive will start in January.

The other officers of the Faculty Club, who began their term Sept. 1, are: vice president, Dr. Peter Bennett, professor of marketing; secretary, Dr. Robert L. Clewett, professor of marketing; and treasurer, Dr. James Dungan, director of institutional research and planning in the Office of Budget and Planning.

Acting Affirmative Action head named

Robert L. Kidder, manager of the Employment Division, has been named acting affirmative action officer for the University.

He succeeds Dr. Patricia Farrell, who has held the position since January, 1973, and who has now returned to her duties as associate professor of recreation and parks.

In his work with the Office of Personnel Administration, Kidder worked closely with Dr. Farrell and the Affirmative Action Office, explains Provost Russell E. Larson, who has responsibility for the office.

A 1961 graduate of the University with a B.S. in business administration, Kidder was formerly affiliated with Nationwide Insurance Companies.

PENN STATE COLLECTION

News in brief—

(Continued from page one)

CATALOG AVAILABLE

A 96-page catalog for the exhibition of figurative drawings by Carlo Maratti and his contemporaries, held last spring at the Museum of Art, is now available at the Museum store. Prepared by Jean K. and Robert H. Westin, both of whom are doctoral candidates in art history here, the catalog contains some 60 black-and-white reproductions. Information on the artists and their drawings is included, along with an introductory essay.

FACULTY TOURS

Pattee Library will offer faculty orientation tours from Monday, Sept. 15, through Thursday, Sept. 18. Tours begin in the Reference Room, E105 Pattee.

EVAN PUGH MEMORABILIA

An exhibit featuring the microscope and laboratory equipment of Penn State's first president, Dr. Evan Pugh, has been installed in the gallery of the Earth and Mineral Sciences Museum in the Mineral Industries Bldg. The groundwork for instruction and research in the mineral industries at Penn State was begun under Pugh. As a result of his encouragement, three of the 11 theses prepared by members of the first graduating class of 1861 had to do with minerals. Photocopies of the title and dedication pages from one of these theses are included in the exhibit.

YORK EXHIBITS

Area artists will have their works displayed during a series of five exhibits scheduled during the coming year at York Campus. The opening show, which will run from Sept. 14 through Oct. 17, will feature the oils, prints and watercolors of Liza Flemming, an instructor at Boyertown East Junior High School.

NEWCDMERS' COFFEE-DESSERTS

The Newcomers' Club of the Faculty Women's Club will sponsor a series of coffee-dassorts the week of Sept. 15 to welcome new women faculty and administration members and wives of new faculty and administrators. Each gathering will begin at 8 p.m., and newcomers have a choice of the following evenings. Monday, Sept. 15, at the home of Peggy Kendall, 714 Devonshire Dr., with co-hostesses Marie Leafh and Susan Hershberger; Tuesday, Sept. 16, at the home of Kay Christoffers, 949 Robin Rd., with co-hostess Andrea Lee; Wednesday, Sept. 17, at the home of Pearl Forth, 963 E. McCormick, with co-hostesses Kathy Zeugner and Cindy Jackson; or Thursday, Sept. 18, at the home of Peggy Paulsed, 439 W. Park Ave., with co-hostess Bonnie Godbey.

CENTER DEDICATED

The new Student Learning Center at New Kensington Campus was dedicated during the annual Parents Day last Sunday, Sept. 7. Principal speaker was Kenneth L. Holderman, a member of the University Board of Trustees. The $650,000 structure, financed by funds raised by the Advisory Board in a local drive, contains a food service area, bookstore, student activities area, large study areas, student government offices and offices for the student affairs staff.

REPLACEMENTS SET

Replacements for "Our Town" and "King Lear," originally scheduled for this year's Artist Series on Oct. 4 and 5, respectively, have been announced.

"Give 'Em Hell, Harry," a one-man show based on the life and times of Harry S. Truman, portrayed by Samuel Gallu, will be presented Monday, Nov. 3. Tickets for this performance, which is part of the Performing Arts in America series, will go on sale Tuesday, Sept. 16, at the HUB booth and University Auditorium from 9 a.m. to noon and from 1 to 4 p.m.

Famed pantomimist Marcel Marceau will replace the "King Lear" performance Jan. 10. This show, part of the Theatre-Dance series, is sold out.

Because of an unprecedented demand for tickets this fall, the Artists Series advises anyone wishing tickets to obtain them at once since very few now remain. Tickets are available at the HUB, the Auditorium box office or at 203 Schwab Auditorium.

LONDON BUS SCHEDULE

Campus tours on the University's London double decker bus are available Fridays only during Fall Term. The bus will leave the HUB at 3:30 p.m., with a trained guide to brief passengers on the 30-minute ride. Tickets are available at the HUB desk for 25 cents. The bus will also leave the foot of the Mall at College Avenue and South Allen Street at 10 and 11 a.m. on the Saturdays of home football games.

PARKING RELDCATED

The visitor parking area for the off-central portion of the University campus has been relocated from the Undergraduate Library to parking area Brown F. The new location, accessible from Shortlidge Road, provides additional visitor parking space and is adjacent to the Hetzel Union Bldg. and the new Terrace Room Cafeteria.

New appointments

New appointments to the faculty include:

Carl W. Sherman as associate professor of petroleum and natural gas engineering. B.S. and M.S. in petroleum and natural gas engineering, Penn State. Formerly manager of operations, Honeoye Storage Corp.; acting chief, systems planning, Gas Division, N.Y. Public Service Commission; director, Division of Mineral Resources, N.Y. State Department of Environmental Conservation.

R. Thomas Berner as assistant professor of journalism. B.A. English, Penn State; M.A. journalism, Penn State. Former city editor, Centre Daily Times and Pennsylvania Mirror.

Dr. Michael M. Coleman as assistant professor of polymer science. B.S. Borough Polytechnic, London; M.S and Ph.D., Case Western Reserve. Research chemist for E. I. DuPont de Nemours for past two years.

John N. Rippey as assistant professor of journalism. B.A. English, Bates College; M.A. Columbia School of Journalism. Formerly reporter, Providence Journal; staff of University of Rhode Island's Public Information office, assistant professor of journalism, Syracuse University.

Dr. Eli Sani as assistant professor of mineral economics. B.A. economics, Hebrew University, Jerusalem; M.B.A. finance, Wayne State; Ph.D. finance, Penn State. Formerly director of pension and investment department of Mlchchlm Insurance Co., Tel-Aviv

Craig D. Tenney as assistant professor of journalism. B.A. speech, Cornell College; M.A., speech, theatre and broadcasting, University of Michigan. Ph.D. candidate, Indiana University. Formerly news director, Station KCRG, Cedar Rapids, Iowa; radio presentations consultant; public relations and advertising work.

Capitol program gets HEW grant

The Cooperative Education Program at Capitol Campus has received a $30,000 grant from the U.S. Department of Health, Education, and Welfare.

Initiated during the summer term of 1975, the Cooperative Education Program at the Campus provides students the opportunity of alternating six months of study and six months of career-related work experience. Programs include business administration in accounting, or electrical design engineering technology. A normal two-year course takes two-and-one half years.

Presently 36 students are enrolled in the Cooperative Education Program, with 26 in electrical design engineering technology and 10 in business administration-accounting. After finishing their first six months of study in December, the students will work in different businesses and companies. They will return tor more class work the following June. The Co-op student normally spends two six-month periods in a career-related work experience and three six-month periods at Capitol Campus.

The student in electrical design engineering technology learns various skills necessary in adapting new scientific knowledge to new products. Business administration-accounting students take courses which lead to managerial positions.

The project director for the Cooperative Education Program is Richerd Schulz. According to Schulz the money from the HEW grant, which is part of the Higher Education Act of 1965, will be used to administer the program.

Faculty notes

Dr. F. G. Brickwedde, Evan Pugh Research Professor of Physics Emeritus, has been elected a Fellow of the Acoustical Society of America. He was honored "for contributions to ultrasonic and magnetoacoustics." Internationally known for his pioneering research in low temperature physics, Dr. Brickwedde is also a co-discoverer of deuterium, an isotope of hydrogen. He came to Penn State in 1956 as dean ot the College of Chemistry and Physics and served in that post until 1963 when the College of Science was formed, and he was named an Evan Pugh Professor Since his retirement in 1968, he has continued to conduct research, to teach and to serve on scientific commissions. Dr. Brickwedde is also a fellow of the American Physical Society and of the American Association for the Advancement of Science.

Dr. John R. Ezzell, associate professor of finance, was named acting head of the Department of Finance in the College of Business Administration, effective July 1. Dr. Ezzell received his baccalaureate degree from Ohio State University in 1964, his M.B.A. from the same university in 1965, and his doctorate in finance from Penn State in 1970. His predecessor, Dr. George C. Philippatos, professor of finance, is on sabbatical leave from the University and is serving as visiting professor at the Escuela de Administracion de Negocios para Graduados (ESAN) in Lima, Peru. Dr. Ezzell's primary research interest is in the area of corporate finance, with special interests in dividend and financing policies. He has published numerous articles in professional financial journals.

Dr. Andrew Pytel, associate professor of engineering mechanics, has been elected chairman of the mechanics division of the American Society for Engineering Education by the division's executive committee. Dr. Pytel also serves as chairman of the mechanics division of the Middle Atlantic section of ASEE and is past chairman of the Penn State branch of that organization. Over 1,600 members of ASEE are affiliated with the mechanics division.

Dr. Paul Edmonston, associate professor of art education, travelled to Barcelona, Spain, to present two papers and participate on a panel with a group of international art educators attending the First International Congress for Teaching in the Visual Arts. The Congress concluded August 30. Over 1,600 members of "Societies for Learning In the Visual Arts" and the other dealt with a survey of contemporary Images of man appearing in painting and scripture.

Dr. Jon P. Gunnemann, assistant professor of religious studies, is the editor of a new book, "The Nation-State and Transnational Corporations in Conflict," published by Praeger. Dr. Gunnemann was asked to compile the book, for which he also wrote an introduction and analytical summary, from papers delivered at a conference held two years ago at the Aspen Institute of Humanistic Studies under the sponsorship of the Council on Religion and International Affairs. He is co-author of an earlier work, "The Ethical Investor."

Frank W. Peikert, professor and head of the Department of Agricultural Engineering since 1954, retired Sept. 1 as professor emeritus of agricultural engineering. He has been engaged in teaching agricultural engineering since 1934, with the exception of a year in the 1940s as development engineer with Goodyear Tire and Rubber Co. He served on the faculties of the University of Georgia, Texas A. and M., and Michigan State University and headed the Department of Agricultural Engineering at the University of Maine.

At Penn State, Professor Peikert established joint administration of the department by the Colleges of Agriculture and Engineering, earned accreditation from the Engineers' Council for Professional Development and developed a Ph.D. program. His chief rasaarch interasts have been in agricultural powar machinary and irrigation, and he has publishad mora than 50 technical articles and research bulletins. He and his wife, Jeanette, will remain in State College.

Dr. Edwin Herr, professor and head of the Department of Counselor Education, is the senior author of "Conditions in Education Calling for Reform: An Analysis," Writing with Professor Stanley Cramer of the University of Buffalo, Dr. Herr examines research and theory bearing upon eleven conditions allegedly pointing to the need for educational reform in America. The monograph is the first of a series on Career Education to be published by the Office of Career Education, U.S. Department of Health, Education and Welfare.

Dr. George E. Brandow, professor of agricultural economics, received the Publication of Enduring Quality Award from the American Agricultural Economics Association during the organization's annual meeting at Ohio State University. His publication, "Interrelationships among Demands of Farm Products and Implications for Control of Market Supplies," was judged to be the best research publication published in the field of agricultural economics from 1950 to 1964 It was Issued as Bulletin 680 of Penn State's Experiment Station. Dr. Brandow was named a Fellow of the Association in 1966 and served as association vice president in 1958 and president in 1963

Dr. Jessie Bernard, professor emerita of sociology, has been named to the newly-created National Board of Courses by Newspaper, a netionwide educational program offered in cooperation with newspapers. Dr. Bernard retired from the University in 1964, after serving for 18 years as a member of the sociology faculty. Sha is the author or co-author of a number of books, including "Academic Women" and "The Sex Game." Since Courses by Newspaper began in 1973, nearly 9,000 students have enrolled for credit in courses offered at approximately 200 participating colleges.

Emeritus status has been granted **Dr. Walter J. DeLacy,** professor of education, who retired Sept. 1 after 21 years of service. He also was executive secretary of the Pennsylvania School Study Council for 14 years. Dr. DeLacy earned a diploma in structural engineering from Rochester Technical Institute and a B.S. from the Buffalo State Teachers College for a B.S. in industrial arts engineering. He then took an M.Ed. and D.Ed. at the University of Buffalo. His research interests have included school construction and maintenance as well as problems of the elementary and secondary schools and professional negotiations. He has supervised more than 60 doctoral programs. He and his wife, Luella, plan to remain in State College.

The proceedings of a NATO Advanced Study Institute conceived and directed by **Dr. G. P. Patil,** professor of mathematical statistics, have been published in a three volume series by the D. Reidel Co.

Each of the volumes corresponds to one of the advanced seminars ot the Institute on Statistical Distributions In Scientific Work which was held last year at the University of Calgary, Canada

The volumes contain nearly 100 research papers which cover a wide spectrum of topics in the mainstream ot contemporary statistical distributions and provide comprehensive and convenient reference material for researchers, instructors, and students.

The series was edited by Drs. Patil, Dr. Samuel Kotz, professor of mathematics at Temple University and adjunct visiting professor of statistics at Penn State, and J. K. Ord, senior lecturer in statistics, University of Warwick Coventry, England.

Penn State contributors to Volume 1, titled "Models and Structures," are Dr. Patil, **Dr. William Herkness,** professor and head of statistics, **Dr. Thomas Hettmansperger,** associate professor of statistics, and Penn State alumni Sharadchandra W. Joshi, and Michael A. Keenon.

Volume 2, "Model Building and Model Selection," contains contributions from Dr. Patil, **Dr. Marilyn T. Boswell,** assistant professor of mathamatiel statistics and Dennis Friday, a doctoral candidate in statistics.

The third volume, "Characterizations and Applications," also contains a paper by Dr. Patil as well as contributions from three Penn State alumni, Makarand V. Ratnaparkhi, Ashok V. Godambe, and Kononur Janardan.

Interim procedures to resolve student charges of discrimination

Procedures whereby student allegations of discrimination in any authorized University activity or organization can be promptly reviewed and resolved in accordance with Title IX of The Education Amendments of 1972 have been established by The Pennsylvania State University, effective Sept. 1.

The procedures are outlined, and officials with whom students can consult to express a grievance and secure assistance in having the allegation reviewed and properly corrected, if appropriate, are listed.

The procedures, announced Aug. 8, are considered interim until student leadership can be consulted.

The Pennsylvania State University is committed to the concept and practice of non-discrimination in matters that pertain to students as well as to all staff and academic personnel. This policy was mandated by the Board of Trustees when that body formally approved *The Academic Policy Plan*. Developed subsequently, the University's *Affirmative Action Plan* reiterated the commitment of the University to full implementation of non-discriminatory practices. Procedures have been established whereby staff and academic personnel can present allegations of discrimination and have them appropriately reviewed and adjudicated. This document deals with procedures whereby students can seek resolution of similar allegations.

Discrimination can be presumed to occur in a variety of possible settings and activities. Title IX of *The Education Amendments of 1972* prohibits sex discrimination in admissions; class assignments (with certain exceptions); athletics (with certain exceptions); in awarding financial aid, in student employment; in student activities; in services provided to students; and in the availability and use of University facilities. While sex discrimination is used in this document as the basis for establishing University guidelines, because of the clear statutory requirements contained in Title IX regulations, the procedures that are outlined here have pertinence to all forms of alleged discrimination and to all authorized University activities and organizations.

The procedures described in this document provide for a systematic and appropriate examination of individual student complaints that discrimination, or conditions perceived to be discriminatory, has occurred on the basis of race, creed, color, national origin, handicap or age (as provided by law), or sex. The following principles pertain to all levels of review and adjudication:

1. Review and resolution of grievances shall occur at the lowest administrative level and in the least formal manner possible contingent on satisfaction by the student that fair, valid, and equitable conclusions have been reached.
2. Procedures for resolving allegations in a progressively more formal way and at relatively higher administrative levels shall be made available, if appropriate.
3. All complaints shall be heard, examined, and reacted to with promptness and thoroughness.
4. Confidentiality shall be maintained at all levels of review.

The attached diagram depicts the sequence of steps the University has identified as appropriate for reviewing charges by students of discrimination. Six levels of review are possible, and any charge must have been reviewed at all preceding levels before consideration can take place at any one point in the sequence. Resolution can occur at any level of review.

Procedural Steps

Level I

A student who believes that discrimination has occurred should initially discuss the matter with his/her advisor (academic, E.O.P., residence hall assistant, coach, etc.) and/or the department head of the academic program in which the student is currently majoring. This official shall hear the allegation, collect whatever additional information is necessary or desirable, and attempt to resolve the matter.

Level II

If the problem is not satisfactorily resolved, the student should draft a written statement with proper documentation, and consult with the appropriate official(s) identified below, in the area pertaining to the grievance. If the grievance is of an academic nature, the student should contact the Assistant or Associate Oean in his/her college or the chief academic officer at the appropriate campus. The names, locations, and telephone numbers of these officials follow. If the problem is related to activities or functions other than those which are academic, the representative (see listing) from the relevant office, is prepared to meet with the student and review the matter in detail.

Level III

If the matter is not resolved to the satisfaction ot the student or the party against whom the allegation is made, a three-person hearing committee will be selected. The chief administrative officer for the area in which the grievance is focused shall appoint one member of the three-person ad hoc committee. A second member shall be selected by en appropriate student organization, and the third member shall be chosen by the faculty organization or staff employees who are in the substantive area of the grievance. Every attempt should be made to include minority and/or female representation on the committee. The Chairperson shall be approved by the chief administrator.

The committee shall make every reasonable effort to achieve a settlement after having investigated the written claim of discrimination. Informal styles of investigation shall be utilized by the committees, and no investigation of an allegation may be undertaken by a single member, nor action taken, without the concurrence of the committee.

The committee shall report its findings and recommendations to the chief administrative officer for the area in which the discrimination was alleged to have occurred. This administrator, in turn, shall attempt to achieve a settlement.

Level IV

In those instances in which the allegation of discrimination is not satisfactorily resolved on the part of either party, the Provost shall appoint an ad hoc Oiscrimination Appeal Committee whose members shall be selected as follows:

(a) Two students selected by the Provost from four nominees submitted by the Student Advisory Board.
(b) Two faculty members selected by the Provost from four nominees submitted by the University Faculty Senate Committee on Committees.
(c) One administrator appointed by the Provost.

Every effort shall be made to include representatives from minority groups and females on Oiscrimination Appeal Committees.

The committee is first responsible for determining the advisability for conducting a formal hearing after having received a written statement of charges. Informal proceedings leading to a resolution of the complaint should be undertaken without directly involving the Provost and/or President other than simply reporting that a resolution had been reached.

If a formal hearing is necessary, all deliberations, for the interim, shall follow the general procedures for reviewing complaints of discrimination which accompany these guidelines. Following a formal hearing, the committee shall present its findings to the Provost.

Level V

The Provost, upon receiving the committee's report, shall take whatever corrective action is necessary and appropriate to resolve the issues.

Level VI

Final appeal may be made to the President of the University whose decision is final.

PROCEDURES FOR THE CONOUCT OF FORMAL HEARINGS CONCERNED WITH STUDENT ALLEGATIONS OF DISCRIMINATION

I. Introduction

The following rules shall be used to guide formal hearings and are to be applied in such a way to assure fair, orderly, and expeditious proceedings. While they provide general guidelines to direct hearings by Oiscrimination Review Committees, additional specific rules of procedures may be applied by agreement of both parties.

II. The Charges

A. Written notice of specific charges (including the specific acts forming the basis thereof) shall be filed with the Chairperson along with the charging party's recommendation for a solution to the problem should the claim be upheld. Where a pattern of discrimination is alleged to exist, the complainant shall provide incidents to support the charge.
B. The charges shall be signed by the charging party and presented in sufficient detail to set forth clearly the charges which must be defended.
C. Such written notice must be filed with the Chairperson within 30 days of the date a formal hearing is approved. If the Committee finds the charges insufficiently explicit, it will direct the complainant to clarify them.
O. Copies of the charges shall be provided to the Provost of the University, to all members of the Hearing Committee through the Chairperson, and to the individual(s) charged with discrimination.

III. Counselors, Observers, and Representatives

A. Legal counsel shall not be permitted access to hearings, nor shall the hearings be interrupted solely for purposes of either party consulting with legal counsel or other advisors.
B. Observers shall not be permitted in the hearing room unless requested by appropriate University officials and/or the complainant. In all instances, the members of the Oiscrimination Review Committee shall have the right and authority to dismiss observers from the hearing room by consensus.
C. Tape recordings of the hearing proceedings shall not be permitted by observers.
D. The University shall have the right to have an official representative present at all times throughout the hearing.
E. The news media shall not have access to hearings.
F. The Affirmative Action Office, in its role as staff to the committees, will have the same privileges as those of the University's official representative.

IV. The Official Record

A. The written statement of specific charges shall constitute an official part of the record.
B. The entire hearing shall be tape-recorded, under the control of the Chairperson of the Committee, and the tapes shall become an official part of the record.
C. Additional documents pertaining to the hearing and submitted by the University, charging party, and/or witnesses shall be entered into and become part of the official record. When copies of these documents are made for the Committee members, those copies shall be retrieved at the end of the hearing.
O. Neither the tapes nor those documents which are part of the official record shall be made available to any persons other than the complainant, the University, other parties charged with discrimination, and the Committee in the hearing, excepting in response to legal subpoena or by court order.

V. Witnesses

A. Witnesses for the University (as designated by the Provost of the University and/or Vice President for Finance and Operations) and for the charging party may be called by request of either party and following the approval of the Committee. In all cases, the number of witnesses to appear on behalf of either party shall be left to the discretion of the Committee.
B. All witnesses shall swear or affirm the truthfulness of their testimony.
C. Witnesses testifying on behalf of either the charging party or University shall be permitted in the hearing room only while presenting their testimony.
O. Following the testimony of each witness, the members of the Committee may question the witness. Under the direction of the Chairperson, members of the Committee may secure additional testimony from either contending party or other resources and relate such testimony to the responses of the witness.
E. Administrators charged with discrimination have the right to be present during the entire formal hearing.

Vt. The Hearing

A. A hearing date and time shall be established following consultation with and at the convenience of all relevant parties. In alt instances, however, the Committee must convene within 10 days following the receipt of written notice of a specific charge(s) and schedule a hearing (if appropriate) for shortly thereafter.
B. All testimony before a Oiscrimination Review Committee must be heard by al least four of the members.
C. The Chairperson shall be responsible for entertaining the adoption of specific rules of procedures for the hearing from members of the Committee. Any rules or procedures shall be compatible with general principles and rules in this document, and their adoption shall be by the mutual consent of the charging party, the University, and members of the Committee. Those rules must be tinalized and edopted prior to the time of the actuet hearing
O. The Chairperson shall open the hearing by reiterating the procedures to be

followed and reading to the Committee the written notice of specific charges.

E. The Chairperson shall have responsibility for:

(1) ruling on questions of procedure, with the advice of legal counsel for the Committee, if desired;

(2) danying admissibility of testimony from unknown or unidentified witnesses;

(3) ruling on the admissibility of evidence, and the appropriateness of questions directed to either party;

(4) advising witnesses of the consequences of presenting false and misleading testimony; and

(5) essuring that all witnesses have been heard.

F. The University shall be provided an opportunity to respond to all charges.

G. Following the statement of charges and the response of the University, the Committee shall secure all relevant testimony reasonably possible by direct presentation and questioning witnesses. Neither party may directly question the other; all oral comments must be directed to the Cheirperson and Committee membership. Briefs and memorandums from either side may be submitted et eny time with copies provided to both parties.

VII. Findings

A. The Committee shall present its findings and conclusions to the Provost of the University in writing within 15 days of the date of the final hearing. Except in extraordinary circumstances, the entire hearing should be completed within 30 days.

B. Such report shall describe findings and conclusions, including any suggested redress to the complaining party, if appropriate.

C. Copies of the report of the Committee shall be made available to the charging party and to any individual administrator(s) charged with discrimination.

ADMINISTRATIVE OFFICIALS WITH WHOM STUDENT ALLEGATIONS OF DISCRIMINATION MAY BE DISCUSSED

I. ADMISSIONS — Mr. E. Dunhem, 117 Old Main, 865-0458.

II. ATHLETICS — R. J. Scannell, 276 Recreation Bldg., 865-2565.

III. STUDENT AFFAIRS — R. O. Murphy, 235 Boucke Bldg., 865-6318.

IV. ACADEMIC

College/Division

Agriculture — Jerome F. Pasto, 217 Ag. Admin., 865-7521.

Arts & Architecture — William J. McHale, 116 Arts Bldg., 865-9523.

Behrend College — Thomas G. Fox, Administration Bldg., 899-3101, Ext. 240.

Business Administration — William S. Decker, 110 Business Admin., 865-3475.

Capitol Campus — George Wolf, 200 Admin. Bldg., 787-1679.

Earth & Mineral Sciences — E. Willard Miller, 101 Mineral Sciences, 865-6335.

Education — A. Madison Brewer, 278 Chambers, 865-2523.

Engineering — Walter G Braun, 101 Hammond, 865-2151.

Health, Physical Education & Recreation — Karl G. Stoedefalke, 275 Recreation, 865-0407.

Human Development — Louise Gentry, 103 Human Development, 865-1424.

The Liberal Arts — W. LaMarr Kopp, 136 Sparks, 865-8312.

Medicine — Cheston M. Berlin, Jr., Hershey — Room C726, 534-8412.

Science — Eugene S. Lindstrom, 211 Whitmore, 863-0284.

Undergraduate Studies — John H. Wyckoff, 109 Grange, 865-7576.

Graduate School — Ernest H. Ludwig, 211B Kern, 865-1834

Commonwealth Campuses

Altentown — J. V. Cooney, Fogelsville School Bldg., 395-6851.

Altoone — J. G. Zubrod, 111 Smith Bldg., 944-4547.

Beaver — A. J. Meta, 119 Administretion Bldg., 775-8830.

Berks — A. W. Moberly, 136 Luerssen Bldg., 375-4211.

Delaware County — Stephen Cimbala, 311B Main Bldg., 565-3300, Ext. 51.

DuBois — Jacqueline Schoch, 22 Mension Bldg., 371-2800.

Fayette — Stephen M. Priselac, 105 Res. Instr. Off., 437-2801.

Hazleton — William E. Schnelder, Administration Bldg., 454-8731, Ext. 48.

McKeesport — Richard J. Thomas, 102C Classroom Bldg., 678-9501, Ext. 213.

Mont Alto — George N. Payette, Science Hall, 749-3111.

New Kensington — Robert D. Arbuckle, Administration Bldg., 339-7119.

Dgontz — Sanford F. Nicol, 119 Sutherland Bldg., 886-9400, Ext. 231.

Schuylkill — Anthony F. Land, 102 Administration Bldg., 385-4500, Ext. 28.

Shenango Valley — Wayne D. Lemmle, 203 Sharon Hall, 981-1640, Ext. 33.

Wilkes-Barre — G. W. Bierly, 204 Hayfield Bldg., 675-2171.

Worthington Scranton — Ralph L. Mastriani, 103 Administration-Classroom Bldg., 961-4771.

York — Oscar E. Fox, Main Bldg., 846-8828.

University Park Calendar

September 11-21, 1975

Items to be included in this calendar should be sent to the editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, September 11 — Free U meeting for new course initiators, an introduction to teaching with Free U, 7 p.m., HUB lounge upstairs.

Thursday, September 11 — Commons Videotape showing, 12 noon, Kern lobby.

Thursday, September 11 — East Undergraduate Library Open House, 7 p.m., basement of Findlay.

Thursday, September 11 — Graduate student tours of Pattee Library at 9:35 and 11:10 a.m., 1 and 2:20 p.m., E105 Pattee.

Friday, September 12 — G.S.A.'s Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Friday, September 12 — Sports: Soccer, vs. Lock Haven State, 7 p.m., Jeffrey Field.

Saturday, September 13 — Sports. Football, vs. Stanford, 1:30 p.m.

Sunday, September 14 — Chapel Service, 11 a.m., Eisenhower Chapel. Preacher: Charles L. Cockelman, Program Director, Religious Affairs.

Sunday, September 14 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Elder John Loyd, Pastor, Fellowship Temple Church, Bridgeport, Conn.

Monday-Thursday, September 15-18 — Faculty orientation tours of Pattee Library at 9:30 a.m. and 2:15 p.m., E105 Pattee.

Tuesday, September 16 — Seminar on locating books in Pattee Library, 7 p.m., W110 Pattee.

Wednesday, September 17 — Leonard Feldman, cello recital, 8:30 p.m., Music Bldg. recital hall.

Wednesday, September 17 — Artists Series, Four Decades of American Film Festival, "Birth of a Nation," 8:30 p.m., University Auditorium.

Wednesday, September 17 — Noontime Concert, 12 noon, Kern lobby.

Thursday, September 18 — Commons Videotape showing, 12 noon, Kern lobby.

Thursday, September 18 — Seminar on locating periodicals in Pattee, 7 p.m., W110 Pattee.

Friday, September 19 — G.S.A.'s Commonsplace Coffeehouse, 8 p.m., Room 102 Kern

Friday, September 19 — Sports: Soccer, vs. Trenton State, 7 p.m., Jeffrey Field.

Friday-Saturday, September 19-20 — Artists Series, "1776" musical, 8:30 p.m., University Auditorium.

Saturday, September 20 — Campus Crusade for Christ Square Dance, 6:30 p.m., HUB ballroom.

Saturday, September 20 — PSOC Hiking Club, backpack on Susquehannock Trail.

Saturday-Sunday, September 20-21 — Sports, Golf, Lady Nittany Invitational.

Sunday, September 21 — Free U registration, 1-8 p.m., HUB ballroom.

Sunday, September 21 — Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Rustum Roy, Director, Materials Research Lab.

Sunday, September 21 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Elder Gerald G. Loyd, Pastor, Black Christian Fellowship.

Meetings

Tuesday, September 16 — College of Liberal Arts faculty, 3:45 p.m., Room 121 Sparks.

Wednesday, September 17 — Graduate Council, 2:30 p.m., Room 101 Kern.

Seminars

Thursday, September 11 — Agronomy, 8:15 a.m., Room 301A Ag. Administration. Alien Biltz on "Time as a Factor in the Genesis of Four Soils Developed in Recent Alluvium in Pennsylvania."

Thursday, September 11 — Engineering Acoustics, 4 p.m., Room 73 Willard. Michael J. Oslac on "The Active Control of Higher-Order Acoustics Modes in Cylindrical Ducts."

Thursday, September 11 — Computer Science, 4 p.m., Room 325 Whitmore, Claus P. Schnorr, Johann Wolfgang Goethe University, on "Some Lower Rounds and Completeness Results in Complexity Theory."

Thursday, September 11 — Chemistry, 12:45 p.m., Room 333 Whitmore. Roy A. Keller, SUNY, Fredonia, on "Plasma Chromatography."

Friday, September 12 — Electrical Engineering, 11 a.m., Room 329 Electrical Engineering East. Dr. Raymond Steele, Loughborough University, England, on "Delta Modulation Systems."

Monday-Tuesday, September 15-16 — Biochemistry, 11:10 a.m., Room 101 Althouse. Dr. George Lang, physics, on "Mossbauer Spectroscopy: What It Is and What It Measures" (Monday), and "Applications of Mossbauer Spectroscopy to the Study of Hemoglobin and Myoglobin" (Tuesday).

Tuesday, September 16 — Plant Pathology, 9:45 a.m., Room 213 Buckhout. Angel Mainor on "Effect of Soil Aeration on Root Diseases."

Tuesday, September 16 — English, 8 p.m., Room 101 Kern. Deborah Austin on "A Room In the Interpreter's House: William Blake and John Bunyan's 'The Pilgrim's Progress.'"

Tuesday, September 16 — Comp Lit Luncheon, 12.15 p.m., Corner Room. Lois B. Hyslop, professor emerita of French, on "Baudelaire and Proudhon."

Tuesday, September 16 — Air Pollution Control, 2:20 p.m., Room 140 Fenske. Thomas A. Cuscino, Center for Air Environment Studies, on "Fugitive Dust from Vehicles Traveling on Unpaved Roads."

Thursday, September 18 — Agronomy, 8:15 a.m., Room 301 Ag. Administration. Fred Stocker on "Application of the ADAGE Computer Facility to Agricultural Research."

Thursday, September 18 — Physics, 3:50 p.m., Room 117 Osmond. Dr. F. Gursey, Yale University, on "Quark and Parton Models of Hadrons."

Lecture

Friday, September 19 — Sociology Lecture Series. Dr. Andrew Levison on "Worker Influence in Political and Economic Policy." 3 p.m., Room 112 Kern.

University Schedule

Thursday-Wednesday, September 11-17 — Drop-Adds sub-station, 1-4 p.m., HUB.

Wednesday, September 17 — Add deadline

Exhibits

Sackett Gallery: Systems, work by first year architecture students, through September 23.

HUB Gallery: New York City Post Card Show.

Funding opportunities

For procedural and funding source information, call 865-1372.

(105-6) The British Consulate General (2300 PSFS Bldg., 12 South 12th St., Philadelphia, Pa. 19107) announces applications for Marshall Scholarships for two years of study in Great Britain sterling in 1976. Applicant must be a U.S. citizen under 25 years of age. The following provides 58 pounds per month for 22 months plus e small allowance for books and travel to Europe. Fellow must enroll in a United Kingdom university. For further information, write to the address given above. Application deadline is Oct. 22, 1975. (Rot. FO 75-2000)

(105-1) The next proposal deadline for the **NSF Research on Productivity Measurement Systems for Administrative Services program** is Nov. 11, 1975. Subject areas include accounting and auditing services, budgal and management analysis; purchasing management, distribution, sales and marketing management, public information programs; personnal administration and training; inspection and quality control and computing and information services. Proposals may involve empirical surveys (stale of the art and case studies), new concept development, pilot testing of new methods and guidebooks preparation. Program contact is Richard Meson, Program Mgr., Div. of Advanced Productivity Research and Technology, Research Applications Directorate, NSF, 1800 G St N W, Washington, O.C. 20550 (202-634-6260). This information has been distributed. (Rel NSF75-14) (1560-6) (OFF deadlines) (172-7)

(106-2) University research for the solution of transportation problems is again being solicited by the U.S. Dept of Transportation. Closing date for proposals is Dec 1, 1975. Program objectives include creation of new concepts, techniques and knowledge, encouragement of the use of modern tools for analysis; stimulation of industrial, local, state and regional sponsorship of University research to develop a national transportation policy; and attraction of young talent into transportation careers. Thru program has four elements, major research, project research, Individual faculty member research and university-based seminars For additional information, contact Dr T O. Larson, Pa Transp. Institute, Research Bldg. 0 (865-1891). (Rel CBO 5/27/75).

(106-4) Ohice of Educalron has announced a Jan 9, 1976, closing date for **Follow-Through grants and contracts** in the categories of noncompeting continuation grants or contracts for programs end for research and demonstration and technical assistance grants or contracts. This information has been distributed (Rel. 49FR29018-19, 8/29/75) (CFDA 13.433)

(106-5) Office of Education announces a Nov. 17, 1975, application deadline date for its **health and nutrition program** including demonstration projects to improve school health and nutrition services for children from low-income families (Rel. 49FR29915, 8/29/75) (CFDA 13.529)

Staff vacancies

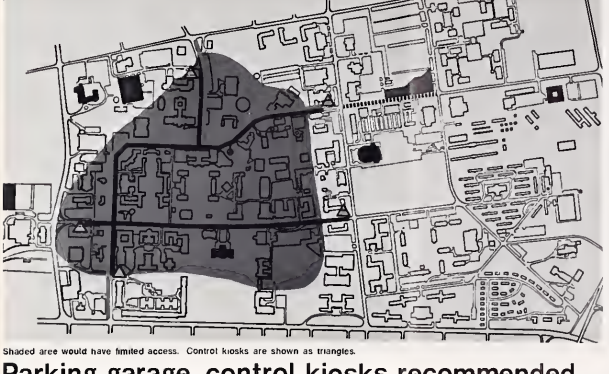
The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the Unsolicited Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1357 (Nolwork Line 475-1387) Applications for those staff vacancies will be received until 5 p.m., Thursday, Sept 18. **Do not contact the area that has the vacancy**

RESEARCH AIDE, COLLEGE OF AGRICULTURE — University Park

Prepare tissue and other samples and conduct amino acid analyses. Operate and maintain amino acid analyzer. Make necessary adjustments in the biochemistry of sample preparation, preparation of buffer solutions, and in other operational procedures to achieve optimum resolution and accuracy of amino acid analyses. Supervise and train technicians and graduate students. Calculate results of experiments and summarize data. Operate calculator, perform basic statistical analyses. This information has been distributed (Rel. 49FR29018-19, 8/29/75) (CFDA 13.433)

ASSISTANT TO CONTRACT NEGOTIATOR AND COORDINATOR, VICE PRESIDENT FOR RESEARCH University Park

Directly responsible to the Contract Negotiator and Coordinator; assume primary responsibility of the central administrative level for the internal processing of proposals seeking sponsorship of research, instruction and continuing education projects and to supervise others in the office who have similar duties. This entails gaining and maintaining a thorough knowledge of the many requirements of various Federal agencies and of University policy and procedures in the area of proposals and related activities A secondary responsibility is to assist with the negotiation of grants and contracts. At a minimum, applicant should be a college graduate with accounting training with 3-5 years of related experience, preferably in the handling of proposals, contracts and grants.



NUTRITIONAL CARE TECHNICIAN — Hershey

Responsible to the Patient Nutritional Care Coordinator and staff therapeutic dietitians for appraising, recording, and evaluating patient's nutritional status Assist the dietitians with gathering and recording patient food patterns Assist with patient group classes in nutrition. Patient instruction and work procedures are accomplished under the guidelines of the Medical Center. Development of teaching materials is done under the supervision and approval of Patient Nutritional Care Coordinator. Associate degree in Foods or Nutrition or one to two years directly related dietary experience.

PENN STATE intercom

Volume 5, Number 3 September 18, 1975

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Shaded area would have limited access. Control kiosks are shown as triangles.

Parking garage, control kiosks recommended

Recommendations made in a University Park traffic and transportation study for construction of a 550-car parking facility and for controlled access to central campus streets have been approved by the Trustees.

University officers will prepare a plan for financing the program, including the parking structure to be built in the J. Orvis Keller Bldg.-Nittany Lion Inn area, the kiosks needed to control access to restricted area streets and the overall parking plan for the campus.

The detailed plan was developed by Wilbur Smith and Associates, of Hartford, Conn., traffic consultants engaged by the Board early last year.

The controlled access plan would limit traffic on Curtin, Pollock, Burrowes, Allen and Fraser Roads to automobiles having business in the central campus area, the control to be effected by gate houses set up at peripheral points on roads entering the area. The gate house locations are given as Burrowes Rd., north of West College Ave., Pollock Rd., west of Burrowes Rd.; Allen Rd., near Park Ave.; Curtin Rd., west of Shortlidge Rd.; and Pollock Rd., also west of Shortlidge Rd.

Two-way traffic will be retained on campus streets, and bicycle routes are recommended on Burrowes, Curtin and Allen.

Kern offers the chance to 'do your thing'

How do you find e mission for a graduate commons on a campus with an already rich mix of artistic and cultural events?

Kern — which is probably the only exclusively graduate commons in the country — has managed to figure out a number of answers to this question, its latest being an Un-Common Diner-Theatre production of the play, "Butterflies Are Free," scheduled to follow e roast beef repast on Saturday and Sunday, Sept. 27 and 28.

Faculty and graduate students who have always hed a secret yen to try their wings in the theatre will get a chance to face e live audience and see how they fare. They will perform in a setting which weekly pleys host to local solo and ensemble musicians, es well as to painters, jewelers, sculptors and ceramics enthusiasts.

Commons' manager Willam Johnston and his assistant, John McCeuley, are the men responsible for allowing academics a fittle Walter Mitty fulfillment outside of the classroom and lab.

They have turned the dividers in Kern's lobby into an art gallery, which presents about 60 shows a year, about half of them cuffed from the work of Penn State graduate students. This program hes now etfracted the interest of artists from around the country, so Kern officials are able to pick and choose their shows.

In return for hanging an exhibit, the commons' management esks either e smetf commission from seles or the donation of a piece of work by the artist. Result: a permanent collection now numbering more than 20 pieces on display in Room 101 and Study Lounge 114.

A Wednesday series of concerts at noon features individual musicians es well as smatt groups from the music and music education departments. A rather different format is available for persons interested in appearing at one of Kern's Friday night coffeehouses, sponsored by the Graduate Student Association. There is no admissions charge and performers receive no fee, but the freedom to do one's thing without commercial restrictions assures a steady flow of performers.

Un-Common Dinner Theatre
Saturday and Sunday, Sept. 27 and 28
Steamship round of beef dinner with salad bar, 6:30 p.m., Room 102 Kern
"Butterflies Are Free," 8 p.m., Room 112 Kern
Tickets at Kern Information Desk
Reservations: 865-1878 or 865-1879

For those who prefer to sit in the audience, Kern has developed e Wednesday night film series. Ouring fall term, it will feature the works of four American directors: Arthur Penn, Robert Altmen, Frank Perry and Sam Peckinpah. Thursday noons, videotape showings of WPSX programs of general interest are screened.

Another fall term feature will be a repeat of last year's Halloween party, which drew some 1,200 youngsters.

"We wanted to try to do something for the kids of graduate students because their parents usually don't have too much money to spend on parties," Johnston says of the coming Oct. 20 event — which will also welcome children of faculty members.

And, of course, the Commons continually houses various lecture series and colloquiums, along with Senate and Graduate Council meetings.

"We have no interest in whether or not an event is sure-draw at the box office," Johnston points out "It's part of our function to take a chance."

Faculty and graduate students who might like to perform or exhibit at Kern can contact Johnston and McCauley at 865-1878, or Timothy Fitzgerald, GSA program director, at 865-9061.

York to raise funds

A fund-raising campaign at the York Campus for construction of a student center building there has been authorized by the Trustees. The campaign, with e goal of $750,000 will begin later this month under the direction of the York Campus Advisory Board. The proposed center is not designed to increase enrollment, but is to relieve e serious space need for commuting students, both day and evening. The Trustees also approved final plans for a 45-car student parking aree at York.

Fund request to State up 15.58 percent

Penn State will request a State appropriation of $118,711,000 for the 1976-77 fiscal year.

The amount, which is $16,003,000 or 15.58 per cent more than the $102,708,000 appropriation received for the current year, was approved last week by the Trustees, along with a capital program request for $19,102,000.

The annual appropriation request to be submitted later this month includes $3,690,000 for medical education programs in the College of Medicine.

In discussing the proposed general budget on which the appropriation request is based, President Oswald said that no increase in tuition rates is proposed.

Or. Oswald also emphasized that stabilized admission levels for new freshmen will continue along with the program to provide opportunities for transfer of advanced standing students from community colleges and other institutions. An enrollment rise of 1,000 students is anticipated next year.

An increase in appropriated funds for student aid will be sought to offset partial erosion of University funds supporting student aid as tuition has increased. This fine item has not been increased since 1973-74.

"Continued inflation, both in provision for salary increases to maintain current purchasing power for employees and in partial provision for increased costs of supplies and services and fuel and utilities require strong emphasis in the proposed budget," Dr. Oswald said.

He cited the need for strong efforts to increase the per capita amount for medical education, from the present level of $7,465 to $10,000. In spite of rapid inflation, this amount has not changed for several years.

New or expanded programs will be provided through reallocation of existing resources, to the extent that this is possible, Or. Oswald commented.

In determining the $118,711,000 request,

Food symposium offers overview

A symposium designed to provide members of the Penn State community with an overview of the world food crisis will be held Tuesday and Wednesday, Sept. 30 and Oct. 1, in the auditorium of the Kern Graduate Bldg.

The symposium, "Food end Your Future," is open to the public, free of charge.

A highlight of the conference will be the keynote address by Ralph W. Richardson, director of natural and environmental sciance with the Rockefeller Foundation, at 9:30 a.m. on Tuesday. The keynote address will be preceded by opening remarks from Provost Russell E. Larson.

The program is divided into six themes: Tuesday morning, "Food for Thought;" Tuesday afternoon, "Food end Your Environment;" Tuesday evening, "Food end Energy;" Wednesday morning, "Food end Your Income;" Wednesday afternoon, "Food end Your Health;" and Wednesday

(Continued on page 4)

PENN STATE COLLECTION

Senate approves rewritten academic rules for students

The University Faculty Senate has adopted a rewritten and codified set of academic rules for students.

Approval of the rules, which contained only minor substantive changes, came after lengthy debate at the Sept. 9 Senate meeting.

According to Thomas E. Daubert, chairman of the Special Committee on Student Rules which developed the new rules, most of the substantive changes are to delete obsolete or ignored rules and to eliminate contredictions.

The new "Policies and Procedures for Undergraduate Students" is to be implemented "as soon as administratively feasible" by the Provost of the University.

The Senate amended the committee report that provided that one substantive change — provision for adding a course after the first ten days of a term — be considered as a separate item.

Also approved were two committee recommendations which provide that problems in interpretation or conflict between policies in the new document be reviewed by a special Senate committee for action at the March meeting and that items to be dealt with separately be referred to appropriate standing committees and submitted to the Senate for action in the winter term.

President Oswald told the Senate that no change is contemplated in University security policy concerning the carrying of firearms.

In outlining efforts of the University to upgrade, professionalize and develop as highly trained a security force as is possible, Dr. Oswald said:

"I contemplate no change in our policies this year. I certainly hope that one is never necessary, but if situations develop that might seem to warrant serious attention to it, I want to have the facts at hand."

Dr. Oswald said any change in policy would be made only after "consultation with appropriate groups from appropriate parts of the University community."

In forensic session, Senator Harald Schraer recommended appointment of a Senate committee to make the Senate's feeling on the issue known to the University administration.

In other action the Senate,

—Approved a recommendation requesting that the University President, through the office of the Provost, provide continuing support to implement academic research needs identified by a special committee as areas of inadequate support.

—Returned to committee proposed recommendations on transfer policies from one major to another within the University.

Food symposium

(Continued from page 1)

evening, "Food and Your Ethical Values."

Among the special topics to be discussed are "Food and National Priorities," "Limits to Land Use — Climatic, Physical and People," "Food Production without Chemicals," "Needed: A National Food Policy," "Relationships of Energy and Food Production," "Unconventional Food Retailing on Alternative Life Style Supermarket," "The Protein Controversy and Your Health," and "Ethical Implications of Food and Its Uses."

Dr. Larson will head the "Food for Thought" session. Other leaders will be: Dr. Robert W. Hiatt, assistant professor of biology; Mr. Richardson; Dr. John W. Malone Jr., head of the Department of Agricultural Economics and Rural Sociology; Dr. Barbara Underwood, associate professor of biological health; and Charles L. Coleman, program director in the Office of Religious Affairs.

Co-chairmen of the symposium are Dr. Milford Heddleson, coordinator for environmental quality affairs in the College of Agriculture, and Charles R. Meck, assistant director for continuing education at the University.

Arts roundup

(Continued from page 3)

Trio to perform

Two works by American composers and Brahms' "Trio in C Major" will be performed in concert by the Thalia Trio at 8:30 p.m. Wednesday, Sept. 24, in the Music Bldg. recital hall. Trio members Joenne Zagst, violin, and Leonard Feldmen, cello, both associate professors of music, and Robert Baisley, professor and head of the music department, pianist, will open the program with Aaron Copland's "Vitsbck." Fottowing will be "Trio in A Major" by early 20th century composer Charles Wakefield Cadman, e work known as the Pegasus Trio. Written about 1910, it is from the same era that produced the currently popular Joplin ragtime. Not available in published form, the music is from the Cadman Collection at the University. Also this month, the Thalle Trio will perform in Reading's community music series and in a music scholarship benefit concert at the Altoona Campus. In November, the group will appear at the American Music Festival in Shippensburg, Pa.

Series tickets available

A few good seats are still available for the Artists Series Music Series, but sales will end Sept. 23. The Fine Arts Series also has some good seats left, and they will be sold as e series until Oct. 15. Any tickets left for Leontyne Price will be sold starting Wednesday, Sept. 24, at the box offices at the HUB and University Auditorium.

Staff vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1307 (Network Line 475-1307). Applications for these staff vacancies will be received until 5 p.m., Thursday, Sept. 25. **Do not contact the area that has the vacancy.**

EDUCATIONAL PROGRAMMER, COLLEGE OF EDUCATION — University Park

Analyze and define systems requirements to develop educational programs for electronic data equipment and wrilte computer programs. Bachelor's degree or equivalent), preferably in education, and at least six months' programming experience.

PROGRAM REPRESENTATIVE/VAN MANAGER, COLLEGE OF EDUCATION — University Park

Visit sponsoring Institutions in advance of mobile training van to insure site preparation is completed. Represent the CAI Lab in the field to provide information to local media and meet with sponsoring institutions to explain programs and monitor student course progression. Relocation approximately every six to eight weeks. Bachelor's degree in education, business administration, psychology or equivalent plus one to two years' experience in a supervisory or management position.

JUNIOR COPY EDITOR, UNIVERSITY PRESS — University Park

Responsible for editing book manuscripts in accordance with standard usage, press style and special requirements. Responsible for checking copyright permissions and for liaison with production, design and advertising personnel. Bachelor's degree or equivalent, plus one to two years of experience in editorial practices.

ADMISSIONS COUNSELOR — SPECIAL PROJECTS — Capitol Campus

TEMPORARY — ONE-YEAR APPOINTMENT

Responsible to the Academic Services Officer of the Capitol Campus for various student recruiting functions, including admissions counseling of special student groups, meeting with minority organizations, etc. A baccalaureate degree or equivalent, plus two to three years of directly related experience, preferably in an academic environment.

PERSONNEL ASSISTANT — Hershey Medical Center

Responsible to the Personnel and Training Officer of the College of Medicine for selection and placement of employees, especially as applies to technical-service, clerical and staff nonexempt. Bachelor's degree or equivalent, preferably in business administration or personnel administration plus one to two years' related experience.

—

The University annually receives grants for projects designed to fulfill specific research responsibilities. These are normally of fixed — and sometimes relatively short — duration. Since project administrators must often react quickly in selecting staff, it is desirable to have an available pool of faculty and staff members interested in applying for research steff positions.

Discipline backgrounds required vary depending on the project involved. They may include physics, engineering, agriculture, methematics or chemistry — although they are not limited to these areas.

Quelified applicants are invited to apply by calling the Employment Division, 865-1387 (network 475-1387). Names will be placed in e candidates' pool, end this announcement will be repeated el six-month intervels.

News in brief

Auction to be held

The University wilt sell at public auction a portion of the property known as the Dill tract. The property is situated in College Township on Old Houserville Road and consists of approximately 1 49 acres of land and has located on it a house, shed, garage and borrow pit. The auction will be held Wednesday, Sept. 24, at 6 p.m. at the sile of the property, and the auctioneer is Harry E. Leighttey. Anyone wishing to inspect the property should contact Leightley. The University retains the right to reject any end all bids.

Children's classes offered

Games and educational gymnastics classes for children ot University faculty, staft and townspeople wilt again be offered by the College of Heolth, Physical Education and Recreation in White Bldg. Classes will meet Thursday afternoons from 4 to 5 p.m., beginning Sept. 25 and continuing through Nov. 6. Children from kindergarten through fourth grade may attend. Registration will be the first day of the class in White Bldg.

Three buildings named

Names for three campus buildings have been approved by the Trustees. The former Agricultural Education Bldg. located east of Armsby, has been designated Art Education Craft Bldg. to reflect its present use. The new facility constructed west of the Air National Guard armory to provide facilities for printing, addressing and mail services and the offices of the Department of General Services, will be known as the Business Services Bldg. The Nuclear Accelerator Bldg. on Bigler Rd., south of the Breazeale Nuclear Reactor, has been named the Academic Projects Bldg., recognizing its use for temporary academic programs.

Gold Scouts organize

Faculty and graduate students interested in camping and scouling can share their experience with local scouting programs through the medium of Campus Gold Scouts. This group also serves as a vehicle for exchange of songs and ideas, and among this year's activities will be the creation of a songbook. Meetings are the first and third Sundays ot each month, and interested parties may contact Sandre Yerkes president ot the group, at 865-7205, or Elizabeth Hanley, assistant professor of health, physical education and recreation, at 865-7591.

Art courses set

Fall term art classes for children and teenagers will begin Saturday, Sept. 27. Eleven courses are offered, under the direction of Dr. Robert W. Ott, assistant professor of art education, and a teaching staff of 25 art education majors.

Two courses, Arts and Crafts and Drawing and Painting, are offered for children aged 6 and 7. The intermediates, aged 8 to 12, have Sculpture, Drawing and Painting and Arts in Action. Teenagers may take workshops in Pottery, Sculpture, Printmaking, Jewelry, Fibers and Weaving, and Painting. Registration may be made Monday through Friday from 1 to 5 p.m. by telephoning Holly Ping, 865-5601. Enrollments are limited.

Funding opportunities

For procedural and funding source information, call 865-1372.

(157-1) The Pennsylvania Science and Engineering Foundation is authorized to promote, stimulate and encourage basic and applied research and development as well as scientific and technological education which may reasonably be expected to advance the Commonwealth's economic growth. Current areas of interest include, environmental problems, building and materials technology, biomedical technology, computer science, nuclear engineering, transportation, mineral resources technology and technology assessment. PSEF grants are "seed funds," additional funding sources must be indicated. Contact Robert D. Laughlin, Executive Director, PSEF, Department of Commerce, Room 400 South Office Bldg., Harrisburg, Pa 17120 (717-787-4147) (7-447-4147)

(157-2) The Office of Education has announced a Nov. 17, 1975, closing date for applications for its **College Library Resources Program.** (Pet 40-76-0076, 9/2/75) (CFDA 13.408)

(157-3) Teacher Training Grants under the Office of Education **Bureau of Education for the Handicapped** have an Oct. 22, 1975, closing date. (Pet 40-76-0056-60, 9/2/75) (CFDA 13.451)

(157-4) The **NSF Faculty Research Participation program** provides opportunities in 10-week summer industrial research activities. Eligible faculty must be full-time, have advanced degrees in science, mathematics or engineering; and have hold the rank of assistant professor or higher for four years. Contact Faculty Research Participation Program, Div. of Higher Education in Science, NSF, Washington, D.C. 20550 (202-282-7760).

Fund request

(Continued from page 1)

revenue increases of $1,074,000 from a proposed enrollment increase and $261,000 in recovery of indirect costs were considered.

Expensive changes anticipated include $18,214,000 for inflationary increases, including salaries, mandated staff benefits, fuel and utilithes, and supplies and services cost increases. The workload cost increase for accommodating increased enrollment anticipated is listed at $590,000, the increased amount for student aid et $220,000, and $223,000 is indicated for new facilities.

The capital program request of $19,102,000 includes 17,663,000 for construction projects and $1,419,000 for original equipment for General State Authority-financed projects.

The proposed new projects for 1976-77 include an academic complex and support system at Behrend College, Erie, $7,019,000; multi-purpose buildings at Feyette and Mont Alto, $2,683,000 for each, and at Berks, $2,934,000; and safety, environmental control and fuel utilization improvements at University Park, $2,364,000.

The capital program has four major objectives for the five-year period, 1976-77 to 1980-81.

1. Bringing the Commonwealth Campuses up to a basic cadre of buildings to provide the necessary facilities for educational program needs; 2. In the latter years of the program, provition is made for construction of additional clinical facilities at Hershey to accommodate entering classes of 128 medicat students; 3. At University Park, Initial emphasis is placed on utility changes to improve safety, environmental control and energy utilization; end 4. In leter years, the plen calls for construction of needed research facilorium.

Faculty notes

(Continued from page 2)

Dr. Sidney Cohn, formerly associate professor in the Department of City and Regional Planning at the University of North Carolina, has been appointed as director of the Division of Man-Environment Relations. He replaces Raymond Studer, professor of environmental design, who has returned to full-time teaching and research. Dr. Cohn received a bachelor of architecture and a master of urban planning from the University of Washington, Seattle. In 1968, he earned his Ph D. in city and regional planning at North Carolina. A member of Tau Sigma Delta Architectural Honor Society, Dr. Cohn received an AIP Outstanding Student Award, a Fulbright Fellowship for Germany, an A. W. Brunner Research Fellowship and a NSF Fellowship and was a Louie Lasker Fellow.

He has practiced as an architect, has served as a consultant to a number of city planning and government agencies and has published extensively in professional journals.

Dr. Ned C. Deihl, professor of music education, has been named acting director of the Blue Band, following the death of Dr. James W. Duntop, band director for the past 28 years. As associate director of the Blue Band since 1963, Dr. Delhi worked closely with Dr. Dunlop. He will serve as acting director until a permanent successor has been named as the result of an open, competitive national search for a director.

Dr. Robert W. Carrubba, professor of classics, is the recipient of a grant-in-aid from the American Council of Learned Societies. He is one of 94 scholars from 70 academic institutions awerded grants for research in the humenities and related social sciences in national competition.

PENN STATE intercom

Volume 5, Number 4 September 25, 1975

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Faculty notes

Dr. Joseph L. French, head of the department of special education, has been named president-elect of the Division of School Psychology of the American Psychological Association. He will assume the presidency at the national convention of the association next September. Dr. French, who is professor of special education and educational psychology, is in charge of the intercollege program in school psychology. He is currently president of the Pennsylvania Psychological Association and a member of the State Advisory Committee for Special Education.

Dr. John P. Hagan, professor emeritus of astronomy, has been elected chairman of the International Commission on Frequency Allocations for Radio Astronomy and Space Science of the International Council of Scientific Unions.

The commission coordinates the need for radio frequencies and represents the scientific community in proposing the allocations of their frequencies by the International Telecommunication Union (ITU). The commission is currently preparing for the World Administrative Radio Conference in 1979 when the entire frequency spectrum will be reviewed by the ITU.

A member of the commission since its founding in 1960, Dr. Hagan has served with delegates from the U.S., the Federal Republic of Germany, England, France, Italy, and the U.S.S.R. The commission will hold its next meeting in Paris, France, on Oct. 10.

One of the world's leading solar radio astronomers, Dr. Hagan joined the Penn State faculty in 1962 and retired last summer. He is also chairman of the sub-committee on Space Science of the National Academy of Sciences' Committee on Radio Frequencies and a member of the Frequency Management Advisory Committee of the Office of Telecommunication Policy in the Executive Office of the President

VADD insurance may be changed

Since 1964, the University has offered a voluntary plan of accidental death and dismemberment insurance to all regular faculty and staff members. The plan provides optional amounts of insurance ranging from $10,000 to $150,000 and also provides accidental death and dismemberment coverage for dependents.

The month of October is the period when membership in this plan may be changed. One or more of the following actions may be taken during the month: (1) change the dollar amount of insurance coverage; (2) change from individual coverage to family coverage or vice-versa; (3) enroll in the plan as a new member; (4) withdraw from the plan.

To accomplish any of the above changes, obtain and complete a new VADD enrollment card from your dean or administrative office and send it to the Employee Benefits Division, 133 Willard Bldg., by Oct. 31. All changes received by that date become effective Nov. 1.

If you should wish to check your present coverage, examine the section of your paycheck stub marked "VADD." The deductions will indicate the amount of coverage you have.

Coverage	Monthly Deduction	Biweekly Deduction
$ 10,000	$ .50 single $ .70 family	$ .23 single $ .32 family
$ 25,000	$ 1.25 single $ 1.75 family	$ .57 single $ .80 family
$ 50,000	$ 2.50 single $ 3.50 family	$1.15 single $1.61 family
$100,000	$ 5.00 single $ 7.00 family	$2.30 single $3.23 family
$150,000	$ 7.50 single $10.50 family	$3.46 single $4.89 family

If you are unable to check in this manner, information about your coverage may be obtained from the Employee Benefits Division.

No action is needed to continue your current coverage without change.

News in brief

Faculty Club to meet

The third annual meeting of the Penn State Faculty Club will be held Wednesday, Oct. 1, at 8 p.m., in 101 Kern Building. Reports on the past year's activities will be presented by the officers and committee chairmen. Reports will also be given on current activities and plans, including interior furnishings and occupancy of the new club building, fees deposits, dues for 1975-76, and a major membership drive.

Heat on by Oct. 1

The turning on of heat systems in residence halls and other housing and food services buildings was begun Friday, Sept. 19. At the same time, the shutting down of air conditioning systems throughout the campus was also begun. Following residence halls, the heat will be turned on in classroom buildings, and then in administrative buildings. It is estimated that heat systems throughout campus will all be turned on by Oct. 1. During the winter, temperatures will be kept at about 68 degrees, and regulations prohibiting portable electric heaters in University buildings will be strictly enforced.

HUB Candlelight Dinner

There will be a Homecoming Candlelight Dinner Thursday, Oct. 2, at the new HUB Terrace Room from 5 to 7:15 p.m. The menu will feature prime ribs of beef, veal cordon bleu, roast turkey with cornbread dressing, flounder stuffed with crabmeat, ham kabobs with pineapple sauce and the usual variety of salads and desserts. A hospitality table will be set up, and Phi Mu Alpha music fraternity will provide entertainment.

Any volunteers?

The Penn State Sport Parachute Club is looking for a faculty advisor. He or she will not have to jump out of a plane! Contact Jeffrey Fegley at 865-3654.

Alard concert

The last quartet written by Russian composer Dmitri Shostakovich before his death last month will receive its American premiere in a concert by the Alard String Quartet at 8:30 p.m., Wednesday, Oct. 1, in the Music Bldg. recital hall. The Shostakovich "Quartet #14" is the second of his works for string quartet to be introduced in this country by the Alard Quartet. Also on the program are Haydn's "Quartet in C Major;" Schubert's "Quartet in D Major," subtitled "Death and the Maiden;" and "Adagio for the String Quartet" by Barber. The latter work is the first of a series of American works to be included in concert in the Bicentennial year by the quartet. Quartet members are associate professors Joanne Zagst and Donald Hopkins, violins; Raymond Page, viola; and Leonard Feldman, cello. The Quartet will perform Oct. 20 in Cleveland, and a spring tour of southern cities is planned, along with concerts in Antioch and Toledo.

Institute visitors

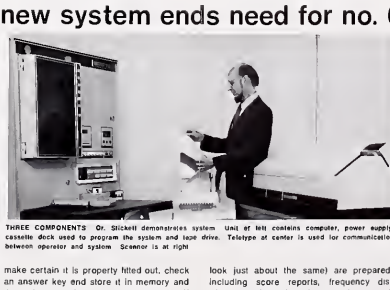
James Chace, managing editor of "Foreign Affairs," and Arthur Mizener, of Cornell University, will visit University Park the week of Sept. 29 as guests of the Institute for the Arts and Humanistic Studies. Chace is the author of "A World Elsewhere: The New American Foreign Policy." He will be on campus visiting classes and conferring with faculty and students from Sept. 29 to Oct. 1. Professor Mizener, whose visit will last from Sept. 29 to Oct. 3, will deliver two public talks: "The Biographer as Private Eye," Tuesday, Sept. 30, at 12:15 p.m. in the State College Hotel to the Comparative Literature luncheon; and "Faulkner's 'House of Atreus'" at 8 p.m. in Kern Bldg. to the English Colloquium. He is the author of "The Fer Side of Paradise" and "The Saddest Story," biographies of F. Scott Fitzgerald and Ford Madox Ford, respectively.

Exam Services' new system ends need for no. 6 cards there

Thanks to new equipment just installed by Examination Services, faculty now have one less hassle — they no longer need bring their #6 class cards along to Mitchell Bldg. when they hand in their first test for scoring.

The equipment also requires a different answer sheet from the one faculty have been used to, according to Dr. David W. Stickell, director of Examination Services and research associate in educational psychology.

"Most instructors will use Form H-1, which is half the size of the old C-1 and allows students to code their numbers," he explains. "Previously, they coded both their names and numbers.



"Student numbers have already been stored on magnetic tape at the Computation Center. We have installed a remote typewriter terminal in Mitchell, connected to the center, and this makes it feasible to access the class cards without having them physically on hand."

The most significant new piece of hardware at Exam Services is a scanner with a built-in minicomputer which edits answer sheets (at the rate of one per second) before they are written on tape. The tape is self-checking, reading back each record it writes.

The system can check a control sheet to make certain it is properly filled out, check an answer key and store it in memory and then check each answer sheet to see if all necessary information is coded. If essential data such as the student number is missing, the scanner rejects the sheet. If the sheet is properly filled out, the system scores it, prints the score in the margin and transfers the data from the sheet to magnetic tape.

The magnetic tape is taken to the Comp Center where printouts (which will look just about the same) are prepared, including score reports, frequency distribution information, item analyses and, at the end of terms, summaries.

"Our visibility is based on machine scoring of tests," Dr. Stickell notes, "because it's the most tangible thing we do. We estimate that we provide this kind of service to about 15 percent of the faculty each year. But we also hope that they will take the time to study the item analyses which we provide.

THREE COMPONENTS Dr. Stickell demonstrates system. Unit at left contains computer, power supply, cassette deck used to program the system and tape drive. Teletype at center is used for communication between operator and system. Scannor is at right

"For most instructors, test construction is a very zealously guarded prerogative; however, there are probably very few perfect tests."

Exam Services' item analyses can be used in various ways. They are helpful, for example, in identifying ambiguous questions since they show how students in each grade category perform on each question in a test. If a number of "A" students choose a similar wrong answer, it could indicate that their choice is a defensible key. Again, instructors can gauge the difficulty — or easiness — of each question by consulting the figures which show how many students in the class answer each question correctly.

"Obviously no professor has to review the items on his or her test," Dr. Stickell says. "All we can do is hope that eventually they will look at them and really absorb the information they contain."

Exam Services does not have the personnel to make up tests for instructors, but they will, on request, critique a test.

Although the hardware has been changed in major ways, the procedures used to obtain service are still the same. Faculty should call 865-2503 near the beginning of each term to fill out a work request for test scoring and summarizing or call as early as possible for special projects.

PENN STATE COLLECTION

University Park Calendar

September 25–October 5

Items to be included in this calendar should be sent to the editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, Sept. 25

FSHA 410 dinner, Mid-East, 5:30 p.m., Maple Room, Human Development. Reservations required, 865-7441.

Commons Videotape showing, 12 noon, Kern lobby.

Faculty Women's Club fall reception, 7 p.m., Room 101 Kern.

Friday, Sept. 26

Folk and Square Dance Roundup, 7:30 p.m., White.

GSA's Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

English Department Fall Commonwealth Campus Conference.

Saturday, Sept. 27

Sports: Cross Country, Lady Lion Fall Invitational, 12 p.m. Women's Golf, vs. Cortland, 9 a.m. Women's Field Hockey Intersectional.

Artists Series, Leontyne Price, soprano, 8:30 p.m., University Auditorium.

Un-Common Dinner Theatre, "Butterflies Are Free," Rooms 102 and 112 Kern. Dinner at 6:30 p.m., performance at 8 p.m.

English Department Fall Commonwealth Campus Conference.

Sunday, Sept. 28

Un-Common Dinner Theatre, "Butterflies Are Free," Room 102 and 112 Kern. Dinner at 6:30 p.m., performance at 8 p.m.

Daniel Kazez, cello recital, 3:30 p.m., Music Bldg. recital hall.

English Department annual fall term tea, 3-6 p.m., Fireside Room, Nittany Lion Inn.

Sports: Women's Field Hockey Intersectional.

Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Paul Rigby, director, Center for Research.

Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Rev. George Bailey, pastor, Baptist Church, Altoona.

Tuesday, Sept. 30

Food Symposium, "Food and Our Future," 9 a.m.-9 p.m., Room 112 Kern.

Sports: Soccer, vs. West Chester, 7 p.m., Jeffrey Field.

Gallery talk, Dr. Jeanne Chenault and Dr. Roland Fleischer, art history, on the Samuel H. Kress Memorial Collection, 10:30 a.m., Museum of Art.

Wednesday, Oct. 1

Alard String Quartet, 8:30 p.m., Music Bldg. recital hall.

Food Symposium, "Food and Our Future," 9 a.m.-9 p.m., Room 112 Kern.

Noontime Concert, 12:15 p.m., Kern lobby.

FSHA 410 dinner, Ancient Rome, 5:30 p.m., Maple Room, Human Development. Reservations required, 865-7441.

Thursday, Oct. 2

Commons Videotape showing, 12 noon, Kern lobby.

FSHA 410 dinner, Renaissance Italy 5:30 p.m., Maple Room, Human Development. Reservations required, 865-7441.

Friday, Oct. 3

Sports: Women's Field Hockey, vs. Maryland, 3:30 p.m.

GSA's Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Colloquy program, 9:30 p.m., University Auditorium. Haywood Hale Broun, sportswriter and CBS news commentator.

Saturday, Oct. 4

Penn State Glee Club Homecoming Concert, 7:30 p.m., University Auditorium.

PSDC Hiking Club, backpack on Loyalsock Trail.

Sports: Soccer, vs. West Chester, 7 p.m. Men's Cross Country, vs. West Virginia. Fencing, varsity-alumni match, 8:30 a.m., Room 69 Rec Hall.

Sunday, Oct. 5

PSDC Hiking Club, backpack on Loyalsock Trail.

Chapel Service, 11 a.m., Music Bldg. recital hall. Rev. Philip Jones, D.D., pastor, The First Presbyterian Church, Milton.

Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Gerald G. Loyd, pastor, Black Christian Fellowship.

Seminars

Thursday, Sept. 25

Solid State Physics, 1 p.m., Room 339 Davey Dr. Laura Roth, SUNY, Albany, an informal seminar on ongoing work.

Physics, 3:50 p.m., Room 117 Osmond. Dr. Laura Roth, SUNY, Albany, on "Liquid Metals."

Chemistry 12:45 p.m., Room 333 Whitmore. R. G. Shulman, Bell Telephone Laboratories, on "X-ray Photo-Absorption of Iron Complexes in Proteins."

Agronomy, 8:15 a.m., Room 301A Ag. Admin. Paul Mueller on "Chemical Preservation of High-Moisture Hay" (Agronomy Ph D. thesis).

Monday, Sept. 29

Genetics, 3:55 p.m., Room 111 Tyson. Dr. Paul Todd, biochemistry and biophysics, on "Thoughts on How to Give a Seminar."

Tuesday, Sept. 30

Plant Pathology, 9:45 a.m., Room 213 Buckhout. Joseph Hill on "Herbicide-Plant Pathogen Interactions."

Air Pollution Control, 2:20 p.m., Room 140 Fenske. Allen Wiebe, Ministry of the Environment, Atmospheric Environment Service, Downsview, Ontario, on "Oxidation of Sulfur Dioxide in Smelter Plumes."

Comp Lit Luncheon, 12:15 p.m., State College Hotel. Arthur Mizener, author, on "The Biographer as Private Eye."

Inorganic Chemistry, 8 p.m., Room 333 Whitmore. Harry Allcock on "Planning a Research Project."

Analytical Chemistry, 12:45 p.m., Room 333 Whitmore. M. A Henry on "The Chemistry Department's 'Lab Box' System."

Thursday, Oct. 2

Physics, 3:50 p.m., Room 117 Osmond Dr. Norton Lang, IBM Watson Research Labs, N.Y. on "Electronic Properties of Metal Surfaces."

Agronomy, 8:15 a.m., Room 301B Ag Admin. Warren Busscher on "Simulation of Dal Root Growth, Their Water Uptake."

Chemistry, 12:45 p.m., Room 333 Whitmore. Michael M. Szwarc, SUNY, Syracuse, on "Electronic Transfer Reactions Initiated by Light."

Friday, Oct. 3

Solid State Physics, 11 a.m., Room 339 Davey Dr. Norton Lang, IBM Watson Research Labs, N.Y., on "Chemisorption on Metal Surfaces."

Meetings

Monday, Sept. 29

Panhellenic Council, 6:30 p.m., Schulze Hall (presidents only).

Education Student Council, 7 p.m., Room 109 Chambers.

Free U, 7:30 p.m. HUB ballroom.

Tuesday, Sept. 30

Senate Council, 2 p.m., Room 101 Kern.

GSA Council, 7 p.m., Room 102 Kern.

PSU faculty and student social workers, 7:30 p.m., Room 271 Willard.

College of Earth and Mineral Sciences faculty, 4 p.m., Room 26 Mineral Sciences.

Lecture

Thursday, Sept. 25

Carol Simon, owner and director of Public Relations Institute, on "Where Women Stand in Communications;" and Morton Simon, attorney, on "Communications Law and Advertising and the Intruding Finger of Government," 7:30 p.m., HUB Assembly Room. Sponsored by Women in Communications.

University Schedule

Thursday-Monday, Sept. 25-29

File for Pass-Fail.

Monday, Sept. 29

Drop deadline.

Course Repeat deadline.

Preregistration deadline.

Films

Monday, Sept. 29

France Cinema, "Shoot the Piano Player," 7 and 9 p.m., Room 112 Kern.

Wednesday, Oct. 1

GSA's Commonsplace Theatre, "McCabe and Mrs. Miller," 7:30 and 9:30 p.m., Room 112 Kern.

Saturday, Oct. 4

International Council film, 8 p.m., Room 112 Kern.

Exhibits

Museum of Art: Panel Paintings from the Samuel H. Kress Collection of the Allentown Art Museum. Drawings from the Permanent Collection, through Dec. 21.

HUB Gallery: New York City Post Card Show, through Sept. 26. Homecoming Exhibit (old photographs from Pattee, Rec Hall and La Vie).

Hammond Gallery: Laurel Howard and Susan Voytovich, graduate students in art, through Sept. 26. Kathy Curnow, graduate student in art, through Oct. 4.

Kern Gallery: Jim Scaltz, ceramics; Nancy Hazlett, pastels, charcoals, paintings; James Bruce Schwabach, paintings, through Sept. 30. Luci Vautar, watercolors, through Oct. 4. Jackie Batienfield, weavings, opening Oct. 3.

Cultural Center, Willard Bldg.: An exhibit of mixed media from "Natural Feelings," a group of Washington, D.C. artists, through Sept. 27. An exhibit of mixed media, the work of the New York Chapter of the National Conference of Artists, opening Oct. 1.

Paltee Library: Orientation to Pattee Library preserved by LSL, Main Lobby, through Sept. 29. Copper Sculpture by Curtis Clawson, opening Sept. 30, Main Lobby. Award-winning display of master plan for Porto Santo Island, Circulation Lobby. Birds-Eye Views: 19th Century Etchings of Pennsylvania Towns.

Chambers Gallery: Shirley Benrreuter, paintings and drawings. Becky Kosmal, weavings.

Zoller Gallery: Works by 20 art graduate students through Oct. 2.

Staff vacancies

University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (Network Line 475-1387). Applications for these staff vacancies will be received until 5 p.m., Thursday, Oct. 2, 1975.

ASSISTANT PROGRAM COORDINATOR, COLLEGE OF AGRICULTURE — University Park

Coordinate assigned programs, including conferences, workshops, seminars, etc., conducted at locations throughout Pennsylvania. Make arrangements for meeting rooms, travel arrangements, accommodations, meals, etc. for participants and lecturers at appropriate periods. Clear budgets through the Controller's Office and insure regulations as stipulated in grant are followed. Monitor expenditures in program budgets assigned; alert appropriate persons regarding disallowed or excessive expenditures. Present periodic budget reviews to Extension Family Affairs Section Chairman and staff. Bachelor's degree or equivalent, preferably in the field of social sciences, plus one to two years of directly related experience in coordination and/or administration of education programs. Position funded until June 30, 1977.

GOAL PLANNING PROJECT COORDINATOR — Hershey

Responsible to Associate Professor, Department of Behavioral Science, for organizing, directing and teacher in-training programs; participating and developing training materials, and developing and carrying out evaluation and research programs. Bachelor's degree or equivalent, plus three to four years' related experience.

PROGRAMMER — Capitol Campus

Responsible to the director, Computation Center, for the effective and efficient operation of the Capitol Campus computation center. Train and supervise computation center employees; assist faculty with program design, develop software and programs to produce reports, update records, make computations, etc.; coordinate Campus computer work with University Park locations, etc. Associate degree in computer science or equivalent, plus one to two years of directly related experience. Knowledge of engineering and business problem formulations and programming skills of various compiler languages essential.

18 appointments made to faculty

Dr. David A. Anderson as associate professor of civil engineering. B.S. and M.S. civil engineering, University of Connecticut; Ph.D., civil engineering, Purdue University. Formerly senior civil engineer with Corning Glass Works; assistant professor at West Virginia University.

Dr. David F. Kibler as associate professor of civil engineering B.S., engineering, Antioch College; M.S., civil/sanitary engineering, Penn State; Ph.D., hydrology, Colorado State University. Formerly senior engineer with Water Resources Engineers, Inc., Walnut Creek, Calif.; associate engineer, Kaiser Engineers, Oakland, Calif.

Dr. Ronald J. Webb as associate professor of management, Capitol Campus. B.A., Wheaton College; M.A. and Ph.D., management, University of Maryland. Formerly assistant professor at the Abadan Institute of Technology, Abadan, Iran; Instructor at the University of Maryland and the Industrial College of the Armed Forces, Washington, D.C.

Albert P. Bertoni as assistant professor of mining, Fayette Campus. B.S., industrial engineering; M.S., mining engineering, University of Pittsburgh. Formerly in mining engineering valuations with the Internal Revenue Service, Pittsburgh; mining-industrial engineer with U.S. Steel Corp., Uniontown, Pa., mining engineer with U.S. Geological Survey, Washington, D.C.

Ronald A. Chadderton as assistant professor of civil engineering B.S., civil engineering; M.S., civil/sanitary engineering, Bucknell University; completing work for the Ph.D. at Carnegie-Mellon University. Received Bucknell University and Alcoa Foundation Scholarships; prior to Ph.D. candidacy was cost engineer for Dravo Corp., Pittsburgh, and environmental engineer for the U.S Air Force, North Carolina

Dr. Michael M. Coleman as assistant professor of polymer science. B.S., Borough Polytechnic, London, England; M.S. and Ph.D., Case Western Reserve University. Formerly research chemist with E. I. DuPont de Nemours, Wilmington.

Dr. Mark W. Dirsmith as assistant professor of accounting and management. B.S., accounting, University of Illinois; M.S. and Ph.D., accounting and information systems, Northwestern University. Haskins & Sells Dissertation Grant. He is a licensed C.P.A., Illinois.

Dr. Charles E. Frank as assistant professor of mathematics, New Kensington Campus. Undergraduate at Valparaiso University, M.S., University of New Mexico; Ph.D., University of Virginia.

Dr. Stephen Jablonsky as assistant professor of accounting. B.S., M.S., Ph.D., University of Illinois.

Dr. Horace R. Thomas Jr. as assistant professor of civil engineering. B.S., architectural engineering, Virginia Polytechnic Institute; M.S., civil engineering, North Carolina State University; Ph.D., civil engineering, Vanderbilt University. Formerly instructor al Vanderbilt University; construction officer for the U.S. Army, Fort Hood, Texas; design engineer at Norfolk Naval Shipyard, Portsmouth, Va.

Dr. Marietta J. Tretter as assistant professor of management science. B.S., mathematics, University of Southern Colorado; M.S and Ph.D., quantitative educational psychology, University of Wisconsin. Formerly research associate, University of Wisconsin.

John Cosgrove as assistant professor of mining engineering and coordinator of the new two-year degree program in mining engineering technology at Altoona Campus. Received his undergraduate degree from Penn State and spent 30 years in private industry.

Donna M. Landers as instructor of physical education at Altoona Campus. B.S., SUNY at Brockport; M.S., University of Washington.

S. Jay MacMullan as instructor of electrical engineering. B.S., mechanical engineering, Penn State, M.S., electrical engineering, University of Pennsylvania; currently candidate for the Ph.D. For the last 13 years with Lewis A. Norling, North Wales, Pa., as senior scientist, senior development engineering specialist and product engineer,

George E. Obermeier as instructor of physical education at Altoona Campus. Graduate of Frostburg State College; currently doing graduate work at Penn State.

Stephanie A. Shields as instructor of psychology at Altoona Campus. B.S., University of Santa Clara; M.S., Penn State.

Ross T. Thomas as instructor of nuclear engineering al Altoona Campus. B.S., University of Virginia; M.S., Penn State.

Ellen J. Siegel as serials and catalog assistant librarian. B.A., sociology; M.S., library science, University of Pittsburgh.

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

President Oswald responds to PSUPA, rejecting proposals on PLRB petition and suggested bargaining unit at the University

On Thursday, Sept. 25, I received a letter from the Co-Chairpersons of the Pennsylvania State University Professional Association (PSUPA), which is an organization which seeks to unionize the faculty and professional staff of the University. The letter requests that the University join with PSUPA to petition the Pennsylvania Labor Relations Board to certify PSUPA as the exclusive bargaining agent for a portion of the faculty and professional staff of the University.

This proposed procedure would have the faculty and professional staff of our University forego the opportunity to vote on an issue of great importance to the future of Penn State. Enclosed with the PSUPA letter was a standard form supplied by the Labor Board which is titled "Joint Request for Certification." This document, which PSUPA asked me to sign, contains the following statement:

"That the employer has agreed to recognize the employe representative for collective bargaining purposes pursuant to Section 602(a) of the Public Employe Relations Act based on a determination that a majority of the employes in the proposed unit desire to be represented by the employe representative, which determination is based upon acknowledged interest in our organization."

If this document were signed, Penn State would be agreeing that PSUPA now represents a majority of the faculty and professional staff of the University. The Labor Board could then certify PSUPA as the exclusive bargaining agent of the faculty and professional staff. In effect, PSUPA, with this approach, is requesting that the faculty and professional staff of this University be unionized without a secret ballot election. Needless to say, I cannot consider such a proposal. Indeed, I have considerable doubt that PSUPA speaks for the majority of the faculty and professional staff.

PSUPA proposed a second approach should the University refuse joint certification. They asked the University to join them in seeking an election — but with a bargaining unit defined and structured solely by PSUPA. The University cannot agree to this. In this approach, PSUPA asked that the University President sign a document titled "Joint Election Request" that contains the following statement.

"That the unit deemed appropriate for purposes of collective bargaining is a subdivision of the employer unit comprised of the following classification of employes:

All regular professional employees employed by The Pennsylvania State University at University Park and nineteen (19) Branch Campuses (excluding Hershey Medical Center and the King of Prussia Graduate Center) including faculty, librarians, research associates, research assistants, department heads, department chairmen, directors, and other non-teaching professionals, but excluding the country agricultural and home economics agents and all supervisory and managerial employees in accordance with Act 195 — 4,200 employees who teach, conduct research, and perform other professional duties for the University."

To sign this document would constitute University agreement that the faculty and professional staff should be melded into one bargaining unit. It would constitute agreement that department heads and directors should be in the bargaining unit. It would constitute agreement to exclude faculty and professional staff of the College of Medicine, the King of Prussia Graduate Center, and the County Extension Agents from any participation in the vote. These are serious issues affecting the academic and the administrative organization and operations of the University as well as the welfare of the individuals involved. They should be resolved only after careful study and consideration and following procedures designed for that purpose.

The question of whether or not to unionize is for the faculty and professional staff of this University to decide. That decision should be based on knowledge and serious study. I again urge each member of the faculty and professional staff to become informed about the implications of these issues for the long-term welfare of the University.

News in brief

Senate appointments made

The following committee appointments have been made in the University Faculty Senate:

Committee on Faculty Rights and Responsibilities:

Dr. Raymond G. D. Ayoub, chairman; Dr. Ronald J. Harshbarger, vice chairman; and Dr. Robert J. Scannell, secretary.

Senate Advisory Committee for Developmental Year Program:

Dr. Robert M. Bernoll, Dr. Thomas E. Daubert, Dr. Wilma R. Ebbitt, Dr. Mary L. McCammon, Dr. Richard L. McCarl and Dr. Phillip E. Stebbins.

Foreign Studies Advisory Committee:

Dr. Letand L. Beik, Dr. Madison Brewer, Dr. Valdimir DeLissovoy, Elizabeth G. Ellis, Dr. Kent Forster, Dr. Robert H. McAlexander, Warren S. Smith and Dr. Leonard N. Zimmerman.

Joint Senate Administrative Committee on Insurance:

Dr. John J. Cahir, James Gaillivan, Dr. James D. Hammond, John V. Pezzoni and Dr. James C. Wambold.

Hort Show scheduled

"Pennsylvania Horticulture — Past, Present and Future" is the theme of the 62nd annual Horticulture Show, which will be set up at the Ice Pavilion from 10 a.m. to 8 p.m. on Saturday, Oct. 4, and from 10 a.m. to 4 p.m. on Sunday, Oct. 5. A futuristic plastic dome enclosing a Horticulture in the Future display will represent the kind of artificial environment that might one day be used in a lunar station or underground colony. Methods for growing plants in water and artificial soils will be demonstrated, while in another area, woodland and tropical settings have been designed to show the parks of the future. A project of the Horticulture Club, the show annually attracts thousands of visitors. This year they will again be able to purchase potted plants, pumpkins, apples and cider.

United Way drive on

The Centre County United Way Drive has announced a $257,000 goal this year to support its 26 member agencies. As the largest single employer in the County, the University's goal has been set at $80,000, according to University chairman Robert J. Scannell, dean of the College of Health, Physical Education and Recreation. All faculty and staff employees have received materials which will permit them either to make a direct payment or to choose a payroll deduction plan. In a letter to his fellow Penn Staters, Dean Scannell notes that Penn State ranks below Notre Dame, Ohio State and Nebraska in the percentage of employees contributing to the United Way. "Even a minimal donation would improve our standing in this humanitarian ranking of schools," he points out.

Photography course set

A Symposium on the History of Photography will be held on four consecutive Tuesdays, beginning Oct. 7, from 7 to 10 p.m. in Kelter Bldg. The pre-photography era will be the topic at the first session, along with the invention of photography in England and France and early photography in America. On the second Tuesday, participants will learn about the great 19th century masters, and the following week, photography in the Civil War and photography and literature will be discussed. The concluding session will investigate the influence of photography on painting and vice versa. The instructional staff includes Dr. Heinz Henisch, professor of the history of photography, Dennis Lowe, a professional dealer in early military Americana and photographic antiques; and Bridget Ann Henisch, who is currently preparing an anthology on the reactions of artists and the public to the invention of photography. Registration requests should be addressed to Continuing Education, 865-3443, by Friday, Oct. 3.

Public supports education

A Penn State researcher has come up with some new statistics which show that the public's opinion of education is actually pretty high.

"The negative public opinion of education in the United States has been seriously overestimated in the press and other media," concludes Dr. Frank Clemente, associate professor of sociology, who conducted a nation-wide survey on the people's confidence in American institutions.

"In our survey, we found education to have a very high position in regard to confidence," says Dr. Clemente. "In fact, of 12 institutions evaluated, education ranked second in terms of public confidence. Only medicine has a higher rating on confidence."

The following question was asked last spring to a representative sample of 1,484 adult residents of the United States: "As far as people running various institutions in the United States are concerned, would you say you have a great deal of confidence, only some confidence, or hardly any confidence in them?"

Regarding education, hall reported a great deal of confidence; 42 percent, only some; and 8 per cent, hardly any.

Some results for other institutions.

The Press — a great deal, 26 percent; only some, 56 percent; hardly any, 18 percent.

Congress — a great deal, 17 percent; only some, 53 percent; hardly any, 30 percent.

Business — a great deal, 32 percent; only some, 53 percent; hardly any, 15 percent.

99 medical students enroll

Ninety-nine new medical students began classes this fall in the College of Medicine at The Milton S. Hershey Medical Center.

This marks the ninth consecutive year that the college has enrolled a record size class. The first class in 1967 had 40 students, while last fall's had 91. Total enrollment for all four medical classes is also at a new high — 356, compared to 329 last year.

A profile of the new class shows that 30 percent of the students are Pennsylvania residents, with 54 percent from communities with populations under 20,000. Women compose 23 percent of the class. The students majored in approximately 21 major fields, with 13 percent in non-science areas such as Chinese, international relations, child study, anthropology, history English and psychology. There are 2,575 applications for the class, 62 percent of them from the Commonwealth.

The students have degrees from 53 different colleges and universities, but 60 percent are graduates of Pennsylvania institutions. Penn State supplied 11, the largest number from a single school, and the University of Pennsylvania followed with 10. All the other schools which provided three or more students were from Pennsylvania. They include Franklin & Marshall, 7; Allegheny, 5; Pittsburgh, 4; Dickinson, 4; and Juniata, 3.

AAUW to hold supper

The State College Branch of the American Association of University Women welcomes women graduates of accredited colleges and universities as members. The first general meeting of the group is Thursday, Oct. 9, at the State College Woman's Club, 902 S. Allen St. There will be a salad sampler supper — each member contributes a salad — at 6.30 p.m. and a meeting at 8 p.m. Inquiries may be made to the vice president for membership, Margaret Ingram, 237-1689.

Navy celebrates 200th

Penn State's Naval ROTC unit will celebrate the 200th anniversary of the founding of the United States Navy on Oct 13, 1775, with a no-host luncheon — a few days early — on Friday, Oct. 10, at 11.15 a.m. at the State College Hotel. All retired and reserve officers and enlisted men and all other friends of the Navy who would like to attend should contact Lt. John Wise at 865-6289 by Friday, Oct. 3, for reservations. The luncheon will cost $4 per person.

PENN STATE COLLECTION

Faculty notes

Dr. Maurice Shamma, professor of chemistry, will go to Pakistan Nov. 5 to Dec. 5 to search for medicinal plants under a grant from the National Science Foundation. A specialist in natural products chemistry, Dr. Shamma will try to find specimens confining chemicals called alkaloids, a large family of plant derivatives valued for centuries for their medicinal properties. His previous trips to Sri Lanka (Ceylon) and Mexico have yielded numerous exotic plant species including many that contained potential medicines. Recently Dr. Shamma and his research group isolated from a barberry shrub that grows in northern Pakistan one of the few new compounds from the alkaloid family to appear in recent years. They called the new alkaloids pakistanine and pakistanamine. Although their medical significance still remains to be demonstrated, the new compounds have similarities with at least one other alkaloid currently being tested for anti-cancer activity. Shamma says Southeast Asia is traditionally regarded as the richest source of alkaloid bearing plants, followed by South America and Africa. But the Penn State researcher has also investigated certain Pennsylvania plants, which, he says, are like those of Pakistan due to similarities in climate. Last year he extracted four potential anti-cancer drugs from the Commonwealth's giant meadow rue and called the new compounds, pennsylvanine, pennsylvanamine, pennsylpavine and pennsylpavoline.

Dr. Thomas Rogers, professor of English, is serving as a guest lecturer at the University of Iowa's Creative Writing Workshop during October and November. Dr. Rogers is the author of two novels, "The Pursuit of Happiness" and "The Confession of a Child of the Century."

Two computer scientists from the Soviet Union are visiting the University under the exchange program of the International Research and Exchange Board. Dr. **Virgilius V. Bulovas,** Department of Computer Science, Kaunas Polytechnic Institute, Lithuania, and **Dr. Oleg B. Arushanian,** a senior research staff member of the Scientific Research Computing Center of the (M. V. Lomonosov) Moscow State University are spending the academic year in joint research with members of the University's Department of Computer Science. Dr. Bulovas will work with **Dr. Edward G. Coffman Jr.**, professor of computer science, and Dr. Arushanian, with **Dr. Charlotte F. Fischer,** professor of computer science. A specialist in digital computers, Dr. Bulovas will investigate operating systems and scheduling problems during his stay. He is the author of several papers on computer topics published in Russian scholarly journals. Dr. Arushanian is deputy chief of the Laboratory of Numerical Analysis at Moscow State University. In 1974 he was awarded the Lomonosov Prize for the design of a multi-language automatic programming system, called the Program Generator.

Four prominent Penn State athletic personalities will be inducted into the Pennsylvania Sports Hall of Fame during the 13th annual Induction Ceremony and Awards Dinner on Nov. 15 in Camp Hill. They are gymnastic coach **Gene Wettstone** and former athletes **Rich Lucas,** Lenny Moore and Neil Stahley. Wettstone, a professor of physical education, is recognized as the nation's top gymnastics coach. During his 37-year career, the Lions have won 197 meets, lost 39 and tied one. His teams have been National Collegiate Athletic Association champions eight times, and he has twice served as head coach of the U.S. Olympic team. Lucas, an All-American quarterback and winner of the 1959 Maxwell Award, is the business manager for athletics here. Former running back Lenny Moore was recently inducted into the National Football League Hall of Fame after an outstanding career with the Baltimore Colts, for whom he is now director of promotions. Stahley was a member of the Penn State football, basketball and lacrosse squads from 1926 to 1930 and went on to become one of the nation's most prominent athletic administrators as well as a top football coach.

Dr. Joseph Jordan, professor of chemistry, has been appointed to a three-year term on the Evaluation Panel for the Physical Chemistry Division of the Institute for Materials Research, National Bureau of Standards. The panel is charged with the review and evaluation of the division's programs and plans. It will also consider the importance and relative priority of projects, quality of staff, equipment needs, finance and the relation of programs to the mission of the National Bureau of Standards. Dr. Jordan is currently on leave from the University in Paris, where he is participating in research and offering graduate courses at the University of Paris and the French National Science Foundation.

Dr. Jean E. Brenchley, assistant professor of microbiology, presented a seminar last month at the Microbiology Department of Indiana University, Bloomington, Ind., on "Regulation of Ammonia Assimilatory Enzymes in Aerobacter and Salmonella." A specialist in microbial genetics and physiology and modular biology, Dr. Brenchley joined the Penn State faculty in 1971.

Dr. George W. Franz, assistant professor of history at Delaware County Campus, has been named assistant editor of the Van Buren Project, a collection of the papers of the eighth president of the United States.

The appointment was made by Dr Kent Forster, professor and head of the department of history.

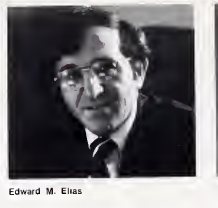
The project, with headquarters at the University's Ogontz Campus in Abington, is co-sponsored by Penn State and the National Historic Publication and Records Commission.

During the past six years, under the direction of **Dr. Walter Ferree,** professor emeritus of history at Ogontz, the project has located more than 12,000 separate documents related to Van Buren at more than 250 different places.

Upon completion, the project will be the only collection of the papers of Van Buren, who served from 1837 to 1841. The editors will produce a microfilm edition of the papers and an annotated letterpress edition. Ferree, editor of Van Buren's autobiography to be published by Penn State's Press. Dr. Franz expects to collect material to fill approximately 90 reels of microfilm.

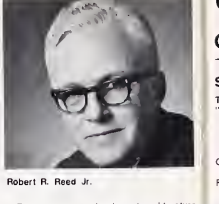
Dr. Franz, who has been a faculty member at Delaware County since 1968, has an A.B. from Muhlenberg College and an M.A. and Ph.D. from Rutgers University. His field of specialization is American colonial and revolutionary history. He will assume the editorship of the project upon Professor Ferree's retirement on July 1, 1976.

Dr. Howard W. Thoele, assistant dean for administrative services of the College of Agriculture, has been promoted to associate dean for administrative services and associate professor of dairy science.



Dr. James M. Beattie, dean of the College of Agriculture, said Dr. Thoele's advancement recognizes his overall responsibilities for the fiscal and personnel affairs of the entire College.

Additional responsibilities of Dr. Thoele include liaison between the College and the Office of Physical Plant, the College safety program, farm operations, and management information services, including the statistical laboratory operation within the College.



Dr. Ruth L. Pike presented an invited paper at the International Symposium on Hypertension in Pregnancy at the University of Chicago last month. Dr. Pike reported on the sodium requirement during pregnancy in the rat and the relationship between the sodium-regulating mechanism and blood pressure.

Dr. Kenneth W. Masters, professor of social sciences at Capitol Campus, has been appointed program head for the area. Dr. Masters has been a member of the faculty at Capitol Campus since 1967 and is the former director of the Bureau of Statistics in the Pennsylvania Department of Internal Affairs. He was a technical assistance adviser for the U.N. for two years in The Philippines and for four years in Nigeria.

Two reach 25-year mark at University

Edward M. Elias

Robert R. Reed Jr.

Edward M. Elias, director of the York Campus, has seen the campus grow from an unused elementary school to a 17-acre campus which houses three modern buildings and a soon-to-be completed million dollar classroom structure.

Elias in 1950 became the first full-time faculty member — and also the administrator — of what was then known as the York Center. The enrollment totaled 25 full-time students in the one-year technical program offered. Today, 748 full-time students are enrolled, along with more than 1,000 others in continuing education.

The one-year technical program has grown to include the first two years of 118 baccalaureate programs and eight career-oriented, associate degree programs.

A 1950 graduate of Lafayette College with a B.S. degree in electrical engineering, Elias received a M.A. degree in 1969 from the University of Maryland. He is a veteran of the U.S. Navy.

He is a member of the Institute of Electrical and Electronics Engineers, organizing and serving as chairman of the Susquehanna section, the American Society for Engineering Education; the Adult Education Association of the United States and the American Association for Higher Education.

He has served as a consultant to several universities regarding the initiation and development of college-level engineering technology programs.

Active in numerous civic projects, Elias has served as president of the United Way of York County, chairman of the York County Drug Abuse Council, and vice president of the York Area Chamber of Commerce.

Dr. John E. Tilton, professor of mineral economics, returned recently from Tokyo where he participated in a meeting of the Task Force on Access to Supplies of the Trilateral Commission as a representative from North America. The Trilateral Commission was formed in 1973 by private citizens of Western Europe, Japan, and North America to foster closer cooperation among these three regions on common problems. The task force met to discuss the final draft of a report dealing with the problems major importing nations are likely to encounter in acquiring minerals and other raw materials in the future. The report also considers measures that these nations and the international community might undertake to alleviate such problems.

New book reinterprets Manet

In a new book, Dr. George Mauner, professor of art history, offers a reinterpretation of the painter Manet, who stands at the beginning of modern art.

"Manet, Peintre-Philosophe: A Study of the Painter's Themes" has been published by Penn State's Press.

"Manet was a painter whose work over a period of more than two decades reveals an organic unity not immediately apparent when it is studied in discrete units of time, style or subject category . . . ," Dr. Mauner writes.

Long viewed as a pure painter for whom subject was a matter of indifference, Manet in recent years has awakened renewed interest among scholars for his choice of subjects and the meanings they may have held for him. Dr. Mauner's study is the first to reveal the presence of a philosophic meaning in Manet's oeuvre.

"Manet's paintings are usually grouped under standard headings such as portraits, still lifes and landscapes," Dr. Mauner explains. "I have tried to distinguish between this apparent subject matter and the underlying themes and have regrouped the pictures on the basis of the latter. As a result, a picture of the artist rather different from the familiar one emerges."

A member of the faculty since 1962, Dr. Mauner received his Ph.D. from Columbia University. He organized the Three Swiss Painters exhibit for the Museum of Art in 1973 and prepared the catalog for this show, which also travelled to the Munson-Williams-Proctor Institute in Utica, N.Y., to Harvard University and the Guggenheim Museum in New York City. He has also arranged shows on the Nabis, Vuillard and Aspects of Cubism for Penn State.

Dr. Mauner is currently on leave in Switzerland working on a major Nabis exhibit for the New York museum.

University Park Calendar

October 2–12

Items to be included in this calendar should be sent to the editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, Oct. 2

"Service: Our Civic Rent," a convocation honoring Richard A. Benefield, recipient of 1975 Alumni Recognition Award, College of Human Development, 8 p.m., 5209 Henderson.

Commons Videotape showing, 12 noon, Kern lobby.

FSHA-410 dinner, Renaissance Italy, 5:30 p.m., Maple Room, Human Development. Reservations required, 865-7441

Friday, Oct. 3

"The Community, Our Laboratory," panel discussion with Richard A. Benefield and students. 1:30 p.m., Henderson Living Center.

Sports: Women's Field Hockey, vs. Maryland, 3:30 p.m.

GSA's Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Colloquy program, 9:30 p.m., University Auditorium. Haywood Hale Broun, sports-writer and CBS news commentator.

Saturday, Oct. 4

College of Human Development Alumni Coffee Hour, 9:15-11 a.m., Henderson Living Center.

PSOC Hiking Club, backpack on Loyalsock Trail.

Sports: Football, vs. Kentucky, 1:30 p.m., Beaver Stadium. Men's Cross Country, vs. West Virginia. Fencing, varsity-alumni match, 8:30 a.m., Room 69 Rec Hall.

Penn State Glee Club Homecoming Concert, 7:30 p.m., University Auditorium.

Alpha Kappa Alpha Sorority, social event, 10:30 p.m., HUB ballroom

Sunday, Oct. 5

PSOC Hiking Club, backpack on Loyalsock Trail.

Chapel Service, 11 a.m., Music Bldg. recital hall, Rev. Philip Jones, D.D., pastor, The First Presbyterian Church, Milton

Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Gerald G. Loyd, pastor, Black Christian Fellowship.

Tuesday, Oct. 7

Artists Series, Fellini Film Festival, "The White Sheik," 8:30 p.m., University Auditorium.

Wednesday, Oct. 8

Noontime Concert, 12:15 p.m., Kern lobby

FSHA-410 dinner, France, 5:30 p.m., Maple Room, Human Development. Reservations required, 865-7441.

Raymond Brown, bass-baritone recital, 8:30 p.m., Music Bldg. recital hall.

Thursday, Oct. 9

University Theatre, "Summer and Smoke," 8 p.m., Pavilion Theatre.

FSHA-410 dinner, Early England, 5:30 p.m., Maple Room, Human Development. Reservations required, 865-7441.

Friday, Oct. 10

Penn State Symphony Orchestra, 8.30 p.m., University Auditorium.

GSA's Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

University Theatre, "Summer and Smoke," 8 p.m., Pavilion Theatre.

Saturday, Oct. 11

Sports: Football, vs. West Virginia, 1:30 p.m. Men's Cross Country, vs. Kent State.

University Theatre, "Summer and Smoke," 8 p.m., Pavilion Theatre.

Artists Series, Monteverdi Choir and Orchestra, Monteverdi "Vespers," 8:30 p.m., University Auditorium.

Sunday, Oct. 12

PSOC Hiking Club, Flaming Fall Foliage Hike, 9 a.m.

Chapel Service, 11 a.m., Eisenhower Chapel, Dr. Julian Casserly, Seabury-Western Theological Seminary, Evanston, Ill.

Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Rev. Charles L. Coleman, Religious Affairs.

Seminars

Thursday, Oct. 2

Physics, 3:50 p.m., Room 117 Osmond. Dr. Norton Lang, IBM Watson Research Labs., N.Y., on "Electronic Properties of Metal Surfaces."

Agronomy, 8:15 a.m., Room 301B Ag. Admin. Warren Busscher on "Simulation of Oat Root Growth, Their Water Uptake."

Chemistry, 12:45 p.m., Room 333 Whitmore. Michael M. Szwarc, SUNY, Syracuse, on "Electronic Transfer Reactions Initiated by Light."

Computer Science, 4 p.m., Room 325 Whitmore. Altan Borodin, University of Toronto, on "Parallel Arithmetic Complexity and LBS Problem."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Dr. Helmut Landsberg, University of Maryland, on "Urban Weather and Climate Modification."

Philosophy, 4 p.m., Room 151 Willard. Alfonso Gomez-Lobo, visiting associate professor of philosophy, on "Aristotle's First Philosophy and the Principles of Particular Disciplines."

Engineering Acoustics, 4 p.m., Room 73 Willard. Dr. P. Dammig, Federal Research Institute of Technical Physics, Braunschweig, Germany, on "Recent Activities of the PTB Acoustics Division, Braunschweig, Germany."

Friday, Oct. 3

Solid State Physics, 11 a.m., Room 339 Davey. Dr. Norton Lang, IBM Watson Research Labs., N.Y., on "Chemisorption on Metal Surfaces."

Monday, Oct. 6

Aerospace Engineering, 4 p.m., Room 216 Hammond. Dr. S. J. Kline, Stanford University, on "A New Algorithm for Computation of Fully-Separated Flows, Passage of Arbitrary Shape and Free-Streamline Flows."

Biochemistry, 11:10 a.m., Room 101 Althouse. Dr. Peter Jurs, chemistry, on "Biochemical Applications of Computers."

Genetics, 3:55 p.m., Room 111 Tyson. Dr. Dale Therrien, biology, on "Induction of Agomixis in the Plasmodial Slime Mold 'Didymium Iridis.'"

Tuesday, Oct. 7

Biochemistry, 11:10 a.m., Room 101 Althouse. Dr. Peter Jurs, chemistry, on "Modular Structure — Biological Activity Correlations."

Engineering Science and Mechanics, 4 p.m., Room 215 Hammond. Dr. Sigurd Wagner, Bell Telephone Labs., on "New Efficient Heterodiode Solar Cells."

Physics, 3:50 p.m., Room 117 Osmond. Dr. H. Gordon Berry, University of Chicago, on "Surface Interactions in Beam-Foil Spectroscopy."

Plant Pathology, 9.45 a.m., Room 213 Buckhout. David Lambert on "Predisposition by Nematodes to Soil-Borne Pathogens."

Analytical Chemistry, 12:45 p.m., Room 333 Whitmore. F. A. Serravallo on "Microwave Induced Plasma."

Inorganic Chemistry, 4 p.m., Room 333 Whitmore. Wolf Lehman on "Transistor Metal Hydride Complexes."

Comp Lit Luncheon, 12.15 p.m., State College Hotel. Jane Singh, education, on "A Cross-Cultural Comparison of Children's Literature in the United States"

Air Pollution Control, 2:20 p.m., Room 140 Fenske. Thomas E. Starkey, grad. asst. plant pathology and air pollution control, on "Influence of PAN on Vegetation."

Wednesday, Oct. 8

Fuel Science, 4 p.m., Room 301 Min. Ind. T. Patrick Gaganidze, Office of Technology Assessment, Washington, D.C., on "Fossil Fuels, Industry and the Public Good: A View from Just Beneath the Hill."

Energy-Bioenergetic, 3:55 p.m., Room 111 Life Sciences I. Dr. F. J. Remick, nuclear engineering, on "Fission: the Process, Equipment, Efficiency and Problems."

Thursday, Oct. 9

Microbiology, 3:55 p.m., Room S2 Frear. Dr. Roland Nardone, Catholic University of America, on "The Use of 'In Vitro' Systems for Toxicity Testing."

Anthropology, 3:30 p.m., Room 107 Social Science. Dr. Joseph W. Michels on "An Archaeological Survey of the Axum Kingdom, Ethiopia."

Physics, 3:50 p.m., Room 117 Osmond. John Tripp, University of Connecticut, on "de Haas-van Alphen Effect in Beryllium and its Alloys."

Agronomy, 8:15 a.m., Room 301 Ag. Admin. Dr. Roy Simonson, Soil Conservation Service, Washington, D.C., on "Soil Resources and World Food Production."

Chemistry, 12.45 p.m., Room 333 Whitmore. Richard S. Juvet, Arizona State University, on "New Concepts in Liquid Chromatography Detectors."

Meetings

Sunday, Oct. 5

Interlandia Folk Dance Club, 7:30 p.m., south gym, White.

Monday, Oct. 6

College of Health, Physical Education and Recreation faculty, 7 p.m., IM Bldg.

Panhellenic Council, 6:30 p.m., Shulze Hall.

Color Slide Club, 7:30 p.m., 112 Kern. Paul Edmonston, art education, on "Reflections on Photography as a Creative Art. Competition judged by Laurent Wright, geology.

Chinese acrobats

Tuesday, Oct. 7

GSA Council, 7 p.m., Room 101 Kern.

Engineering Undergraduate Council, 7:30 p.m., Room 207 Sackett.

Wednesday, Oct. 8

AWS, 7 p.m., Room 225 HUB.

Film

Wednesday, Oct. 8

GSA's Commonsplace Theatre, "Play It as It Lays," 7:20 and 9:30 p.m., Room 112 Kern.

Lecture

Wednesday, Oct. 8

Robert Venturi and his wife, Denise Scott Brown, architects and planners from Venturi and Rauch, a lecture on architecture, 7:30 p.m. in Room 108 Forum. Sponsored by Department of Architecture.

Exhibits

Museum of Art: Panel Paintings from the Samuel H. Kress Collection of the Allentown Art Museum. Drawings from the Permanent Collection.

Kern Gallery: Luce Vantar, watercolors, through Oct. 4. Jackie Battenfield, weavings, opening Oct. 3.

Cultural Center, Walnut Bldg.: An exhibit of mixed media, the work of the New York Chapter of the National Conference of Artists.

Paltee Library: Copper Sculpture by Curtis Clawson, Main Lobby. Award-winning display of Forte Santo Island Master Plan, Circulation Lobby, through Oct. 6. Prints by Mary Hamilton, opening Oct. 7, Circulation Lobby. Birds-Eye Views: 19th Century Etchings of Pennsylvania Towns, East Corridor. "100 Years of the Art Students League," Art Library Lobby.

Chambers Gallery: Shirley Bernreuter, paintings and drawings. Becky Kosmal, weavings.

Arts roundup

Choir, acrobats coming

The Monteverdi Choir and Orchestra of Hamburg will come to University Auditorium on Saturday, Oct. 11, and the Chinese Acrobats from the Republic of China will visit Recreation Hall on Wednesday, Oct. 15, both under the auspices of the Artists Series.

Tickets for these performances will go on sale Tuesday, Oct. 7, for patrons only. At this time, patrons may also buy tickets to any of the other events in the Music Series which are not sold out.

The following day, Oct. 8, tickets will be available to the general public. Both sales will be held at the HUB Booth and University Auditorium from 9 a.m. to 4 p.m.

The "Monteverdi Vespers" will be sung by a company of 100 with six soloists under the direction of Jurgen Jurgens. The choir and orchestra, which are affiliated with the University of Hamburg, have won several international prizes, including the Grand Prix du Disque.

The spectacular Chinese acrobats appeared last Sept. 9 on the Tonight show. The 65-member company includes both musicians and acrobats, and the dazzling feats of the latter represent a unique Chinese contribution to entertainment.

Brown to sing

Raymond Brown, bass-baritone, will perform a recital of vocal music at 8:30 p.m. Wednesday, Oct. 8, in the Music Bldg. recital hall.

Professor of music and director of choral music at the University, Brown will be accompanied by pianist Dr. Roslyn Glazerman when he sings Brahms' "Vier ernste Gesaenge," four songs from Biblical texts from Ecclesiastes, Corinthians I, and Ecclesiasticus in the Apocrypha. Also to be performed are Brahms' "Of Eternal Love" and "The May Nights" from opus 43 and songs from opus 105.

Five songs on the program will feature Brown and the Alard String Quartet, including pieces by Williams, Warlock and Mozart, and Barber's "Dover Beach." Joining quartet members Joanne Zagst and Donald Hopkins, violins, Raymond Page, viola, and Leonard Feldman, cello, and Brown in the performance of "Betrechte meine Seel" from the "Passion According to St. John" by Bach will be June Miller, harpsichord.

Opening Wednesday's recital will be a song by Schuetz for bass-baritone, organ, and four trombones, with Miller playing the organ and trombonists Dr. Warren George, Michael Powell, Kenneth Sloane, and Jack Miller.

Brown studied at the University of South Carolina and the Juilliard School of Music and received degrees from the Peabody Conservatory and Johns Hopkins University. He has performed in operas, oratorios, and recitals in some of the major cities of the East.

Theatre season opens

Tennessee Williams' "Summer and Smoke" opens the University Theatre's fall season Thursday, Oct. 9, in the Pavilion Theatre.

Other productions of the play are scheduled for Oct. 10 and 11, as well as Oct. 14 through 18. Curtain times are 8 p.m.

Directed by graduate student Christopher Barns, "Summer and Smoke" tells the sensitive love story of a puritanical Southern girl and a doctor whose divergent attitudes toward life ultimately keep them apart.

It will be followed by Bertolt Brecht's "The Caucasian Chalk Circle," a dramatic parable of justice and one oi the East German playwright's strongest works. Knox Fowler, professor of theatre arts, will direct the play, which opens Oct. 30.

The Playhouse Box Office is selling tickets for both of these dramas Mondays through Saturdays from 1 to 6 p.m. and from 1 to 9 p.m. on the days of a performance. Tickets for "Summer and Smoke" will also be available at the Pavilion Theatre Box Office at 7 p.m. on

(Continued on page 4)

Arts roundup

(Continued from page 3)

performance days. Tickets may be reserved by calling 865-1884.

Glee Club concert

The annual Homecoming Concert by the Penn State Glee Club, dedicated to the memory of the late Dr. James Dunlop, professor of music education and director of the Blue Band, will be heard at 7:30 p.m. Saturday, Oct. 4, in the University Auditorium.

The 76-voice choir, directed by Bruce Trinkley, associate professor of music, will sing works by American composers, including early hymns, several poems by Robert Frost set to music, folk songs and selections from the Pennsylvania Bicentennial Wagon Train Show, which was written and produced by the theatre and music departments at Penn State.

As is traditional, alumni and friends of the Glee Club will be invited to join the group on stage to sing Penn State fight songs and the Alma Mater to conclude the concert.

Carli exhibit at Capitol

Works by painter and sculptor Othmar Carli are on exhibit at the Capitol Campus through Friday, Oct. 10. An instructor in art at the York Academy of Arts, Carli is teaching a course in studio art technology at Capitol this term. He is a native of Austria and has done restoration and conservation work at museums in Europe and America. Later this year he is scheduled to restore works for the Corcoran Gallery in Washington, D.C., and the Whitney Museum in New York City. He has had a number of one-man shows in Pennsylvania and Maryland.

Venturi and Brown to speak

Robert Venturi and his wife, Denise Scott Brown, members of the firm of Venturi and Rauch, architects for Penn State's Faculty Club, will speak on architecture at a lecture Wednesday, Oct. 8, at 7:30 p.m. in Room 108 Forum Bldg. Their talk is sponsored by the Department of Architecture. An exhibit of the work of these two architects is on display through Oct. 26 at the Pearl House Gallery of the Pennsylvania Academy of the Fine Arts in Philadelphia.

Master plan displayed

A display of the physical master plan and program and ideas for the development of Porto Santo Island, which won an international award for five University faculty members, will be shown through Friday, Oct. 10, in the Circulation Lobby of Pattee.

The Penn State faculty members, one of just two American teams to place in the competition sponsored by the Portuguese Ministry of Public Works with the sanctioning of the International Union of Architects, were Wladyslaw Strumillo, associate professor of architecture; Daniel Jones, assistant professor of landscape architecture; and Dr. Eugene Bazan, assistant professor of environmental planning in the Department of Man-Environment Relations. The consultant for agriculture was Dr. Robert Cunningham, associate professor of soil genesis and morphology, and for technology, Dr. Luis Summers, associate professor of architectural engineering.

The plan included ecological and agricultural restoration, along with proposals to provide for tourism and to improve the standard of living for the native population of about 4,000.

Shown in the exhibit are preliminary studies and sketch diagrams, photographs of the island, which is located in the Madiera Archipelago in the Atlantic Ocean, the original program describing the competition, jury results and juror comments, analysis maps, maps which summarize the natural and man-made environments and architectural drawings of tourist facilities.

Among jurors for the competition, which attracted some 300 entries, were architects and engineers from Poland, Portugal, Great Britain, Spain and the United States. The jury commended the Penn State entry for its presentation of ideas for the development of co-existence between natives and tourists and for its granting of priority to self-sufficiency.

WPSX highlights

The problems surrounding the development of a Statewide land use policy for Pennsylvania are examined on **Land: The Common Wealth** Thursday, Oct. 2, at 7:30 p.m. The hour-long special, one of several programs on land use to be broadcast by WPSX in October, explores several specific land use problems and how they could complicate an overall land use policy for the State. Included are views of land use problems in Lancaster County, the north central highlands, the flood plains, the Stony Creek wilderness area, Philadelphia, the Slippery Rock area, and other parts of the State. (On Friday, Oct. 3, at 7:30 p.m., **People, Places, Things, Now** presents a panel of land use planners who analyze issues raised by this program.)

"Edward II," Christopher Marlowe's drama of the turbulent and violent reign of the 14th century king, is featured on **Classic Theatre - The Humanities in Drama** Thursday, Oct. 2, at 9 p.m. Ian McKellen stars in the play, which had rarely been seen until the Edinburgh Festival production made McKellen an international celebrity. McKellen and actress Christopher Leech of the University of Connecticut are featured in a companion program, **Classic Theatre Preview**, to be seen Thursday at 8:30 p.m.

Seiji Ozawa and the Boston Symphony Orchestra return for a new season of **Evening at Symphony** Sunday, Oct. 5, at 8 p.m. The first program features Charles Ives' "Central Park in the Dark" and "Ein Heldenleben" by Richard Strauss.

The woman's suffrage struggle in Britain in the early years of this century is the focus of a six-part dramatic series when **Masterpiece Theatre** makes its season premiere Sunday, Oct. 5, at 9 p.m. Titled "Shoulder to Shoulder," the series examines the suffrage movement as seen through the lives of the Pankhursts, an extraordinary family of women who helped to catalyze the movement. Each program may also be seen Friday at 9 p.m.

Beverly Sills stars in a full-scale production of Donizetti's opera, "Roberto Devereux" when **In Performance at Wolf Trap** returns for another season Monday, Oct. 6, at 8 p.m. The opera, which tells the story of Queen Elizabeth's love for the Earl of Essex, also features John Alexander, Susanne Marsee and Richard Fredricks, and New York City Opera director Julius Rudel conducting.

The development of behavioral technology and the issues that surround the increasing use of behavior modification on both individual and larger social levels are the subject of **The Behavior Revolution**, a five-part Penn State **Television** series premiering Tuesday, Oct 7, at 9:30 p.m. The series, developed as a major instructional resource for a Statewide college credit course in the Science, Technology and Society program, is being seen over the Pennsylvania Public Television Network. The first program examines the history of behavioral thought from the time of Plato and Aristotle to the development of psychology as a scientific discipline and the eventual discovery of operant conditioning. Featured is B. F. Skinner, the forenost behaviorist working today. The course is being offered at all Penn State campuses.

Lee Remick stars as Winston Churchill's lively American mother when **Great Performances** presents a seven-part dramatization of "Jennie: Lady Randolph Churchill" beginning Wednesday, Oct. 8, at 9 p.m. The series follows the life of Jennie Churchill from her marriage to Lord Randolph Churchill through her later years when she campaigned for her son Winston and carried through major efforts on her own.

Economics and the free enterprise system are the subjects of **TINSTAAFL**, a 13-week series beginning Thursday, Oct. 9, at 7:30 p.m. The series title, which describes the emphasis of the program, is an acronym for "There Is No Such Thing as a Free Lunch." The series is devoted to informing viewers about how the economy works and issues affecting the free enterprise system. Included each week are news reports, instructional segments on various aspects of the economy and debates among college students from around Pennsylvania on the pros and cons of free enterprise.

Funding opportunities

For procedural and funding source information, call 865-1372.

(185-6) Young engineering faculty at both undergraduate institutions and graduate institutions are eligible to apply to **1976 NSF Engineering Research Initiation Program Grants** which provide opportunities to conduct research on campus or with industry, government and research organizations. Any special areas are stressed for research such as energy, environment, food, natural hazards, productivity and natural resources, but others are accepted. Option A (unsolicited research) has been increased to $20,000. Option B (non-academic environment) remains at $35,000 for a two-year period. Application deadline is Dec. 1, 1975. Program contact is Engineering Research Initiation Program, NSF, Washington, D.C. 20550 (202-632-5790). This information has been distributed. (Ref NSF 76-129 184-3)

(190-1) The National Science Foundation is seeking proposals for two-day **Regional Research Conferences in the Mathematical Sciences.** Each conference will feature ten lectures by 6 distinguished panel lecturers, plus about 50 other active participants. About ten conferences are funded each year, usually in summer or between terms. In addition to the principal lecturers, all active participants receive allowances for travel and subsistence under the host institution's grant. The proposal deadline is Oct. 15, 1975. Details are available from the Conference Board of the Mathematical Sciences, 634 Joseph Henry Bldg., 2101 Pennsylvania Ave. N.W., Washington, D.C. 20037. (Ref. NSF Memo 8/29/75)

(190-2) The National Endowment for the Arts has announced a Nov. 21, 1975, application deadline for its **Spring, 1976, Work Experience-Internship Program,** scheduled from Feb. 9 through May 7. Details are available. (Ref. C&U Regis. 9/8/75)

(198-3) Young persons interested in research in the humanities are eligible for the NEH program **Younger Scholars in the Humanities.** To be considered, the proposed project must: (1) relate to the humanities; (2) have a scholarly purpose; and (3) be limited to individuals"; and (3) be limited, developed and executed by young people. Individual youth grants are normally under $2,000 and may be used for travel, basic services and materials, travel, etc. Publishing costs and advanced degree work are not covered. The next deadline is Dec. 1. Program contact is Younger Humanities, NEH, Washington, D.C. 20506 (202-382-5501). (Ref. OPP Repts.)

(198-4) The Office of Education has announced a Nov. 7, 1975, application closing date for its **Low Fulbright-Hays Training Grants** programs: (1) Doctoral Dissertation Research Abroad (in the fields of foreign language and area studies); (2) Faculty Research Abroad; (3) Group Projects Abroad (including consortiums); and (4) Foreign Curriculum Consultants (including consortiums). (Ref. 40FR42368-69, 9/12/75)

(198-5) The National Science Foundation has announced deadlines for four fellowship programs. Nov. 10, for **NATO Postdoctoral Fellowships** (contact 202-632-7536 for information); Nov. 15, for **NATO Senior Fellowships** (contact 202-282-7595 for brochure E-76-14); Dec. 1, for **NSF Graduate Fellowships** (contact 202-389-6251 for brochure E-76-12); and Dec. 8, for **NSF Postdoctoral Energy-Related Fellowships,** (contact 202-389-6251 for brochure E-76-37). (Ref. C&U Regis. 9/15,76)

(198-7) The National Science Foundation has distributed "draft guidelines" for its new **Comprehensive Assistance to Undergraduate Science Education** program (CAUSE). This is an expanded COSEP-type program which will be subject to "vigorous" proposal evaluation and will emphasize "scientific management" of projects. Guidelines will be published mid-November in the Federal Register, and June 15, 1976, is the earliest anticipated proposal closing date. Also in the mill is a **Research Initiation and Support** (RIAS) program to be institution-centered and directed at young scientists, graduate students and post doctoral students. RIAS is planned to complement the CAUSE program. (Ref. OPP-LO meeting 9/18/75).

(199-3) The Public Health Service has issued proposed rules for grants to meet costs in planning, establishing and operating multi-disciplinary **Health Services Research Centers.** Staff and administrative costs will be funded for research, evaluations and demonstrations in areas including: accessibility, utilization and financing of health systems; supply, training and cost of health manpower, and design and utilization of facilities and equipment. (Ref. 40FR42898-90, 9/17/75).

(199-4) The Office of Education has announced an Oct. 17 closing date for its **Supplemental Educational Opportunity Grants, College Work Study** program and **National Direct Student Loan** program. This information has been distributed. (Ref. 40FR32854-64, 8/19/75).

(199-5) The National Science Foundation will consider proposals in earth sciences, paleology, oceanography, materials science, atmospheric physics, biology and medicine for **Research in Antarctica** during the 1976-77 austral summer and the 1977 austral summer at the George Lione at NSF for further information (202-632-5162) (Ref. NSF Bull., NSF 73-12, Almanac).

(199-6) Applications for **Biomedical Research** Grants-in-Aid and Fellowships are being accepted by the American Heart Association for **research in the cardiovascular field** and in **cerebrovascular field.** Grants-in-aid are made to the institution to direct support of the investigator. Application deadline is Dec. 1 for 1977 support. Contact the American Heart Association, Pennsylvania Affiliate, P.O Box 2435 (2743 North Front St., Harrisburg 17105).

(199-7) The National Institutes of Health (NIH) have announced that the General Research Support Grant (GRSG) program and the Biomedical Sciences Support Grant (BSSG) program will be merged into a **Biomedical Research Support Grant (BRSG) Program.** These grants will be awarded to both health professional schools and to other academic units. The new program will begin in November with the release of a grant application and information statement. Information contact is Louis B. Wagner, Grants Management Office (301-496-5743). (Ref. PHS Memorandum)

New faculty added at University

New appointments to the faculty include:

Dr. Gerald J. August as assistant professor of psychology at Shenango Valley Campus. B.S., Central Connecticut State College; M.A., educational psychology, Southern Connecticut State College; Ph.D., developmental psychology, Purdue University.

Gregory D. Barnes as assistant professor of accounting at Capitol Campus. B.A. and M.A., University of Maryland. Formerly with the Fidelity Mutual Life Insurance Co., and the Peat, Marwick, Mitchell CPA firm. He is a CPA.

Eric R. Birdsall as assistant professor of English at Shenango Valley Campus. B.A., California State College, Los Angeles; M.A., The Johns Hopkins University; currently a candidate for the Ph.D. Formerly an instructor at Salem Community College, Penns Grove, N.J.

Dr. Joyce J. Conlrucci as assistant professor of psychology at McKeesport Campus. B.A., psychology, Nazareth College of the Sacred Heart; M.S. and Ph.D., animal behavior, Ohio State University. Formerly an instructor at Ohio Dominican College, Columbus, O.

Dr. Thomas H. Cook as assistant professor of engineering at New Kensington Campus. A.S., mech. tech., SUNY at Farmingdale; B.S., engineering, M.S. and Ph.D., mechanical engineering, Stevens Institute of Technology.

Robert T. Craig as assistant professor of speech communication. B.A., University of Wisconsn; M.A., Michigan State University; Ph.D. candidate at Michigan State. He was a Woodrow Wilson Fellow in 1970 and a visiting assistant professor at the American University of Beirut in 1973.

Dr. John W. Dawson as assistant professor of mathematics at York Campus. B.S., Massachusetts Institute of Technology. Ph.D., University of Michigan. Recipient of a National Merit Scholarship and formerly an instructor of mathematics at University Park.

Marion Angus Dougan as assistant professor of nursing. B.S., Carnegie-Mellon University; M.S., University of Pittsburgh. Formerly director of the School of Nursing, Columbia Health Center, Pittsburgh. At Penn State, she will serve as professor-in-charge of continuing education for the Department of Nursing.

Richard L. Henry as assistant professor of health, physical education and recreation at McKeesport Campus. B.S., business administration, Duquesne University; Ed. Cert. and M.Ed., health and physical education, University of Pittsburgh. Formerly high school teacher and for the last six years department head, Serra Catholic High School, McKeesport.

Dr. Richard H. McDonnell as assistant professor of history at Mont Alto Campus. B.S., chemistry, St. Lawrence University; M.S., chemistry, West Virginia University; Ph.D., history, Penn State. Formerly assistant professor of history at Livingstone College, Salisbury, N.C.

Staff vacancies

This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (Network Line 475-1387). Applications for the staff vacancies will be accepted until 5:00 p.m. Thursday, Oct 9. **Do not contact the area that has the vacancy.**

RESEARCH DATA WRITER — Hershey

Responsible to the chairman of the Department of Psychiatry and to the Chief of Research for the preparation and writing of various reports related to the departmental research program. Bachelor of science degree in composition or journalism, plus six months of experience in the writing and preparation of reports.

Applications for staff vacancies are considered without regard to race, color, creed, sex, or national origin.

Pass-Fail change to come before Senate; new offices opening

Faculty invited to visit Birch Cottage facilities now housing all records

The University Faculty Senate Office has moved to new quarters in — appropriately enough — the last faculty residence on campus.

An open house of the new facilities in Birch Cottage will be held Monday, Oct. 13, from 9 a.m. to 5 p.m. and 7 to 9 p.m.

According to Dr. Oscar C. Barkman, executive secretary of the Senate, office personnel and Senate officers will be on hand to show people through the new quarters and explain the day-to-day operations of the Senate Office.

"We hope," Dr. Barkman says, "that not only faculty senators but also faculty and staff members, many of whom we know only by telephone, will avail themselves of the opportunity to visit the new offices."

When the University Faculty Senate was first reorganized in 1966, its office was located in Willard Bldg., where it utilized two rooms on the second floor. At the time of the 1971 reorganization, it expanded to four rooms but soon outgrew that space.

"The Senate records," Dr. Barkman points out, "were kept in closets in seven different classrooms on two floors of Willard. If someone wanted some information from 1966, for example, we'd have to tell them to wait until classes were over before we could duck in and get the material.

"Now we can maintain all our records, including a central file for all courses and programs dating back to the establishment of the Senate in 1921, in an easily accessible area."

In addition to records space and offices for Senate personnel, the new facility in Birch Cottage also contains a conference room for use by Senate committees, which previously met in a seminar room used by classes.

Birch Cottage, which was constructed in 1889, was last occupied as a faculty residence by the late Dr. Herbert R. Glenn, who served as director of Ritenour Health Center. It was then utilized by the College of Agriculture for studies on small animals and later housed the Department of University Safety until that unit moved to Grange Bldg.

In addition to the Faculty Senate, the Senate Office currently serves these other types of populations — College and Campus academic units, by providing a central coordinating file for all courses and programs; faculty and students, as an informational source on University policies, procedures and academic rules; and the academic administration, as a research source for all previous policies enacted by the Senate.

Blue B parking changed

As of Monday, Oct. 13, faculty-staff parking areas Blue A at Curtin and Bigler Roads will be changed to a student parking area, but the roughly 250 persons affected by the change will be able to park in any of the open faculty-staff parking areas. These include Blue A at Mitchell Bldg. and Animal Industries Bldg., Blue D and E at the Auditorium and Computation Center, Orange B at East Halls and Orange L across University Drive from Shields Bldg. No new parking decals or part-time windshield permits will be necessary.

Text of recommendations submitted on Academic Redemption Option

The University Faculty Senate, at the Oct. 14 meeting, will consider recommendations of its Ad Hoc Committee on Pass-Fail. The entire committee report will be discussed at the meeting, with action scheduled for Nov. 11. Among its recommendations, the committee proposes elimination of rules regarding Pass-Fail and proposes substitution of an Academic Redemption Option. Following is that portion of the committee report which deals with the Academic Redemption Option:

1. The Ad Hoc Committee on Pass-Fail proposes elimination of rules regarding Pass-Fail, rule M-3b, and changes in the rules regarding late course drops.
2. The Committee proposes to substitute an Academic Redemption Option to accomplish the following:
   (a) All courses will be taken for a grade.
   (b) All grades, as submitted by faculty instructors, will be recorded on students' transcripts.
   (c) A student's grade-point-average will be computed on the basis of all grades received. However, a student may petition to eliminate from his/her GPA grades received in courses totaling not more than 18 credits for baccalaureate and not more than 9 credits for associate degree students.
   (d) This option is available to **every** currently enrolled student and may be exercised at any time in the student's career. In addition, a student dropped for academic deficiency may file for redemption before his/her next registration in order to affect a rescinding of the drop action. The grade of any course the student has taken may be eliminated from the grade-point-average. Such courses do not count toward graduation.
   (e) Once filed, Academic Redemption Options are final and irrevocable.
   (f) Nothing in this proposal modifies specific program or degree requirements.

Rationale and Explanation

The Academic Redemption Option will eliminate the Pass-Fail Option, with all the academic, personal, and administrative difficulties this option has permitted. It will eliminate rule M-3b, which has proved difficult to administer, difficult for students to understand, and above all, discriminatory in that it favors the poorer student at the expense of the good student. Finally, the post-21-day drop period for courses, which has had a major effect of making liars out of students and arbitrary judges out of administrators will be changed to permit a longer drop period with appropriate indication of the student's standing at the time when drop action is taken.

The new Option will have the effect of tightening up academic standards by permitting all students enrolled in a specific class to work and be graded on the same basis. Because it would be a choice made by the student at any time in his career, except for certain obvious limitations on last minute changes before graduation, there will no longer be need for deadlines of the kind that have made M-3b and Pass-Fail so difficult to administer. The program will offer greater flexibility than the combined present programs because it offers an opportunity to enlarge number of students. Any student in the University may take advantage of the Academic Redemption Option regardless of the grade he may have received in the course. There is, in fact, a greater choice for the students because all choices are made, ex post facto, after the grade has been received. At the present time, the only occasion on which such a choice can be made is when a student fails a course and chooses to exercise M-3b. His only other choices are to drop a course in which he may be doing badly or to take a course Pass-Fail in the first place and then lose what could have been a high grade as a result. The Academic Redemption Option would permit students to take courses on an experimental basis and decide afterwards whether or not to retain the grades in calculating cumulative averages. It also permits a student who is doing badly in a course in which he is currently enrolled to continue to the end of the course, and then make the decision about dropping it from his cumulative average. Further, it will permit immediate rescinding of drop action, with consequent reduction of pressure to change grades after drop action, as well as reduction in

(Continued on page 4)

Cooks' tour is delicious, nutritious– and educational for all concerned

The University's most delicious course, FSHA 410, got off to a exotic start in September presenting a sample of Greek and Moroccan cuisine to Maple Room diners in the Human Development Building.

The 32 students enrolled in the course this term not only study the cuisines of various cultures around the world but also attempt to reproduce them at dinners which they prepare and serve twice weekly.

Highlight of last month's meals was the appearance of a belly-dancer to add atmosphere to the Moroccan dinner. She was Ann-Lise Deering, wife of Dr. Reginald A. Deering, professor of biophysics.

While enjoying the entertainment, faculty members, students and staff toasted on "couscous," a lamb stew, and chicken "tajine m'hammer."

The previous night the Maple Room was converted into a Greek Tavern as "armi souvlakia," lamb on skewers, and "pastitso," a ground beef and pasta dish, were served in a relaxed atmosphere with massed shrubbery strategically placed to give the impression of eating outdoors.

According to Leo M. Renaghan, instructor in service administration, the purpose of the course is to give students an understanding of how cuisines develop. By featuring a different culture's cooking at each meal, the students get a grand tour of the world's cuisines.

"The actual preparation of the meals is

Grading system for M.D., redefining of electorate also on Oct. 14 agenda

In addition to discussing a report of the Pass-Fail Committee at its Oct. 14 meeting, the University Faculty Senate will:

—Receive two reports from the Senate Committee on Undergraduate Instruction concerning the grading system for the M.D. degree and the policy on corrected grades.

—Consider a recommendation from the Subcommittee on Senate Membership that the Senate redefine its criteria for determination of its electorate and membership so as to include all individuals whose duties as faculty entitle them to participation in University-wide governance. The subcommittee recommends including in the Senate electorate faculty members who hold research ranks. It also recommends that the director of the Division of Undergraduate Studies be an ex-officio member of the Senate.

—Receive a report from the Committee on Committees and Rules concerning changes in the Senate constitution, bylaws and standing rules.

In addition to a number of editorial changes, one proposed change in the standing rules which may be acted on at the Oct. 14 meeting would require votes in an election to be counted by five rather than three tellers.

A proposed change in the bylaws regarding delegation of responsibility cannot be acted upon until the regular Senate meeting in November. It proposes that "the Senate Council will provide for liaison with the Graduate Council."

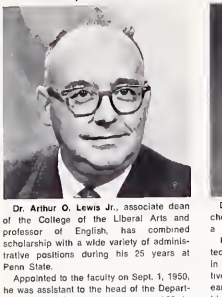
Mitchell Building has open house

The Division of Instructional Services, Audio-Visual Services and Listening-Learning Services will conduct an Open House in Mitchell Bldg. beginning Tuesday, Oct. 14, from 1 to 5 p.m.

On Wednesday, Oct. 15, visitors may tour the facilities from 9 a.m. to 9 p.m., and on Thursday, Oct. 16, from 9 a.m. to 5 p.m.

Featured will be presentations by faculty members who participated in recent course improvement projects. These projects were funded by the Office of the Vice President for Resident Instruction in a program to improve large enrollment, basic courses.

Visitors to the Open House will also be able to see demonstrations of a new examination processing facility at 10:30 a.m. and 2:30 p.m. daily and to view recent film acquisitions and equipment belonging to Audio-Visual Services. Listening-Learning Services will display independent learning laboratory and dial access carrels.



Instructional Development Seminars include:

- Oct. 14 — 1:30 p.m., Anthropology 1, Dr. Warren T. Morrill, Michael Staffy. 3 p.m., Business Logistics 102, Dr. John J. Coyle Jr.
- Oct. 15 — 9:30 a.m., History 20 and 21, Dr. Phillip E. Stebbins. 11 a.m., Individual and Family Studies 129, Dr. Stella R. Goldberg, Dr. Francine Deutsch. 1:30 p.m., English 119.

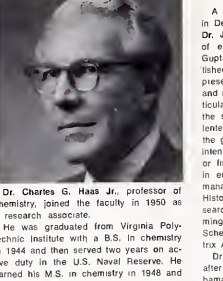
PENN STATE COLLECTION

Lewis, Haas mark 25 years

Dr. Arthur O. Lewis Jr., associate dean of the College of the Liberal Arts and professor of English, has combined scholarship with a wide variety of administrative positions during his 25 years at Penn State.

Appointed to the faculty on Sept. 1, 1950, he was assistant to the head of the Department of English Literature from 1953 to 1957 and then served a year as assistant to the head of the reorganized Department of English. From 1958 to 1960, he was chairman of English graduate studies and from 1960 to 1965 was associate head of English.



He was named associate dean for resident instruction in his College in 1965, a title he held until becoming associate dean in 1973. During 1968-69, he was acting dean of the College and last year was acting head of the Department of English.

A native of Wellsville, Pa., Dr. Lewis earned his A.B. cum laude and his A.M., both in English, from Harvard University. He rose from private to first lieutenant in the U.S. Army Signal Corps, and then taught as an instructor in English at The Rice Institute. Penn State granted him his doctorate, and his dissertation subject was "Emblem Books and English Drama, 1581-1600."

He is the author of "Of Men and Machines" and "American Utopias: Selected Short Fiction." He has also co-authored several books, including "The Case for Poetry: A Critical Anthology," "Anglo-German and American-German Crosscurrents, Volumes One, Two and Three," "Visions and Revisions In Modern American Literary Criticism" and "The World of Japanese Fiction." He served as advisory editor to a 41-volume "Utopian Literature" collection, published by Arno Press, and provided introductions for several of the books in the series.

Dr. Lewis has been active in the Science Fiction Research Association, serving as co-chairman of its 1973 annual conference and as chairman of its constitutional committee. From 1956 to 1958, he was president of the Pennsylvania Federation of Teachers, and during this period was a member of the Governor's Commission on Higher Education and the Governor's Commission on Teacher Training. He also was a delegate to the U.S. Committee on UNESCO in 1959.

He is a longtime member of the University Faculty Senate, and served as chairman of that body during 1968 and 1969.

Dr. Charles G. Haas Jr., professor of chemistry, joined the faculty in 1950 as a research associate.

He was graduated from Virginia Polytechnic Institute with a B.S. in chemistry in 1944 and then served two years on active duty in the U.S. Naval Reserve. He earned his M.S. in chemistry in 1948 and his Ph.D. in this field in 1957, both at the University of Chicago.

As an inorganic chemist, his research interests have centered around the stability of coordination compounds, and he has done work on the chemistry of molybdenum and on dipole moment determinations of geneous compounds and of coordination compounds.

His teaching responsibilities include general chemistry courses for freshmen and various courses in inorganic chemistry at the upper undergraduate and graduate levels. He was one of three chemistry instructors who took part in the initial Penn State experimental project for instructional television in 1955.

Since 1965, Dr. Haas has served as departmental coordinator for chemistry at the Commonwealth Campuses, participating in recruitment of faculty and planning and equipping of laboratory facilities, in addition to serving as liaison for instruction. He also was director of the general chemistry program from 1957 to 1959.

He is a member of Phi Lambda Upsilon, chemical honorary society, and served as adviser of its Penn State Chapter and in national offices as Historian and Vice President. He has been president of the local chapters of both Phi Kappa Phi and Sigma Xi.

In addition to having been a member of the University Faculty Senate, he has served on various Graduate School faculty committees and all-University committees.

Appointments

Dr. Gary L. Mullen as assistant professor of mathematics at Shenango Valley Campus. B.A., Allegheny College; M.A. and Ph.D., Penn State. While working on his Ph.D., he served as temporary instructor.

Dr. Robert Posatko as assistant professor of economics at Capitol Campus. Graduate of King's College; M.A. and Ph.D., Penn State. Formerly at Slippery Rock College.

Dr. Randall Schuler as visiting assistant professor of organizational behavior. He is a graduate of the management department at Michigan State University and serves on the faculty of Cleveland State University.

Dr. Timothy G. Vesonder as assistant professor of English at Shenango Valley Campus. B.A., maxima cum laude, St. Meinrad College; M.A., Carnegie-Mellon University; Ph.D., Penn State. Formerly instructor at Youngstown State University and Quigley High School.

Faculty notes

A new textbook, "Operations Research in Decision Making," has been written by **Dr. James P. Ignizio**, associate professor of engineering, and Dr. Jallinder N. D. Gupta of the U.S. Postal Service. Published by Crane, Russak and Co., the book presents an introduction to the principles and methods of Operations Research, particularly the use of Operations Research in the solution of the complex, systems oriented problems encountered in industry, the government and society. The book is intended for a one-semester, senior level or first-year graduate course for students in engineering, business, economics and management. It includes chapters on The History and Approach of Operations Research, Decision Theory, Linear Programming, Network Problems, Sequencing and Scheduling Problems and a review of Matrix Algebra.

Dr. Ignizio joined the faculty last year after seven years at the University of Alabama. The author of numerous papers and articles, he received his baccalaureate degree at the University of Akron, his M.S. from Alabama and his Ph.D. from Virginia Polytechnic and State University.

Dr. Dennis M. Roberts, associate professor of educational psychology, is the author of a new text titled, "Descriptive and Inferential Statistical Topics." The book, which was published by Kendall/Hunt, was written for use in beginning statistics courses — especially those with emphasis on social science applications. It is built around a set of approximately 85 instructional objectives ranging from simple graphing to one-way analysis of variance. Each objective has a short instructional unit followed by a post-test. The emphasis in the book is on simple computational problems, and the material is suited for use in courses where an individualized teaching approach is desired.

Dr. Roberts received his Ed.D. in 1967 from the Educational Research and Testing Department at Florida State University. He was an assistant professor in the Measurement and Evaluation Department at The Ontario Institute for Studies in Education in Toronto, Canada, and the Psychology Department at East Carolina University before moving to Penn State in 1973. His major academic interests are statistics, research design and theoretical and applied aspects of measurement. He has written numerous journal articles.

Dr. Luis F. Gonzalez-Cruz, associate professor of Spanish at New Kensington Campus, delivered a paper entitled "Pablo Neruda en la encrucijada de 'Tentativa del hombre infinito'" at the 17th Convention of the International Institute of Ibero American Literature at the University of Pennsylvania. He is the author of two books of literary criticism concerning the late poet, "Pablo Neruda y el 'Memorial de Isla Negra'" and "Pablo Neruda, Cesar Vallejo y Federico Garcia Lorca. Microcosmos poeticos."

Dr. Frederick R. Eisele, assistant professor of social policy, has presented a series of lectures in France on public policy toward aging and on his research on longevity among political elites. At the invitation of the University of Grenoble, Dr. Eisele participated in a conference sponsored by the Gerontology Center of the University's Institute of Political Studies. The conference was funded in part by the French Ministries of Foreign Affairs and Education. France, with a higher percentage of older persons in its population than the United States, is increasingly interested in research and social programs in gerontology in other countries. Dr. Eisele is associate chairman of the Gerontology Center of the Institute for the Study of Human Development at Penn State and was editor of a special issue of the Annals of the American Academy of Political and Social Science, "Political Consequences of Aging."

Dr. Robert A. Lewis, associate professor of human development, has been appointed associate editor of the "Journal of Marriage and the Family," a scholarly publication devoted to the presentation of original theory, research interpretation and critical discussion of materials related to marriage and family life. Dr. Lewis recently presented a paper on "The Marital Disenchantment-Disengagement Thesis Reconsidered" at the 10th International Congress of Gerontology in Jeruselem, Israel.

Dr. Charles W. Ruischky, professor of entomology, took part in The First Entomology Workshop on Education held recently at the University of Massachusetts, Amherst. Dr. Rutschky was group leader for an evening program dealing with teaching general entomology. He is a past president of the Pennsylvania Entomological Society and is also a member of the Sweadner Entomological Society of Pittsburgh. The author of numerous technical articles in the field of entomology, he is currently president of the Pennsylvania Academy of Science, made up of 600 scientists representing the fields of biology, geology, physics, mathematics and chemistry.

Dr. James E. Harf, associate professor of political science at The Ohio State University, is serving during the current academic year as an academic administration fellow within the Office of the Provost.

The internship program was established by the American Council on Education in 1964 to help to strengthen leadership in American higher education. Forty candidates are chosen annually from nominations made by executives at institutions of higher learning.

A native of Altoona, Dr. Harf is a graduate of Mildred-Penn State College with a B.S. in secondary education. He received his M.A. in political science from the University of Delaware and his Ph.D., also in political science, from Indiana University.

Dr. Harf has been at Ohio State since 1969. From 1961 to 1965, he taught mathematics and government and was head football and basketball coach at Bridgeville, Del., High School.

Funding opportunities

(200-2) The National Endowment for the Arts has announced deadline dates for several programs. "Visual Arts Program": 10/15/75 for **crafts exhibition aid**; 1/1/76 for two categories of **works of art in public places**; 1/15/76 for **photography exhibition aid**. "Museum Program": 7/2/76 for conservation funding, assistance for **conservation work**, and museum training. "Architecture + Environmental Arts Program": 1/2/76 and 6/2/76 for **academic and professional events** and 7/2/76 for **public awareness and education**. "Public Media Program": 5/15/76 for **media studies**.

(200-3) The National Endowment for the Arts announces its eighth **Work Experience Internship Program** scheduled next Feb. 1 through May 7. Applicants must be sponsored by the University. Non-matching grants include a stipend of $1,960, plus travel. Application deadline is Nov. 21, 1975. Write the Intern Program Officer, NEA, Washington, D.C. 20506

(200-4) NSF announces a Dec. 15 closing date for its **Energy Related Graduate Traineeship Program for 1976-1977**. Proposals must be confined to coal or non-renewable resources, recovery and/or substitution. Separate proposals in each area may be submitted by an institution. (Ref. NSF E76-20).

(200-5) Matching funds for equipment needed to improve undergraduate scientific instruction is available through the **NSF Instructional Scientific Equipment Program**. Application deadline is Jan. 19, 1976, with awards scheduled for May. (Ref. NSF E-76-15).

Forestry program renamed

A new name has been given to a School of Forest Resources program; the Master of Forestry degree will henceforth be known as the Master of Forest Resources. The change is intended to reflect the broadened range of interests possible to pursue in the field, including various types and uses of natural resources that exist on forest lands or are derived from them.

Staff vacancies

INTERCOM staff vacancy listings usually require a baccalaureate degree or its equivalent as a minimum educational qualification. Listings which do not require a baccalaureate degree will be announced in the Penn State REPORTER, which also includes INTERCOM listings.

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling.

This announcement is made so that all University employees who wish to be considered for promotion may apply by calling the Employment Division, 865-1367 (Network Line 475-1367). Applications for these staff vacancies will be accepted until 5:00 p.m. Thursday, Oct. 16.

The University is an equal opportunity employer

ASSISTANT DIRECTOR FOR ADMINISTRATIVE SERVICES — Allentown Campus

Responsible to the Campus Director for University administrative service matters at the Allentown Campus, including the maintenance and operation of buildings and grounds, coordination with the Office of Personnel Administration, Office of Physical Plant, Department of Purchases, Budget Operations, etc., coordination of Physical Plant activities, operation of auxiliary enterprises, parking program, security, campus postal service, etc.; also for various other academic, administrative support services. Bachelor's degree in area such as business administration or equivalent organized outside study or training, and two-four years' related up to and including seven years of total experience in personnel, budgetary operations, maintenance, etc., with interpersonal skills and supervisory background.

SYSTEMS ANALYST, MANAGEMENT SERVICES — University Park

Individual will report to the Manager of Process Control and will be responsible for the development and implementation of standards and procedures within Management Services. Specific functions include — data gathering and analysis, task planning, cost benefit and feasibility studies, systems documentation, information flow and utilization analyses, plus some programming. Bachelor's degree or equivalent, with training in IBM basic computer systems and system planning, plus 2-4 years of directly related experience in data processing.

INSTRUCTIONAL SERVICES SPECIALIST — Hershey

Responsible to the Department Chairman in the Department of Psychiatry for the preparation and arrangement of instructional materials, plus the use and maintenance of various broadcast equipment. Bachelor's degree in program directing or equivalent training in commercial programming and broadcasting, plus one to two years of directly related experience in programming and coordinating instructional materials.

EDITORIAL ASSISTANT — Hershey

Responsible to the Chairman of Microbiology to assist with the preparation and editing of manuscripts for journals, brochures, catalogs, special articles, special reports, research studies and other printed materials. Bachelor's degree or equivalent in English, journalism, science or other appropriate field. One to two years' experience writing for journals and magazines, or equivalent.

University Park Calendar

October 9-19

Items to be included in this calendar should be sent to the editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, Oct. 9
Commons Videotape, 12 noon, Kern lobby.
FSHA 410 dinner, on English Harvest Feast, 5 p.m., Maple Room, Human Development. Reservations required, 865-7441.
University Theatre, "Summer and Smoke," 8 p.m., Pavilion Theatre.

Friday, Oct. 10
University Readers, 7 p.m., Room 112 Kern.
GSA's Commonspace Coffeehouse, 8 p.m., Room 102 Kern.
University Theatre, "Summer and Smoke," 8 p.m., Pavilion Theatre

Saturday, Oct. 11
Sports: Football, vs. West Virginia, 1:30 p.m., Beaver Field. Men's Cross Country, vs. Kent State.
University Theatre, "Summer and Smoke," 8 p.m., Pavilion Theatre.
Artists Series, Monteverdi Choir and Orchestra, Monteverdi "Vespers," 8:30 p.m., University Auditorium.

Sunday, Oct. 12
PSOC Hiking Club, Flaming Fall Foliage Hike, 9 a.m.
Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Julien Casserly, Seabury-Western Theological Seminary, Evanston, Ill.
Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Rev. Charles L. Coleman, Religious Affairs.
Gloria C. Spencer Gray, 615 lb. gospel singer, 7 p.m., Schwab.

Tuesday, Oct 14
Division of Instructional Services, Audio-Visual Services, and Listening and Learning Services Open House, 1-5 p.m., Mitchell Bldg.
Seminar on the use of psychology reference materials, 7 p.m., Room W110 Pattee.
University Theatre, "Summer and Smoke," 8 p.m., Pavilion Theatre.

Wednesday, Oct. 15
Division of Instructional Services, Audio-Visual Services, and Listening and Learning Services Open House, 9 a.m.-9 p.m., Mitchell Bldg.
Noontime Concert, 12:15 p.m., Kern lobby.
University Theatre, "Summer and Smoke," 8 p.m., Pavilion Theatre.
Artists Series, Chinese Acrobats of Taiwan, 8:30 p.m., Rec Hall.
"An Evening of Opera," with Karen Scott and Robert Trehy, 8:30 p.m., Music Bldg. recital hall.
FSHA 410 dinner, China, 5:30 p.m., Maple Room, Human Development. Reservations required, 865-7441.

Thursday, Oct. 16.
Division of Instructional Services, Audio-Visual Services, and Listening and Learning Services Open House, 9 a.m.-5 p.m., Mitchell Bldg.
Commons Videotape showing, 12 noon, Kern lobby.
University Theatre, "Summer and Smoke," 8 p.m., Pavilion Theatre.
FSHA 410 dinner, Central America, 5:30 p.m., Maple Room, Human Development. Reservations required, 865-7441.

Friday, Oct. 17
GSA's Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Sports: Soccer, vs. Maryland, 7 p.m., Jeffrey Field.
University Theatre, "Summer and Smoke," 8 p.m., Pavilion Theatre.
"Bread and Roses: A Musical Documentary of Women's History," 8 p.m., Schwab. Sponsored by AWS.

Saturday, Oct. 18
Sports: Men's Cross Country, vs. Indiana.
University Theatre, "Summer and Smoke," 8 p.m., Pavilion Theatre.
PSU Symphony Orchestra, 8:30 p.m., University Auditorium.

Sunday, Oct. 19
Chapel Service, 11 a.m., Eisenhower Chapel. Chaplain Warren Solberg, pastor, David's Church, Millersburg, Pa.
Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Elder Gerald G. Loyd, pastor, Black Christian Fellowship.
Artists Series, Music from Marlboro, 8:30 p.m., Schwab.

Seminars

Thursday, Oct. 9
Microbiology, 3:55 p.m., Room S2 Frear. Dr. Roland Nardone, Catholic University of America, on "The Use of 'In Vitro' Systems for Toxicity Testing."
Anthropology, 3:30 p.m., Room 107 Social Science. Dr. Joseph W. Michels on "An Archaeological Survey of the Axum Mile Kingdom, Ethiopia."
Physics, 3:50 p.m., Room 117 Osmond. John Tripp, University of Connecticut, on "de Haas-van Alphen Effect in Beryllium and Its Alloys."
Agronomy, 8:15 a.m., Room 301 Ag. Admin. Dr. Roy Simonson, Soil Conservation Service, Washington, D.C., on "Soil Resources and World Food Production."
Chemistry, 12:45 p.m., Room 333 Whitmore. Richard D. Kuret, Arizona State University, on "New Concepts in Liquid Chromatography Detectors."
Meteorology, 4 p.m., Room 26 Mineral Sciences. Jerry Mahlman, Princeton University, on "Dynamics of the Stratosphere and Its Implications for Dispersion of Trace Constituents."
Organic Chemistry, 4 p.m., Room 333 Whitmore. Dr. R. Schowen, University of Kansas, on "Transition State Structure and Enzyme Catalysis."

Monday, Oct. 13
Computation Center, 7:30 p.m., Room 105 Osmond. "Introduction to the Computation Center (1)."
Genetics, 3:55 p.m., Room 111 Tyson. Dr. Reginald Geering, biochemistry and biophysics, on "Parasexual Genetics in Cellular Slime Molds."
Biochemistry, 11:10 a.m., Room 101 Althouse. Dr. Robert Bernlohr, biochemistry and biophysics, on "Regulation of Bacterial Sporulation."
Entomology, 4 p.m., Room 204 Patterson. C. W. Rutschky III on "Impressions of the First Entomological Workshop on Teaching."

Tuesday, Oct. 14
Comp Lit Luncheon, 12:15 p.m., Hotel State College. Harold Shapiro, art historian and literary critic, on "Ruskin in Italy."
Biochemistry, 11:10 a.m., Room 101 Althouse. Dr. Robert Bernlohr, biochemistry and biophysics, on "Roles of Metabolite Pools in Regulation."
English, 8 p.m., Room 101 Kern. Harold Shapiro, literary critic and art historian, on "The Two 'Voyages Out' of Virginia Woolf."
Air Pollution Control, 2:00 p.m., Room 140 Fenske. Wayne J. Brlko, grad. asst. in chem. eng. and air pollution control, on "A Method of Calculating Atmospheric Pollutants Removal of Water Bodies."
Plant Pathology, 9:45 a.m., Room 213 Buckhout. Rodney Vargo on "The Incidence of Clubroot of Crucifers in Relation to the Soil Environment."
Solid State Physics, 1 p.m., Room 339 Davey. Dr. Daniel Pierce, National Bureau of Standards, Washington, O.C., on "Spin Polarized Photo Emission from GaAs: A New Era in ESP Measurement."
Engineering Science and Mechanics and Engineering Acoustics, 4 p.m., Room 215 Hammond. Dr. A. V. Srinivasan, Pratt-Whitney Aircraft, East Hartford, on "Vibration Problems in Jet Engine Structures."
Analytical Chemistry, 12:45 p.m., Room 333 Whitmore. W. E. Brugger on "Human Olfaction from a Molecular Viewpoint."
Ceramic Science, 9:35 a.m., Room M.I. Dr. Douglas E. MacDonald, engineering science and mechanics, on "Theoretical Strength of Solids."

Wednesday, Oct. 15
Energy-Bioenergetic, 3:55 p.m., Room 111 Life Sciences I. Dr. H. J. Palmer, chairman, fuel science, on "Solar Energy: The Process, Equipment, Efficiency and Problems."

Thursday, Oct. 16
Agronomy, 8:15 a.m., Room 301B Ag. Adm. Dr. John Norman, Meteorology, on "Development and Application of Crop Growth Simulation Models."
Microbiology and Cell Biology, 3:55 p.m., Room S2 Frear. Dr. Joseph S. Gots, University of Pennsylvania Medical School, on "Regulation of Purine Nucleotide Metabolism in Bacteria."
Physics, 3:50 p.m., Room 117 Osmond. G. Rawitscher, University of Connecticut, on "Electron Scattering from Nuclei."
Meteorology, 4 p.m., Room 26 Mineral Sciences. Dr. Alistair B. Fraser on "The Mirage, the Green Flash, and Theological Optics."
Chemistry, 12:45 p.m., Room 333 Whitmore. Albert L. Allred, Northwestern University, on "Pnyslalanes."
Computer Science, 4 p.m., Room 325 Whitmore. Ravi Sethi, computer science, on "Correct Computation Rules for Recursive Languages."

Meetings

Sunday, Oct. 12
Interlandia Folk Dance, 7:30 p.m., south gym, White.

Monday, Oct. 13
Rehabilitation Education Organization, 7:30 p.m., Room 301 Social Science. Topic, "Job Opportunities."
Education Student Council, 7 p.m., Room 109 Chambers.
Pennhellenic Council, 6.30 p.m., Helster Hall.

Tuesday, Oct. 14
Faculty Senate, 2:10 p.m., Room 112 Kern.
College of Arts and Architecture faculty, 4 p.m., Room 112 Music Bldg.
ARHS, 7 p.m., Room 207 Business Administration.

Wednesday, Oct. 15
Graduate Council, 2:30 p.m., Room 101 Kern.
Penn State Mining Engineering Society, 7:30 p.m., Room 26 Mineral Sciences. Joseph P. Brennan, president, Bituminous Coal Operators Association, on "Organization of the Bituminous Coal Operators Association."

Thursday, Oct. 16
College of Business Administration faculty, 10 a.m., Room 201 Business Administration.

Saturday, Oct. 18
American Association of University Professors, Pennsylvania Division Annual Meeting. Jeanette Reibman, chairperson Senate Education Committee, on problems of higher education, 9 a.m., Room 101 Kern. Or. Joseph Dutley, AAUP general secretary, on "The AAUP Approach to Collective Bargaining," 11:15 a.m., Room 101 Kern. Open to public.

Films

Monday, Oct. 13
France Cinema, "Breathless," 7 and 9 p.m., Room 112 Kern.

Wednesday, Oct. 15
GSA's Commonsplace Cinema, "Diary of a Mad Housewife," 7:20 and 9:30 p.m., 112 Kern.

Thursday, Oct. 16
Comparative Literature 100, "Don Quixote" (1957 Russian version), 7:30 p.m., Room S209 Human Development. Open to the public.

Exhibits

Museum of Art: Panel Paintings from the Samuel H. Kress Collection of the Allentown Art Museum. Drawings from the Permanent Collection.

HUB Gallery: Homecoming Exhibit (old photographs from Pattee, Rec Hall, and La Vie).

Kern Gallery: Jackie Battenfield, weavings.

Cultural Center, Walnut Bldg.: An exhibit of mixed media, the work of the New York Chapter of the National Conference of Artists.

Pattee Library: Copper Sculpture by Curtis Clawson, Main Lobby. Prints by Mary Hamilton, Circulation Lobby. Birds-Eye Views: 19th Century Etchings of Pennsylvania Towns, East Corridor, through Oct. 13.

Chambers Gallery: Shirley Bernreuter, paintings and drawings. Becky Kosmel, weavings, through Oct. 16. Art Department Student Group, paintings and drawings, opening Oct. 17.

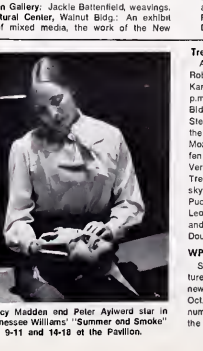
Zoller Gallery: New Faculty Show, through Oct. 16.

Lecture

Monday, Oct. 13
Robert Siegel, architect, will discuss and show the work of his firm, Gwathmey and Siegel, N.Y., 7:30 p.m., Room 105 Forum. The lecture is sponsored by the Department of Architecture.

Arts roundup

Special ticket sale



There will be a special sale of tickets o the Oct. 15 performance of the Chinese crobats on Monday and Tuesday, Oct. 13 and 14, at the Artists Series HUB booth and University Auditorium. The acrobats will be seen at 8:30 p.m. at Recreation Hall. Tickets to Music from Marlboro and Music Series events will go on sale o patrons only from 11 a.m. to 2 p.m. on Oct. 15. A general sale for these tickets will be held Oct. 16. Tickets for "Be Glad Then America" will not be sold until further notice, since plans for seating and staging for the production are being reviewed by the Artistic Director.

Orchestra plays Oct. 18

The University Symphony Orchestra, conducted by Dr. D. Douglas Miller, assistant professor of music, will present its first concert of the academic year at 8:30 p.m., Saturday, Oct. 18, in the University Auditorium. Works by five American composers spanning the first six decades of the 20th century will be performed by the 90-piece student ensemble. From the 1930s are Copland's "Outdoor Overture" and Howard Hanson's "Romantic Symphony." Written in 1908 was Charles Ives' "The Unanswered Question," which requires two conductors to direct its disparate elements. Charles Griffes' "The White Peacock" and William Schuman's "New England Triptych" will complete the concert, for which tickets are not required.

Photo exhibit

An exhibition of photographs by James M. Baker, instructor of photography at Edinboro State College, is on view through Oct. 16 in 212A Arts Bldg. The 18 black-and-white photographs relate to the writings of Henry Beston, author of "The Outermost House" and depict a stretch of beach on Cape Cod, Mass. Exhibition hours are 1 to 4 p.m. Tuesday and Thursday.

Nancy Madden and Peter Aylward star in Tennessee Williams' "Summer and Smoke" Oct. 9-11 and 14-18 at the Pavilion.

Trehy, Scott perform

An evening of opera will be offered by Robert Trehy, professor of music, and Karen Scott, assistant professor, at 8:30 p.m. Wednesday, Oct. 15, in the Music Bldg recital hall. Accompanied by pianist Steven Smith, assistant professor of music, the program will include selections from Mozart's "Marriage of Figaro" and "Cosi fan Tutte," Donizetti's "Don Pesquale," and Verdi's "Rigoletto." After intermission Trehy will perform an aria from Tchaikovsky's "Pique Dame" and Scott an aria from Puccini's "Manon Lescaut." A duet from Leoncavallo's "Pagliacci" and two arias and a duet from "Ballad of Baby Doe" by Douglas Moore will complete the program.

WPSX highlights

Singer-composer Berry Manilow is featured on the premiere of **Soundstage,** a new contemporary ,music series, Friday, Oct. 10, at 10 p.m. Manilow performs a number of his latest hit singles, along with the commercial jingles he has composed.

(Continued on page 4)

Earth & Mineral Sciences report

Research funds received from outside sources — industries, foundations, state and federal agencies — have just about doubled in the College of Earth and Mineral Sciences during the past year, with more than 60 percent of the monies allotted to projects related in some way to energy.

Contracts in force July 1 totaled $5,162,000 for 1975-76, with $3,205,000 of the amount earmarked for studies aimed directly or indirectly at improving energy supplies, reports Dr. Charles L. Hosler, dean of the College. But, he adds, support for research in other areas in the College — materials, weather, environment, and natural resources — has increased substantially, too.

The total amount of money provided by the grants and the more than 150 research projects it supports attest, Dean Hosler notes, to the expertise developed by the College's faculty.

As one example of this expertise, he points to a project assigned to the Department of Mineral Engineering by the U.S. Bureau of Mines. The Bureau needed to establish regulations for electrical grounding systems in western open pit metal mines. Because Mineral Engineering has been conducting evaluations of underground coal mine electrical systems for the Bureau over the past five years, the Bureau turned to Penn State's researchers.

The largest single research project in the College has been under way since 1966 with support from the Office of Coal Research, now a part of the U.S. Energy Research and Development Administration.

This research is devoted to examining systematically the influence of coal's composition and structure on its behavior when it is burned or converted to a liquid or gas fuel. Conducted by the College's Coal Research Section, the program is believed to be the only one of its type in the nation.

The program has already developed one of the most comprehensive coal data banks in existence on the characteristics of different types of coals from different parts of the U.S.

Under its most recently received grant, the section researchers expect to expand by four times the present bank of some 350 coal samples.

Also the program is now to be expanded to develop benchscale reactors that will be used to investigate gasification reactions and the combustion characteristics of the chars that will be produced in large quantities in many types of conversion processes.

Other energy-related research projects in the College have to do with a variety of areas: treatment of so-called "black" water — the wastewater that results from coal-cleaning processes, monitoring the stability of underground gas storage reservoirs under gas pressure by listening for microlevel "sounds" from the rock structures containing them; a feasibility study on the development of anthracite mining; preparation of computer simulations of various coal mining operations with the goal of making them safer and more efficient; tertiary (third-stage) recovery of Pennsylvania grade crude oil with surfactant solutions; recovery and commercial use of methane gas from coal mines prior to mining; historical trends in coal utilization and supply; and extracting energy from hot rocks deep in the earth by pumping water through them while, at the same time, dissolving and recovering useful minerals.

Option text

(Continued from page 1)

administrative costs of the reinstatement-readmission costs.

The new proposal will eliminate the current problem of the "D" versus "F" in some courses. It has become common occurrence to have a student come to a faculty member and beg for an "F" rather than a "D" because our recent changes in M-3b now make it possible to repeat only an "F" grade. It does not seem appropriate to have students deliberately try to get a lower grade. It will further eliminate what we might call the bare "D" problem in the Pass-Fail system — the problem which results from a student's decision to take a course and do minimal work to pass, a problem which often leads to the common request of the student: "What is the minimum I must do to get a passing grade?" It will end student attempts, now quite common, to reverse the Pass-Fail decision after discovering the pre-converted grade was higher than expected. It continues to maintain the historical record of what the student has actually done while permitting adjustment in the cumulative average for whatever reason. Finally, the problem with graduate and professional schools which was brought about by the Pass-Fail grade would be resolved because all grades on a student's transcript would be letter grades.

The new system will continue to permit the student to enroll in courses without grade point consideration for all three of the reasons first suggested when Pass-Fail was originally passed. It will further permit reduction of grade pressure by giving students an "out" whether either for one course or for as much as a full term that has somehow been disastrous. It will give students a second chance in a course in which they find themselves in difficulty without, at the same time, removing the possibility of a deferred grade for cogent reasons. Finally, it will permit the good student who has a bad experience in one or more courses to eliminate these courses from grade calculations and have a cumulative average that more properly reflects his abilities. Perhaps the best example is the student who starts out in one college as a freshman, does poorly during that year, discovers that he belongs in another college, and having enrolled in the second college, does very well. Such a student should not be saddled with the low grades which reflect only an error in his first choice. Under present rules, students who have had only honor grades for the last three years often have comparatively low cumulative averages because of low or failing grades in the freshman year.

The Committee proposes that acceptance of this new system should tend to implementation at the earliest possible moment. The implementation should include some kind of pro-rated allowance for those students who may have already used Pass-Fail during their earlier years as undergraduates. Thus, a student who has used nine cred.ts of Pass-Fail would then be permitted to use only 9 credits of Academic Redemption Option. Obviously, all students enrolling after the acceptance of the new rule would be under the Academic Redemption Option and would not be permitted to use rule M-3b or Pass-Fail. Students now enrolled who have used M-3b would not be permitted to use the rule again but would be permitted to maintain the results achieved by its use prior to acceptance of the Academic Redemption Option. The Administrative Committee on Undergraduate Instruction is the agency best qualified to work out details of implementation.

Pass-Fail Committee — Arthur Lewis, Chairman, Donald Epp, George Franz, Evelyn Hovanec, Maria Rovito, William Rabinowitz, Elwood Wagner.

Victorian scholar to give three talks

An eminent Victorian scholar, Dr. Harold I. Shapiro, professor of English at the University of North Carolina, will visit the University Oct. 14, 15 and 16 as a guest of the Institute for the Arts and Humanistic Studies.

As an expert on 19th century literary and art criticism, Dr. Shapiro is the author of "Ruskin in Italy," published in 1972 by Oxford University Press. He has recently been engaged in studies of the fiction of Virginia Woolf.

Dr. Shapiro will present three public talks. He will discuss "Ruskin in Italy" before the Comparative Literature Luncheon at 12:15 p.m., Tuesday, Oct. 14, at the State College Hotel and will speak on "The Two 'Voyages Out' of Virginia Woolf" at 8 p.m. that evening in Room 101 Kern Bldg. An art history lecture on Ruskin and Turner will be presented at 8:30 p.m. Wednesday, Oct. 15, in Room 230 Arts Bldg.

Cooks' tour

(Continued from page 1)

secondary to the exposure to cultural cuisines," Renaghan says.

Students in the class are divided into four-man managerial teams, each of which is in charge of two meals during a term. The managers are responsible for planning the menu, ordering the food, preparing and serving the meal and decorating the dining room. Other class members assist the managerial team on the day of the meal.

An important part of the assignment for the students is researching the cuisine involved in order to devise, cook and present the meal in a manner appropriate to the culture it represents.

Because the emphasis in the course is on management, Renaghan feavas as much as possible up to the class members.

"The students get more responsibility than they can handle," he says, "and most respond very well."

The instructor points out that since the Maple Room is a laboratory he sometimes allows mistakes to happen that he wouldn't if he were running a restaurant. However, regular customers of the dinners say that mistakes are definitely the exception and delicious even the rule.

Last week the class offered a Florentine banquet from the Renaissance and a dinner from Ancient Rome. The remaining meals this month will be based on Eighteenth Century France, Oct. 8, Early England, Oct. 9; China, Oct. 15; and Central America, Oct. 16.

The Central American dinner will attempt to recreate an Aztec festival known as "The Bathing of the Slaves." The dinner will be staged around a ceremony in which one of the students will play the part of a slave. The meal, featuring turkey mole and guacomole with spices specially ordered from Mexico, will be served in large wooden bowls, as was the custom in Aztec Mexico.

In honor of the American Bicentennial, the second half of the term will concentrate on dishes associated with regions of the United States. In previous terms the course has dealt only with foreign cuisines.

"Some people say there's no American cuisine, but I disagree," says Renaghan.

As in the first half of the term, the specified area of concentration will be determined by the students.

Attracting customers, setting a price for the meal and handling reservations are all part of the class. The price depends on the cost of the food, but is usually about $5 a person. Reservations and specific menu information can be obtained at the Food Service Laboratory (865-7441) from 9 a.m. to 4 p.m. Monday through Friday.

WPSX highlights

(Continued from page 3)

Contrasting perspectives on the final days of royal power before the establishment of parliamentary democracy in India provide the focus for **Autobiography of a Princess** Monday, Oct. 13, at 8 p.m. The hour-long film stars Madhur Jaffrey as a self-exiled Indian princess and James Mason as an elderly Englishman who had been her father's private secretary. The two meet to watch old movies and share their memories of Royal India.

The applications of behavioral technology in individual and clinical situations are examined on **The Behavioral Revolution** Tuesday, Oct. 14, at 9:30 p.m. The half-hour documentary looks at three behavior modification projects at the Laurelton State Institution and at an experimental teacher training project being conducted at Penn State by associate professor of child development John Nesworth. The program also features Michael Mahoney, associate professor of psychology.

Tribal art and the people and place that produce it are explored on **The Tribal Eye**, a new seven-part series beginning Wednesday, Oct. 15, at 8 p.m. Hosted by British biologist and filmmaker, David Attenborough, the series visits 16 tribal societies to discover, as Attenborough says "different ways of being human." The first hour-long documentary focuses on the Oksakan, Haida and Kwakiuth Indians of the American northwest coast, showing their masks and totems, and, in particular, the "potlatch," a theatrical event of music and dance in which a great chief proclaims his wealth and status.

Professor Sam Schoenbaum is featured on **Book Beat** Wednesday, Oct. 15, at 6:30 p.m. Schoenbaum discusses "William Shakespeare: A Documentery Life," his new collection of facsimiles depicting the records and documents of Shakespeare's life. The collection explores the ordinary human activities of Elizabethan times and they affected Shakespeare.

John Neville stars as poet John Milton when **Classic Theatre: The Humanities in Drama** presents "Paradise Lost," a modern dramatization of Milton's late years Thursday, Oct. 16, at 9 p.m. At 8:30 p.m., preceding the play, Neville and Harvard humanist Judith Kates discuss Milton's life on **Classic Theatre Preview**.

Open house

(Continued from page 1)

James F. Holahan, 3 p.m., Theatre Arts 100, Dr. Helen Manhull.

Oct. 16 — 9:30 a.m., German 1 and 2, Frank Donahue. 11 a.m., Individual and Family Studies 329, Dr. Francine Deutsch. 1:30 p.m., Arts 1, Warren Smith. 3 p.m., Community Development 7, Dr. Robert H. Sebring.

Computation Center offering seminars through March on its facilities and use

The Computation Center is offering a series of seminars on its facilities and their use beginning Monday, Oct. 13. These seminars are open to the public, and sessions will start at 7:30 p.m. Participants will meet in Room 105, Osmond Lab., except for those attending RJE and APL seminars, which will be held in Keller Bldg.

The seven different seminars are:

1) Introduction to the Computation Center describes services and procedures and discusses basic concepts of the IBM System 370/168 computer and the Operating System OS/370 MVT. This is a two-part seminar to be held Oct. 13 and 16.

2) Introduction to JCL (Job Control Language). This is the language used by the operating system to manage jobs and data. It is especially convenient for manipulating files of data on disks, magnetic tapes, etc. There are sessions on Oct. 27 and 30 and Nov. 3, 6, 10 and 13.

3) Penn State RJE and BAT File System. RJE (Remote Job Entry) is a system whereby a person may use a terminal to create and modify files containing such information as programs, data or text. BAT (Batch and Terminal) system permits the inclusion of one or more RJE files in a job and the routing of specified parts of job output to special types of RJE files. Sessions will meet Nov. 10 and 13 and Dec. 8, 11, 15 and 18. Those interested should obtain a "user identification code" at Room 229 Computer Bldg.

4) Mathematical Computing Programs will introduce some of the library computer programs related to mathematic computations. Included are IMSL subprograms, EISPACK, the Multiple Precision Arithmetic Package, some Monte Carlo programs and data bases and FORMAC7. Seminars will continue and specialize as interests dictate. They are scheduled for Jan. 5, 8, 12 and 15.

5) PSU-WATFIV will demonstrate specific WATFIV features and Penn State conversions. Sessions will be held Jan. 19, 22, 26 and 29.

6) Text Processing at PSU includes programs and techniques for text processing ranging from simple editing to preparation of extensive documents on Feb. 2, 5, 9 and 12.

7) Introduction to APL (A Programming Language). APL is an interactive system accessed through terminals using a unique character set especially powerful for operations on arrays. It also provides a "desk calculator" mode that immediately evaluates arithmetic expressions as they are typed. Sessions will meet March 15, 18, 22 and 25. Those interested should obtain a "user identification code" at Room 229 Computer Bldg.

PENN STATE intercom

Volume 5, Number 7 October 16, 1975

An infarnal communications medium for the acadamic community of The Pennsylvania State University published weekly during the four terms of the class schedule

News in brief

Cleaning standards adjusted

As a result of current budget reductions, a complete restudy of the frequency program for various cleaning functions throughout academic and administrative buildings has been made. Certain scheduled tasks are being reduced to assist in meeting the budget cuts, and some of these will be noticed by building occupants. These adjustments will include reduced emptying of wastebaskets and ashtrays, reduced dusting of furniture, etc.

The Office of Physical Plant and the Department of Management Engineering, who are jointly responsible for the overall frequency program, have tried to be careful to insure that the frequency adjustments do not interfere with the daily operation of work areas. If there are any questions or comments regarding the new arrangements after they have been in effect for a reasonable period of time, please call the Office of Physical Plant Service Desk, 865-4731.

Speakers wented

The Office of Residential Life Programs and the Office of Student Activities egein this year are seeking the assistance of afl members of the University community in responding to student needs for extracurricular programming. If any University employees are willing to speak with a group of students about an academic area, hobbies, travels or other special areas of interest, they are asked to complete a form available from and to be returned to Faculty Resource Survey, Office of Residential Life Programs, 335 Boucke, as soon as possible.

From the information received, a "resource list" for use by student groups in planning their activities and programs will be developed. Any questions can be directed to Linda Higginson, 865-3491, or Camilla Colantonio, 865-7973, either of whom will also accept by phone the information sought on the form. Last fall, 275 University personnel indicated a willingness to discuss 736 topics with students.

Laurelton aides sought

The Volunteer Service Center at the University is seeking aides for a Halloween party for mentally retarded residents at the Laurelton State School and Hospitaf from 6:30 to 9.30 p.m. Tuesday, Oct. 28. Escorts are needed to help Laurelton residents during the activities, which include live entertainment, carnival games, costume judging and sing-alongs. Transportation will be provided by the VSC. Those interesfed in participating in the event should contact the center af 203 Hetzel Union Bldg. or call 865-3431 no later than Monday, Oct. 27.

Penn State to host meet

Penn State has been selected to host an Olympic qualifying gymnastic meet between the men's and women's teams of the United States and the USSR. The event will be held next Jan. 29-31 in Rec Hell. The teems will be selected by the gymnestic federations of each country. U.S. gymnastic officials indicate that the American teams must make a strong showing against the Soviet squads to earn one of the 12 team berths at the Montreal Olympics. The Soviets have already qualified.

Middle East subject of talk

Prof. Daniel Dishon of Tel Aviv University will speak on "The Interim Agreement: A Stage of Development in the Arab-Israeli Conflict" Thursday, Oct. 23, at 8 p.m. in Room 112 Kern Bldg.

His lecture, which is open to the public, is sponsored by the Middle East Studies Committee of the College of the Liberal Arts.

An internationally known expert on Arab and Middle Eastern affairs, Prof. Dishon has been senior research member of the Shiloah Center for Middle Eastern and African Studies of Tel Aviv University since 1967. He is editor of the center's annual publication, "Middle East Record."

During his two-day visit, Prof. Dishon will meet with classes in history political science and religious studies. His speaking tour has been arranged by the American Professors for Peace in the Middle East. This organization is working with several faculty and staff members to organize a Penn State chapter. Anyone interested in joining may contact Dr. William Rabinowitz, professor of educational psychology, at 865-1246.

African Studies Forum

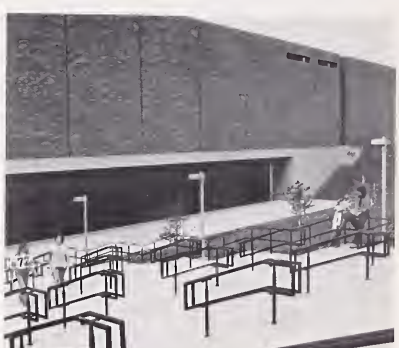
Dr. Robert C. Mitchell, associate professor of sociology, will speak at the second African Studies Forum of the Fall Term, to be held Wednesday, Oct 22, at 7.30 p.m. in the Walnut Bldg. Cultural Center.

His subject is "A Black Prophet and White Religion: Religious Change in Southwest Nigeria."

A member of the faculty since last December, Dr. Mitchell has traveled extensively in Africa and has made a special study of the sociology of religious change in Nigeria.

He is a graduate of the College of Wooster, and earned his M.A. and Ph.D. degrees in sociology at Northwestern University. Prior to coming to Penn State, he was a visiting professor at the University of Pennsylvania and an associate professor at Swarthmore College.

The African Studies Forum sponsors two meetings each term for discussion among students, faculty and members of the community interested in Africa. Additional information may be obtained from Dr. Cyril Griffith, 117 Old Main, 865-0458.



Hallowell will present slides

H. Thomas Hallowell Jr., a member of the University's Board of Trustees, will present a slide show titled "My African Wild Animal Friends," the record of e photographic safari, at a meeting of the Color Slide Club Monday, Oct. 20, at 7:30 p.m in Room 112 Kern Bldg. Chairman of the Board of Standard Pressed Steel Co., Hallowell was first named o Penn State trustee in 1950 and served as vice president of the University's Board from 1970 to 1973. The public is invited to view the program.

Platform tennis courts available

Six outdoor platform tennis courts are available at University Park for use by students, faculty and the public. Located adjacent to the Tennis Bldg., they are available daily from 8 a.m. to 7 p.m. without advence reservation. Equipment is available from the Penn State Tennis Shop, and fees for use of the courts are based on 90 minutes of play. Faculty and student rates are $2 per person for singles and $1 per person for doubles.

(Continued on page 4)

New Intramural Bldg. will be formally dedicated October 23

The new Intramural Bldg., located on Curtin Rd., north of Shields Bldg., will be formally dedicated at 1.30 p.m. Thursday, Oct. 23.

Dr. Robert J. Scannell, dean of the College of Health, Physcal Education and Recreation will preside at the ceremony, which will be highlighted by an address by President John W. Oswald.

Dr. Oswald will turn over the keys of the facility to Clarence "Dutch" Sykes, director of the Division of Recreational Sports.

On Sunday, Oct. 26, from 2 to 4 p.m., the public is invited to an open house at the building.

The Intramural Bldg. houses 6 basketball courts, 12 racketball-handball courts, 2 volleyball courts and 4 badminton courts. In addition, there is a jogging track, a wrestling room, a weight-training room (with half of the equipment specially-designed for women), a general activities room, a classroom, a first aid room, storage space for club sports equipment, and offices for the coordinators of the club sports program, women's and coeducational intramurals, and men's intramurals.

There are general locker rooms for men and women, a faculty men's locker room and an Intramural Bldg. staff locker room.

Locker assignments for the faculty men's locker room, which includes 200 spaces, will probably be made by the end of the Fall Term. An announcement will be issued at that time.

According to Sykes, there is little wasted space in the building.

"We are very proud of the total space that has gone into play areas," he says. "We've kept support areas as small as possible."

Sykes points out that efforts are being made to make the play areas available to a large number of people. The Intramural Bldg. is open from 7 a.m. to 11 p.m., seven days a week.

Fairbank to speak on China

Dr. John K. Fairbank, professor of history at Harvard University, will be a guest of the Institute for the Arts and Humanistic Studies Tuesday and Wednesday, Oct. 21 and 22.

At 8 p.m., Tuesday in Room 121 Sparks Bldg., he will conduct a colloquium for history and other interested faculty and graduate students on "Continuities and Innovations in a Revolutionary Process: The Case of China." He will lecture to a combined class on "Intellectual and Political Dimensions of Chinese Nationalism" in Room 111 Chambers Bldg. Wednesday during the fourth period, 12:45 to 2 p.m., and all interested faculty and students may attend.

"The Chinese Revolution and American Policy" will be the subject of Dr. Fairbank's public lecture at 8 p.m. Wednesday evening in the HUB assembly room.

Dr. Fairbank, who is chairman of the Council on East Asian Studies at Harvard, has been at that University since 1946 and was a leader in the development of East Asian academic and research programs. A graduate of Harvard, he earned his doctorate at Oxford and has received honorary degrees from the University of Wisconsin, Korea University, Oberlin College and the University of Toronto.

He was president of the Association for Asian Studies and of the American Historical Association. The latter group has established the John King Fairbank Prize, which is awarded every other year for the best book manuscript on East Asian history.

Dr. Fairbank's own books include "The United States and China" and "Trade and Diplomacy on the China Coast." He is also the co-author of "East Asia: Tradition and Transformation."

PENN STATE COLLECTION

Faculty notes

Five faculty members have been awarded research fellowships for winter and spring terms by the Institute for the Arts and Humanistic Studies. They are:

Ernest B. Lowrie, associate professor of religious studies, for research on the philosophical background of Harvard College.

Denise and **John T. Carmody,** assistant professors of religious studies, for research on "The Male-Female Polarities to Ultimate Reellty in the Modern World Religions."

John A. Cook, professor of art, for creative work in sculpture.

Eleanor Zygler, associate professor of art, for creative work in painting.

Dr. Ronald A. Pursell, associate professor of botany, has been elected to a two-year term as president of the American Bryological and Lichenological Society. One of the country's leading authorities on mosses, Dr. Pursell is currently completing a taxonomic treatment of certain families of the plants for a manual on the Moss Flora of Mexico, edited by Dr. A. J. Sharp of the University of Tennessee, and is also working on a taxonomic re-evaluation of some species in the Hawaiian flora. Dr. Pursell also serves on the governing board of the American Institute of Biological Sciences and is a member of the British Bryological Society, the Nordic Bryological Society, the American Society of Plant Taxonomists and the International Association for Plant Taxonomy.

Dr. Peter C. Fishburn, research professor of management science, will participate in an International Institute of Applied Systems Analysis workshop conference on decision-making with multiple conflicting objectives to be held in Laxenburg, Austria, during the week of Oct 20-24 Thirty scientists from 14 countries will attend the conference. Dr. Fishburn has been invited to present a paper on multiattribute utility theory and to prepare an integrative chapter on approaches to decision-making with multiple conflicting objectives for inclusion in a conference volume. He will be attending the workshop as a guest of the Institute.

An article by **Dr. Stephen J. Cimbata,** associate professor of political science and associate director for academic affairs at the Delaware County Campus, has been selected for inclusion in a forthcoming book, "Foreign Policy Analysis," which is being edited by Richard L. Merritt. Dr. Cimbata's article, which was originally published in "Policy Studies Journal," is entitled "Policy Studies and Foreign Policy: Emphases and Cautions."

Dr. Stewart W. Bither, professor of marketing, will also assume the position of director of the Master of Business Administration Program in his College. A member of the faculty since 1972, Dr. Bither received the Penn State MBA Association's Teaching Excellence Award last year. He earned his A.B. from Dartmouth College, his MBA from the Amos Tuck School of Business Administration at Dartmouth, and his PhD. from the University of Washington. He will devote special attention to curricular matters in his new post.

Dr. Jean Brenchley, assistant professor of microbiology, presented a seminar on "Regulation of the Ammonia Assimilatory Enzymes in Klebsiella and Salmonella" at the Department of Microbiology in the University of Virginia's School of Medicine. She also spoke on "Regulation of Glutamine and Glutamate Synthesis In Klebsiella and Salmonella" before the Department of Microbiology at the University of Cincinnati Medical Center.

Penn State women's track and cross country coach **Christine Brooks** has been invited to a training camp for Olympic athletes Dec. 26-30 in Gainesville, Fla. Brooks has a grant from the Olympic Development Committee to study the training methods and competitive techniques used in women's track and field. Last June she filmed America's top women in the high jump, hurdles and middle distance events during the AAU nationals. Her preliminary research findings prompted the invitation from the Olympic Development Committee.

"The Economics of the Corporate Economy" by **Dr. James B. Herendeen,** professor of economics, has been published by Dunellen Publishing Co. The book presents a comprehensive view of the economics of the corporate economy and discusses the policy implications of this analysis. The corporate economy, Dr. Herendeen explains, refers to an economic system dominated by managerial enterprises — modern large corporations with widely dispersed stock ownership where effective control of the corporation rests with corporate managers. This area of economics is becoming increasingly important at both the theoretical and applied levels.

There is a growing awareness, according to Dr. Herendeen, that traditional price theory gives only limited insight into the very important social questions regarding an economic system dominated by the large corporation. This book is an attempt to relate the theory of the firm to the organizational, motivational and institutional setting of the corporate enterprise.

Topics covered include goals of the enterprise, review of traditional and managerial models of the firm, growth maximizing and value maximizing models, pricing policy, advertising, the behavior of corporate profits, dividend policy and the political economy of corporate capitalism.

Dr. Herendeen received his B.S. at Cornell University, his M.S. from Iowa State University, and his Ph.D at Penn State. His research and teaching interests include microeconomic theory, macroeconomic theory, theory of corporate enterprise and money and banking. A member of the faculty since 1963, he is the author of a previous book, "Modern Political Economy: Ideas and Issues."

Dr. **Budugur Lakshminarayana,** professor of aerospace engineering, presented a paper on "The Nature of Flow Distortions Caused by Rotor Blade Wakes" at a meeting of the advisory group for research and development of the North Atlantic Treaty Organization on "Unsteady Phenomena in Turbomachines" in Monterey, Calif., last month. The meeting, attended by specialists from various NATO countries, was organized to disseminate information on the effects of unsteady flow on jet engine performance and on the ways that this information can be transferred to turbomachinery design.

Obituary

Charles Austin Eder, **professor emeritus** of civil engineering, died Oct. 3 in San Antonio, Texas, at the age of 80. A member of the University faculty from 1922 to 1955, he also served as State College Borough engineer from 1943 to 1946.

After graduating from Nanticoke High School, Eder received the B.S. and M.S., both in civil engineering, from the University. He was a sponsor for Triangle fraternity and for more than 50 years served as secretary for the Penn State Class of 1916.

Two in E&MS mark 25 years

Dr. Keith

Dr. Rodgers

Two faculty members of the College of Earth and Mineral Sciences, **Dr. MacKenzie L. Keith** and **Dr. Allan L. Rodgers,** have received their 25-year chairs and plaques from the University.

Professor of geochemistry and since 1956 director of the College's Mineral Conservation Section, Dr. Keith earned his B.Sc. in mining geology at the University of Alberta. His M.Sc. in geology was granted by Queens University and his Ph.D., also in geology, by the Massachusetts Institute of Technology.

Dr. Keith began his professional career as a lecturer and assistant professor of geology at Queens University in Kingston, Ontario, remaining there from 1940 to 1947. He then spent three years as a petrologist at the Geophysical Laboratory of the Carnegie Institution of Washington.

During his years in Canada, his work was concerned mainly with petrology, geologic mapping and industrial minerals and included 13 field seasons with the Geological Survey of Canada, the Ontario Department of Mines and various companies.

Beginning in 1947, Dr. Keith's interests switched to studies of high temperature phase equilibria relevant to experimental petrology and to refractory materials. This work was begun when he was in Washington and continued after he came to Penn State.

In 1957 and 1958, two new lines of research were started by Dr. Keith, both related to Pennsylvania mineral resources and the newly-formed Mineral Conservation Section. One investigation, relevant to the occurrence and qualities of coal and refractory clay, etc., dealt with trace element and organic geochemistry of sedimentary rocks. The research was supported by the National Science Foundation for a number of years, e mass spectrometer laboratory was established for measuring carbon and oxygen isotope ratios of minerals, and criteria were developed for differentiating marine sediments from continental freshwater sediments and for tracing ancient shorelines.

The second long-term project was aimed at developing methods of geochemical prospecting by trace metal analysis of stream sediments. That work is still being carried on with several colleagues, and the present investigation is concerned with methods of searching for uranium deposits.

A recent and entirely different primary interest of Dr. Keith's is an evaluation of evidence for and against the popular theory of Plate Tectonics and of continental drift by movement of rigid plates. The contrary evidence is widely neglected, he believes, and may form the seeds of the next revolution in the earth sciences.

Dr. Rodgers, who is professor of geography, obtained his B.S. in economics from City College of New York in 1942 and then spent three years in the United States Navy, where he rose to the rank of Lieutenant. He earned both his M.A. and Ph.D. in geography at the University of Wisconsin

After graduation, he joined the faculty of the University of Oklahoma as an assistant professor and taught there from 1948 until 1950. During his tenure at Penn State, he served as head of the Department of Geography from 1963 until 1967 and also was chairman of the Russian Area Program. He was a Counsellor of the Regional Science Association from 1959 to 1962.

Dr. Rodger's research interests have centered around economic geography — industrial location and regional economic development — particularly the problems of slow growth and stagnant areas within such so-called developed nations as Italy and the USSR. Another interest of Dr. Rodgers' is the socio-economic geography of the Soviet Union.

Dr. Rodgers has been active in the Association of American Geographers, serving as head of its Census Committee. He has been a member of several program committees for national AAG meetings and is program chairman for the 1976 meetings of the Association. He has served as a consultant to the National Science Foundation on research proposals in the social sciences and to the Office of Education on educational institutes. He has also been a consultant to the Council of Graduate Schools for evaluation of Ph.D. programs in geography.

Chang analyzes policy-making process in China

Who makes policy in The People's Republic of China?

Not just Chairman Mao, because enormous as his power is, he does not always have his own way, says **Parris H. Chang** in his new book, "Power and Policy in China."

Associate professor of political science, Dr. Chang has made two visits to the Chinese mainland and spent more than seven years analyzing source materials in preparing to write his book. It was published by Penn State's Press.

As a result of his studies, he concludes:

—Policy-making in China has involved a complicated conflict and consensus-building process, not unlike political processes in the Soviet Union and the United States.

—Although Mao played an extremely important role in the system, he was frequently blocked and frustrated by other leaders, and he was not always "in command" as some scholars have maintained.

—On various occasions as Mao maneuvered to push his policies, he sought "outside support" to overcome his opponents at the center. His actions thus broadened participation in the system and climaxed in the Cultural Revolution when he called on the army to control the Red Guards. Opening the floodgate to military intervention, Mao now finds himself plagued by the refusal of army leaders to "return to the barracks."

—Despite Mao's great power, policy was significantly influenced by debates and conflicts among China's leaders. The major shifts in policy followed an oscillating pattern between conservative and radical poles as a result of shifting coalitions and balance of power in the decision-making councils.

—Leaders and cadres at the provincial and lower levels did have an effect on policy during the implementation phase in a variety of ways, even if they did not directly participate in its formulation.

Dr. Chang examines China's policy-making process in the context of five major policy issues, which he selected because they had received substantial press coverage, thus making detailed analysis possible. His case studies include the 12-year agricultural program, administrative decentralization, the commune movement, the socialist education program and ideological rectification.

Among the source materials he used in preparing the book were the speeches of party leaders, official statements, and documents and regulations issued by the Chinese Communist Party and the government. These were supplemented by secret Chinese Communist documents and unpublished speeches by Mao that have become available outside of China, Red Guard posters and newspapers, refugee interviews, studies made by scholers on China, and information gleaned from talking to Chinese officials during his trips to China.

"It would be wrong to regard all information in the Chinese mass media as mere propaganda," Dr. Chang notes. "No ruling group can rule by coercion alone; to govern a big country like China and to try to persuade the vast Chinese population to support its policies, the Chinese Communist Party has constant need to communicate its directives to the masses, and this is done mainly through the mass media."

The author of numerous scholerly articles end papers on China as well as of an earlier book, "Radicals and Radical Ideology In China's Cultural Revolution," Dr. Chang is a native of Taiwan. He received his baccalaureate degree from National Taiwan University, his master of arts degree from the University of Washington and his Ph.D. in comparative politics from Columbia University.

He has been a member of the faculty since 1970 and earlier this year made a lecture tour through Japan at the invitation of the Japanese Ministry of Foreign Affairs.

University Park Calendar

October 16-26

Items to be included in this calendar should be sent to the editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, Oct. 16
Commons Videotape showing, 12 noon, Kern lobby.
University Theatre, "Summer and Smoke," 8 p.m., Pavilion Theatre.
FSHA 410 dinner, Central America, 5:30 p.m., Maple Room, Human Development. Reservations required, 865-7441.
International Student Football Workshop with Joe Paterno and Frank Patrick, 7 p.m., Room 112 Kern.

Friday, Oct. 17
GSA's Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Sports: Soccer, vs. Maryland, 7 p.m., Jeffrey Field.
University Theatre, "Summer and Smoke," 8 p.m., Pavilion Theatre.
"Bread and Roses" A musical documentary of women's history, 8 p.m., Schwab. Sponsored by the Association for Women Students.

Saturday, Oct. 18
Sports: Men's Cross Country, vs. Indiana.
University Theatre, "Summer and Smoke," 8 p.m., Pavilion Theatre.
PSU Symphony Orchestra, 8:30 p.m., University Auditorium.

Sunday, Oct. 19
Penn State Hotel and Restaurant Society Sunday Brunch Buffet, 10:30-1 p.m., Maple Room, Henderson.
Chapel Service, 11 a.m., Eisenhower Chapel. Chaplain Warren Solberg, pastor, David's Church, Millersburg, Pa
Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Elder Gerald G. Loyd, pastor, Black Christian Fellowship.
Artists Series, Music from Marlboro, 8:30 p.m., Schwab.

Monday, Oct. 20
Public reception for Angelo Savelli, visiting professor of art and fellow of the Institute for Arts and Humanistic Studies, 7:30 p.m., Zoller Gallery.
"G.B.S. in Love," a dramatic narration by Dan H Laurence, 8:30 p.m., Pavilion Theatre.

Wednesday, Oct. 22
Noontime Concert, 12.15 p.m., Kern lobby.
PSOC ski clinic, 7 p.m., HUB ballroom.
African Studies Forum, 7:30 p.m., Walnut Bldg. Cultural Center. Dr. Robert Mitchell, sociology, on "A Black Prophet and White Religion: Religious Change in Southwest Nigeria"
Musica da Camera, 8:30 p.m., Music Bldg. recital hall.
Artists Series, Four Decades of American Film Festival, "Greed," 8:30 p.m., University Auditorium.

Thursday, Oct. 23
Commons Videotape, 12 noon, Kern lobby

Friday, Oct. 24
Sports: Women's Field Hockey, vs. Millersville, 2 p.m., Pollock Field. Soccer, vs. Navy, 7 p.m., Jeffrey Field.
Folk and Square Dance Roundup, 7:30 p.m., north gym, White.
United Campus Ministry U.N. Day program, 8 p.m., HUB assembly room.
GSA's Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Penn State Brass Chorale and Penn State Wind Ensemble, 8:30 p.m., Music Bldg. recital hall.
Artists Series, Hume Cronyn and Jessica Tandy in "The Many Faces of Love," 8:30 p.m., Schwab.

Saturday, Oct. 25
Sports: Football, vs. Army, 1:30 p.m., Beaver Stadium.

Sunday, Oct. 26
Chapel Service, 11 a.m., Eisenhower Chapel. Dr. James Whiteside, team physician.
Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Elder Joseph L. Gavlington, pastor, Pittsburgh.
Coleen Bidelspach, soprano recital, 3:30 p.m., Music Bldg. recital hall.
Open house at new Intramural Bldg. 2-4 p.m.

Seminars

Thursday, Oct. 16
Agronomy, 8:15 a.m., Room 301B Ag. Admn. Dr. John Norman, Meteorology, on "Development and Application of Crop Growth Simulation Models."
Microbiology and Cell Biology, 3:55 p.m., Room S2 Frear. Dr. Joseph S. Gots, University of Pennsylvania Medical School, on "Regulation of Purine Nucleotide Metabolism in Bacteria."
Physics, 3:50 p.m., Room 117 Osmond. G. Rawitscher, University of Connecticut, on "Electron Scattering from Nuclei."
Meteorology, 4 p.m., Room 26 Mineral Sciences. Dr. Alistair B. Fraser on "The Mirage, the Green Flash, and Theological Optics."
Chemistry, 12:45 p.m., Room 333 Whitmore. Albert L. Allred, Northwestern University, on "Polysilanes."
Computer Science, 4 p.m., Room 325 Whitmore. Ravi Sethi, computer science, on "Correct Computation Rules for Recursive Languages."
Computational Center, 7:30 p.m., Room 105 Osmond Leb. "Introduction to the Computation Center (2)."

Friday, Oct. 17
Organizational Behavior, 3 p.m., Room 229 Moore. Joseph Obradovic, University of Zagreb, on "Participation, Theory and Research Results."
Physics, 3:50 p.m., Room 117 Osmond Dr. A. E. Douglas, National Research Council, Ottawa, on "Electronic Spectra of Polyatomic Molecules."

Monday, Oct. 20
Ecology, 4 p.m., Room 101 Kern. Dr. Gordon Orians, biology, University of Washington, Seattle, on "Mates and Real Estate In Marsh Nesting Blackbirds."
Biochemistry, 11:10 a.m., Room 101 Althouse. Dr Roy Whistler, Purdue University, on "Thiosugars and Their Interesting Biochemical Applications."
Organic Chemistry, 8 p.m., Room 333 Whitmore. Dr Lloyd M. Jackman on "Organic Reactions of Some Transition Metal Complexes."

Tuesday, Oct. 21
Air Pollution Control, 2:20 p.m., Room 140 Fenske. Mary E Shaw, research aide, Center for Air Environment Studies, on "Effect of Altered Gaseous Environment on the Lung."
Biochemistry, 11:10 a.m., Room 101 Althouse. Dr. Roy Whistler, Purdue University, on "Water Soluble Polysaccharides of Increasing Industrial importance."
Inorganic Chemistry, 8 p.m., Room 333 Whitmore Dr Greg Geoffroy on his research interests: synthetic organometallic chemistry, organometallic photochemistry, and homogenous catalysis.
Psychology, 1:15 p.m., Room 123 Chambers. Dr. George Guthrie on "Malnutrition and Mental Development" and showing a film, "Big Problems for Little People."
Analytical Chemistry, 12:45 p.m., Room 333 Whitmore. G.W. Goodtoe on "Ion-Molecule Reactions and Mass Spectrometry."
Plant Pathology, 9:45 a.m., Room 213 Buckhout. Harry Smith on "Influence of Fertilizer on Plants Exposed to Sulfur Dioxide"
Engineering Science and Mechanics, 4 p.m., Room 215 Hammond. Dr. Richard Hoffman, physics, Case Western Reserve University, on "Mechanical Properties of Thin Films."
Comp Lit Luncheon, 12:15 p.m., Presidential Room, Hotel State College Audrey Rodgers, English, on "Eliot in the '70s."

Wednesday, Oct. 22
Fuel Science, 4 p.m., Room 301 M.I. Dr. Richard Gordon, mineral economics, on "The Future of Coal: A Skeptical View Revisited"

Thursday, Oct. 23
Agronomy, 8:15 a.m., Room 301A Ag. Admin. Dr. Gary Pick, Cornell University, on "Development and Application of an Alfalfa Simulation Model."
Chemistry, 12:45 p.m., Room 333 Whitmore. Bert L. Vallee, Harvard Medical School, on "Conformation and Function of Carboxypeptidase."
Microbiology and Cell Biology, 3:55 p.m., Room S2 Frear. Dr Martin S. Hirsch, Infectious Disease Unit, Massachusetts General Hospital, on "Immunological Activation of Endogenous Viruses."
Philosophy, 4 p.m., Room 151 Willard. Dr. Donald P. Verene on "The Science of Imaginative Universels and the Philosophy of Symbolic Forms."
Engineering Acoustics, 4 p.m., Room 73 Willard. Robert L. Cohen, grad. asst., Garfield Water Tunnel, on "Digital Holography with Applications to Acoustics."
Meteorology, 4 p.m., Room 26 Mineral Sciences. William O'Connor, grad. student, on "Stream Function Representaiton for Quasi-Geostrophic Flow in a Differentially Healed, Rotating Annulus."
Anthropology, 3:30 p.m., Room 107 Social Science Bldg. James W. Hatch and Dr. Bennett Dyke on "Ceramic Life Tables: Testing Archaeological Assumptions with Demographic Methods"
Computer Science, 4 p.m., Room 325 Whitmore. Dr. Jack Helter, SUNY, on "The Orphos Management Information System."

Meetings

Saturday, Oct. 18
American Association of University Professors, Pennsylvania Division Annual Meeting, Jeanette Reibman, chairperson Senate Education Committee, on problems of higher education, 9 a.m., Room 101 Kern. Dr. Joseph Duffey, AAUP general secretary, on "The AAUP Approach to Collective Bargaining," 11:15 a.m., Room 101 Kern. Open to public.

Monday, Oct. 20
Color Slide Club, 7:30 p.m., Room 112 Kern. H. Thomas Hallowell on "My African Wild Animal Friends."

Tuesday, Oct. 21
Tau Beta Pi, engineering honorary, 7 p.m., Room 212 Hammond. Tutoring session.

Wednesday, Oct. 22
AWS, 7 p.m., Room 225 HUB.

Thursday, Oct. 23
Academic Assembly, 7 p.m., HUB reading room, Pass/Fail and academic redemption option with Dean Lewis and Pass/Fail Committee of the University Senate.

Sunday, Oct. 26
Interlandia Folk Dance Club, 7:30 p.m., south gym, White.

Films

Wednesday, Oct. 22
GSA Commonspace Theatre, "David and Lisa," 7:20 and 9:30 p.m., Room 112 Kern.

Thursday, Oct. 23
"Kata," African film, 7:15 p.m., Walnut Bldg. assembly room. Sponsored by Black Studies, French Department and Cultural Center.
"Run with Me," written, produced and directed by Christian Stoianovich, instructor of theatre and film, 8 p.m., HUB assembly room, along with other films sponsored by the Dept. of Theatre and Film.

Friday-Saturday, Oct. 24-25
"The Man" and "The Telltale Heart," 7 and 9:30 p.m., Walnut Bldg. assembly room.

Lectures

Wednesday, Oct. 22
William Katavolos, architect, planner, industrial designer, Pratt Institute, on "Architecture of the Future," 7:30 p.m., Room 115 Electrical Engineering West. Sponsored by the Dept. of Architecture.
Professor John Fairbank, Harvard University, on "The Chinese Revolution and American Policy," 8 p.m., HUB assembly room.

Thursday, Oct. 23
Professor Daniel Dishon, Tel Aviv University, on "The Interim Agreement. A Stage of Development in the Arab-Israeli Conflict," 8 p.m., Room 112 Kern Sponsored by the Middle East Studies Committee.

Exhibits

Museum of Art: Panel Paintings from the Samuel H. Kress Collection of the Allentown Art Museum. Drawings from the Permanent Collection. 200 years of Royal Copenhagen Porcelain, opening Oct. 26.
HUB Gallery: Homecoming Exhibit (old photographs from Pattee, Rec Hall and La Vie), until Oct. 23. U.N. Exhibit, opening Oct. 24
Kern Gallery: Jackie Battenfield, weavings, until Oct. 18. Renascence Gallery, opening Oct. 19.
Cultural Center, Walnut Bldg.: An exhibit of mixed media, the work of the New York Chapter of the National Conference of Artists.
Pattee Library: Fine feather jewelry, weavings and spinnings from State College guild, main lobby. Prints, Mary Hamilton, circulation lobby. Drawings, Dr. Paul Edmonston, east corridor lobby.
Chambers Gallery: Art Department Student Group Show. Gold and silver by students of SUNY at New Paltz. Both opening Oct 20 and continuing through Nov. 14.
Zoller Gallery: Savelli at Penn State, opening Oct. 20.

Arts roundup

"G.B.S. in Love"

"G.B.S. in Love," a dramatic narration by Dan H. Laurence, will be presented at the University by the Institute for the Arts and Humanistic Studies on Monday, Oct. 20, at 8:30 p.m. in the Pavilion Theatre.

Laurence has been fascinated by George Bernard Shaw ever since, early in his theatrical career, he played in "Captain Brassbound's Conversion." Son of a silent motion picture actress, he made his Broadway debut at the age of twelve and performed professionally until World War II, when he joined the Fifth Air Force as a radar specialist.

When he turned to college teaching in 1950, he maintained his theatrical involvement by directing lavish college musicels. He served as professor of English at New York University until 1970, when he resigned to concentrate on Shavian scholarship.

Laurence is literary advisor to the Shaw Estate as well as its official bibliographer. He edited "The Collected Letters of Bernard Shaw" and the seven-volume definitive edition of Shaw's "Collected Plays with their Prefaces." He has also edited several volumes of Shaw's uncollected writings, including "How To Become a Musical Critic," "Platform and Pulpit" and "The Matter with Ireland." He is co-author, with Leon Edel, of a comprehensive bibliography of Henry James.

During the past two years, he has toured the United States and Canada with his one-man "G.B.S. in Love," based on the letters exchenged between Shaw and Alice Lockett when the playwright was a young man of 25. Lockett was a nursing student whose letters show that she had grave doubts of Shaw's ever amounting to much!

Admission to "G.B.S. in Love" is free, but tickets will be required. They may be obtained at the Playhouse box office from 1 to 6 p.m through Saturday, Oct. 18. Any remaining tickets will be available at the door of the Pavilion Theatre one hour before performance time.

Marlboro concert

Six musicians will be peforming in the Artists Series Music from Marlboro Concert Sunday, Oct. 19, at 8:30 p.m. in Schwab Auditorium. Soloists include Alexander Helter, bassoon; David Singer, clarinet, Robert Routch, horn; Paul Schoenfield, piano; Rudolph Vrbsky, oboe, and Judith Mendenhall, flute. The program includes Villa-Lobos' "Quintette en forme de Choros," Gioacchino Rossini's "Quartet No. 4 in B-flat Major," Elliott Carter's "Eight Etudes and a Fantasy" and Beethoven's "Quintet in E-flat Major for Piano and Winds," opus 16. Tickets for patrons only will be available Oct. 15 from 11 a.m. to 2 p.m. at University Auditorium and the HUB booth. The general sale begins Oct. 16 from 9 a.m. to 4 p.m. at the same locations.

"Run With Me" showing

"Run With Me," the recent film written, produced and directed by Christian Stoianovich, instructor of theatre and film, which attracted widespread attention at

(Continued on page 4)

Hume Cronyn and Jessica Tandy appear in "The Many Faces of Love" at 8:30 p.m., Oct. 24 in Schwab. Public ticket sale is Oct. 21 at Artists Series HUB Booth or University Auditorium.

Wilkinson award made to Zook

Dr. Oswald congratulates Dr. Zook

Dr. Harry D. Zook, assistant vice president for research, has been presented the 1975 John E. Wilkinson Award for Administrative Excellence.

In presenting the award, President John W. Oswald pointed out that Dr. Zook, as head of the Intercollege Research Programs and Facilities, is concerned with 15 units serving 185 faculty members with departmental affiliations in nine colleges. He also works with 280 staff, clerical and technical service people and 328 graduate students.

All of the graduate students are degree candidates whose work is supported by the Intercollege Research Programs. Expenditures last year, including those for the Applied Research Laboratory, topped $17 million.

Dr. Zook who serves also as associate dean of the Graduate School and professor of chemistry, teaches at least two courses a year.

"He has the unusual ability and willingness to dig out the essential facts in each administrative problem as it arises," Dr. Oswald commented. "He is analytical in his approach to budgetary and personnel problems, and at the same time he provides an essential additional characteristic, that of the academic or professional understanding and point of view."

The $500 award was established in 1970 to be presented annually to an administrator at the University for outstanding achievement in the administrative field. It is made possible by friends of John E. Wilkinson, Bellefonte businessman.

Dr. Zook is a 1938 graduate of the University with a B.S. in chemistry. He received his Ph.D. in organic chemistry at Penn State in 1942 after qualifying for an M.S. in organic chemistry at Northwestern.

He joined the faculty in 1942, served from 1960 to 1965 as assistant head of the Department of Chemistry, and since 1965 has been assistant vice-president for research with responsibility for the Intercollege Research Programs. He was named associate dean of the Graduate School in 1970.

News in brief

(Continued from page 1)

Shenango Valley sponsors trip

Under the sponsorship of the Shenango Valley Campus, 34 high school seniors and four area biology faculty made a Marine Biology Field Trip to Lewes, Del., and Wallops Island, Va., last week. Their experience was part of the program of the Marine Science Consortium, which is composed of colleges and universities in the Middle Atlantic area. Dr. Charles Bursey, associate professor of biology at Shenango Valley, is associate director of the consortium. The trip was funded by the University's Office of Gifts and Endowments.

Bulletin celebrates 45th

What may be Penn State's oldest continuously published periodical, "Earth and Mineral Sciences," is beginning its 45th year this fall. An eight-page bulletin, issued monthly October through June by E&MS, the publication has long been concerned with energy, ecology and the environment. If made its first appearance in October, 1931, under the title "Mineral Industries," the then-name of the College. Currently it circulates free of charge to some 5,000 individuals, educational institutions, libraries, companies and government agencies around the world. Each month the bulletin features two articles written by faculty, plus news of the College's research, instruction and continuing education activities. Dr. Robert Stefanko, assistant dean for continuing education, serves as editorial director, while Mary S. Neilly is editor. Free subscriptions are available on request at 110 Mineral Sciences Bldg.

Chinese cooking class offered

Because of the growing popularity of Chinese cooking, the University will offer a noncredit, five-session course on the subject beginning Oct. 26. The instructor is Dr. Alfred Bobrowsky, senior research associate in the Materials Research Laboratory and an amateur chef with many years of experience in Chinese gastronomy. The course is being conducted by the College of Human Development as a continuing education service, and there is a fee to cover instructional costs. Section 1 will meet from 2 to 5 p.m. and Section II from 6 to 9 p.m. on Oct. 26 and Nov. 2, 9, 16 and 23 in 223 Human Development Bldg. Registration may be made by phoning 865-3443.

White House forms available

Qualified students, faculty and staff members at the University who are between the ages of 23 and 35, may now apply for appointment as a White House Fellow.

Under the program, initiated in 1964, between 14 and 20 highly motivated young Americans are selected to serve as special assistants to the Vice President and to members of the Cabinet and the President's principal staff.

More detailed information about the program, for which applications must be filed prior to Nov. 28, with a deadline for requesting application forms of Nov. 10, may be obtained from Dr. Richard G. Swalls, Jr., director of Career Development and Placement Center, 4th floor, Boucke Bldg., or by writing the President's Commission on White House Fellowships, Washington, D.C., 20415 (202 382-4661).

Stream map on sale

Hunters and hikers wanting to explore some of the 3,000 charted streams of Pennsylvania may find handy the Stream Map of the Commonwealth. The map, which is about three feet by five feet, gives the names and locations of major mountains, valleys, lakes, dams, swamps and reservoirs. It is published by the Agricultural Experiment Station and is available for $1.05, tax included, from Stream Map, Box 6000, University Park, Pa. 16802. In ordering, please indicate whether you want the map flat or folded. Checks or money orders should be made payable to the University. The map may also be obtained in Room 232, Agricultural Administration Bldg.

Funding opportunities

(201-1) The Public Health Service has issued rules and regulations for a new program, **Special Health Career Opportunity Grants.** These grants will help pay the cost of projects designed to increase the numbers of health-trained people who are disadvantaged or who are veterans and who plan to practice in regions where medical assistance is scarce (Ref. 40FR44814-47, 9/30/75)

(201-2) Guidelines for submitting unsolicited proposals have been released by the U.S Dept of Housing and Urban Development, Office of Policy Development and Research (PD&R). Current focus topics include: building safety and technology, environmental improvement and resource conservation, solar energy and other energy and utility systems, neighborhood revitalization, and strengthening state and local government management capability and public service delivery (Ref. HUD-PDR-88)

Two from E&MS

(Continued from page 2)

Other professional activities have included serving on the editorial board of the journal, "Economic Geography," as a staff member of the Seminar on Modern Italy of Columbia University and as a member of the International Geographical Union Working Group in Industrial Location.

'Co-op ed' coming to campus

Penn State has officially joined the ranks of the more than 900 colleges and universities currently involved in "co-op ed."

A Cooperative Education Office has been set up in 426 Boucke Bldg., with funds from a $35,000 grant provided by the Department of Health, Education and Welfare. Project director is Donald E. Evans, instructor in vocational education.

Cooperative education began at the University of Cincinnati in 1906, but it is only within the last six years that the idea has really taken off. In a co-op ed program, colleges and universities develop curricula with employers to alternate classroom study and on-the-job training. At present, there are several on-going co-op ed offerings in departmental programs at the University.

According to Evans, co-op ed has four components. It must be a wage-earning experience; it is supervised; students are part of an organized educational experience; and it is advantageous if they receive credit and grades for their periods of off-campus learning.

"Our objectives at Penn State," Evans says, "are first to survey students, faculty and employers to determine their level of interest in cooperative education. We will also try to develop a communications network to increase contacts between students, employers and academic units interested in participating in co-op ed offerings. We particularly hope to involve Penn State alumni who might be willing to provide jobs for our students.

"Another part of our charge is to help any interested Colleges or departments to initiate co-op ed within their academic program and to expand and improve ongoing cooperative education offerings. Finally, we will maintain a resource center to increase awareness of the benefits of cooperative education."

Evans plans to set up an advisory committee with representatives from the student body, the faculty and prospective employers. He will also form a professional council composed of faculty members already involved in on-going co-op ed offerings at Penn State.

Persons interested in contacting Evans about the program should call 863-0225.

Nation needs more engineers, Dean says

Unless colleges and universities begin to graduate a lot more engineers, the United States can't become "energy independent," predicts Dr. Nunzio J. Palladino, dean of the College of Engineering.

"For example, to meet current demands, universities should be graduating 35 to 50 percent more nuclear engineers than they are," says Dr. Palladino, who is himself a nuclear engineer.

Dean Palladino commented on a recent study by the National Planning Association of the National Science Foundation, which concludes that if the United States is to reduce its dependence on foreign energy sources at anticipated levels, the employment of engineers in the domestic energy industry may have to double within the next decade.

The biggest increase in demand for engineers by 1985, according to Dean Palladino, will be in the fields of nuclear and mining engineering, followed by electrical, chemical and mechanical engineering.

The National Planning Association report says that 141,000 engineers and scientists were employed in the seven major energy-related industries* in 1970, and by 1985 this total is expected to reach 307,000. The projections indicate that the demand for engineers will be greater than for scientists due to changing technologies in several of the industries under study. These industries are increasing their research and development activities substantially over the 15-year period.

Dean Palladino notes, too, that significant increases in the demand for agricultural engineers will become evident in the next several years to meet the technological challenges of growing, harvesting, processing, preserving and distributing food to feed a growing world population.

*The seven major energy-related industries are: electrical generation; petroleum and natural gas extraction and petroleum refining; natural gas production, transmission, and distribution; coal mining; nuclear power production and radioactive waste disposal; manufacturing of selected durable equipment for electrical companies; and energy-related construction.

Arts roundup

(Continued from page 3)

the September Festival of American Film in Deauville, France, will be shown with other department films at 8 p.m., Thursday, Oct. 23, in the 112 Kern assembly room. The public is welcome to attend these free screenings, sponsored by the Department of Theatre and Film.

Savelli's work displayed

Work by Angelo Savelli, visiting professor of art and fellow of the Institute for the Arts and Humanistic Studies, will be featured in "Savelli at Penn State," a one-man show opening with a public reception at 7.30 p.m. Monday, Oct. 20, in Zoller Gallery. The show continues through Oct. 30. Well known in the United States and Europe, Savelli was born in Italy and moved to this country in 1950. In 1960, he established the painting program at the School of Fine Arts of the University of Pennsylvania. Credited with pioneering the development of white relief lithography, he was in the late 1960s one of the first to use rope in his compositions, and he contributed to the development of the shaped canvas.

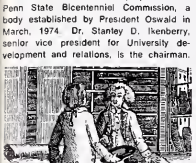
Musica da Camera to play

Musica da Camera, University chamber orchestra, will present its annual concert introducing new members for the academic year at 8:30 p.m. Wednesday, Oct. 22, in the Music Bldg. recital hall. Works by Bach, Haydn, Pachelbel and Bloch will be performed by the orchestra, founded and directed by Dr. D. Douglas Miller, associate professor of music. "Brandenburg, No. 4" by Bach, one of six works each featuring a different combination of instruments, will be performed. The fourth concerto emphasizes two flutes, to be played by Overda Page, music instructor, and Steven Robbins, graduate student in flute, and a violin, played by graduate student Davis Brooks. Haydn's "Farewell Symphony," in which the final movement is marked by a physical reduction of musical forces, Pachelbel's "Canon," a work for strings with a reiterating harmonic pattern, and "Concerto Grosso" by Swiss-American composer Ernest Bloch have also been selected for performance.

WPSX highlights

Acclaimed animated films from around the world are featured on **International Animation Festival,** a weekly half-hour series premiering Saturday, Oct. 18, at 11 p.m. Included on the first program are "Inauguration," a Czechoslovakian film about a ribbon-cutting ceremony that goes awry; "Second Class Passenger" from Yugoslavia; and "Evolution," a comic version of the creation from Canada.

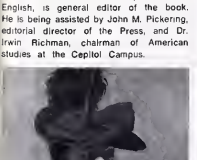
One of the last great comedies of the silent era, "The General" starring Buster Keaton, is featured on **The Silent Years** Sunday, Oct. 19, at 10 p.m. Made in 1927, this spoof on Civil War espionage was staged on a scale customarily found only in epics. It includes huge battle scenes interspersed with sequences of Keaton's pantomime. Keaton also directed the film.



Biofeedback is the subject of **The Behavioral Revolution** Tuesday, Oct. 21, at 9:30 p.m. Dr. Robert M. Stern, a Penn State psychologist and nationally recognized biofeedback expert, discusses several applications of biofeedback in experimental settings.

Ralph Richardson, Tom Courtenay and Juliet Mills star in Oliver Goldsmith's "She Stoops to Conquer" Thursday, Oct. 23, at 9 p.m. on **Classic Theatre — The Humanities in Drama.** The two-hour BBC production is accompanied by a preview with cast member Trevor Peacock and William Appleton of Columbia at 8:30 p.m.

Four major projects set for the Bicentennial year celebration



The Bicentennial celebration at the University, which includes numerous projects sponsored by colleges and departments, will be highlighted by four major productions: "Pennsylvania 1776," a commemorative book about Pennsylvania life 200 years ago; "Portraits USA:1776-1976," a special exhibit of outstanding paintings by 60 American artists; "Freedom, Then, Now and Tomorrow," a statewide program of town meetings and lectures on the historical significance and changing nature of freedoms; and "Be Glad Then, America," a work for orchestra and chorus commissioned from Pulitzer Prize-winning composer John LaMontaine.

These events are official projects of the Penn State Bicentennial Commission, a body established by President Oswald in March, 1974. Dr. Stanley D. Ikenberry, senior vice president for University development and relations, is the chairman.

18th century woodcut from "Pennsylvania 1776" shows shopkeeper of the period.

"Pennsylvania 1776," to be published by the University Press later this year, features pictures and little known facts about Pennsylvania at the time when the Declaration of Independence was being framed. There are vignettes on subjects ranging from the location of taverns and iron making plantations to fashion, agriculture, politics and journalism. The volume draws on the specialized knowledge of Penn State faculty and incorporates 18th century illustrations with the text. Dr. Robert A. Secor, associate professor of English, is general editor of the book. He is being assisted by John M. Pickering, editorial director of the Press, and Dr. Irwin Richman, chairman of American studies at the Capitol Campus.

"Lydia Field Emmet" by William Merritt Chase will grace Portraits show.

For the show, "Portraits USA/1776-1976," Dr. Harold Dickson, professor emeritus of art history, has gathered works which he says make up the most impressive loan show of American paintings ever held at the University.

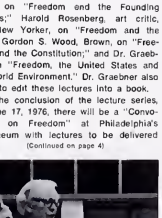
The 60 works, each of museum caliber, will be assembled at the Museum of Art April 18-June 16. Dr. Dickson has prepared a full-color catalog to accompany the show, and he is excited about the selections. Probably his favorite painting is Ralph Earl's "Chief Justice Oliver Ellsworth and Wife." "No great American painting is more richly imbued with the spirit of the nation aborning," comments Dr. Dickson, who tried very hard to encompass the dates in the show's title. The earliest work is John Trumbull's self-portrait from 1777; the latest is a portrait by Andy Warhol of his mother.

Town meetings just might not be as out of date as many people think. The "Freedom: Then, Now, and Tomorrow" project is designed to bring this concept back to Pennsylvania through meetings in communities, large and small. From January through July, communities will host discussions on such topics as civil and economic rights, freedom as it relates to the environment, and political systems.

The program is being conducted as a continuing education project of the Department of History, with the cooperation of other colleges and universities in the State, the Pennsylvania Federation of Women's Clubs and Ag Extension. Discussion leaders for the meetings will be drawn from faculty at Commonwealth Campuses and other Pennsylvania schools.

Directing the project is Dr. Norman A. Graebner, who is spending this year at the University as a distinguished visiting professor of history on leave from his post as Edward R. Stettinius professor of history at the University of Virginia. Dr. Graebner points out that one of the major features of the project is a series of public lectures to be delivered throughout Pennsylvania by nationally prominent scholars.

Speakers include Henry J. Abraham, University of Virginia, on "Freedom and Law;" Thomas C. Cochran, University of Pennsylvania emeritus, on "Freedom and the Economy;" Barry Commoner, Washington University, on "Freedom and the Environment;" Paul K. Conkin, University of Wisconsin, on "Freedom and the First Principles of American Government;" Don E. Fehrenbacher, Stanford University, on "Lincoln, Freedom and the American Civil War;" Victor Ferkiss, Georgetown Univer-



Dr. Graebner

sity, on "Creating Chosen Futures: The New Meaning of Freedom in America's Third Century."

Also: Dante Germino, Virginia, on "Freedom and the Moral Order;" Pauline Maier, Harvard, on "Freedom and the Declaration of Independence," Hans J. Morgenthau, University of Chicago emeritus, on "Freedom and the Future of Government in America," Robert K. Murray, Penn State, on "Freedom and the American Constitutional System;" Merrill D. Peterson, Virginia, on "Freedom and the Founding Fathers;" Harold Rosenberg, art critic, The New Yorker, on "Freedom and the Arts;" Gordon S. Wood, Brown, on "Freedom and the Constitution;" and Dr. Graebner on "Freedom, the United States and the World Environment." Dr. Graebner also plans to edit these lectures into a book.

At the conclusion of the lecture series, on June 17, 1976, there will be a "Convocation on Freedom" at Philadelphia's Atheneeum with lectures to be delivered

Volume 5, Number 8 October 23, 1975

News in brief

Fall enrollment up

Fall term enrollment of resident instruction students totals 52,976, with 31,583 at University Park. The increases over the final figures for last fall are 1,907 for all locations and 348 for University Park.

Other totals reported for the 1975 fall term are 16,699 at the Commonwealth Campuses, an increase of 1,338, 1,644 at Behrend College at Erie, a gain of 75; 451 at the Hershey Medical Center, an increase of 46; 2,385 at Capitol Campus, Middletown, a gain of 128 students; and 214 at King of Prussia Graduate Center, which reflects a decrease of 28 students.

Associate degree students total 3,887, a 379 increase over a year ago; baccalaureate degree candidates, 39,120, a gain of 1,354, graduate and medical students, 6,862, a 257 increase; and adjunct students, 3,107, a decrease of 83 from last fall.

GSA sponsors kids' party

The second annual Graduate Student Association Halloween Party will be held from 6 to 8:30 p.m. Tuesday, Oct. 28, in the Graduate Commons of Kern Bldg. The party is open to all children, ages two to twelve, of Penn State graduate students, faculty and staff. It is sponsored by the GSA Kids and Kouples Committee with the assistance of various local merchants, interested students, faculty and staff. Featured will be the Nittany Lion, Pappy's Pizza Man and an array of Halloween characters, including a magician, fortune teller, puppeteer, Halloween Santa and a talking pumpkin. Also on the agenda are a haunted hour, children's stories, apple bobbing, pumpkin carving, assorted games and a costume parade. Prizes will be awarded for the most original, funniest, prettiest, and ugliest costumes. Admittance to children will be by costume only.

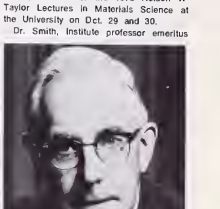
Occupation tax time again

As it did last year, the University will withhold the Occupational Privilege Tax of $10 from all employees at University Park who are liable for the tax. The University will be able to obtain a two percent discount for prompt payment, and it will pass this savings on to each employee. For faculty and staff who are paid on a monthly basis, the tax of $9.80 will be withheld from pay checks dated Nov. 28. For all other employees — technical service, graduate assistants and wage — the deduction appears on the Nov. 21 pay checks. Any employee wishing to appeal his or her liability for this tax should apply directly to Paul D. Bender, Tax Collector, 250 E. Beaver Ave., State College. Department heads are asked to make certain that their personnel are aware of the tax.

Creative dance offered

Creative dance for children of University faculty, staff and townspeople will be offered by the College of Health, Physical Education and Recreation in White Bldg., under the direction of Patricia Heigel-Tenner, assistant professor of dance. Classes will meet Saturday mornings from 9:30 to 10:30 a.m., beginning Oct. 25 and continuing through Nov. 8. Children from first through fourth grade may attend, and enrollment will be limited to 30. Registration will take place Oct. 25 starting at 9 a.m. prior to class. No fee is involved.

Halloween Candlelight Dinner



The annual Halloween Candlelight Dinner at the HUB Terrace Room has been scheduled for Thursday, Oct. 30, from 5

(Continued on page 2)

Dr. Smith is Taylor lecturer

Dr. Cyril Stanley Smith, internationally known authority on the historical interaction of science, technology and art, and a member of the National Academy of Sciences, will deliver the 1975 Nelson W. Taylor Lectures in Materials Science at the University on Oct. 29 and 30.

Dr. Smith, Institute professor emeritus

Dr. Smith

at Massachusetts Institute of Technology, will speak on "Aesthetic Curiosity as a Motive in the Discovery of Useful Materials and Techniques" at 4 p.m., Wednesday, Oct. 29, and on "The Historical Interaction between Technology and Pure Science" at 8 p.m. Thursday, Oct. 30. Both lectures will be in Room 112 Kern.

The Taylor Lectures honor the memory of the man who served as professor and head of the then Department of Ceramics at Penn State from 1933 to 1943. After his death in 1965, his widow established the Nelson W. Taylor Memorial Fund to provide for lectures by distinguished scientists.

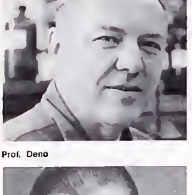
A native of England, Dr. Smith came to

(Continued on page 4)

Oswald named AAU President

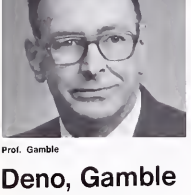
President John W. Oswald on Oct. 21 assumed the presidency of the Association of American Universities, comprising 48 of the leading universities in the country.

He succeeds Dr. G. Alexander Heard, chancellor of Vanderbilt University.



Dr. Oswald a year ago was elected vice president of the association and in that role served also on its Executive and Finance Committees. Dr. Kingman Brewster, president of Yale University, is the new AAU vice president.

Penn State in 1958 accepted the invitation to membership in the association, which recognizes outstanding graduate education and research programs. Twenty-four of the members are public institutions, and the other 24 are private universities. The association considers issues of common interest to the nation's major graduate and research universities. Among those currently under discussion are the financing of universities, support of research and graduate studies, quality of classroom teaching, equality of access to higher education and policies related to government support of research.



Dr. Oswald is serving also as president of the Pennsylvania Association of Colleges and Universities, comprising the presidents of 117 public and private institutions of higher learning in the Commonwealth.

PENN STATE COLLECTION

Faculty notes

Prof. Deno

Prof. Gamble

Deno, Gamble mark 25 years

Marking 25 years with the University this fall are **Dr. Norman C. Deno,** professor of chemistry, and **Edwin W. Gamble Jr.,** assistant professor of music.

Dr. Deno received his bachelor of science degree from the University of Illinois and master of science and doctor of philosophy degrees from the University of Michigan. He also held a post doctoral fellowship at Ohio State University before joining the faculty at Penn State.

An organic chemist, Dr. Deno's current research interests include the chemistry of oxygen and nitrogen cation radicals, the chemistry of reactants held under mechanical constraint, enzyme mimetic reactions; free radical chemistry in strongly acidic media and selective functionalization of alkane chains, including those on steroids, fats and fatty acids.

During his tenure at the University, Dr. Deno has supervised the research of 15 master's degree and 36 doctoral candidates and has published more than 90 scientific papers.

He teaches both introductory chemistry courses and advanced courses in organic chemistry and in 1963 was the recipient of the Lindback Award for Distinguished Teaching.

A native of Pittsburgh, Prof. Gamble received his B.S. in music education from Indiana University of Pennsylvania and taught instrumental music briefly at Beaver Falls Junior High School before serving in Africa and Italy during World War II as a medic in the U.S. Army.

While employed as a staff pianist-arranger at a local radio-tv station, he earned the B.Mus. degree at the Cincinnati College-Conservatory of Music, majoring in French horn under Gunther Schuller and studying conducting with Walter Herrman and Sir Eugene Goosens. His M.Mus. degree was granted at the School of Music, Indiana University at Bloomington, in composition, and while there he also completed the course work for the Ph.D. in music theory before coming to Penn State.

His compositions have been published by the Penn State Press and George Schirmer, Inc., and he was the composer of the orchestral sound track for the Penn State film, "The Painting of a True Fresco."

He is e member of Phi Mu Alpha Sinfonia, Chi Gamma Iota and Phi Delta Kappa.

Dr. Kenneth S. Clarke, professor and chairman of health education, has been elected to the board of directors of the National Safety Council. Dr. Clarke also has been appointed to the Council's governmental relations committee and executive committee for public safety.

Dr. Michael Kiernan, assistant professor of English, has been awarded a National Endowment for the Humanities Senior Research Fellowship for work at the Folger Shakespeare Library in Washington, D.C. during spring and summer terms. Dr. Kiernan is preparing a critical edition of the "Essays" of Francis Bacon and will draw upon the Folger Library's extensive collection of 17th-century manuscripts and printed works for a comprehensive Variorum commentary on the text of the "Essays."

Dr. Richard R. Nelson, Evan Pugh Professor of Plant Pathology, is one of six plant pathologists invited to take part in an international conference dealing with urgent research needs in crop productivity, being held Oct. 20 to 24 in Harbor Springs, Mich. The event is sponsored by the Agricultural Experiment Station at Michigan State University and the Charles F. Kettering Foundation. Dr. Nelson is part of a working group that will prepare a position paper on needs and priorities of world food problems. The conference is part of year-long ceremonies commemorating the 100th anniversary of the founding of the agricultural experiment stations at U.S. land-grant universities.

Dr. Lawrence B. Hendry, assistant professor of chemistry, presented invited lectures this month at the Monell Chemical Senses Center of the University of Pennsylvania and at the Symposium on the Coevolution of Plants and Insects at the Entomological Society of America (ESA) meeting in Philadelphia. He also presented two submitted papers at the ESA meeting on insect chemical messenger systems. The invited talks focused on research Dr. Hendry and his group have conducted on the effects of diet on insect reproduction and Hendry's theory that food plants may control sexual behavior in some insects.

Senate asks new Pass-Fail input

The University Faculty Senate is seeking additional faculty input on recommendations of its Ad Hoc Committee on Pass-Fail.

The Committee's report was introduced and discussed at the Oct. 14 Senate meeting and will be acted on at the Nov. 11 session.

Among its recommendations, the Committee proposes elimination of the current Pass-Fail and course repeat rules and substitution of an Academic Redemption Option.

Under the proposed option, all courses will be taken for a grade and all grades will be recorded on the transcript. In computing the grade point average, however, a student would be able to eliminate grades in courses totaling up to 18 credits.

A number of senators expressed opposition to the proposal during the meeting, with one noting that it would contribute to grade inflation.

Another senator, while agreeing with the principle of giving a second chance to students in academic difficulty, felt that the option would allow those not in academic trouble to achieve higher grade averages.

Arthur Lewis is chairman of the Ad Hoc Committee on Pass-Fail. Members are Donald Epp, George Franz, Evelyn Hovanac, Maria Rovito, William Rabinowitz and Elwood Wagner.

In other business, the Senate discussed proposals from the Subcommittee on Senate Membership which would redefine the criteria for determination of Senate electorate and membership.

The Subcommittee recommended that faculty members who hold research ranks be included in the Senate electorate and that the director of the Division of Undergraduate Studies be an ex-officio member of the Senate. Action on the recommendations is to be taken Nov 11.

The Senate also...

—Heard a report from President John W. Oswald on implementation of recommendations on faculty participation in University governance.

—Discussed the grading system at the Milton S. Hershey Medical Center and postponed action on proposals until the Nov. 11 meeting.

—Returned to committee a proposed policy on corrected grades.

Two paintings by the late Edwin W. Zoller, professor emeritus of art, have been presented to the Earth and Mineral Sciences Museum by the artist's widow, Lucille. Carol A. Fee, Material Sciences secretary, admires "American Cathedral Group — Glass Plant," left, and "Gallizen Mine #3."

News in brief

(Continued from page 1)

to 7:15 p.m. Featured on the menu this year are prime ribs with horseradish sauce, roast turkey and cornbread dressing, sweet and sour ribs, seafood newburg and beef bird with bacon. There will be the usual array of salads and desserts, along with plenty of pumpkin pie. Bonuses include a hospitality table and musical entertainment from Phi Mu Alpha fraternity.

International dinner

The International Council will sponsor an International Dinner at 6:30 p.m. Sunday, Oct. 26, in Room 102 Kern Bldg. The menu includes Chinese egg rolls; Latin American empanadas; Malaysian chicken curry; Philippine pork adobo; simmered beef tranian style; fried rice Palestinian style; paatpuck, a Thai dish of broccoli and beef; alu-kola, Indian chickpeas with tomato sauce; fried plantains from Ghana; and harifa, a Jordanian dessert. Entertainment featuring Chinese and Thai dancers and Philippine, Latin American and Indian music will follow in Room 112 Kern. All this for only $6 a person, with tickets available at the International Center, Kern.

Folk dance workshop

Gretel Dunsing, internationally known folk dance teacher, will present a special workshop Tuesday, Oct. 27, at 7 p.m. in Room 108 White Bldg. She is being sponsored by the College of Health, Physical Education and Recreation. A native of Germany, Mrs. Dunsing is primarily known for her expertise in German, Swiss and other West European dances. In charge of the workshop are Elizabeth Hanley, assistant professor of student recreation, and Harold White, associate professor of health, physical education and recreation, who also conduct the popular Folk and Square Dance "Roundups."

Free film

A free children's film festival and discussion group will be presented by the Free University Saturday, Nov. 1. "The Neighbors" and "The Toymaker" will be shown at 1 and 3 p.m. at the Wesley Foundation, 256 E. College Ave.

Advisory committees reviewed

A review of committees advisory to a member of the central administrative staff has been completed and the committees have been identified to enable the President and his staff to work more closely with the University Faculty Senate.

The review was undertaken in accordance with a recommendation from the Joint Senate Administrative Committee on Faculty Participation in University Governance issued in May, 1974.

The committee recommended that the President and his staff work jointly with the Senate to reassess the composition and function of all advisory and consultive groups in such a manner as to assure that faculty participation in such organizations is channeled, as appropriate, through the Senate or its committees.

In listing the committees, President John W. Oswald said that the review concentrated on identifying those committees designed to obtain representative University-wide faculty inputs and those on which faculty are asked to serve because of their professional expertise in the subject under consideration.

Twenty-eight committees were identified as properly having linkage to the University Faculty Senate, either through the Senate providing nominations from which the responsible administrative officer appoints representatives, or through the ex-officio membership of Senate officers or Senate committee chairpersons. They are:

Russell E. Larson, Provost

Academic Staff Discrimination Review Committee

Advisory Committee on Affirmative Action Program

Advisory Committee on Naming Facilities

Proposal Evaluation Committee

Sebbatical Leaves Committee

University Council

Stanley O. Ikenberry, Senior Vice-President for University Development and Relations

Health Education Planning Committee

Penn State Middle States Accreditation Committee

Richard G. Cunningham, Vice-President for Research and Graduate Studies

Advisory Committee for the Institute for Arts and Humanistic Studies.

Computation Center Advisory Committee

Advisory Committee to Energy Programs Coordinator

Environmental Policy Center Advisory Board

Advisory Committee to the Materials Research Laboratory

Advisory Committee to the Pennsylvania Transportation Institute

Advisory Committee to the Institute for Research on Land and Water Resources

Space Science and Engineering Laboratory Advisory Committee

University Press Committee

Robert E. Dunham, Vice-President for Undergraduate Studies

Advisory Committee to the Developmental Year Program

Administrative Advisory Committee on Foreign Studies

Committee on Proficiency and Placement Testing and Credit by Examination

Raymond O. Murphy, Vice-President for Student Affairs

Associated Student Activities Budget Committee

Career Development and Placement Liaison Committee

University Discipline System Policy Committee

Student Organization Appeals Board

University Appeals Board

Robert G. Quinn, Dean of Academic Instruction for Commonwealth Campuses

Commonwealth Campus Faculty Advisory Committee

Ralph E. Zilly, Vice President for Business

Environmental Quality Board

Faculty Staff Parking Appeals Committee

University Park Calendar

Oct. 23 — Nov. 2

Items to be included in this calendar should be sent to the editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, Oct. 23
Commons Videotape, "Wolf Trap," 12 noon, Kern lobby.
FSHA 410 dinner, a traditional Missouri farm "Feast," 5:30 p.m., Maple Room, Human Development. Reservations required, 865-7441.

Friday, Oct. 24
Noontime Concert, Phi Mu Alpha "Dixieland Band," 12:30 p.m., Kern lobby.
Sports. Women's Field Hockey, vs. Millersville, 2 p.m., Pollock Field. Soccer, vs Navy, 7 p.m., Jeffrey Field.
Folk and Square Dance Roundup, 7:30 p.m., north gym, Whlte.
United Campus Ministry U.N. Day program, 8 p.m., HUB assembly room.
GSA's Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Penn State Brass Chorale and Penn State Wind Ensemble, 8.30 p.m., Music Bldg. recital hall.
Artists, Isme Cronyn and Jessica Tandy in "The Many Faces of Love," 8:30 p.m., Schwab.

Saturday, Oct. 25
Sports: Football, vs. Army, 1:30 p.m., Beaver Stadium.
Reception opening 200 Years of Royal Copenhagen Porcelain show, 3-5 p.m., Museum of Art.

Sunday, Oct. 26
Chapel Service. 11 a.m., Eisenhower Chapel. Dr. James Whiteside, team physician. Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Elder Joseph L. Gavlington, pastor, Pittsburgh.
Improvisational Theatre, 1 p.m., Room 101 Kern.
Open House at new Intramural Bldg., 2-4 p.m.
Coleen Bidelspach, soprano recital, 3:30 p.m., Music Bldg. recital hall.
International Dinner, 6:30 p.m., Rooms 102 and 104 Kern; after dinner entertainment, Room 112 Kern. Sponsored by the International Council.

Tuesday, Oct. 28
Gallery talk, William Hull, Museum director, on "200 Years of Royal Copenhagen Porcelain," 10:30 a.m., Museum of Art.
Sports: Women's Field Hockey, vs. East Stroudsburg, 3 p.m.
Kids' Halloween Party for children of PSU personnel, faculty and graduate students, 6-8:30 p.m., first floor of Kern. Sponsored by GSA Kids and Koupies Committee and the Graduate Commons
Folk dance workshop with Gretel Dunsing, 7 p.m., Room 108 White. Sponsored by the College of Health, Physical Education and Recreation.

Wednesday, Oct. 29
Noontime Concert, 12 15 p.m., Kern lobby
PSOC Ski Clinic, 7 p.m., HUB ballroom.
Alard String Quartet, 8.30 p.m., Music Bldg. recital hall.

Thursday, Oct. 30
Commons Videotape, 12 noon, Kern lobby.
University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.

Friday, Oct. 31
GSA's Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.
Peter Bye, cello recital, 8:30 p.m., Music Bldg. recital hall.

Saturday, Nov. 1
Sports: Men's Cross Country, PIAA Championships. Men's Central Collegiate Championships.
University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.

Sunday, Nov. 2
PSOC Hiking Club, exploration in Big Kettle and Black Ridge Area of Rothrock State Forest, 9 a.m.
Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Joseph Faulkner, sociology.
Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Elder Gerald G. Loyd, pastor, Black Christian Fellowship.
Orchesis fall concert, "Dance Creations '75," 2:30 and 8 p.m., White Hall Dance Theatre.
Claremont Woodwind Quintet, 8:30 p.m., Music Bldg. recital hall.

Seminars

Thursday, Oct. 23
Agronomy, 8:15 a.m., Room 301A Ag. Admin. Dr. Gary Pick Cornell University, on "Development and Application of an Alfalfa Simulation Model."
Chemistry, 12:45 p.m., Room 333 Whitmore. Bert L. Vallee, Harvard Medical School, on "Confirmation and Function of Carboxypeptidase."
Microbiology and Cell Biology, 3.55 p.m., Room S2 Frear. Dr. Martin S. Hirsch, Infectious Disease Unit, Massachusetts General Hospital, on "Immunological Activation of Endogenous Viruses."
Philosophy, 4 p.m., Room 151 W."ard, Dr. Dudley W. Verene on "The Science of Imaginative Universals and the Philosophy of Symbolic Forms."
Engineering Acoustics, 4 p.m., Room 73 Willard. Robert L. Cohen, grad. asst., Garfield Water Tunnel, on "Digital Holography with Applications to Acoustics."
Meteorology, 4 p.m., Room 26 Mineral Sciences. William O'Connor, grad. student, on "Stream Function Representation for Quasi-Geostrophic Flow in a Differentially Heated, Rotating Annulus."
Anthropology, 3:30 p.m., Room 107 Social Science Bldg. James W. Hatch and Dr. Bennett Dyke on "Ceramic Life Tables: The Archaeological Assumptions with Demographic Methods."
Computer Science, 4 p.m., Room 325 Whitmore. Dr. Jack Heller, SUNY, on "The Griphos Management Information System."
Economics, 3 p.m., Room 101 Kern. Dr. Philip Klein, on "Business Cycles at Home and Abroad."
Mathematics, 4 p.m., Room 102 McAllister. Karel Prikry, University of Minnesota, on "Some Consequences of the Real Valued Measurability of the Continuum."

Friday, Oct. 24
Recreation, 2:30 p.m., Room 101 Kern. Ray Miller, Red Cross National Headquarters, on "Role of Red Cross Program in Recreation and Parks."

Monday, Oct. 27
Biochemistry, 11:10 a.m., Room 101 Althouse. Dr. W. Bardin, Department of Medicine, Hershey, on "The Use of Genetic Mutants to Study the Mechanism of Androgen Action in the Mouse."
Genetics, 3:55 p.m., Room 111 Tyson. Dr. Stephen Fahnstock on "Biochemistry of Gene Expression: The Ribosome."
Entomology, 4 p.m., Room 204 Patterson. Gene A. Jowyk, grad. student, on "Regulation of Growth, Development and Protein Synthesis of the Parasitoid, Hyposoter exiguae' by the Cebbage Looper Trichoplusia ni," and James Sprowls, grad. student, on "Mosquito Survey Results in the Toftrees-State Gameland Drainage Area of Patton Township, Centre County."
Computation Center, 7:30 p.m., Room 105 Osmond. "Introduction to the JCL Computation Center (1)."

Tuesday, Oct. 28
Ceramic Science, 9:35 a.m., Room 301 Mineral Industries Dr. C. Greskovich, General Electric, on "Sintering Convalent Solids."
Plant Pathology, 9:45 a.m., Room 213 Buckhout. Thomas Starkey on "Influence of Light on Plants Exposed to PAN."
ARL, 10:45 a.m., Eric A Walker Conference Room, Applied Science. F. P. Fenlon on "Potential of Nonlinear Acoustics for Directive Underwater Transmission and Reception."
Electrical Engineering, 11 a.m., Room 208 Hammond. Dr. Joseph Clarkson, University of Missouri, on "Metal-Insulator-Semi Conductor Solar Cells."
Solid State Physics, 11 a.m., Room 339 Davey. Dr. Laura Roth, SUNY at Albany, on "Effective-Medium Theory for Disordered Systems."
Biochemistry, 11:10 a.m., Room 101 Althouse. Dr. W. Bardin, Department of Medicine, Hershey, on "Species Differences in the Progesterone Receptor—a Tool for the Understanding of Hormone Action."
Comp Lit Luncheon, 12:45 p.m., Presidential Room, Hotel State College. Don Yoder, University of Pennsylvania, on "Pennsylvenia German Illustrated Manuscripts."
Solid State Physics, 1 p.m., Room 339 Davey. Dr. Lawrence Bonczar, geophysics, on "The Theory of the Temperature Dependence of 2' Order Elastic Constants of Alkali-Halides, and the Experimental Determination of the Elastic Properties of β-Eucryptite ($LiAlSiO_4$)."
Analytical Chemistry, 12:45 p.m., Room 333 Whitmore. J. D. Stutts on "Gas Enthalpimetry."
Air Pollution Control, 2:20 p.m., Room 140 Fenske. Robert A. Field, grad. asst. in nuclear magnetic and air pollution control, on "Particle Charging with a Radioactive Source and Electric and Magnetic Fields."
Physics Colloquium, 3:50 p.m., Room 319 Osmond. Dr. Laura Roth, SUNY at Albany, on "Liquid Metals."
Astronomy, 4 p.m., Room 445 Davey. Dr. T. K. Menon, National Radio Astronomy Observatory, Green Banks, W.Va., on "Extragactastic Sources."
Inorganic Chemistry, 8 p.m., Room 333 Whitmore. Various interests of Dr. Harry Allcock: high polymers, clathrate inclusion adducts and inorganic synthesis.

Wednesday, Oct. 29
Ecology, 3:55 p.m., Room 111 Life Sciences I. Dr. Warren Porter, biology, University of Wisconsin, on "Behavior in Animals as Defined or Set by the Environment."

Thursday, Oct. 30
Agronomy, 8:15 a.m., Room 301B Ag. Admin. Robert Kalmbacher, Ph.D. thesis, on "Establishmnt Practices for Birdsfoot Trefoil and K31 Tall Fescue in Forest Clearings."
Two Cultures Dialogue, noon, Room 189 Materials Research Lab. Dr. Cyril Stanley Smith, M.I.T., on "Aesthetics and Technology."
Chemistry, 12.45 p.m., Room 333 Whitmore Henry F. Schaefer III, University of California, Berkeley, on "Potential Energy Surfaces for Simple Organic Reactions."
Economics, 3 p.m., Room 101 Kern. Dr. Teh-wei Hu on "Health Care in the Peoples Republic of China. An Economist's First-Hand Observation."
Microbiology and Cell Biology, 3:55 p.m., Room S2 Frear. Dr. Dieter Soll, Yale University, on "Studies on tRNA end Aminoacyl-tRNA Synthetases."
Computer Science, 4 p.m., Room 325 Whitmore. Dr. Jack Heller, SUNY, on "The Griphos Management Information System."
Mathematics, 4 p.m., Room 102 McAllister. W. Zetasko, Polish Academy of Science, "On Maximal Ideals in m-Convex Algebras."
Computation Center, 7:30 p.m., Room 105 Osmond. "Introduction to the JCL Computation Center (2)."

Friday, Oct. 31
Physics Colloqulum, 3:50 p.m., Room 117 Osmond. Dr. S. Deser, Brendels University, on "Quantum Theory of General Relativity."

University Schedule

Monday, Oct. 27-Friday, Oct. 31
Sign for Winter Term NDSL, SEOG, BEOG, and University Long Term Loans, Room 108 Shields.

Lectures

Thursday, Oct. 23
Professor Daniel Dishon, Tel Aviv University, on "The Interim Agreement: A Stage of Development in the Arab-Israeli Conflict," 8 p.m., Room 112 Kern. Sponsored by the Middle East Studies Committee.

Wednesday-Thursday, Oct. 29-30
Nelson W. Taylor Lectures in Materiels Science. Dr. Cyril Stanley Smith, member of the National Academy of Sciences, professor emeritus at M.I.T., on "Aesthetic Cuhosity es e Motive in the Discovery of Useful Meteriels and Techniques," 4 p.m., Wednesday; on "The Historical Interection between Technology and Pure Science," 8 p.m., Thursday. Both lectures in Room 112 Kern.

Saturday, Nov. 1
Francis Reid, lighting designer, on "The Role of Stage Lighting." 3 p.m. Playhouse Theatre.

Films

Thursday, Oct. 23
"Xala," African film, 7:15 p.m., Watnut Bldg. assembly room. Sponsored by Black Studies, French Department and Cultural Center.
"Run with Me," written, produced end directed by Christian Stoinovich, instructor of theatre and film, 8 p.m., HUB assembly room, along with other films sponsored by the Dept. of Theatre and Film.

Friday-Saturday, Oct. 24-25
"The Mack" and "The Telltale Heart," 7 and 9:30 p.m., Weinut Bldg. assembly room.

Saturday, Oct. 25
International Council film, "Pretidwandi" (Adversary), 8 p.m., Room 112 Kern.

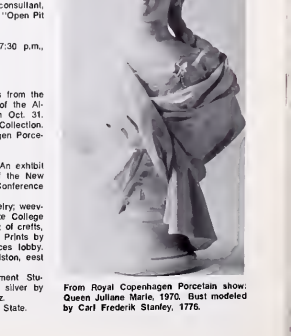
Monday, Oct. 27
France Cineme, "Alphaville," 7 and 9 p.m., Room 112 Kern.

Wednesday, Oct. 29
GSA Commonsplace Theatre, "Junior Bonner," 7:20 and 9:30 p.m., Room 112 Kern.

Meetings

Thursday, Oct. 23
Academic Assembly, 7 p.m., HUB reading room. Pass/Fail and academic redemption option with Dean Lewis end Pass/Fail Committee of the University Senate.
Society of Engineering Science, 7:30 p.m., Room 201-C Hammond. Dr. L. A. Carpenter, Ionosphere Research Leb., on "Exploration in Space Research."
East Aslen Studies Society, 7:30 p.m., Room 207 Sackett.

Monday, Oct. 27
Panhellenic Council, 6:30 p.m., Wolf Hall.
PSU Society of Student Social Workers, 6:30 p.m., Room 220 Boucke.
Education Student Council, 7 p.m., Room 109 Chambers.



Tuesday, Oct. 28
Senate Council, 2 p.m., Room 101 Kern.
College of Liberal Arts faculty, 3.45 p.m., Room 121 Sparks.
Tau Beta Pi, engineering honorery, 7 p.m., Room 212 Hammond. Tutoring session.
ARHS, 7 p.m., Room 207 Business Admin.
French Club, 7 p.m., Room 124 Sparks. Slide show, "Traveling through France."

Wednesday, Oct. 29
AWS, 7 p.m., Room 225 HUB.
Penn State Mining Engineering Society, 7:30 p.m., Room 26 Mineral Sciences. Bruce A. Kennedy, mining consultant. Golder Associates, Seattle, on "Open Pit Planning and Slope Stability."

Sunday, Nov. 2
Interlandia Folk Dance Club, 7:30 p.m., south gym, White.

Exhibits

Museum of Art: Panel Paintings from the Samuel H. Kress Collection of the Allentown Art Museum, through Oct. 31. Drawings from the Permanent Collection. 200 Years of Royal Copenhagen Porcelain, opening Oct. 26.
HUB Gallery: U.N. Exhibit.
Cultural Center, Walnut Bldg.: An exhibit of mixed media, the work of the New York Chapter of the National Conference of Artists.
Pattee Library: Fine leather jewelry; weavings and spinnings from State College guild, through Oct. 27; exhibit of crafts, opening Oct. 28, main lobby. Prints by Mary Hamilton, lending services lobby. Drawings by Dr. Paul Edmondston, east corridor lobby.
Chambers Gallery: Art Department Student Group Show. Gold and silver by students of SUNY at New Paltz.
Zoller Gallery: Sevelli et Penn State.

From Royal Copenhagen Porcelain show: Queen Juliane Marie, 1970. Bust modeled by Carl Frederik Stanley, 1775.

Arts roundup

Porcelain exhibit opens

An exhibition of porcelain, stoneware and faience pieces from the historical and contemporary collections of the Royal Copenhagen Manufactury, Ltd., Denmark, will open with a public reception from 3 to 5 p.m, Saturday, Oct. 25, in the Museum of Art. The exhibition, circulated by the Smithsonian Institution Traveling Exhibition Service under the patronage of the Ambassador of Denmark, Eyvind Bartels, will be the subject of a gallery talk by William Hulf, Museum director, at 10:30 a.m. Tuesday, Oct. 28, in the Museum, sponsored by the Friends of the Museum. The exhibit features the full range of products of the Royal Copenhagen factory, founded in 1775 and best known in America for its faithful blue and white patterns found on dinnerwares and the annual Christmas plate. Dinnerware, porcelain figures and commemorative and unique art objects are included in the exhibit. Many items are included from the factory's first years, as well as 19th century designs by Arnold Krog, and 20th century works by Patrick Nordstrom, Nils Thorsson and contemporary designers Bodil Buch and Anne Marie Trolle. Examples of the "Flora Danica" service, first commissioned by King Christian VII in 1803 and still produced today copied from the original engravings in the botanical work, will be shown, along with samples of underglaze painting, for which the Royal Copenhagen Manufactory is especially known, showing the decorative styles popular in the latter part of the 19th century. The commemorative plates include a 1908 Christmas plate, and unique stoneware creations show the work of contemporary artists in media produced by the factory. The exhibition will continue on view through Nov 30.

Reid to speak

Francis Reid, British stage lighting designer and consultant and editor of TABS, magazine of theatre lighting, will be in residance at the University Oct. 24 to Nov. 7 under the sponsorship of the Institute for the Arts and Humanistic Studies. Reid will present a public lecture on Saturday, Nov. 1, at 3 p.m. in the Playhouse Theatre. His talk will deal with various aspects of his experience in lighting for the professional theatre. While on the campus, he will be engaged in a number of lectures and discussions planned for theatre classes in stage lighting and design and will also study the University's Theatre Lighting Archives as background for an article on the collection to be published in TABS. Reid, who is vice-chairman of the Society of British Theatre Lighting Designers, has taught at the Canadian National Theatre School and now teaches lighting at the Royal Academy of Dramatic Art. He has had an extensive career as a lighting designer in many of the great theatres of Great Britain and Europe.

Brecht at Playhouse

Currently in rehearsal is the next fall season University Theatre production, "The Caucasian Chalk Circle" by Bertolt Brecht, with 8 p.m. performances scheduled for Oct. 30 and 31, Nov. 1 and Nov. 4 through 8. Author of such critically acclaimed works as "The Three Penny Opera," "Mother Courage" and "The Good Woman of Setzuan," Brecht wrote "The Caucasian Chalk Circle" in 1945. It was his last major work. Father of the epic theatre, his plays make use of pantomime, songs, dance, film projections, etc., all intended to keep the audience aware that they are in a theatre and not participating in real life and thus compel them to a critical rather than an emotional response.

Directing this production is Knox Fowler, professor of theatre arts, whose previous University Theatre productions include, "The Breasts of Tiresies," "The Wedding on the Eiffel Tower," "Twelfth Night," and for the Festival of American Theatre, "Wonderful Town." Designing the scenic elements of "Chalk Circle" is William Bloodgood, a graduate student in design. Lighting design will be provided by Cheries H. Firmin and the costume designs by Richard Hieronymus, both members of the faculty of the Department of Theatre and Film.

Tickets for "The Caucasian Chalk Circle" are on sale at the Playhouse box office. For telephone reservations call (814) 865-1884. The box office is open Monday through Saturday from 1 to 6 p.m. on non-performance days and from 1 to 9 p.m. on performance days.

Orchesis offers 7 works

With seven new dances headlining the program, the Orchesis Dance Company will once again present its fall concert, "Dance Creations '75" Sunday, Nov. 2, at 2:30 and 8 p.m. in the White Hall Dance Theatre. Under the artistic direction of Patricia Heigel-Tarnay, the dancers have been preparing since early fall. Each dance has been choreographed especially for this concert. Barbara Hayley has taken the methods of jazzdance and combined them with her own style in "Moods," using the music of composer Stanley Tarrentine. Also working in the jazz medium is Barbara Schutte with "Funkeebe!" This piece elaborates basic steps from today's dances. Exploring the sociological aspects of intra-familial ties is the concern of Rachelle T. Weinstein in "Three Sisters and a Farmhand," while "Encombment," a piece choreographed by Lynn Bock explores the search of one woman to find and identify herself. Choreographer Arlene Weiner dedicates "Because of Antonia" to the conductor, and Valerie Stover has choreographed "Gour Fantaisie" based on 16th century dance forms. Admission is $1 for the public, 50 cents for students, payable at the door.

Alard performs Oct. 29

Compositions by Beethoven and Brahms and a recently published quartet by Ruth Crawford Seeger will be performed by the Alard String Quartet in concert at 8:30 p.m. Wednesday, Oct. 29, in the Music Bldg. recital hall. Seeger, the first woman to receive a Guggenheim Fellowship, composed very actively in the 1930s prior to her marriage to Charles Seeger. After raising his children, including folk artist Pete Seeger, she returned to composing until her early death in 1951. Her "Quartet" is recognized as an important contemporary piece with elements of Schonberg's 12 tone system and Ives' rhythmic complexities, significantly pre-dating many modern works exploring similar elements. Beethoven's "Quartet in A Major," opus 18, number 5, and "Quintet in G Major," opus 11 by Brahms, will complete the program, with graduate student Paul Yarbrough, viola, joining the Quartet for the latter work. In recent weeks, Alard String Quartet members Joanne Zagst and Donald Hopkins, violins, Raymond Page, viola, and Leonard Feldman, cello, all associate professors of music, have appeared at the Rocky River Chamber Music Society, Cleveland, and Davidson College, Davidson, N.C.

Brass Chorale in concert

The Penn State Brass Chorale and members of the Penn State Symphonic Wind Ensemble will perform in joint concert at 8:30 p.m. Friday, Oct. 24, in the Music Bldg. recital hall. Flutists and clarinetists from the Wind Ensemble, directed by Smith Toulson, assistant professor of music, will be featured in works by Mozart and Debussy. Debussy's "Petite Suite," written in 1888 for four hands at a piano and arranged for clarinet choir by Russell Howland, will be performed by a choir of 11, including B flat, alto, bass and contra-bass clarinets. The arrangement, using much of Debussy's lyricism, is in three movements suggesting in the impressionistic manner atmospheres on a boat. A flute ensemble of ten with Steven Robbins, graduate student, as soloist, will perform avant garde composer Henry Brandt's "Devils and Angels," a piece employing the elements of harmony, counterpoint, style and sonority, according to the composer's description. Robbins, a graduate of the Juilliard School of Music, is in his first year of graduate study at the University.

The Penn State Brass Chorale, directed by James Benshoof, assistant professor of music, will perform the second portion of the program, including a prelude by Gregon arranged for the group by Ronald Renshaw, principal tuba player and a graduate student in conducting, and a fanfare by Reed. Also to be performed are Tyra's "Suite for Brass and Timpani" and Beversdorf's "Cathedral Music," a set for brass of short pieces with sacred titles.

Treteau to do "Phedre"

Racine's masterwork, "Phedre," will be the offering this year of Le Treteau de Paris Friday, Nov. 7, at 8 p.m. in Schwab Auditorium. The production, which is in French, is sponsored by the Department of French. The play's director is Michael Hermon who originally created this production in March, 1974, at the Theatre Nationale de l'Odeon in the framework of its Racine cycle. "This vision strikes out in astonishing scenes," a Parisian critic wrote. "The beautiful staging by Hermon is a staging for our times." Le Treteau makes an annual tour of America. It is sponsored by L'Association Francaise d'Action Artisiique, a branch of the French Foreign Ministry. Seats for "Phedre" are $2.75 apiece, and mail orders should be sent to Prof. Isabelle Armitage, Department of French, S-402 Burrowes Bldg. Tickets will be available after Oct. 31 at the HUB desk from 8 a.m. to 5 p.m. and at the door on the night of the performance.

"Xala" screening

"Xala," a feature-length film by Senegalese novelist and filmmaker Ousmane Sembene, will be shown Thursday, Oct. 23, at 7:15 p.m. in the Black Cultural Center in Walnut Bldg. A powerful attack on capitalism in contemporary West Africa, the film revolves around the difficulties of a wealthy African businessman who has just taken a third wife, only to discover on his wedding night that he has been struck by the xala, an exil spell which renders him impotent. "Xala" was shown earlier this month at the New York Film Festival and earned high praise from the New York Times' critics. The film is being presented in conjunction with French 458, African Literature of French Expression, and is open to the public.

WPSX highlights

A. Edward Simon, director of the Governor's Office of State Planning and Development, answers questions about his office's report on a land use policy program for Pennsylvania on **People, Places, Things, Now** Friday, Oct. 24, at 7:30 p.m. Simon is interviewed by series host John Roberts. Marcia Hunt of the League of Women Voters, and Bradford area journalist Craig Scott.

Richard Wiley, chairman of the Federal Communications Commission discusses the role of the FCC in public policy on **Firing Line** with William F. Buckley, Jr., Saturday, Oct. 25, at 7 p.m. Topics include the potential role of pay and cable television and their respective costs and the FCC's position on various communications issues.

The apartheid policy of South Africa is the subject of "The Last Grave at Dimbaza" on **The PBS Special of the Week** Monday, Oct. 27, at 8 p.m. The 90-minute program includes a documentary about the policy, which separates whites and blacks in South Africa, followed by a discussion hosted by journalist Elbert Newell.

Philip Denis, assistant professor of music at Penn State, performs two works by Ravel on **Impressions in Music** Tuesday, Oct. 28, at 10:40 p.m. The series, which features the music of three composers from the impressionist period, may also be seen Saturday, Oct. 25, at 6:40 p.m. It was designed to complement **Pioneers of Modern Painting**, a course being offered by the College of Arts and Architecture, which it follows.

The artifacts left by Aztec and Inca goldsmiths provide the focus for **The Tribal Eye** Wednesday Oct. 29, at 8 p.m. The hour-long program includes visits to major South American museums, interviews with Indians who still practice many of the old customs and a look at grave robbers who have discovered many of the gold pieces. Featured is film of an actual grave robbing incident.

Frank Finlay stars as Voltaire in a special television adaptation of the French satirist's "Candide" on **Classic Theatre: Humanities in Drama** Thursday, Oct. 30, at 9 p.m. Produced by the BBC, the program is described by its producer as a "television cartoon" which uses comic strip backgrounds and many visual effects to convey Voltaire's comic vision. **Classic Theatre Preview,** seen Tuesdays at 7:30 p.m. and Thursdays at 8:30 p.m, features program producer Cedric Messina and scholar Georges Mey of Yale University, as well as visual essays on Voltaire and his times.

Funding opportunities

(202-1) The Office of Education announces a Dec. 15 closing date for applications for **library training grants** for institutes, fellowships and trainerships (Ref. 45FR47531, 10/9/75) (CFDA 13.468)

(202-2) The National Science Foundation has issued its **"Official Program Plan for Support of Extramural Research — Through Sept. 1976."** Activities supported include research into technological innovations, analytical summaries of past and current research findings and analysis of policy options available to decisionmakers. The Program Plan consists of three sections each associated with technological innovation, understanding processes, measuring effects and analyzing policy problems. Terms for the deadline NEH (Ref. NSF Program Plan)

(202-3) The NEH Division of Education Program announces Jan. 1, April 1, and Oct. 1 as future deadline dates for its new **Consultants Program** for institutions seeking the advice and assistance of outside teachers, scholars and administrators to meet particular needs in humanities curricula. Grants may not exceed $4,000 and are limited to 20 working days for the deadline NEH program contact is 202-382-5891. (Ref. NEH Program Brochure)

Bicentennial projects

(Continued from page 1)

by Professors Maier, Wood and Peterson.

"Be Glad Then, America" is a LaMontaine musical dramatic entertainment, specially commissioned for the University choir by the Institute for the Arts and Humanistic Studies. The Pittsburgh Symphony is playing the orchestral score, and the artistic director and conductor is Sarah Caldwell, founder and director of the Opera Company of Boston and the first woman ever hired to conduct the Metropolitan Opera.

The composition will be performed at University Auditorium Feb. 6, 7, and 8.

The choir, which is divided into loyalists and rebels, will serve as the chief protagonist of the work, while a townscrier and George will carry the line of the proceedings, according to Raymond Brown director of the choir. Historical figures featured in the piece include Patrick Henry, Thomas Paine, and Samuel Adams.

Smith to speak

(Continued from page 1)

the United States in 1924, receiving his doctor of science degree from MIT in 1926. He holds honorary doctorates from Case Institute of Technology and the University of Pennsylvania and has received numerous special awards and medals.

He joined the metallurgical staff of the American Brass Co. in 1927, continuing there until 1942 when he went to Washington as research supervisor of the National Defense Research Committee. In 1943, he was named to the newly established Los Alamos Laboratory of the Manhattan District to take charge of the metallurgical aspect of designing and building the atomic bomb. He left Los Alamos in 1946 to found the Institute for the Study of Metals at the University of Chicago which, under his feadership, became one of the outstanding research organizations of the nation. His own research findings on the role of interfacial energy and topology in the structure of polycrystalline materials have become a part of the science of metallography.

In 1961, he returned to MIT as Institute professor with a joint appointment in metallurgy and the Humanities and Social science. There he founded the Laboratory for Research on Archaeological Materials

Staff vacancies

Staff vacancies contained in this publication are those which generally require at least a baccalaureate degree or equivalent as a minimum educational qualification. Non-staff vacancies requiring less than the baccalaureate degree and those requiring an advanced degree may be found in the Personnel Office Reporter.

This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-5777 (Network Line 475-1367). Applications for these staff vacancies will be received until 5 p.m. Thursday, Oct. 30. **Do not contact the area that has the vacancy.**

CLASSIFICATION ANALYST, PERSONNEL ADMINISTRATION — University Park

Responsible for assisting in the implementation of the wage and salary plans of the University. Gather information for the review of existing positions or the evaluation of new positions. Write job descriptions based on the compiled data. Bachelor's degree or equivalent, preferably in personnel administration or industrial engineering plus a minimum of two years administrative experience

PENN STATE intercom

Volume 5, Number 9 October 30, 1975

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

News in brief

Marine forms ready

Applications for the Marine Sciences Program offered by Penn State at Wallops, Virginia, during the spring term, 1976, are available now from the program director, Dr. A. Guber, in Room 309 Deike Bldg. Completed applications are to be returned to Dr. Guber at the beginning of the winter term. Students accepted for the program will be informed in January of their selection.

Calendar date due

Information is being collected now for the winter term calendar to appear in the Dec. 4 issue of INTERCOM. The deadline for receipt of such information is Nov. 20, and it should be sent to INTERCOM, 312 Old Main. The calendar is prepared for the University Park Campus, but a very limited number of events of unusual interest at other Campuses may be included. A general seminar calender will be published for departments with regularly scheduled programs. Copy need include only the day of the week, time and place. News of special events, including conferences of particular interest to faculty, is welcomed.

Sigma Xi talk

Dr. Thomas F. Bales, professor of minology, will present a public lecture, "The Land Grant University: Science Adviser to the Public," at 12:30 p.m. Thursday, Nov. 6, in Room 101 Kern Bldg. The talk is being sponsored by the Penn State Chapter of Sigma Xi. Dr. Bales has served as Science Adviser for the U.S. Department of the Interior and as a member of the Federal Council on Science and Technology. He is now a member of the Information Systems and Data Task Force of the Governor's Energy Council and is engaged in research in the area of science information transfer and dissemination. Arrangements have been made for those attending the lecture to go through the cafeteria line at Kern and take their trays to Room 101 for a luncheon at 12 noon.

New General Stores counter

General Stores' customers from departments at University Park or the Commonwealth Campuses will now be served from a new service counter located in the center of the loading dock.

Sky watches to begin

The Department of Astronomy and the Astronomy Club at the University will begin their third season of free, public sky watches from 8 to 10:30 p.m. Friday, Nov. 7, weather permitting. Begun in 1973 to help area residents get a glimpse of Comet Kohoutek, the program has been brought back each year by popular de-

(Continued on page 4)

Time to check hospital coverage

Faculty and staff members should periodically review the deduction which is taken from their paychecks for hospital coverage to be certain that they are paying for the correct coverage.

Changes in family status can affect costs and coverage; these may include getting married, having a first child or having a spouse stop working for the University. Such alterations can result in an employee having inadequate dependent coverage.

Accordingly, the Employee Benefits Division suggests that coverage should be checked under the following circumstances:

1. When a spouse or child begins working for the University as a regular employee.
2. If a spouse or only child dies.
3. When a divorce occurs.
4. If an only dependent child enters military service or has a 19th birthday (or 23rd birthday in the case of a full-time student).
5. When an only dependent child gets married.
6. When a spouse reaches age 65.

To determine proper coverage and payments, employees should compare the amounts shown on their salary check stubs with the amount they should be paying as shown in the following table:

INSURED PERSONS	MONTHLY	BI-WEEKLY
Employee only	none	none
Employee, child, children	$1.75	$0.80
Employee, spouse, child or children	$5.00	$2.30

(These rates apply when all insured persons are under age 65. Persons over age 65 are insured in a different plan at no cost.)

Employees wishing to make changes in their coverage should call, write or visit Employee Benefits, Room 113 Willard Bldg., 865-1473. Since the University has no way of knowing whether a change should be made, employees must take responsibility for seeing that their records are up-to-date and accurate. No refunds for overpayment can be made unless it has been shown that the University was in error.

Libraries offering computer literature searches

Beginning Saturday, Nov. 1, the University Libraries will begin offering literature searching services based on on-line information retrieval systems. Initially, searches will be available in the fields of education, psychology, business, chemistry and agriculture.

In the past, libraries have provided tools for locating citations and some help in their use; but, due to the large amount of time involved and other costs, they generally have not been able to provide actual literature searches for individuals.

Now, however, the picture has changed. A combination of computer technology, availability of bibliographic data bases and strong interest among information professionals has produced systems which can perform specific literature searches quickly, efficiently and inexpensively.

The University Libraries are now subscribing to these services and encourage the academic community to begin using them. All searching is scheduled on an appointment basis, so the requestor can be assured of the undivided attention of the librarian. The requestor has the option of working with the librarian during the search in the Reference Department (East Pattee 105) or of delegating the entire search process.

In all cases, the requestor provides the librarian with information regarding the search topic so that preparatory work can be undertaken before the search begins — thus keeping computer costs as low as possible. The requestor is encouraged to participate in on-line interaction when search results can be evaluated and modified by both researcher and librarian, thereby ensuring retrieval of the most useful references.

A bibliography of selected references is generated by a search. Citations include title, author(s), primary source and index terms, as well as an abstract for some data bases. Additional categories of information (e.g. patent number, patent assignee, language, etc.) which are unique to each data base are also contained in each reference. On-line output is immediately available to the user; off-line printout will be in the user's hands in about a week.

The cost to the user for an average search is about $35. This cost includes computer connect-time, the off-line printed bibliography and a nominal handling fee. Often the cost of a computer search is lower than the cost of a manual search due to the substantial amount of time required for the latter.

To initiate a computerized search, contact the Reference Department of Pattee Library (865-6368), which will refer you to the librarian handling the appropriate data base for your particular inquiry.

Women's week is Nov. 3-7

Colloquy is presenting a week-long program, "Focus on Women," from Monday, Nov. 3, through Friday, Nov. 7, at the University.

Featured speakers will be actress Ellen Burstyn and feminists Florynce Kennedy and Betty Friedan.

Florynce Kennedy, one of the founders

Ellen Burstyn

of the National Organization for Women also founded the Feminist Party. She will speak at 8 p.m. Monday, Nov. 3, in Schwab Auditorium.

Betty Friedan will talk on "Women in Politics" at 8 p.m. Wednesday, Nov. 5, in University Auditorium. Her appearance is co-sponsored by the Association for Women Students.

Ellen Burstyn will speak at 9:30 p.m. Friday, Nov. 7, in University Auditorium under the co-sponsorship of the Panhellenic Council. She will discuss women in art and theatre.

In addition to the guest speakers, a number of workshops will be presented during the week.

Dr. Dorothy Harris, professor of physical education and director of the Center for Women and Sport at the University, will speak on "Women in Sports" at 6 p.m. Tuesday, Nov. 4, in the Hetzel Union Bldg. assembly room.

At 8 p.m. that evening in Kern assembly room, there will be a Panel on International Women with discussion of the roles of women in countries other than the United States. Dr. Doris Seward, executive assistant to the President, will serve as moderator. Participants include Dr. Perris H. Chang, associate professor of political science; graduate students Efiong Etuk (Nigeria), Iya Flores (British Honduras) and Marilyn Vallejo (Philippines); and visiting professor Hisaka Tanaka.

At 4 p.m. Thursday, Nov. 6, Dr. Audrey Rodgers, associate professor of English, will lead a workshop on "Women in Literature" in the main lounge of the HUB. The University Readers will present a workshop at 7:30 p.m. Thursday in the

Flo Kennedy

HUB ballroom.

All of the events are free and open to the general public.

A number of other events, also focusing on women, are being held in conjunction with the Colloquy program.

A multi-media exhibit on women, sponsored by the HUB Arts and Crafts Committee, will be on display on the first floor of the HUB. The film, "Bread and Roses," will be presented by the Association for Women Students at 8 p.m. Saturday, Nov. 1, in Schwab Auditorium.

During the Nov. 3 to Nov. 7 "Focus on Women" program, Sorority Awareness Week will be observed, with Panhellenic Council sponsoring a book sale, career development program and a general information campaign concerning sororities.

The first speaker in the Colloquy series, Florynce Kennedy, is a graduate of Columbia Law School and has worked in many different fields of law, including civil rights, corporate, criminal and theatrical law.

She is author, with Diane Schulder, of "Abortion Rap," published by McGraw Hill, and is preparing another book, "The Palhology of Oppression," for publication. She has appeared in several films, including "The Landlord" and "Black Roots."

Betty Friedan, one of the leaders of the feminist movement in the United States, also is involved in the international feminist movement. She has initiated and taught courses on women and urban problems and has testified before the Judiciary Committee on the Equal Rights Amendment.

She convened the International Conference of Women in 1973 and received the "Ladies Home Journal" 1974 Woman of the Year Award. Author of "The Feminine Mystique," published in 1963, she served as first president of the National Organization of Women from 1966 to 1970.

Actress Ellen Burstyn, recognized as one of America's top film sters, won an Academy Award nomination as best actress in "The Exorcist," and was cited by the New York film critics and the New York Film Society es the best supporting actress of the year for her portrayal of Lois Farrow in "The Last Picture Show."

Her performence in "Alice Doesn't Live Here Anymore" won her the Academy Award for best actress, and for her starring role in the Broadwey hit, "Same Time, Next Year," she received Broedway's highest honor, the Tony Award for best actress.

PENN STATE COLLECTION

Faculty notes

Patricia Farrell

Dr. Patricia Farrell, who served for nearly three years as affirmative action officer of the University and has now returned to her position as associate professor of recreation and parks, has received the McKay Donkin Award.

The $500 award is given annually to the Penn State faculty or staff member who has contributed most to the economic, physical, mental or social welfare of the University faculty. It was established with contributions made by the family and friends of the late McKay Donkin, former vice president for finance and treasurer of the University.

Dr. Farrell joined the faculty in 1967 and during her service as affirmative action officer was primarily responsible for the development of the Affirmative Action Plan which the University submitted to the Federal government last November. She also developed procedures for handling complaints of discrimination, which, like the Affirmative Action Plan, have attracted the attention of many colleges and universities.

A native of State College, Dr. Farrell is a graduate of Penn State, with B.S. and D.Ed. degrees. She received her M.E. from the University of Minnesota. Before joining the faculty, Dr. Farrell served as assistant director of public recreation in Harrisburg, program director of the Student Union at Northern Illinois University and assistant professor at the University of New Hampshire.

Dr. Carroll C. Arnold, professor of speech communication, delivered two lectures and conducted a seminar at the University of Denver Oct. 20-22 as part of that University's special course offerings entitled Rhetorical Theory and Communication Theory: An Interface. Professor Arnold spoke on "Rhetoric and Knowing" and on "Perceiving Oral Rhetoric" in the lecture series sponsored by the Department of Speech Communication at Denver. Dr. Arnold is associate editor of the Penn State journal "Philosophy and Rhetoric" and a member of the publications board of the Speech Communication Association of America. His most recent book is "Criticism of Oral Rhetoric," published last year by Charles E. Merrill Publishing Co.

Dr. Lawrence S. Darken, professor of mineral sciences, has been invited to give the 1975 Alpha Sigma Mu Lecture at the American Society for Metals in Cincinnati, O., Nov. 12. His lecture, entitled "Reflections on the Thermodynamics of Metallurgical Solutions," will be a part of a materials science symposium at the ASM annual meeting.

Dr. Erwin W. Mueller, Evan Pugh research professor of physics, has been invited to present a paper at the 1975 Materials Science Symposium of the American Society for Metals and the Metallurgical Society of the American Institute of Mechanical Engineers in Cincinnati, O., Nov. 11-13. Dr. Mueller will discuss his invention, "The High Resolution Atom-Probe FIM," at a special session on field ion microscopy in materials science.

Dr. Warren W. Hassler Jr., professor of American history, has been named the first occupant of the newly-established John F. Morrison Chair of Military History at the Command and General Staff College at Fort Leavenworth, Ks. Dr. Hassler was appointed visiting professor at the College for a year beginning July 1, 1975. His responsibilities there included teaching, advising and maintenance of liaison between the Command and General Staff College and the history profession.

Dr. Marshall H. Kaplan, associate professor of aerospace engineering, who is presently on a six-month sabbatical leave from the University, is serving as a visiting professor in the Department of Aerospace and Mechanical Sciences at Princeton University. He is involved with Princeton's research activities in the areas of nuclear space power systems, spacecraft standardization techniques, mission analyses and development of methods for economic evaluation of space programs. One objective of his research is to develop a quantitative comparison of nuclear-powered and solar-powered satellites for future missions. Dr. Kaplan is a principal investigator on this U.S. Energy Research and Development Administration (ERDA) sponsored work. Results will directly affect future ERDA emphasis on space projects and influence many satellite designs. Dr. Kaplan will also give a 12-lecture series on "Spacecraft Dynamics and Control" at the Astro Electronics Division of RCA's Government and Commercial Systems and a similar series at the Communications Satellite Corporation, Clarksburg, Md.

Dr. Gerd M. Rosenblatt, professor of chemistry, recently presented invited lectures at the Argonne National Laboratory, the University of Illinois Chicago Circle and Bell Telephone Laboratories. A specialist in physical chemistry, Dr. Rosenblatt discussed current research projects in his laboratory focusing on gas-surface phenomena.

Dr. Merk R. Peattie, assistant professor of history, recently presented invited lectures to faculty and students at several East Asian Research Centers. He spoke on "Forecasting a Pacific War" at the University of Michigan's Center for Japanese Studies in Ann Arbor and at the University of California's Center for Japanese and Korean Studies in Berkeley and on "The Japanese Military in the 1930s" at the Center for Japanese Studies at Stanford University. Dr. Peattie is the author of the recently published book, "Ishiwara Kanji and Japan's Confrontation with the West."

"The Drama of Salvation: Sex Roles in the Plays of Hroswitha of Gandersheim" is the title of a paper presented by **Dr. Alberta D. Frankhorter,** assistant professor of history at Behrend College, at the second annual meeting of the Ohio Conference on Medieval Studies sponsored by the Department of Philosophy at John Carroll University in Cleveland, O., this month.

Dr. William A. Dunson, professor of biology, has been invited to present two seminars at Duke University next month. On Nov. 17 he will speak at Duke's Department of Zoology at the Durham, N.C., campus and on Nov. 18 at the Marine Laboratory in Beaufort, N.C. His talk is titled "Diving for Sea Snakes in the Timor and Visayan Seas." Dr. Dunson has just returned from diving for sea snakes on the reefs of the Visayan Sea in the Philippines, where he served as chief scientist aboard the research vessel Alpha Helix. In 1973, he headed an expedition abroad Alpha Helix to the Timor Sea off Australia which collected more than 400 live specimens of the snakes whose venom is probably the most virulent animal poison. Both expeditions were supported by grants from the National Science Foundation, which also outfits and maintains the Alpha Helix with Scripps Institution of Oceanography.

Dr. Thomas F. Powers, professor in charge of food service and housing administration and professor of organizational behavior, and Leo M. Renaghan, instructor in food service and housing administration and Statler Doctoral Fellow in that program, recently presented papers to the annual conference of the Society for the Advancement of Food Service Research. Dr. Powers' paper, "Changing Food Service Systems in an Evolving Economic Environment" reported on a recently completed two-year study of the future of the food service industry, funded by the Research Coordinating Unit of the Pennsylvania Department of Education. Renaghan reported on one topic covered in that study, dealing with securing consumer acceptance of new food products in food service systems. His paper was titled "Strategies for Increasing New Product Acceptance in Food Service Systems."

Howard F. Kingsbury, associate professor of architectural engineering, has been elected chairman of the environmental acoustics committee of the American Society for Testing and Materials (ASTM). Founded 75 years ago, the ASTM is an international organization composed of several thousand representatives from industry, government and consulting organizations. The objective of the acoustics committee is to update current standards and write new criteria relating to acoustics, primarily in the building field. The committee has about 130 members.

New appointments

Dr. Jacob De Rooy as assistant professor of economics at Capitol Campus. B.A., M.A. and Ph.D., economics, Rutgers University; NATO Advanced Studies Institute. He has taught at Upsala College and Lehigh University.

Richard C. Hieronymus as assistant professor of costume design. B.S., theatre and English, Southwest Missouri State University; M.A., theatre, University of Missouri. Formerly instructor of costume design, University of Texas, costume director, the Oregon Shakespearean Festival Association; and costume designer for Tiffany's Attic, Kansas City, the Missouri Repertory Theatre, and the Syracuse, N.Y., Repertory Theatre.

Dr. Robert E. Weber as assistant professor of mathematics at Shenango Valley Campus. B.A. and M.A., Miami University, Ohio; Ph.D., Indiana University. Formerly lecturer at Southern Illinois University and assistant professor at Indiana University Southeast.

Dr. Chester L. Wolford as assistant professor of English at Behrend College. B.A., University of Maryland; M.A., Georgetown University; Ph.D., Penn State. Formerly taught in schools in Tyrone and Hollidaysburg, and as instructor at Penn State.

Gail M. Bennett as instructor in health, physical education and recreation at York Campus. B.A., SUNY, Brockport; M.A., Ohio State.

Melvin Blumberg as instructor of management at Capitol Campus. B.S., engineering, Widener College; M.A., business administration, University of Pittsburgh; currently completing work for the Ph.D. in organization behavior at Penn State. He is a consultant for the National Productivity Commission. He was an instructor for two years at Widener College and previously worked at Ultronic Systems Corp. and Burroughs Corp.

Dr. Gary L. Collison as instructor of English at York Campus. B.A., Lehigh University; M.A., Bucknell University; Ph.D., Penn State.

Lois A. Dudley as instructor of accounting at Capitol Campus. B.A., Arkansas A & M College, M.A., business administration, University of Arkansas. A candidate for the Ph.D. degree, she has been an instructor at the University of Arkansas.

Sidney C. Dudley as instructor in marketing at Capitol Campus. B.A., Mississippi State University; M.A., business administration, marketing, University of Arkansas, currently a candidate for the Ph.D. degree.

William J. Kelly as instructor of theatre and film at New Kensington Campus. B.A. and M.A., theatre, Penn State. From 1967-70, producer-director for WPSX-TV.

Gerald P. Madden as instructor of finance at Capitol Campus. B.A., accounting, St. Joseph's College; M.A., finance, Temple University. Currently a candidate for the Ph.D. degree at Penn State, he was a senior assistant accountant with Haskins & Sell.

Charles D. Pringle as instructor of management at Capitol Campus. B.A. and M.A., management, Baylor University. Formerly instructor in management, now a candidate for the Ph.D.

Frank W. Symons as research associate at ARL. B.S., electrical engineering, Penn State, M.S., electrical engineering, Stevens Institute of Technology; and received a Ph.D. in electrical engineering in November. Formerly with Sikorsky Aircraft.

Rosemary King as assistant librarian in the cataloging department. B.A. and M.A. in library science, Florida State University.

Richard M. Dahl as research assistant in animal science. B.S. and M.S., University of Kentucky. Has worked as veterinary assistant in a clinic.

Dr. Marianne S. Kleiber as research assistant in poultry science. M.D., University of Tuebingen, Germany. She has held research posts at the Universities of Penn, Temple University, and with Smith, Kline and French.

Obituaries

Michael W. Knerr, retired associate professor of industrial education, died last month in Bloomsburg, Pa. He was born May 7, 1902, in Williamsport, Pa., and received his bachelor of science and master of education degrees from Penn State in 1934 and 1939, respectively. Appointed to the faculty in 1947, he retired in 1964.

Harold D. Werner, retired assistant professor of general engineering at Behrend College, died in Erie, Pa., Oct. 10. Born July 18, 1896, he began his association with the University as an instructor in engineering extension in 1949 and retired in 1966. He attended both Hiram College and MIT and worked for various companies in the Erie area as an engineer prior to joining the faculty.

Eastern European conference here

A conference on "The Impact of Communist Modernization on National Identity and State Integration in Eastern Europe," organized and sponsored by the Slavic and Soviet Language and Area Center, will be held at the University today (Thursday) and Friday, Oct. 30 and 31.

President John W. Oswald is delivering the opening address at the conference, which is being supported by a grant from the American Council of Learned Societies' Joint Committee on Eastern Europe. The conference director is Dr. Vernon V. Aspaturian, Evan Pugh research professor of political science and director of the center.

"State Loyalty and National Identity in Multinational States" is the subject of the first panel. Papers on this topic will be presented by Yaroslav Bilinsky, University of Delaware, dealing with the Soviet multinational state; Paul Shoup, University of Virginia, discussing the topic as it applies to Yugoslavia; and David Paul, University of Washington, as it applies to Czechoslovakia.

Rudolph Tokes, University of Connecticut, will discuss the mono-ethnic, unitarian states of Poland, Hungery and Bulgaria, while Romania is the subject of Trond Gilberg, associate professor of political science at Penn State and associate director of the conference. There will be a banquet address Thursday evening by Cyril Black of Princeton University on "The Impact of Modernization: Catalyst for Assimilation, Integration, Acculturation or Separation."

The second day of the conference will include a panel on "Language, National Identity and Integration," with Robert Kirk of Radio Free Europe discussing the impact of urbanization and Ladislav Matejka, University of Michigan, speaking on "The Search for a 'Lingua Franca' in Multinational States." "National Identity and Integration in Yugoslav Foreign Policy" is the topic of Zachary Irwin, instructor in social science at the University.

The concluding panel will be concerned with "Development and National Identity" with papers by Andrzej Korbonski, UCLA, on "Reconciling the Demands of Nation Identity and Economic Rationality in Eastern Europe," and Bogdan Denitch, Queens College and Columbia University, on "National Identity and Social Stratification."

A number of Penn State faculty members are participating in the conference either as discussants or panel chairmen. In addition to Dr. Aspaturian, they include Sergei Utechin, professor of Russian history; Thomas F. Magner, professor of Slavic languages and associate dean for research and graduate studies in Liberal Arts; William Schmalstieg, professor and head of the Department of Slavic Languages; Jan Prybyle, professor of economics; and Allan Rodgers, professor of geography.

University Park Calendar

Oct. 30 — Nov. 9

Items to be included in this calendar should be sent to the editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, Oct. 30

FSHA dinner honoring "Delmonico's," 5:30 p.m., Maple Room, Human Development. Reservations required, 865-7441.

Halloween Candlelight Dinner, 5-7:30 p.m., HUB.

Commonsplace Videotape, 12 noon, Kern lobby. "Three Dog Night."

University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.

Free U mystic consciousness and music-lan's workshop, 8 p.m., HUB ballroom.

Friday, Oct. 31

GSA's Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.

Peter Brye, cello recital, 8:30 p.m., Music Bldg. recital hall.

Saturday, Nov. 1

Sports: Men's Cross Country, PIAA Championships. Men's Central Collegiate Championships.

University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.

Sunday, Nov. 2

PSOC Hiking Club, exploration in Big Kettle and Black Ridge Area of Rothrock State Forest, 9 a.m.

Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Joseph Faulkner, sociology.

Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Elder Gerald G. Loyd, pastor, Black Christian Fellowship.

Free University, Musician's Workshop, 1-8 p.m., HUB ballroom.

Orchesis fall concert, "Dance Creations '75," 2:30 and 8 p.m., White Hall Dance Theatre.

Claremont Woodwind Quintet, 8:30 p.m., Music Bldg. recital hall.

Saturday-Sunday, Nov. 1-2

PSDC Sailing Club and Penn State Sailing Team, Intercollegiate Sailing Regatta at Stone Valley, starting 9:30 a.m., Saturday.

Monday, Nov. 3

Reception for George Zoretich and David Rubello, 7:30 p.m., Zoller Gallery.

Colloquy program, 8 p.m., Schwab. Florynce (Flo) Kennedy, attorney and author.

Artists Series, Ed Nelson in "Give 'Em Hell, Harry," one-man show based on the life of Harry S. Truman, 8:30 p.m., University Auditorium.

Tuesday, Nov. 4

Sports, Women's Field Hockey, vs. Lock Haven, 3 p.m.

Colloquy program, 6 p.m., HUB assembly room. Dorothy Harris, health and physical education, on "Women in Sports."

Colloquy program, 7:30 p.m., Room 112 Kern Panel discussion on "The Role of Women in Other Countries."

University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.

Artists Series, Fellini Film Festival, "I Vitelloni," 8:30 p.m., University Auditorium.

Wednesday, Nov. 5

Noontime Concert, 12:15 p.m., Kern lobby.

University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.

Colloquy program, 8 p.m., University Auditorium. Betty Friedan, author, feminist.

Philip Dettra, piano recital, 8:30 p.m., Music Bldg. recital hall.

Thursday, Nov. 6

Commons Videotape, 12 noon, Kern lobby.

Sigma Xi luncheon, 12 noon, Room 101 Kern. Dr. Thomas Bates, mineralogy, on "The Land Grant University: Science Adviser to the Public."

Sports, Women's Field Hockey, vs. Ursinus, 3 p.m.

Colloquy program, 4 p.m., HUB main lounge. Audrey Rodgers, English, on "Woman in Literature."

Colloquy program, 7:30 p.m., HUB ballroom. University Readers, "What Do Women Want?"

American Chemical Society, Central Pennsylvania Section, dinner dance, 5:30 p.m., State College Elks Country Club. Talk by Rudolph Roy on "Nuclear Wastes: Experts' Views on Safety."

University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.

Friday, Nov. 7

Ag Hill Festival, 6:30 p.m., HUB ballroom. Annual get-together for ag students and faculty.

Sports: Soccer, vs. Temple, 7 p.m., Jeffrey Field.

Folk and Square Dance Roundup, 7:30 p.m., White Bldg.

GSA's Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.

Le Treteau de Paris, "Phedre," 8 p.m., Schwab. Presented by the Department of French.

Student performance of music by Bach, 8:30 p.m., Music Bldg. recital hall.

Colloquy program, 9:30 p.m., University Auditorium. Ellen Burstyn, actress.

Saturday, Nov. 8

Sports: Lady Lion Cross Country Classic. Football, vs. North Carolina State, 1:30 p.m., Beaver Stadium.

Hetzel Union Board Annual Jammy, 8 p.m., HUB ballroom.

University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.

Sunday, Nov. 9

PSDC Hiking Club, exploration on Short Mountain between Little Juniata and Frankstown Branch, 9 a.m.

Chapel Service, 11 a.m., Music Bldg. recital hall. Joseph Rhodes Jr., State Legislature Representative, member, Board of Trustees.

Black Christian Fellowship worship service, 11 a.m., Black Cultural Center, Rev. David Minder, pastor, the Gospel Assembly, Coudersport, Pa.

Kathy Kello, oboe recital, 3:30 p.m., Music Bldg. recital hall.

Seminars

Thursday, Oct. 30

Agronomy, 8:15 a.m., Room 301B Ag. Admin. Robert Kalmbacher, Ph.D. thesis, on "Establishment Practices for Birdsfoot Trefoil and K31 Tall Fescue in Forest Clearings."

Two Cultures Dialogue, noon, Room 189 Materials Research Lab. Dr. Cyril Stanley Smith, M.I.T., on "Aesthetics and Technology."

Chemistry, 12:45 p.m., Room 333 Whitmore. Henry F. Schaefer III, University of California, Berkeley, on "Potential Energy Surfaces for Simple Organic Reactions."

Economics, 3 p.m., Room 101 Kern. Dr. Teh-wei Hu on "Health Care in the People's Republic of China: An Economist's First-Hand Observation."

Microbiology and Cell Biology, 3:55 p.m., Room 52 Frear. Dr. Dieter Soll, Yale University, on "Studies on tRNA and Aminoacyl-tRNA Synthetases."

Computer Science, 4 p.m., Room 325 Whitmore. Dr. Jack Heller, SUNY, on "The Orphos Management Information System."

Mathematics, 4 p.m., Room 102 McAllister. W. Zelasko, Polish Academy of Science, "On Maximal Ideals in m-Convex Algebras."

ASEE, 4:15 p.m., Room 215 Hammond. John Horn, Westinghouse Corp., and Floyd Fischer, vice-president for continuing education, on "Preparing the Engineering Undergraduate for Life-long Learning."

Computation Center, 7:30 p.m., Room 105 Osmond. "Introduction to the JCL Computation Center (2)."

Friday, Oct. 31

Physics Colloquium, 3:50 p.m., Room 117 Osmond. Dr. S. Deser, Brandeis University, on "Quantum Theory of General Relativity."

Organizational Behavior, 3 p.m., Room 208 Bus. Admin. Melvin Blumberg, Capitol Campus, on "Job Switching Behavior in Autonomous Work Groups."

Monday, Nov. 3

Biochemistry, 11:10 a.m., Room 101 Althouse. Robert Hill, Duke University, on "Structure and Function of Lactose Synthetase."

Genetics, 3:55 p.m., Room 111 Tyson. Charles Boyer, graduate student, on "Developmental Changes in 'Zea mays' L. Starch from Normal and Mutant Endosperms."

Computation Center, 7:30 p.m., Keller. "Introduction to the Computation Center (3)."

Tuesday, Nov. 4

Ceramic Science, 9:35 a.m., Room 301 Mineral Industries. C. G. Pantano Jr., research assistant, University of Florida, on "Glass Surface Analysis by Auger Electron Spectroscopy."

Biochemistry, 11:10 a.m., Room 101 Althouse. Robert Hill, Duke University, on "Glycosyl Transferases and the Structure of Submaxillary Mucin."

Comp Lit Luncheon, 12:15 p.m., Presidential Room, Hotel State College. Kenneth Thigpen, English and folklore, on "Dracula in America."

Analytical Chemistry, 12:45 p.m., Room 333 Whitmore. D. J. Dube on "Some Electrochemical Aspects of Vitamin B_{12}."

Air Pollution Control, 2:20 p.m., Room 140 Fenske. Thomas W. Ryan, graduate student in mechanical engineering and air pollution control, on "The Automobile and Its Role in Air Pollution and the Energy Shortage."

Inorganic Chemistry, 4 p.m., Room 333 Whitmore. "Research Interests of Professor Will Horrocks—Bioinorganic Chemistry and Paramagnetic NMR."

Aerospace Engineering, 4 p.m., Room 233 Hammond. Loyal G. Goff, visiting program scientist, NASA, on "Viking '75 — Mission to Mars."

English, 8 p.m., Room 101 Kern. Nicholas Joukovsky on "The Heresy of Peacock's 'The Four Ages of Poetry'."

Wednesday, Nov. 5

Fuel Science, 4 p.m., Room 301 Mineral Industries. Dr. Frank Vastola on "The Role of Mini and Micro Computers in the Lab and Plant."

Thursday, Nov. 6

Agronomy, 8:15 a.m., Room 301AB Ag. Administration. Dr. Pete Fletcher, forestry, on "Research Associated with the Pine Creek Watershed."

Chemistry, 12:45 p.m., Room 333 Whitmore. Donald R. Johnson, National Bureau of Standards, on "Molecules in the Interstellar Environment."

Economics, 3:30 p.m., Room 101 Kern. Dr. Warren Robinson on "Indirect Social and Economic Effects of Export Taxes in Thailand." Discussants: Wayne Schutjer, agricultural economics, and John Riew, economics.

Anthropology, 3:30 p.m., Room 107 Social Science Bldg. Prema Kiara, editor and editorial consultant, on "How to Get Cited in Someone Else's References: Writing the Publishable Paper."

Physics, 3:50 p.m., Room 117 Osmond. E. P. Gross, Brandeis University, on "Topics on Kinetic Theory of Gases and Plasma."

Microbiology and Cell Biology, 3:55 p.m., Room 52 Frear. Dr. Satvir S. Tevethia, Tufts University School of Medicine, on "Lymphocyte-Macrophage Interaction in Tumor Rejection."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Frederick T. Boland, graduate student, on "Modelling Heat Fluxes and Surface Temperatures over Urban Areas."

Philosophy, 4 p.m., Room 151 Willard. Dr. Robert Temples, Oregon College of Education, on relativity theory and Buddhism.

Computation Center, 7:30 p.m., Keller Bldg. "Introduction to the Computation Center (4)."

Friday, Nov. 7

Engineering Science and Mechanics, 4 p.m., Room 215 Hammond. Dr. Patrick J. Smith, IBM, Poughkeepsie, on "Dislocations in Electronic Devices."

Lectures

Thursday, Oct. 30

Nelson W. Taylor Lectures in Materials Science, Dr. Cyril Stanley Smith, member of the National Academy of Sciences, professor emeritus MIT, on "The Historical Interaction between Technology and Pure Science," 8 p.m., Room 112 Kern.

Saturday, Nov. 1

Francis Reid, lighting designer, on "The Role of Stage Lighting," 3 p.m., Playhouse Theatre.

Meetings

Sunday, Nov. 2 and 9

Interfaiths Folk Dance Club, 7:30 p.m., south gym, White.

Monday, Nov. 3

Rehabilitation Education Organization, 7:30 p.m., Room 301 Soc. Science Bldg.

Tuesday, Nov. 4

Ukranian Club, 7:30 p.m., Room 321 Boucke.

Thursday, Nov. 6

Penhellenic Council, 7:30 p.m., HUB main lounge. Career Opportunities for Women.

Film

GSA Commonsplace Theatre, 7:20 and 9:30 p.m., Room 112 Kern. "Ballad of Cable Hogue."

Exhibits

Museum of Art: Panel Paintings from the Samuel H. Kress Collection of the Allentown Art Museum, through Oct. 31. Drawings from the Permanent Collection. 200 Years of Royal Copenhagen Porcelain.

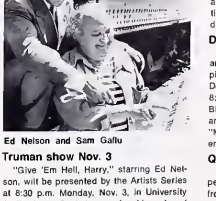
HUB Gallery: U.N. Exhibit. Multi-media Exhibit on Women.

Kern Gallery: Renascence Gallery Exhibit, through Nov. 8. Wendy Snetsinger, photography, opening Oct. 26. Blown glass exhibit by PSU Art Dept., opening Nov. 9.

Culturel Center, Walnut Bldg.: An exhibit of mixed media, the work of the New York Chapter of the National Conference of Artists, through Oct. 31. An exhibit of mixed media, the work of the Pittsburgh Chapter of the National Conference of Artists, opening Nov. 3.

Chambers Gallery: Art Department Student Group Show. Gold and Silver by students of SUNY at New Paltz.

Paltes Library: Exhibit of crafts, Main Lobby. Prints by Mary Hamilton, through Nov. 3; drawings by Denise Paleski, opening Nov. 4, Lending Services Lobby. Drawings by Dr. Paul Edmonston, East Corridor Lobby.



Zoller Gallery: Two Men Show: Zoretich and Rubello, opening Nov. 1.

University Schedule

Thursday-Friday, Oct. 30-31

Sign for Winter Term NDSL, SEOG, BEOG and University Long Term Loans, Room 108 Shields.

Arts roundup

Ed Nelson and Sam Gallu

Truman show Nov. 3

"Give 'Em Hell, Harry," starring Ed Nelson, will be presented by the Artists Series at 8:30 p.m. Monday, Nov. 3, in University Auditorium. Best known for his role of Dr. Rossi on the television series, "Peyton Place," Nelson's stage credits have included roles in "A Streetcar Named Desire" and "Wuthering Heights" with New Orleans' Le Petit Theatre de Vieux Carre. He has also appeared in the films "Airport '75" and "Elmer Gantry."

The author of the one-man show is a Penn State alumnus, Samuel Gallu '40, who has been a writer, director and producer of motion pictures and television for many years.

Tickets for "Give 'Em Hell, Harry" went on sale Oct 28 at University Auditorium and the HUB booth, and sales will continue through Oct. 31 from 9 a.m. to 4 p.m. daily.

Dettra in recital

Schumann's "Fantasie in C Major," among the composer's major works for piano, will be performed by pianist Philip Dettra, assistant professor of music, at 8:30 p.m. Wednesday, Nov. 5, in the Music Bldg. recital hall. Also to be performed are Debussy's "Pour le Piano" suite and "Menuet Antique," "Pavane," "Jeux d'eau," and "Alborada del gracioso" by Ravel.

Quintet to play

The Claremont Woodwind Quintet will perform two 20th century works and one from the turn of the 17th century at 8:30 p.m. Sunday, Nov. 2, in the Music Bldg. recital hall. Quintet members Smith Toulson, clarinet, Gregory Donovetsky, oboe, Christeen Dole, French horn, Dverda Page, flute, and William Dole, bassoon, all of the music faculty, will perform Sweelinck's "Variations on a Folksong," transcribed

(Continued on page 4)

Arts roundup

(Continued from page 3)

for winds by Ernest Lubin, "Concerto for Woodwind Quintet" by Joseph Jongen, and Carl Nielsen's "Quintet." The latter work, a poignant, melancholy piece which is among the most important of this century for wind quintet, is in four movements using many traditional forms including a minuet. The third movement is a set of variations on a chorel treatment of a salling song featuring ensemble instruments both individually and in combinations. Sweelinck, a noted composer, organist and teacher of the early Baroque period, based his variations for organ on a well-known song of the time, "My Young Life Is Ending," which also was the basis for other works. One of the earliest composers to leave a considerable body of instrumental music, he is credited with beginning a tredition leading directly to Bach. Jongen's concerto, a three-part work which is one of the few in this style for woodwind quintet, is much in the Impressionist manner of Debussy and Ravel.

Music by women

The music of women composers will be featured in a concert, sponsored by the Institute for the Arts and Humanities Studies, at 8:30 p.m. on Wednesday, Nov. 12, in Schwab Auditorium. The concert is planned as a follow-up to the spring term course sponsored by the Institute, "Women and Creativity in the Arts." Joanne Feldman, associate professor of music, is coordinator of the concert, and musicians will be drawn from both the campus and the community. Admission is free, but tickets are necessary. Block distribution of tickets may be arranged through the Institute prior to Monday, Nov. 3, by calling Shirley Rader, 863-0495. Tickets will be available at the box office of University Auditorium beginning Nov. 3, Monday through Friday from 9 a.m. to 4 p.m. Any remaining tickets will be made available at Schwab Nov. 12 from 7:30 p.m. until performance time.

WPSX highlights

The famed National Geographic Specials come to public television beginning Friday, Oct. 31, at 10 p.m. with **The Incredible Machine**, an hour-long look at the workings of the human body. The documentary uses special photographic techniques developed for medical purposes to take viewers inside the lungs, stomach and heart and to look at the workings of the inner ear, vocal cords and circulatory system. One segment shows actual photographs that trace the reproductive process from the development of the ovum to fertilization, cell development and the formation of the spinal column in the fetus.

William Steinberg, musical director of the Pittsburgh Symphony Orchestra, is the guest conductor on **Evening at Symphony** Sunday, Nov. 2, at 8 p.m. Steinberg conducts the Boston Symphony Orchestra in performances of Prokofev's Piano Concerto No. 3 in C, opus 26, and Hindemith's "Mathis der Maler" symphony.

The ethical questions surrounding the increasing use of behavior modification are the focus of the final program of **The Behavioral Revolution** Tuesday, Nov. 4, at 9:30 p.m. The half-hour documentary includes filmed interviews with behaviorist B. F. Skinner, psychiatrist Dr. Thomas Szasz, novelist Anthony Burgess, and others.

The tribal arts of Melanesia are explored on **The Tribal Eye** Wednesday, Nov. 5, at 8 p.m. The hour-long documentary includes film of the funeral ceremonies of tribes living in the remote interior of the New Hebrides. The program also examines the contrasting lite of the coastal people of the Solomon Islands, showing their war canoes, sea spirit dances and a powerful cult devoted to tribal custom and its preservation.

Jeremy Brett and John Alderton star in Richard Brinsley Sheridan's "The Rivals" on **Classic Theatre: The Humanities in Drama** Thursday, Nov. 6, at 9 p.m. The 18th century play, considered one of the theatre's most brilliant and scathing comedies, features such classic characters as Anthony Absolute, Lydia Languish and the famous Mrs. Malaprop. The play will be preceded on Tuesday, Nov. 4, at 7:30 p.m. and Thursday at 8:30 p.m. by **Classic Theatre Review** with Jeremy Brett and William Appleton of Columbia University.

Scene from Racine's "Phedre," to be presented in French by Le Treteau de Paris at 8 p.m. Friday, Nov. 7, in Schwab. The French Department is sponsoring the play. Tickets will be available at the door.

Student work shown

Work by students in the Department of Architecture is the subject of an exhibition in the American Institute of Architects Gallery, Philadelphia, through Nov. 7. The exhibit, which resulted from an invitation from the A.I.A., was organized and prepared under the direction of Roy Vollmer, assistant professor of architecture. First- and second-year students are represented primarily by the numerous recent publications of the department. Student work was also featured in "Architecture: Young Visionary Designs," an exhibit sponsored by the Institute of Architectural and Urban Studies in New York last month. Among 20 projects selected from across the nation for their national interest in terms of thought and expression, was a housing proposal prepared by Penn State students.

Male role studied

The first academic course to be given at Penn State on contemporary male roles and male sex-role socialization is being offered this term by the College of Human Development. The graduate seminar, "Masculinity and Male-Sex Role Socialization," is led by Robert A. Lewis, associate professor in the Division of Individual and Family Studies.

The course is an exploration of the various role expectations and pressures that most men tace today at work and at home. The masculine pressures upon men, Dr. Lewis holds, are often destructive, as partly witnessed by the higher incidence of heart attacks, suicide and mental illness among men than among women. One way, however, in which men may help themselves is to become more aware of the pressures they face in trying to live up to the macho (masculine) images learned in early childhood and constantly reinforced by peers and the media. One of the better ways for men to do this is to examine in small groups their own personal lives, especially their relationships with women, children and other men.

According to Dr. Lewis, there are a number of active men's "tiberation" groups in the State College area, most of which have been formed by males whose wives or girl friends are members of women's liberation groups.

The women's movements have had dramatic impact on both women's and men's roles in contemporary America," Dr. Lewis notes. "In the past, most men were expected to be strong, fearless, successful, unemotional and unexpressive.

"Interestingly, Women's Liberation in recent years has not only put pressure on men to examine their own chauvinism, but also has given men permission and support to change some of their stereotyped, traditional roles. For instence, there are some men who would like to spend more time with their children and thus work only part-time, while their wives do likewise. For many men, their membership in men's groups is part of their own effort to contribute to the feminist movement."

News in brief

(Continued from page 1)

mand. The sessions are held in the student observatory atop Davey Laboratory where visitors can see a variety of celestial objects through telescopes under the guidance of astronomy club members. Earth's moon, the planet Jupiter, the Andromeda Nebula and a cluster of stars called the Pleiades will be among the objects to be seen at the first session. No tickets are required, but the show goes on only if it is possible to see most of the brighter stars with the unaided eye. If the sky is not clear, the program will be rescheduled for the following night, Saturday, Nov. 8.

ACS dinner-dance

The Central Pennsylvania Section of the American Chemical Society is celebrating the centennial of the Society's founding with a new programming twist --- a dinner-dance at 5:30 p.m. Thursday, Nov. 6, at the Elks Country Club Dr. Rustum Roy, director of the Materials Research Laboratory and professor of the solid state, will present a talk on "Nuclear Wastes: Experts' Views on Safety." Tickets for the evening are available at $5 apiece at the Department of Chemistry office, Room 152 Davey.

Flood aid given

A total of 99,000 copies of materials covering 87 critical topics were sent out from the College of Agriculture to Cooperative Extension offices even as flood waters were still rising during the recent emergency. Much of the material was packed in cars to be rushed directly to the scene in 35 Pennsylvania counties. Lessons learned in the "Agnes" floods paid off, as 23 different radio stations and 20 newspapers were served with information on such subjects as checking damaged buildings, cleaning and sterilizing cooking utensils and salvaging flooded furniture. An hour-long television special was also prepared.

Private giving totals

Gifts from private sources to the University during the year ended June 30, 1975, totalled $5,290,037. The amount, according to the annual report of the Office of Gifts and Endowments, included $878,764 from alumni; $615,874 from friends other than alumni; $1,525,098 from corporations and businesses; $1,447,658 from foundations; and $822,655 from organizations. The 1974-75 total, which resulted from 20,273 gifts, was the second highest in the University's fund-raising history. In 1973-74, the record high was $5,378,899. Of the total, $3,302,086 received in 1974-75, $3,302,567 was allocated for various programs of the Colleges of the University; $396,564 for intercollege research programs; $935,843 for student aid; and $222,023 to the various Campuses of the University. Libraries received $83,254 and religious affairs $8,594, with the balance going for other projects.

Warneke honored

Heinz Warneke, internationally known sculptor whose works include Penn State's Nittany Lion Shrine, has been named Honorary Alumnus by the University's Alumni Association. The 80-year-old sculptor will be honored on campus during the Alumni Council's annual fall meeting, Nov. 7-8. Warneke's official hosts for the weekend will be Drs. Francis E. Hyslop and Harold E. Dickson, professors emeriti of art history. Dr. Hyslop was on the faculty committee that recommended Warneke to the Class of 1940 when its members voted to give their class funds lor a statue of Penn State's athletic symbol. In being named Honorary Penn State Alumnus, Warneke joins President John W. Oswald, first to be so honored; football coach Joe Paterno; Marie Underhill Noll, widow of Distinguished Alumnus A. Robert Noll '29 for whom Noll Laboretory is named; and former Penn State president Dr. Milton S. Eisenhower.

Retired staff to meet

The Penn State Retired Staff Club will meet at 7:30 p.m. on Thursday, Nov 13, at St. Andrew's Episcopal Church Lile Center. The drama department of the State College Women's Club will present a one-act play et the meeting. Reservations, which must be received by Nov. 10, can be made by contacting Harriet Nesbitt, 237-4654. New members are welcome.

Funding opportunities

(203-1) New capacity building grants under the **National Institute of Education State Dissemination Grant Program** have a Jan. 15 deadline Continuation grants are due May 3 (Ref. 40FR6540, 10/16/75) (CFDA 13.575)

(203-2) The Office of Education has rescinded its requirement for preapplications under the **Teacher Corps Project** (Aug. 7, #190-2). The Dec. 15 closing date for applications remains in effect (Ref 40FR6543-44, 10/16/75) (CFDA 13.486)

(203-3) The Office of Education **Mattic Education Program** (Sept. 18, #178-4) announces a Nov. 24 closing date for applications. (Ref. 40FR-45543, 10/16/75) (CFDA 13.561)

(203-4) Proposed rules for Health Systems Agencies have been issued by the Public Health Service. Covered are "health services areas to provide effective health planning; health services, manpower and facilities development; efficiencies reduction; and health plan implementation." (Ref 40FR46503-12, 10/17/75)

(203-5) The Rockefeller Foundation's new fellowship program has greatly increased the number of fellowships awarded. Fellowships Awards are now available in the fields of **agriculture, the humanities, population, environment, minority-group education, conflict resolution and the arts.** In 1974, awards ranged from $1,404 to $37,500. Details from Humanities --- Dr. John Colton; Conflict in International Relations --- Dr. Richard Falk; Research for Hunger --- Dr. John A. Pino (eg sciences); Dr. R. Kirby Davidson (social sciences); Equal Opportunity --- Dr. Charles Smith; Environment --- Dr. Ralph W. Richardson Jr.; Playwrights --- Howard Klein; Minority Group --- Dr. Smith; Population --- Dr. John Knowles; and Social Sciences --- Dr Mary Kitz; all at The Rockefeller Foundation, 1133 Avenue of the Americas, New York 10036 (Ref. R.F. Illustrated)

(201-3) Proposals are of basic concern to the **development of significant engineering concepts in the national interest** and should be top Engineering technology projects are encouraged in conservation of natural resources (energy and materials), improved environmental quality, health, transportation, and communication systems Also encouraged are developmental projects for **future engineering principles and technologies**, including interdisciplinary approaches, sociological and technological assessments, and the education media. Preliminary outlines must be received by the engineering sciences, chemistry, engineering, environmental sciences, life sciences, mathematics, physics and space sciences about June 30 to be considered for funding in 1976 with stipends ranging up from $15,000. Application deadline is Jan. 15, 1976, with April awards. For further information contact Assistant Dirship Office, JH 606-P, National Research Council, 2101 Constitution Ave., N.W., Washington, D.C 20418 (Ref. NSB announcement)

(202-6) The National Endowment for the Arts has issued **Museum Program Guidelines** for FY 1977. Five programs and funds will be given: museum purchase plan, Jan. 2, 1976, utilization of collections, April 2, 1976; museum training, conservation, renovation, July 2, 1976; publications, Oct. 1, 1976; and visiting specialists and technical assistance, applications reviewed quarterly.

Oswald reaffirms Allentown mission

President John W Oswald has reaffirmed the commitment of The Pennsylvania State University to continue to develop the Penn State Allentown Campus in accord with the mission and program guidelines developed in cooperation with other colleges and universities in the Lehigh Valley area and approved by the State Board of Education.

He noted that the recent recommendation of the Governor's Management Review team to discontinue the Campus, located in Fogelsville, may have been based on misinformation or misunderstanding.

"The fact that the enrollment of the Allentown Campus is smaller than other Penn State Campuses is part of its mission as approved by the Penn State Board of Trustees and endorsed by the State Board of Education," President Oswald noted.

"The Governor's Management Review Team statement that the Campus mission was 'considered of dubious value by the National University Extension Association' also indicates a misunderstanding.

"Not only is the National University Extension Association not dubious about the Allentown mission," President Oswald reported, "but the Association early this year awarded the Allentown Campus and its director, John V. Cooney, the NUEA ACE award for its innovative program, recognizing the quality of the plans made by the Campus to implement its new mission with special emphasis on continuing education. The Campus facility, soon to be constructed on the Fogelsville site, is approved by State and Federal authorities, reflects this innovative emphasis."

PENN STATE intercom

Volume 5, Number 10 November 6, 1975

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

News in brief

Unnecessary tickets

Some faculty and staff members have received parking violations that could have been prevented by just turning on the vehicle's emergency flashers. Short-time parking for loading and unloading, pick-up or delivery is permitted in parking areas and in loading zones provided the vehicle's emergency warning flashers are operating. The floating permit is not necessary if the flashers are operating, but the maximum time limit for pick-up or delivery parking is 15 minutes. If a vehicle is not equipped with emergency flashers, an acceptable alternate is turning on the vehicle's head lamps. A note affixed to the windshield or displayed on the dashboard is not an acceptable alternate.

French exchange program

Penn State has recently negotiated an arrangement with the Franco-American Commission on Educational Exchange providing for faculty exchanges with educational institutions in France. According to a recent letter from the President of the Commission, French institutions are currently interested in the possibility of faculty exchanges in the following areas. American literature and civilization; French literature and civilization; industrial management; international trade; commercial law; comparative law; law of industrial property; criminal law; domestic relations; family law; theatre arts; economics of development; anthropology, minority problems, urbanism, regional planning; and technical and vocational education. Penn State faculty interested in the possibility of participating in this program are urged to con-

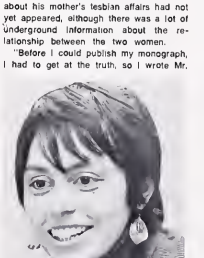
(Continued on page six)

Nigel Nicolson will talk on "Bloomsbury: The Accidental Myth" at 8 p.m. Friday, Dec. 5, in Kern Auditorium under the sponsorship of the Institute for the Arts and Humanistic Studies.

An associate professor of humanities at ershey since 1972, Dr. Trautmann is vorking on the letters with Nigel Nicolon, author of the recent "Portrait of a Marriage." Volume 1 of their collebore-ion, "The Letters of Virginia Woolf: 1888-912," will appear Nov. 17 from Harcourt race Jovanovich. The book, which takes Virginia Stephen from age six to the eve of er marriage to Leonard Woolf, is the first n a projected six-volume series.

Author of nine experimental novels — among them are "Jacob's Room," "To the ighthouse," "The Waves" and "Orlando" — Virginia Woolf was also a noted critic nd essayist and one of the leaders of London's famed Bloomsbury set. Long be-ore the feminist movement, she was ver-alizing women's need for independence in order to pursue creative work in her book, "A Room of One's Own."

"Her early letters show Virginia changing from a young woman struggling with Victorian conventions to the Virginia Woolf we now know," Dr. Trautmann says. "From the beginning, her great fantasy mind and ability with language emerge, and she reveals herself as a delightful human being."



Over half of the 638 letters in the first volume are written to Virginia's intimate friend, Violet Dickinson.

"In one very moving sequence of letters," Dr. Trautmann continues, "she writes daily to Violet while the latter is ill with typhoid. During this period, Virginia's beloved brother Toby dies of typhoid, but she conceals this fact from her friend. For almost a month, she maintains the myth of Toby's being alive, mentioning things he has said and even recalling little details such as what he is supposed to have eaten for lunch that day. Her ebility to resurrect figures, which she later uses so effectively in her novels, is present here, and it's very touching to observe."

Dr. Trautmann's path to Virginia Woolf's correspondence was somewhat circuitous. She obtained a doctorate in modern fiction from Purdue University in 1967, went to Drexel to teach and in 1970 travelled to England to do research at the University of Sussex.

"I was working on a book about literary friendships," she explains. "In the process I also wrote a long essay, "The Jessamy Brides," which was eventually published as Number 36 in the Penn State Studies series. The essay deals with the friendship of Virginia Woolf and Vita Sackville West, but in 1970, Nigel Nicolson's revelations about his mother's lesbian affairs had not yet appeared, although there was a lot of underground information about the relationship between the two women.

"Before I could publish my monograph, I had to get at the truth, so I wrote Mr.

Dr. Joanne Trautmann

Nicolson and asked him. He was very helpful, and after the monograph was finished, t sent it to him, and we remained in contact.

"Then in January, 1973, Hogarth Press (which was founded by the Woolfs and published eli of Virginia's books) decided to bring out a volume of the correspondence between Virginia and Vita, and they asked Mr. Nicolson to edit it. He decided he wanted some help and asked me if I would be interested.

"I egreed, and then suddenly he wrote saying that the project had been dropped and they now wanted to do all the letters. It was to be four volumes and wes I still interested? I was — and it turned out to be six volumes."

Dr. Trautmann and Nicolson have found some 3,800 letters, about helf of them in the Berg collection of the New York Public Library. The University of Sussex has another 400 or so, and the University of Texas also has a number. The remainder are scattered in university and private collections on both sides of the Atlantic. A few owners have refused to ellow their letters to be published.

The first volume of the correspondence has excited a great deal of attention. A portion of the letters from it were serialized in "Ms." magazine, and "Publishers Weekly" celts it a "literary event," noting that a "perceptive introduction plus perlodic notes by the editors add much to this enthrating 'first acqueintence' with Virginia Woolf nee Stephen."

"I'm delighted, of course, that people are more interested in Virginia Woolf now," Dr. Trautmann notes, "but t went her to be important for the right reasons To be sure, she has a lot to teach us about the relationship between madness and art, about love between women, about suicide and about feminism; but f hope that people remember that she is first and always e major novelist."

Response made to PSUPA request

The University registered its objection with the Pennsylvania Labor Relations Board this week to the request for withdrawal of an unfair labor practice charge against the University "without prejudice" by The Pennsylvania State University Professional Association PSEA/NEA (PSUPA).

In a letter addressed to Abe Belsky, executive director of the Pennsylvania Labor Relations Board, Delbert J. McQuaide, University counsel, said "the University does object to the withdrawal of the charge at this late date 'without prejudice.' Presumably this means that PSUPA would be free to reinstate the charge at any subsequent time it wished."

He further said that "the University, of course, does not object to the withdrawal of the charge, since it believes the charge to be without merit. However, in the interests of fairness to the University and in the interest of maintaining the integrity of the Board's electoral process, the withdrawal should be 'with prejudice' to the right of PSUPA to reinstate the charge at a later date."

The case involves a charge made by PSUPA that the University Faculty Senate is an illegally dominated company union, a charge which both the Faculty Senate and the administration of the University have denied. On Oct. 21, PSUPA in a written request asked that the charge be withdrawn "without prejudice."

In his letter, McQuaide said that "it is our understanding that on Oct. 2, PSUPA filed with the Labor Board a representation petition, and that, by cover letter, PSUPA requested that the petition be expedited.

(Continued on page five)

Health benefits improved

Two changes in the University's health insurance plans, UNICARE and UNICARE-65, which became effective Oct. 1, have been announced by Robert A. Patterson, senior vice president for finance and operations.

In the UNICARE program which applies to persons under age 65, a surgical benefit for the removal of impacted wisdom teeth will now be provided regardless of where the procedure is performed. Under the former UNICARE policy, e surgical benefit applied only it the impactions were removed during a hospital confinement.

"Modern oral surgical facilities are now avellable in many communities," Patterson explains. "Since impactions can now be successfully removed at these facilities without danger to the patient, and since most people still prefer to recuperate at home rather then in a hospital, we felt thet the UNICARE surgical benefit should recognize these changes and pay accordingly."

The second change applies to the lifetime major medical maximum available to each insured member of UNICARE-65, the plan for persons over age 65 who also quatify for Medicare benefits. The lifetime maximum, which had formerly been $15,-000, is now increased to $35,000 for each UNICARE-65 participant.

"To those persons living on a tixed retirement income, the consequences of a long-term illness posed a serious threat to a family's financial security," Patterson says. "Although very few persons had reached the former $15,000 maximum, that number was certain to increase as medical costs continue their rapid escalation. We feet that the new $35,000 benefit will provide a secure margin tor the future to our retired colleegues and their families."

The University is paying the added cost of these new benefits in keeping with its policy of providing active and retired faculty and staff members with comprehensive hospital and medical benefits at the lowest possible cost.

Liberal arts seeks applicants

The College ot the Liberal Arts is seeking applicants for the positions of Associate Dean for Instruction and Assistant Dean for Instruction.

Due to administrative reorganization within the College, the responsibilities will be integrated with program development, curricular coordination and faculty personnel for the College at all locations.

As resident instruction and continuing education are integrated, the Associate and Assistant Deans will work with the undergraduate studies office as well as with the faculty members involved at each of the Campuses. These positions include many of the responsibilities that were formerly with the Associate Dean for Commonwealth Campuses and Associate Dean for Continuing Educetion.

The Search Committee appointed by Dean Stanley F. Paulson to make recommendations on candidates includes: W. Lamarr Kopp, associate dean for undergraduate studies in liberal arts; Kent Forster, professor and head, history; Marlowe Froke, director of media and learning resources in continuing education; Evelyn A. Hovanec, as-

Letters show Virginia Woolf's comic spirit, Hershey editor says

PENN STATE COLLECTION

Faculty notes

Dr. H. Lee Mathews, professor of marketing who has been serving as acting head of the Department of Marketing, has been named head of the department. He succeeds Dr. Peter D. Bennett, professor of marketing, who resigned as head on July 1, 1974, to return to full-time teaching and research. Dr. Mathews has served on the faculty since 1965. His main areas of research are marketing planning and strategy for both consumer and industrial products companies. Dr. Mathews received his B.S. from the University of Illinois and M.B.A. and Ph.D. from Ohio State University. The author of numerous articles appearing in business journals, Dr. Mathews co-authored the book, "Analysis and Decision Making: Cases for Marketing Management." His current research projects include studies of the effect of sociological and psychological variables on credit decisions by consumers, the effect of computers on the industrial buying process and the effect of sociological and psychological "characteristic similarity" on the industrial bargaining process.

Dr. Ira V. Brown, professor of American history, gave the annual Boyd Lee Spahr Lecture in Americana at Dickinson College last month. His topic was "James Miller McKim: A Dickinson Graduate in the Antislavery Crusade." A native of Carlisle and a graduate of the college, McKim lived from 1810 to 1874. After studying both medicine and theology, he decided to devote his life to the antislavery movement. Dr. Brown's lecture was a by-product of his extensive research for a projected book on the antislavery movement in Pennsylvania from its beginning to the Germantown Protest of 1688 through the disbandment of the Pennsylvania Anti-Slavery Society in 1870.

Dr. H. K. Henisch, professor of physics, will visit the Venezuelan Institute of Scientific Investigations in Caracas, and the National University of Engineering, Lima, Peru, this month. In Venezuela, Dr. Henisch will review progress on his National Science Foundation-sponsored cooperative research program between the Institute and the University's Materials Research Laboratory. The project focuses on electrical conduction in polycrystal and amorphous alloys. Dr. Jeffrey A. Meyers, a post-doctoral student and Penn State alumnus, and Augusto Sa Neto, a graduate student in solid state science from the Institute, work with Dr. Henisch at Penn State on the project. Dr. Henisch will visit the National University of Engineering under the auspices of the Organization of American States to advise on current research, graduate training programs, and on the role of applied research in the University. He will give four lectures and will also explore the possibility of future faculty and student exchanges.

Linda Plotkin, assistant professor of art, participated in a panel discussion on printmaking at the annual Mid-America Conference of the College Art Association at the University of Missouri last week. She will also participate in the Printmaking Symposium at the Appalachian State University of the University of North Carolina Nov. 10-15. Eight prints by Ms. Plotkin are currently being shown in the "Four Women Printmakers" invitational exhibition at Smith College.

Charles L. Newmen, professor of law enforcement and corrections, is co-editor of "Perole," a new collection of essays and articles about parole in the United States. "Parole" includes the writings of lawyers, teachers, parole and probation officials, researchers, and other theorists and practitioners in the criminal justice system. The volume opens with an exploration of the foundation of modern parole and traces its historical movement from absolute incarceration to freedom within limited areas to liberation with specified conditions followed by restoration of liberty. The subsequent major divisions of the book consider, in depth, the current legal issues in the parole process, the building of a decision-making system, and some recent research about the parole process. "Parole" is published by Federal Legal Publications, Inc.

Six New Kensington Campus faculty members have been promoted to the rank of assistant professor. They are **John Patrick Cancaro,** assistant professor of business logistics; **Michael Fetack,** assistant professor of speech; **Bernard Guss,** assistant professor of engineering; **Douglas McCutlough,** assistant professor of health, physical education and recreation, **Alexander Nauda,** assistant professor of engineering; and **Ping C. Wu,** assistant professor of computer science.

Cancaro teaches accounting, statistics, marketing and finance at the New Kensington campus. His B.S. and M.B.A degrees were granted by Penn State, and he is currently working on his Ph.D. at the University of Pittsburgh.

Felack teaches speech communication and radio broadcasting and is public information officer for the campus. He earned his B.A. and M.Ed. degrees in speech from the University of Pittsburgh and worked as a professional broadcaster for 28 years.

Guss teaches engineering at New Kensington. He took a B.S. in engineering at South Dakota State University and, after serving 15 years in the United States Nevy, earned his M.Eng. from Penn State.

McCullough is in charge of instruction in recreation leadership programs at the Campus. He received his B.S. at Springfield College and his M.S. from the University of Kentucky.

Nauda, who teaches electrical engineering, has a B.S. and M.S. from the University of Pittsburgh, where he is also a Ph.D candidate.

Wu, a native of Taiwan, earned his B.A. in English from Taiwan Normal University, his M.Ed. from the University of New Hampshire, and an M.S. from the University of Pittsburgh. He is currently working on his Ph.D. there. He teaches computer science.

Three associate professors from the Department of Biology have recently presented papers on their research. **Dr. Edwin V. Gallney** read an invited paper at a conference on the cultivation of human mammary cells sponsored by the Imperial Cancer Research Fund in London. He described his work with potential cultivation systems involving normal cells derived from cosmetic surgery and from mother's milk. **Dr. C. Dale Therrien** gave three papers on his research on slime molds at the annual meeting of the American Institute of Biological Sciences at Corvallis, Ore. Co-authors included Patricia Petrick and John J. Yemma, Penn State alumni; Sharon Ventura, doctoral candidate; and Dr. O. R. Collins, U.C. at Berkeley. "Competition and Predation in Species that Saturate" was the title of the talk given by **Dr. Frederick M. Wittlams** at a seminar at the zoology department of the University of Tennessee.

Dr. Stacy Wenraub, research professor of English and director of the Institute for the Arts and Humanistic Studies, presented a lecture, "Autobiography and Authenticity," at the University of Texas last week under the sponsorship of the Humanities Research Center and the Department of English there.

Dr. Ralph T. Heimer, professor of education, has been selected as one of 13 section leaders, representing various countries throughout the world, who will be responsible for program planning for the Third International Congress on Mathematical Education, to be held in Karlsruhe, Germany, next Aug. 16-21. The section leaders will participate in a planning symposium on "Present Trends, Problems and Tasks in the Didactics of Mathematics," which will take place at the Mathematical Research Institute Oberwolfach, Black Forest, Germany, Dec. 8-12. Dr. Heimer's particular responsibility will be to write a chapter of the fourth volume of the UNESCO Series, "New Trends in Mathematics Teaching," to be published in 1976.

Two faculty members in the College of Business Administration have been named to leadership positions in the American Society of Traffic and Transportation. **Dr. Robert D. Pashek,** professor of business administration and associate dean in the College, is the new chairman of the board. He is the immediate past president. His primary interest is in logistics systems and transportation management. **Dr. John C. Spychalski,** professor of business administration is director of education for the body. He also is a member of the board of directors. Dr. Spychalski's research interests involve the economics, regulation, and administration of public utilities and transportation. The American Society of Traffic and Transportation is comprised of 3,000 representatives from business and industry, government, non-profit organizations and education. The body serves as the certification agent for professionals in the fields of transportation.

Dr. Robert Ginsberg, associate professor of philosophy at the Delaware County Campus, was guest discussant at the recent initial meeting of the Collegiate Unit for Behavioral Research for 1975-76. The Colloquium, a continuing seminar among faculty of interdisciplinary research interests in social science and related areas, was organized at the Campus last year with support from the Commonwealth Campus office. Dr. Ginsberg's discussion introduced the Colloquium's continuing focus during the Bicentennial period on the theme of "Equality. Its Philosophical, Theoretical and Methodological Dimensions." The Colloquium welcomes interest in the activities on the part of the faculty at other Campuses and hopes to extend its membership to other locations. Any interested faculty should contact Stephen J. Cimbala, associate director for academic affairs and associate professor of political science at Delaware County.

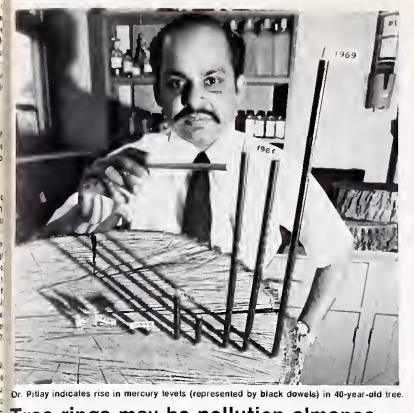
Dr. Gerald G. Johnson, associate professor of computer science in the Materials Research Laboratory, is serving as chairman of a course development sub-committee of the Committee on Data for Science and Technology (CODATA) of the International Council of Scientific Unions. The committee is organizing a course on the critical evaluation of experimental data and will hold its next meeting in Paris, France, on Nov. 27. According to Johnson, the course, scheduled at Penn State in the summer of 1973 with National Science Foundation support, is an attempt to make advanced U.S. evaluation techniques available to underdeveloped countries. The course is being tested in the NSF Chautauqua-type Short Course Program in the U.S. this year. In August, 1976, it will be taught in Europe for the first time in Yugoslavia and then in Poland the following year. The course project is supported by a grant from the United Nations Scientific and Cultural Organization (UNESCO).

Dr. Paul Edmonston, associate professor of art education, recently attended the first New England Conference of Art Educators in Portsmouth, N.H., to present an invited paper on the nature of visual intelligence in the arts. He also participated in several panels dealing with professionalism and new directions in the teaching of art. Dr. Edmonston joined the University faculty in 1960 and has exhibited his drawings in numerous regional and national juried exhibitions. He is series editor for "The Penn State Papers in Art Education" and has been associate editor of "School Arts." An exhibit of 20 drawings by Dr. Edmonston is on display in the Patter Library until Nov. 20.

Dr. Richard L. Gordon, professor of mineral economics, recently reported on "The Economics of Canadian-American Coal Relationships" at the 36th meeting of the Canadien-American Committee at Quebec City, Canada. Dr. Gordon's report discusses Canadien concern about the future prices of American coal and export embargoes which could severely harm the steel and electric power industries of Ontario. The Canadian-American Committee, established in 1957, is sponsored by two non-profit research organizations — the National Planning Association in the United States and the C.D. Howe Research Institute in Canada. Its purpose is to study and comment on problems arising from growing interdependence between Canada and the U.S. It is made up of business, labor, agricultural and professional leaders from the two countries.

Dr. T. T. Tsong, associate professor of physics, presented a series of seminars and colloquiums at three German institutes during the month of October. At the Institute of Surface Science and Vacuum Physics, Nuclear Science Center, Julich, he discussed "Quantitative Field Ion Microscopy and Single Adatoms." At the Institute of Physical Chemistry, University of Bonn, he discussed "FIM Investigations of Metal Surfaces." At Fritz Haber Institute, where he is currently on leave, and at the Free University of Berlin, he discussed "Recent Developments in Field Ion Microscopy."

Dr. Herman Cohen, professor of speech communication, was named Pennsylvania Speaker-of-the-Year at last month's annual convention of the Speech Communication Association of Pennsylvania in recognition of the distinction he has brought to the Commonwealth and the profession through his research, scholarship and leadership as president-elect of the association. A Ph.D. from the University of Iowa, Dr. Cohen taught at the Universities of Oregon and Massachusetts before joining the faculty at Penn State in 197



Dr. Donald J. Willover, professor of education in the educational administration program, presented the seventh annual Holloway lecture last week at SUNY, Buffalo. Dr. Willover is author of 70 publications on the school as a social organization and the theory-practice relation in education. The title of his lecture was "Reassessing Robustness and Educational Administration."

Dr. Clare A. Becker, professor of agricultural business management, has received the distinguished service award of the Pennsylvania Association of Farmers Cooperatives. He was cited for "assisting greatly the farmer cooperatives of Pennsylvania in areas of business management and policy during his 28 years on the College of Agriculture faculty." Dr. Becker's teaching and research have involved farmer cooperative business organizations, financial management of farmer cooperative the marketing ornamental nursery products, farm accounting and the marketing of poultry, eggs, and meat.

Dr. H. Seymour Fowler, coordinator of the Division of Academic Curriculum and Instruction and chairman of the science education faculty at Penn State, will co-chairman of the annual meeting which the Pennsylvania Science Teachers Association will hold Nov. 7 and 8 in Essington, Pa. Dr. Fowler is president-elect of the association. Other Penn State faculty participating in the meeting include **Dr. Roy Allison,** associate professor of education at Capitol Campus; and from University Park, **Dr. Dorothy Alike,** professor of education; **Dr. Robert Shrigley** and **Dr. Paul Bell,** associate professors of education; and **Dr. Theodore M. Johnson,** director of the Curriculum Materials Center.

Dr. Alfred R. Bobrowsky, senior research associate in the Materials Research Laboratory, has presented an invited plenary session talk in Czechoslovakia on energy and materials conservation using methods working under pressure at the invitation of the Czech Academy of Sciences. The 120-member conference was arranged by the Czechoslovakian Scientific and Technical Society. There is great and increasing interest in MUP in the East as European countries because of reductions of manufacturing expense, conservation of energy and materials and excellent ecological and safety aspects.

Two members of the University's Cooperative Extension Service staff were recipients of northeastern regional "Search for Excellence" Awards presented by the National Association of County Agricultural Agents at the organization's recent annual meeting in Milwaukee, Wis. Honored were **Dr. W. Harry Schaffer,** extension community resource development agent stationed in Berks County; and **William Uresh,** Erie County Extension director. Dr. Schaffer won his award for a paper on "Agricultural Preservation Ordinance — Zoning Answer?" Uresh was honored for his paper, "Administrative Management of a County Office."

Dr. Pillay indicates rise in mercury levels (represented by black dowels) in 40-year-old tree.

Tree rings may be pollution almanac

It's long been known that tree rings constitute a rainfall almanac, often used by climatologists to determine precipitation for the years before human records were kept.

They may constitute a pollution almanac as well.

"Trees undoubtedly take trace elements — pollutants among them — right out of their immediate environment," says Dr. K.K.S. Pillay. "Now we can tell how much they take each year and, often, where these pollutants originate.

"Trees might thus serve as unbiased monitors of just how and when certain pollutants are distributed around the globe."

Dr. Pillay, a research associate in nuclear engineering and an expert on neutron activation analysis (NAA), used that technique to collect data on some 30 elements — including mercury, zinc, silver and iron — in oak, cherry and locust trees. NAA makes possible the identification of minute quantities of certain elements in a specimen.

Dr. Pillay presented the results of his experiments at a recent international conference sponsored by the Oak Ridge National Laboratory and the American Nuclear Society, of which he is a member.

"The long-term concentration of trace elements in the environment," he says, "is not well known. We cannot now say with authority where, when and how much of a pollutent is ending up in plants and in man."

Dr. Pillay, on the other hand, was one of the scientists who, in the 1960s, helped identify mercury and other pollutants in fish of the Great Lakes. But it was at levels, he says that were readily identifiable by neutron activation. He is the author or co-author of almost a dozen papers on the subject.

"Attempts have been made to look at the mercury content of plant and animal tissues from museum specimens," he says. "Ironically, the specimens have always been preserved in solutions containing the very substance being investigated — mercury. Tree rings present an unambiguous record, year by year."

Dr. Pillay has developed profiles for mercury, silver and iron which he believes can be correlated with specific industrial activity.

In the summer of 1972, he acquired a slice from each of several trees that had been cut on the Penn State campus. He took "sawdust" samples from each ring of each tree and identified the trace elements by neutron activation.

"Silver begins a slow rise from about 1953," he says, "peaks in around 1960 and then recedes. This corresponds to the chronology of cloud seeding in western Pennsylvania, Maryland and West Virginia, which was carried on in the late 1950s and early 1960s."

Clouds are customarily seeded with silver iodide crystals.

Dr. Pillay's samples show a mercury rise in the 1950s.

"This could be due to the increased industrial use of mercury," he notes. "Reports by the Food and Drug Administration in 1970 show that of the 163 million pounds of mercury consumed in the United States since 1900, 100 million were consumed after 1950."

There is a distinct fall-oft in iron in Dr. Pillay's trees during the first decade of the 19th century.

"In those years, the iron furnaces which dotted the landscape in central Pennsylvania were being phased out," he says.

Such correlations are admittedly speculative, Dr. Pillay says, but could be made with greater reliability once tree-ring analysis has advanced beyond the trial stage.

"Most tree species are found wherever trees are found," he points out. "Using neutron activation, we could build up a considerable fund of information on the world-wide accumulation, migration and retention of trace elements."

Such information would permit an unbiased evaluation of just what industrial pollutants go where and enable corrective measures to be taken in advance of new industrial activity.

Dr. Pillay says: "We need to know much more about the way various species 'metabolize' the trace elements. In some species, for instance, certain metals are not retained. The arborvitae, on the other hand, pumps virtually all of the trace elements it receives into its center Clearly, such trees would not be useful for year-by-year dating."

Dr. Pillay was assisted in his experiments, which are continuing at Penn State, by Dr. Russell J. Hutnik, professor of forest ecology, and Dr. Wayne K. Murphey, professor of wood technology and assistant director of the school of Forest Resources.

Liberal arts applicants

(Continued from page one)

sistant professor of English, Fayette; Philip A Klein, professor of economics; Merrill E. Noble, professor and head, psychology (Chairman); Gladys Ritchie, associate professor of speech communication, Delaware County, and John D. Vairo, director, Delaware County.

Candidates will be sought from within the University from faculty members with teaching experience at the undergraduate level and demonstrated leadership and/or administrative experience.

Recommendations of candidates are requested and self-nominations are invited A curriculum vitae, with references, should accompany the recommendation. Recommendations should be received by the Office of the Dean, 110 Sparks Building, University Park, Pa. 16802, by Nov. 21. The positions are available es of Jan. 1, 1976.

The Search Committee will observe the University's affirmative action/equal opportunity standards.

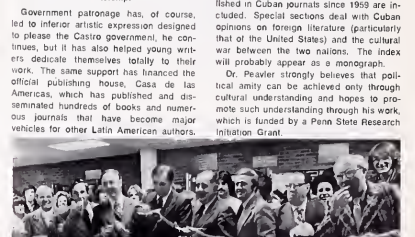
Cuban literature little known here

Although contemporary Cuban literature presents a rich and varied fare, few Americans are aware of it, according to Dr. Terry J. Peavler, assistant professor of Spanish and comparative literature.

Dr. Peavler's interest in the subject grew out of his Ph D. dissertation on Alejo Carpentier, an internationally known Cuban novelist appointed by Castro as minister of culture and head of the national press. The Penn State professor slays abreast of the field by purchasing materials directly from Cuba — he's one of the few U.S. citizens currently licensed by the Treasury Department to do so — and through research in Venezuelan, Mexican and U.S. libraries.

Because of the animosity which has existed between the United States and Cuba since Castro assumed power, little news of Cuban cultural life has been available to the public. Many Americans, according to Dr. Peavler, erroneously believe that the arts do not exist, or at least cannot flourish under a dictatorship.

Government patronage has, of course, led to inferior artistic expression designed to please the Castro government, he continues, but it has also helped young writers dedicate themselves totally to their work. The same support has financed the official publishing house, Casa de las Americas, which has published and disseminated hundreds of books and numerous journals that have become major vehicles for other Latin Americen authors.



One of Latin America's leading novelists, the Chilean Jose Donoso, has gone so far as to state that the Cuban Revolution catalyzed the so-called "boom" of Spanish-American fiction by giving young authors an opportunity to write and by uniting them in the ideal of equality for all men.

That this idealism was shattered when the Cuban government imprisoned a major poet for being anti-revolutionary does not diminish the fact that Cuba and Cuban culture have formed one of the most dynamic forces in the Western Hemisphere since 1960, Dr. Peavler says.

As a scholar deeply interested in comparative literature, particularly literary relations between the United States and Latin America, Dr. Peavler hopes to end the lack of awareness of Cuban artistic efforts through a series of publications directed not only to fellow specialists but also to all persons interested in literature.

He is now preparing a special index to which all major essays on fiction published in Cuban journals since 1959 are included. Special sections deal with Cuban opinions on foreign literature (particularly that of the United States) and the cultural war between the two nations. The index will probably appear as a monograph.

Dr. Peavler strongly believes that political amity can be achieved only through cultural understanding and hopes to promote such understanding through his work, which is funded by a Penn State Research Initiation Grant.

Beaver Campus celebrated its 10th birthday with a cake for each of its 8 buildings. Making first cuts (left to right) are: Eli G. Corak, County Commissioner; Thomas M. Kreba, Advisory Board President; Joseph P. Giusti, Campus Director; State Senator James E. Ross; President Oswald; Eugene V. Atkinson, County Commissioner; Michael Baker Jr., Trustees' President; and George T. Pettibon, County Commissioner.

University response to PSUPA request

(Continued from page one)

"Neither the University nor this office, to the best of our knowledge, has received a copy of either the representation petition or the cover letter. It is our further understanding that by letter dated Oct. 6, 1975, you informed PSUPA that the representation petition would be held in abeyance until the resolution of the unfair labor practice charge."

The unfair labor practice charge was filed by PSUPA on May 28, 1974, and subsequently extensive hearings were held before Sidney Lawrence, PLRB hearing examiner. They concluded on Apr. 23, 1975, with a transcript of 1,078 pages and 96 exhibits. Extensive proposed findings of fact and briefs were prepared and recently submitted to Lawrence.

"Needless to say," McDuaide continued, "this charge by PSUPA has required the University to expend countless man hours and significant resources to defend the Faculty Senate and the collegial system of University governance. Because of the potentially serious consequences of the charge, the University was prepared to make this significant effort, and, if necessary, it is prepared to make the effort again."

In his letter, McDuaide also raised some serious legal questions that could result if the charges were to be withdrawn "without prejudice."

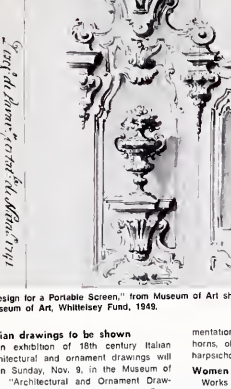
"For example," he asked, "if an election were held and PSUPA lost that election, would it be able to repudiate the results of the election and seek a second election because of the alleged unfair labor practice?

"In this connection, the Board should be aware of the fact that PSUPA continues to assert that the relationship between the University and the Faculty Senate illegally impedes the collective bargaining rights of the faculty."

McDuaide enclosed with the letter a statement published by PSUPA on Oct. 23 which makes the following basic points:

"1. The hearings proved that the Faculty Senate is an illegal company dominated union;

"2. The sole reason for the withdrawal of the unfair labor practice charge is to secure an early election; and



"3. The Faculty Senate should voluntarily cease from acting as a company union in order that a 'fair' election can be held."

"It is the position of the University that PUSPA should not be permitted to invoke the electoral processes of the Board under circumstances where it retains the right to repudiate the results of that process," McQueide said.

' Another serious question is whether the statute of limitations would bar consideration of the events which were the subject of the hearings before Mr. Lawrence," McDuaide said. "If the statute is at bar, would the parties be subjected to a new round of hearings and expense?

"It is the position of the University that it should not be put to the expense of defending this charge twice."

Arts roundup

"Design for a Portable Screen," from Museum of Art show opening Nov. 9. Metropolitan Museum of Art, Whitelsey Fund, 1949.

Italian drawings to be shown

An exhibiton of 18th century Italian architectural and ornament drawings will open Sunday, Nov. 9, in the Museum of Art. "Architectural and Ornament Drawings: Juverra, Vanvitelli, the Bibiena Family, and Other Italian Draughtsmen" is drawn from the collection of the Metropolitan Museum of Art, New York, where it will be displayed following its Penn State exhibition. Mary Myers, associate curator in the Department of Prints of the Metropolitan Museum, will deliver a gallery talk on the exhibit, sponsored by the Friends of the Museum, at 10:30 a.m. Tuesday, Nov. 11, in the Museum. Ms. Myers authored the catalog for the exhibition. Diverse projects are represented in the exhibit, including metalwork and designs for interiors, furniture and the stage. The letter, considered the Italian 18th century's ultimate expression of architecture and ornament in combination, is represented by many drawings. Among the furniture designs are sketches for an armchair, table and mirror frame, with such metalwork designs included as clocks, coffee urns and ecclesiastical objects. Also shown are examples of another aspect of 18th century theatre, the Theatre Sacra, designs for church celebrations such as those held during Holy Week. The show continues through Dec. 21.

Zorerich and Rubello exhibit

A two-man show of work by George Zoretich and David Rubello, both of the art faculty, is on view through Nov. 14 in Zoller Gallery. Shown are recent paintings, watercolors and drawings by the two artists. Zoretich, a professor of art, joined the faculty in 1946 and recently received the Barse Miller Memorial Award for watercolor in the 150th invitational National Academy of Design exhibition in New York. Head of the painting area in the Department of Art, he is also director of the graduate program there. Rubello came to Penn State in 1974 from the University of Michigan, where he was artist-in-residence at the Center for Adult Education and visiting lecturer. He studied at that university and in other Michigan schools and abroad at the Del Kongellge Akademi For De Skonne Kunster, Copenhagen, Denmark, and La Accademia Di Belli Arti, Rome, Italy. He has had a number of one-man shows both here and abroad.

Bach program

Music by Bach will be performed by a student chamber ensemble directed by Gregory Donovetsky, instructor of music, at 8:30 p.m. Friday, Nov. 7, in the Music Bldg. recital hall. One of the composer's few secular cantatas, "The Peasant Cantata," will feature two music graduate students, soprano Leone Uhler and bass Walter Wetts. The second and finat work on the Bach program will be the first Brandenberg Concerto, in F. Major, the largest of the six Brandenbergs in terms of instrumentation and duration. Eleven players on horns, oboes, violins, bassoon, viole and harpsichord will perform the work.

Women composers' concert

Works of women composers, including a world premiere, will be performed in a concert planned in celebration of International Women's Year at 8:30 p.m. Wednesday, Nov. 12, in Schwab Auditorium. Sponsored by the Institute for the Arts and Humanistic Studies and the Department of Music, the concert will feature performances by University music faculty, students and community musicians. Works to be played include the first performance of Daria Semegen's "Poeme ler, Dans la Nuit" for baritone and string orchestra; a piano sonata by Louise Talma; a sonata for viola and piano by Marion Bauer; a woodwind quintet by Yvonne Desportes; a piece by Elinor Remick Warren for sopreno, string quartet and contrabass, and Claire Polin's "Scenes from Gilgamesh" for flute and string orchestra. Among the performing individuals and groups will be Robert Trehy, Raymond Page, Diane Gold, Phyllis Triolo, Karen Scott, Musica da Camera, the Alard Quartet, and the Claremont Quintet. Free tickets are being distributed at the University Auditorium box office from 9 a.m. to 4 p.m. weekdays. Any remaining tickets will be available at the door.

Handblown glass at Kern

Handblown glass by students in the Department of Art is on view through Dec. 4 in Kern Bldg. Some 65 pieces, sculptural as well as functional, are being shown, ranging in size from about six inches to two feet and combining plate and free-form glass. The first such exhibition by University students, the show culminates the initial year of instruction using the glassblowing facility in the Visual Arts Bldg. Four furnaces are employed to melt four colors of glass, all recycled and donated to the department by the Brockway Glass Co. The white opal glass on display was made in the studio.

WPSX highlights

"The Implications of the Manson Phenomenon" is the subject of **Firing Line** Saturday, Nov. 8, at 7 p.m. Host William F. Buckley Jr. talks with Manson family prosecutor Vincent Bugliosi. The hour-long discussion centers on Manson and the two recent attempts to assassinate President Ford. Bugliosi also discusses the role of the death penalty in dealing with the Manson case.

The first Fox Movietone News films are the locus of **Lowell Thomas Remembers** Sunday, Nov. 9, at 7:30 p.m. The half-hour program centers around the events of 1919-1920 and includes a showing of the first Movietone newsreel, which dealt with the aftermath of World War I. Other films show General Pershing's farewell, the return of American troops from Europe, the demonstrations of Berliners against their government and' treatment by occupation forces, and the restlessness in America as economic depression lingered in the post-war years.

Gilbert and Sullivan's "Princess Ida" comes to the PBS **Special of the Week** Monday, Nov. 10, at 8 p.m. Written in 1884, the operetta is a biting satire on the women's education movement. It is performed by the Gilbert and Sullivan Society of Houston.

Band Day 1974 at Penn State is recaptured in a half-hour Penn State Television special, **Band Day,** Monday, Nov. 10, al 10 p.m. The program follows the Clearfield High School Band as it rehearses and travels to University Park for the event, which took place Nov. 16, 1974. Also on the program are highlights of the concert and commentary by the late Dr. James Dunlop, who had organized the annual event for the past quarter century. "Band Day" may also be seen Tuesday, Nov. 11, al 3 p.m. and Saturday, Nov. 15, at 1:30 p.m.

The famous woven carpets of the nomadic tribes of Persia are the focus of **The Tribat Eys,** Wednesday, Nov 12, at 8 p.m. The hour-tong documentary follows the Oashqa i nomads from their summer pastures in the Zagros Mountains of Southern Iran to their winter quarters near the Persian Gulf to see how their world famous rugs are still made in the traditional ways. The program examines the rugs as art and explores their role in the nomadic culture.

"The Wild Duck," Ibsen's comedy-drama about a dreemer who is forced to see lhe ugly truth about himself, is featured on **Classic Theatre: The Humanities in Drama** Thursday, Nov. 13, at 9 p.m. Star Denholm Elliott and Rotf Fjelde, professor of English and drama at Pratt Institute and the Juilliard School are featured in a companion program, **Classic Theatre Preview,** Tuesday, Nov 11, at 7:30 p.m. and again on Thursday immediately preceding the play. The preview looks at the work of Ibsen as seen from an actor's point of view.

Funding opportunities

(204-1) The National Institutes of Health (NIH) has announced a request ler research grant application (RFA) ter **Pathogeneals of Inflammation in the Lung.** All proposals will be reviewed by en ad hoc panol. A teller of orient is due by 12/1/75 and final applications by 2/15/76. (Rel NIH Guide, 10/22/75)

(204-4) NSF Faculty Fellowships in Science Applied to Secral Problems will be awerded to some 60 science teachers in mid-April, 1976. Application deadline date is Feb 6. All holds of science are included social sciences, mathematics and engineering. Awardees must be U.S. citizens or nationels with a baccalaureate degree end five years or more of fullstime college teaching. Information is available from NSF (202-282-7395) (Rel NSF PR/5-91)

(204-5) The Public Health Service (NNLI) has issued requlelions for the awarding of grents for projects to. (1) demonstrate the effectiveness of new techniques and procedures for prevention, diagnosis and treatment of heart, blood vessel, lung and blood diseases; (2) develop and eveluete methods of educating health precitioners in prevention and control of these diseases, and (3) develop and evaluate methods of educating the public in prevention and control of these diseases (Ref 42FR56530-32, 10/27/75)

(204-6) The Alcohol, Drug Abuse and Mental Health Administration (ADAMHA) will provide **National Research Service Awards for Individual Predoctoral and Postdoctoral Fellows** in various areas of biomedicel and behavioral research as specified in the announcement. Applicators deadline is Jen. 2, with results to be announced in June (Ref ADAMHA announcement, 10/10/75)

(201-4) Business and Professional Woman's Foundation, 2012 Massachusetts Ave., N.W. Washington, D.C 20036 (202-293-1200) offers fellowships to doctoral candidates and postdoctoral students conducting **research on the problems and concerns of working women.** Applicant must be U.S citizen or a Latin American studying in the U.S. The applicatien deadline is Jan. 1, 1976; awards for $500-$3000/year. For further information and application materials, write the address given above, including a brief vile and description of your research plans. (Ref. FO75-24) (154-1)

(201-7) American-Scandanavian Foundation (Attn Ms. M. Schulsinger, Exchange Div., 127 E. 73rd St., New York 10021) offers **fellowships for graduate study in Scandinavia.** For further information, write to the address given above. (Ref. FO75-25)

DuBois professor donates her piano

The DuBois Campus of the University now has a Baldwin spinnet piano, thanks to the generosity of Janette M. Burns, who retired last spring as an associate professor of speech.

Prof. Burns donated her piano to the Campus primarily because she is no longer able to play it as often as she used to.

"I believe a musical instrument should be used," she explains "and this was too good a piano not to be played."

Although Prof. Burns says modestly that the Baldwin was "too good a piano for me," she has been sitting before a keyboard ever since she was a child. As a teenager, she played in silent movie houses in her hometown of Waterford, Pa., and used the money she earned in the theaters to pay for additional music lessons.

Shortly before her retirement and return to Waterford last spring, Prof. Burns capped her academic career on her 65th birthday by serving as Campus marshal during commencement exercises at DuBois.

"The DuBois Campus has meant a lot to me," says Prof. Burns, explaining that she hopes the plano will help to expand the arts program there.

The plano was quickly put to use for a fall production of The Mansion Readers and has been used also by student musical groups and individuals. It is located in a combination lecture room and auditorium in Swift Building where it is available for general use as well as cultural programming.

Prof. Burns received her B.A. in liberal arts in 1930 and her M.A. in English literature in 1934, both from Penn State.

Another one of Prof. Burns' contributions to her alma mater is the composition of a history of the Penn State Players. The history, which was commissioned by the College of Arts and Architecture, will be published in the near future.

Prof. Burns says she hopes her retirement will give her more time to write. She "dabbles in verse" and short stories and is also doing academic research on the history of film

Prof. Burns at her retirement dinner.

Staff vacancies

The following vacancies ter positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in vacancies may apply by calling the Employment Division, 865-1587 (Network Line 476-1587). Applications for these staff vacancies will be accepted until 5 p.m. Thursday, Nov 13. **Do not contact the area that has the vacancy.**

Applicationa for staff vacancies are considered without regard to race, color, creed, sex, or national origin.

ASSISTANT DIRECTOR, COOPERATIVE EXTENSION SERVICE, COLLEGE OF AGRICULTURE — Southwest Region (Beaver, Butler, Armstrong, Indiana, Allegheny, Westmoreland, Fayette, Washington, Greon Counties) — Office to be located within the administrative region.

Responsible for the total Extension program in the region, and for the personnel to conduct such a program. Works closely with persons at the state level who are responsible for program development. Master's degree or equivalent, plus a minimum of five years' experience in County Extension work. Administrative experience desirable.

ASSISTANT FILM COORDINATOR, CONTINUING EDUCATION — University Park

Responsible for providing film services to the various production and programming areas, including the scheduling of personnel and equipment. A bachelor's degree in broadcasting, journalism or e related field and at lenst two years of experience in this field are desired

University Park Calendar

November 6-16

Items to be included in this calender should be sent to the Calender Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, Nov. 6

Commons Videotape, National Geographic Special, "The Incredible Machine," 12 noon, Kern lobby.

Sports: Women's Field Hockey, vs. Ursinus, 3 p.m.

Colloquy program, 4 p.m., HUB main lounge. Audrey Rodgers, English, on "Women in Literature."

Colloquy program, 7:30 p.m., HUB ballroom. University Readers, "What Do Women Want?"

Sigma Xi luncheon, 12:30 p.m., Room 101 Kern. Dr. Thomas Bates, mineralogy, on "The Land-Grant University: Science Adviser to the Public."

American Chemical Society, Central Pennsylvania Section, dinner dance, 5:30 p.m., State College Elks Country Club. Talk by Rustum Roy on "Nuclear Wastes: Experts' Views on Safety."

University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre

Friday, Nov. 7

Ag Hill Festival, 6.30 p.m., HUB ballroom. Annual get-together for ag students and faculty.

Commons silent film, "Phantom of the Opera," 7 p.m., Room 112 Kern.

Sports: Soccer, vs. Temple, 7 p.m., Jeffrey Field.

Folk and Square Dance Roundup, 7:30 p.m., White Bldg.

GSA's Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.

Le Treteau de Paris, "Phedre," 8 p.m., Schwab. Presented by the Department of French.

Student performance of music by Bach, 8:30 p.m., Music Bldg. recital hall.

Colloquy program, 9:30 p.m., University Auditorium. Ellen Burstyn, actress

Saturday, Nov. 8

Sports: Lady Lion Cross Country Classic. Football, vs. North Carolina State, 1.30 p.m., Beaver Stadium.

Hazel Union Board Annual Jammy, 8 p.m., HUB ballroom.

University Theatre, "The Caucasian Chalk Circle," 8 p.m., Playhouse Theatre.

Sunday, Nov. 9

PSOC hiking Club, exploration in Big Kettle and Black Ridge Area of Rothrock

State Forest, 9 a.m.

Chapel Service, 11 a.m., Music Bldg. recital hall. Joseph Rhodes Jr., State Legislature Representative, member, Board of Trustees.

Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Rev. David Minor, pastor, The Gospel Assembly, Coudersport, Pa.

Monday, Nov. 10

Piano recital by Steven Smith, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Nov. 11

Gallery talk, Mary L. Myers, associate curator, Metropolitan Museum of Art, on "Architectural and Ornament Drawings: Juvarra, Vanvitelli, the Bibiena Family and Other Italian Draughtsmen," 10:30 a.m., Museum of Art

Wednesday, Nov. 12

Noontime Concert, 12:15 p.m., lobby of Kern.

FSHA 410 dinner, The First Thanksgiving, 5:30 p.m., Maple Room, Humen Development. Reservations required, 865-7441.

Concert of Women Composers, 8:30 p.m., Schwab Auditorium. Sponsored by the

Computation Center, 7:30 p.m., Room 108 Forum. "RJE(1)."

Tuesday, Nov. 11

Ceramic Science, 9.35 a.m., Room 301 Mineral Industries. Dr. R. Hogg, material sciences, metallurgy section, on "Segregation in Flowing Powders."

Plant Pathology, 9.45 a.m., Room 213 Buckhout. Dr. Leonard Weinstein, Boyce Thompson Institute, on "Interactions between Biotic and Pathogens and Air Pollutants."

ARL, 10.45 a.m., Eric A. Walker Conference Room, on "Discrete Fourier Transform Techniques."

Biochemistry, 11.10 a.m., Room 101 Althouse. Dr. Irwin Goldstein, biological chemistry, University of Michigan, on "Immunochemical Studies of Some Carbohydrate-Protein Conjugates."

Comp Lit luncheon, 12:15 p.m., Presidential Room, Hotel State College. Murray Martin, associate dean, University Libraries, on "Landscapes into Poetry: The New Zealand Experience."

Analytical Chemistry, 12.45 p.m., Room 333 Whitmore. C. E. Figgins on "Thermodynamic Indexing of G. C. Liquid Stationary Phases."

Institute for the Arts end Humanistic Studies.

Artists Series, Four Decades of American Film Festival, "All Quiet on the Western Front," 8:30 p.m., University Auditorium.

Thursday, Nov. 13

Commons Videotape, 12 noon, Kern lobby.

Dr. Eugenio Battisti, art history, on "Boccaccio and the Visual Arts," 8 p.m., HUB Auditorium.

Friday, Nov. 14

Sports: Soccer, vs. Pittsburgh, 7 p.m., Jeffrey Field.

GSA Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, Nov. 15

Sports: Women's Cross Country USTFF Meet.

Sunday, Nov. 16

Sports: Men's Cross Country Eastern USTFF Championships.

PSOC Hiking Club, hunt for Old Wheeler, Brewer and other trails on Tussey Ridge, 9 a.m.

Black Christian Fellowship worship service, 11 a.m., Black Culturel Center. Elder Harold McKenzie, chairmen, Black Christian Fellowship, Board of Elders.

Seminars

Thursday, Nov. 6

Agronomy, 8:15 a.m., Room 301AB Ag. Administration. Dr. Pete Fletcher, forestry, on "Research Associated with the Pine Creek Watershed."

Chemistry, 12.45 p.m., Room 333 Whitmore. Donald R. Johnson, National Bureau of Standards, on "Molecules in the Interstellar Environment."

Economics, 3.30 p.m., Room 101 Kern. Dr. Warren Robinson on "Indirect Social and Economic Effects of Export Taxes in Thailand." Discussants: Wayne Schuler, agricultural economics, and John Riew, economics.

Anthropology, 3.30 p.m., Room 107 Social Science Bldg. Fruma Klass, editor and editorial consultent, on "How to Get Cited In Someone Else's References: Writing the Publishable Paper."

Physics, 3.30 p.m., Room 117 Osmond. E. P. Gross, Brandeis University, on "Topics on Kinetic Theory of Gases and Plasma."

Microbiology and Cell Biology, 3:55 p.m., Room S2 Frear. Dr. Satvir S. Tevethie, Tufts University School of Medicine, on "Lymphocyte-Macrophage Interaction in Tumor Rejection."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Frederick T. Boland, graduate student, on "Modeling Heat Fluxes and Surface Temperatures over Urban Areas."

Philosophy, 4 p.m., Room 151 Willard. Dr. Robert Tompkins, Oregon College of Education, on "The Theory of Relativity and Buddhism."

Computation Center, 7:30 p.m., Keller Bldg. "Introduction to the Computation Center (4)."

Friday, Nov. 7

Engineering Science and Mechanics, 4 p.m., Room 215 Hammond. Dr. Patrick J. Smith, IBM, Poughkeepsie, on "Dislocations in Electronic Devices."

Monday, Nov. 10

Biochemistry, 11.10 a.m., Room 101 Althouse. Dr. Irwin Goldstein, biological chemistry, University of Michigan, on "Lectin as Carbohydrate Binding Proteins."

Genetics, 3:55 p.m., Room 111 Tyson. Don Zeaser, School of Forest Resources, on "Interracial Matings of Scotch Pine: F, Characteristics."

Enlomology and Plent Pathology, 4 p.m., Room 204 Patterson. Dr. Richard DeCapue, University of Connecticut, on "Immunological Techniques Applicable to the Study of Baculovirus."

Air Pollution Control, 2:20 p.m., Room 140 Fenske. Alex Mistevy, graduate student in mechanical engineering and air pollution control and equipment engineer with Corning Glass Works, State College, on "Thermal Deposition of Small Particles."

Entomology and Plant Pathology, 4 p.m., Room 213 Buckhout. Dr. Richerd DeCapua, University of Connecticut, on "Antigenic Characterization of the Baculoviruses."

Computation Center, 7:30 p.m., Room 158 Willard. "JCL(5)."

Wednesday, Nov. 12

Computation Center, 7:30 p.m., Room 108 Forum. "RJE(2)."

Thursday, Nov. 13

Agronomy, 8.15 a.m., Room 301AB Ag. Administration. James Eekin, Ag. Extension, on "Bahama Project — Update."

Chemistry, 12.45 p.m., Room 333 Whitmore. Herbert D. Kaesz, UCLA, on "Aromatic Metalation Reactions with Methylmanganese and Methylrhenium Carbonyl Complexes."

Mathematics, 4 p.m., Room 102 McAllister. Garerd Sacks, Harvard University, on "Algebraically Closed Division Rings."

Computation Center, 7:30 p.m., Room 158 Willerd. "JCL(6)."

Exhibits

Museum of Art: 200 Years of Royal Copenhagen Porcelain. Architectural and Ornamental Drawings: Juvarra, Vanvitelli, the Bibiena Family, and Other Italian Draughtsmen, opening Nov. 9. Drawings from the Permanent Collection.

HUB Gallery: U.N. Exhibit. Multi-media exhibit on women.

Kern Gallery: Renescence Gallery Exhibit, Live-in-Art, through Nov 8. Wendy Snetsinger, photography. Waskewich Gallery Print Sale and Exhibition, Nov. 10-14. Handblown glass by art students.

Zoller Gallery: Zoretich and Rubello.

Chambers Gallery: Art Department student group show. Gold and silver by students of SUNY at New Paltz.

Cultural Center, Welnut Bldg.: An exhibit of mixed media, the work of the Pittsburgh Chapter of the National Conference of Artists.

Pattee Library: Exhibit of crafts, main lobby Drawings by Denise Peleski, lending services lobby. Drawings by Dr. Paul Edmonston, through Nov. 20. Batik paintings by Sharon Sell, opening Nov. 11, east corridor lobby.

Hammond Gallery: One-man show by Paul Harchanik, instructor of art, Nov. 9-14

Films

Friday-Sunday, Nov. 7-9

"Dey of the Dolphin," 7:30 and 10 p.m. Room 102 Forum.

"Frankenstein," Andy Warhol, 7:30 and 10 p.m., Findley Rec Room.

"Thunderbolt and Lightfoot," 7:30 and 10 p.m., Forum.

"S*P*Y*S," 7:30 and 10 p.m., Pollock Rec Room.

"American Graffiti," 7:30 and 10 p.m., Redifer Room D.

Friday-Sunday, Nov. 14-16

"Animal Crackers," 7:30 and 10 p.m., Room 102 Forum.

"A Man for All Seasons," 7:30 and 10 p.m., Findley Rec Room.

"A Night at the Opera," 7:30 and 10 p.m., Redifer Room D.

"King of Hearts," 7:30 and 10 p.m., Waring Lounge.

University Schedule

Friday, Nov. 14

Last day for signing fall term Emergency Loans. Room 106 Shields.

Saturday, Nov. 15

Classes end.

Meetings

Thursday, Nov. 6

Panhelienic Council, 7:30 p.m., HUB main lounge. "Career Opportunities for Women."

PSOC Ouling Club, 7:30 p.m., Room 214 Boucke. Film, "By Nature's Rule."

Tuesday, Nov. 11

Faculty Seneie, 2:10 p.m., Room 112 Kern.

Wednasday, Nov. 12

Penn State Mining Engineering Society, 7:30 p.m., Room 26 Mineral Sciences. F. W. Paddock, senior engineer-underground, Consolidation Coal Co., Pickneyville, Ill., on "Current Aerial Surveying Practices at Consotidation Coel Co., Midwesiern Division."

Self-portrait by Paul Harchanik in his Hammond gallery show.

Arts roundup

Harchanik exhibits

Paul Harchanik, instructor of art, will exhibit some 300 recent prints, drawings and collages in a one-man show from Nov. 9 through 14 in Hammond Gallery, with a public reception planned from 8 to 10 p.m. Monday, Nov. 10, in the gallery. The exhibit will constitute the master of fine arts show by Harchanik, who joined the University art faculty this year. He holds a bachelor's degree from East Carolina State University.

Smith to play

Piano works by Beethoven, Ravel and Liszt will be performed in a recital by Steven Smith, assistent professor of music, at 8:30 p.m. Monday, Nov. 10, in the Music Bldg. recital hall. Four movements from Ravel's "Tombeau de Couperin," written in memory of the 18th century French master, Francois Couperin, will be performed in honor of the 100th anniversary of Ravel's birth. Each movement of the work commemorates individually a friend of Ravel who died in the first World War. "Eglogue" from Years of Pilgrimage, Vol. 1, and "Mazeppa," transcendental etude #4, both by Liszt, will also be performed The 1952 "Mazeppa," which Liszt also composed in orchestrel version, is a heroic tone poem on the mythical-historical Ukreinian national leader. Beethoven's "Sonate in A Mejor," opus 2 #2, and his "Sonata in E Major," opus 109, will complete Monday's program. Smith, e frequent soloist with area orchestras, made his European debut at the Salzburg Mozert Festivel as a Fulbright scholar at the Mozerteum Academy in Austria.

Battisti lecture

Dr. Eugenio Battisti, professor of art history, will speak on "Boccaccio and the Visual Arts" at 8 p.m. Thursday, Nov. 13, in the HUB Auditorium. Sponsored by the Departments of Art History end Spanish, Italien, and Portuguese, the lecture is open to all interested parsons.

News in brief

(Continued from page one)

tact the office of the University Committee on International Programs (UCIP), Room 306, Willard Bldg. (865-9549) for further information.

Program to train paramedics

A model program to channel the unemployed into understaffed health care professions will be launched at the New Kensington Campus Dec. 8. One hundred unemployed or underemployed persons will be accepted in the program, which is funded in part by a Pennsylvania Department of Education Vocational Training grant of $139,100. The program is two-pronged. Fifty jobless persons will be prepared to serve as medical paraprofessionals and 50 more (including currently employed x-ray technicians) will be trained as radiological health technicians.

Both programs will require at least one year of clinical and academic study, according to Dr. George Shoffstall, assistant director for continuing education in the College of Science. The courses, many of which were specially designed for the programs, will be offered by Penn State fecuty members at New Kensington, while clinicel training will be provided at hospitals in the Pittsburgh area. Dr. Shoffstall expects the medical paraprofessional aide program to have the greatest impact on the unemployed participants. "We're counting on that part of the effort to give these individuals their first step on the hospitel career ladder. We hope it will enable them to get themselves out of the unemployment spiral and to regain and hold their self-esteem," he says.

Subarctic plants illustrated

George H. Beatty, associate curator of the Frost Entomological Museum, will present a public lecture, "Plant Hunting in Newloundland and Labrador," at 7:30 p.m. tonight (Thursday) in Room 112 Kern Bldg. Using six lap-dissolve projectors and multiple screens, Beatty will illustrate many little known plants and their subarctic habitats simultaneously, with botanical and location data superimposed on the screens. Maierial of botanical, environmental, geographic and photographic interest, derived from his recent research on northern endemic plants, will be included in the presentation. The lecture is sponsored by the Penn State Biological Society in collaboration with the Horticulture Club and Phi Sigma and Pi Alpha honorary societies.

Hershey becomes neonatal center

The Milton S. Hershey Medical Center has been named one of four hospitals to participate in the Neonatal Surgery Program of the Pennsylvania Department of Health. Other state neonatal surgery centers have been established at Children's Hospital and St. Christopher's Hospital for Children, both in Philadelphia, and Children's Hospital of Pittsburgh. These regionel centers were established to treat infants with a number of congentiat malformations of the intestinal, respirator and urlnary tracts. At the Medical Center there is a neonatal intensive care unit which has ten acute care beds, eight of them electronically monitored. There is also a tenbed Intermediate care and recovery area. The nursing staff consists of 33 specially trained nurses with an everage staff of two patients to one nurse or better.

Dr. Stephen J. Shochat, chief of pediatric surgery at Hershey, will be the director of the neonatal surgical center. He is e graduate of Randolph-Macon College and the Medical College of Virginia and served residencies at Barnes Hospital in St. Louis, Mo., and Children's Hospital Medical Center in Boston, Mass. He held a fellowship in surgical research at Children's, then was awarded a Fulbright Scholarship in Medicine (Thoracic Surgery) at Queen Elizabeth Hospital in Birmingham, England. He received a fellowship in thoracic surgery at George Washington University, Washington, D.C., then became chief of pediatric surgery and assistant chief of thoracic surgery at Malcolm Grow U.S. Air Force Medicel Center at Andrews Air Force Base, before coming to Hershey. His current research deals with the study of various aspects of tumor immunity in childhood cancers.

Volunteers needed

The Voluntary Action Center of Centre County, Inc., (VAC) is seeking individuals willing to donate their services in their areas of expertise on a consulting basis. VAC has no paid employees; it seeks to match the skills and services of volunteers with agencies and individuels needing help. The Center has a Transportation Corps for countians who have no other means of lending rides. Drivers willing to undertake one-time assignments or to drive one person regularly are needed in Howard, Bellefonte, Mountain Top, Pleasant Gap, Philipsburg and Snow Shoe. Without help, many residents are unable to get to well-baby clinics, medical appointments or counseling services. (VAC insures all its drivers.) The VAC office is located at 409 S. Allen St., State College. It is open Monday through Friday, from 10 a.m. to 3 p.m. Telephone 234-8222.

International holiday planned

Because of the success of last year's first international Holiday Festival, a second will be held this year from Dec. 8 through 14. Religious, cultural and social events representative of different holiday customs around the world will be recreated, and there will be concerts, films, dances, art exhibits and native craft demonstrations. Sponsoring campus groups, which include the International Student Council, hope the Penn State community will join with them in the spirit of the holiday season. Anyone caring to participate in the actual planning and organization of the festival should contact J. William Johnston, chairman of the campus-wide program committee, at 865-1878.

"Pivot" picks Nobel laureates

"Pivot," the magazine of poetry founded and edited by Joseph L. Grucci, retired associate professor of English, maintains its record for picking Nobel laureates. An article by Grucci in the 1974 issue hailed "Eugenio Montale: Nobel Candidate." In it Grucci, who established Penn State's Poetry Workshop when he came to the University in 1950, analyzes Montale's influence and supports his candidacy for the Nobel Prize — which he received this fall. At the outset of his career, Grucci was also one of the first translators of the Chilean poet, Pablo Neruda, long before he received the Nobel Prize for poetry, and "Pivot" has published a number of Grucci's translations over the years.

Six-week session cancelled

During the 1976 summer term, the University will not offer a six-week session along with the regular ten-week term as it did last summer. The six-week session had been scheduled on an experimental basis, subject to evaluation and review, primarily to accommodate teachers and others. The evaluative report indicated that both the quality end quantity of instruction offered for the six-week program was less than satisfactory to students and faculty and also cited scheduling and administrative problems with the dual program presented. Classes for the ten-week term will begin on June 9, following orientation, advising and registration, and terminate on August 18, followed by three days of final examinations. Commencement is scheduled for August 28.

Capitol Campus building begun

Construction on a new multi-purpose academic and recreational building at Capitol Campus has begun. The structure is located directly south of the present main building. Classrooms, conference rooms and staff offices will be located in one area of the building, which will also house an area for indoor sports such as basketball, handball, volleyball and gymnastic events, along with locker room facilities.

Check before dialing

A number of faculty and staff members report being inconvenienced as the result of improperly dialed telephone calls within the University. University Telephone Service reminds persons calling into and within the University Park telephone system that there are both 863 and 865 numbers on campus. Callers are requested to check the telephone directory carefully end lo insure that they use 5 for 865 numbers end 3 for 863 numbers. Callers at Commonwealth Campuses dialing University Park on the Pennsylvania Network should use 475 for 865 numbers end 433 for 863 numbers.

A $1 million Study/Learning Center at the Worthington Scranton Campus was dedicated Friday, Oct. 31, during a luncheon at which President John W. Oswald delivered the dedication address.

The two-story structure contains approximately 20,000 square feet. It will house a game room, food service area and a walk-in book store on the upper level. The lower floor has a quiet lounge, three classrooms, three seminar rooms, student government offices and meeting rooms and student affairs olices including counseling and health rooms.

T. E. Lawrence book published

Stanley and Rodelle Weintraub are the authors of a new book, "Lawrence of Arabia The Literary Impulse," the first study of the writing career of T. E. Lawrence. It will be published Nov 10 by Louisiana State University Press.

Stanley Weintraub is research professor of English and director of the institute for the Arts and Humanistic Studies, and Rodelle Weintraub is an instructor of English. They co-authored an earlier book, "Evolution of a Revolt: Early Postwar Writings of T. E. Lawrence."

More than he wanted military lame or political influence, Lawrence wanted to succeed as a writer, and in his "Seven Pillars of Wisdom" he produced, in the Weintraubs' estimate, one of the great autobiographies in English.

The trouble was that he used himself up in his memoir and had nothing left to write about, the Weintraubs explain. Although he could have had a high military post, Lawrence pulled strings to join the air force as a private, seeking material to turn into literature.

He did complete a draft of a semifictionalized memoir of Royal Air Force recruit training, "The Mint," but its explicitness so horrified British officialdom that in his lifetime it never went beyond circulation in manuscript to friends. He also completed an effective translation of Homer's "Odyssey," which he published in 1932 under the name of T E. Shaw.

Ironically, the Weintraubs point out, the man who translated Homer from the Greek was technically classified as illiterate by the air force. Lawrence deliberately flunked his literacy exams to avoid promotion.

The last piece of writing he saw published during his lifetime was a technical manual, "The 200 Class Royal Air Force Seaplane Tender." He had grandiose plans for setting up his own press after retirement from the service, but he was killed a few months later in a motorcycling accident.

"Although he had the necessary technical ability," the Weintraubs conclude, "Lawrence lacked inspiration, the power of invention necessary to sustain a continuing career as a writer."

Mrs. Weintraub, assistant editor of the "Shaw Review," is the editor of the forthcoming "Fabian Feminist: Shaw and Woman." Dr. Weintraub is the author or editor of more than 20 books, including "Private Shaw and Public Shaw," a dual biography of Bernard Shaw and Lawrence, "Reggie"; "Beardsley"; "The Last Great Cause" and "Whistler. A Biography."

Journal focuses on science, values

The current fall issue of "The Journal of General Education" focuses on the topic of science and values.

"Science is not just an enterprise engaged in by experts who accumulate specialized knowledge for obscure ends," Journal editors Robert and Caroline Eckhardt write in their introduction to the issue. They continue:

"The eminent British science writer Lord Ritchie Calder has formed science 'knowledge working for its living.' As it works for its living, science is shaped by, and in turn shapes, our values; it is right and proper for scientists and nonscientists alike to attend to this process of mutual influence."

Articles in the issue discuss the impact of the National Science Foundation on the education of scientists in the United States since the agency's founding 25 years ago. Other articles consider the ethical and legal problems in fetal research, the Jensen-Shockley controversy over the inheritability of intelligence, and the relationship between logical empiricism and religious modes of thought.

Three members of Penn State's faculty have contributed to the journel, which is published by the University's Press. Dr. Henry Johnstone, professor of philosophy, is the author of "Introducing Genesiology," in which he presents a detailed philosophical consideration of the problems involved in defining the point at which life begins and discusses the morel and legal implications of various definitions. Dr. E. E. Hunt Jr., professor of anthropology and health education, overlooks Arthur Jensen's "Educability and Group Differences" from the standpoint of an anthropologist, and Dr. John J. Wiorkowski, assistant professor of statistics, brings his point of view to bear on "Race Differences in Intelligence."

Caroline Eckhardt is an assistant professor of English and comparative literature and Robert Eckhardt, an assistant professor of anthropology at the University

Dr. Gerald Bottorff, assistant professor of mathematics at Mont Alto, lights a candle as the person whose deposit boosted the Penn State Federal Credit Union to over $2 million in shares. A savings and loan organization open to all employees, the Credit Union has almost 3,000 members.

Faculty club license essential for operation, Olson says

Dr. Donald R. Olson, president of the Faculty Club and professor and head of the Department of Mechanical Engineering, said on Monday, in advance of hearings by the Pennsylvania Liquor Control Board (PLCB), that the Faculty Club's application for a club liquor license is essential to successful operation of the Club and should not be a threat to local tavern owners.

Officers of the Faculty Club testified on behalf of the Club's application at hearings by the PLCB yesterday, Wednesday, Nov. 12, in the State Office Bldg., Altoona.

The Club last March applied to the PLCB for a club license which would permit the serving of alcoholic beverages to members of the Club and to their guests.

Dr. Olson pointed out that affiliation with the nearby Nittany Lion Inn, as has been suggested by some who oppose the issuance of the club license, would weaken the autonomy of the Faculty Club.

To qualify for the use of the license now held by the Inn, Dr. Olson said, the Faculty Club building, now under construction, and the Inn would need to have a structural connection. This would damage the architectural features of the new building.

In addition, he pointed out that all liquor services in the Club would be required to be under the management of the Inn and thus the Club would lose the revenue from sales.

Under the PLCB regulations, the Faculty Club license application involves, among other questions, a determination as to whether or not the State College area is a resort area within the meaning of the Liquor Code. Harris Twp. was determined to be a resort area in 1965 when a license was issued to the Elks Club, located in the township. No other license has been granted in Harris Twp. under the resort provision.

Dr. Olson reported that PLCB personnel have explained that issuance of the license under the resort area provision does not open the area to unlimited retail licensing as has been suggested by opponents of the Faculty Club license. Applicants for a liquor license would continue to be required to show evidence of substantial need for the issuance of each license.

The Faculty Club was incorporated by the Commonwealth in 1973 with 220 charter members. Membership now totals 450.

Plans for the Faculty Club building, designed by Venturi and Rauch, Philadelphia architects, were approved by the Board of Trustees of the University earlier this year and construction was started in late summer. Completion is expected next August.

The building, costing $909,000, is financed by private gifts given for a faculty club, and on completion the building will be leased to the Faculty Club which will have responsibility for its operation.

The application filed in March by the Faculty Club is the only liquor license application for facilities on the University Park Campus now pending before the PLCB, Dr. Olson said.

He said that Robert A. Patterson, senior vice president for finance and operations, has denied reports that applications for a license for the Hetzel Union Bldg. or for the Kern Graduate Bldg. have been filed, saying that the Board of Trustees has not ever considered this action and that the University has no plans at this time to file for such applications.

News in brief

Pattee assignments Dec. 1

Members of the faculty who wish to obtain study space assignments in Pattee Library for the winter term should note that the assignments will be made on a first-come, first-served basis Monday, Dec. 1, beginning at 7:45 a.m. in Room 106 General Pattee. There are only 46 such spaces. Further questions should be directed to Dordella Swinton, 865-5420.

1,775 degree candidates

Approximately 1,775 persons are listed as candidates for degrees at University Park commencement exercises Saturday, Nov. 29, at 10:30 a.m. Of this number, 468 will be receiving advanced degrees, 1,193, baccalaureate degrees and the remainder, associate degrees. President Oswald will be the commencement speaker, and Trustee Helen Wise will assist in conferring the degrees.

Calendar material due

INTERCOM will not be published during term break. The Dec. 4 issue will carry the winter term calendar, and material for it should be sent to the Calendar Editor, 312 Old Main, by Nov. 20.

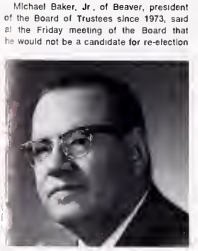
Non-discrimination affirmed

In a resolution approved at last week's Trustee meeting, the Board reaffirmed its non-discrimination policy in recruitment, hiring, and promotion of all employees to include the handicapped.

The resolution, as approved, reads:

"RESOLVED, that the Board of Trustees hereby reaffirms the University's established policy of non-discrimination in recruitment, hiring and promotion of all employees. The Board further reaffirms the University's policy of maintaining programs of affirmative action to avoid such discrimination. The officers of the University are directed to continue to administer all personnel policies without regard to race, creed, color, national origin, handicap or age as provided by law, or sex, except where sex is a valid occupational qualification. The officers are further directed to periodically review all programs of affirmative action to ensure compliance with the policy of non-discrimination."

Winter parking rules



Beginning Saturday, Nov. 15, 1975, and continuing through Wednesday, March 31, 1976, wintertime parking regulations will be in effect at University Park. Parking will be prohibited in most parking areas from 2:30 to 6 a.m. so that accumulated snow can be plowed and/or removed. All parking areas that are designated as snow removal areas will have signs posted at the entrance stating, "No Parking 2:30 a.m. to 6 a.m." The no parking rule is in effect whether or not snow is on the ground. If snow should accumulate before Nov. 15 or after March 31, faculty and staff members and students are requested not to park vehicles overnight in snow removal areas.

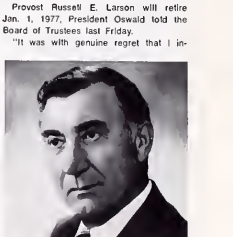
Larson, Baker plan to retire

Trustee head to step down after Jan. 17 elections

Michael Baker, Jr., of Beaver, president of the Board of Trustees since 1973, said at the Friday meeting of the Board that he would not be a candidate for re-election as president when the annual elections are held on Jan. 17.

Mr. Baker



Mr. Baker, who is chairman of the Board and chief executive officer of the Michael Baker Corp., Beaver, worldwide consulting engineering firm, has been a member of the Board since 1964, serving as a trustee elected by alumni of the University. He is a 1936 graduate of Penn State.

Mr. Baker explained that his decision was made in accordance with a policy of the past few years under which a Board president serves only three one-year terms, a policy which he believes is for the good of the University.

Search committee will seek Provost's replacement

Provost Russell E. Larson will retire Jan. 1, 1977, President Oswald told the Board of Trustees last Friday.

"It was with genuine regret that I informed the Board of Dr. Larson's plans for early retirement at age 60," Dr. Oswald said, explaining that he was announcing the plans because he knew that Dr. Larson's decision was unchangeable and that plans must be made immediately for the search and ultimate appointment of a new provost.

Dr. Larson

Dr. Larson, who has served as provost since 1972, joined the Penn State faculty as assistant professor of horticulture in 1944. He was named head of the Department of Horticulture in 1952, associate dean and director of the Cooperative Extension Services in 1962, and dean of the College of Agriculture in 1963. He was also director of the Agricultural Experiment Station from 1969 to 1972.

"In his 31 years, he has given great service to students and his efforts have been of untold benefit to the state, as well as to the University," President Oswald continued.

He said he would begin to take steps immediately to organize a committee, representing faculty, administration and students to assist in seeking nominations and applications. The committee will be asked to develop a list of six to ten individuals, screened from the various candidates, who

(Continued on page four)

Projects funded

Various educational and campus development projects will benefit from the allocation of $71,678 in undesignated funds received from alumni and friends through the University's Office of Gifts and Endowments.

Recommended by the Proposal Evaluation Committee, the allocations were approved last week by the Board of Trustees.

The sum of $15,578 has been set aside for the enrichment of cultural offerings. Included are $2,698 for a collection of American musical shows for the arts collection of the Pattee Library — 100 phonodiscs and 100 musical scores representing the history of the American musical show; $10,000 for Nittany Mountain Summer, for the partial support of the Pennsylvania Ballet in residence next summer; and $2,880 for the additional cost of a harpsichord to be used by Artists Series, Nittany Mountain Summer and other groups.

For financial assistance to students, $37,500 has been allocated. $25,000 for Alumni Memorial Scholarships and $12,500 for renewals of Alumni Memorial Scholarships for spring term, 1976.

For improvement of the quality of campus environment, $2,200 has been designated for a rock pedestal for the bronze Pennsylvania lion at the Berks Campus.

Other projects, for which $16,400 has been specified, include $3,000 for recording on video-tape a series of approximately 20 interviews with alumni of the College of Business Administration for the use of undergraduate students throughout the University; $900 for printing 200 copies of a compilation of current and retrospec-

(Continued on page four)

Open committee meetings studied

With the approval of members of the Board of Trustees, Michael Baker Jr., president of the Board, last Friday asked the ad hoc committee, which had been appointed last year to study rules and regulations for conducting meetings of the Board, to review again procedures, particularly with reference to opening meetings of the Standing Committees to the public.

Standing and other committees of the Board are not authorized to take action on behalf of the Board, and their meetings as such are considered working sessions and are not open to the public. The meetings, however, are attended by invited students and faculty members who participate in discussions but do not vote.

Meetings of the Board of Trustees were opened to the public by action of the Board, taken on July 19, 1974, effective with the meeting of Sept. 20, 1974.

PENN STATE COLLECTION

Faculty notes

The National Research Council has named **Dr. Herschel W. Leibowitz**, professor of psychology, to the Executive Council of the Committee on Vision of the Assembly of Behavioral and Social Sciences. The council is the principal operating agency of the National Academy of Sciences. Organized in 1956, the Committee on Vision responds to problems concerning any aspect of vision, ranging through engineering and equipment, the physics of light, physiology of response, individual perception and group or social response. The Committee is supported by the three armed services and two agencies, the Federal Aviation Administration and the National Aeronautics and Space Administration. A member of the faculty since 1962, Dr. Leibowitz's research interest is in the field of visual perception.

Dr. John H. Riew, professor of economics, testified Nov. 12 before the Intergovernmental Relations and Human Resources Subcommittee of the U.S. House of Representatives on revenue-sharing legislation currently being reviewed. The current revenue-sharing program, which began with the first-year payment of $5.3 billion for 1972 to various state and local governments, will be terminated with a $6.5 billion payment for 1976. The Congress is now considering whether the program should be extended beyond 1976 and, if so, the modifications necessary in the allocation formula to improve the program. Dr. Riew, a member of the University faculty since 1964, has conducted considerable research in the area of fiscal relations and has published a number of articles in this area in recent years.

Dr. Harald Schraer, professor of cell biology, has been invited to participate in the annual meeting of the American Society for Cell Biology this week in San Juan, Puerto Rico. He will chair the session on Extracellular Matrix, where he will present a paper co-authored by Dr. Carol V. Gey, a research associate, titled "Ultracryotomy and Ultramicro-Incineration of Matrix Vesicles in Newly Synthesized Bone."

Dr. Samuel H. Levine, director of the Breazeale Nuclear Reactor and professor of nuclear engineering, presented an invited paper and chaired a session at the Fifth Californium-252 Utilization Meeting, sponsored by the Energy Research and Development Administration, last week in San Diego, Cal. His talk was entitled "The Fundamentals of Neutron Multipliers" and he chaired the session, Design and Application of Neutron Multipliers. The purpose of the meeting, which was attended by representatives from universities, government, industry and medicine, was to present various methods of using the new, powerful neutron source, Californium-252, for research, medical and industrial purposes.

Dr. Thomas D. Larson has been redesignated chairman of the State Transportation Advisory Committee and appointed to the Governor's Science Advisory Committee by Gov. Milton J. Shapp. Professor of civil engineering and director of Penn State's Transportation Institute, Dr. Larson was appointed as the first chairman of the Transportation Advisory Committee in 1969 by Gov. Raymond P. Shafer. He has previously served as a member of a transportation task force to the Governor's Science Advisory Committee. A member of the faculty since 1957, Dr. Larson earned his B.S., M.S. and Ph.D. in civil engineering at the University. He has done extensive research in the broad areas of transportation, concentrating recently on state transportation policy issues.

Dr. Sabih I. Hayek, associate professor of engineering mechanics, delivered a paper entitled "Acoustic Diffraction by Impedance Edges" at the Acoustical Society Meeting at San Francisco last week. He is also presenting an invited paper, "Target Strength of Coated and Uncoated Structures" at a NATO-sponsored meeting this week in LaSpezia, Italy. The conference is devoted exclusively to problems of submarine echo characteristics.

Dr. Hu

Dr. Ling-Wen Hu professor of engineering mechanics, is marking his 25th year on the faculty of the University.

Born in Nanking, China, Dr. Hu earned a B.S. degree in mechanical engineering at National Central University in China in 1943. He emigrated to the United States in 1947 and studied at the University of Washington, which awarded his M.S. in mechanical engineering. His Ph.D. was conferred by Penn State in 1952, and in 1966 he became a naturalized citizen.

Dr. Hu started his employment at Penn State as a research assistant in 1950, became a research associate the following year, an assistant professor in 1951 and an associate professor in 1955. He was named a full professor in 1962.

During World War II, he worked as a designer at the National Central Machine Works in China and from 1945 to 1947 taught at National Central University.

His research interests are centered around the mechanics of solids, experimental mechanics, triaxial stress and high pressure experiments, and plasticity. The author of numerous scientific papers in these areas, Dr. Hu has conducted research projects for Research Corporation; the Office of Ordnance Research, U.S. Army, the U.S. Air Force Office of Scientific Research and McDonnell Douglas Astronautics. In addition, he has served as a consultant for Bell Telephone, E.I. duPont and Sun Oil.

Dr. Hu is a member of the Society for Experimental Stress Analysis, the American Association of University Professors, the American Academy of Mechanics and Sigma Xi.

A number of faculty and staff members and graduate and undergraduate students of the East Asian Studies Program at the University participated in the fourth annual conference of the Mid-Atlantic Region of the Association for Asian Studies (MAR/AAS) at Towson State College, Baltimore, Md., last week. **Dr. Mark R. Peattie**, assistant professor of history, served as chairman of the program committee for the conference. **Dr. Stanley F. Paulson**, dean of the College of the Liberal Arts, participated in a panel discussion on "Education in China: Reports by Recent Visitors." **Dr. Parris H. Chang**, associate professor of political science, served as chairman of a panel on "Southeast Asia: The Next Phase." A panel on "Aspects of Traditional Chinese Technology" was chaired by **Dr. E-tu Zen Sun**, professor of Chinese history. A graduate student in Chinese history, **Robert M. Miles Jr.**, presented a paper at this session, "Chi'i-min yao-shu and the Delineation of Traditional Chinese Rice Technology."

University faculty and students have been active in the development of the Mid-Atlantic Region since its founding as a division of the Association for Asian Studies in 1972. Dr. Sun was a member of the MAR advisory council in 1973-75, and Dr. Chang was a member of the program committee in 1974-75. Penn State faculty members elected as MAR/AAS officers for 1975-76 are: **Dr. William J. Duiker**, associate professor of history, secretary; Dr. Sun, member-at-large of the executive committee; Dr. Peattie, member of the program committee; and Dr. Chang, member of the advisory council. The 5th annual MAR/AAS Conference will be held next October at University Park.

Benjamin W. Niebel, professor and head of the Department of Industrial and Management Systems Engineering, was an invited speaker at the annual conference and convention of The American Institute of Industrial Engineers held in Cherry Hill, N.J., last month. He spoke on "Designing for Cost Improvement" to representatives from government, industry and universities. The theme of the conference was "Industrial Engineering: Change Agent of the Seventies."

Dr. Robert W. Bernlohr has been appointed professor and head of the Department of Biochemistry and Biophysics, and **Dr. Leonard N. Zimmerman** has been named professor and head of the Department of Microbiology and Cell Biology in the College of Science. Dr. Bernlohr previously served as head of Penn State's Department of Microbiology. Dr. Zimmerman was acting head of the department in 1973-74.

The departments the two men head are new units in the College. They were formed this year when the four existing biological science departments — biochemistry, biology, biophysics, and microbiology — were reorganized into the Department of Biochemistry and Biophysics, the Department of Microbiology and Cell Biology and the Department of Biology. Dr. Joseph G. O'Mara, professor of biology, remains head of the biology department.

Dr. Bernlohr joined the College of Science faculty last year. He came to Penn State from the Medical School of the University of Minnesota where he was a professor in the departments of microbiology and biochemistry. He joined the Minnesota faculty in 1962 after serving as assistant professor of agricultural biochemistry at Ohio State University. The author of over 50 papers and a number of reviews and abstracts, Dr. Bernlohr is an author of the book, "Enzyme Replacement in Genetic Disease," published by the National Foundation-March of Dimes in 1973.

Dr. Zimmerman joined the Penn State faculty in 1961 as an assistant professor of bacteriology. He was promoted to professor in 1961. He served as visiting professor of bacteriology at the University of Bristol (England) while on leave for six months in 1970 and for six months in 1962 was on leave at Yale University. A specialist in bacterial physiology and genetics, he is author of over 30 scholarly publications and is co-author of a book, "Basic Bacteriology."

Dr. C. Dale Therrien, associate professor of biology, has been invited to present a seminar at the Department of Biology, McGill University, Montreal, Canada, Nov. 24. He will discuss his current research on the causes of apogamy, or the development of embryos from unfertilized eggs in slime molds.

Dr. Lawrence B. Hendry, assistant professor of chemistry, has been invited to present lectures this month at the Departments of Chemistry of Rensselaer Polytechnic Institute and Amherst College. He will speak on "Insect Chemical Messengers: The Complexity, Plasticity, and Continuum Theory."

Three new assistant professors have been appointed at the Beaver Campus. They are **Dr. Eugene Hunting** in computer science, and **Dr. Russell C. Brignano** and **Dr. Marvin R. Quinn** in English.

Dr. Hunting earned his bachelor's degree at Rutgers University and his doctorate in experimental physics at the Massachusetts Institute of Technology. For the past six years he has been a faculty member at the University of Pittsburgh. His professional interests are in the scientific applications of techniques for developing easy-to-modify computer programs.

Dr. Brignano has an M.A. and Ph.D. in English, both from the University of Wisconsin. His B.A. in international relations was granted by Dartmouth College. He taught at Carnegie-Mellon University for nine years. Dr. Brignano is the author of "Black Americans in Autobiography: An Annotated Bibliography of Autobiographies and Autobiographical Books Written Since the Civil War" and of "Richard Wright: An Introduction to the Man and his Works."

The University of Maryland granted Dr. Quinn his B.A. and M.A. in English, and his Ph.D. was conferred by Penn State. He taught English literature at Jundi Shepur University in Ahwaz, Iran, last year.

Dr. Walter S. Ceglowski, associate professor of microbiology, was invited to participate in an International Conference on Immunobiology of Cancer sponsored by the New York Academy of Science last week in New York City. Dr. Ceglowski presented a paper, "Effect of Leukemia Virus Infections on Antibody Formation and Cellular Immunity," in the session on the Influence of the Tumor Process of Immune Mechanisms.

Obituary

Carl R. Barnes, who retired from the University in 1968 as controller emeritus, died Nov. 4 at age 70. Mr. Barnes studied accounting at Northern New York Business College and New York University and became a Certified Public Accountant in the State of New York in 1936. He worked for a New York City firm before joining the University in 1938 as an auditor. In 1946 he was named to the position of executive accountant and became controller in 1951. During the year before his retirement, he served as assistant to the President for financial affairs.

Ag sets up two new departments

Two new departments in the College of Agriculture will be established as of Nov. 15.

The Department of Food Science will bring together faculty members with food science interests and programs. Such persons are now in the four departments dealing with dairy, animal, poultry, and horticultural sciences.

The second new department will merge production and management personnel from existing dairy science and animal science departments into a combined Department of Dairy and Animal Science. Offices, laboratories and other facilities within the present departments will be utilized.

"Experience at other universities shows that achievements in food science become best known, and generally reach their highest levels, within a specialized department," says Dr. James M. Beettle, dean of the College of Agriculture.

"Greater awareness of our work is one of the major goals in this reorganization — to reach students, farmers, and business and industry people, and plan to strengthen our already high caliber programs in dairy and animal science with only a minimal increase in costs of administration.

"We believe the reorganized department will improve our efforts to gain financial support for teaching, research and extension programs. We want to reach, as effectively as possible, all the publics we serve," Dr. Beattie adds.

Head of the new Department of Dairy and Animal Science will be Dr. B. R. Baumgardt, present head of the Department of Animal Science. Dr. Baumgardt indicated the merger of animal and dairy science will encourage the continued improvement of what he termed "the excellent livestock and dairy aspects within the College's animal programs."

A search is underway to select a qualified individual to become chairman of the Department of Food Science.

A specialist in nutrition research, Dr. Baumgardt came to Penn State in 1951 from the dairy science faculty at the University of Wisconsin. He is currently secretary within the production section of the American Dairy Science Association and a member of the editorial board and the management committee of the "Journal of Dairy Science."

Dr. Baumgardt is active on the committee on animal nutrition for the National Academy of Sciences, within the National Research Council. He was president of the Northeast Division of the American Dairy Science Association in 1971-72. In 1968 he won the nutrition research award of the American Feed Manufacturers' Association. This year he was named a Fellow of the American Association for the Advancement of Science.

He was graduated from Purdue University in 1955 with an academic citation for "highest distinction." His M.S. was also earned at Purdue and his Ph.D. at Rutgers

University Park Calendar

November 13-29

Items to be included in this calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, Nov. 13

Commons Videotape, 12 noon, Kern lobby.

Dr. Eugenio Battisti, art history, on "Boccaccio and the Visual Arts," 8 p.m., HUB assembly room.

Friday, Nov. 14

Sports: Soccer, vs. Pittsburgh, 7 p.m., Jeffrey Field.

GSA Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, Nov. 15

Sports: Women's Cross Country USTFF Meet.

Sunday, Nov. 16

Sports: Men's Cross Country Eastern USTFF Championships.

PSDC Hiking Club, hunt for Old Wheeler, brewer and other trails on Tussey Ridge, 9 a.m.

Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Elder Harold McKenzie, Chairman of Black Christian Fellowship, Board of Elders.

Wednesday-Friday, Nov. 19-21, Monday-Tuesday, Nov. 24-25

Computer Programming Workshops on "Assembler," "Fortran" and "PL/1." Registrations accepted now, Room 229 Computer Bldg.

Sunday, Nov. 23

Sports: Men's Eastern USTFF High School Championships.

Monday, Nov. 24

Sports: Men's Cross Country NCAA Championships.

Seminars

Thursday, Nov. 13

Agronomy, 8:15 a.m., Room 301AB Ag Administration. James Eakin, Ag. Extension, on "Bahama Project — Update."

Chemistry, 12:45 p.m., Room 333 Whitmore Herbert D. Kaesz, UCLA, on "Aromatic Metalation Reactions with Methylmanganese and Methylrhenium Carbonyl Complexes."

Mathematics, 4 p.m., Room 102 McAllister. Gerard Sacks, Harvard University, on "Algebraically Closed Division Rings."

Computation Center, 7:30 p.m., Room 158 Willard. "JCL(6)."

Friday, Nov. 14

Statistics, 1 p.m., Room 217 Willerd. Dr. Ramon Litiel, University of Florida, on "Estimation Based on Kolmogorov-Smirnov Statistics."

Friday, Nov. 21

Genetics Symposium, 1-5:30 p.m., Room 112 Kern. Dr. E. G. Buss, poultry science, chairman. Dr. Richard N. Hitt, pharmacology, on "Chloroform Toxicity: Genes and Hormones," 1 p.m. Dr. David R. MacKenzie, plant pathology, on "The Green Revolution — Who Fired the First Shot?" 2 p.m. Dr. Stephen Bloom, poultry science, Cornell University, on "Cytochemical Probes for DNA Replication and Repetitive Sequences in Eukaroyte Chromosomes," 3:30 p.m. Dr. Charles W. Hill, biological chemistry, Hershey Medical Center, will lead and introduce a panel discussion on "Artifically Produced Recombinant DNAs: Biohazards, Uses and Ethics," 4:30 p.m.

Tuesday, Nov. 25

ARL, 10:45 a.m., Eric A. Walker Conference Room, Applied Science Bldg. Charles R. Zentner on "Frequency Domain Adaptive Decoupling in Multiple Output Array Processors."

University Schedule

Friday, Nov. 14

Last day for signing Fall Term Emergency Loans, Room 106 Shields.

Saturday, Nov. 15

Classes end.

Monday-Wednesday, Nov. 17-19

Final examinations.

Saturday, Nov. 29

Commencement, 10:30 a.m., Rec Hall.

Meetings

Sunday, Nov. 16

Interlandia Folk Dance Club, 7:30 p.m., south gym, Whille.

Monday, Nov. 17

Color Slide Club, 7:30 p.m., Room 112 Kern. Thomas Smythe on "Ice and Snow." Competition special category, "Fall — Signs of the Season."

Tuesday, Nov. 18

College of Agriculture faculty, 4 p.m., Room 301 A and B Ag. Administration.

GSA Council, 7 p.m., Room 101 Kern.

Thursday, Nov. 20

Central Pa. Society, AIA, 8 p.m., Room 112 Kern. Lecture by E. J. W. Barber, Occidental College, on "Archaeological Decipherment."

Films

Friday-Sunday, Nov. 14-16

"Animal Crackers," 7:30 and 10 p.m., Room 102 Forum.

"A Man for All Seasons," 7:30 and 10 p.m., Findlay Rec Room.

"A Night at the Opera," 7:30 and 10 p.m., Redifer Room D.

"King of Hearts," 7:30 and 10 p.m., Waring Lounge.

Exhibits

Museum of Art: 200 Years of Royal Copenhagen Porcelain, Architectural and Ornamental Drawings: Juvarra, Vanvitelli, the Bibiena Family, and Other Italian Draughtsmen, Drawings from the Permanent Collection.

HUB Gallery: U.N. Exhibit. Multi-media exhibit on women; both exhibits through Nov. 14.

Kern Gallery: Wendy Snetsinger, photography, through Nov 15. Waskewich Gallery Print Sale and Exhibition, through Nov. 14. Fred Peterson, watercolors, opening Nov. 15. Tom Guschel, photographs, opening Nov. 16. Blown Glass Exhibition by art students.

Zolter Gallery: Two man show: Zoretich and Rubello, through Nov. 14. Steven Barbash, opening Nov. 16.

Chambers Gallery: Art Department student group show. Gold and Silver by students of SUNY at New Paltz; both exhibits through Nov 14.

Cultural Center, Walnut Bldg.: An exhibit of mixed media, the work of the Pittsburgh Chapter of the National Conference of Artists.

Pattee Library: Exhibit of Crafts, through Nov. 24. Gem Cutting Exhibit by Dr. Dean Smith, opening Nov 25, main lobby. Drawings by Denise Faleski, lending services lobby. Batik paintings by Sharon Sell, East Corridor Lobby.

Ritenour Health Center: Undergraduate Art Education Show, sponsored by the Penn State student chapter of the National Art Education Association, through Nov. 15.

News in brief

(Continued from page one)

Sociolinguistic conference funded

A grant for a conference on sociolinguistic problems in selected East European countries has just been made to Penn State by the Joint Committee on Eastern Europe of the American Council of Learned Societies and the Social Science Research Council. The purpose of the conference, which will be held in August, 1976, is to identify the fundamental sociolinguistic problems of Czechoslovakia, Hungary, Rumania and Yugoslavia. All of these countries have large minority populations which maintain their native languages to varying degrees. The director of the conference is William R. Schmaistieg, head of the Department of Slavic Languages, and guest speakers include Dr. Thomas F. Magner, associate dean for research of the College of the Liberal Arts, and Dr. Trond Gilberg, associate professor of political science. Among the participants from other universities are Prof. Robert Auty of Brasenose College, Oxford; Prof. William Bright of UCLA; Prof. Damir Kalogjera, head of the Department of English at the University of Zagreb, Yugoslavia; and Prof. Kenneth Naylor of Ohio State.

Archaeologist to speak

Dr. Elizabeth J. W. Barber, professor of linguistics and anthropology at Occidental College, Los Angeles, will address the Central Pennsylvania chapter of the Archaeological Institute of America at 8 p.m. on Thursday, Nov. 20, in Room 112 Kern Graduate Bldg. The subject of her public lecture is "Archaeological Decipherment." Dr. Barber's background combines the disciplines of archaeology and computerized linguistic analysis. She has excavated at both prehistoric and Roman sites in Britain and has recently published a handbook for archaeologists working with undeciphered texts, "Archeological Decipherment." In her lecture, which will be illustrated with slides, Dr. Barber will survey the famous decipherments of the Egyptian hieroglyphs, Hittite, and Mycenaean Linear B and analyze the reasons for these successes. She will also include in her comments observations about the still undeciphered Etruscan, Mayan and Linear A texts.

"Spirit of Evan Pugh" staged

Facutty and staff are invited to attend a Bicentennial presentation, "The Spirit of Evan Pugh," scheduled for Thursday, Nov. 20 at 1.30 p.m. in the J. O. Keller Building Auditorium. The presentation will be made by Dr. Jerome K. Pasto, associate dean for resident education in the College of Agriculture, as part of the Cooperative Extension Service Staff Workshop. Dr. Pasto's dramatic 30-minute presentation has been recognized as one of the outstanding special Bicentennial programs of the University. Dressed in clothes appropriate to the 1850s, the College of Agriculture dean presents parts of a speech made by Dr. Pugh before the Cumberland County Agricultural Society. Dr. Pugh, a renowned chemist and educator, was Penn State's first president.

Charity Ball Dec. 4

The 28th Annual Charity Ball, sponsored by the College Area Auxiliary to the Centre Community Hospital, will be held Thursday, Dec. 4, from 9 p.m. to 1 a.m. at the Elks Country Club, near Boalsburg. Two local groups, "The Dance Band" and "Stevie and the Six Packs," will provide the music. The goal of the 1975 Charity Ball is to purchase two Fetal Heart Monitoring Systems. Unlike the stethoscope, the fetal monitor allows the doctor to check the baby's heartbeat continuously throughout labor, even during contractions when it is extremely difficult to hear. This system records the baby's heartbeat on a strip of graph paper and simultaneously records the timing and strength of contractions. From these two records, the doctor receives accurate information on how the baby is reacting to the stresses of labor. Three categories of tickets are available: Benefactor, $50 or more; Sponsor, $25 or more; and Patron, $15. For information about tickets, call 238-1566.

Consultation available

The Individual and Family Consultation Center at the University is offering several relationship enhancement programs for married couples, dating couples and families with adolescent children. More than 100 couples have participated in the program during the several years it has been successful in helping couples and families further enhance already successful relationships, as well as helping others deal with severe difficulties.

Couples are trained in small groups — no more than three couples in each group — to use certain communication and problem-solving skills in their relationship. Groups meet one evening each week at a time convenient to the participants. The Consultation Center, located at the eastern

(Continued on page four)

Former Soviet ballerina Galina Panov

WPSX highlights for the week

Rosemary Harris stars as Aurore Dupin who was better known as French novelist George Sand, on "Notorious Woman," a seven-part **Masterpiece Theatre** biography beginning Sunday, Nov. 16, at 9 p.m. The series focuses on Sand's personal end public life and the controversy that surrounded her books and her love affairs, especially her relationship with Frederic Chopin, played by George Chakiris. "Masterpiece Theatre" may also be seen Fridays at 9 p.m., with captions for the hearing-impaired.

The Russian ballet team of Valery and Galine Panov make their American television debut on **In Performance** at **Wolf Trap** Monday, Nov. 17, at 8 p.m. The former stars of the Kirov Ballet perform five selections, accompanied by the Filene Center Orchestra. Included are the pas de deux from "Don Quixote," the Adagio from "The Nutcracker," scene two of "Petrouchka," and the pas de deux from "The Lady and the Hooligan" and from "Harlequinade." The program may also be seen Tuesday, Nov. 18, at 9:30 p.m.

Saul Bellow, one of America's foremost novelists, makes a rare television appearance on **Book Beat** Wednesday, Nov. 19, at 6:30 p.m. Talking with host Robert Cromie, Bellow discusses the role of the writer in general and his latest novel, "Humboldt's Gift," in particular. "Book Beat" may also be seen Sunday, Nov. 23, at 3 p.m.

Lord Kenneth Clark begins a two-part examination of the life and work of the English romantic painter, William Turner, on **The Romantic Rebellion** Thursday, Nov. 20, at 8 p.m. Born in 1775, Turner was best known during his life for his depictions of nature at its most violent. The first half-hour program looks at the works designed for public exhibition for which Turner was recognized during his life. The following week, Lord Clark explores paintings by Turner that were never intended for public viewing, but for which he is remembered today.

Janet Suzman and Ian McKellen star in Ibsen's "Hedda Gabler" on **Classic Theatre: The Humanities in Drama** Thurs-

(Continued on page four)

Signed consent forms due

Signed informed consent forms obtained from human subjects involved in research, instruction, and continuing education programs are to be sent to 207 Old Main for filing. Formerly, these forms were held indefinitely by the project director. The combination of the former practice and faculty and graduate student turnover could lead to loss of consent forms and subsequent problems in the event of legal action, according to Dr. Richard G. Cunningham, vice president for research and graduate studies.

The signed forms should be accompanied by the investigators' names (both faculty and students), title of the project and the starting date.

Dr. Cunningham also notes that information dealing with ethical principles and issues relating to use of human subjects is available in Pattee. Four documents on which the University's human subjects policy is based have been placed on permanent reserve in the Life Sciences Library, East Pattee 205. Titles are "Ethical Principles in the Conduct of Research with Human Participants," "Ethical Issues in Research with Human Subjects," "Privacy and Behavioral Research," and the "Declaration of Helsinki." University policy and procedure for protection of human subjects apply to all situations involving human subjects whether sponsored by outside agencies or by the University; they apply to instructional and continuing education projects as well as research, and to student projects as well as faculty projects, if human subjects are involved.

Detailed information on policy relating to human subjects can be obtained from department offices, deans for research and James W. Lundy, 312 Willard. Mr. Lundy serves as secretary of two committees which review proposals for projects involving human subjects.

Programming workshops set

Three programming workshops will be held following fall term for five days, Wednesday through Friday, Nov. 19 to 21, and Monday and Tuesday, Nov. 24 and 25. The workshops are open to all faculty, staff and graduate students. They include:

ASSEMBLER, Room 304 Boucke Bldg. Computer concepts and techniques of programming in IBM/370 ASSEMBLER Language will be studied. Previous computer experience in a higher level Language such as FORTRAN will be assumed.

FORTRAN, Room 111 Boucke Bldg. Basic computer concepts and techniques of programming in FORTRAN IV Language will be studied. This workshop is oriented toward those who have had no previous computer experience.

PL/1, Room 214 Boucke Bldg. This workshop will study basic computer concepts and techniques of programming in PL/1 Language. No previous computer experience is necessary.

Lectures will be given throughout each day, beginning at 9 a.m. and resuming at 1:30 p.m. after a lunch break. Sample programs will be studied, and practice problems will be assigned throughout the five-day period. In order to gain the maximum benefit, participants should plan to devote the entire five days to a workshop.

Instructors, all of the Computation Center staff, will be C.M. Smith Jr. (ASSEMBLER), D. L. Bernitt (FORTRAN) and B. E. Squires (PL/1).

Registrations will be accepted by Linda Yarnell, Room 229 Computer Bldg. A charge of $3 (cash or interdepartmental transfer) for course materials will be made for each registrant. Computer charges are born by the Computation Center, and participants may use the computer for practice purposes free of charge throughout the winter term.

Increased support recommended

Trustees of the University on Friday adopted, in principle, a recommendation of the Penn State Fund Council that the University intensify its efforts over the next five-year period to increase substantially the current level of support from alumni, friends and other groups with special ties to Penn State.

The purpose of the intensified program, President Oswald indicated, is to enable the University to enhance and enrich special projects and programs for which state support is not normally available.

The Council, which made the recommendation at its second meeting on Oct. 24, was established by the Trustees July 19, 1974, to advise the President and the Board. The Council is composed of prominent Penn State alumni and friends.

In the Council recommendation, Charles W. Shaeffer, of Baltimore, Md., chairman of the Council, said the Council suggests that the five-year effort to increase the current level of support from alumni, friends, corporations and foundations with special ties to Penn State should be fully integrated with the current and on-going efforts of the Office of Gifts and Endowments. The aim, Mr. Shaeffer reported, is to achieve a permanent broadening of the base of support available for special programs that cannot be supported from state funds.

WPSX highlights

(Continued from page three)

day, Nov. 20, at 9 p.m. Written in 1890, the play is considered one of the first great modern plays to deal realistically with the problems of women. The play will be preceded on Tuesday, Nov. 18, at 7:30 p.m. and Thursday at 8:30 p.m. with a **Classic Theatre Preview** featuring Janet Suzman and Eva Le Gallienne, exploring why the role of Hedda has been one of the most sought-after roles in theatre.

Larson to retire

(Continued from page one)

are considered to be best qualified.

Dr. Larson told the Board that his decision was a difficult one to make but that he and Mrs Larson "are anxious to pursue other professional and personal interests on our own schedule."

News in brief

(Continued from page three)

end of the campus on Elm Street, is part of the training program of the Division of Individual and Family Studies of the College of Human Development. All services are offered free of charge. For further information, call 865-1751.

Thanksgiving Candlelight Dinner

The annual Thanksgiving Candlelight Dinner at the HUB Terrace Room will be held from 5 to 7 p.m. Wednesday, Nov. 19. Roast turkey with herb dressing heads the menu, which also includes prime ribs of beef, mixed grill, ham steak and creamed finnan haddie. There will be pumpkin and mince pies, along with a variety of other desserts and salads, and a hospitality table.

Eastern Orthodox fellowship

Prof. James F. Delansky, faculty advisor to the Eastern Orthodox Christian Fellowship, would like faculty or staff of the Eastern Orthodox faith who are interested in learning more about the fellowship to call him at either 865-9011 or 238-8164.

President final authority

The existing policy for determination of a student's Pennsylvania resident status will continue in effect, with the Office of the President of the University now designated as the final appeal authority.

This decision was approved by the Board of Trustees last week following action earlier this year under which the Auditor General of the Commonwealth revoked and withdrew the guidelines, which designated the Auditor General's Office as the final appeal authority.

The action of the Auditor General, it is explained, was prompted by the fact that the Appropriations Acts for Penn State, University of Pittsburgh, and Temple University did not empower or require the department to determine whether students at the universities are bona fide residents of Pennsylvania for tuition purposes.

Continuation of the guidelines was approved in keeping with the desire of the Board of Trustees to charge Pennsylvania tuition only to those students who are bona fide residents of Pennsylvania.

Barbash to exhibit

Paintings and prints by Steven Barbash, professor and head of the art department at State University College, Cortland, N.Y., will be displayed from Nov. 16 through Dec. 6 in Zolfer Gallery, with a reception for the artist at 7:30 p.m. Friday, Dec. 6, in the gallery.

Barbash, a graduate of Bard College and Yale University School of Art and Architecture, has studied with Yasuo Kuniyoshi, Josef Albers, Bernard Chaet, Rico Lebrum and other distinguished artists.

Formerly a member of the art faculty and director of the humanities program at Juniata College, Barbash has had one-man shows of the William Penn Museum, Harrisburg; Barone Gallery, New York; Martin McCleaf Gallery, Phila.; Wells College and LeMoyne College. He has also contributed frequently to many national print, drawing, painting and graphics invitational exhibitions.

Projects funded

(Continued from page one)

five holdings of newspapers located in the micro-forms collection of Pattee Library, and $12,500 for an interdisciplinary graduate program in the humanities, to be matched by funds from the National Endowment for the Humanities.

Energy conservation tips given

The Executive Energy Conservation Committee of the University has issued a reminder to members of the Penn State community suggesting actions individuals can take to help the energy conservation cause

All Areas

1. Insure that radiators, heating units and ventilation registers are not obstructed by shelving, plants, furniture or other objects.
2. Thermostats in occupied spaces should be set no higher than 68 degrees unless an exception has been approved by the conservation committee. Storage or other unoccupied spaces should be set no higher than 55 degrees. Portable electric heaters are not permitted.
3. Windows should be kept closed at all times. Shades and blinds should be closed overnight and weekends, except on ground floors.
4. The use of domestic hot water should be curtailed as much as possible.
5. Insure that copy machines are completely turned off overnight and weekends; the use of such machines should be reduced as much as possible.
6. All room lighting, the anticipated need for which does not exist for 15 minutes or more, should be turned off; natural light should be used when possible in lieu of artificial light.

Laboratories

1. Storage in refrigerators, deep freezers and growth chambers should be consolidated where possible; explosion-proof units may contain ordinary materials but not conversely.
2. Insure that autoclaves and sterilizers always contain a full load when operating.
3. Insure that fume hoods and ovens are operating only when required.
4. Curtail the use of process steam and compressed air, whether locally generated or from the campus systems, to the maximum possible extent.
5. Curtail the use of distilled water where possible.

Athletic Areas and Gyms

1. Insure that all lighting is off immediately after use, even where automatic timers are installed.

Repairs

1. Insure that the individual responsible for the area is made aware of malfunctioning equipment, fixtures, controls, switches, timers, thermostats, etc.; that individual should promptly call Maintenance and Operations at 865-4731.

Faculty, staff and students are reminded that suggestions on ways to conserve energy at the University can be made by using the Energy Hotline, 865-1117.

Environmental Policy Center gets faculty, agencies together

Answering today's questions about energy and the environment requires bringing together people with expertise in various disciplines and matching them with agencies able to finance and apply such research.

Penn State's Center for the Study of Environmental Policy performs these functions. In some cases, the center initiates research at the request of an agency and in others, it finds support for faculty research interests.

The center has arranged for contract research with the Pennsylvania Department of Environmental Resources, Governor's Energy Council, Environmental Protection Agency, Federal Energy Administration, Energy Research and Development Administration, and other state and federal agencies.

A study of the "energy park" concept undertaken for the Governor's Energy Council last summer demonstrates the interdisciplinary nature of most of the center's work.

If involved faculty members from the departments of geography, economics, nuclear engineering, mechanical engineering, sociology and the Institute for Research on Land and Water Resources.

Dr. Terry A. Ferrar, center director, characterized the study as, "one of the most interdisciplinary research projects I've witnessed on this campus."

An energy park is a large concentration of electrical generating capacity at one location. The Commonwealth of Pennsylvania is using the study to help determine the desirability of establishing several such facilities.

The center also serves as a collecting point for research proposals in the fields of energy and the environment.

"Any faculty member with a research proposal can come to us and sit down and discuss it," says Dr. Ferrar, "and we'll try to match his ideas with the appropriate people in Washington or Harrisburg."

In a recent case the center brought together experts in management science with a problem in air pollution control.

Dr. John J. Dinkel and Dr. George B. Kleindorfer, associate professors in management science, have done extensive research on management of personnel whose duties require them to travel. Meanwhile, the Pennsylvania Department of Environmental Resources was looking for an efficient system for assigning air pollution control inspectors.

The Environmental Policy Center brought them together, and the result is an ongoing research project for development and application of a computerized scheduling and routing package to assist State officials in utilizing their manpower and equipment for pollution control and environmental surveillance.

Arranging for such research furthers two of the center's main objectives, promotion of educational opportunities for those concerned with resource policy and fallering existing knowledge to assist in the resolution of specific problems.

The intercollege unit was established in 1972 by an institutional grant from the Rockefeller Foundation for the purpose of analyzing and suggesting policy alternatives for the resolution of environmental dilemmas confronting our society.

Research is conducted on broad issues of resource policy and public sector management. Projects are supported through University funds, private grants and grants from federal and state agencies.

Dr. Ferrar, an associate professor of economics, has been director of the center since May, 1974. He joined the faculty in 1971.

A 1968 graduate of Penn State, where he earned the bachelor of science degree in industrial engineering and master of arts in economics, Dr. Ferrar received his master of science and doctor of philosophy degrees, both in economics, from Purdue University in 1970 and 1971.

The author of numerous articles in his field, Dr. Ferrar is also a consultant to the Governor's Energy Council.

Trustees approve plans for campus improvements

Buildings to be air conditioned

Sketch plans for installing air conditioners in 11 central campus buildings of the University where it is needed in connection with heavy summer instruction loads were approved by the Board of Trustees.

The project, for which the General State Authority has allocated $3,000,000 will provide air conditioning for Pattee Library and sections, primarily classrooms and student laboratory areas, of Willard Bldg., Chambers Bldg., Rackley Bldg., Hammond Bldg., Sackett Bldg., Henderson Human Development Bldg., Sparks Bldg., Boucke Bldg., Recreation Bldg. and Chandlee Laboratory.

The Trustees also approved sketch-preliminary plans for air conditioning for all guest rooms at the Nittany Lion Inn, which is the second phase of a general improvement program at the Inn. Earnings of the Inn will finance the improvements.

Also approved by the Trustees on Friday was a utilities expansion project for which the General State Authority has provided $500,000 for construction costs. An underground electrical line will be extended from existing lines at the Meats Laboratory to the East Campus Power Plant, providing a second circuit to the plant. The project also provides for additional steam lines from the East Campus plant to existing distribution lines serving the main campus to add to the capabilities of the new power plant.

Beaver Campus building plans okayed

Floor plans for the classroom-laboratory building to be constructed at the Beaver Campus have been given Trustee approval. The General State Authority last April authorized a $946,000 allocation for construction of the building, expected to be completed by fall, 1977.

Dr. Joseph P. Giusti, director of the Campus, says the brick building will provide more than 16,000 square feet of floor space on two levels. On the first floor, there will be a life sciences area including a biology laboratory, microbiology laboratory, preparation rooms and an environmental room. Multi-purpose classrooms will be located on the second level, providing facilities for workshops, seminars and lectures. A small lecture hall and faculty offices are also planned.

One of the features of the building will be a seismic pier for locating a seismograph. The Beaver Campus is one of four locations across the state working with the seismograph laboratory at University Park in recording earth tremors.

37 acres deeded to Delaware Campus

A tract of approximately 37 acres of land adjoining the Delaware County Campus has been deeded to the University by the Delaware County Commissioners.

Trustees of the University last Friday adopted a resolution accepting the land and also approved sketch plans for a Library-Learning Center at the Campus, which will be located on a part of the newly accepted tract.

In 1967, the County Commissioners of Delaware County deeded 50 acres of land to the University to make possible the development of the Campus, located near Media, with an understanding that additional land would be deeded at a later date.

The Library-Learning Center, for which the General State Authority last April approved $2,574,000, will have two levels and provide a total of 45,000 square feet of floor space. In addition to the library, there will be audio-visual and other learning center facilities. The plans also include classrooms, seminars, faculty offices, and typing rooms for the use of students.

The building is the first General State Authority project for the Campus and will be the second major building there.

"It will provide space for both the resident education and the continuing education programs," explains John D. Vairo, Campus director, "and also will make possible expansion of the services of the Campus to the community."

Enrollment at the Campus has reached 1,220 students registered for daytime classes, Mr. Vairo explained, a sharp increase over the 550 students enrolled when the first building was completed in 1971 and the Campus was moved to the present location.

Planner sought for York center

The University's Trustees have authorized employment of an architect to design a proposed student center at the York Campus. Expenditure of not more than $53,000 for design costs also was authorized.

A fund-raising campaign for construction of the building, with a goal of $750,000, is in progress under the direction of the York Campus Advisory Board.

Edward M. Elias, York Campus director, says the student center is not planned to increase enrollment but is expected to relieve a serious space need for commuting students, both day and evening. At present, the Campus utilizes two areas in the main classroom building for "student center" activities.

The proposed building will contain approximately 15,000 square feet and will share a common lobby area with the present multi-purpose building. It will contain activity and food service areas, a multi-purpose and community room, student organization offices and offices for the student affairs staff.

Plans call for the fund-raising campaign to be completed in February, with construction to begin in November, 1976, and the building to be completed in November, 1977.

Wooded area at Berks planned

A development plan for the wooded area at the northern end of the Berks Campus has been approved by the Board of Trustees, which last July authorized the landscape architecture firm of McCloud, Scatchard, Derck and Edson, of Lititz, to prepare the plan.

Dr. Harold W. Perkins, director of the Campus, explains the purpose of the project as an effort to retain the area in its natural state while providing limited development for outdoor educational and recreational activities for both the Campus community and Berks County area residents.

The plan, which provides for both instructional and recreational uses, includes ecological study areas and sanctuaries, nature trails, outdoor classroom sites, information booths and rest areas. It is designed to compliment the new Berks Leisure Area and Gringo Mill Park developed by the county commissioners.

Funds for development of the plan were supplied by a special allocation from the Penn State Fund. An additional gift of $5,000 from a local donor to the Berks Campus will provide for the initial implementation.

Funding opportunities

(20S-1) The Office of Education has issued proposed priorities for its Foreign Language and Area Studies Research Program. (Ref. 40FR-56300-01, 11/25/75) (CFDA 13.436)

(20S-2) The U.S. Department of Housing and Urban Development (OHUD) has issued regulations for **Community Development Block Grants**. The regulations are included in Subpart E, Applications and Criteria for Discretionary Grants. (Ref 40FR50663-70, 10/30/75)

(20S-4) Scholars are invited by the Ford Foundation to submit applications in an **International Competition for Research on International Security and Arms Control.** The application procedure is in two stages. Brief outlines are due Jan. 1, with an invitation, if any, for formal application by April 1. Five thematic areas have been chosen: basic theory of arms control, implications of new technologies, alternative security proposals, domestic influences on arms control, and new configurations of international power. (Ref. 7pp. Announcement)

Fellowships for 1976-77

(For additional information inquire at 317 Kern, 865-2401)

(20S-5) Ford Foundation — fellowships for Mexican Americans, native Americans, and Puerto Ricans (FO75-27)

(20S-6) National Science Foundation — 100 postdoctoral energy-related fellowships, 2/22/76 deadline (FO75-27)

(20A-7) National Research Council of Canada — postdoctoral fellowships (FO75-37)

(20A-8) National Institutes of Health — predoctoral and postdoctoral traineeships, 1/2/76 deadline. (FO75-27)

Sculptor Heinz Warneke, who was named an honorary alumnus this month, revisits the Nittany Lion, which he completed in 1942.

Shakespearean films available

Beginning winter term, a series of films made from Shakespeare's plays will be available for screening at any of the University's Campuses.

The project, which was conceived by Dr. Ralph W. Condee, professor of English literature and humanities, was made possible by a course improvement grant funded through the office of the Vice President for Undergraduate Studies and by a grant from the Center for Continuing Liberal Education. Admission to the films will be free.

Already leased are Paul Scofield's "King Lear" (black-and-white, 1970); Orson Welles' "Macbeth" (black-and-white, 1948); Maurice Evans' "Macbeth" (color, 1960); "A Midsummer Night's Dream" starring Diana Rigg and directed by Peter Half (color, 1968); and the "Romeo and Juliet" of the Royal Academy of Dramatic Arts (black-and-white, 1965).

Contracting arrangements are being completed for two films of Laurence Olivier's — "Hamlet" (black and white, 1948) and "Henry V" (color, 1944). Arrangements are also being completed for the Nicol Williamson version of "Hamlet" (color, 1969).

The films will be leased on a five-year basis, Dr. Condee explains. Because of their length, it will be necessary to show them in the evening rather than during regular class periods. They will be used to supplement classroom instruction in the University's basic Shakespeare course, English 149, and a number of Campuses may also choose to use them in their adult education programs. Bookings will be available through Audio-Visual Services.

Members of the committee overseeing the project, in addition to Dr. Condee, include: L. P. Greenhill, assistant vice president for academic services; Helen Manfull, assistant professor of theatre arts; Ronald G. Hoover, assistant professor of English (Altoona); and Michael Kiernan, assistant professor of English.

Program aids disadvantaged

Trustees of the University and President Oswald and his staff joined with 40 Renaissance scholars at a luncheon last Friday, marking the fifth year of the establishment of the Renaissance project, a program "to provide instruction for the classes of Americans . . . who do not have the means for higher education."

The Penn State program to help educationally and economically deprived students may have been the first of its kind in the country.

Since that time, the state and federal governments, through the Educational Opportunity Program, have been recruiting and aiding disadvantaged youth, Dr. Helen D. Wise of State College, one of five trustees who helped to start the Renaissance program, noted.

Penn State offers many special services to these young people who need both economic and educational assistance, including the Developmental Year program, she explained.

She also pointed out that Renaissance now identifies, recruits, and assists young people who are very poor economically but who were not overwhelmed by being poor and studied hard and successfully all through high school.

Dr. Wise said that there currently are 80 Renaissance scholars on the various campuses of the University and that they come from 60 Pennsylvania communities. She cited a need for $17,000 for the $54,000 budget this year.

Also speaking briefly at the luncheon were Dr. Oswald, and Michael Baker Jr., of Beaver, president of the Board of Trustees.

Mr. Baker, along with Dr. Wise, and three other members of the Board, Jesse Arnelle, of San Francisco, Calif.; Frederick J. Close, II, of North Madison, O.; and Ralph Hetzel, of Kent, O., founder of a program which now is directed by Arthur M. Wellington, professor of counselor education.

Staff vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1287 (Network Line 475-1287). Applications for these staff vacancies will be accepted until 5 p.m. Thursday, Nov. 20, 1975. **Do not contact the area that has the vacancy.**

Applications for staff vacancies are considered without regard to race, color, creed, sex, or national origin.

ACCOUNTANT, OFFICE OF DEPUTY CONTROLLER — Hershey

Responsible to Deputy Controller for the implementation and performance of accounting functions in the fields of Property Accounting and Inventory, Accounts Payable, Construction and Plant Funds Accounting, and to assist Deputy Controller and Clerical Staff with special accounting projects. Bachelor's degree or equivalent in accounting or business administration, plus two to three years of experience.

PROGRAM ASSISTANT, UPWARD BOUND PROGRAM, COLLEGE OF HUMAN DEVELOPMENT— University Park

Interviews prospective students and public school officials and prepare records and forms for analysis of prospective candidates for program, work with director of training programs for prospective students, some travel. Master's degree or equivalent in area of human services, experience in working on programs with the disadvantaged desirable. Funded until June 30, 1976

PRODUCTION ASSISTANT, DEPT. OF PUBLICATIONS — University Park

Responsible for estimating, scheduling and coordinating production of printed material. Includes some proof reading and mechanical preparation. Bachelor's degree or equivalent and two years of related experience

Long-range study confirms decrease in high school graduates

The projections and tables below were developed by Robert D. Newton of the University's Office of Budget and Planning. They were presented to the University Senate at its meeting this week.

Projections of high school graduates

In a report issued in 1973, assessments were made concerning the prospective sizes of graduating classes from secondary schools through 1984 both for the nation as a whole and for the Commonwealth of Pennsylvania specifically. In addition, projections were presented for each year of the number of high school graduates from the secondary schools within each county of the state as well as within the primary and secondary commuting regions associated with each of the branch campuses of the University to which first-time freshmen are admitted.

The county and regional projections were generated by means of a model described in the report. Because the model employs a data base maintained and made available by the Division of Educational Statistics of the Pennsylvania Department of Education, these geographically disaggregated projections are fully consistent with those issued annually on a state-wide basis by the aforementioned jurisdictional agency.

The projections contained in the above specified report have now been updated and extended through 1985, in general the trends are very much the same as those reported previously with prospects for incipient declines in the sizes of annual graduating classes through the forecast period.

Nationwide and statewide projections

The prospects for initiation of a long-term declining trend in the sizes of annual graduating classes for secondary school continues. Nationwide the number of high school graduates will begin to decline after 1977. Because of the net outward migration trends apparent for Pennsylvania, the peak in graduating classes is projected to occur two years earlier and the declining trend will be somewhat sharper than the analogous phenomenon throughout the nation as a whole.

Shown in Table 1 are projections of the number of high school graduates through 1985 for both the United States and Pennsylvania. Regardless of the specificity of time or the rate of decline, the overall trend will be the single most important environmental characteristic for the academic community during the next decade, inasmuch as graduates from secondary schools comprise the principal source of demand for higher education.

County projections

Because of variations among geographical subdivisions in birth rates, migration, and anomalies in the grade-by-grade enrollment, the patterns of change for individual counties within Pennsylvania may be expected to vary from those applicable on a statewide basis. For this reason, projections have been developed of the number of secondary school graduates from both public and private institutions for each year from 1974 through 1985 for each of the 67 counties in the Commonwealth.

Although like the statewide projections, 1975 is the year in which the greatest frequency of peak graduates occurs among the counties, some exhibit a maximum as early as 1973 and others as late as 1982.

Commuting region projections

Eighteen of Penn State's campuses were developed to provide a means for students throughout Pennsylvania to pursue the first two years of study in higher education at a locality within commuting distance of their homes. Approximately three out of every four students enrolled in undergraduate degree programs collectively at what is now designated as Behrend College and the 17 Commonwealth Campuses reside at home and commute to their respective campuses. Because of the significance of commuting students to the size of the student body at these campuses, the projected sizes of the graduating classes from secondary schools within the commuting regions are of importance. Since the geographical region from which students commute to an institution of higher education is established by the time constraints of transportation to and from the campus, the boundaries of a commuting region are not likely to be altered significantly over time.

Table 3 above contains projections for the so-called primary and secondary commuting regions on a combined basis. (A table is also available from the Office of Budget and Planning with projections of the number of high school graduates for each year from 1974 through 1985 from schools within the so-called primary commuting region associated with each of the 18 campuses.)

Those counties which provide 10 percent or more of the commuter enrollment to a campus are categorized as primary counties; those which supply less than 10 percent but more than 5 percent are categorized as secondary counties. Six out of seven commuting students at these campuses reside in counties which are within the primary commuting region of one or more campuses. Thus the primary counties are of much greater significance to commuter-enrollment then those in the secondary regions.

1985	2,609,000	147,300	5.6

Art department seeking a head

The College of Arts and Architecture at the University is seeking applications and nominations for the position of head of the Department of Art.

According to Dr. Walter H. Walters, dean of the College, candidates will be sought from both within and outside the University. The appointment could be effective spring term.

The nominees and applicants should have administrative experience in art, academic programming and staff development, financial management, and gallery operation. Program areas in the department include painting, sculpture, printmaking, graphic design, ceramics, and photography.

Applications and nominations should be submitted before Dec. 5 to Prof. Bruce Shobaken, chairman of the advisory search committee, Office of the Dean, 111 Arts Bldg., University Park.

Other committee members are: George S. Zorelich, professor of art; James E. Stephenson, associate professor of art; Linda Plotkin, assistant professor of art; Roger R. Zeltner, assistant professor of art at the Altoona Campus; Cris Guenter, undergraduate student; and Frederick B. Snitzer, graduate student.

The search committee will observe the University's affirmative action/equal opportunity standards.

PENN STATE intercom

Volume 5, Number 12 December 4, 1975

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

'Tis the season . . .

Holiday mail regulations

While offices at University Park are closed for the Christmas break — from 5 p.m. Tuesday, Dec. 23, to 8 a.m. Tuesday, Dec. 30, regular interdepartmental and U.S. mail service will be suspended. Any department which has a special need for delivery of incoming U.S. mail on Dec. 24, 26 and 29 should call University Mail Service at 865-5602 before 5 p.m. Friday, Dec. 12, so that arrangements can be made with the U.S. Postal Service for delivery.

A department requesting this service is responsible (1) for assigning an employee to be at work in the building at a specified time to receive the mail and (2) for receiving all incoming mail for the building in which the department is housed. This is required because the Postal Service sorts incoming mail by building, not by department.

Art sale to be held

The Annual Art Student Holiday Show and Sale, from Dec. 8-13, and the Art Faculty Holiday Show and Sale, from Dec. 14-19, will exhibit works in a wide variety of media in Zoller Gallery. Graduate and undergraduate art majors will offer for purchase works completed since the beginning of fall term in their classes. Professional work will be shown in the faculty exhibition. Gallery hours for the two exhibitions will be 8 a.m. to 5 p.m. Monday through Saturday and noon to 5 p.m. on Sunday.

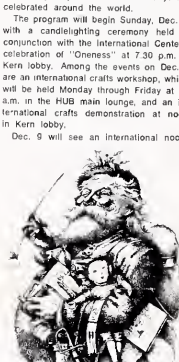
Christmas trees available

Freshly cut Christmas trees may be ordered at University Park through Friday, Dec. 5, by calling Linda Krape at 865-4237. Douglas fir and Scotch pine trees will be delivered by the Penn State Forestry Society between Dec. 8 and 10. Tree sizes range from 4 feet to 10 feet, and prices, from $9 to $18. Payment should be made on delivery by interdepartmental transfer to School of Forest Resources Budget 804-14 Fund 1001.

Madrigal dinners Dec. 13-14

The Second Annual Madrigal Dinner and Concert will be presented by the Graduate Student Association and the Graduate Commons Saturday and Sunday, Dec. 13 and 14, at 6:30 p.m. in Room 102 Kern Bldg. The setting will be a 16th century English castle, replete with banners, shields, coats of arms, pine boughs and shimmering candles. King Wigley will preside over the feast, featuring rock cornish hen with rice stuffing. Court rules will be observed as guests take part in the traditional Wassail Cup Toast and enjoy the special fanfares announcing the Boar's Head and the Flaming Plum Pudding. There will be Madrigal singers, court jesters, trumpeters and roving minstrels. Tickets at $8 apiece are available at the Information Desk in Kern, and the entire Penn State community is invited to attend this evening of Yuletide cheer.

Nativity scenes wanted



The Graduate Commons Gallery in Kern Bldg. is organizing an exhibition of Nativity scenes from around the world to be displayed from Dec. 6 through Dec. 22. Any staff members who have unusual Nativity scenes and are willing to share them with the University community should contact John McCauley at 865-1878 or stop in at Room 113 Kern Bldg.

International festival planned

An International Holiday Festival will be held from Dec. 7 to Dec. 14 to show the University community some of the different ways important cultural holidays are celebrated around the world.

The program will begin Sunday, Dec. 7, with a candlelighting ceremony held in conjunction with the International Center's celebration of "Oneness" at 7:30 p.m. in Kern lobby. Among the events on Dec. 8 are an international crafts workshop, which will be held Monday through Friday at 11 a.m. in the HUB main lounge, and an international crafts demonstration at noon in Kern lobby.

Dec. 9 will see an international noon-

time concert in Kern lobby and a Thai religious celebration, the Loykratong or harvest festival, at 7:30 p.m. in Kern lobby.

Traditional American Christmas crafts will be demonstrated at noon in Kern lobby Dec. 10, and the following noon there will be an international folk dancing performance there. A Christmas tea, sponsored by the Community Hospitality Council, will also be held Dec. 11 from 2 to 4:30 p.m. in Room 111 Kern.

A concert of traditional American Christmas music is scheduled at 12:15 p.m. Dec. 12 in Kern lobby, and an international coffeehouse and fashion show will be presented at 8 p.m. in Room 102 Kern. The weekend of Dec. 13 and 14 will see a madrigal dinner and concert at 6:30 p.m. in Room 102 Kern, as well as an International dance party Dec. 13 at 7:30 p.m. in the HUB's fourth floor multi-purpose room. Community Awareness will sponsor an international children's Christmas party at 2 p.m. in the Walnut Bldg. Cultural Center on Dec. 14.

A series of events has been planned to run throughout the week. Included are an arts and crafts exhibit, a display of international banners, holiday stamps and UNICEF cards and a Christmas tree with international ornaments, all in Kern. The Cultural Center will feature a display of international dolls. At the HUB, there will be an exhibition of Norwegian Viking Art.

Festival activities are being sponsored by the Graduate Commons, the Graduate Student Association, the Hetzel Union Board, the Community Awareness Program, the Cultural Center, the Office of Religious Affairs, the Office of International Student Affairs and the International Student Council. International Holiday Festival has also received support from a grant by the University Committee on International Programs.

(Continued on page four)

Senate to consider Pass-Fail amendments at Dec. 9 meeting

The University Faculty Senate will consider three amendments to the Pass-Fail System at its Dec. 9 meeting.

The amendments involve proposed changes in Student Rules M-12 and M-13.

One amendment provides that courses scheduled under the Pass-Fail Grading System shall be electives only, except that a student's academic unit may permit the student to take courses used in meeting the Basic Degree Requirements under this system. Electives are defined as credits reserved for the students' unrestricted choice of any baccalaureate degree course.

Another proposed amendment would allow a student taking a course on a Pass-Fail basis to change back to the conventional grade system within the 21-day drop period of the term succeeding that in which the course was taken. In such a case, the conventional grade originally submitted by the instructor becomes the grade of record. Every course scheduled under the Pass-Fail Option will be charged against the maximum limit set.

The third amendment would reduce the number of credits that can be taken Pass-Fail under both rules M-12 and M-13. It would allow students to schedule at least six credits a term on the pass-fail basis and set the maximum a student could schedule at 12 credits, rather than the current 18 credits. Associate degree students would be limited to a maximum of six credits.

The Senate also will receive reports from the Senate Committee on Undergraduate Instruction on proposed changes in academic policies and procedures for undergraduate students.

The changes involve policies covering definition of student status, courses under departmental auspices, withdrawal, and general undergraduate degree requirements — revisions to exception procedure.

The committee will also present an informational report on credit by examination.

PLRB decision explained

The Pennsylvania Labor Relations Board (PLRB) on Nov. 12 granted permission to the Pennsylvania State University Professional Association (PSUPA) to withdraw the charge of unfair practices against the University, filed on May 28, 1974, but not without prejudice.

The withdrawal was permitted also with the understanding that the status quo relationship between the University and the Faculty Senate will not prevent the holding of a true and perfect election because of this relationship; and that the complaint issued by the Board is hereby rescinded.

With no exceptions filed, the decision and order became absolute and final on Nov. 22, the ten-day period authorized for exceptions having passed.

The complainant, PSUPA, on Oct. 22, 1975, had requested permission to withdraw the charge without prejudice, but the PLRB denied the "without prejudice" condition.

The University on Nov. 5, 1975, had filed with the PLRB a letter objecting to withdrawal of the charge "without prejudice," noting that the charge had been under litigation for some 17 months; extensive hearings were held; a transcript of 1,078 pages was compiled, 96 exhibits were introduced; proposed findings of facts and briefs were prepared and submitted to the Hearing Examiner; and countless manhours and money were expended in the process.

Further, the University contended and attached an exhibit which indicated that the PSUPA, despite its request for withdrawal, continues to allege that the Faculty Senate is illegally University-dominated and that the only reason for withdrawal of the charge is to facilitate the holding of an early election. The University concluded by stating that PSUPA "should not be permitted to invoke the electoral processes of the Board under circumstances where it retains the right to repudiate the results of that process.

"The Board must agree with the position set forth by the University," the decision and order of withdrawal said. "The request to withdraw by the Association under the herein described circumstances cannot be granted without prejudice. An election, if held, cannot be later attacked or discredited because of alleged domination by the University over the Faculty Senate. The withdrawal by the Association under these circumstances is at least an admission that the status quo relationship between the University and the Faculty Senate will not prevent the holding of a true and perfect election because of this relationship."

Community advisory group formed

In an effort to increase the enrollment of black students at the University, an advisory committee to include black community leaders from throughout Pennsylvania will be organized.

This was one of the suggestions that came from a weekend meeting last month at University Park of representative black community leaders, primarily from the Philadelphia and Pittsburgh areas, with University personnel. The meeting followed earlier sessions with leaders in the black communities of Philadelphia and Pittsburgh.

Following the initial sessions, a report dealing with admissions, recruitment, financial aid, and ways of increasing the number of black staff and faculty members, was prepared in draft form.

Heading the Task Force on Increasing Black Enrollment appointed by President Oswald are: Dr. Raymond O. Murphy, vice president for student affairs, and Dr. Robert E. Dunham, vice president for undergraduate studies, co-chairmen. Other task force members are Dr. Edward V. Ellis, associate dean for continuing education, Human Development; Dr. N. J. Palladino, dean of the College of Engineering; Thelma T. Price, assistant vice president for student affairs, in charge of special programs and services; Joseph F. Douglas, associate dean of academic instruction for Commonwealth Campuses; Dr. Patricia Farrell, associate professor of recreation and parks and formerly affirmative action officer; Dr. James B. Bartoo, dean of the Graduate School; Dr. Herbert G. McGibeny, director of the McKeesport Campus; and Dr. Glenn G. Carter, director of secondary school relations.

PENN STATE COLLECTION

Winter Term 1976 Calendar

The Pennsylvania State University University Park Campus

Thursday, December 4

Classes begin, 8 a.m.
Tour of Pattee Library, 9, 10, 11 a.m and 2, 3, 4, 7 p.m., lobby of Pattee.
Commons Videotape, 12 noon, Kern lobby.
Sports: Men's basketball, vs. Delaware, 8 p.m., Rec Hall.

Friday, December 5

Public reception, "Paintings and Prints" by Steven Barbash, 7:30 p.m., Zoller Gallery.
Artists Series, Stockholm Philharmonic, 8:30 p.m., University Auditorium.
Nigel Nicolson, author, on "Bloomsbury: The Accidental Myth," 8 p.m., Room 112 Kern, Institute for the Arts and Humanistic Studies Lecture.
Commonspace Coffeehouse, 8 p.m., Room 102 Kern.
Sports: Wrestling, PSU Invitational.

Saturday, December 6

Sports: Penn State Swimmmg and Diving Relay Championships, 8:30 a.m., Natatorium, Women's and men's bowling, vs. Glennville, 1 p.m., Rec Hall.
Hetzel Union Board jammy, 8 p.m., HUB ballroom.
Sports: Wrestling, PSU Invitational. Men's fencing, vs. Maryland.

Sunday, December 7

Sports: Men's basketball, vs. Ohio State, 2 p.m., Rec Hall.
"Messiah," 3 p.m., University Auditorium.
Candlelighting ceremony in conjunction with the International Center's Celebration of Christmas, 7:30 p.m., Room 111 and lobby of Kern.
Chapel Service, 11 a.m., Eisenhower Chapel. Dr. James H. Nichols, modern European philosophy history, Princeton Theological Seminary.
Black Christian Fellowship worship service, 11 a.m., Cultural Center, Walnut Bldg.
Free U registration, 1-10 p.m., HUB ballroom.
Phi Beta Kappa, sherry and cider party, 3-5 p.m., Fireside Room, Nittany Lion Inn.

WEEK OF DECEMBER 8

Monday, December 8

E. W. Wickersham on "Biological Aspects of Sex," 7:30 p.m., Thompson Lounge. Sponsored by West Halls Residential Life Staff.
Karen Scott, soprano, 8:30 p.m., Music Bldg. recital hall.
France Cinema, "Alexandre," 7 and 9 p.m., Room 112 Kern.
International Crafts Workshop, 11 a.m., HUB main lounge.
International Crafts Demonstration, 12 noon, Kern lobby.
World Food Crisis Lecture Series, Dr. William C. Paddock, author and consultant in tropical agriculture, on "Triage: A Response to this Time of Famine," 8 p.m., Room 102 Forum. Sponsored by the University Committee for International Programs and the College of Agriculture.
College of Health, Physical Education and Recreation faculty meeting, 7 p.m., Room 109 White.

Tuesday, December 9

Sports: Men's basketball, vs. Virginia, 8 p.m., Rec Hall.
Peer Contraceptive Educators on "Practicalities of Sex," 7:30 p.m., Thompson Lounge. Sponsored by West Halls Residential Life Staff.

Dr. Dante Germino, professor of government and foreign affairs, University of Virginia, on "Freedom and the Moral Order," 8 p.m., auditorium, Keller Conference Center
International Crafts Workshop, 11 a.m., HUB main lounge.
International Noontime Concert, 12 noon, Kern lobby.
Thai religious celebration, "Loykratong" (Harvest Festival). 7:30 p.m., Kern lobby.
Library Seminar, "The Card Catalog and the Serials Holding List — Locating Books and Periodicals in Pattee Library," 7 p.m., Room W110 Pattee.

Wednesday, December 10

"Noondays" in Advent, the story of the birth of Jesus as recorded in "The Gospel according to Luke," large chapel, Eisenhower Chapel.
Dr. Graham Spanier on "Sexuality and Interpersonal Relationships," 7:30 p.m., Thompson lounge. Sponsored by West Halls Residential Life Staff.
"Europe '75," slide show prepared by students of Architecture Study Abroad Program, 8 p.m., HUB main lounge.
George Packard, candidate for the U.S. Senate, 7:30 p.m., HUB assembly room.
Alard String Quartet, 8:30 p.m., Music Bldg. recital hall.
Artists Series Film Festival, "Bringing Up Baby," 8:30 p.m., University Auditorium
GSA Commonspace Theatre, "Casablanca," 7:30 and 9:30 p.m., Room 112 Kern.
International Crafts Workshop, 11 a.m., HUB main lounge.
Traditional American Christmas crafts demonstration. 12 noon, Kern lobby.
Manuel Azpurua on "Process of Nationalizing the Venezuelan Oil Industry," 7:30 p.m., Room 101 Kern. Sponsored by the Latin American Student Assoc.

Thursday, December 11

Art Constantino on "Social Games at Penn State," 7:30 p.m., Thompson lounge Sponsored by West Halls Residential Life Staff.
"Europe '75," slide show prepared by students of Architecture Study Abroad Program, 8 p.m., HUB main lounge.
Dr. Jack Wasserman, Tyler School of Art, on "The Monster Leonardo Painted for His Father," 8 p.m., HUB assembly room.
Commons Videotape, 12 noon, Kern lobby.
International Crafts Workshop, 11 a.m., HUB main lounge.
International folk dancing performance, 12 noon, Kern lobby.
Panel discussion, "Implications of Triage on World Hunger," 7:30 p.m., Room 101 Kern.
Christmas Tea, sponsored by the Community Hospitality Council, 2-4.30 p.m., Room 111 Kern.
College of Business Administration faculty meeting, 1:30 p.m., Room 201 Business Adm.

Friday, December 12

International Crafts Demonstration, 11 a.m., HUB main lounge.
Noontime Concert of traditional American Christmas music, 12:15 p.m., Kern lobby.
International Coffeehouse and fashion show, 8 p.m., Room 102 Kern.
Sports: Wrestling, vs. Michigan.

Saturday, December 13

Yuletide music. Christmas in the Colonies, Penn State Glee Club and Penn State Brass Chorale, 8:30 p.m., Schwab.
Madrigal Dinner/Concert, 6.30 p.m., Room 102 Kern.
International dance party, 7:30 p.m., 4th floor, HUB multi-purpose room.
Hillel Foundation film, "Exodus," 7:30 and 9:30 p.m., HUB.
Sports: Wrestling, vs. Springfield. Men's fencing, vs. SUNY-Binghamton.

Sunday, December 14

Yuletide music: Christmas in the Colonies, Penn State Glee Club and Penn State Brass Chorale, 3:30 p.m., Schwab.
International children's Christmas party, 2 p.m., Cultural Center, Walnut Bldg Sponsored by Community Awareness.
Madrigal Dinner/Concert, 6:30 p.m., Room 102 Kern.
International Dance, 7 p.m., HUB ballroom.
Chapel Service, 11 a.m., Music Bldg. recital hall. "The Christmas Story — An Early American Setting. Atl Faith Chapel Choir, Tommie Irwin, director.
Black Christian Fellowship worship service 11 a.m., Cultural Center, Walnut Bldg
Hillel Foundation film, "Exodus. 7.30 and 9.30 p.m., HUB assembly room.
Graduate Women In Science lecture, 2 p.m., Room 112 Kern.

WEEK OF DECEMBER 15

Monday, December 15

Late registration deadline
Add deadline.
Color Slide Club Christmas party, 7:30 p.m., Room 112 Kern.
Laura Sardinas, violin, 8:30 p.m., Music Bldg. recital hall.

Tuesday, December 16

Sports: Men's basketball, vs. Kent State, 8 p.m., Rec Hall.
Artists Series Film Festival, "La Strada," 7 and 9 p.m., Schwab.
GSA Council meeting, 7 p.m., Room 101 Kern.
Two Cultures Dialogue, noon, Room 189 Materials Research Lab. Visiting professor Norman A. Graebner on "Historical View of the Two Cultures Gap."
College of Liberal Arts faculty meeting, 3.45 p.m., Room 121 Sparks

Wednesday, December 17

Composers' Concert, 8:30 p.m., Music Bldg. recital hall.
"Noondays" in Advent, the story of the birth of Jesus as recorded in "The Gospel according to Matthew," 12 noon, large chapel, Eisenhower Chapel.
GSA Commonspace Theatre, "White Heat," 7.30 and 9.30 p.m., Room 112 Kern.
African Studies Forum, Dr. Beverly Lindsay, education, on "Role of Women in Modern African Society" 7:30 p.m., Cultural Center, Walnut Bldg.

Thursday, December 18

Commons Videotape, 12 noon, Kern lobby.

Saturday, December 20

Christmas-New Year's recess, begins 12:25 p.m.

WEEK OF JANUARY 5

Monday, January 5

Classes resume, 8 a.m.
College of Health, Physical Education and Recreation faculty meeting, 7 p.m., Room 109 White.

Tuesday, January 6

File for Pass/Fail.

Wednesday, January 7

File for Pass/Fail.
Artists Series Film Festival, "Stagecoach," 8:30 p.m., University Auditorium.
"Noondays," devotional period, 12 noon, large chapel, Eisenhower Chapel.
GSA Commonspace Theatre, "To Have and Have Not," 7.30 and 9.30 p.m., Room 112 Kern.
World Food Crisis Lecture Series, Dr. Don C. Kimmel, The Food and Agriculture Organization of the United Nations, on "International Action to Feed the World," 8 p.m., Room 105 Forum. Sponsored by the Committee for International Programs and the College of Agriculture.

Thursday, January 8

Preregistration deadline.
Drop deadline.
File for Pass-Fail.
Course repeat deadline.
Commons Videotape, 12 noon, Kern lobby.

Friday, January 9

Artists Series, Martin Best, lutenist and guitarist. "The Art of the Troubador," 8.30 p.m., Schwab.
Folk and Square Dance Roundup, 7:30 p.m., south gym, White.
GSA Commonspace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, January 10

Sports. Women's swimming, vs. Springfield, 2 p.m. Men's and women's gymnastics, vs. Springfield, 8 p.m., Rec Hall.
Sports: Wrestling, vs. Bloomsburg State. Artists Series, Marcel Marceau, mime, 8.30 p.m., University Auditorium.
Black Caucus, "Dime Disco," 9 p.m., HUB ballroom.

Sunday, January 11

Public reception, "Recent Sculptures by John Cook," 3-5 p.m., Museum of Art. Teri Gemberling, piano, 3.30 p.m., Music Bldg. recital hall.
Chapel Service, 11 a.m., Music Bldg., recital hall. The Right Rev. Henry W. Murph, Bishop, African Methodist Episcopal Church, Washington, D.C.

WEEK OF JANUARY 12

Monday, January 12

Davis Brooks, violin, 8:30 p.m., Music Bldg. recital hall.
France Cinema, "Zazie and the Subway," 7 and 9 p.m., Room 112 Kern.

Tuesday, January 13

Sports: Men's and women's bowling, vs. Gettysburg, 3 p.m.; Rec Hall.
College of Arts and Architecture faculty meeting, 4 p.m., Room 302 Engineering A.
Artists Series Film Festival, "Il Bidone," 7 and 9 p.m., Schwab.
College of Liberal Arts faculty meeting, 3.30 p.m., Room 121 Sparks.
College of Agriculture faculty meeting, 4 p.m., Rooms 301 A and B Ag. Administration.

Wednesday, January 14

Thalia Trio, 8.30 p.m., Music Bldg recital hall.
"Noondays" devotional period, 12 noon, large chapel, Eisenhower Chapel.

Exhibits

Museum of Art:
Through Dec. 21: Works on Paper from the Permanent Collection. Architectural and Ornament Drawings: Juvarra, the Bibiena Family, and Other Italian Draughtsmen.
Jan. 11-Feb. 29. Recent Sculptures by John Cook. Hugo Weber, A Retrospective Exhibit.
The Museum is closed from Dec. 22-Jan. 1. Free public gallery tours Thursdays at 1:30 p.m.

Zoller Gallery:
Through Dec. 6: Paintings and Prints by Steven Barbash.
Dec. 8-13. Annual Art Student Holiday Show and Sale
Jan. 5-17: Student Painting and Ceramics Exhibition.
Jan. 18-30: Student Sculpture Exhibition.
Feb 1-20: David Hare Exhibition.

HUB Gallery:
Through Dec. 19: Norwegian Viking Art (Norwegian Information Service).
Dec. 14-19: Art faculty holiday show and sale.
Jan. 5-17: Free U Art Show, Mike Loren
Jan. 17-Feb. 15. Jack Tar, American Profiles of Merchant Seafarers, 1794-1803 (Smithsonian Institution).

Kern Gallery:
Though Dec. 14. International Holiday Festival Exhibits.
Jan. 10-Feb. 1. Central Pa. Scholastic Art Show.

Chambers Gallery:
Through Dec. 19. Faculty-Teaching Art Exhibit, all media.
Jan. 6-29: Musical Instruments.
Jan. 30-Feb. 25. Graduate Student Exhibition, all media.

Cultural Center:
Dec. 7-14. Display of International Dolls

Pattee Library:
Main Lobby — Through Jan. 5; Gem Cutting Exhibit by Dr. Dean Smith. Lending Services Lobby — through Jan. 7: The Christmas Tree Exhibit, prints from the Rare Books Collection. East Corridor Lobby — through Dec. 8: Batik Paintings, Sharon Selt. Dec. 9-Jan. 12: Drawings and Photographs, Maureen and Gary Neil.

Thursday, January 15

Late registration deadline
Commons Videotape, 12 noon, Kern lobby.

Friday, January 16

Penn State Symphonic Wind Ensemble, 8:30 p.m., Music Bldg. recital hall.
GSA Commonspace Coffeehouse, 8 p.m., Room 102 Kern.
Recreation and Parks Society Professional Careers Conference, 8 a.m.-5 p.m., HUB ballroom.

Saturday, January 17

Sports: Men's basketball, vs. Muhlenberg, 2 p.m., Rec Hall. Women's and men's bowling, PSU Invitational, 3 p.m., Rec Hall. Women's swimming, vs. Pittsburgh.
Un-Common Dinner Theatre, "6 Rms Riv Vu," 6:30 p.m., Room 102 and 112 Kern.
Campus 4-H Club '50's Record Hop, 7 p.m., HUB ballroom.
Sports: Men's swimming, vs. Pittsburgh.

Sunday, January 18

Marilyn Manning, flute, 3:30 p.m., Music Bldg. recital hall.
Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Hugh Brooks, recreation, parks.
Black Christian Fellowship worship service, 11 a.m., Cultural Center, Walnut Bldg.
Un-Common Dinner Theatre, "6 Rms Riv Vu," 6:30 p.m., Rooms 102 and 112 Kern.

WEEK OF JANUARY 19

Monday, January 19

Sports: Men's basketball, vs. Gettysburg, 8 p.m., Rec Hall.
Color Slide Club, William Davis on "Selection, Staging, and Judging a Photographic Show," 7:30 p.m., Room 112 Kern.
June Miller, organ, 8:30 p.m., Music Bldg. recital hall.
Library Seminar, "Education Reference Materials," 7 p.m., Room W110 Pattee.

Tuesday, January 20

GSA Council meeting, 7 p.m., Room 101 Kern.

Wednesday, January 21

Alard String Quartet, 8:30 p.m., Music Bldg. recital hall.
"Noondays" devotional period, 12 noon, large chapel, Eisenhower Chapel.
Sports: Men's and women's bowling, PSU Invitational, 1 p.m., Rec Hall.
GSA Commonspace Theatre, "I Am a Fugitive from a Chain Gang," 7:30 and 9:30 p.m., Room 112 Kern.

Thursday, January 22

Gallery talk, Robert H. Luck, curator, Finch College Museum of Art, on "Hugo Weber - A Retrospective Exhibition," 7:30 p.m., Museum of Art.
Commons Videotape, 12 noon, Kern lobby.
University Theatre, Noel Coward's "Hay Fever," 8 p.m., Playhouse Theatre.

Friday, January 23

University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.
GSA Commonspace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, January 24

Sports: Women's fencing, vs. Ohio State, 9 a.m. Women's basketball, vs. Ithaca, 2 p.m., White. Men's basketball, vs. West Virginia, 2 p.m., Rec Hall. Men's and women's gymnastics, vs. Ohio State, 8 p.m., Rec Hall.
Hillel Foundation film, "Kazablan," 7:30 and 9:30 p.m., HUB assembly room.
University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.
PSU Symphony Orchestra, 8:30 p.m., Schwab.
Sports: Men's swimming, vs. Bloomsburg State. Men's fencing, vs. William Paterson.

Sunday, January 25

Artists Series, Igor Kipnis, harpsichordist, 3:30 p.m., Schwab.
Alpha Chi Omega "Greek Sing," 2-4 p.m., HUB ballroom.
Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Robert A. Raines, director, Kirkridge Retreat and Study Center, Bangor, Pa.
Black Christian Fellowship worship service, 11 a.m., Cultural Center, Walnut Bldg.
Hillel Foundation film, "Kazablan," 7:30 and 9:30 p.m., HUB assembly room.

WEEK OF JANUARY 26

Monday, January 26

Raymond Page, viola, 8:30 p.m., Music Bldg. recital hall.
France Cinema, "Ramparts of Clay," 7 and 9 p.m., Room 112 Kern.

Tuesday, January 27

University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.
Library Seminar, "Psychology Reference Materials," 7 p.m., Room W110 Pattee.
College of Earth and Mineral Sciences faculty meeting, 4 p.m., Room 26 Mineral Sciences.

Wednesday, January 28

"Noondays" devotional period, 12 noon, large chapel, Eisenhower Chapel.
GSA Commonspace Theatre, "Mutiny on the Bounty," 7:30 and 9:30 p.m., Room 112 Kern.
World Food Crisis Lecture Series, Dr. Robert F. Chandler on "The Outlook for the Green Revolution," 8 p.m., Room 105 Forum. Sponsored by the University Committee for International Programs and the College of Agriculture.
University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.
Musica da Camera, 8:30 p.m., Music Bldg. recital hall.

Thursday, January 29

Commons Videotape, 12 noon, Kern lobby.
USA vs. USSR Men and Women International Gymnastics, Rec Hall. Olympic compulsory exercise competition for men, at 2 p.m., women at 7 p.m.
University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.

Friday, January 30

USA vs. USSR Men and Women International Gymnastics, optional competition women and men, 8 p.m., Rec Hall.
University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.
Sharon Brook, piano, 8:30 p.m., Music Bldg. recital hall.
GSA Commonspace Coffeehouse, 8 p.m., Room 102 Kern.
Episcopal Student Assoc. Square Dance with the Buffalo Chipkickers, 7:30 p.m., HUB ballroom.
Sports: Men's fencing, vs. Baruch and NYU.

Saturday, January 31

USA vs. USSR Men and Women International Gymnastics, optional exercise competition women and men, 8 p.m., Rec Hall.
University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.
Campus Crusade for Christ Square Dance, 7 p.m., HUB ballroom.
Sports: Men's fencing, vs. Army.

Sunday, February 1

Chapel Service, 11 a.m., Eisenhower Chapel. Rev. Robert C. Fox, State College.
Black Christian Fellowship worship service, 11 a.m., Cultural Center, Walnut Bldg.

WEEK OF FEBRUARY 2

Monday, February 2

First day of signing Spring Term NDSL, BEOG, and University Long Term Loans, Room 108 Shields.
Library Seminar, "Term Paper Workshop," 7 p.m., Room W110 Pattee.
College of Health, Physical Education and Recreation faculty meeting, 7 p.m., Room 109 White.

Tuesday, February 3

Library Seminar, "Environment Reference Materials," 7 p.m., Room W110 Pattee.

Wednesday, February 4

Sports: Men's basketball, vs. Temple, 8 p.m., Rec Hall.
"Noondays" devotional period, 12 noon, large chapel, Eisenhower Chapel.
GSA Commonspace Theatre, "The Harder They Fall," 7:30 and 9:30 p.m., Room 112 Kern.

Thursday, February 5

Commons Videotape, 12 noon, Kern lobby.
College of Business Administration faculty meeting, 10 a.m., Room 201 Business Adm.

Friday, February 6

Folk and Square Dance Roundup, 7:30 p.m., south gym, White.
GSA Commonspace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, February 7

Sports: Women's basketball, vs. Cortland, 2 p.m., White. Women's swimming, vs. West Chester, 7 p.m.
Sports: Wrestling, vs. Navy. Men's swimming, vs. Bucknell. Men's fencing, vs. New Jersey Tech.

Sunday, February 8

Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Gerald E. Gipp, education.
Black Christian Fellowship worship service, 11 a.m., Cultural Center, Walnut Bldg.

WEEK OF FEBRUARY 9

Tuesday, February 10

Artists Series Film Festival, "Nights of Cabiria," 8:30 p.m., University Auditorium.
Central Pa. Archaeological Institute lecture, "Robert Bull," 8 p.m., Room 112 Kern.
Sports: Women's basketball, vs. East Stroudsburg, 8 p.m., White. Women's swimming, vs. Shippensburg, 3 p.m.
College of Liberal Arts faculty meeting, 3:30 p.m., Room 121 Sparks.

Wednesday, February 11

"Noondays" devotional period, 12 noon, large chapel, Eisenhower Chapel.
Sports: Women's fencing, vs. Temple, 4 p.m., White. Men's basketball, vs. Syracuse, 8 p.m., Rec Hall.
GSA Commonspace Theatre, "The Misfits," 7:30 and 9:30 p.m., Room 112 Kern.
Gregory Donovetsky, oboe, 8:30 p.m., Music Bldg. recital hall.
Last day for signing Winter Term NDSL, BEOG, and University Long Term Loans, Room 108 Shields.
Sports: Men's swimming, vs. Temple. Men's fencing, vs. Temple.

Thursday, February 12

Commons Videotape, 12 noon, Kern lobby.

Friday, February 13

University Theatre, "Norton I, Emperor of the United States," 7:30 p.m., Pavilion Theatre.
GSA Commonspace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, February 14

University Theatre, "Norton I, Emperor of the United States," 10:30 a.m. and 2:30 p.m., Pavilion Theatre.
Phi Delta Kappa Ladies Night Social, 8 p.m., Room 102 Kern.
Sports: Women's fencing, vs. Madison, Caldwell, Trenton, 9 a.m. Women's basketball, vs. Shippensburg, 1:30 p.m., White. Men's and women gymnastics, vs. Southern Connecticut, 8 p.m., Rec Hall.

Sunday, February 15

University Theatre, "Norton I, Emperor of the United States," 2:30 p.m., Pavilion Theatre.
Chapel Service, 11 a.m., Eisenhower Chapel. Rev Charles L. Coleman, program director, Religious Affairs.
Black Christian Fellowship worship service, 11 a.m., Cultural Center, Walnut Bldg.

WEEK OF FEBRUARY 16

Monday, February 16

Color Slide Club, David Palermo on "Australia," 7:30 p.m., Room 112 Kern.
Composers' Concert, 8:30 p.m., Music Bldg. recital hall.

Tuesday, February 17

Gallery talk, Hedy B. Landman, director of the Danforth Museum, on "The Paper on the Wall," 10:30 a.m., Museum of Art.

Wednesday, February 18

Artists Series Film Festival, "Gone with the Wind," 8:30 p.m., University Auditorium.
Penn State Brass Chorale, 8:30 p.m., Music Bldg. recital hall.
"Noondays" devotional period, 12 noon, large chapel, Eisenhower Chapel.
GSA Commonspace Theatre, "The African Queen," 7:30 and 9:30 p.m., Room 112 Kern.

Thursday, February 19

Commons Videotape, 12 noon, Kern lobby.

Friday, February 20

Folk and Square Dance Roundup, 7:30 p.m., south gym, White.
University Theatre, "Norton I, Emperor of the United States," 7:30 p.m., Pavilion Theatre.
GSA Commonspace Coffeehouse, 8 p.m., Room 102 Kern.
Sports: Women's basketball, vs. Pittsburgh, 7 p.m., White.

Saturday, February 21

Sports: Women's and men's bowling, PSU Invitational, 1 p.m., Rec Hall. Women's swimming, vs. East Stroudsburg, Clarion, Slippery Rock, 7 p.m. Men's basketball, vs. Pittsburgh, 8 p.m., Rec Hall.
University Theatre, "Norton I, Emperor of the United States," 10:30 a.m. and 2:30 p.m., Pavilion Theatre.
PSU Symphony Orchestra, 8:30 p.m., University Auditorium.
The Contemporary Dance Company in Concert, 8:30 p.m., Schwab.
Sports: Wrestling, vs. Pittsburgh. Men's swimming, vs. West Virginia.

Sunday, February 22

Artists Series, "The Marriage of Figaro," 8:30 p.m., University Auditorium.
University Theatre, "Norton I, Emperor of the United States," 2:30 p.m., Pavilion Theatre.
Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Eloise C. Snyder, sociology.
Black Christian Fellowship worship service, 11 a.m., Cultural Center, Walnut Bldg.
The Contemporary Dance Company in Concert, 2:30 and 8:30 p.m., Schwab.

WEEK OF FEBRUARY 23

Monday, February 23

Cathy Havens, soprano, 8:30 p.m., Music Bldg. recital hall.

Wednesday, February 25

Deadline for late Drop-Adds. Classes end.
Last day for signing Winter Term Emergency Loans, Room 108 Shields.

Thursday, February 26

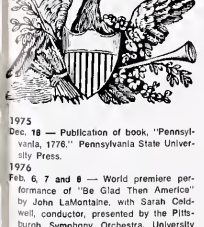
Final examinations.

Friday, February 27

Final examinations.
Sports: Wrestling, EWL Tournament.

Saturday, February 28

Final examinations.
Sports: Wrestling, EWL Tournament. Men's swimming, vs. St. Bonaventure.



Wednesday, March 3

College of Earth and Mineral Sciences faculty meeting, 4 p.m., Room 26 M.S.

Saturday, March 6

Commencement.

Bicentennial Events

1975
Dec. 18 — Publication of book, "Pennsylvania, 1776." Pennsylvania State University Press.

1976
Feb. 6, 7 and 8 — World premiere performance of "Be Glad Then America" by John LaMontaine, with Sarah Caldwell, conductor, presented by the Pittsburgh Symphony Orchestra, University Choirs, and guest soloists. 8:30 p.m., Feb. 6 and 7; 3 p.m., Feb. 8, University Auditorium. Tickets for Feb. 6 and 8 performances distributed through Artists Series.
Feb. 6-26 — Nick Ruggieri Bicentennial Art Exhibit, 80 watercolors, including scenes from each of 67 counties of Pennsylvania, Commons Gallery, Kern Graduate Bldg.
Feb. 14-15 — Artists Series presents Alvin Alley City Center Dance Theatre, 8:30 p.m., Feb. 14 and 3 p.m., Feb. 15, with workshop to be announced. University Auditorium.

Four lectures set this week

Role of triage analyzed

"Triage: A Response to this Time of Famines" is the title of a public lecture to be presented by Dr. William C. Paddock at 8 p.m. Monday, Dec. 8, in Room 102 Forum Bldg. This is the first in a three-part series on the world food crisis sponsored by the University Committee for International Programs and the College of Agriculture.

Dr. Paddock was the first to propose the application of triage to U.S. agricultural aid programs in his book, "Famine-1975." Maintaining that the U.S. cannot produce enough food to keep alive the exploding populations of every hungry nation, he advocates triage — deciding which countries will receive food and which will not.

A specialist in tropical agriculture, Dr. Paddock received his Ph.D. in plant pathology and plant breeding at Cornell University. He has taught at Penn State and Iowa State and since 1965 has been a consultant in tropical agricultural development working primarily with private industry.

Kibbutz life lecture topic

"Social Bonds and Utopia. Three Generations of Kibbutz Life" will be the topic of Dr. Lionel Tiger at 3:30 p.m. Thursday, Dec. 11, in Room 112 Kern Bldg.

Professor of anthropology at Rutgers University, Dr. Tiger is the co-author of "Women in the Kibbutz," a book which supports the hypothesis that traditional sex roles are prevailing on Israel's collective farms despite the ideology of sexual equality there.

The author of "Men in Groups" and "Imperial Animal," Dr. Tiger is a graduate of McGill, where he earned his bachelor's and master's degrees, and the University of London, which conferred his Ph.D. Prior to coming to Rutgers in 1966, he taught at the University of British Columbia.

Germino to talk Dec. 9

Dr. Dante Germino, professor of government and foreign affairs at the University of Virginia, will speak on "Freedom and the Moral Order" at 8 p.m. Tuesday, Dec. 9, at the Keller Bldg. Auditorium.

His lecture, which is open to the public, is co-sponsored by the DuBois and University Park Campuses. It is part of the "Freedom: Then, Now and Tomorrow" bicentennial program of Continuing Education.

Dr. Germino received his baccalaureate degree at Duke University and his M.A. and Ph.D. at Harvard. He taught at Wellesley College for ten years and then joined the Rockefeller Foundation Overseas Field Staff in University Development. He has been at Virginia since 1968.

He is the author of "Modern Western Political Thought: Machiavelli to Marx," "The Italian Fascist Party in Power: A Study in Totalitarian Rule" and "Beyond Ideology: The Revival of Political Theory." The co-author of two other books, he has written numerous articles for scholarly publications and is a regular contributor to "National Review."

Bloomsbury is Nicolson's subject

Nigel Nicolson, English writer and publisher and the author of the recent best-selling biography, "Portrait of a Marriage," will deliver a public lecture at 8 p.m. Friday, Dec. 5, in Kern Bldg. Auditorium on "Bloomsbury, the Accidental Myth." His talk traces the relationship of Virginia Woolf to the Bloomsbury cultural circle in which she moved. Mr. Nicolson is editor with Dr. Joanne Trautmann, associate professor of humanities at Hershey, of "The Letters of Virginia Woolf." He has also written several books on politics, architecture and social history.

Seminar schedule—Dec. 4-11

Thursday, Dec. 4

Chemistry, 12:45 p.m., Room 333 Whitmore. James L. Kassner, University of Missouri at Rolla, on "Homogeneous and Heterogeneous Nucleation of Water Vapor."

Mathematics, 4 p.m., Room 102 McAllister. Antoni Zygmund, University of Chicago, on "Problems of Differentiability of Functions."

Agronomy, 4 p.m., Room 111 Tyson. Dave Belesis on "Forest Research in Ireland."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Dr. Lothar Koschmieder, civil engineering, University of Texas, on "Symmetric Circulations of Planetary Atmospheres."

Monday, Dec. 8

Genetics, 3:55 p.m., Room 111 Tyson. Dr. J. E. Wright Jr., biology, on "Development and Uses of Inbred Lines of Trout."

Biochemistry and Biophysics, 4 p.m., Room 101 Althouse. Richard S. Morgan on "Chains of Alternating Sulfur and Pi-Bonded Atoms in Proteins."

Computation Center, 7:30 p.m., Keller. "PL/E (3)."

Organic Chemistry, 8 p.m., Room 333 Whitmore. Lloyd M. Jackman on "Short Course in ^{13}C-NMR." (It will also meet Dec. 9, 10.)

Tuesday, Dec. 9

ARL, 10:45 a.m., Eric A. Walker Conference Room, Applied Science Bldg. C. B. Baker on "Influence of Polymer Additive on Jet Cavitation."

Water Pollution Control, 2:20 p.m., Room 124 Sackett. "Enabling Legislation and Local Administration."

Statistics, 4 p.m., Room 75 Willard. George H. Weiss, Physical Sciences Lab., PHS, NIH, Bethesda, on "Theory of Traffic Noise."

Wednesday, Dec. 10

Fuel Science, 4 p.m., Room 301 Mineral Industries. Dr. N. S. B. Murthy, mechanical engineering, Purdue University, on "Flow Laser Cavities."

Thursday, Dec. 11

Chemistry, 12:45 p.m., Room 333 Whitmore. Dennis C. Johnson, Iowa State University, on "Applications of Electronanalysis to Liquid Chromatography."

Anthropology, 3:30 p.m., Room 112 Kern. Dr. Lionel Tiger, Rutgers University, on "Social Bonds and Utopia. Three Generations of Kibbutz Life."

Physics, 3:50 p.m., Room 117 Osmond. John McTague, Brookhaven National Lab., on "Neutron Scattering of Structure and Dynamics of Adsorbed Layers."

Microbiology and Cell Biology, 3:55 p.m., Room 32 Fred. A.L. Phillips on "Structural Studies and Biosynthesis of Keto Acid Coenzymes."

Statistics, 4 p.m., Room 75 Willard. David Moore, Purdue University, on "Comments on the Use of Abuse of Chi-squares Tests of Fit From the Viewpoint of Statistical Theory."

Computation Center, 7:30 p.m. Keller. "PL/E (4)."

Funding opportunities

For further information, call 865-1372

(206-1) The Energy Research and Development Administration (EROA) plans to award roughly $150 million worth of FY 1976 on-campus research contracts. Those contracts are to include "areas beyond the technical aspects of new and improved energy sources." The expertise of **sociologists, economists, architects, psychologists, lawyers** and others is needed, and involvement of graduate assistants will be strongly emphasized. Interdisciplinary teams are encouraged, especially those involving social scientists working with natural scientists and engineers. (Ref. Chronicle 11/10/75).

(206-2) The Office of Education has issued proposed additional criteria for selection of applications under its programs of **Vocational Education Curriculum projects** and **Research Projects in Vocational Education** for FY 1976. The closing date for curriculum applications is Dec. 10, 1975, and for research applications, Jan. 9, 1976.

(206-3) Proposed funding criteria for **Graduate and Undergraduate International Studies Programs** have been issued by the Office of Education. Applications for initial grants must be submitted by Dec. 15, 1975.

(206-4) The Office of Education has issued proposed amended criteria for its **Library Research and Demonstration Projects** and has announced a Jan. 9, 1976, application-received date. Criteria for continuation of assistance regulations are included.

'Tis the Season

(Continued from page one)

Greeting cards ready

A limited number of official University greeting cards are available through the Department of Publications, Room 215 Wagner Bldg. They can be picked up or ordered by telephone (865-1327). Cost, including envelope, is 17 cents. The card features a full-color reproduction of a turn-of-the-century painting of a mother and child trimming a Christmas tree. It is available with or without the message: "Season's Greetings, The Pennsylvania State University."

News in brief

Karen Scott to sing

Soprano Karen Scott, assistant professor of music, will sing music by six composers in recital at 8:30 p.m. Monday, Dec. 8, in the Music Bldg. recital hall.

From Handel's "Joshua," one of his lesser known oratorios, Mrs. Scott will sing the aria "O had I Jubal's Lyre." Following the aria will be the simple, melodious "Ruhe, sanft," from Mozart's "Zaide."

Poulenc's "Metamorphoses," a setting of a poem by Louise de Lilmorin, is a virtuosic piece for singer and pianist. Accompanying Mrs. Scott in the recital will be Phillip Dettra, assistant professor of music. Completing the program will be Delio Joio's "Three Songs of Adieu," six songs by Schubert, and the farewell aria from Moore's "The Ballad of Baby Doe."

Mrs. Scott, who joined the University faculty in 1972, holds an undergraduate degree from Temple University and a master's from Juilliard School of Music.

New ag course open

Late registrations will be accepted for a new world affairs course, "Introduction to International Agriculture (INTAG) 100," which will focus on the world food crisis with emphasis on the socio-economic and technical constraints limiting food production. Global problems facing world agricultural production, population pressures and agricultural energy requirements will be stressed, and special consideration will be given to the problems of developing countries. The impact of food aid programs and the Green Revolution will also be discussed. The two-credit course will be taught by Dr. David R. MacKenzie, assistant professor of plant pathology, and there will be several internationally known guest lecturers at the Tuesday-Thursday fourth period sessions.

Newcomers compiling list

Members of the Faculty Women's Newcomers' Club are compiling a list of women who have come to University Park since Sept. 1. They would like to include all women of academic or professional rank and wives of newly arrived faculty and staff members. These women can then be invited to welcoming coffee-desserts in the new year. Anyone who can supply names and addresses of newcomers should send this information to Alice Fleischer, 626 Hubler Road, State College, or telephone 466-6644. Newcomers' Club would like to receive names year-round, but for the mid-winter dessert list, there is a Dec. 19 deadline.

Alard concert Dec. 10

Three works will be performed by the Alard String Duartet at 8:30 p.m. Wednesday, Dec. 10, in the Music Bldg. recital hall.

The program includes Mozart's "Duartet in D," k. 499, written in 1786 but almost free of the melancholy traces which pervade his work of that period; "String Quartet #3 (on Hebrew themes)" by Elie Siegmeister, which was first performed in 1973; and the last of Dvorak's eight string quartets, "Quartet in G," opus 106, written after the composer's return to Bohemia from America in 1895.

Duartet members, all associate professors of music, are Joanne Zagst and Donald Hopkins, violins; Raymond Page, viola; and Leonard Feldman, cello.

Obituary

Richard C. Maloney, former associate dean of the College of the Liberal Arts, died Nov. 13 at the age of 71 in Nantucket, Mass. Born in Chelsea, Mass., he was graduated from Dartmouth and received master's degrees from Dartmouth and Kansas State Colleges in English and fine arts, respectively. He was a high school teacher and principal before enlisting in the U.S. Naval Air Force in World War II. He became a Latin instructor at Kansas State and then served as registrar there, coming to Penn State in 1950 as an administrative assistant to President Milton S. Eisenhower. From 1953 to 1965, he was assistant and then associate dean in Liberal Arts and then served as an associate professor of social science and lecturer in history until his retirement in 1970.

Althouse lecture held

Dr. George E. Palade, 1974 Nobel Prize winner in physiology and medicine, delivered the second annual Paul M. Althouse Memorial Lecture at The Milton S. Hershey Medical Center Nov. 20. He spoke on "Biogenesis of Cellular Membranes."

The lectureship, established in February, 1974, honors Dr. Althouse, provost of the University at his death in 1972, and previously a professor of biochemistry, director of general education, and vice president for academic affairs. The series was made possible through contributions to the Althouse Memorial Fund and by a matching gift from the Althouse family.

Dr. Palade, who is professor and chairman of the section of cell biology at Yale University Medical School, was born and educated in Rumania. He came to the United States in 1946 as a visiting investigator at the Rockefeller Institute.

Phi Beta Kappa party

In observance of the 39th anniversary of its founding, Lambda Chapter of Phi Beta Kappa will hold a Sherry and Cider Party from 3 to 5 p.m., Sunday, Dec. 7, in the Fireside Room of the Nittany Lion Inn. A brief business meeting will precede the social hour. All members of Phi Beta Kappa and their spouses are invited to attend.

Social Security tax up

The take-home pay of faculty and staff members will be affected by the change in the Social Security law for 1976, the Controller's Office announces. As of Jan. 1, 1976, earnings up to $15,300 will be subject to Social Security withholding. This is a $1,200 increase from the current base of $14,100. The rate of contribution does remain at 5.85 percent. Employees who earn less than $14,100 will be unaffected by this change, but those with salaries above this amount will have an increase in withholding which will range up to a maximum of $70.20. The maximum Social Security tax an employee will pay in 1976 will be $895.05.

Swim meet Dec. 6

One of the most important meets in the East, the Penn State Swimming and Diving Relay Championships, will be held Saturday, Dec. 6, at the Natatorium. The meet will begin at 6:30 p.m. with both boards diving trials. Swimming relay trials are scheduled for 10 a.m., followed by high board diving trials at 10:30 a.m. Swimming and diving finals will take place at 3:30 p.m. Participating teams include Bloomsburg, Bucknell, Colgate, East Carolina, Edinboro, Johns Hopkins, Kent State, LaSalle, Maryland, Penn State, Pittsburgh, St. Lawrence, Syracuse, Virginia, Virginia Commonwealth and West Virginia. Admission is $1 for the trials and $1 for the finals.

Staff vacancies

Staff vacancies contained in this publication are those which generally require at least a baccalaureate degree or equivalent as a minimum education and qualification. Staff vacancies requiring less than a baccalaureate and those announced in INTERCOM may be found in the PENN STATE REPORTER.

This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1381 (Walkovits Line 475-1287). Applications for these staff vacancies will be accepted until 5 p.m. Thursday, Dec. 11. **Do not contact the area the has the vacancy.**

ASSISTANT FOOD SUPERVISOR, HOUSING AND FOOD SERVICE — Behrend Campus

Responsible for assisting in the management of the dining room's snack bar, and catering operation at Behrend Campus. Bachelor's degree or equivalent, plus 2 to 12 months directly related experience in food service.

SPECIALIST, CHILD DEVELOPMENT CENTER — Capitol Campus

Responsible for implementing the planned educational program of the Child Development School including instruction of children, acting as cooperating teacher, assisting in the training of students and teacher aides, supervising of teacher aides and maintaining records of pre-school children. Bachelor's degree or equivalent with eligibility for Pennsylvania Private School Certification, plus over 3 months up to and including 12 months of directly related experience.

The University is an Equal Opportunity/Affirmative Action Employer.

Committee set to sift names for Provost

Names of the members of the screening committee appointed to seek a new Provost were announced today by President Oswald. Provost Russell E. Larson announced last month his plans to retire Jan. 1, 1977.

The chairman of the committee is John J. Coyle, professor and head of business logistics and chairman-elect of the University Faculty Senate. Serving as vice chairman of the committee will be Stuart Forth, dean of University Libraries.

Five faculty members have been chosen from among a panel of recommendations submitted by the Senate's Committee on Committees and Rules. They are. Charles N Cofer, professor of psychology; Patricia Farrell, associate professor of recreation and parks; Donald R. Olson, professor and head of mechanical engineering; Sally S. Small, associate librarian at Berks Campus and currently Senate chairperson; and James Tammen, professor and head of plant pathology.

Four additional administrators who will serve are: James B. Bartoo, dean of the Graduate School; William J. Devid, director of the Hazleton Campus; Edward V. Ellis, associate dean, College of Humen Development; and Thomas Wartik, dean of the College of Science.

Three students who will serve are: Alexander W. Holt, president of the Graduate Student Association; Michael Ostroff, chairman of the Undergraduate Student Government Association's Academic Assembly; and Edward Riskosky, president of the Undergraduate Student Government Association at the New Kensington Campus and the representative to the University's Board of Trustees of the Council of Branch Campus Student Governments.

Ray T. Fortunato, assistant vice president for personnel administration, has been asked to provide assistence to the committee in its work.

According to President Oswald, who plans to meet with the committee in the near future, "One of the committee's first tasks is to make public the ways and means for members of the University community and others outside the University to recommend names of qualified individuals for consideration."

Lindsay to talk on African women

"The Role of Women in Modern African Society" is the theme of the first African Studies Forum of the winter term, to be held Wednesday, Dec. 17, at 7.30 p.m. in the Cultural Center, Walnut Building.

The panel discussion will be led by Dr. Beverly Lindsay, assistant professor of education in the Division of Education Policy Studies. Joining her in consideration of the subject will be four graduate students: Gladys A. Pratt, of Ghana, home economics education; Marie B. Treki, of Libya, food science; Edith O. Phillips, of Nigeria, business administration; and Christine Mokeke, of Cameroon, home economics education.

Dr. Lindsay has recently been engeged in research in Nairobi, Kenya, on socio-cultural factors influencing women's career choices, working under a Ford Foundation

News in brief

HUB Candlelight Dinner Dec. 17

The HUB's annual Christmas Candlelight Dinner is scheduled for Wednesday, Dec. 17, from 5 to 7 p.m. in the Terrace Room. Menu highlights include stuffed chicken breasts, prime ribs of beef, sauteed crab and shrimp on toast, veal cordon b'eu and roast pork with raisin-cider sauce. Sauteed mushrooms, corn pudding and French green beans with almonds are the vegetable accompaniments, and there will be hot mince and pumpkin pie and cherry cheesecake. Entertainment will be provided by the Hi-Lo's and other singing groups.

The HUB food service will shut down for the holiday break after the evening meal, Friday, Dec. 19, and reopen Sunday, Jan. 4, at lunch.

Car pools organized

OTIS (Organization of Town Independent Students) is trying to organize car pools for State College residents. Drivers and riders interested in participating will find sign-up sheets located on the ground floor of the HUB on the bulletin board directly across from the ride board. OTIS has divided State College into more than 30 areas, so prospective riders and drivers can identify their areas on a posted map and then list their names, phone numbers, street addresses, areas and times of arrival on and departure from campus.

Professional women's get-together

The Faculty Women's Newcomers' Club is initiating a get-together for professional women. They are invited to gather in the Fireside Room of the Nittany Lion Inn Wednesday, Dec. 17, from 4.30 to 6.30 p.m. There will be a cash bar. For further information, celt Carol Leisenring at 865-4563

Children get Christmas party

The Community Awareness Program has scheduled its second annual Christmas party for children at 2 p.m. Sunday, Dec. 14, in the Cultural Center, Walnut Bldg. Students, faculty and staff are invited to bring their children to experience an international holday, complete with international food, music and culture. There is also a good chance that Santa will make a guest visit to liven things up. Children should be 12 years or younger.

Library instruction provided

Faculty members may errange for basic instruction in library use for their undergraduate classes by calling Marietta Plank at 863-0323. Librarians in the Reference Department will give library instruction to upper-division and graduate classes. Arrangements for this may be made by calling Jack Pontius at 865-6368.

Graebner to speak

Or. Norman A Graebner, distinguished visiting professor of history, will speak on "A Historical View of the Widening Two Cultures Gap" Tuesday, Dec. 16, at the Two Cultures Dialogue, to be held between noon end 2 p.m. in Room 189 Materials Research Laboratory. Dr. Graebner is Edward R. Stettinius professor of history at the University of Virginia. Or. Richerd G. Conningham, vice president for research end graduate studies, will respond. All faculty and administrative personnel ere welcome.

(Continued on page three)

Term system to be continued for five years, Oswald says

President Oswald told the University Faculty Senate on Tuesday of his intention to continue the present term system for a five-year period, beginning with the summer term of 1977 and extending to the fall of 1982.

He said such a calendar would include the following basic elements:

— A term system, as at present.

— The academic year opening with fall term registration and orientation prior to Labor Day, with the first day of classes the day after Labor Day.

— The fall term completed prior to Thanksgiving, with the winter term providing, as nearly as possible, three weeks of instruction prior to the holiday break.

— The spring term ending about the middle of May with commencement in the last week of May; and

— A six-day period scheduled for final examinations after each term, in accordance with the President's interpretation of the Senate's recent action requiring final examinations in essentially all courses.

President Oswald told the Senate of his plans to publish the new five-year calendar containing the basic elements listed about April 1, 1976, and said that il the Senate had any different interpretation of their policy regarding linel examinations, that the Senate should inform him of this no later than the March Senate meeting.

He further asked the Senate to provide him with advice concerning the length of the summer term beginning with the summer of 1976 — specifically, should there be a ten-week term as at present or should the University move to an eight-week term. He indicated to the Senate that this was a matter of concern also to student and administrative officials and, therefore, asked the Senate to take steps to involve opinion from those sources in the process of providing advice on this matter, also before the March, 1976, meeting of the Senate.

In making the calendar decision, President Oswald said he took into consideretion the many differing views on the calendar decision, including two contradictory reports of a University Calendar Commission that had studied the matter for two years.

He said there seemed to be no consensus among the faculty on the semester-term issue, but students have overwhelmingly stated preference for the term system.

He added that there seems to be no conclusive evidence of over-all educational advantage to either system and thet a financial onelysis seemed to indicate little cost difference.

He further noted that there was consensus that the calendar should begin about Sept. 1 and finish by June. To schedule a term system within this time period, the winter term has to be split by the Christmas break. The President reported further consensus, however, that the longer the instruction period in the winter term before the break, the less the objection to the split.

Winter enrollment gains

Winter term enrollment at the University at the close of registration last week totalled 46,375, a gain of 2,048 over the 44,327 registered at the close of format registration a year ago. Figures for the Hershey Medical Center and Capitol Campus are not available and therefore not included

The total at University Park for the current term is 29,694, a gain of 315, while at the Commonwealth Campuses the total is 15,021, a gain of 1,660. The enrollment at Behrend College is 1,458 and at King of Prussia Graduate Center, 202.

The preliminary figures indicate 35,595 baccalaureate degree students; 3,545 associate degree students; 4,689 graduate students; and 2,546 adjunct students.

Tenure, promotion group appointed

Five members of the faculty and administration have been appointed by President Oswald to the University Promotion and Tenure Review Committee, to which the University Faculty Senate has already elected six members.

Representing the Evan Pugh Professors is Dr. Richard R. Nelson (plant pathology). M. Ellis Grove, associate professor of general education in the arts, will represent the winners of the Lindback teaching awards.

As the senior academic administrators on the committee, Dr. Oswald chose Dr. James B. Bartoo, dean of the Graduate School, Dr. Richard G. Cunningham, vice president for research and graduate studies, and Or. Robert E Dunham, vice president for undergraduate studies.

Elected by the Senate to two-year terms are Dr. Ernest L. Bergman, professor of plant nutrition, Dr. Merjorie East, professor and head of home economics education, and Dr. Roger B. Saylor, professor of economics and statistics (Capitol). Dr. Paul Axt, professor of mathematics, Dr. Vladimir deLissovoy, professor of child development and family relationships, and Arthur J. Mans-cano, assistant professor of engineering (Schuylkill) will serve one-year terms.

According to the guidelines for the implementation of the University Promotion and Tenure Policy, the committee is responsible for reviewing recommendations for academic tenure and for promotions to positions of associate professor and professor. It will receive these recom-

(Continued on page four)

New plan devised to allot dorm rooms

A new procedure for assigning students to University Park residence halls, giving all categories of student applicants equal opportunity for the spaces available, has been announced, the plan to be effective next fall.

Ralph E. Ziliy, vice-president for business, end Or. Raymond O. Murphy, vice-president for student affairs, also outlined a plan to increase residence hall capacity by 1,000 spaces, the increase to be accomplished by converting certain residence hall areas into student living facilities and by assigning three students to the larger double rooms and two students to the

(Continued on page four)

PENN STATE COLLECTION

Faculty notes

Dr. G. P. Patil, professor of mathematical statistics, will receive the Doctor of Science degree from the Indian Statistical Institute (ISI) in Calcutta, India, Dec. 30. The degree, which has no American equivalent, is awarded only to mature scholars who have made outstanding contributions to their fields. Evaluation is conducted by a distinguished international panel of statisticians nominated by the Institute, which collers instruction exclusively in statistics and statistics-related fields. Dr. Patil is the first scholar to receive the Doctor of Science degree from ISI, which was founded in 1931. He received the associate degree from the Institute in 1957, the M.Sc. degree from the University of Poona in 1955, and the M.S. and Ph.D. degrees in 1959 from the University of Michigan. The author of over 75 major research publications, he is also the author or editor of two books and three three-volume series on statistical topics. A specialist in statistical distribution theory and ecological statistics, he is chairman and founder of the International Statistical Ecology Program, an international organization devoted to furthering the application of statistics to ecological problems. He is also a fellow of the American Statistical Association, the American Association for the Advancement of Science, and the Institute of Mathematical Statistics. He is an elected member of the International Statistical Institute.

Dr. John L. Lumley, Evan Pugh Professor of Aerospace Engineering, spoke on "Drag Reduction in Turbulent Flow of Dilute Polymer Solutions" to the Applied Mechanics Colloquium at Harvard University last week.

"World Authors 1950-1970," edited by John Wakemen and Stanley Kunitz, includes an article on **Paul West,** professor of English. Published by Wilson Co., New York, the book is the companion volume to "Twentieth Century Authors." Winner of the "Paris Review's" Aga Khen Prize for Fiction last year, Mr. West has a new work, "The Universe and Other Fictions," part of which appears in the just published "The New Directions International Anthology of Prose and Poetry." In September, at the invitation of NASA, he attended the lift-off of Viking II to Mars from the Kennedy Space Center and is now working on a book about the event.

Dr. Daniel Y. C. Fung, assistant professor of microbiology, was invited to present a paper on miniaturized microbiology techniques at the Second International Symposium on Rapid Methods and Automation in Microbiology to be held at Cambridge University, England, Sept. 19-25, 1976. Dr. Fung was also a keynote speaker at the first symposium held in Stockholm in 1973, as well as at a similar symposium in Kiel, Germany, in 1974. He is the author of numerous papers dealing with this topic and wrote a chepter in the book, "New Approaches in the Identification of Microorganisms," published by John Wiley and Sons last year.

Dr. Philip S. Klein, professor emeritus of American history, received one of 48 Certificates of Commendation voted by the American Association for State and Local History to recognize state and local history projects, agencies and individuals showing superior achievement and quality. Dr. Klein was cited, along with Dr. Arl Hoogenboom, a former member of the history department, for their book, "The History of Pennsylvania."

Three assistant professors from the Department of Religious Studies presented papers at the annual meeting of the American Academy of Religion in Chicago. They were: **Dr. Robert L. Cohn** on "The Sacred Mountain in Biblical and Early Jewish Literature," **Dr. Denise Carmody** on "The Home Taam" (theology and religious studies), and **Dr. John Carmody** on "Lonergan's Trinitarian Insight" (philosophical theology). In addition, a doctoral candidate in the department, Susan Sette, spoke on "Danial of the Woman, Affirmation of the Feminine: The Mother-Father God of Mary Baker Eddy."

Dr. Henry R. Allcock, professor of chemistry, presented a lecture at the University of Wisconsin last week. His topic wes "Phosphazene High Polymers."

Not a bet or a balloon but a crowded schedule of lectures, colloquia and conferences will soon draw **Dr. Edward G. Coffmen,** professor of computer science, around the world in just under 80 days.

Beginning this month, Dr. Coffman will present colloquia focusing on his current research in deterministic sequencing and eltocation theory at the University of California, Santa Berbara, the University of Southern California, the University of California, Los Angeles, and the IBM Research Center, San Jose.

The University of Hawaii will be his next stop on Jan. 6-8 where he will present a paper and organize a session at the annual international Hawaiian Conference on System Sciences. The Universities of Kyoto and Dsake in Japan will host Dr. Coffman on Jan. 12-13 for another series of colloquie and lectures. January 15-16 will find Dr. Coffman in Sibaria at the Computer Science institute et Novosibirsk, U.S.S.R. he will present a series of lectures at the Technion (The Israel Instituta of Technology) in Haifa, Jen. 19-23. The Computer and Automation Institute of the Hungarian Academy of Sciences, Budapest, will have him as en invited lecturer at their winter school, Jan. 26-29. A colloquium at the Mathematisch Centrum, Amsterdem, The Netherlands, will follow on Jan. 30, and on Feb. 4, Dr. Coffman will return to the U.S. to presant e paper at the Scheduling Theory Conference of the Operations Research Society of America in Orlando, Florida.

In addition to discussing his current research, Dr. Coffman will also present topics from his new book, "Computer and Job-Shop Scheduling Theory," which was published last month by John Wiley and Sons. He is editor and co-author of the book with two other Penn State faculty members, Dr. John L. Bruno, associate professor of computer science, and Dr. Ravi Sethi, assistant professor of computer science.

Dr. Coffman's world tour is being supported by the host institutions and by the National Science Foundation.

Dr. Randall S. Stout, professor of economics, presented a paper at a panel session of the Annual Conference of the National Tax Associaltton in Houston last month. The paper, "Ethics in Public Finance: The Excess Burden on Resources and Pertormance," analyzed New York State Authority financing.

Dr. Roger M. Hermen, professor of physics, has been appointed to a post on the National Science Foundation (NSF) Pre-College Curriculum Review Panel. The panel provides advice and evaluation to NSF on its programs at the pre-college level. Dr. Herman will focus on assessing the technical accuracy of program content. A member of the faculty since 1964, Dr. Harman is also a member of the American Physical Society Education Committee.

Dr. James F. Repella, associate professor of nursing, has been named acting head of the Department of Nursing. A member of the faculty since 1974, he took his initial nurse training at Philadelphia's Pennsylvania Hospital, School of Nursing for Men, in 1954, and earned a B.S. in education from Temple University in 1960. He was granted an M.S in nursing from tha University of Pennsylvania in 1965 and in 1971 received a Ph.D. in higher education administration from the University of Pittsburgh.

Dr. Repella's nursing and supervisory experience was gained with the U.S. Army, the Institute of the Pannsylvenia Hospital, the Philadelphia State Hospital and Warnersville State Hospital. Prior to joining Penn Stata, he was assistant administrator in cherge of the Department of Nursing at the South Side Hospital, Pittsburgh. He succeeds Dr. Lauria M. Gunter who has returned to full-time taaching and scholarly activities.

Dr. Terence M. Joys, associate professor of microbiology, presented an invited talk on "Specificity of antifagellar antibodias" to the Department of Microbiology at Texas Tech School of Medicine in Lubbock, Texas.

Dorothy V. Harris, professor of physical education, has been appointed to the Board of Overseers of Harvard College. She is serving as a member of the Athletic Committee chaired by Dr. Francis Keppel, former U.S. Commissioner of Education. At the board's November meeting, plans were discussed concerning fund raising and construction of an $18 million athletic complex for Harvard. Only two other women are serving on the Athletic Committee: Tenely E. Albright, a physician and former Olympic gold medalist in figure skating, and Alice E. Emerson, president of Wheaton College.

Dr. John C. Snowdon, professor of engineering research at the Applied Research Laboratory, has been nominated to stand for election as president-elect of the Acoustical Society of Amarica. Dr. Snowdon, who has served for the past nine years as an associate editor of the "Journal of the Acoustical Society of America," recently completed a three-year term on the group's six-member executive council. He is the author of a graduate level textbook and numerous research publications on the reduction of structural vibration.

Dr. Henry D. Gerhold, professor of forest genetics, was one of the organizers of a symposium on "Bettar Traes for Metropolitan Landscapes" held at the U.S. National Arboretum last month in Washington, D.C. More than 200 participants from 23 states and abroad attended. Dr. Gerhold also delivarad a talk, "Selection Practices of Municipal Arborists." Other Penn State speakers were **Dr. Donald D. Devis,** assistant professor of plant pathology, on "Selection of Trees for Tolerance of Air Pollutants"; **Dr. Gerhard Reethof,** director of the Noise Control Laboratory, on "Trees and Forests for Noise Abatement and Visual Screening"; and **Kim C. Steiner,** assistant professor of forest resurcas, on "Tasting and Evaluating New Traas for Metropolitan Landscapes."

Dr. Paul B. Baltes, director of the Division of individual and Family Studies, has received the 1975 R. B. Cattell Award of the Society for Multivariate Experimental Psychology. The award is given for distinguished contributions to behavioral research and theory conducted within the framework of multivariate design. A member of the faculty since 1972, Dr. Baltes' research interests are in life-span human development, aging and davalopment methodology.

Dr. Marshall H. Kaplan, associate professor of aerospace engineering, conducted a one-week short course Nov. 24-28 on "Modern Spacecraft Dynamics and Control" at the Europaan Space Research and Technology Center, Noordwijk, Holland.

Appointments

Frederick J. Van Antwerp has been appointed assistant librarian in the Reference Department of the University Libraries. He holds the master of library science degree from Western Michigan University and is a graduate of Grand Valley State College, Allendale, Mich. He has served in various departments of the library at Western Michigan University.

Richard H. Fulmer, a supervisor with the counseling department at the State Correctional Institution at Graterford, has been named an assistant professor of criminal justice at the Berks Campus. A graduate of Bloomsburg State College, he received a master's degree in social work at the University of Pennsylvania. He has been teaching part-time in the law enforcement program at Berks since 1974.

Two faculty members have been promotad from the rank of instructor to assistant professor effective Nov. 1. **Dr. Ernest H. Braua Jr.** assumed that rank in chemistry at Penn State originally appointed to tha faculty Sept. 1, 1974. He holds a B.S. from Valparaiso University and a Ph.D. in physical-organic chamistry from tha University of Virginia. His research interests hava centered around investigations of homogeneous reactions in organic fused salts. **Dr. Arnold F. Shapiro,** who is now teaching business administration at University Park, came to the campus in 1973. He has a B.S. from the University of Manitoba, and his M.A and Ph.D. were conferred by the University of Pennsylvania. He is specializing in actuarial science.

Retirement

Evelyn C. Marboe took early retirement Nov. 1 as associate professor of mineral sciences after 33 years on the faculty. Mrs. Merboe earnad her B.S. at Wayne State University in 1941 and then came to Penn State to work on a master's degree in chemistry, which she received in 1943. In 1944, she became a research associate in the School of Mineral Industries. Her research interests have included chemistry and solid state science, with emphasis on the structure, properties and surface reactions of solids and the high-temperature behavior of oxides and glasses. Mrs. Merboe holds two patents, one of them with the late Dr. W. A. Weyl, who was en Evan Pugh Rasaarch Professor of Physical Sciences. With Dr. Weyl, sha wrote a three-voluma work, "The Constitution of Glasses: A Dynamic Interpretation," and she has authored or co-authored some 40 scientific papers.

Long active in community affairs, she received the 1971 Benajmin Rush Award of the Centre County Medical Society, which honors a non-medical individual's contributions to health and welfara in the county. Currently, she is president of the Family Planning Council of Central Pennsylvania, Inc., which she helpad found, and chairman of the public health services committee of the Pennsylvania Association for Retarded Citizens, Inc.

Obituaries

A memorial servica for Dr. Dorothy Houghton, dean emerita of the College of Human Davelopment who diad Dec. 1 in Tarrytown, N.Y., will ba held Friday, Dec. 12, at 2 p.m. in the Helen Eaklin Eisenhowar Chapel. Dr. Luthar Harshbarger, professor of humanities and religion, will participate in the service, which has been arranged by the Collega and friends of Dr. Houghton.

Dr. Houghton came to Penn State in 1952 as assistant dean for resident instruction, became associate dean in 1960 and for the test year befora her retirement in 1966 was acting dean. Born March 31, 1901, in Elizabeth, N.J., she received her B.A. in chemistry and geology from Barnard Collega and her M.S. and Ph.D. from Columbia University. She taught chemistry as an instructor at the Packer Collegiate Institute and as a professor at Columbia's Teachers Collega. During her first nine years at Penn State, Dr. Houghton was head of the Division of Home-Community Relationships and chairman of the option in General Family Studies. She was a member of the University Senate for many years.

Dr. George McClelland Lott, e psychiatrist with the Ritenour Health Service from 1947 to 1962, died Nov. 29 at the age of 78. During his tenure at Ritenour, the mental hygiene clinic was developed and facilities for handling psychological problems of students were expanded. Dr. Lott was also a member of the Department of Psychology. A graduata of the University of Michigan, he received his MD degrea from the University of Colorado. Prior to his appointment at the University, he was director of the mental hygiene division of the Suffolk County, N.Y., Department of Health. He had done research on the training of exceptional children and was the author of a book, "The Story of Human Emotions."

Col. Donald G. White diad Nov. 30 in State Collega at the age of 77. An officer in the Army Corps of Engineers from 1920 until his retirament in 1948, he was assignad to duty with the Reserve Officers' Training Corps at the University from 1950 to 1932. A graduata of the U.S. Military Academy at West Point, he also racelved a civil engineering degree from Rensselaer Polytechnic Institute.

University Park Calendar

December 11 - 20

Items to be included in this calender should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, Dec. 11

International Crafts Workshop, 11 a.m., HUB main lounge.

Commons Videotape, 12 noon, Kern lobby.

International folk dancing performance, 12 noon, Kern lobby.

Christmas Tea, sponsored by the Community Hospitality Council, 2-4:30 p.m., Room 111 Kern.

Art Constantino on "Social Games at Penn State," 7:30 p.m., Thompson lounge. Sponsored by West Halls Residential Life Staff.

Panel discussion, "Implications of Triage on World Hunger," 7:30 p.m., Room 101 Kern.

"Europe '75," slide show prepared by students in Architecture Study Abroad Program, 8 p.m., HUB main lounge.

Dr. Jack Wasserman, Tyler School of Art, on "The Monster Leonardo Painted for His Father," 8 p.m., HUB assembly room.

Friday, Dec. 12

International Crafts Demonstration, 11 e.m., HUB main lounge.

Noontime Concert of traditional American Christmas music, 12.15 p.m., Kern lobby.

Memorial service for Dr. Dorothy Houghton, dean emerita of the College of Human Development, 2 p.m., Eisenhower Chapel.

Free U Sock Hop, 7 p.m., HUB ballroom.

International Coffeehouse and fashion show, 8 p.m., Room 102 Kern.

Saturday, Dec. 13

Madrigal Dinner and Concert, 6:30 p.m., Room 102 Kern.

International dance party, 7:30 p.m., 4th floor, multi-purpose room, HUB.

Hillel Foundation film, "Exodus," 7:30 and 9:30 p.m., HUB assembly room

Yuletide music: Christmas in the Colonies, Penn State Glee Club and Penn State Brass Chorale, 8:30 p.m., Schwab.

Sunday, Dec. 14

Chapel Service, 11 a.m., Music Bldg. recital hall, "The Christmas Story: An Early American Setting," All Faith Chapel Choir, Tommie Irwin, director.

Black Christian Fellowship worship service, 11 a.m., Cultural Center, Walnut Bldg.

International Children's Christmas party, 2 p.m., Cultural Center, Walnut Bldg. Sponsored by Community Awareness.

Graduate Women in Science lecture, 2 p.m., Room 112 Kern.

Yuletide music: Christmas in the Colonies, Penn State Glee Club and Penn State Brass Chorale, 3:30 p.m., Schwab.

Madrigal Dinner and Concert, 6:30 p.m., Room 102 Kern.

International Dance, 7 p.m., HUB ballroom.

Hillel Foundation film, "Exodus," 7:30 and 9:30 p.m., HUB assembly room.

Monday, Dec. 15

Color Slide Club Christmas party, 7:30 p.m., Room 112 Kern.

Laura Sardines, violin, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Dec. 16

Two Cultures Dialogue, noon, Room 189 Materials Research Lab. Visiting professor Norman A. Graebner on "Historical View of the Two Cultures Gap."

Artists Series Film Festival, "Le Streda," 7 and 9 p.m., Schwab.

Sports: Men's basketball, vs. Kent State, 8 p.m., Rec Hall.

Wednesday, Dec. 17

"Noondays" in Advent, the story of the birth of Jesus as recorded in "The Gospel according to Matthew," 12 noon, large chapel, Eisenhower Chapel.

African Studies Forum, Dr. Beverly Lindsay, education, on "Role of Women in Modern African Society," 7:30 p.m., Cultural Center, Walnut Bldg.

Composers' Concert, 8:30 p.m., Music Bldg. recital hall.

Thursday, Dec. 18

Commons Videotape, 12 noon, Kern lobby.

Seminars

Thursday, Dec. 11

Ceramic Science, 11 a.m., Room 301 Mineral Industries. Professor Sid Butler, Materials Research Center, on "Studies of Impurity Incorporation and Charge Trapping in SiO_2 Thin Films."

Chemistry, 12:45 p.m., Room 333 Whitmore. Dennis C. Johnson, Iowa State University, on "Applications of Electronenalysis to Liquid Chromatography."

Anthropology, 3:30 p.m., Room 112 Kern. Dr. Lionel Tiger, Rutgers University, on "Social Bonds and Utopia: Three Generations of Kibbutz Life."

Microbiology and Cell Biology, 3:55 p.m., Room 32 Frear. A. L. Phillips on "Structural Studies and Biosynthesis of Keto Acid Coenzymes."

Philosophy, 4 p.m., Room 303 Willard. Thomas Seebohm and Joseph Flay will discuss "G. W. F. Hegel" by Stanley Rosen.

Statistics, 4 p.m., Room 75 Willard. David Moore, Purdue University, on "Comments on the Use of Abuse of Chi-squares Tests of Fit from the Viewpoint of Statistical Theory."

Computation Center, 7:30 p.m., Room 108 Forum. "RJE (4)."

Joint Chemistry and Physics Colloquim, 3:50 p.m., Room 117 Dsmond. Professor John McTague, physics, Brookhaven National Lab., on "Neutron Scattering of Structure and Dynemics of Adsorbed Layers."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Yaacov Mamane, graduate student, on "Aerosol Measurements of Tuscon, Arizona — Aircraft Lidar Comparisons."

Monday, Dec. 15

Genetics, 3:55 p.m., Room 111 Tyson. Mike Capage on "Fusion of Isolated Plant Protoplests."

Biochemistry and Biophysics, 4 p.m., Room 101 Althouse. James A. Lake, cell biology, New York University Medical Center, on "Ribosome Structure: Localization of Individual Proteins by Electron Microscopy of Antibody-Labelled Subunits."

Computation Center, 7:30 p.m., Room 108 Forum, "RJE (5)."

Tuesday, Dec. 16

Plant Pathology, 9.45 a.m., Room 213 Buckhout Dr. C. H. Kingsolver on "Epidemiology of Rust."

History, 1:45 p.m., Room 225 HUB. Dr. Kent Forster on "Finland, World War II and Microrevisionism."

Water Pollution Control, 2:20 p.m., Room 101 Chambers. "Planning for Waste Disposal Systems."

Physics, 3:50 p.m., Room 117 Osmond. William E. Baylis, University of Windsor, on "Franck-Condon Approach to Pressure Broadening of Spectral Lines."

Astronomy, 4 p.m., Room 445 Davey. Robert T. Zinn, Hale Observetories and California Institute of Technology, on "Cepheid Variables in Dwerf Spheroidal Galaxies."

Comp Lit luncheon, noon, Presidential Room, Hotel State College. Ben H. Bagdikian, journalist and media critic.

Thursday, Dec. 18

Chemistry, 12:45 p.m., Room 333 Whitmore. Robln M. Hochstrasser, University of Pennsylvania, on "Studies of Fast Chemical Processes with Picosecond Lasers."

Computation Center, 7:30 p.m., Room 108 Forum. "RJE (6)."

Exhibits

Museum of Art: Works on Paper from the Permanent Collection. Architectural and Ornamental Drawings: Juverra, the Bibiena Family, and Other Italian Draughtsmen. (The Museum is closed from Dec 22-Jan. 1.)

Zoller Gallery: Annual Art Student Show, through Dec. 13. Art Faculty Holiday Show and Sale, Dec. 14-19.

HUB Gallery: Norweglan Viking Art (Norwegian Information Service), through Dec. 19.

Kern Gallery: International Holiday Festival Exhibits, through Dec. 14

Chambers Gallery: Faculty-Teaching Art Exhibit, through Dec. 19

Cultural Center, Walnut Bldg.: Display of International Dolls, through Dec. 14.

Pattee Library: Main Lobby — Gem Cutting by Dr. Dean Smith. Lending Service Lobby — The Christmas Tree Exhibit, prints from the Rare Books Collection, through Jan. 7. East Corridor Lobby — Batik Paintings, Sharon Sell. Drawings and Photogrephs, Maureen and Gary Nell.

Films

Wednesday, Dec. 17

GSA Commonsplace Theatre, "White Heat," 7:30 and 9:30 p.m., Room 112 Kern.

Wednesday and Thursday, Dec. 17-18

"Casebtanca," 7.30 and 9.30 p.m, Findlay Rec Room.

Lecture

Monday, Dec. 15

Ben H. Bagdikian, journalist and media critic, on "Press and Society after Watergate," 8 p.m., HUB ballroom. Sponsored by the School of Journalism, Institute for the Arts and Humanistic Studies.

Meetings

Thursday, Dec. 11

College of Business Administration faculty, 1:30 p.m., Room 201 Business Adm.

Tuesday, Dec. 16

College of Liberal Arts faculty, 3:45 p.m., Room 121 Sparks.

University Schedule

Monday, Dec. 15

Late registration deadline.

Add deadline.

Saturday, Dec. 20

Christmas-New Year's recess begins 12.25 p.m.

News briefs

(Continued from page one)

Glee Club offers Christmas music

The annual family concert of Yuletide music by the Penn State Glee Club and Penn State Brass Chorale will this year feature "Christmas in the Colonies" at 8:30 p.m. Saturday, Dec. 13, and 3:30 p.m. Sunday, Dec. 14, in Schwab Auditorium.

The opening portion of the program will consist of music from the time of the Revolution, native Christmas songs written in the nation's early years by American composers including Billings, Belcher and Flagg.

Newly resurrected and largely unfamiliar to audiences, the songs have listening appeal beyond their historical significance, according to Bruce Trinkley, assistent professor of music and Glee Club director. James Benshoof, also an assistant professor of music, conducts the Brass Chorale.

Did English carols sung in the American colonies during holiday celebretions will be performed in the finel helf of the concert. Now part of America's Christmes tradition, these include "God Rest Ye Merry, Gentlemen," "The Coventry Carol," "Good King Wencesles" and "The First Noel." Also planned is a special performance of "The Wesseil Song" by the Hi-Lo's, 12 selected Glee Club membars.

Overtlow audiences in the Music Bldg. recitel hell ceused the annual concert to be moved this year to Schweb. Although the two concerts will feature the same program, Sunday's concert is planned for the convenience of family ettendance. No tickets are required for admission.

Leonardo subject of talk

Dr. Jack Wasserman, dean of the Tyler School of Art at Temple University, will present a public lecture at 8 p m. Thursday, Dec. 11, in the HUB euditorlum. Sponsored by the Department of Art History, Dr. Wasserman will speak on "The Monster Leonardo Painted for his Father." Former department chairman and professor of art history at the University of Wisconsin, he holds bachelor's, master's, and doctoral degrees from New York University and taught previously at the University of Connecticut. Dr. Wesserman has written many articles, most recently reviewing Pedretti, and is the author of "Ottaviano Mescarino."

New music concert

A concert of new music by graduate and undergreduate student composers in the Department of Music will be presented et 8:30 p.m. Wednesday, Dec. 17, in the Music Bldg. recital hall at the University. Among the lerge veriety of musical forms to be heard at the concert will be pieces for chamber orchestra, to be performed by Musica da Camera, and string quertets and piano pieces.

Golf shop open

The Golf Shop will be open for Christmes sales Dec. 17-24 from 11:30 e.m. to 1:30 p.m., except on Sunday.

Racquetball registration

Entries will be teken for Racquetball Singles in the new Intramural Bldg. from Monday, Dec. 15, until 4:30 p.m. Thursdey, Dec. 18. Mele steff and faculty may play in the Greduete Division of Intramurals for this tournament. Play will begin Jan. 5.

Women's role

(Continued from page one)

grant. Among her other interests are contemporery educational philosophies and policies, the higher educational structure in Kenya, Zambia and Tanzania and black-American higher educational policies. She hes a D.Ed. from the University of Massachusetts.

The African Studies Forum is designed to bring together students, faculty and townspeople who are interested in developments on the Africen continent. Two discussion sessions are held each term, featuring speakers who have done research in Africa. It is hoped that the Forum will result in greater interaction between interested persons at the University and in the local community, according to Dr. Cyril E. Griffith, director of the Black Studies Program.

Dr. Griffith would like individuals who have conducted research in Africe and may be available as speakers for future Forum programs to contect his office, Room 117 Old Main.

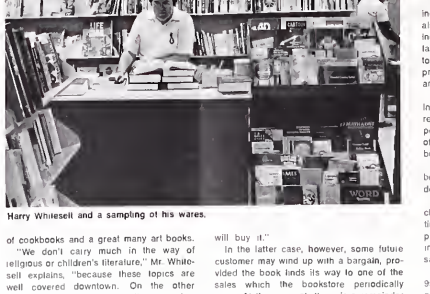
PSU Bookstore's tradebook department tops in town



Among book salesmen, State College has always had a reputation as a "non-book town," and the casually record among local book shops gives point to the claim.

But discouraged browsers, bargain hunters and those in search of hard-to-find volumes or just plain gifts may be neglecting the store which now sports the best tradebook collection in town. It's the Penn State Bookstore in the basement of McAllister Bldg.

The trade division got started about two-and-a-half years ago, partly out of idealism (to expose students to non-required books) and partly for commercial reasons (the mark-up on textbooks is only 20 percent; on tradebooks, it can go up to 40 percent). No matter. Despite a fluorescent light-metal shelves ambiance and lack of space — half of the store is devoted to textbooks — there is a surprising variety of materials.

According to tradebook specialist Harry Whitesell (whom many will remember as the owner of the now defunct Pennsylvania Book Shop), the biggest problem is getting word out of the store's existence. "I've even had people phone and ask if it was alright to come in because they weren't students," he says.

Among the categories in which the store is well stocked are science (the biggest selection in town), sociology, political science, hardcover and paperback fiction, biography, history, film and photography. There are six shelves of crafts books, eight

Harry Whitesell and a sampling of his wares.

of cookbooks and a great many art books.

"We don't carry much in the way of religious or children's literature," Mr. Whitesell explains, "because these topics are well covered downtown. On the other hand, we have been expanding our photography and film sections a great deal recently, particularly the big picture books.

"Some of these books, along with the more expensive ones in the field of art history, create problems. If you put a $50 book behind glass, no one can look at it, but if you leave it out to be examined, the covers may get torn and then no one will buy it."

In the latter case, however, some future customer may wind up with a bargain, provided the book finds its way to one of the sales which the bookstore periodically runs. At the moment, there is a remainder sale in progress, timed for the Christmas trade and including a number of gift books, the so-called "coffee table" items.

Remainder sales have become so popular with booksellers that even here prices are beginning to rise because of the competition in bidding for rights to books. "But there are still some very good buys available when publishers unload their unsold books," Mr. Whitesell says. "Often you can pick up a valuable book for half its original cost.

"In our remainder sales, we frequently include reprints of expensive books, which also sell for a fraction of the original printing. These volumes, which are usually large in size, cover every topic from trains to movies to cookbooks. They're often printed in Europe using cheaper bindings and paper, but they're still a good value."

Sometimes the bookstore runs a sliding scale sale as it did last summer to reduce its own inventory. Buyers got 10 percent off their first purchase, 20 percent off for two books and so on up to five books and a 50 percent discount.

The bookstore will also "special order" books which it does not have on hand, a delivery time is usually about three weeks.

"I try to be very general in my purchasing," Mr. Whitesell says, "but every time a salesman comes in, it's a little like playing Russian roulette. If publishers were infallible, there wouldn't be any remainder sales."

At the moment, students represent about 95 percent of the store's business, and non-students are advised that the beginning of each term with its attendant textbook rush is not a very good time for leisurely browsing.

After that, visitors to McAllister will see the tradebook department on their left as they enter, and the store is open Monday through Fridays, except for official University holidays, from 8:30 a.m. to 5 p.m.

Staff vacancies

Staff vacancies contained in this publication are those which generally require at least a baccalaureate degree or equivalent as a minimum educational qualification. Staff vacancies requiring less than a baccalaureate and those announced in INTERCOM may be found in the PENN STATE REPORTER.

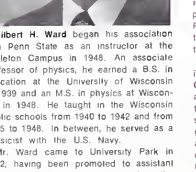
This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (Network Line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m. Thursday, Dec. 18, 1975. **Do not contact the area that has the vacancy.**

ADMINISTRATIVE ASSISTANT, COLLEGE OF EARTH AND MINERAL SCIENCES — University Park

Responsible to Assistant Dean for Research for efficient office management, including handling administrative matters, preparation and review of research proposals, supervision of clerical support and acting for Director on designated matters. Bachelor's degree or equivalent in finance, business administration or a related business field plus one to two years directly related experience. University contract and accounting experience desired.

MANAGER, AMBULATORY SERVICES — Hershey Medical Center

Responsible to Assistant Hospital Director for the administration and coordination of the Outpatient Department, the Emergency Care Unit and the Ambulant Care Unit. Bachelor's degree or equivalent, plus three to four years directly related experience.



Funding opportunities

(207-2) The Office of Education has announced a Jan. 13 closing date for **Regional Education Programs for Handicapped Persons** (CFDA 13.569) and a Jan. 15 closing date for **Specific Learning Disabilities Program** (CFDA 13.529) (Ref. 40FR54600-01, 12/16/75).

(207-3) NSF has issued "final guidelines" for its **CAUSE Program (Comprehensive Assistance to Undergraduate Science Education)** (Oct. 2 INTERCOM #159-2). Primary objectives are to: strengthen the undergraduate science education components of two- and four-year colleges and universities; improve quality of undergraduate science instruction; and increase institutional capability for self-assessment, management and evaluation of science programs. During FY1976, only one proposal may be submitted by an institution, but each institution may also participate in one additional proposal as a member of a consortium. (Up to three years of support may be requested.) The proposal closing date for this competition is Feb. 16, and an "intent-to-submit card" is requested as soon as possible. (Ref. ETA-47)

(207-4) The Office of Education has proposed criteria for the awarding of grants and contracts for its **Consumer Education Program**. Grant priorities include: model community-school projects, short term pre-service and in-service training for teachers and others, and development of programs, curricula, or materials to provide education to people with special needs. Contract priorities include, distribution of material and establishment of reserve centers. Grant and contract proposal deadlines will be announced. Application forms and procedure will be the same as for the OE Metric Education program (INTERCOM 200-3, 10/30/75). (Ref. 40FR54605-11, 11/26/75) (CFDA 13.564).

Two receive 25-year awards

Raymond V. Ulinski, instructor in physical education and athletic trainer, received his baccalaureate degree in physical education from Penn State in 1950 and started work at once as a swimming instructor and freshman football trainer. His education had been interrupted by World War II, during which he served four years in the military police platoon of the 69th division in Germany.

Mr. Ulinski played football and baseball for the Lions in the mid-forties. When the late Bob Higgins was holding down the fort as head football coach at Penn State, Mr. Ulinski played under him as a single wing blocking back for the 1947 Cotton Bowl team which tied Southern Methodist 13-13. He had a brief try-out with the Pittsburgh Steelers and has two brothers, Harry and Ed, who are retired NFL players.

A certified member of the National and Eastern Athletic Trainer's Association, Mr. Ulinski is presently serving as full-time trainer for soccer, indoor track and lacrosse teams at Penn State.

Gilbert H. Ward began his association with Penn State as an instructor at the Hazleton Campus in 1948. An associate professor of physics, he earned a B.S. in education at the University of Wisconsin in 1939 and an M.S. in physics at Wisconsin in 1948. He taught in the Wisconsin public schools from 1940 to 1942 and from 1945 to 1948. In between, he served as a physicist with the U.S. Navy.

Mr. Ward came to University Park in 1962, having been promoted to assistant professor at Hazleton in 1951 and to the rank of associate in 1957. He was awarded a National Science Foundation Faculty Fellowship in 1959-60 and studied and taught at Cornell University's Physics Department. Since 1962, he has served as Physics Department coordinator for Commonwealth Campuses. His principal interest has been the teaching of lower-level physics courses and the design of instructional equipment. In recent years, he has concentrated on the study of musical acoustics, including a computer research project on the mechanics of the bowed string.

'After Watergate' is Bagdikian's topic

Ben H Bagdikian, journalist and media critic, will present a public lecture on "Press and Society after Watergate" at 8 p.m. Monday, Dec. 15, in the HUB ballroom. His visit is sponsored by the School of Journalism and the Institute for the Arts and Humanistic Studies.

Mr. Bagdikian has been an assistant managing editor for national news and ombudsman for the "Washington Post," national correspondent for the "Columbia Journalism Review" and in 1973 was M. Lyle Spencer Visiting Professor at Syracuse University. He was Nelson Poynter Fellow at Yale in 1972 and Duke University Fellow in Communications last year.

In 1971 while with the "Washington Post," he obtained copies of the Pentagon Papers, which the newspaper printed despite a federal court having enjoined their publication. He is the author of several books, including "The Shame of Prisons," "In the Midst of Plenty: The Poor in America," "The Information Machines: Their Impact on Men and the Media" and "The Effete Conspiracy and Other Crimes by the Press."

Mr. Bagdikian serves as president of the Mellett Fund for a Free and Responsible Press and as a trustee of Clark, his alma mater.

Dorm space plan

(Continued from page one)

larger single rooms.

The new assignment system was developed after a detailed study by University officials and student groups, the study prompted by shortage problems that arose last fall when more than 15,000 students applied for the 11,500 spaces available, and priority under the system then in effect went to residence hall occupants at University Park, leaving little opportunity to transfer and other students.

After deducting spaces reserved for freshmen, who are required to live in residence halls, and other designated groups such as sororities with suites in the residence halls, the rooms will be assigned in accordance with the percentage of applicants in each of four major groups. Priority within each group will be determined by the sequence of the filing of the application.

The groups are students currently living in the University Park residence halls, Commonwealth Campus, Behrend College and Capitol Campus students transferring to University Park; students on practicums; student teaching or foreign studies programs; and transfers from other colleges and universities, students readmitted, students residing off campus, and students returning from leaves of absence.

For the fall term, contract forms will be made available on Feb. 24 to each student living in University Park residence halls and also on or about Feb. 20 in other students who desire the forms.

Beginning on Mar. 11, contract forms with a $45 advance payment may be filed at the Bursar's Office and designated residence hall areas at University Park, and at designated areas on other Campuses.

The time of filing will be recorded on the contract form to determine the priority of assignment within each of the four categories. Thus, students within each stratified group will have equal opportunities for assignment.

If all spaces are assigned by Mar. 26, the University will process no more contracts; if it is explained, or if space remains, contracts processed will be classified into one group with priority in the sequence of the application filing.

Tenure group

(Continued from page one)

mendations after they have been reviewed at the department and Campus levels, as well as at the College and University Libraries levels. The Provost will transmit the necessary documents to the committee by Mar. 15, and the committee's recommendations will be made through the Provost to the President by May 15.

PENN STATE intercom

Volume 5, Number 14 December 18, 1975

An internal communications medium for the ecademic community of The Pennsylvania State University published weekly during the four terms of the claes schedule

'Pennsylvania '76' gift cards available

A gift card, containing the name of the giver, will be sent by the University Press to all intended recipients of "Pennsylvania 1776," Penn State's official Bicentennial book. The book is in press for availability at 215 Wagner on Dec. 19 — early enough for campus pick-up or delivery but not for Christmas mailing.

The gift card contains a drawing of an early Pennsylvania Christmas, including the first known American depiction of a decorated yuletide tree, by the folk artist Lewis Miller of York County. The card informs the addressee that a gift copy of "Pennsylvania 1776" is on the way.

Persons ordering the Bicentennial book between now and Dec. 19 may ask the University Press to send gift cards, and so may persons who already have placed orders. The book is being offered at a special price of $10 to Penn State students, alumni, faculty and staff (plus 75c per copy for postage and handling if books are to be mailed).

Campus map for handicapped ready

A map of the University Park campus has been designed to aid the physically disabled.

Developed as part of the work being done by the President's Commission on the Physically Handicapped Student at the University, the map identifies buildings accessible with assistance, buildings accessible without assistance, public elevators, key-operated elevators and pathways equipped with ramps. The information is aimed at helping physically handicapped persons schedule classes and move about the University Park campus with greater ease.

According to Dr. Raymond O. Murphy, vice president for student affairs, the maps are being made available through various means to alt handicapped students al University Park.

The President's Commission was established earlier this year to give consideration to the physically handicapped student as he or she relates to the University and to develop a framework for the University, in turn, to relate to the student, according to Dr. Oswald.

John H Doolittle, associate professor of physical education, heads the nine-member group, which includes faculty, staff and students.

Honorary alumnus plaque displayed

The Penn State Room's current "frontispiece" displays the bronze plaque denoting honorary life membership in the Penn State Alumni Association, first awarded in 1973 to President Oswald and most recently to Heinze Warneke, sculptor of the Nittany Lion Shrine. The plaque was designed by John A. Cook, professor of art.

The Alumni Council established the honorary life membership to recognize persons who are not Penn State graduates but who have made "outstanding contributions toward the welfare of the University or have significantly enhanced its reputation and prestige."

Honorary members named in the fall of 1973 were Coach Joseph V. Paterno and Mrs. Marie Underhill Noll, who provided funds for the Human Performance Research Laboratory named in honor of her late husband, A. Robert Noll '29, in 1974. At Alumni Reunions last June, Dr. Milton S. Eisenhower, former president of the University, became the fourth honorary Penn Stater.

The one-case exhibit in the Penn State Room includes pictures of the sculptor at work on the Lion statue in 1942 and several taken during his Nov. 7-8 visit to the campus to receive the award.

Course ideas are invited for next year

Proposals for Course Improvement Projects to be conducted during 1976-77 are being invited by Dr. Robert E. Dunham, vice president for undergraduate studies.

The grants are made to academic departments to support the improvement of basic courses or groups of courses which serve significant numbers of students at several campus locations or meet some other critical University need.

Since the beginning of the Course Improvement Program five years ago, 32 projects have been funded, resulting in improvements to some 43 courses.

Proposals are due in the office of Leslie P. Greenhill, 211 Mitchell Bldg., by Friday, Jan 16. It is expected that grants will be approved in time for projects to begin in spring term, 1976. The completion date will be June 30, 1977.

Faculty members may obtain additional copies of guidelines for proposals from Mr. Greenhill's office or by calling 865-7674. Proposals are reviewed by an advisory committee, which aids in selecting the projects to be funded.

Food talk Jan. 7

Dr. Don C. Kimmel, director of the liaison office for North America of the United Nations' Food and Agriculture Organization, will deliver the second lecture in a series on the world food crisis Wednesday, Jan. 7, at 8 p.m. in Room 105 Forum Bldg.

His topic is "International Action to Feed the World."

Dr. Kimmel has spent 22 years with the FAO, beginning as an agricultural extension specialist in Liberia. He assumed his present post in 1974.

A native of Berlin, Pa., Dr. Kimmel earned his bachelor's degree in agricultural education and his master's and doc-

(Continued on page two)

Members to have 3 SSI options

On Oct. 7, 1975, Act 101 was signed into law by Governor Shapp. This legislation amended various provisions of the State Employes' Retirement Code, including the section applicable to membership in the Social Security Integration (SSI) supplement group. University employees who elected to participate in the SSI group have been notified directly by mail about their options under the new legislation.

The SSI coverage was established in 1968 as a supplement to the basic retirement provisions of the State Employes' Retirement System. Members who selected SSI had their full basic rate of contribution reduced to 5 percent (some had been contributing as high as 8 to 9 percent) and agreed to contribute an additional 5 percent on earnings which exceeded the social security taxable base in any given year.

This connection between contributions and the social security taxable base resulted in the term "social security integration," a very confusing misnomer since many members have related SSI coverage with federal social security coverage. SSI has nothing whatsoever to do with the federal social security program.

Act 101 has given SSI members the option of (1) continuing their present coverage, (2) freezing their coverage (contributions and benefits), or (3) withdrawing all contributions and cancelling all SSI benefits. Forms to freeze coverage or cancel coverage are available in the Employee Benefits Division, 113 Willard Building. Questions regarding the SSI options under Act 101 should be directed to either of the University's counselors, William F. Batcheler or R. Joseph Taby.

Moir named as contract negotiator

William D. Moir has been named contract negotiator and coordinator at the University. His appointment will be effective March 1, 1976.

He will succeed Ralph E. Montgomery, who plans to retire from the University staff after 33 years of service.

Mr. Moir has been assistant to the contract negotiator and coordinator since 1963. He joined the staff in 1956 as a research assistant in the Department of Engineering Research and from 1957 to 1963 was an accountant in the Office of the Controller.

He served with the U.S. Navy in the Submarine Service from 1948 to 1952.

Mr. Moir is a Penn State alumnus, having earned a B.S. in business management in 1957.

University Calendar, December 18—January 11

Special Events

Thursday, Dec. 18
Commons Videotape, 12 noon, Kern lobby.
Monday, Jan. 5
Free U reception for artist Mike Loren, 7:30 p.m., HUB reading room.
Wednesday, Jan. 7
"Noondays," devotional period, 12 noon, large chapel, Eisenhower Chapel.
Artists Series film festival, "Stagecoach," 8:30 p.m., University Auditorium.
Thursday, Jan. 8
Commons Videotape, 12 noon Kern lobby.
Friday, Jan. 9
Folk and Square Dance Roundup, 7:30 p.m., South gym, White.
Artists Series, Martin Best, lutenist and guitarist, "The Art of the Troubadour," 8:30 p.m., Schwab.
GSA Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Saturday, Jan. 10
Sports, Women's swimming, vs. Springfield, 2 p.m. Wrestling, vs. Bloomsburg State, 2 p.m. Men's and women's gymnestics, vs. Springfield, 8 p.m., Rec Hall.
Artists Series, Marcel Marceau, mime, 8:30 p.m., University Auditorium.
Black Caucus, "Dime Disco," 9 p.m., HUB ballroom.
Sunday, Jan. 11
Chapel Service, 11 a.m., Music Bldg. recital hall. The Right Rev. Henry W Murph, Bishop, AME, Washington, D.C.
Public reception, "Recent Sculptures by John Cook," 3-5 p.m., Museum of Art.
Teri Gemberling, piano, 3:30 p.m., Music Bldg. recital hall.

Seminars

Thursday, Dec. 18
Chemistry, 12:45 p.m., Room 333 Whitmore. Robin M. Hochstrasser, University of Pennsylvania, on "Studies of Fast Chemical Processes with Picosecond Lasers."
Computation Center, 7:30 p.m., Room 108 Forum. "RJE (6)."
Ceramic Science, 11 a.m., Room 301 Mineral Industries. Dr. Wieslaw Zdaniewski on "Catalyzed Crystallization of MgO-Al_2O_3-SiO_2 Glasses."
Monday, Jan. 5
Computation Center, 7:30 p.m., Room 105 Osmond "Mathematical Programming (1)."
Tuesday, Jan. 6
Plant Pathology, 9:45 a.m., Room 213 Buckhout. Richard Woodward on "Origins of Biotrophy."
Water Pollution Control, 2:20 p.m., Room 101 Chambers. "Soil Character and System Selection I."
Inorganic Chemistry, 8 p.m., Room 333 Whitmore, Paul Greigger on "Model Systems for Myoglobin and Hemoglobin."
Thursday, Jan. 8
Physics, 3:50 p.m., Room 117 Osmond Alistair B. Fraser, meteorology, on "The Mirage, the Green Flash and Theological Optics."
Meteorology, 4 p.m., Room 26 Mineral Sciences. Hans A. Panofsky, Evan Pugh Professor of Atmospheric Sciences, on "Wind Direction Fluctuations."
Computation Center, 7:30 p.m., 105 Osmond. "Mathematical Programming (2)."

Lecture

Wednesday, Jan. 7
World Food Crisis Lecture Series, Dr. Don C. Kimmel, The Food and Agriculture Organization of the United Nations, on "International Action to Feed the World," 8 p.m., Room 105 Forum. Sponsored by the Committee for International Programs and the College of Agriculture

University Schedule

Saturday, Dec. 20
Christmas-New Year's recess, begins 12:25 p.m.
Monday, Jan. 5
Classes resume, 8 a.m.
Tuesday-Thursday, Jan. 6-8
File for Pass/Fail.
Thursday, Jan. 8
Preregistration deadline.
Drop deadline.
Course repeat deadline.

Film

Wednesday, Jan. 7
GSA Commonsplace Theatre, "To Have and Have Not." 7:30 and 9:30 p.m., Room 112 Kern.

Games classes begin Jan. 8

Games and educational gymnastics classes for children of University faculty and staff will again be offered by the College of Health, Physical Education and Recreation, beginning Thursday, Jan. 8. Classes will meet Thursday afternoons from 4 to 5 p.m. in White Bldg. and continue through Feb. 19. Children from kindergarten through fourth grade may attend, and registration will be held before the first class.

Rec. Bldg. Xmas schedule

Recreation Bldg. will be closed on the official University holidays, Dec. 24, 25, 26 and 29 and again on Jan. 1. This schedule will also apply at the Intramural Bldg.

PENN STATE COLLECTION

Faculty notes

Dr. Carlos Zamore, assistant professor of Spanish, will chair a symposium on "Chicano Prose Fiction: The State of the Art" on Dec. 27 at the annual convention of the Modern Lenguege Association in San Francisco. Dr. Zomora, who joined the University faculty in 1973, has been active in Chicano affairs for a number of years, with a primary interest in education. He wes the first chairman of the first department of Chicano studies in the United States, established in 1970 at the University of Californie, Sante Barbara. In 1972 he was coordinator of a summer program for Chicano professors, funded by the Office of Education and held at the National Museum of Anthropology and History in Mexico City. He has organized a number of seminars and workshops on bilingual-education and served as chairman of a workshop on Chicano and Puerto Rican literatures at the MLA meeting in Chicego, Ill. He is currently a consultant to the MLA Commission on Minority Groups and the Study of Language and Literature and to the Office of Spanish Speaking Fomento of the American Association of Community and Junior Colleges.

Dr. Charles Craypo, associate professor of labor studies, is the author of an article in the October issue of "Industrial and Labor Relations Review," published by the New York State School of Industrial and Labor Relations of Cornell University. The article is entitled "Collective Bargaining in the Conglomerate Multinational Firm: Litton's Shutdown of Royal Typewriter." Dr. Craypo is a specialist in the area of impact of corporate conglomeration on the collective bargaining process and its outcomes.

Dr. Kuppuswami Vedam, professor of physics, has been elected a Fellow of the Optical Society of America. The honor was bestowed on Dr. Vedam by the board of directors of the Society in recognition of his distinguished service in the advancement of optics. A specialist in crystal physics, optics, ferroelectricity, x-ray and neutron diffraction, high pressure physics, physics of surfaces and materials characterization, Dr. Vedam joined the Penn State faculty in 1956. From 1960 to 1962, he served as a senior research officer at the Atomic Energy Establishment, Bombay, India, and as a member of the Indian Standards Institute panel on piezoelectric transducers and then returned to the University.

Dr. Esther E. Kamisar, a former elementary and high school teacher, has been named assistant professor of educational psychology at the Ogontz Campus. Earlier this year, she received a Ph.D. in educational psychology from the University of Michigan, where she also received an M.A. in 1972. Her B.A. in English was granted by Hunter College.

Gene Wettstone, Penn State's gymnastics coach for 38 years, has been named manager of the United States gymnastics team for the 1976 Olympics in Montreal. Announcement of Mr. Wettstone's selection was made by the U.S. Olympic Committee, which simultaneously announced the selection of one of Mr. Wettstone's former gymnasts, Lt. Col. Karl Schwenzfeier of the Air Force Academy, as head coach. Mr. Wettstone, who has announced plans to retire at the end of the 1975-76 season, was coach of the 1948 and 1956 Olympic teams and coached the U.S. team in the 1970 World Games competition.

Dr. Terence H. Risby, assistant professor of chemistry, presented a paper at the Environmental Protection Agency Platinum Research Conference in Duall Roost, N.C., Dec. 3-5. The paper, titled "Determination of Platinum Using Chemical Ionization Mass Spectrometry," was co-authored by **Dr. Peter C. Jurs**, associate professor of chemistry, and **Steven R. Prescott**, a doctoral candidate in chemistry. Dr. Risby, a specialist in the chemistry of heavy metals, notes that about 20 tons of platinum pour into the atmosphere each year via auto emission control devices. While there is no data yet to establish that platinum is a problem, he says, the potential is there.

Dr. William W. Reynolds, assistant professor of biology at Wilkes-Barre, has been invited to present a pepar on "Behevioral Aspects of Thermoregulation in Fish" to a symposium on thermal preference studies to be held during the annual meeting of the Northeastern Division of The American Fisheries Society at Hershey, Pa., next spring. Earlier this year, Dr. Reynolds presented papers on various aspects of behavioral thermoregulation and activity rhythms of fish at the Second Thermal Ecology Symposium in Augusta, Ga., and at national meetings of the Animal Behavior Society (Wilmington, N.C.) and the American Society of Ichthyologists and Herpetologists (Williamsburg, Va.). William J. Karlotski, an undergraduate student, also presented a paper co-authored with Dr. Reynolds at the ASIH meeting. A number of publications are now in press resulting from work performed by Dr. Reynolds and his students with the aid of a Commonwealth Campus (Phase I) Scholarly Activity Fund Grant. The opportunity to lower-profile undergraduate students to participate in original scientific research is a unique feature of the Commonwealth Campus system.

Dr. Archibald J. McDonnell, professor of civil engineering and assistant director of the Institute for Research on Land and Water Resources in charge of the water resources research center at the University, has been appointed a member of the United States Section of the Great Lakes Research Advisory Board for a three-year term. The Board was established pursuant to the Canada-United States Great Lakes Water Quality Agreement of 1972.

Retirements

Dr. Harold J. O'Brien, associate dean of the College of the Liberal Arts for Commonwealth Campuses, will retire Jan. 1, 1976, after 28 years on the faculty. Last June, Dean O'Brien was honored as the 11th recipient of the Lion's Paw Medal, awarded by the Lion's Paw Alumni Association to a person who has contributed notable service to the University, especially by fostering its honorable traditions.

A native of Locust Gap, near Mt. Carmel, Dean O'Brien's first experience with Penn State came in 1930 while he was working in the anthracite coal mines during the Depression, he enrolled in an evening extension course in mining. Later, after graduating from Shippensburg State College, he returned to the University to earn his M.S. and Ph.D. in speech.

Before joining the faculty in 1947, he taught at Clearfield High School, and during World War II, he won the Purple Heart while serving as a tank commander with the U.S. Army in the South Pacific. During his early years at the University, he served as coach for the Men's Debate Team, bringing it to national prominence, and for 14 years was parliamentarian for the University Senate. Since 1959, Dean O'Brien has had responsibility for the administration of liberal arts' programs at the Commonwealth Campuses. He is the co-author of a book, "Management-Employee Communication in Action."

Dr. Samuel B. Guss, professor of veterinary science extension, will retire Jan. 1 after 20 years of service. He attended Albright College and received a veterinary medicine degree in 1943 from the University of Pennsylvania. Prior to his appointment to the faculty in 1955, he was a practicing veterinarian. As Extension veterinarian, Dr. Guss worked primarily in the areas of dairy and livestock health and related problems. He also assisted numerous county and state dairy and livestock health committees. He developed a mobile milking machine demonstration unit, which has been used to instruct more than 15,000 dairymen in proper milking techniques, and has conducted hundreds of educational county and multi-county meetings on health subjects for livestockmen, veterinarians and industry teldmen.

Dr. Guss served on the University Faculty Senate and is past president of the Pennsylvania Extension Professors Association, the Pennsylvania Veterinary Medical Association and the American Association of Extension Veterinarians.

Lloyd E. Adams, professor of entomology extension, will retire Jan. 1 with 26 years of service. Since 1949, Prof. Adams has supervised Extension entomology programs in northwestern Pennsylvanie. He currently conducts his work in 21 northwestern counties. A native of St. Mary's, Mo., he received B.S. and M.A. degrees from the University of Missouri, with majors in entomology. During his tenure on the University faculty, Mr. Adams introduced numerous insect control chemicals on fruit, vegetables, grapes, and other food crops. He assisted with many insect control demonstrations on forage crops, potatoes, Christmas trees, and fly control in barns. He also has identified thousands of insect specimens and symptoms of damage caused by major pests for Extension agents, farmers, and homeowners.

Obituaries

Robert B Donaldson Sr., who retired in 1970 after 34 years at the University, died Dec. 9 in State College at the age of 70. A professor emeritus of agricultural economics Extension, Mr. Donaldson received both his B.S. and M.S. degrees from Penn State. He served as chairman of the Extension agricultural economics and rural sociology section and was nationally known for his work in marketing education in agriculture. A specialist in the development of fruit and vegetable procurement systems, he was the author of a book, "Profitable Roadside Marketing."

Ray V. Watkins, who retired in 1958 as University scheduling officer, died Dec. 4 in State College at the age of 82. Born in Nanticoke, Mr Watkins was graduated from Bloomsburg State College in 1913 and the University in 1923. A World War I veteran, he taught in the State College public schools before joining the University in 1924. He taught English composition at Penn State until 1935, when he was named scheduling officer.

Food talk

(Continued from page one)

toral degrees in agricultural economics, all at Penn State. He taught agricultural economics at the University of Florida before joining FAD.

His talk is being sponsored by the University Committee for International Programs and the College of Agriculture.

WPSX highlights

The potential of growth stocks for the individual investor is explored on **Wall Street Week** Friday, Dec. 19, at 8:30 p.m. Host Louis Rukeyser talks with Charles W. Shaeffer of T. Rowe Price Associates about why growth stocks can serve as protection against the long-term effects of inflation.

Benny Goodman highlights the first of two special **Soundstage** concerts in tribute to record producer John Hammond Friday, Dec. 19, at 10 p.m. During his 40-year career, Mr. Hammond has introduced such artists as Goodman, Bob Dylan, Bessie Smith and Billie Holiday. Appearing on the program with Goodman are George Benson, Marlon Williams and Helen Humes. The second program, on Dec. 26, features Bob Dylan making his first television appearance in more than six years. Each program may be seen the following Tuesday at 9:30 p.m.

Prima ballerina Dame Margot Fonteyn is the subject of an hour-long film biography Sunday, Dec. 21, at 10 p.m. The program, narrated by Richard Burton, includes scenes of Dame Margot in rehearsal with Rudolf Nureyev and Sir Frederick Ashton, and in her private life.

Piano virtuoso Arthur Rubinstein is featured in a Christmas Eve concert of works by Chopin on **Great Performances** Wednesday, Dec. 24, at 9 p.m. Mr. Rubinstein will perform Chopin's Piano Concerto no. 2 in F Minor, with Andre Previn and the London Symphony Orchestra.

Penn State pianist Philip Deltra is the host of **Impressions in Music**, a three-program series of music by composers of the impressionist era. The first program, to be aired Thursday, Dec. 25, at 7:30 p.m., features works by Gabriel Faure. Future programs will focus on music of Debussy (Jan. 1) and Ravel (Jan. 8).

Funding opportunities

(206-1) The National Science Foundation has issued "draft" guidelines for its RIAS Program (Research Institution and Support Program). Up to four years of support is anticipated for proposals with the objective of improving the effectiveness, efficiency and quality of training and research programs for young scientists at the graduate and postgraduate level. Only one proposal may be submitted by each institution, although participation in a consortium-type arrangement is permitted, provided institution and consortium proposals are dissimilar. The proposal deadline is March 1, 1976. Final guidelines are expected soon (Ref. NSF RIAS Draft Guides)

(206-2) Doctoral Dissertation Research Awards to candidates conducting **research on health service problems** have been announced by the HRA National Center for Health Services Research. Proposals will be reviewed in March and awarded in April, 1976. Contact for applications is 202-443-2620. (Ref. C&U Reps., 12/1/75)

(208-3) The Office of Education has issued proposed rules for awards and contracts under its **National Reading Improvement Programs.** Included are reading improvement projects (elementary and pre-elementary state reading improvement programs; special emphasis projects (contracts-local education), and the Reading Academy Program (out-of-school youth and adults). Comments are requested by Jan 5, 1976 (Ref. 40FR 56676-92, 12/4/75) (CFDA 13.533)

(206-4) Research Application at Identity-Research Subjects and Patients have been issued by the Public Health Service. (Ref. 40FR56692-95, 12/4/75)

(206-5) The Exxon Education Foundation funds **Educational Research and Development** that promises to lead to wide improvement in education, automation of physical facilities utilization in higher education. Pilot projects, developmental efforts and studies are encouraged. Preliminary outlines are requested by March 1, 1976 (June 1 next). Exxon also supports an **IMPACT Program Funds to Implement Educational Innovations.** Four innovations are currently funded. "Student-to-Student Counseling" (training students as academic counselors); "Expor Sim"; (a computerized research lab through computer simulations); "Guided Design" (combining programmed instruction with open-ended problem solving); and "Tips" (individualizing instruction in the large class). Proposals are requested by Feb 1, 1976 (July 1 next).

Inn food service to shut

Food service at the Nittany Lion Inn will be closed from Sunday, Dec. 21, through Thursday, Jan. 1. Full service will resume Jan. 2.

Behrend openings

Behrend College is seeking heads for its Division of Arts and Humanities and the Division of Social and Behavioral Sciences. Applications and nominations should be submitted by Jan 7 to: Search Committee, Office of the Dean of the Faculty, Behrend College, The Pennsylvania State University, Station Road, Erie, Pa. 16510.

The division head is an educational leader, responsible for direction of programs in resident instruction, continuing education, research in the fields of specialization, development of an appropriate array of courses and the recruitment and retention of able staff are also part of the job description.

Candidates should have a doctoral degree plus administrative experience in higher education and a demonstrated capacity for academic leadership. Candidates for the Arts and Humanities position should have a discipline background in English. Candidates for the Social and Behavioral Sciences post should have a discipline background in either economics or political science. The appointments would be effective July 1, 1976

Staff vacancies

This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1301 (Network Line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m. Wednesday, Dec. 31. **Do not contact the area that has the vacancy**

ASSISTANT COMMUNICATIONS SPECIALIST, COLLEGE OF AGRICULTURE University Park

Produce and host weekly television programs, radio series, and develop a special series with emphasis on youth audiences for broadcast or group sessions. Coordinate and supervise audio and video taping in the studio, field and laboratory. Responsible for seeking, obtaining, and/or selling audio visual equipment with emphasis on new items. Teach radio and television broadcasting in workshops, etc. Produce materials for audio visual presentations with college faculty, guest students, etc. Bachelor of science degree or equivalent in broadcasting, journalism, speech, mass communications or similar disciplines, plus one to two years of directly related experience in radio and/or television performing, programming or teaching.

PENN STATE intercom

Volume 5, Number 15 January 8, 1976

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

News briefs

Events to honor Dr. King

The birthday anniversary of Dr. Martin Luther King will be celebrated with an hour of reflection at 7 p.m. Saturday, Jan. 10, in the Helen Eakin Eisenhower Chapel lounge and at University Chapel Service the following day at 11 a.m. in the Music Bldg. recital hall. The Saturday evening program will provide an opportunity to bring together persons who are actively working for human liberation and brotherhood, according to Rev. Charles L. Coleman, program director of religious affairs. The Rev. Dr. Lucius Walker Jr., associate general secretary for church and society of the National Council of Churches, will be a special guest at Saturday's hour as well as Chapel speaker. The programs are sponsored by the Office of Religious Affairs and the Black Christian Fellowship.

Fall grades to faculty

All faculty members should receive within the next few days a listing of the grades which were recorded for their students during the fall term. Two copies of the report, now in preparation, will be forwarded by the Division of Admissions, Records and Scheduling through the Colleges, with one of the two copies intended for the instructor who graded the students. The purpose of the reports, instituted with the winter term, 1975, is to assure accuracy of the grade recorded and to provide summaries of grade distributions. The reports are issued shortly after the close of each term.

Canada requires visas

The Canadian government now requires that any person who would need a non-immigrant visa in proceeding to Canada directly from his country of citizenship must have a visa if he wishes to enter Canada from the United States even for a short visit. Any international visitor planning a trip to Canada should check in the Personnel Procedures Office to determine if a visa is needed. Because in some cases it may take up to three weeks to obtain a Canadian visa, anyone planning a trip should not wait until the last minute to obtain all documents.

On Drugs plans program

On Drugs, Inc., of State College is planning a Drug Awareness Day Program to be held this spring. Any individual or organization interested in planning, participating or contributing to this project should contact OD at 236-A S. Allen St. or call 237-5855.

Foreigners must register

All foreign nationals who are not United States citizens must register their current address with the Immigration and Naturalization Service during the month of January. To do this, they should obtain a form, which is available at the Post Office, fill it out and leave it with the Postmaster. Failure to comply with the law can lead to severe penalties.

Dinner-Theatre planned

Tickets are available at the Kern Bldg. Information desk for the Un-Common Dinner-Theatre production of "6 Rms Riv Vu" Saturday and Sunday, Jan. 17 and 18, at 6:30 p.m. in Room 102 Kern. Tickets for the "Fisherman's Wharf Bullet" and the play are $6 apiece. Tickets for the play only will be sold at $1.75.

New Phi Beta Kappa officers

New officers have been elected by Lambda Chapter of Phi Beta Kappa. They are: Dr. Barton W. Browning, associate professor of German, president; Dr. Doris M. Seward, executive assistant to the President, secretary; Martha J. Kolin, assistant professor of English, treasurer; and Dr. Ira V. Brown, professor of American history, historian. Board members at large are Dr. James D Rodgers, associate professor of economics; Dr Judd B. Arnold, associate professor of English; and Dr. Jean W MacCluer, associate professor of biology Phi Beta Kappa members in the Penn State community who are interested in joining Lambda Chapter are urged to contact one of the board.

Odetta completes cast

The well known folksinger Odetta has agreed to take on the last uncast role — that of the Muse of Liberty — in "Be Glad Then America," the musical and dramatic entertainment written by John LaMontaine for the University choirs "The most glorious voice in American folk music," the New York Times critic wrote of Odetta, who recently made her acting debut in Arthur Miller's "The Crucible" at the Stratford Festival in Canada "Be Glad Then America" is under the artistic direction of Sareh Caldwell and will be performed by the Pittsburgh Symphony Orchestra. It will premiere Feb. 6, 7 and 8 at University Auditorium. Ticket sales will begin Jan. 28.

Retired staff to meet

Penn State's Retired Staff Club will hold its 174th meeting Thursday, Jan. 8, at 7:30 p.m. in the St. Andrews Episcopal Church Parish Life Center. Dr. Charles L. Hosler, dean of the College of Earth and Mineral Sciences, will speak on "Obstacles and Amusing Incidents Encountered in Translating Complex Scientific Data." Host and hostess for the evening are Mr. and Mrs. Carl O. Dossin. New members are welcome

Berks building gone

Visitors to Reading will no longer be seeing the Penn State classroom building located next to the Vanity Fair outlet. The building, which Berks Campus was using for continuing and labor education programs, is being demolished to allow Vanity Fair to enlarge its parking lot.

PLRB hearings to determine unit

The Pennsylvania Labor Relations Board opened hearings Monday on the nature of a potential collective bargaining unit at the University.

The hearings were called as a result of a petition filed by the Pennsylvania State University Professional Association (PSUPA) for an election of a collective bargaining agent to represent Penn State faculty and professional staff.

One other faculty organization, the American Association of University Professors (AAUP), has intervened and is participating in the unit determination hearings.

Representatives of the Graduate Student Association were present at the opening of the hearings, but the group's role has not been determined.

The hearing's opening session, most of which was conducted off the record, was devoted to a discussion of the issues involved.

PSUPA is seeking a unit to include all faculty, excluding those at the Milton S. Hershey Medical Center and the King of Prussia Graduate Center, and all non-teaching professionals directly related to the academic and research programs.

The AAUP, on the other hand, would have a unit including only faculty. It would exclude the Hershey Medical Center, and also King of Prussia, to the extent there are no full-time faculty members there.

The University's position, as outlined at the opening session, is that a unit should consist only of faculty, but should include regular full-time faculty at all locations of the University, including the Medical Center.

Roger Richards, who represented the

(Continued on page four)

Library automation offers prospect of improved service, economies

The following article on library automation was prepared by Edward R. Johnson, assistant dean of libraries for technical operations, and Gordon W. Rawlins, chief, systems development.

Every member of Penn State's academic community has been affected in recent years by the problems of runaway inflation. Equipment costs more, supplies are more expensive, freezes or decreases in personnel budgets occur frequently, and books increase in cost at an astronomical rate every year. The University Libraries have been coping with these problems for several years, but we can take some small comfort in the fact that we are not alone. The National Commission on Libraries and Information Services in its 1975 report, "Toward a National Program for Library and Information Services. Goels for Action," notes that "like the universities in which most of them are situated, research libraries are confronted today with rising costs, a rapidly changing set of educational objectives and the impact of new technology."

For several years, the prospects of automation have offered the promise of a solution to many library problems. However, It was not until about five years ago that academic libraries began to design and implement significant computer-based systems. Today, there are several nationwide computer-based library cooperative projects, and a few large research libraries are developing their own automated systems. The most significant projects underway today in libraries are: Stanford University Library's project BALLOTS (Bibliographic Access to Large Libraries utilizing Time Sharing), the Library of Congress MARC (Machine Readable Catalog) system, MEDLINE at the National Library of Medicine, various automation projects at the University of Chicago Library, Ohio State University Library, Columbia University Library, the New York Public Library and the Ohio College Library Center (OCLC).

A late entrant in the field, but one which offers the prospect of significantly improved library services, is under development at the Penn State University Libraries — the Library Information Access System (LIAS). Both the Library Information Access System (LIAS) and the Ohio College Library Center (OCLC) will be of considerable interest to the faculty, staff and students of Penn State.

OCLC

In the late 1960s and early 1970s, many college, university and public libraries in Ohio formed a non-profit corporation called the Ohio College Library Center. The purpose of OCLC was to share the cataloging data of participating libraries and to provide access to these data via CRT terminals connected on-line to a computer on the Ohio State University campus in Columbus, Ohio. OCLC "went on-line" in 1973, and in just a few short years, it has grown enormously in size and scope. Today, it is one of the most significant nationwide library resources in the United States. Several hundred libraries across the country now belong to OCLC and its data base has grown to over 1,750,000 cataloging records input by member libraries. Plans are now being developed to expand OCLC beyond cataloging into the areas of periodicals record control, acquisitions support and interlibrary loan. The biggest impact of OCLC to date, however, is on that elusive but desirable goal of interlibrary cooperation.

In 1974 the University Libraries at Penn State joined a consortium of libraries based in the Pittsburgh area — the Pittsburgh Regional Library Center. The major purpose of joining PRLC was to participate, through that consortium, with the Ohio College Library Center. PRLC members received CRT terminals through a grant of funds from the State Library of Pennsylvania and telephone line changes and other communications costs to Columbus are also shared by the members

While computer programming and systems analysis activities are presently underway to implement the Library Information Access System, the Libraries' participation, on an interim basis, in OCLC will allow us to achieve our goal of adopting cost-effective machine-aided methods in cataloging on as full a scale as possible. After nearly a year of planning, three OCLC terminals are now in operation in the Catalog Department, and an extensive reorganization of the staff responsibilities has been effected. The adoption of OCLC procedures has been made cost-effective by "collapsing" several vacant clerical positions and through the implementation of more efficient computer-assisted methods of cataloging and producing catalog cards. OCLC has set the stage for the provision of extensive computerized library services to the Penn State community.

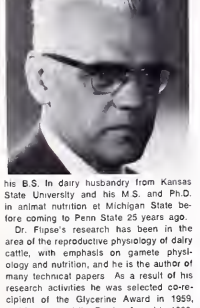
LIAS

LIAS is a computerized library system which was developed following the demonstrable success of the Ohio College Library Center's "shered cataloging" sub-system. It is a modular system designed to provide library patrons and staff with information essential to the support of their academic research and teaching needs. LIAS uses the library's medium scale Xerox time-share computer. It will consist of several subsystems that will be developed and made operational independent of each other. The design of LIAS is based upon the proven and existing standards of the library, computer and communication industries. The results of an intensive diagnostic study of every existing file and activity within the Penn State University Libraries on the University Park campus went into the design and structure of LIAS.

LIAS is a terminal based system, which means that a computer terminal will be used to relay information from the user to the computer and back to the user. The computer will retain a record of all requests and transactions as they relate to the user and his or her specific needs at any given time. While the user communicates with the computer, the librerian will be recording the receipt of new materiel, its status at that minute, and all other processing information. As a result, LIAS

(Continued on page four)

PENN STATE COLLECTION

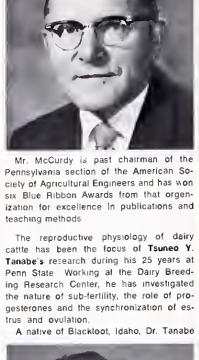


Ag service awards presented to seven

Penn State conferred **Frank Anthony's** B.S., M.S. and Ph.D. degrees in agricultural education. Before joining the faculty, he taught agriculture at Latrobe High School, served as head of the Department of Farm Mechanics at the National Farm School and was director of agricultural education and extension at the American University of Beirut and Near East Foundation. A professor of agricultural education at the University, Dr. Anthony has been a visiting professor at Rutgers and the Universities of New Hampshire, Maine and Rhode Island.

Dr. Anthony has conducted research in hunter and firearm safety, and basic testing programs presently used to educate and screen hunters under 16 were developed by him. He has been awarded the Honorary American Farmer Degree by the National Association of Future Farmers of America and the Honorary Keystone Farmer Degree from the FFA's Pennsylvania Association. In 1969, he was named "Man of the Year" by the Pennsylvania Rural Electric Association.

Robert J. Flipse, professor of dairy science, assistant dean for research in the College of Agriculture, and assistant director of the Pennsylvania Agricultural Experiment Station, is one of the world's leading authorities on the biochemistry and metabolism of the bovine sperm. He received

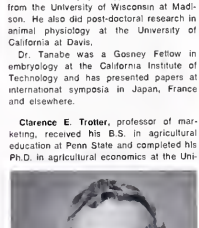


his B.S. in dairy husbandry from Kansas State University and his M.S. and Ph.D. in animal nutrition at Michigan State before coming to Penn State 25 years ago.

Dr. Flipse's research has been in the area of the reproductive physiology of dairy cattle, with emphasis on gamete physiology and nutrition, and he is the author of many technical papers. As a result of his research activities he was selected co-recipient of the Glycerine Award in 1959, and he received the Borden Award in 1969.

A fellow of the American Society for the Advancement of Science, Dr. Flipse participates in the administration of the Experiment Station with principal responsibility for contracts and agreements and the processing of research projects.

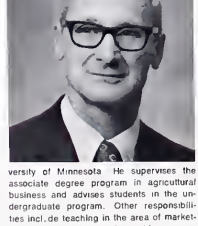
Joseph A. McCurdy, professor of agricultural engineering Extension, has gained national recognition for his work and Extension program in potato storage structures and management. A Penn State graduate, he also has an M.S. from Michigan State. During World War II, he was a second lieutenant and served as a bombardier in the Air Force.



Before coming to Penn State he was a farm representative of the Pennsylvania Power and Light Co., and much of his work here has been in the area of electric power and processing. He originated the Pennsylvania 4-H Electric Project and authored the publication, "Standby Equipment for Electric Power Interruptions," in cooperation with the Office of Civil Defense

Mr. McCurdy is past chairman of the Pennsylvania section of the American Society of Agricultural Engineers and has won six Blue Ribbon Awards from that organization for excellence in publications and teaching methods

The reproductive physiology of dairy cattle has been the focus of **Tsuneo Y. Tanabe's** research during his 25 years at Penn State. Working at the Dairy Breeding Research Center, he has investigated the nature of sub-fertility, the role of progesterones and the synchronization of estrus and ovulation.

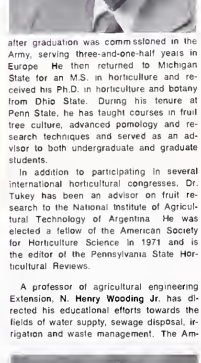


A native of Blackloot, Idaho, Dr. Tanabe

grew up on a farm. He majored in dairy husbandry at Iowa State University, where he earned his B.S. in 1942. In 1945, he obtained a master's degree in animal breeding at Cornell, and three years later, a Ph.D. in the physiology of reproduction from the University of Wisconsin at Madison. He also did post-doctoral research in animal physiology at the University of California at Davis.

Dr. Tanabe was a Gosney Fellow in embryology at the California Institute of Technology and has presented papers at international symposia in Japan, France and elsewhere.

Clarence E. Trotter, professor of marketing, received his B.S. in agricultural education at Penn State and completed his Ph.D. in agricultural economics at the Uni-



versity of Minnesota. He supervises the associate degree program in agricultural business and advises students in the undergraduate program. Other responsibilities include teaching in the area of marketing and overseeing the internship program where students receive on-the-job training with a business or public agency.

His research experience has been in the area of marketing with specific emphasis on forest products, livestock and meat, horticultural products, processing, distribution and credit in the feed milling industry and apple marketing.

Dr. Trotter is a member of many University and professional committees and has been active in community affairs. Currently he is a supervisor in College Township.

Loren D. Tukey, professor of pomology, is known for his research on growth regulation chemicals on apples and grapes; plant-environmental relationships in fruit growth; and the development of intensive production systems involving dwarfing rootstocks, close tree spacing and the trellis-hedgerow method of growing apples for machine harvesting. He has authored many articles for the professional journals.

Dr. Tukey earned his B.S. degree in horticulture from Michigan State University and

after graduation was commissioned in the Army, serving three-and-one-half years in Europe. He then returned to Michigan State for an M.S. in horticulture and received his Ph.D. in horticulture and botany from Ohio State. During his tenure at Penn State, he has taught courses in fruit tree culture, advanced pomology and research techniques and served as an advisor to both undergraduate and graduate students.

In addition to participating in several international horticultural congresses, Dr. Tukey has been an advisor on fruit research to the National Institute of Agricultural Technology of Argentina. He was elected a fellow of the American Society for Horticulture Science in 1971 and is the editor of the Pennsylvania State Horticultural Reviews.

A professor of agricultural engineering Extension, **N. Henry Wooding Jr.** has directed his educational efforts towards the fields of water supply, sewage disposal, irrigation and waste management. The Am-

erican Society of Agricultural Engineers honored him with seven Blue Ribbon Awards for excellency and originality in his publications and teaching methods.

Mr. Wooding obtained his B.S. degree from Virginia Polytechnic Institute and his M.S. at Rutgers University. His professional career began with the Soil Conservation Service in Virginia; he then worked for the Southern State Cooperative, Inc., and was a power use specialist with USDA's Rural Electrification Administration.

During World War II, he served as a commissioned officer in Europe and North Africa and in Alaska during the Korean emergency. In 1972, he retired as a colonel in the Army Reserve.

Faculty notes

The cover photograph and an article in the current (January, 1976) issue of "Scientific American" are provided by **Dr. Alistair Fraser,** associate professor of meteorology. The article, with graduate assistant **William H. Mach,** is on the subject of mirages, which Dr. Fraser studies partly for the insights they provide into meteorological processes and partly, he says, "because I find them inherently fascinating." He is presently doing research on the subject under a grant from the National Science Foundation. The article is illustrated with drawings showing various types of mirages and the meteorological conditions that cause them. There are also several photographs of mirages taken by Dr. Fraser, who contends that the phenomena are not as rare as popularly supposed.

Dr. Henry S. Albinski, professor of political science, participated last month in a study group assessing the international roles and policies of Australia and New Zealand at an invitational conference on changing patterns of relations among the United States, Great Britain and the old Commonwealth nations. The conference was sponsored by the Ditchley Foundation and held at Ditchley Park, England. Among the 25 or so Americans, Britons, Australians, Canadians and New Zealanders attending were diplomatic, political, military, business executive and academic delegates. The Duke of Edinburgh presided over part of the conference.

L. P. Greenhill, assistant vice-president for academic services, received the Pioneer Award of the Pennsylvania Learning Resources Association at a recent meeting in Hershey. The award recognizes Mr. Greenhill for his pioneering efforts in educational technology and his leadership to improve education through innovative means.

Zeljko Kujundzic, associate professor of art (Fayette), has had several of his works included in a group exhibition titled "Art about Women" at the R.M. Gallery in Toronto, Canada. A member of the faculty since 1968, Prof. Kujundzic works in several media, ranging from hand-made tapestries and wood and metal wall pieces to terra cotta statuary and ceramic pieces.

Dr. **Ronald J. Harshbarger,** assistant professor of mathematics at Beaver, is the author of three new mathematics texts published by Harper & Row. "Introductory Algebra for College Students" and "Intermediate Algebra for College Students" were written for use in pre-calculus courses. "Business Mathematics" is designed for majors in business. Instructor Manuals and semi-programmed Student Guides are included for each text. A faculty member since 1965, Dr. Harshbarger is the author of an earlier text, "Essential Business Mathematics." A graduate of Shippensburg State College, he earned his M.S. from the University of New Hampshire and his Ph.D. from the University of Pittsburgh.

Dr. **Charles R. Hartzell,** assistant professor of biochemistry, was invited to participate in the winter Gordon Research Conference in Santa Barbara, Cal., Dec. 28-Jan. 2 in a session on Metals and Metal Binding in Biology.

Dr. Cecil Goodwyn has been appointed as an assistant professor of geography. He received a B.S. in geography from East Tennessee State College and his M.S. and Ph.D. from the University of Michigan. His area of special interest has been computer modeling of physical processes in arctic regions. He plans to continue work in computer models, shifting his study to energy related consumption in small communities as a means of seeking alternative ways to use energy.

Dr. Helen B. Volz has been named an assistant professor of speech pathology at University Park. She was a part-time instructor at Penn State from 1966 to 1970 and a full-time instructor thereafter. Her degrees were granted by Penn State — a B.S. in elementary education and a M.S. and Ph.D. in speech pathology and audiology. Dr. Volz has served as speech clinician in the Centre County public school system.

University Park Calendar

January 8 - 18

Items to be included in this calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, Jan. 8

Commons Videotape, 12 noon, Kern lobby

Physical Sciences Library orientation for faculty, grad students, 1:30 p.m.

FSHA 410 dinner, "India," 5:30 p.m., Maple Room, Henderson Human Development. Reservations: 865-7441.

Friday, Jan. 9

Physical Sciences Library orientation for faculty, grad students, 1:30 p.m.

Folk and Square Dance Roundup, 7:30 p.m., south gym, White.

GSA Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Artists Series, Martin Best, lutenist and guitarist, "The Art of the Troubadour," 8:30 p.m., Schwab.

Saturday, Jan. 10

Sports: Women's swimming, vs. Springfield, 2 p.m. Wrestling, vs. Bloomsburg State, 2 p.m. Men's and women's gymnastics, vs. Springfield, 8 p.m., Rec. Bldg.

Hour of reflection honoring Dr. Martin Luther King, 7 p.m., Eisenhower Chapel.

Artists Series, Marcel Marceau, mime, 8:30 p.m., University Auditorium.

Black Caucus, "Dime Disco," 9 p.m., HUB ballroom.

Sunday, Jan. 11

Chapel Service, 11 a.m., Music Bldg. recital hall. Dr. Lucius Walker Jr., National Council of Churches.

Public reception, "Recent Sculptures by John Cook," 3-5 p.m., Museum of Art.

Teri Gemberling, piano recital, 3:30 p.m., Music Bldg. recital hall.

Monday, Jan. 12

Davis Brooks, violin, 8.30 p.m., Music Bldg. recital hall.

France Cinema, "Zazie and the Subway," 7 and 9 p.m., Room 102 Kern.

Tuesday, Jan. 13

Sports: Men's and women's bowling, vs Gettysburg, 3 p.m., Rec. Bldg.

Artists Series Film Festival, "Il Bidone," 7 and 9 p.m., Schweb.

Wednesday, Jan. 14

"Noondays" devotional period, 12 noon, large chapel, Eisenhower Chapel.

FSHA 410 dinner, "Roman," 5:30 p.m., Maple Room, Henderson Human Development. Reservations: 865-7441.

Thalia Trio, 8:30 p.m., Music recital hall.

Thursday, Jan. 15

Commons Videotape, 12 noon, Kern lobby.

FSHA 410 dinner, "Renaissance Italy," 5:30 p.m., Maple Room, Henderson Human Development. Reservations: 865-7441.

Friday, Jan. 16

Penn State Symphonic Wind Ensemble, 8.30 p.m., Music Bldg. recital hall.

GSA Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Recreational and Parks Society Professional Careers Conference, 8 a.m.-5 p.m., HUB ballroom.

Saturday, Jan. 17

Sports: Men's basketball, vs. Muhlenberg, 2 p.m., Rec. Bldg. Women's and man's bowling, PSU Invitational, 3 p.m., Rec. Bldg. Women's and men's swimming, vs. Pittsburgh.

Un-Common Dinner Theatre, "6 Rms Riv Vu," 6:30 p.m., Rooms 102 and 112 Kern.

Sunday, Jan. 18

Marilyn Manning, flute, 3.30 p.m., Music Bldg. recital hall.

Chapel Service, 11 a.m., Eisenhower Chapel, Dr. Hugh Brooks, recreation and parks.

Black Christian Fellowship worship service, 11 a.m., Walnut Cultural Center.

Un-Common Dinner Theatre, "6 Rms Riv Vu," 6:30 p.m., Rooms 102 and 112 Kern.

Seminars

Thursday, Jan. 8

Ceramic Science, 11 a.m., Room 301 Mineral Industries. Dr. J. J. Mecholsky, Naval Research Laboratory, on "Relation of Fractural Mechanics to Fracture Surface Analysis in Ceramics."

Computer Science, 3 p.m., Room 325 Whitmore. Harvey Lowy, Stony Brook, on "Design of Distributed Data Basa Management System for a Homogeneous Distributed Computer Network."

Physics, 3:50 p.m., Room 117 Osmond. Alistair B. Fraser, meteorology, on "The Mirage, the Green Flash and Theological Optics."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Hans A. Panofsky, Evan Pugh Professor of Atmospheric Sciences, on "Wind Direction Fluctuations."

Mathematics, 4 p.m., Room 116 McAllister.

Eric Thomas, McGill University, on "Real Analysis."

Computation Center, 7:30 p.m., Room 105 Osmond. "Mathematical Planning (2)."

Monday, Jan. 12

Biology, 4 p.m., Room 60 Willard. William H. Schlesinger, Cornell University, on "Biogeochemical Limits on Two Levels of Plant Community Organization in the Southeast."

Computation Center, 7.30 p.m., Room 105 Osmond. "Mathematical Programming (3)."

Tuesday, Jan. 13

Plant Pathology, 9.45 a.m., Room 213 Buckhout. Evan Gustow on "Appressorial Formation."

Applied Research Lab., 10:45 a.m., Eric A. Walker Conference Room. David R. Vollmer on "The Colonization of Space. Development of Extra-Terrestrial Industry and Habitation."

Biochemistry and Biophysics, 11 a.m., Room 101 Althouse. Sarkis Margossian, Structural Biology Lab., Branders University, on "Interactions of Muscle Proteins."

Water Pollution Control, 2:20 p.m., Room 101 Chambers. "Soil Character and System Selection II."

Solid State, 1 p.m., Room 333 Davey. William Gordon, Case Western Reserve University, on "Alloying Effects on Mg Permi Surface, Electronic Energy and Life-Term Shifts."

English, 8 p.m., Room 101 Kern. Ralph Condee on "Monster-Literature and the University Bureaucracy, Exclusive of the Latin Poetry of John Milton."

Wednesday, Jan. 14

Biochemistry, 4 p.m., Room 101 Althouse. Scott Forsberg on "Preparation of Chemically Defined Synthetic Antigens."

Thursday, Jan. 15

Chemistry, 12:45 p.m., Room 333 Whitmore. Manfred A. Biondi, University of Pittsburgh, on "Atomic Collision Phenomena Relating to Lasers and Planetary Atmospheres."

Physics, 3:50 p.m., Room 117 Osmond. R. Arnowitt, Northeastern University, on "Gauge Theories and Supersymmetries."

Statistics, 4 p.m., Room 75 Willard. Gregory Reinsel, Carnegie-Mellon institute, on "Estimation on Linear Time Series Models."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Alan Dittenhoffer on "Precipitation Chemistry of Western New York."

Mathematics, 4 p.m., Room 116 McAllister. John Steel, SUNY at Buffalo, on "Logic."

Computation Center, 7.30 p.m., Room 105 Osmond. "Mathematical Programming (4)."

Exhibits

Museum of Art: Recent Sculptures by John Cook, Jan. 11-Feb. 29. Hugo Weber A Retrospective Exhibit, Jan. 11-Feb. 29.

Zoller Gallery: Student Painting and Ceramics Exhibit, Jan. 5-17. Student Sculpture Exhibit, Jan. 18-30.

HUB Gallery: Free U Art Show, Mike Loren, Jan. 5-17. Jack Tar, American Profiles of Merchant Seafarers, 1794-1803 (Smithsonian Institution), Jan. 17-Feb. 15.

Kern Gallery: Central Pennsylvania Scholastic Art Show, Jan. 10-Feb. 1.

Chambers Gallery: Musical Instruments, Jan. 6-29

Pattee Library: East Corridor Lobby, Drawings and Photographs by Maureen and Gary Nell, through Jan. 12.

University Schedule

Thursday, Jan. 8

Preregistration deadline.

Drop deadline.

File for Pass / Fail.

Course repeat deadline.

Thursday, Jan. 15

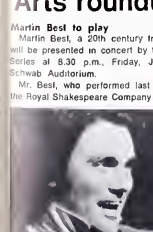
Late registration deadline.

Meetings

Tuesday, Jan. 13

College of the Liberal Arts faculty meeting, 3.30 p.m., Room 121 Sparks.

College of Arts and Architecture faculty meeting, 4 p.m., Room 302 Engineering A.



College of Agriculture faculty meeting, 4 p.m., Rooms 301 A and B, Ag. Administration.

Arts roundup

Martin Best to play

Martin Best, a 20th century troubadour, will be presented in concert by the Artists Series at 8.30 p.m., Friday, Jan. 9, in Schwab Auditorium.

Mr. Best, who performed last year with the Royal Shakespeare Company here, tells

Martin Best

his stories and sings his songs to the accompaniment of lute and guitar. He received his musical training at the Guildhall School of Music, the Royal College of Music and the Segovia School.

Augmented by his accompanying artist, Ed Flower, on additional guitar, Mr. Best will perform anonymous end traditional ballads from the British Isles and America, songs and lute music from 1150-1600, songs by Carl M. Bellman and "Songs of tha Spirit," translations of American Indian texts set to music by Mr. Best.

In addition to his regular performance, he will conduct a Master Class and Workshop at 8 p.m. Thursday, Jan. 8, in the Music Bldg. recital hall. Tickets for the workshop are available at no charge at the HUB Booth. Concert tickets are on sale now from 9 a.m. to 4 p.m. at the University Auditorium and the HUB Booth.

Weber exhibit opens

A retrospective exhibition of the American-Swiss artist Hugo Weber will open Sunday, Jan. 11, in the Museum of Art. Long recognized as an avant-garde painter, Weber was also a sculptor, filmmaker, writer and poet. Some 30 works on canvas are shown with six sculptures and 23 works on paper. Examples of Weber's poetry are found in the exhibition catalog which accompanies the show, organized under the patronage of the Ambassador of Switzerland and the sponsorship of the Pro Helvetia Foundation, Swiss Center Foundation, and Swiss Society of New York.

Weber was a widely respected artist during his life and was associated with European artists Alberto Giacometti, Hans Arp and Aristide Maillol, and with Franz Kline, Willem de Kooning and Jackson Pollock in America. Weber died in 1971. The majority of the works in the retrospective are on loan from Ann Weber. The exhibit has traveled to four museums in the United States and will be on view at the University of Maryland after it closes here Feb. 29.

Thalia concert is Jan. 14

The Thalia Trio will perform works by Amram, Shostakovich, and Schumann in concert at 8:30 p.m. Wednesday, Jan. 14, in the Music Bldg. recital hall. Trio members pianist Robert Baisley, professor and head of the Department of Music; violinist Joanne Zagst, associate professor of music; and cellist Leonard Feldman, associate professor of music, will perform Amram's "Dirge and Variations" and "Trio," opus 63 in D minor by Schumann. Joining the group for the performance of the Shostakovich "Romanzen Suite for Soprano and Trio" will be Karen Scott, assistant professor of music. In November, the Thalia Trio performed in concert at the week-long Festival of American Music at Shippensburg State College, where Mr. Baisley also served as a panelist in a symposium on aspects of American music with Aaron Copland, whose music was featured in the festival events.

New film available

The universal concept of movement is explained in a new 20-minute black and white film by University faculty, staff, and students. To be premiered at the National/International Sculptors Conference in New Orleans in March, the film was created using models by architecture students, with computer graphics by Frederick Stocker, research assistant in the Computer Center, and music by Burt Donner, associate professor of music, under the direction of Howard Lawrence, assistant professor of architecture. Filming is by Robert Kitchin, motion picture production specialist. The film, titled "Movament," is available for rent or purchase. Information is available from Mr. Lawrence at the Department of Architecture office, 308 Sackett Bldg., 865-9535.

Rhode Island work shown

The Eighth Annual Portfolio of the Photographic Education Society at the Rhode Island School of Design is exhibited Tuesday and Thursday afternoons from 1 to 5 p.m. In Room 212A Arts Bldg. Rhode Island School of Design faculty members Krot, Siskind, Lebowitz, and Michalik and 18 students are represented in the portfolio by one work each. Included are color and black and white photographs. Editions of the prints in the portfolio, one of the foremost of its kind, are also available for purchase at the exhibition, to be shown through Thursday, Jan. 22, under the sponsorship of the Department of Art.

Cook has one-man show

John Cook, professor and head of the sculpture area in the Department of Art, is the subject of a one-man show in the Museum of Art, opening with a public reception from 3 to 5 p.m. Sunday, Jan. 11, at the Musaum. Nineteen recent works are included in the exhibition of sculptures on the subject of human faces. An important theme for this current work is the changeability of individual attitudes in relation to their environment, according to the artist.

Faces, Mr. Cook says, are the crystallization of his endeavor to illustrate human stereotypes. The exhibited works often combine a variety of materials, such as bronze with rayon, velvet, feathers or paint.

Detail of "Relief Panel 1"

Born in Minnesota, Mr. Cook holds degreas from Arizona State University and the State University of Iowa and studied at the Akademie der Bildenden Kuensle, Munich, on a Fulbright research grant. He has taught sculpture at Cornell University, the University of Arizona, Utah State University and San Fernando Valley State College, where he was acting chairman of the fine arts area. The subject of one-man shows at the Phoenix Art Museum, the University of Arizona Galleries, the Osgood Gallery, New York, and the Silvan Simone Gallery in Los Angeles, he has bean represented in group shows in this country end abroad and has works held by many private and public collections.

HUB addition ready for business

Photographs show some of the new HUB meeting rooms and lounges which can be reserved by faculty and staff through the Office of Student Activities. Facilities cannot be scheduled for classroom instruction but are available for meetings, lectures or seminars. They vary in size, accommodating groups from 20 to 200.

PLRB hearings held on unit's nature

(Continued from page one)

GSA, asked ihai graduate assistants and teaching assistants be included in whatever unit the PLRB designates, although the group does not wish to be a bargaining agent.

Hearing examiner Sidney Lawrence suggested that the GSA either file a separate petition to create its own bargaining unit or await a Supreme Court decision on inclusion of graduate assistants in a faculty union.

The University provided information on basic classification of employees at the opening session and, at the suggestion of Mr. Lawrence, attorneys representing all parties met Tuesday to "to determine what further information is needed and can be provided at a minimum cost to the University."

The hearing reconvened for several hours Tuesday and then was adjourned to allow attorneys to prepare their cases. Mr. Lawrence tentatively scheduled six days in February — Feb. 11-13 and 24-26 — for testimony.

WPSX highlights, January 9-14

Newsman John Wydra is the anchorman for **The People's Business: Harrisburg Report**, a new statewide public affairs series from the Pennsylvania Public Television Network, which premieres Friday, Jan. 9, at 7:30 p.m. The weekly series will focus on events and issues in Harrisburg, with additional perspectives provided by reports from PPTN member stations around the Commonwealth.

Psychologist and author Elizabeth Kubler-Ross, M.D., is featured in **Death and Dying**, a half-hour special program Sunday, Jan. 11, at 7 p.m. Dr. Ross comments on the problems of those who are dying and those who mourn. She also discusses life after death, which, she says, exists "beyond the shadow of a doubt."

The world as seen by spastics is the subject of an award-winning film on **Nova** Sunday, Jan. 1, at 8 p.m. The hour-long program is the story of 55-year-old Joey Deacon, who has been a spastic since birth. With the aid of two other spastics who portray Joey as a boy and a young man, the program chronicles the change in society's attitudes toward the abnormal over the last half-century.

The citrus industry of Florida is explored on "A Day Without Sunshine" on **The PBS Special of the Week** Monday, Jan. 12, at 8 p.m. The 90-minute documentary focuses on the economy of Florida's citrus grove industry from the points of view of both industry owners and the workers. James Earl Jones narrates.

Monday at 10 p.m., **Talkabout** continues its three-week interview with Penn State football coach Joe Paterno. In the second of three interviews, host Paul Gillette talks with Paterno about the coach's early interest in the law and his feelings about politics, leadership and today's youth. The program may also be seen Tuesday, Jan. 13, at 3 p.m., and Saturday, Jan. 17, at 1:30 p.m.

"Search for the Great Apes" is the subject of the third **National Geographic Special** on public television Tuesday, Jan. 13, at 7:30 p.m. The hour-long program was filmed in Borneo, where Birute Galdikas-Brindamour is studying the orangutan — the only living Asiatic Great Ape — and in the Virunga Mountains of Africa, where Dian Fossey is studying the mountain gorilla. Narrated by E. G. Marshall, the program is the result of a six-year filming project.

Cyril Ritchard stars as the Earl of Rochester when **Anyone for Tennyson** recreates the poetry and light verse of the Restoration poets Wednesday, Jan. 14, at 7:30 p.m. The half-hour program — part of the only national television series devoted entirely to poetry — is an original dramatization that combines the wit of the Restoration poets with the atmosphere of the times.

Beyond the Horizon," Eugene O'Neill's Pulitzer Prize-winning first play, is presented when **Theatre in America** returns for its third season Wednesday, Jan. 14, at 9 p.m. on Channel 3. Geraldine Fitzgerald and John Houseman appear with members of the McCarter Theatre Company at Princeton, N.J., in the play, which deals with a love triangle theme.

Library automation

(Continued from page one)

will provide the user with accurate, up-to-the-second information about his area of concern. LIAS will also permit library management to review the computer analysis of library performance and user trends. In this way, library management will be able with confidence to redistribute existing workload requirements and reduce operational overhead as well as relocate and/or reduce existing staffing levels to meet the changing needs of the library community.

The University Park campus will be the first to benefit from the development and implementation of LIAS. The first LIAS sub-system to be introduced will be the "Remote Catalog Access" system. This system, the computer equivalent to the traditional card catalog, will permit both the patron and the librarian access to the library's bibliographic and holdings information on all cataloged materials within the University Park libraries. Access to this information will be through the use of terminals located within the libraries and throughout the campus. A library patron will have access to each bibliographic record by Author, Title, Keyword, Call Number, LC Cerd Number and Standard Library Bibliographic Control Numbers.

The second LIAS sub-system, "Circulation and Inventory Control," will provide more efficient and faster services to the user communiiy, and li will reduce costly library overhead. Accurate information regarding the status, location and demands for any item will be immediately available to assist ihe patron and the librarian to respond to their specific needs and work assignments. Because LIAS consists of independent sub-systems, each new subsystem is designed to become an integral part and companion to existing sub-systems. Therefore, "Circulation and Inventory Control" will add invaluable assistance to the user as li marries together the "Card Catalog or Remote Catalog Access" and "Circulation Control" functions of the library creating an unified approach to library resources.

The third LIAS sub-system will support all "Technical Operations" of the library. Ordering, receiving, payment, invoicing, routing, cataloging, marking, claiming, cancellations, etc. will be done using the terminals located in processing areas. As information is recorded using these terminals, it will become available to the other parts of the library and information community who are working at terminals in other locations. As a result, duplicate files presently maintained to provide necessary control will be replaced by one integrated, computerized library data-base.

Eventual expansion of some or all LIAS sub-systems into the Commonwealth Campuses is anticipated. This is possible through the use of existing telephone facilities and the addition of more terminals and of expanded computer communication hardware. The timetable for this activity has not yet been established.

Although LIAS was designed to benefi Penn State, it also could ultimately provide improved services to other institutions of any size or in any geographic locale, providing appropriate financial resources were available. Each participating institution could benefit immediately from the improved cost performance of this support network. In addition, enhanced resource sharing and cooperative library programs can be integrated inio LIAS to consolidate the efforts and activiies of the separate libraries and insitutions within the state of Pennsylvania

Obituary

Louis A. Legory, who retired in 1968 as an associate professor of chemistry, died Dec. 17 in State College. He taught at Ogontz from 1950 to 1952 and then joined the faculty at University Park, where he supervised chemistry programs at eight Commonwealth Campuses and 33 nursing school hospitals. A graduate of Westminster College, he held a master's degree from Columbia University. For 21 years, he taught chemistry, physics, biology and general science at Trafford High School near Pittsburgh and also served as principal there. Just before coming to Penn State, he was assistent professor of chemistry at Kent State University.

Staff vacancies

Staff vacancies contained in this publication are those which generally require at least a baccalaureate degree or equivalent as a minimum education at qualification. Staff vacancies requiring less than the baccalaureate degree as well as those announced in the Intercom may be found in the Penn State Reporter.

This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network Line 475-1387). Applications for these staff vacancies will be received until 5 p.m., **Thursday, Jan. 15. Do not contact the area that has the vacancy.**

SENIOR INSTRUCTIONAL SERVICES SPECIALIST — Behrend College

Responsible to the Assistant Dean of Undergraduate Studies for the Instructional Media Program in the College. Provide and encourage use of a wide variety of instructional resources by faculty and students. Investigate, evaluate and implement innovations in instructional methods and media. Provide an input concerning instructional media for long range developmental planning. Bachelor's degree or equivalent, preferably in education, instructional media, etc., and work progressing toward a master's degree, with one to two years of directly related experience. Supervisory experience highly desirable. Master's degree preferred.

PROGRAMMER, OFFICE OF PHYSICAL PLANT — University Park

Design, modify and maintain assembly language programs for the real-time Central Monitor System. Work as a member of a team to maintain a reliable and continuous monitoring and control of environmental and alarm system. Bachelor's degree or equivalent in computer science or engineering with one to two years of experience with assembly language applications, or two to three years of equivalent experience with assembly language applications in real-time monitoring or process-control computer systems

CONSTRUCTION SPECIFICATION WRITER, OFFICE OF PHYSICAL PLANT — University Park

Develops and prepares specifications for general, electrical, heating and ventilating, air conditioning and landscape construction. Makes evaluations of existing installations. Consults with architectural, mechanical and electrical designers to determine what methods and materials are most suitable for a particular construction project. Maintains current cost data on various materials and complete construction projects to assist estimating. Bachelor's degree in architecture or engineering and two to four years' experience necessary to meet all requirements for architectural and engineering registration. Extensive background in specification writing required

Funding sources

Call 865-1372 for further information

(205-1) The PHS Health Resources Administration is accepting applications for FY 1976 grants for **Traineeships for Advanced Training of Allied Health Professions Personnel (Long Term)** (deadline 1/12/76) and for **AHP Training Institutes (Short Term)** (deadline 3/2/76). (Ref. 40FR57511, 12/10/75)

(209-2) The Office of Education has issued final regulations for its **Community Education Program** to encourage and assist: (1) public schools to involve the community in educational, recreational and cultural programs; (2) to extend use of school buildings and equipment; and (3) to establish community education programs as centers for educational, recreational, cultural and related needs and concerns of the community. Also included are training projects for the people to operate the programs and assessment of training competencies. (Ref. 40FR55295-96, 12/75) (CFDA 13.563) The **March 3** closing date has also been announced. (Ref. 40FR59033, 12/22/75)

(209-3) The Office of Education has announced a Feb. 23 application closing date for grants and assistance contracts for its **Career Education Program**. (Ref. 40FR57376-77, 12/9/75) (CFDA 13.554)

(205-4) Jan. 16 is the extended closing date for new economic impact grants in the OE **Early Education of Handicapped Children** program. (Ref. 40FR57377, 12/9/75) (CFDA 13.444B)

(209-5) Applications/nominations for **State Vocational Education Programs** have been issued by the Office of Education, including changes made relating to the relationship between this program and CETA — the Comprehensive Employment and Training Act Program. (Ref. 40FR57759-63, 12/11/75) (CFDA 13.493-495, 13.555)

(205-8) The Office of Education has announced three closing dates for **National Reading Improvement programs**. Reading Academy Projects (Feb. 6), Special Emphasis Program (Feb. 27), and Reading Improvement Projects (March 16). (Ref. 40FR58338-39, 12/16/75)

(209-12) An MIT study funded by the NSF/RANN program urges that **research be done to meet U.S. economic problems rather than in such areas of study.** These range from determination of human protein requirements for all ages to development of unconventional sources and to novelive exploration. (Ref. NSF PR75-104, 12/19/75)

(209-16) The Cooperative State Research Service (CSRS) of the Department of Agriculture will award **competitive grants** for environmental quality; food and nutrition; beef and pork production; soybeans, peanut and sorghum transportation; forage, pasture, and range, and genetic vulnerability. This is the **CSRS Special Grants Program** to advance notice of letter must be received by Feb. 1, and research proposals by March 1. (Ref. 40FR59228-231, 12/22/75)

(209-17) Faculty institutes, short courses/conferences, and workshops in energy are supported by ERDA as well as **traineeships to graduate students**. The ERDA information number is 202-376-4000 (Ref. CAU Reps., 12/22/75)

News in brief

Model on view

A model of the University Park campus, built by William M. Elchbaum of Wilmington, Del., will be on display throughout winter term in the new HUB gallery area. The model, which consists of nine sections on plywood frames, is 11'9" by 15'9" in size and was built on a scale of 1" to 50'. The base for the model is Illustration board, which gives a vertical elevation of one-foot contours. Buildings were cut out of plastic material. The model took six months to construct, and arrangements for its placement in the HUB were made by the Office of Student Activities.

Back "La Vies" available

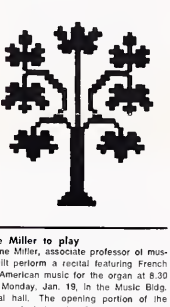
The "La Vie" staff has announced that anyone who would like to obtain past editions of the yearbook can do so by sending $5 per book to 210 Engineering D. Copies of all editions since 1947 are available with the exception of the 1970 edition. Yearbooks will be mailed within one month.

Retirement report ready

Copies of the annual report of the State Employes' Retirement System as of Dec. 31, 1975, are now available in the Employee Benefits Division, 133 Willard Building. Anyone interested in obtaining a copy should write or call (865-1473) that office directly.

Alard concert Jan. 21

The Alard String Quartet will perform quartets by Rossini, McCulloh and Brahms in concert at 8:30 p.m. Wednesday, Jan. 21, in the Music Bldg. recital hall. Rossini's "Quartet #3 in B Flat Major" will be followed by the first quartet by Byron McCulloh, bass trombonist with the Pittsburgh Symphony and senior lecturer at Carnegie-Mellon University. It is a traditional piece in three movements. Completing the program is the Brahms' "Quartet in A Minor." Alard Quartet members are Leonard Feldman, cello; Raymond Page, viola; and violinists Joanne Zagst and Donald Hopkins.



Wind ensemble to perform

A concert of 20th century American wind music will be performed by the Penn State Symphonic Wind Ensemble, conducted by Smith Toulson, assistant professor of music, at 8:30 p.m. Friday, Jan. 16, in the Music Bldg. recital hall. Featured on the program will be Persichetti's "A Lincoln Address," with narration by Robert Trehy, professor of music. The concert will open with Hanson's "Chorale and Alleluia," "When Jesus Wept" from Schuman's "New England Tryptich" and Schuller's "Meditation." Aaron Copland's "Emblems," which uses traditional folk materials in a modern way, Bennett's "Suite of Old American Dances," recalling ballroom dances of the turn of the century, selections from Leonard Bernstein's "West Side Story" and the popular "George Washington Bicentennial" by Sousa will complete the program.

Two scholarships set up

Two new scholarship funds have been established at the University in honor of former faculty members. Mrs. Wayne H. Wilson has provided a scholarship in memory of her late husband, who served as head of the Department of Landscape Architecture until his death in 1972. It will be awarded to students in landscape architecture who have achieved outstanding academic records and have financial need. The second fund was contributed by friends and students of Fred M. Coombs, professor emeritus of recreation and parks, who retired in 1972 after 26 years on the faculty. Grants will be made to superior seventh term students who have designated recreation and parks as their majors for at least three terms.

Tickets for the Feb. 6, 7 and 8 premieres of "Be Glad Then, America" will go on sale Wednesday, Jan. 28, from 9 a.m. to 4 p.m. at the Artists Series booths at the HUB and University Auditorium. Documentary filming will take place during portions of Sunday's performance. Pages 2-3 of INTERCOM this week contain several stories about the principals involved in the production.

June Miller to play

June Miller, associate professor of music, will perform a recital featuring French and American music for the organ at 8:30 p.m. Monday, Jan. 19, in the Music Bldg. recital hall. The opening portion of the program includes the Spanish composer Lidon's "Sonata in the First Mode," Guilain's "Suite of the Magnificat in the Second Mode," the prelude from Duruflé's "Suite, Opus 5" and Tournemire's choral improvisation on the Easter sequence, "Victimae Paschali." Nineteenth and twentieth century American composers featured in the final portion of the recital will be Persichetti, Stewart, Pinkham, Parker and Ives. The Stewart and Pinkham works are for organ and electronic tape.

"Hay Fever" opens

Noel Coward's "Hay Fever" opens the University Theatre's winter season in the Playhouse Thursday, Jan. 22, and will run Jan. 22-23 and Jan. 27-31. Curtain time is 8 p.m. Tickets for the comedy may be reserved at the University Theatre Box Office or by calling 865-1884.

Gallery talk

"Hugo Weber, A Retrospective Exhibition," currently on view in the Museum of Art, will be the subject of a public gallery talk by Robert H. Luck, curator of the Contemporary Wing of the Finch College Museum of Art, at 7:30 p.m. Thursday, Jan. 22, in the Museum. Mr. Luck was for 14 years a special representative of the American Federation of Arts, to which he is currently consultant and advisor. Educated at the Albright Art School of the University of Buffalo, Harvard University, and Instituti Meschini, Rome, he has been on the faculties of Parsons School of Design and the University of Toledo and was director of the Telfair Academy of Arts and Sciences and the Akron Art Institute.

Senate Report: Input sought

The University Faculty Senate is seeking input from faculty and students on two matters currently being studied by its Committee on Undergraduate Instruction.

Dr. Thomas E. Daubert, committee chairman, asked that persons having thoughts on the length of the Summer Term or the new final examination policy should relay them, preferably in writing, to him as soon as possible at 165 Fenske Laboratory.

The committee is scheduled to present its recommendations on the two issues at the Feb. 3 meeting of the Senate.

SUMMER TERM — In light of President Oswald's decision on the academic calendar, the Committee on Undergraduate Instruction was asked to study the summer term and make a recommendation on an eight or ten-week term.

Noting that a study last year found a six-week summer term to be unsatisfactory, Dr. Daubert said the Senate action would have an impact on four major groups — incoming freshmen, continuing undergraduate students, continuing graduate students and public school teachers in the College of Education's summer program.

The Committee has received student input from the President's Academic Council and has been in contact with the Council of Academic Deans. It also has received information from the Graduate School and the College of Education.

FINAL EXAMINATION POLICY — A new Faculty Senate policy for all undergraduate courses except laboratories, precticums and individual projects is scheduled to go into effect in fall term, 1976.

Under the policy, final exams must be given in all courses unless the department head grants an exception for justifiable academic reasons. Comprehensive final exams may be given only during the Final Examination Period. A non-comprehensive last exam may be given during the Final Examination Period or the last week of class if the department head grants an exception for justifiable academic reasons.

Since its adoption, the new policy has come under scrutiny, and the Senate was asked by President Oswald to re-examine the policy, clarify it and develop some recommendations.

The current thinking of the Committee on Undergraduate Instruction is to revise the new final examination policy somewhat and also to propose a general student examination philosophy.

Members of the Committee, besides Dr. Daubert, are George H. Bouwmen, Joseph F. Douglas, Robert E. Dunham, Elizabeth G. Ellis, Donald H. Ford, George W. Franz, Chester J. Gregoreski, Marjorie M. Knoll, Stephen R. Lyon, Richard L. McCarl, Andrew Pytel, Paul R. Shellenberger, John M. Simpson, Phillip E. Stebbins and Harvey W. Wall.

Senate retains amended pass-fail

The University Faculty Senate has moved to retain the amended pass-fail grading system, but deleted a requirement that all courses scheduled for pass-fail be electives.

The action came following lengthy discussion at Tuesday's Senate meeting. Further action on the Pass-Fail system is anticipated, however, as the Senate asked a subcommittee to determine exactly the definition of an elective.

In discussion of an informational report from the Senate Committee on Planning and Development, Ralph E. Zilly, vice president for business, told the Senate that new residence halls will not be constructed to meet the demand for on-campus housing.

He said the suggestion was one of four made in a housing report presented at the November meeting of the Board of Trustees and was discarded along with another on the establishment of temporary housing. He said the University is moving ahead on two other suggestions — a new reassignment policy and extension of existing space in the residence halls.

In other action, the Senate:

—Approved a revised policy on deferred grades which provides that, if for some reason beyond the student's control, a student is prevented from completing a course within the prescribed time, the grade in the course may be deferred with the concurrence of the instructor, except under emergency conditions when the instructor is unavailable, and upon authorization of the proper administrator.

—Approved a policy on corrected grades in which students have one year in which to discover any error in grading. If the original instructor cannot be contacted, the grading issue is presented to the instructor's department head for action.

—Approved a revised late course add policy under which a student cannot add a course after the 10-day add period unless it was an individualized instruction course, or a course in which the student is advised to move to a higher or lower level, or if permission is obteined from the instructor and the appropriate administrator.

—Approved a grading system for candidates for the M.D. degree. Students will be given an "H" — Honors (with Outstanding work), "P" — Passing grade, and "F" — Failing grade

Retention rate study completed

More than 82 percent of the baccalaureate degree freshmen enrolling at the University, including the Commonwealth Campuses, in the fall of 1974 were still enrolled at Penn State when the fall term began in 1975.

This is reported by Dr. T. Sherman Stanford, special assistant to the senior vice-president for University development and relations, in an updated retention study made by the Records Office.

The rate is under that of a year ago, when the University had the highest retention rate of the last seven years — 87.4 percent. The rate for freshmen enrolling in 1972, however, was the lowest for the seven-year period — 78.5 percent. Rates for previous years were 80.6 percent for the class entering in 1971; 85.7 percent for 1970; 85.6 percent for 1969; and 85.4 percent for 1968.

Analyzing the retention rates, Dr. Stanford says that those for the classes enrolled as freshmen in 1968, 1969 and 1970 were relatively stable as they progressed through the system year by year and thus were dependable in making enrollment projections.

For the class, beginning in the fall of 1971, the retention rate dropped sharply, and the following year, there was a further

(Continued on page four)

Be Glad Then America

A Decent Entertainment from the Thirteen Colonies

by John LaMontaine

This is John LaMontaine's account of his preparations for the writing of "Be Glad Then America". It will appear as part of a 44-page softcover edition of the libretto which is being published by the University. Included are the complete text which will be sung, the composer's notes on the original source materials, an introductory essay by Mr. LaMontaine, a synopsis of the work and the cast of characters. There will also be illustrations of several manuscript pages from the working score and of such original source materials as early colonial broadsides.

The colonists themselves are the ones who could have done it best; they had all the material at their fingertips marvelous, vivid, dramatic, songful materials. They lacked one essential ingredient — psychic distance.

Two hundred years later, when The Pennsylvania State University asked me to compose such a work, I tried to dodge the issue. A patriotic work? Now? Too complicated, too difficult, too time-consuming — a way to get lost in an avalanche of chauvinistic, jingoistic products for an "occasion." Respected friends convinced me that serious composers, too, owe an honest salute to those men and what they did, so I tackled it. From the first I wanted to get the ring of truth, and for that there is only one way: to go to the original sources. I would have to immerse myself in a subject for which I had little love or aptitude: history.

There was no choice but to embark on a disciplined course of reading unlike anything I had ever tried before. At first I forbade myself anything **about** the Revolution. No history books (that was easy), no essays, no commentaries, no analyses. All I wanted was the direct testimony of the time, what they said and wrote and did, as reported immediately after the doing.

The Colonies had a surprisingly large number of newspapers. New York had five, Boston six, Philadelphia four. I read issues covering a period of twelve years, from 1764 to 1776, copying by hand or machine everything that shed light on or gave color to the times. The richness of what I acquired was far greater than could ever be used. It was almost as though I lived through those times.

Next I turned to the Colonial records, and those of Pennsylvania were the best; vivid, exact language, covering every sequence of events. Sitting in the reading room of the American Philosophical Society in Philadelphia, founded by Benjamin Franklin, I found these words of 1778 that would set the tone and keynote for the drama and give it a frame. "The Supreme Executive Council of the Commonwealth of Pennsylvania took into consideration the propriety of commemorating the Anniversary of Independency now approaching, Ordered that Provison be made for a **decent entertainment** on the 4th of July next." That is what I could try to do; create an entertainment such as the colonists might have made for themselves about the events they knew so well. This started me on a long adventure. The preliminary reading alone was to take one year and one month.

And how rich it was! Everything was there, even stage directions. Thousands of pages of documents were ordered from the Library of Congress, the New York Public Library, The Library Company of Philadelphia, The Libraries of The Pennsylvania State University, The New York Historical Society. I never went to bed without a sheaf of documents and a marking pencil. Every time I found a phrase that could be sung and would advance the action, I had to underline it in red.

The newspapers had led me to the broadsides — direct testimony of events the week they happened. These handbills were tacked on fenceposts and on Liberty Trees. And the Liberty Tree itself became an important symbol where the Sons of Liberty assembled and pledged their fortune and their honor in the cause of liberty.

The speeches of the Patriots, on fire with insurrection, had to be read, the sermons, the poetry, particularly the works of Philip Freneau, who more than anyone was the Muse for America in those days — all demanded my attention. And the doggerel — it was everywhere, and everywhere delightful. My red pencil was always underlining. If I couldn't get photostats, I had to buy the books, because the marking pencil was essential. In such a sea of material, how would I otherwise ever be able to find those rich, pregnant phrases again? Writing the libretto was not only as important as writing the music, it was part of it. One grows from and into the other.

Then the laws of the time had to be tackled, probably dreary stuff. But not at all! A mother-lode! In my most extravagant dreams I never thought that in the Stamp Act and the Townshend Act (Tea) I would find fast-moving patter-songs, full of color, invention, alliteration, rhythmic bounce, delight, and humor. Setting the laws to music was as much fun as I have had.

And then the letters. What a lucid, brilliant, communicative bunch our ancestors were! And their letters were fully matched by those of King George. His twelve-volume correspondence belies everything we learned about him in school. He has been maligned by history. His ability to sum up a situation with exact, brief, and vivid clarity is the match of the ablest men of any age. His intelligence and the range of his interests were vast. And his comprehension and prescience were beyond those of all but a few of his contemporaries. His sentence, "This Island, reduced to itself, would be a poor Island indeed," foreshadows Churchill, and has the tragic-long view of history of a Seer. I realized that it was the King himself who must be considered the chief protagonist for the English side of the struggle, and that his own words would supply everything needed for his role in the drama. I came to believe that had he come to America for a first-hand view, the Revolution might never have taken place. This is the tragedy that is central to the drama: the aristocratic tradition locked him in isolation from events which he hears of but does not see, an isolation stemming from his mother's admonition, "Be a King, George, Be a King."

The letters, the laws, the speeches, the poems, the doggerel, the broadsides, the newspapers — I went to all those sources not as a scholar but as a thief, taking what I needed and enjoying the sheer fun of doing it.

All that I read served to show that our ancestors were not the plasterboard heroes we had learned to revere. Their idealism, even among the greatest, often cloaked land-grab and self-interest, their self-interest, their unwillingness to assume responsibilities, and their demand for privilege were sometimes preposterous. I felt that a picture which did not show their frequent vulgarity and destructiveness would simply not be true, and would lack the light and shadow to put their blazing idealism in strong relief. Recollection of the destruction of the home and irreplaceable papers that Governor Hutchinson had collected for a history of Massachusetts is a pain that I can't get out of mind. And yet in the end I did revere our ancestors. By their deeds and by the brilliance of their thought, they set before humanity, more clearly than ever before or since, the highest goals of men and governments.

But how was I to get all this into music? I felt confident that once I was completely immersed in the subject, the music would begin to grow from the material itself, and that in truth is what began to happen. It did not seem worthy to try to write a pastiche of the music of the period, but I did want the music to be rich in the flavor and connotations of the time. So I tried to go over all the music published in America before 1800. It must be admitted that most of it is either derivative or weak, minds were on other matters. But there was one great incredible standout: William Billings. I decided very early that something of his would become a cornerstone for my musical dramatization. The influence of Billings is strong in what I have written. His great hymn, "Chester," became the symbol for the Patriots' striving for Liberty, recurring in varied form at each step in the growth of the idea.

I recall now the excitement of discovery as I read and wrote. I had found a key. The life and vitality of Revolutionary times were to be found in what the people themselves said and wrote and did — all incomperably more vivid than anything that has been written **about** it since. It was their words alone that I set to music, their words that ignited a Revolution.

John LaMontaine

Looking at the produ

Raymond Brown

"The wonderful thing is to know that you're having one of the most exciting experiences you'll ever have, and to know it while it's happening," Raymond Brown reflects on the final weeks leading up to the production of "Be Glad Then America."

The production has special significance for the director of the University Choirs; it was his memo written five-and-a-half years ago that began the process that will culminate in the February premiere of a major new musical work. And it is Mr. Brown's 200-voice choir that will play the principal role in the production.

"They represent the people," he explains, "and after months of rehearsal, we're coming to realize that the three most important words ever written may be 'we the people' — maybe even more important than 't love you.' "

At the beginning of the work the people are divided into two groups — loyalists and rebels. Because Miss Caldwell won't decide the make-up of these groups until late in the rehearsals, the entire choir has learned both roles.

The University Choirs are well known for their on-stage appearances in concert. But the LaMontaine work is the first in which most members have ever been called upon to act as well as sing. To prepare them, Miss Caldwell initialed a program of theatre games, which requires the students to act out various situations as they perceive them.

"As we were rehearsing the music, although it was going along all right, I was never quite sure if the kids were really involved in it," Mr. Brown confides. "So I was somewhat skeptical about whether these kids, most of whom had never been on stage in their lives, would get excited by theatre games. The response has been incredible. They're totally involved."

The music totally involves Raymond Brown. "It's exciting, wonderfully exciting, and it never stops being so," he relates warmly. "I rather expect that not even John LaMontaine realizes what a good work it is.

"A tune by the revolutionary composer William Billings is repeated at various stages throughout the work," he concludes, "and we're hoping that when we get to its final appearance, the entire audience will join in singing it. I think they'll want to, and if they do, it will be just magnificent."

W. E. Crocken

Willie Crocken leaps back from a desk piled high with work and confesses: "I'm actually dreaming about it now. They're not nightmares yet, but I dream a lot."

It is no surprise that "Be Glad Then America" has invaded Mr. Crocken's sleep. It has occupied most of his waking hours for many months.

The official program will list him as general manager (a position he holds for all University and Festival Theatre productions.) In fact, on this show he has been serving as producer Walter Walter's alter ego.

To mesh all the elements of a major production in a few full rehearsals requires massive preplanning, including coordinating the activities of many different professionals not only here but throughout the east. Heading that group is Sarah Caldwell.

"Working with Sarah is an unusual experience," Mr Crocken muses. "She's an organic kind of person. She doesn't go in to a show with fixed ideas about how it should look. She likes to create and develop ideas right up until the curtain rises."

This somewhat unorthodox approach to directing has posed some problems for the production team. "For example, to date we've had Plans A, B and C with costumes," Mr. Crocken notes.

"Plan A, which was developed about three months ago, called for everyone in costume as true to the period as possible. But we're renting most of our costumes and when we went to the sources available, we found that nearly all the clothes were for middle and upper class citizens and there was practically nothing for the working classes who played such a major role in the Revolution. At the same time

from three points of view

our dressing rooms in the auditorium could accommodate only about 40 persons, with no room for the other 200 people.

"Plan B was to merge 200 years, in that some people would be costumed in the period and some would wear what we call 'Penn State mufti' — blue jeans, granny dresses and the like," he goes on. "This transitioned to Plan C, which is where we are now. Some people start in costume, but most are in mufti. However, everyone ends up with elements of costume.

"We don't know yet which members of the chorus will play which roles," Mr. Crocken adds, "so to solve this problem we've adopted the 'Cinderella approach.' We have say 50 different trunks with different parts of costumes in each. When a singer is assigned a role, we pull something from one trunk, something else from another and hope it all fits."

"We figure we'll have three weeks at the outside to do all the matching up," he concludes, "and of course, you have to remember that in planning all this we've been dealing with Sarah in Boston, the costume designer Constance Mellen in Washington, a wig-maker and makeup specialist from Illinois, six costume sources scattered throughout the east, and two assistant costumers who haven't yet been named."

Willie Crocken pauses and chuckles: "In a job like this, you learn to laugh."

One of **Bill Allison's sets**

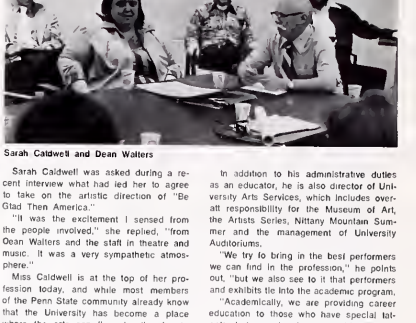
William H. Allison

Scenic designer William Allison has been part of "Be Glad Then America" from the start. As associate director of Penn State's institute for the Arts and Humanistic Studies which commissioned the work, he made the University's first official contact with composer John La-Montaine in December, 1972. This spring he met Sarah Caldwell and became set designer for the production.

Mr. Allison is a professor of theatre arts and a veteran of many design jobs here and elsewhere. But this one has been unique.

"I've found the experience different from usual scene design associations in that Sarah and I have had only intermittent contact," he says. "We'd talk about something, then go our own ways and not see each other for weeks or even months. But when we came back together, we'd find that our thoughts had been progressing very much along the same lines for both of us. It's been a strange relationship in that way, yet quite a good one."

The set for "Be Glad Then America" is the first one designed especially for a theatrical production in the University Auditorium.



"So the design was a special challenge," Mr. Allison reflects. "It's a big auditorium and a big stage, and unless the set you put in there comes to terms with the scale and proportions of the building, it's less than satisfactory. I've made every effort possible in dealing with these conditions."

The show has a big cast as well. "We have 240 singers," Mr. Allison notes, "and we had to make room for them to move about and use the auditorium. At the same time, though, we need a set that works well when an individual or small group takes command onstage. That bridge from very large groups to the individual has been one of the most difficult aspects of the design problem."

Mr. Allison did most of the design work at Penn State, but the set was built in Miss Caldwell's shop in Boston. He travelled there frequently to supervise construction and to do the painting.

After months of close association with the show, does he have a particular moment that he is waiting to see? "Not really; I've tried to approach the whole work equally as a design problem," he explains, adding, "but I think the audience will particularly enjoy the Battle of Lexington. It'll have explosions and smoke effects and should be a fine, noisy spectacular climax to the evening. I find that in meetings where we dwell on this scene, Sarah begins to talk of it with a special kind of excitement. She seems to take particular delight in it and sees it all banging and lighting and whirling."

The arts — a new atmosphere

Sarah Caldwell and Dean Walters

Sarah Caldwell was asked during a recent interview what had led her to agree to take on the artistic direction of "Be Glad Then America."

"It was the excitement I sensed from the people involved," she replied, "from Dean Walters and the staff in theatre and music. It was a very sympathetic atmosphere."

Miss Caldwell is at the top of her profession today, and while most members of the Penn State community already know that the University has become a place where the arts can flourish, it's nice to hear a demanding professional confirm it. It hasn't always been that way.

As recently as the early fifties, there was no crossbreeding in the arts at Penn State. Indeed, powerful department heads actively blocked efforts at cooperation; there was no real Artists Series — only a few outside performers visited the campus; art exhibits were rare events; and adequate theatrical facilities did not exist.

"In any arts endeavor, there has to be somebody who pushes like hell," says Dean Walter H Walters of the College of Arts and Architecture. And during his 25 years at Penn State, Dean Walters has done his share of pushing to create the environment which initially attracted Sarah Caldwell.

Penn State's School of the Arts — including departments of art, music and theatre — was founded in 1956, with the late Albert Christ-Janer as director.

"When Albert came, he had some very conservative people to deal with," Dean Walters recalls. "He was sometimes rash, and he became very controversial. But he really sparked something great for the University, and we owe him quite a debt."

Dean Walters thinks that perhaps the most significant break for the arts occurred in 1958 when Mr. Christ-Janer got the Mateer family to give Penn State $10,000 to lease the Standing Stone Playhouse, a popular summer stock theatre located near Neffs Mills, about 18 miles from State College.

"There was a great deal of suspicion in other areas of the county that professionalism would go down the drain after we took over Standing Stone, and at first the audiences stayed away in droves," Dean Walters continues. "I was head of theatre arts at that time, and we had to prove that the University could be in with a professional company and produce good shows.

"Well, we did, and pretty soon we were being offered every barn on campus to use as a theatre. McKay Donkin, the late vice president for finance, got the idea for converting the stock pavilion to a theatre and also helped gather funds for the arts complex."

The next important step for the arts came in 1963 with the creation of the College of Arts and Architecture. Jules Heller was its first dean.

"Having a College brought the educational aspects of the arts into focus," Dean Walters notes. "It is very necessary to provide the right combination of the professional and educational in the arts. Because of unions, contractual obligations and stars, there has to be a separation between the two areas, but one person should be able to administer both."

A native of Troy, Ala., Dean Walters has moved easily between the two areas. He has a Ph.D. in literature and drama from Western Reserve and has written, directed and acted in the theatre.

In addition to his administrative duties as an educator, he is also director of University Arts Services, which includes overall responsibility for the Museum of Art, the Artists Series, Nittany Mountain Summer and the management of University Auditoriums.

"We try to bring in the best performers we can find in the profession," he points out, "but we also see to it that performers and exhibits tie into the academic program.

"Academically, we are providing career education to those who have special talents, but we also have an obligation to those students who will one day be voters or civic leaders — in other words, to the general public. So we teach more than 26,000 students a year in our arts courses, I know of no other university where the arts are that integral a part of the curriculum or are taught on that scale.

"I think that over the last ten or fifteen years, the arts have also become very much a part of the life of the surrounding area. We have such strong and successful community programs as the Central Pennsylvania Festival of the Arts, which I consider the best of its kind in the Commonwealth. I wonder without the visibility that the University has given to the arts if it would be as strong as it is."

Dean Walters — he assumed his present post in 1963 — believes that the University's isolated location has actually been a plus in the growth of the arts at Penn State.

"Because we're not in a metropolitan area where a lot of things are going on, we have to create art for ourselves," he explains. "We wouldn't have a professional theatre if we were in a city, and our Museum wouldn't do the shows it does. There are some disadvantages, of course. Right now, we're having trouble arranging to get critics in for the premiere of 'Be Glad Then America' because of the transportation difficulties."

One of the achievements of which Dean Walters is most proud is his founding of Nittany Mountain Summer, which for the last two years has brought the Pennsylvania Ballet and its ballet school to campus for three weeks and the Pennsylvania Orchestra short sleeve concerts. It has presented the popular Renaissance Band, and sponsored a series of special Pennsylvania-geared exhibits at the Museum of Art.

"A great university has an obligation to extend itself during certain times of the year when the population makes it different," Dean Walters says. "I believe that Penn State should grow to be the leading center for the performing and visual arts in the State.

"We have had great support from the University administration; our Office of Gifts and Endowments has really helped elevate the arts; and we are getting recognition outside, too. Our students are well received wherever they go. And when the National Association of State Universities and Land-Grant Colleges recently established a Commission on Fine Arts, I was named as the first chairman. The College student and faculty concerts and exhibitions have never been better or more popular. Our Artists Series has practically sold out the last two seasons, and our audiences have become more and more discriminating. The Museum attendance increases at the rate of over 30 percent a year. Auditorium use is booming. Just try to get a ticket to the Festival Theatre!

"Ideally this is the way it should be. The arts are essential in a good society; they are absolutely normal and necessary."

Excerpts from Sarah Caldwell

On "Be Glad Then America":

What's most interesting about the production is that it's a unique situation, a collaboration between a great symphony orchestra, a university and an opera company. It's a healthy situation, the kind of thing we'll see more and more of.

On the Bicentennial:

The Bicentennial is a passing event, maybe an important event, and it certainly should be properly celebrated artistically. It is not being celebrated artistically in many parts of the country because the funding has been very disappointing. This ("Be Glad Then America") is one of the few Bicentennial events which is completely appropriate to the occasion. It's a distinguished piece which has grown out of a real concern for those events which led up to the Revolution. It's the product of a great deal of research and imagination and will certainly have a place in our literature.

On the score:

I find it difficult to talk about music; it's often misleading. But this piece has some very interesting aspects. I think it's fun that we have a very distinguished British tenor, Richard Lewis, to sing the role of King George; it will help create a sense of reality. Then Donald Gramm, who is one of the most talented singing actors in the world, is creating a vast gallery of American patriots — Thomas Paine, Samuel Adams, Patrick Henry, a tea addict, a minister, etc. The Muse of Liberty is a folksinger. I think the piece is a little bit Brechtian. It's anecdotal, but it all adds up to a musical, dramatic collage of emotion that leads to a real burst of rebellion. The only thing I don't like about the piece is its name. I wanted to call it "The Revolution."

On getting into State College:

I don't understand why a great and famous university with an enormous student body seems to be serviced by only one bus.

University Park Calendar

January 15 - 25

Items to be included in this calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, Jan. 15
Commons Videotape, 12 noon, Kern lobby
FSHA 410 dinner, "Renaissance Italy," 5:30 p.m., Maple Room, Henderson Human Development. Reservations: 865-7441.

Friday, Jan. 16
Penn State Symphonic Wind Ensemble, 8:30 p.m., Music Bldg. recital hall.
GSA Commonplace Coffeehouse, 8 p.m., Room 102 Kern.
Recreation and Parks Society Professional Careers Conference, 8 a.m.-5 p.m., HUB ballroom.

Saturday, Jan. 17
Sports: Men's basketball, vs. Muhlenberg, 2 p.m., Rec. Bldg. Women's and men's bowling, PSU Invitational, 3 p.m., Rec Bldg. Women's and men's swimming, vs. Pittsburgh, 2 p.m.
Un-Common Dinner-Theatre, "6 Rms Riv Vu," 6:30 p.m., Rooms 102 and 112 Kern.
Campus 4-H Club '50's Record Hop, 7 p.m., HUB ballroom.

Sunday, Jan. 18
Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Hugh Brooks, recreation and parks
Black Christen Fellowship worship service, 11 a.m., Walnut Bldg. Cultural Center.
Marilyn Manning, flute, 3:30 p.m., Music Bldg recital hall
Un-Common Dinner-Theatre, "6 Rms Riv Vu," 6:30 p.m., Rooms 102 and 112 Kern.

Monday, Jan. 19
Library Seminar, "Education Reference Materials," 7 p.m., Room W110 Pattee.
Sports: Men's basketball, vs. Gettysburg 8 p.m., Rec Bldg.
June Miller, organ, 8:30 p.m., Music Bldg. recital hall.

Wednesday, Jan. 21
"Noondays" devotional period, 12 noon, large chapel, Eisenhower Chapel.
Sports: Men's and women's bowling, PSU Invitational, 1 p.m., Rec Bldg.
FSHA 410 dinner, "France," 5:30 p.m., Maple Room, Henderson Human Development. Reservations: 865-7441.
University Theatre, "Hay Fever," special student preview, 8 p.m., Playhouse Theatre.
Alard String Quartet, 8:30 p.m., Music Bldg recital hall.

Thursday, Jan. 22
Commons Videotape, 12 noon, Kern lobby
FSHA 410 dinner, "Early England," 5:30 p.m., Maple Room, Hendeison Human Development. Reservations 865-7441.
Gallery talk Robert H Luck, curator, Finch College Museum of Art, on "Hugo Weber· A Retrospective Exhibition," 7:30 p.m., Museum of Art
University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.

Friday, Jan. 23
Campus 4-H Square Dance. 7:30 p.m., HUB ballroom.
University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.
GSA Commonplace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, Jan. 24
Sports: Women's fencing, vs Ohio State 9 a.m., White Women's basketball, vs Ithaca, 2 p.m., White. Men's basketball vs. West Virginia, 2 p.m., Rec Bldg. Men's fencing, vs. William Paterson, 2 p.m., Rec Bldg. Men's swimming, vs Bloomsburg State, 2 p.m. Men's and women's gymnastics, vs. Ohio State, 2 p.m., Rec Bldg.
University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre
PSU Symphony Orchestra, 8:30 p.m., Schwab.

Sunday, Jan. 25
Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Robert A. Raines, director, Kirkridge Retreat and Study Center, Bangor, Pa.
Black Christian Fellowship worship service, 11 a.m., Walnut Bldg. Cultural Center.
Alpha Chi Omega "Greek Sign," 2-4 p.m., HUB ballroom.
Artists Series, Igor Kipnis, harpsichordist, 8:30 p.m., Schwab.

Seminars

Thursday Jan. 15
Chemistry, 12:45 p.m., Room 333 Whitmore. Manfred A. Biondi, University of Pittsburgh, on "Atomic Collision Phenomena Retailing to Lasers and Planelary Atmospheres."
Physics, 3:50 p.m., Room 117 Osmond. R. Arnowitt, Northeastern University, on "Gauge Theories and Supersymmetries."
Statistics, 4 p.m., Room 75 Willard. Gregory Reinsel, Carnegie-Mellon Institute, on "Estimation of Linear Time Series Models."
Meteorology, 4 p.m., Room 26 Mineral Sciences. Alan Dittenhofer on "Precipitation Chemistry of Western New York."
Mathematics, 4 p.m., Room 116 McAllister. John Steal, SUNY at Buffalo, on "Logic."
Computation Center, 7:30 p.m., Room 105 Osmond. "Mathematical Programming (4)."
Ceramic Science, 11 a.m., Room 301 Mineral Industries. David C. Lynch, graduate assistant, materials science and engineering, MIT, on "Kinetics of the Desulfurization of Large Particles of Calcium Sulfide in Oxidizing Almospheres — a Preview Look."
Anthropology, 3:30 p.m., Room 107 Social Science Bldg. Dr. Frederick R. Matson, archaeology, on "Traps and Clues for Anthropologists Speaking at Professional Meetings."
Philosophy, 4 p.m., Room 167 Willard Edward G. Ballard, Tulane University, on "Phenomenology of Time."
Ionosphere Research Lab., 4 p.m., Room 329 Electrical Engineering East. Manfred A Biondi, University of Pittsburgh, on "Laboratory Determination of Temperature Dependence of Reaction Rates of Aeronomical Interest."

Friday, Jan. 16
Bioengineering, 3 p.m., Room 329 Electrical Engineering East. Dr. R J. Forstiom, mechanical engineering, University of Minnesota, on "Fluid Mechanics and Atherosclerosis."

Monday, Jan. 19
Computation Center, 7:30 p.m., Room 105 Osmond "PSU Structured WATFIV (1)."
Entomology, 4 p.m., Room 204 Patterson. Dr. G. L. Bush, Erie County Research Lab., on "Grape Insect Research in Pa.: Past, Presenl and Future."

Tuesday, Jan. 20.
Plant Pathology, 9:45 p.m., Room 213 Buchhout. Donna Evans on "Morphological Resistance."
Water Pollution Control. 2 20 p.m., Room 101 Chambers. "Subsurface Disposal Systems — Selection and Treatment"
Aerospace Engineering, 4 p.m., Room 232 Hammond. M. C. Cheney, Chief, Aerodynamics Section, United Technologies Research Lab., East Hartford, on "Helicopters. How Much Moie R&D?"
Inorganic Chemistry, 8 p.m., Room 33 Whitmore. Di George Shier, Dow Chemical Co., on "Palladium Catalyzed Reactions of Allenes."

Wednesday, Jan. 21
Biochemistry, 4 p.m., Room 101 Althouse. Kenneth Drehei on "Structural Analysis of Immunoglobins."
Fuel Science, 4 p.m., Room 244 Deike. Swadesh Raj, graduate student, on "Chemical Structural Parametels of Coal."

Thursday, Jan. 22
Chemistry, 12:45 p.m., Room 333 Whitmore. Karl McDow, Princeton University, on "Studies in Stereochemistry."
Joint Physics and Astronomy Colloquium, 3.50 p.m., Room 117 Osmond. D. H. Koch, astronomy, University of Pennsylvania, on "Stellar Polarization Effects and Circumstellar Scattering in Binary Stars."
Computation Center, 7:30 p.m., Room 105 Osmond. "PSU Structured WATFIV. (2)"

Exhibits

Museum of Art: Recent Sculptures by John Cook. Hugo Weber: A Retrospective Exhibit.

Zoller Gallery: Student Paintings and Ceramics Exhibition, through Jan. 17. Student Sculpture Exhibition, opening, Jan. 18.

HUB Gallery: Free U Art Show. Mike Lorentino through Jan. 17. Jack Tait, American Profiles of Merchant Seafarers, 1794-1803 (Smithsonian Institution), opening Jan. 18

Kern Gallery: Central Pa. Scholastic Art Show.

Chambers Gallery: Musical Instruments.

Hammond Gallery: Selected projects by Mitchell/Giurgola Architects, Philadelphia and New York, through Jan. 19.

Meetings

Monday, Jan. 19
Color Slide Club, William Davis on "Selection, Staging, and Judging a Photographic Show." 7:30 p.m., Room 112 Kern.

Tuesday, Jan. 20
GSA Council, 7 p.m., Room 101 Kern.

Tuesday, Jan. 20
Senate Council, 2 p.m., Room 101 Kern.

Films

Wednesday, Jan. 21
GSA Commonplace Theatre, "I Am a Fugitive from a Chain Gang," 7:30 and 9:30 p.m., Room 112 Kern.

Saturday-Sunday, Jan. 24-25
Hillel Foundation film, "Kazablan," 7:30 and 9:30 p.m., HUB assembly room.

Staff vacancies

Staff vacancies contained in this publication are those which generally require at least a baccalaureate degree or equivalent as a minimum educational qualification. Staff vacancies requiring less than the baccalaureate degree as well as those announced in the Intercom may be found in the Penn State Reporter.

This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (Network Line 475-1387) Applications for these staff vacancies will be received until 5 p.m., **Thursday, Jan. 22. Do not contact the area that has the vacancy**

PROJECT ARCHITECT, PHYSICAL PLANT — University Park

Develop drawings and specifications for maintenance, alterations and selected NEW construction projects for the University, including development of details, selection of materials, and construction methods and specifications. Duties include the supervision (as directed) of other design and engineering personnel in the development of plans and specifications. Bachelor's degree or equivalent in the field of architecture or architectural engineering, plus two to four years related experience as an architectural designer and draftsman. Applicant should also possess a working knowledge of structural and mechanical systems. Applicant should be a registered architect, or equivalent. Some supervisory experience is also desired.

MECHANICAL-ELECTRICAL DESIGNER, PHYSICAL PLANT — University Park

Design and prepare working drawings and specifications for a variety of systems such as heating, ventilating, air conditioning, plumbing and electrical. Prepare special studies and written reports as required. Bachelor's degree and two to four years' directly related experience in the development of mechanical and electrical designs for the building trades. Superior drafting ability essential

PROGRAMMER ANALYST, COLLEGE OF AGRICULTURE — University Park

Confer with project personnel to determine the objectives of the study, anticipated results, degree of confidentiality and use of project data. Develop new computer programs and upgrade, maintain and adapt existing programs. Plan logical steps to solution of problems, use of computer systems components, input and output data formats and translate plans into computer instructions. Advise and assist researchers in the efficient execution and the debugging of programs. Analyze projects with large data sets to arrive at reliable time and estimates by predicting an adequate number of the appropriate type of personnel and estimating the necessary machine time. A bachelor's degree with a major in mathematics, statistics or computer science or equivalent and from one to two years of related programming experience is required.

COORDINATOR-RESEARCH FUNDS, COLLEGE OF EARTH AND MINERAL SCIENCES — University Park

Responsible to the Associate Dean for Research for administrative and staff functions in the business operations of sponsored research in the College of Earth and Mineral Sciences and for other related duties. Bachelor's degree in business administration or equivalent and over two and up to including four years of effective administrative experience is required.

Retention study

(Continued from page one)

decline to the low of 78.5 percent. The decline in retention also was evident for other classes.

This general loss in retention was a national phenomenon experienced at many other universities across the country.

For unexplained reasons, there was a sharp increase in retention at the end of the first year for freshmen entering in 1973, the rate being 87.4 percent, which resulted in a surprising increase in enrollment figures for the fatt term of 1974. A decline to 82.3 percent was reported tast fatl for freshmen who entered in 1974

"The only consistency in the student retention rates," Dr. Stanford says, "Is the inconsistency."

Di. Stanford's study also ind.cated that after four years, 57.9 percent of the class entering in 1968 had graduated, and by the next year, 65 percent had gradualed. A total of 2.2 percent had graduated at the end of three years.

Graduation rales foi oiher classes were. 1963, 2.7 percent aller three years, 52.1 percent after four years, and 63.7 percent after five years. The class entering in 1970 showed 5.2 percent; 57 percent; and 62.9 percent. For the class entering in 1971, only 47.4 percent had gradualed by 1975, after four years, reflecting the loss in retention beginning in 1972

Call 865-1372 for further information

(210-2) The U.S. Army Research Office (ARO) has issued an update to its publication, **Basic Research Problems of the U.S. Army.** Another brochure, **Basic Research Grants & Contracts,** acquaints scientists with the ARO basic research support program. The **Basic Research Proposal Form** (ARO Form 61, Revised) should be completed (program regulations are contained in **R&D Grants to Nonprofit Organizations for Support of Scientific Research**) (AR. No. 70-5, 6/1/73)

(210-3) The closing date for **OE demonstration centers for the physically disabled** has been extended from Jan. 15 to Feb. 20. (Pbl. 41FR03, 1/5/76) (CFDA 13.520).

(210-4) Feb. 15 is the deadline for **NASA & ASEE Summer Faculty Fellowships** for faculty who are U.S. citizens and (preferably) have two years of teaching experience. Two general programs are offered: **engineering systems design** and **aeronautics and space research.** For application forms and information, call the American Society for Engineering Education (202-293-7080).

(210-5) Deadline date for the **USAF-ASEE Summer Faculty Research program** is Feb. 1. The prog.am is open to U.S. citizens, preferably with two years of teaching experience with a Ph.D. About 50 appointments will be made, 20 at Wright Patterson AFB and 30 at other locations. For the Wright Patterson program, call Dr. Cecil O Bailey at Ohio State (614-422-1188, for the non-WP program, call J. Fred O'Brien, Jr. at Auburn (205-826-4370) (Ref. ASEE announcement)

Obituaries

Ridge Riley, who retired in 1970 after 2 years as executive secretary and treasurer of the Alumni Association and who since 1971 has been a trustee of the University died Jan. 6 in State College at the age of 68. Following his graduation from Penn State in 1930, Mr. Riley served as manager of the Student Union and graduate manager of student publications and from 1934 to 1943 was director of sports information and assistant director of the Department of Public Information. He moved to the Alumni Association in 1943. In 1938 he initiated a Football Letter for Alumni Association members, and he continued to write the letters each week during football season — his letter on the Sugar Bowl was completed the day of his death. He was also finishing work on a book on Penn State football, scheduled for publication next fall. Mr Riley was responsible for many innovations in alumni affairs, including the Alumni Fund, the annual Alumni Institute, the Alumni Memorial Scholarship and Loan program, and a "tune-in" to foster better understanding between students, prominent alumni and trustees.

Clarence A. Ellsworth, an associate professor of industrial engineering at the University and a member of the faculty for 28 years, died Jan. 4 at the Williamsport General Hospital. Born May 14, 1913, in Meshoppen, Pa., Mr. Ellsworth received his bachelor's degree in industrial education from Penn State and a master's degree in industrial arts education from Colorado State College. He was a Navy veteran of World War II, serving es a lieutenant commander.

No open committee meetings

Ulerich new Trustee head; President's contract extended

William K. Ulerich, of Clearfield, newspaper publisher and broadcasting executive, fast Saturday was unanimously elected to a one-year term as president of the University Board of Trustees.

The trustees also approved the extension of iha employment contract of President Oswald, for an additional five years. Under the action, Dr. Oswald's contract is extended from July 1, 1978, through June 30, 1983, on the same terms and conditions contained in the present employment contract.

"I cherish the confidence this implies," said Dr. Oswald, "and promise my continuing total commitment as I continue in this role."

Voting on a resolution to open to the public meetings of the Board of Trustees' ihree standing committees, members deadlocked by a 13-13 count. Under the action, standing committee meetings will continue to be closed, except to invited students and faculty.

Mr. Ulerich served as vice-president of the Board for the past three years and succeeds Michael Baker Jr., of Beever, who has held the post since 1973 and who was not a candidate for re-election.

Mr. Ulerich, who was first named to the Penn State Board in 1951, will be succeeded as vice-president by J. Lewis Williams, of Uniontown, who has been a trustee sinca 1955 and for the past 16 years has served on the Executive Committee of tha Board.

Other officers named are Dr. Oswald, as secretary of the Board, with Dr. Richard E. Grubb as associate secretary; and Eleanor Ferguson and Mary Lou McCorkle, as assistant secretaries. Robert A. Patterson was re-elected as treasurer with William F. Christolters named as assistant treasurer of the Board.

Trustees elected to the Executive Committee are Mr. Baker; John R. Pitzer, Aspers; G. Albert Shoemaker, Pittsburgh; and Dr. Helen D. Wise, State College.

Re-elected to the Committee were H Jesse Arnelle, San Francisco, Calif.; Dr. Helen Davies, Philadelphia; George H. Deike, Jr., Pittsburgh, Charles T. Douds, Camp Hill; Ralph Hetzel, Kent, O.; J. Lin Huber, St. Thomas, and Rep. Joseph Rhodes Jr., Pittsburgh.

The president of the Board and president of the University serve as ex officio members of the Executive Committee.

All terms are for one year.

A 1931 graduate of the University who was honored in 1969 as a Distinguished Alumnus, Mr. Ulerich currently is publisher and president of The Progress, Clearfield, and the Danville News in Danville, Pa., and chief executive officer of four community AM radio stations and four community FM radio stations located in Clearfield, State College and Indiana, Pa., and Naples-Marco Island, Fla.

He is a past president of the Pennsylvania Newspaper Publishers Association and the Pennsylvania Associated Press and received the Distinguished Service Award of the Pennsylvania Newspaper Publishers Association, the Pennsylvania Society of Newspaper Editors and the Penn State School of Journalism in 1960.

He has been a member of the Penn State Board of Trustees from 1951 to 1957 and from 1964 to the present time under appointments from Governors Fine, Scranton, Shafer and Shapp.

Governor Shafer appointed Ulerich to the Pennsylvania State Board of Education in 1969 and he served on the Board's Council of Higher Education until December, 1974, when he resigned.

As an undergraduate, he was editor of the Penn State Collegian, student newspaper. He also served as vice president of the Student Council his senior year, was a member of Lion's Paw and other campus activity and scholastic societies, earned second honors scholastically and was one of ihree senior activity honor men in his graduating class.

After a year as a reporter for the Huntingdon Daily News, Huntingdon, Pa., Ulerich returned to State College as assistant editor of the weekly State College Times, which he helped to change to the Centre Daily Times of State College in 1934. He was editor and associate publisher of the Centre Daily Times until 1946 when he and others purchased the Clearfield Progress and he moved to Clearfield to become ihat newspaper's publisher.

Ulerich was a part-time instructor and assistant professor of journalism at Penn State for 12 years. He also served on the Penn State Alumni Council's executive board for more than 10 years and as presi-

(Continued on page four)

Penn State's people, resources praised highly by new Trustee leader

Mr. Ulerich mede the following statement in his acceptance of the presidency of the Boerd of Trustees following his election at the Saturday meeting of the Boerd:

"Thank you for the confidence you have shown in electing me to the office of president of the Board of Trustees.

"I weil raalize the responsibility attendent to this office and I accept it.

"We owe a debt of thanks to Mike Baker for his courageous, dedicated and knowledgeable conduct of this office during these past three years and I personally am indebted to him for his unfailing practice of keeping me informed as vice president on matters concerning the University. My congratulations to you, Mike, for the service you have rendered to your elma mater and the people of Pennsylvania.

"While this is a rewarding experience for me today, I am saddened that my friend of 46 years, Ridge Riley, is not here. He had urged me to be a candidate for this office although in typical Riley fashion he said he couldn't understand why anyone would want it. I was pleased to read the many tributes about him and he deserved every one.

"It is seldom that I have had the opporfunity to have such a spirited group as you trustees as e captive audience and this may be the one time you'll permit a few remarks without too much impatience for the hour on with the remeinder of today's meeting.

"On an occasion such as this, an incoming president has two tacks he may pursue. He or she may invelgh against the public which appears to have relegated education to a fourth or fifth place in its scale of priorities, the generel epathy of our citizens occasioned by the times, the vagaries of youth and the persistence of doomsday seyers emong university scholars that we are approaching another Dark Age where the lamps of knowledge will flicker out all over the world and the modern hordes of dictetor-led forces will engulf us.

"Or on the other hand, one can be e pollyena end we will wake up in the morning with the line from the poem which says 'ell's right with the world'.

"I think our course here at Penn State is somewhere in between and right now our University's progress and development should be uppermost if we are to serve well as trustees. And when I say Penn State or the University, I include not just the main campus but our Commonwealth Campuses and our far flung Continuing Educa-

William K. Ulerich

tion installations.

"Let's take a few moments and inventory our assets as we face the problems of financial stringency, public disinterest, legislative scrutiny, youth's disaffection with college as it seeks other goals and the yearly guessing game of enrollments which no longer can be predicted on births, high school graduate numbers end other former constants.

"Under John Osweid's leadership, with e deserved bow to Milton Eisenhower and Eric Walker, Penn State hes become e truly great national university and is so recognized not only in ecademic circles but in legislative halls at Washington and Harrisburg Dr. Oswald's active participetion in prestigious associations of his peers has meant a great deal to our image everywhere. This year for instance he leeds two top-flight educator groups — perhaps the leading ones nationally and in the state of Pennsylvanie. While striving to bring together in the cause of education in general the public and private insitutions of the state, he has still maintained Penn State's recognized leadership.

"President Oswald has leibored diligently to establish and improve communications with faculty and students, and encourage in spite of a number of discouragements, participation of these groups in university affairs without retinquishing the final authority so necessary if a university president is to lead and not be swept along by pressures popular at the time.

"Now for a few more plusses—mentioned in approximately alphebetical order as each is most important.

"Dr. Oswald is backed by a dedicated, capable and diligent administrative staff which puts in many long hours — I suspect much more than their counterparts in industry and government, women and men who would make their way most successfully if they had chosen other paths and other pursuits.

"In the past few years the alumni of Penn State have developad a strong organizaton not only in membership but also in top drawer leadership by top drawer men and women. This group has become an invaluable asset to the University and it is an independent group, not puppets to dance to an administration string. It is a force the University will come to depend on more and more in the future.

"I do not hesitate to state unequivocally that although our student body has grown rapidly, our faculty today detivers quetity education at the highest level in the University's history. This not only includes the time-honored fields but also in the rapidly emerging new philosophies and techniques and theories which play such an important part in our daily lives. The University Senate has estebiished itself es a responsible deliberative body cognizant of its role in relation to governance of the University and in cooperation with the administration.

"The Hershey Medical Center of The Pennsylvenie State University has established itself — almost miraculously for such a short period of existence —as one of the leading and one of the most innovative medicel schools in this nation.

"Unsung but appreciated by so many is the work of the maintenance personnel who make the campus a joy to visit and soften the hearis of the most hardened campus critic, especially on a young spring day or a drowsy autumn afternoon. I have no comment regarding Happy Valley when 8-inch snows and icy streets envelop us.

"I mentioned that these accolades were being distributed alphabetically — hence the delay in mentioning the students who really are the fundamental reason why the University and we trustees are here. When student leedersip desires, it can make a great contribution to this institution and the tendency appears to be that currently there is a desire to work within the framework developed by the administration with student end faculty cooperation but still maintaining that netural skepticism of youth accompanied by impatience with the slowness of action of us greybeards.

"I think that studenis are better educated than ever before — if they take advantage of the opportunities to gain an education. They have been accorded privileges of adults — their destiny here is largely in their own hands.

"Student generations change constently, influenced so much by outside changes, so no one knows what the future will bring.

"So, my friends on the Board, we do have strong resources and I would be derelict if I did not include you, the trustees, as the most valu

"This is an articulate Board, I think you'll agree, and it is undoubtedly the most varied group we have aver hed — et least in many years — in respect to philosophies, goals end different approaches to problems. We have arrived here by different routes — elections by our peers, appointment, and ex-officio membership by reason of office.

"I believe, however, that all of you subscribe to the dictum that you are here to do your best to serve The Pennsylvania State University in a leadership role.

"Make no mistake. We will continue to have problems here because these are difficult times and we may or may not resolve any of our goals, but when the record is written of the Board, let the record read, 'they tried.' "

Tom Wolfe speaks on new journalism

Colloquy will sponsor e program on "Journelism — Who Needs It?" during the week of Jan. 25.

Featured speekers will be Tom Wolfe, a leading exponent of the "new journelism," end Jack C. Landau, U.S. Supreme Court reporter for the Newhouse News Service.

The Colloquy program will open with a panel discussion on "The Press, the Bar, end the First Amendment" at 8 p.m. Sunday, Jen. 25, in Room 112, Kern Graduete Bldg.

Panelists will be Landau, who is founder and trustee of The Reporters Committee for Freedom of the Press; Centre County Common Pleas Court Judge R. Peul Campbell, and Virginie B. Eisenstein, State College attorney. Conneld L. Smith, associate professor of journelism, will be the moderator.

At 8:30 p.m. Monday, Jen. 26, in the Hetzel Union Bldg. reading room, "The Lighter Side of Redio" will be discussed by Mickey Bergstein, general menager of Radio Stetion WMAJ, and Robert Zimmerman and Fred Honsberger, of Redio Stetion WRSC.

A penel discussion on "Women, Minorities and the Media" is scheduled for 8 p.m. Tuesday, Jan. 27, in the HUB mein lounge.

Wolfe will speak on "Journetism: New, Old, and Non" et 8 p.m. Wednesday, Jen. 28, in Schwab Auditorium.

An open house of WHR Radio Stetion in Waring Hall will be held from 2 to 4 p.m. Thursday, Jen. 29. The program will close with a Collegian Workshop et 8 p.m. in the HUB mein lounge. Edtors of the Daily Collegien will discuss its problems and philosophies in terms of the campus and the world.

Landau, a greduate of Harvard College and New York University Law School, has worked for the Associeted Press, Washington Star, Washington Post and the Oepartment of Justice. A Nieman Foundation Fellow at Harvard University in 1968, he is a three-time recipient of the American Bar Association Public Service Merit Award.

Wolfe was graduated from Washington and Lee University and received a doctor of philosophy degree in American studies from Yale Univertsity. He has worked as a reporter for the Springfield, Mass., Union, Washington Post and New York Herald Tribune, and has written extensively for New York Magazine, Esquire, and Harper's Bazaar.

One of the first journalists to utilize literary devices formerly reserved for fiction, he is the author of "The Kandy-Kolored Tangerine-Flake Streamline Baby," "The Pump House Gang," "The Electric Kool-Aid Acid Test," "Radical Chic and Mau-Mauing the Flak Catchers," and "The Painted Word."

Program receives an accreditation

The Oepartment of Nursing of the College of Human Oevelopment has been granted accreditation for its graduate nursing program by the National League for Nursing.

The NLN's Boerd of Review for Baccalaureate and Higher Oegree Programs voted last month to grant initial accreditation to Penn State's graduate nursing program effective immediately, and retroactive to the 8-month period prior to the Board's decision.

The newly accredited program includes a master of nursing degree program, which prepares students as specialized nurse clinicians, and a master of science degree program which stresses scholarship and research.

According to Or. James Repella, acting head of the department, the ection of the NLN review board is the culmination ol several years of effort by nursing faculty to provide enother needed professional dimension to the health care field. "Many people have spoken to the need for nursing professionals to assume new roles in the provision of primary health care, in addition to nurses' traditional roles in support ol doctors," Or. Repella notes. "We have designed a program to prepare nursing professionals who have the specialized and sophtsticated skills necessary to hill those roles."

Second round arranged for interchange program

A second ro.nd of awards in the University's "Faculty Interchenge Program" will be mede for use during the spring and summer terms.

According to Joseph F. Cougles, associate dean of academic instruction for Commonwealth Campuses, approximately eight awards will be made for spring term and approximetely 12 awards for the summer term.

"The larger number of awards can be made," he said, "if temporary teaching appointment costs can be kept at a minimum through bilateret teacher exchenges in particular subject erees."

The Faculty Interchange Program was intrieted in the 1974-75 academic year end is supported by the Scholarly Activites Fund administered by the Office of the Oean of Academic Instruction for Commonwealth Campuses.

Under the program, faculty members assigned to one campus of the University may spend a term in residence at another campus in the system. Participents may be in the process of completing research, pursuing some creative project, doing special advanced study, retraining for competence in e new or different field, assisting in special course development work, or some other academically/scholarly oriented endeavor.

Oean Oouglas said faculty members and those graduate students with a special interest in teaching are urged to establish their descriptive proposals in formal order.

Interested faculty members should first discuss their basic proposel plans with their local academic officer. Once an understanding is reached, the faculty member should contact the appropriate academic officer at the target campus to dlscuss the resources available for accomplishing the objective.

If a go-ahead is indicated, the faculty member should submit a formal application through the home-bese campus for consideration of an award.

Applicetion forms containing information on financial errangements for successful applicants currently are being prepared. The forms are to be distributed to departmental offices and to offices of academic officers at the Commonwealth Campuses during the week of Jan. 26.

Official sought at Wilkes-Barre

Or. Robert G. Oulnn, dean of acedemic instruction for Commonwealth Campuses, end George Bierly, director of the Wilkes-Barre Campus, have announced the establishment of the position of associate director for acedemic affairs at the Campus.

The associate director for academic affairs will serve as the chief academic officer of the Campus. This individual will, under the supervision of the Campus director, be responsible for providing leadership and developing and maintaining academic programs in resident and continuing education. Other areas of responsibility include local community academic needs, planning, recruitment, assignment, evaluation and development of faculty, student development programs, course scheduling and records and participation in other Campus and University activities.

Applicants for this position are expected to have a doctoral degree and a minimum of five years of experience in teaching and administraton of higher education.

Letters of nomination or letters of application should be directed to Or. Quinn, 111 Old Main Bldg., University Park, Pe. 16802, by Feb. 27.

WPSX highlights

Sarah Caldwell, highlighted in last week's intercom for her work with "Be Glad Then America," to be performed next month at the University, is featured in an hour-long conversation with Edwin Newman on **Speaking Freely** Saturday, Jan. 24, at 8 p.m. Ms. Caldwell, founder and director of the Opera Company of Boston, will discuss her struggles to keep the Opera Company of Boston elive, talk about artists who have performed with her; and relate general aspects of her work.

The 1936 World Series is the subject as Curt Gowdie hosts the return of **The Way It Was** Saturday, Jan. 24, at 11 p.m. The weekly series is a retrospective look at 13 classic athletic events. On Saturday's program, Gowdie and his guests recall the World Series between the New York Yankees and the New York Giants. Guests include players from both teams.

The ere of manned and unmanned exploration of space and what it has revealed so far about the origins and nature of the solar system is explored on **Nova** Sunday, Jan. 25, at 8 p.m. The hour-long documentary examines new information about the origins of life that have been gleaned from space exploration and tells how the new view of space emerged from evidence brought back from space missions. The program may also be seen Saturday, Jan. 31, at 3 p.m.

One ot the most chaotic periods of French history is examined through its art on **Only Then Regale My Eyes**, an hour-long **PBS Specfal of the Week** Monday, Jan. 26, at 8 p.m. The program illustrates the period 1774 to 1830 — which included the tinal years of the French monarchy under Louis XVI, the French Revolution, the Napoteonic Era, and the Bourbon restoration of Louis XVIII and Charles X — as revealed by the French artists of the period. Among the artists whose pa'nting end philosophies are examined ere Oavid, Oelecroix, Ingres, and Gericoult.

News in brief

Program responsibility change

Administrative responsib.lities for the associate degree in Letters, Arts and Sciences by both the reguler and extended routes have been transferred from intercollege Undergraduate Programs to the College of the Liberal Arts.

The program has been assigned to the Office of the Associate Oean for Undergraduate Studies in the College of the Liberal Arts.

All communications that were formerly directed to Anne Herpel in the Office ol the Vice President for Undergraduate Studies concerning the associate degree program in Letters, Arts and Sciences should now be directed to Edna Spearly, College of the Liberal Arts, 138 Sparks Bldg.

African Studies Forum

"Economic and Political Conditions in Kenya and Tanzania" will be discussed at the second African Studies Forum of the winter term on Monday, Feb. 2, at 7:30 p.m. in the Black Cultural Center.

Or. William J. Schrader, professor of accounting, and John J Williams, greduate student in accounting, will be the speakers.

The African Studies Forum is sponsored by the University's Black Studies Committee and is open to all members of the Penn State and State College communities.

Lunchtime parking available

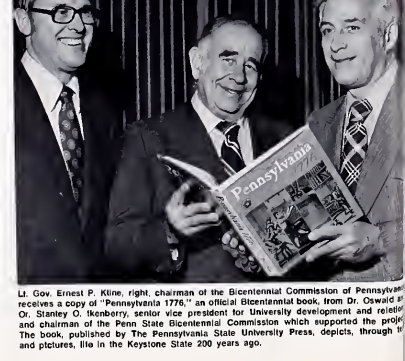
For the convenience of University employees going to the Hetzel Union Bldg for tunch, a limited number of parking spaces will be available on weekdays from 11 a.m. to 1:45 p.m. in the visitors section of Parking Area Brown F (east of the Hetzel Union Bldg.)

Employees, using the area for noontime parking, should check with the attendant at the kiosk at the entrance to the area from Shortlidge Rd.

Value study response

A recent mailing called for faculty members interested in the development of a continuing program for the exploration of "questions of value" to indicate their response in writing by Jan. 15. Oue to a problem in distributing the proposal, some faculty members may not have had sufficient time to answer. Consequently, the deadline has been extended to Jan. 26. If any faculty member has not seen the proposal, or still wishes to convey an interest — which should be in writing — he or she should address requests or statements of interest to H. C. Johnson, 408 Rackley Bldg. Call 865-1488 if more information is needed.

Credit Union to meet



The Penn State Federal Credit Union will hold its annual meeting at 7:30 p.m. on Thursday, Jan. 29, in Room 101 Kern Graduate Bldg.

Top mining paper

A paper by Theresa M. Pompey, a senior in mining engineering in the College of Earth and Mineral Sciences, has been judged by a committee of prominent mining professionals to be the best undergraduate entry in the Society of Mining Engineers' 1975 Student Paper Contest.

Her paper, entitled "The Injection of Epoxy Resins for Support," reviews research on methods for filling mine wall fractures, as opposed to more traditional bolting methods of support. She will be awarded a $500 prize.

One of seven women enrolled in mining engineering at Penn State, Ms. Pompey has held summer jobs as engineering assistant and union laborer at mines in West Virginia and Ohio. After her graduation this spring, she intends to pursue a career in mining production work.

Lt. Gov. Ernest P. Kline, right, chairman of the Bicentennial Commission of Pennsylvania receives a copy of "Pennsylvania 1776," an official Bicentennial book, from Dr. Oswald S. Or. Stanley O. Ikenberry, senior vice president for University development and relations and chairman of the Penn State Bicentennial Commission which supported the project. The book, published by The Pennsylvania State University Press, depicts, through text and pictures, life in the Keystone State 200 years ago.

University Park Calendar

January 22—February 1

Items to be included in this calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, Jan. 22

Commons Videotape, 12 noon, Kern lobby.

FSHA 410 dinner, "Early England," 5:30 p.m., Maple Room, Henderson Human Development. Reservations: 865-7441.

Gallery talk, Robert H. Luck, curator, Finch College Museum of Art, on "Hugo Weber: A Retrospective Exhibition," 7:30 p.m., Museum of Art.

University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.

Friday, Jan. 23

Campus 4-H Square Dance, 7:30 p.m., HUB ballroom.

University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.

GSA Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, Jan. 24

Sports: Women's fencing, vs. Ohio State, 9 a.m. White. Women's basketball, vs Ithaca, 2 p.m., White. Men's basketball, vs. West Virginia, 2 p.m., Rec Bldg. Men's fencing, vs. William Paterson, 1 p.m., Rec Bldg. Men's swimming, vs. Bloomsburg State, 2 p.m. Men's and women's gymnastics, vs. Ohio State, 8 p.m., Rec Bldg.

University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.

PSU Symphony Orchestra, 8:30 p.m., Schwab.

Sunday, Jan. 25

Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Robert A. Raines, director, Kirkridge Retreat and Study Center, Bangor, Pa.

Black Christian Fellowship worship service, 11 a.m., Cultural Center, Walnut

Alpha Chi Omega "Greek Sing," 2-4 p.m., HUB ballroom.

Artists Series, Igor Kipnis, harpsichordist, 8:30 p.m., Schwab.

Monday, Jan. 26

Raymond Page, viola, 8:30 p.m., Music Bldg. recital hall.

France Cinema, "Ramparts of Ctay," 7 and 9 p.m., Room 112 Kern.

Tuesday, Jan. 27

Library Seminar, "Psychology Reference Materials," 7 p.m., Room W110 Pattee.

University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.

Wednesday, Jan. 28

"Noondays," devotional service, 12 noon, large chapel, Eisenhower Chapel.

FSHA 410 dinner, "China," 5:30 p.m., Maple Room, Henderson Human Development.

"Welcome, Mr. Marshall," Spanish Club film (with English subtitles), 7:30 p.m., Room S209 Henderson Human Development.

University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.

Musica da Camera, 8:30 p.m., Music Bldg. recital hall.

Thursday, Jan. 29

Commons videotape, 12 noon, Kern lobby.

FSHA 410 dinner, "Central America," 5:30 p.m., Maple Room, Henderson Human Development.

University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.

Friday, Jan. 30

Sports: Men's fencing, vs. Baruch and NYU, 3:30 p.m., Rec Bldg.

Episcopal Student Assoc. Square Dance with the Buffalo Chipkickers, 7:30 p.m., HUB ballroom.

GSA Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.

Sharon Brock, piano, 8:30 p.m., Music Bldg. recital hall.

Saturday, Jan. 31

Sports: Men's fencing, vs. Army, 1 p.m., Rec Bldg.

Campus Crusade for Christ Square Dance, 7 p.m., HUB ballroom.

University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.

Sunday, Feb. 1

Chapel Service, 11 a.m., Eisenhower Chapel. Rev. Robert C. Fox, State College.

Black Christian Fellowship worship service, 11 a.m., Cultural Center, Walnut.

Seminars

Thursday, Jan. 22

Chemistry, 12:45 p.m., Room 333 Whitmore. Kurt Mislow, Princeton University, on "Studies in Stereochemistry."

Joint Physics and Astronomy Colloquium, 3:50 p.m., Room 117 Osmond. Dr. R H. Koch, astronomy, University of Pennsylvania, on "Stellar Polarization Effects and Circumstellar Scattering in Binary Stars."

Computation Center, 7:30 p.m., Room 105 Osmond. "PSU Structural WATFIV (2)."

Ceramic Science, 11 a.m., Room 301 Mineral Industries. Kent Bowen, Massachusetts Institute of Technology, on "Grain Growth in Ceramics."

Biochemistry and Biophysics, 12:30 p.m., Room 101 Althouse. Kelly Clifton, University of Wisconsin School of Medicine, on "Hormonal Effect in Mammary Gland Radiation Carcinogenesis."

Microbiology and Cell Biology, 4 p.m., Room 52 Frear. Herbert A. Friedman, Albert Einstein College of Medicine, on "Properties of Cell Lines Derived from Tumors Induced by Friend Virus in BALB/c and BALB/c-H-2^{b} Mice."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Alan Dittenroeffer, graduate student, on "Precipitation Chemistry of Western New York."

Statistics, 4 p.m., Room 75 Willard. Thomas P. Hattmansperger on "Robust Tests Based on Ranks for the Linear Model."

Acoustics, 4 p.m., Room 158 Willard. Charles R Zentner, research associate, ARL, on "Adaptive Array Processing."

Monday, Jan. 26

College of Health, Physical Education and Recreation, 3:30 p.m., Room 101 Kern. Dr. Alan Kazdin, psychology, on "Behavior Modification: Implications for the Sport Domain."

Genetics, 3:55 p.m., Room 108 Tyson. Carter Schrov on "Cell Fusion to Study the Human Birth Defect exoderma pigmentosum.

Biochemistry and Biophysics, 4 p.m., Room 101 Althouse Raymond Damadian, biophysics, SUNY, Brooklyn, on "The Cytotonus Concept in the Control and Regulation of Biological Ion Exchanger Resins."

Computation Center, 7:30 p.m., Room 105 Osmond. "PSU Structurat WATFIV (3)."

Organic Chemistry, 8 p.m., Room 333 Whitmore. Barry Lange on "Synthetic Approaches to Cephalotaxine."

Tuesday, Jan. 27

Plant Pathology, 9:45 a.m., Room 213 Buckhout. Padruot Fried on "Genetics of the Pathogen."

ARL, 10:45 a.m., Eric A. Walker Conference Room. Applied Science, on "Acoustic Diffraction and Scattering from a Half-Plane with Impedance Boundary Conditions."

Analytical Chemistry, 12.45 p.m., Room 333 Whitmore. G. Perkins on "Chemistry of Chlordane and Its Environmental Significance."

Water Pollution Control, 2.20 p.m., Room 101 Chambers. "Subsurface Disposal Systems — Tile Field Disposal."

History, 3:30 p.m., Room 101 Kern. Lorraine Lees on "America's Response to Tito's Yugoslavia. 1945-1949."

Engineering Acoustics, 4 p.m., Room 73 Willard. Dr. Joachim F. Wohlwill, man environment-relations and psychology, on "Effects of Exposure to a Noisy Environment."

Inorganic Chemistry, 8 p.m., Room 333 Whitmore. Dr. Nilda Martinez, IBM, on "Optically Active Organometallic Compounds of tron."

Wednesday, Jan. 28

Biochemistry, 4 p.m., Room 101 Althouse. Richard Taylor on "Biosynthesis of Antigens: Gene Theories."

Thursday, Jan. 29

Chemistry, 12.45 p.m., Room 333 Whitmore. James S. Mattson, University of Miami, on "Infrared Spectroelectrochemical Investigations of Blood Protein Adsorbed at Solid-Solution Interfaces."

Anthropology, 3.30 p.m., Room 107 Social Science. James S. Duff, project research associate, on "Environment, Migration and Perceived Health In Southern Peru."

Physics, 3:50 p.m., Room 117 Osmond. R. T. Schumacher, Carnegie-Mellon University, on "The Bowed String and the Bow on Violins."

Philosophy, 4 p.m., Room 167 Willard. Alphonse Lingis on "DEATHBOUND THOUGHT, Authenticity in Heidegger."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Dr. Ariel Cohen, Drexel University (on leave from the Hebrew University, Israel).

Computer Science, 4 p.m., Room 325 Whitmore. Dr. Zvi Galil, IBM Research Center, on "Real Time Algorithms for String-Matching and Palindrome Recognition."

Computation Center, 7:30 p.m., Room 105 Osmond. "PSU Structured WATFIV (4)."

Populations Issues Research Office, 2:30 p.m. Room 101 Kern. Dr. John Knodel, sociology, University of Michigan, on "Some Current Research Topics in Historical Demography."

Exhibits

Show.

Chambers Gallery: Musical Instruments, through Jan. 29. Graduate Student Exhibition, all media, opening Jan. 30.

Pattee Library: East Wing Corridor, "Paintings and Drawings." Maureen Russell Nell. Main Lobby, "Be Glad Then America" Exhibit, through Jan. 31.

Sackett Gallery: "Penn State — Architecture," drawings, models and publications by Penn State architecture students.

Zoller Gallery: Student Sculpture Exhibition, through Jan. 30. David Hare Exhibition, opening Feb. 1.

HUB Gallery: Jack Tar, American Profiles of Merchant Seafarers, 1794-1803 (Smithsonian Institution).

Kern Gallery: Central Pa. Scholastic Art

Films

Saturday-Sunday, Jan. 24-25

Hillel Foundation film, "Kazaban," 7:30 and 9:30 p.m., HUB assembly room.

Wednesday, Jan. 28

GSA Commonsplace Theatre, "Mutiny on the Bounty," 8:30 p.m., Room 112 Kern.

Meetings

Tuesday, Jan. 27

College of Earth and Mineral Sciences faculty, 4 p.m., Room 26 Mineral Sciences.

Lecture

Wednesday, Jan. 28

World Food Crisis Lecture Series, Dr. Robert F. Chandler on "The Outlook for the Green Revolution," 8 p.m., Room 105 Forum. Sponsored by the University Committee for International Programs and the College of Agriculture.

Arts roundup

International arts and crafts

The Office of International Student Affairs is sponsoring an International Arts and Crafts Fair Monday, Jan. 26, through Friday, Jan. 30, in the International Student Lounge, 111 Kern Graduate Bldg.

The exhibit features original handmade art work by the wives of international Penn State students. This art work reflects the cultures of more than ten different countries and includes embroidery, hand-woven rugs, clay sculptures, hand-knit sweaters, jewelry, and many other original items.

The public is invited to the fair, with items available for purchase from individual artists.

Chamber music group performs

Five music graduate students will perform featured roles in a chamber music concert by Musica da Camera at 8:30 p.m. Wednesday, Jan. 28, in the Music Bldg. recital hall.

Conducted by Dr. D. Douglas Miller, associate professor of music, the chamber orchestra will present four works, including Mozert's "Divertimento in D Major."

Featured soloists in Vivaldi's "Concerto Grosso in D Minor" are violinists Davis Brooks, Lewisburg, and Helen Steineker, Montgomery, Ala., and cellist Peter Bryce, Corvallis, Ore. The central performer in Griffes' "Poem for Flute and Orchestra" is flutist Steven Robbins, of San Angelo, Tex.

Contemporary American composer Robert Parris' "Trombone Concerto," a challenging 1964 work, has Michael E. Powell, Wichita, Kan., on trombone.

Page presents viola recital

Raymond Page, associate professor of music and violist with the Alard String Quartet, will perform music for viola and violin in recital at 8.30 p.m. Monday, Jan. 26, in the Music Bldg. recital hall.

Bach's "Sonata in G Minor," a transcribed work for harpsichord and viola originally written for gemba, will be performed with June Miller, assistant professor of music.

In "Sonata for Violin and Piano" by William Walton, a contemporary English composer, Philip Dettra, assistant professor of music, will join Mr. Pege.

Davis Brooks, violinist and greduate student in music, will perform with Mr. Page in Prokofiev's "Sonata for Two Violins." Mr. Brooks attended last summer's International Music Institute in Spain where Mr. Page was a performer-in-residence.

Young Artists' Concert

The annual Young Artists' Concert by the Penn State Symphony Orchestra, featuring student performers selected by competitive audition in the Department of Music, will be held at 8:30 p.m. Saturday, Jan. 24, in Schwab Auditorium.

The performance of the first movement of Mozart's "Piano Concerto #15 in B Flat Major" will feature Katherine Kello, pianist, and will be conducted by graduate conducting student Ronald Renshaw. Debussy's "Premiere Rhapsodie" will have Russell Shipley on clarinet.

Violist Paul Yarbrough will perform in Bartok's "Concerto for Viola." Following the intermission, the orchestre, conducted by John Hall, graduate conducting major, will perform the overture to the opera "Nabucco" by Verdi.

"My Man's Gone Now," from Gershwin's "Porgy and Bess," will be sung by soprano Nona Uhler and conducted by Mr. Hall The performance of the first movement from Tchaikovsky's "Concerto for Violin in D" will feature Davis Brooks, violinist.

The Symphony Orchestra is under the direction of Dr. D. Douglas Miller.

Bicentennial exhibit at Kern

The Graduate Commons Gallery will feature a display of American Bicentennial-related paintings entitled "Pennsylvania: A Commemorative Portrait," Feb. 6-26.

The 80-painting show includes works of Nick Ruggieri, a Fellow of the Royal Society for the Encouragement of the Arts, London, and art director of the Harrisburg Patriot-News.

The collection includes at least one representative painting from each of the state's 67 counties; nine additional Commonwealth scenes; a map-montage of Pennsylvania; plus paintings of the state bird, tree and flower. Paintings are executed in oils, acrylics and watercolors.

The display at the Kern Graduate Bldg. gallery is one step on the Nick Ruggieri Bicentennal Art Exhibition tour, which will visit 40 locations throughout Pennsylvenia.

The Centre County painting in the collection is a view of Old Main.

"I wanted to combine scenic, historical, industrial and interpretive views of Pannsylvania into a portrait of the Commonwealth, a tribute to the state during the Bicentennial," comments Ruggieri.

Des Marais receives award

M. Roberi Des Marais, associate professor of architecture, has received a 25-yeer eward from the University.

Mr. Des Marais, who received his B.S and M. Arch. degrees from the University of Illinois, is a registered architect in Pennsylvania, Illinois and Texas. Before coming to Penn State in 1950 he was a member of the architecture faculties at the University of Illinois and Texas Tech.

His professional experience includes work with J. A. Anderson & Associates, professional engineers, Champeign, Ill.; E. L. Siouffer, supervising architect, University of Illinois; Butler and Brosher Archiects, Lubbock, Tex.; and Kahn and Jacobs Architects, New York, N.Y. He currenly heads M. Roberi Des Marais & Associates Architects, State College.

Mr. Des Marais is a corporete member of the Americen Institute of Architects end has served as the president, secretary, treasurer and board member ot the Association's Centrel Pennsylvania chapter. He is also a member of Alpha Rho Chi, national professional architecture fraternity. He has served es thet organization's national president and wes the advisor to the Penn State chapter for many years.

He has also been the Penn State advisor to Scarab National Architectural Society, and is a member of the Gargoyle Architectural Society, the Association of Collegiate Schools of Architecture, the National Council of Architectural Registration Boards and the Society of Architectural Historians.

A student of the history and philosophy of architecture, Mr. Des Marais is a collector of ancient and antique books on architecture and the building professions.

M. Robert Des Marais

He is currently writing a book, "Architecture Books 1485-1900," a definitive study of printed literature in the field.

He has travelled extensively, visiting ancient and modern architectural sites and, as a hobby, presents slide lectures about his travels.

Ulerich new Trustee head; President's contract extended

(Continued from page one)

dent of the national Penn State Alumni Association in 1945-46.

Last year he was named a Distinguished Eagle Scout by the national scouting Board of Review in recognition of his contribution to scouting during his 51 years as an Eagle Scout and other civic and community activities.

At Clearfield he is a director of the County National Bank and a director and past president of the Clearfield Hospital. In 1963 he was named an "Outstanding Citizen" by the Clearfield American Legion Post No. 6. He is a native of Latrobe, Pa.

Mr. Williams, reared by farmer relatives and friends after having been orphaned at six ages of age, is a graduate of Penn State's two-year course in agriculture. He has a continued record of service both to agriculture and his community, as well as to the University.

He was named a "Superior Farmer" by the Greater Uniontown Chamber of Commerce in 1952 and "Master Farmer" by the Pennsylvania Farmer" in 1955. He is an honorary member of the Pennsylvania County Agents Association. He has been president of both the Fayette County Hofstein Breeders' Association and the Southwestern Pennsylvania Holstein's Breeders' Association. He has also served as president of the Fayette County Agricultural Extension Association, Pennsylvania Dairymen's Association, and the Atlantic Breeders' Cooperative. He is a member of Gamma Sigma Delta, national honor society of agriculture.

For 19 years he was secretary-treasurer of the Pennsylvania Association of Artificial Breeding Cooperatives and was chairman of the State's brucellosis eradication committee.

Civic activities have included 11 years as chairman of the Fayette County Redevelopment Authority, superintendent of the Fayette County institutional district for 10 years, and eight years as a county commissioner for Fayette County.

In business he has operated a successful farm machinery dealership and he operates a large dairy farm near Uniontown.

He is a director of the Gallatin National Bank of Uniontown.

In other action taken at last weekend's meeting, the Board of Trustees:

—approved sketch-preliminary plans for two buildings al the Fayette Campus. The firm of Fulton and Heath, architects, will complete the building designs. They are for a Maintenance and Solar Laboratory Bldg. at a cost of $175,000, and an Interim Recreation and Convocation Bldg., expected to cost $300,000.

—approved sketch plans for approximately 3,400 square feet of freezer space to be built at the Food Stores Bldg. The space will constitute a one-story addition at the northwest corner of the building, the first addition to have been made to the build ng since 1958.

—approved final plans for air conditioning of guest rooms at the Nittany Lion Inn.

—approved sketch-preliminary plans for an addition to the WPSX-TV studio building.

—designated May 27 as the date for delegate election of trustees and for counting the ballots in the alumni election.

—authorized continuation for one year of The Hershey Medical Center Advisory Committee and the Special Advisory Committee on Affirmative Action.

—authorized the employment of Haskins and Sells, of Philadelphia, certified public accountants, to perform the annual audit of accounts of the University for the year ending June 30, 1976.

—approved final plans for an expansion and improvement of utilities on the University Park Campus. The work will be done by the Department of General Services which has authorized $250,000 for construction costs.

—authorized the purchase of two tracts of land adjoining University holdings in the Stone Valley Area ot Huntingdon County.

—approved an exchenge of land between the City of DuBois and the DuBois Campus.

Funding opportunities

(211-1) Deadlines for the **OE Education Professions Development Program** have been issued Feb. 5 — bilingual education training (new), teachers for Indian Children, urban/rural new "national projects", and new vocational education leadership development (the letter a correction); Feb. 27 — new vocational education state systems; and March 18 — individual leadership development programs. (Ref. 40FR0106, 12/31/75) (CFDA 13.503, 504, 505, 506, and 546).

(211-2) A **NSF/RANN** program solicitation has been issued for **Applied Research in the Benefits and Costs of Public Regulation: Case Studies of Selected Commodities and Services.** The deadline is March 16 (Ref. NSF 75-39)

(211-3) Final guidelines have been issued and a March 15 deadline set for the new **NSF/ RIAS Program (Research Initiation and Support.)** A two-page proposal outline must be submitted to NSF by Feb. 1 for review as the RIAS selection committee which will recommend outlines to be expanded into full-length proposals. (Ref. NSF E-76-48).

(211-4) The **OE Consumers' Education Program** has a March 8 deadline (Ref. 41FR1614-15, 1/9/76) (CFDA 13.564).

(211-5) The Social Security Administration has issued proposed rules for research grants and contracts under its **Experimental Day-Care Programs.** Experiments and demonstration projects are included (Ref. 41FR1603-05, 1/9/76) (CFDA 13.801).

(211-6) The U.S. Dept of Agriculture has issued regulations for its **special supplemental food program for women, infants, and children,** including nutritional education for adults (Ref 41FR1743-50, 1/12/76) (CFDA 10.557)

(211-7) The Office of Management and Budget (OMB) has revised Cir. No. A-21, which regular furnishes guidance to federal agencies for cooperation with state and local governments in the **evaluation, review, and coordination of federal and federally assisted programs and projects.** (Ref. 41FR2051-65, 1/13/76)

(211-8) Proposed rules for **Native American Programs and Activities** (Indians, Hawaiians, Alaskans) have been issued by OHEW. The programs including training and technical assistance; research, demonstration, and pilot projects, and project evaluations. (Ref 41FR2045-50, 1/13/75) (CFDA 13.612).

(211-9) PSU Office of **Student Aid Gubernatorial Grants** (half tuition) — April 1; 135 Boyke.

(211-10) AFL/CIO — 2 Internships — March 15; 317 Kern.

(211-11) PSU 1976 Fellowship Competition — Feb. 3 (incoming students Feb. 17); 317 Kern.

Faculty notes

Dr. Henry L. Guttenplan, professor of law enforcement and corrections, is serving as the state coordinator for the International Association of Chiefs of Police, Inc.

Dr. Joseph Jordan, professor of chemistry, presented a talk at the Pasteur University Institute of Chemistry, Strasbourg, France, Jan. 15, and will speak at the University of Ghent, Belgium, Jan 28.

The titles: "Enthalpimetric Analysis, Biochemical and Enzymatic Applications" and "Thermochemistry of Immunological Reactions," respectively

Dr. Jordan is currenily on leave in France, where he is participating in research and offering graduate courses at the University of Paris, the French National Science Foundation, and the Pasteur University.

He will return to the University in May.

Dr. Herschel W. Leibowitz, professor of psychology, has been elected a Fellow of the Human Factors Society in recognition of "outstanding contribuions" to the field of human factors.

Dr. Gerald M. Phillips, professor of speech communication, is the co-author of a new book, "Intimate Communication" published by Allyn and Bacon. His co-author is Nancy J. Metzger, assistant professor at the University of Pittsburgh, who received her Ph.D. at Penn State in 1974

The book is a report on an intensive five-year study of 511 close relationships, including long-term friendships, cohabiting couples and married couples ranging in age from 9 to 71. The study also includes clinical reports on the socialization progress of diagnosed disturbed communicators.

The Honorary American Farmer Degree, the highest award made by the Future Farmers of America, was given recently to **Dr. Richard F. Stinson,** professor of agricultural education and horticulture.

The award cites Dr. Stinson for his cooperative efforts with the FFA and sponsoring organizations in planning, organizing, and administering the first and second National FFA Horticulture Contests in 1974 and 1975. This event, now a permanent part of the National FFA Annual Conventions, attracted state contest teams from 32 states In 1974, and 40 states in 1975, with 96 contestants the first year and 160 contestants the second year.

Dr. Roy Allison, associate professor of education at Capitol Campus, has been elected president-elect of the Pennsylvania Science Teachers Association. A member of the faculty since 1968, Dr. Allison is a graduate of Shippensburg State College and received his master's degree and D.Ed. from Penn State. In 1970 Dr. Allison was awarded a Fulbright-Hays Act Grant to help develop an elementary science program in South Korea.

Dr. Frank Clemente, associate professor of sociology, has been named edlior of a special edition of the "Annals of the American Academy of Political and Social Science." The issue is entitled "Rural America: Problems and Prospects" and contains 13 original articles by leading social scientists.

Dr. K. Danner Clouser, associate professor of humanities at Hershey, has been appointed to the editorial board of The Journal of Medicine and Philosophy," a quarterly publication of the Society for Health and Human Values of which Dr. George T. Harrell, vice president emerlius for medical sciences. is president. The first volume of the new journal will appear in March, 1976. Dr. Clouser will edit the first issue of Volume 2, which will concern "Clinical Medicine as Science." The journal will be published by the University of Chicago Press.

Coach **Harry Groves** has been named National Cross Country Coach of the Year by the United States Track Coaches Association.

Groves also has been named District 2 cross country coach of the year and District 2 track coach of the year.

The national award recognizes the Penn State coach for development of the sport and excellence in coaching. Groves' 1975 cross country team was 7-1 in dual meets and finished fourth in the National Collegiate Athletic Association championship at Penn State. His team also finished second in the Central Collegiate Conference race and first in the Eastern United States Track and Field Federation championship this fall.

Kurt Oppelt may not be too well known in his adopted homelown of Stale College, but he will be welcomed as a national hero when he returns to his Austria homeland later this month.

An Instructor in the College of Health, Physical Education and Recreation, Oppelt has been selected to be the first person to receive the Olympic torch when it arrives on Ausirlan soil from Athens, Greece, on Jan. 30.

Oppelt and his former skating partner, Sissy Schwarz, will be guests of honor throughout the Winter Games in commemoration of the 20th anniversary of their winning the Pair Figure Skating Championships In the 1956 Austrian, European, World and Olympic competitions.

Dr. George C. Shoflstall, assistant director of continuing education in the College of Science, spoke Jan. 14, at a meeting of the North Central Pharmacist's Society of Pennsylvanie in Danville.

His talk, entiled, "Organic Levels," focused on the flow of onergy through the food pyramid of an eco-system.

Staff vacancies

Staff vacancies contained in this publication are those which generally require at least a baccalaureate degree or equivalent as a minimum educational qualification. Staff vacancies requiring less than the baccalaureate degree as well as those announced in the felarcom may be found in the Penn State Reporter.

This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1367 (network Line 475-1367). Applications for these staff vacancies will be received until 5 p.m. **Thursday, Jan. 29 Do not contact the area that has the vacancy.**

PROGRAMMER, UNIVERSITY LIBRARIES — University Park

Responsible for analysis, program design coding, documentation, and other programming tasks. required to develop an operational on-line bibliographic data-base. Bachelor's degree or equivalent in computer science or related field, plus one to two years of related experience preferably in database design or on-line multi-access computer systems.

The University is an equal opportunity/affirmative action employer.

PENN STATE intercom

Volume 5, Number 18 January 29, 1975

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

News in brief

Sigma Xi Award

Nominations are requested for the Penn State chapter of Sigma Xi Graduate Research Award. A mailing has been made to graduate department and program chairmen specifying the terms for the award and providing instructions for submitting proposals. The purpose of the award is to recognize individual graduate research whose potential is judged to be outstanding. The award will be in the amount of $250 and will be presented at the annual initiation banquet in April. Applicants must be members of Sigma Xi or a graduate initiate, and the nominator must also be a member of Sigma Xi. Each graduate department or program is limited to one submission. Proposals are to be submitted to the office of B. F. Howell Jr., associate dean of the Graduate School, 317 Kern Bldg. (865-2514). The deadline for submission of proposals is Feb. 27.

"Sliding sale" at Bookstore

The Penn State Bookstore in McAllister Bldg. will have another "sliding scale sale" in the store's trade department for one week, beginning Feb. 2. The amount one saves will depend upon the quantity of books purchased — the purchaser of two books will receive a 10 percent discount; the purcheser of six or more books will receive a maximum 50 percent discount. Both hardbacks and paperbacks will be included in the sale, but text and technical titles will be excluded. However, beginning Feb. 9, the store will offer a 30 percent discount on all technical titles. This latter sale will also last a week.

Research Initiation Grants

The Penn State 1976-77 Research Initiation Grants Program provides grants to support research and other creative work in science, technology, the social sciences, and work in the arts and humanities.

Faculty at all campuses are invited to submit proposals. Awards will range from $2,000 to $5,000 for 12 months. Call your ICOR dean or Commonwealth Campus director for further information.

The proposal deadline is Feb. 20. Following preliminary screening by colleges, final awards will be recommended by an ACOR subcommittee.

Awards will be announced by March 17.

Fund for E&MS faculty

The William H. Gosnell Faculty Enrichment Fund, recently established at the University, will benefit the College of Earth and Mineral Sciences.

The fund was created from the estate of Mr. Gosnell, a 1913 graduate in mining engineering, who died July 16, 1974.

Earnings from the fund will be used for instructional innovation grants for new and improved courses; travel to professional meetings or seminars; grants to assist junior faculty members to broaden their studies; purchase of equipment not otherwise available, and other purposes approved by the dean of the College which may benefit the College and its faculty, staff and students. Monetery awards to students may not be made from the fund.

Expenditures from the fund will be approved by the dean of the College of Earth and Mineral Sciences and a special committee selected by him.

Interested individuals or groups may make additional contributions to the principal of the fund.

Have your heart checked

The Heart Association will conduct a coronary risk screening from 9 a.m. to 5 p.m., Feb. 9 and 10, in Room 301 Agricultural Administration Bldg. Nine factors that can influence heart disease will be checked. A report will be sent to participants after the screening. A $4 fee will be charged to cover the expense of materials used. For an appointment call 238-0053.

Two Valentine's Dinners

This year, for the first time, there will be two HUB Valentine's Candlelight Dinners. The popular meals will be served Thursday, Feb. 12, and Friday, Feb 13, from 4:45 to 7:15 p.m.

The menu will include: stuffed breast of chicken, prime rib of beef, stuffed pork chop, veal paprika, fantail shrimp and baked stuffed flounder with crabmeat.

There will also be the traditional hospitality tables and assorted salads, vegetables and desserts. Entertainment will be provided both nights.

Printing Services moves

Printing Services has moved from the Old Services Bldg. to the new Business Services Bldg. at the northwest corner of campus, off Bigler Rd. and adjacent to the 112th Air National Guard unit. Phone numbers for Printing Services remain the same.

Last date to file claim

March 31, 1976, is the last date on which the Employee Benefits Division will accept charges for a 1975 major medical claim from University employees or their dependents.

A major medical claim is established once an employee reports $100 of eligible, out-of-pocket medical expenses during the claim year period of January through December. If a major medical claim was not established in 1974, but charges were incurred in October, November, or December of that year, these charges may also be included in the reporting of expenses for a 1975 claim.

Some of the charges that are acceptable for a claim are doctors' office calls and other doctor charges not reimbursed by UNICARE, prescribed drugs, insulin, physiotherapy, and special equipment and appliances. Itemized receipts should be obtained for these charges; cancelled checks and cash register receipts are not acceptable. Among charges not covered are general physical exams, routine dental work, eye exams and lenses.

Claim forms and other information on how to report major medical expenses are available at the Employee Benefits Division, 133 Willard Bldg.

Winter Sky Watch

Mars, Saturn, the Pleiades Cluster, and Orion Nebula will be among the heavenly bodies to be seen during the Winter Sky Watch at the University Friday, Feb. 6, from 7:30 to 9:30 p.m., weather permitting.

The Sky Watch, hosted by the Department of Astronomy and the Astronomy Club, is open to the public free of charge.

The sessions are held in the student observatory atop Davey Laboratory, where visitors can view the celestial objects

12th in grand total enrollment

PSU 11th in fulltime students

The University, which has been in a period of enrollment stabilization, has moved from 13th to 11th among the colleges and universities in the nation in fulltime enrollment and continues as 12th in grand total enrollment.

This is reported by Dr. Garland G. Parker, of the University of Cincinnati, in his annual survey prepared for the American College Testing Program. It is the 56th year for the national survey.

The total enrollment for Penn State, based on fall term figures, is given as 48,457 for fulltime students and 68,223 for grand total students while a year ago the figures of 46,179 and 64,721 were listed.

The five institutions that topped the 100,000 mark in fulltime enrollment were the State University of New York, California State University and College System, City University of New York, University of California, and University of Wisconsin System. In grand total enrollment, the University of North Carolina and State University of Florida System also exceeded 100,000.

Two other Pennsylvania universities are among the top 30: Pittsburgh ranks 30th with 20,903 fulltime students, and 28th with a total enrollment of 34,898 while Temple is 27th in grand total enrollment with 34,950 students.

In his analysis, Dr. Parker says the largest freshman class in ten years has pushed fall enrollment in the nation's four-year colleges and universities to the highest rate of increase so far in the 1970 decade while the 6,896,124 students reported by the 1,472 institutions reporting represents the largest increase since the 4.6 percent reported in 1969. He estimates 3,062 institutions may have enrolled more than 11,000,000 students this year.

Dr. Parker said the enrollment jump in freshmen "provides the surprise element in the enrollment story for the year."

The increase of 7.4 percent put 1,301,010 freshmen into 1,383 institutions, the largest increase since the 17.3 percent freshman increase in 1965. This increase was against a gain of only 0.3 percent in high school graduates last year over the previous year and an 0.8 percent increase in the estimated number of 18-year-olds.

Dr. Parker predicts college enrollments nationally will peak in the late 1970s and taper off in the 1980s. But he says the shifting enrollment patterns that provide more students of the non-traditional college age and interest groupings will offset the drop in institutions that plan ahead for change.

"If institutions of higher education rely primarily upon secondary school graduates for their incoming students, it is almost inevitable that enrollments will decelerate in the remaining 1970s, decline slowly in the early 1980s, and then fall off more precipitately in the later 1980s," Dr. Parker cautions.

"Many, if not most, institutions will need to address themselves to the challenges and opportunities involved in providing educational services increasingly to part-time students, adults, senior citizens, women, minorities, and continuing education students."

Enrollment of part-time students in the institutions covered reached 2,013,047 for a gain of 7.7 percent.

Dr. Parker noted also that:

Women maintain a long lead over men in most enrollment categories, up 5.8 percent over the previous year and comprizing 45.4 percent of the enrollment in 1,472 institutions.

Graduate enrollments increased 6.6 percent.

Regionally, the largest enrollment gain was in the East.

	Fulltime	Rank	Grand Total	Rank
State University of New York	232,282*	1	354,996	1

Provost hunt now underway

The Search Committee for a new Provost of the University is accepting nominations and applications for the post.

Dr. Russell E. Larson, current Provost of the University, has announced his plans to retire Jan. 1, 1977.

The provost, as chief academic officer and deputy chief administrator, is responsible to the President of the University for administration of the institution's instructional, research, and public service programs.

Dr. John J. Coyle, Search Committee chairperson, said candidates should have an established national reputation and an outstanding record of accomplishments as a scholar, teacher, and administrator. Preferred qualifications for the position include significant experience in college and university teaching and administration.

PENN STATE COLLECTION

Faculty Senate to receive reports on exams and summer term

The following reports and recommendations of the University Faculty Senate's Committee on Instruction will be presented to the Senate at its meeting Tuesday, Feb. 3.

EXAMINATION POLICY

Background

Over the past year the overall questions of improving Penn State's system for evaluating the competence of our students was discussed by the old Senate Committee on Academic Affairs and led to a report on the more specific topic of final examinations given and passed by the Senate on March 4, 1975. Much misunderstanding and confusion resulted from this legislation as many groups interpreted it in a different way than was intended by the sponsoring committee. Student, faculty, and administrative groups have discussed the legislation in detail since that time.

In order to clarify the issue, the Senate Council issued a clarification of the policy at the 12/9/75 meeting. In addition, President Oswald asked the Senate for a reëtirmation or revisad policy before calendars for 1977-78 and thereafter are issued. A motion was made and passed at the 12/9/75 meeting to refer the matter of Final Examinations to the Committee on Undergraduate Instruction and to report et the Feb. 3, 1976 Senate meeting.

General Philosophy

The committee has worked under the following assumptions:

1. Integration of material in all credit courses is dasirable and should ba expected.
2. A diversity of methods for integrating material and for evaluating student performance varying with field and faculty exists and should be encouraged.
3. Examinations have a dual purpose — evaluation and learning/teaching.
4. Ten weeks of instruction must be maintained in each course.
5. The examination and grading policy for each course, each term should be made public in written form. (Such a record makes available data on which an evaluation of the examination approach being used in each course could be based and also makes possible faculty pear control of individuals who are using inadequate evaluation procedures.)
6. Tha faculty member(s) teaching e course should be the authority on methods of evaluation and integration by the students but these objectives should be accomplished in the context of other faculty and students. Thus, there may need to be some general logistic rules adopted for the welfare of all students and faculty.
7. If the tenth week of the term is heavily used for examinations effective instruction in other courses probably will be impeded.
8. The final examination policy is to be consistent with the term calendar of the University.
9. A basic change in the philosophy of final examinations is not desirable and the policy to be advanced should merely reinforce and interpret the general philosophy proposed earlier.

Recommendations

Based upon discussions and all background materiel available, the committee recommends the following policies — a new general examination policy (44-10) and a revised final examination policy (44-20). Neither is a basic change in educational policy. It is further recommended that the Provost implement both policies effective fall term 1976.

Policy 44-10 General Examination Policy

Periodic examination of student accomplishment is essential both for teaching/learning and evaluation purposes. Examinations may include traditional written examinations, whether in-class or take-home; oral examinations; term papers; laboratory or project reports; studio projects; etc.

The faculty teaching and coordinating a course are responsible for both the method and substance of examinations used in each course including the final examinetion or other integrating evaluative instrumant.

In the case of multiple section courses the faculty teaching the various sections will determine the examination policy for the course (e.g., common examinetions), subject to any restrictions determined by tha entire faculty of the section, department or division offering the course.

Notification of the examination procedures to be used in each section of each course must be made available to the students in the section during the first ten calendar days of a ten-week term or its equivalent. A written notice is to be placed with the head of the department or division offering the course for courses offered at University Park and with the director for courses offered at Commonwealth Campuses. These notices will be maintained in a public file for reference by both students and faculty upon request.

Policy 44-20 Final Examination Policy

Preamble

Final written examinations are valuable for university credit courses because they can fulfill two important academic objectives: student integration of instructional material and end-of-term evaluetion of student echievement. However, valid means for accomplishing these objectives other than the final examination (e.g., term paper, final project report, take-home examinetions, etc.) exist. Coure instructors should determine which of these methods is most appropriate and effective in each undergraduate (including 400 level) credit course taught. Regardless of which type of activity is chosen, care must be taken to not unduly interfere with the full complement of scheduled instruction of the student.

Policy

To provide for student integration of instructional materiaf, end-of-term evaluation of student performance, and instruction extending to the end of the scheduled period, course instructors are expected to:

1. Determine a method of providing for meaningful integration and evaluation of student performance.
2. Offer a full schedule of instruction (e.g., ten weeks in a ten-week term).
3. Schedule no examinations during the last week of classes. (Quizzes and narrowly limited tests in support of classroom instruction may be given during the final week.)
4. Schedule ony end-of-term written examinations during the final examination period. Examinations will be scheduled in this period by the University Scheduling Officer at University Park and the office of the director of the Commonwealth Campuses based on the notices filed under Policy 44-10. (Conflict final examinations are covered under Policy 45-80.)

OR

5. Where end-of-term written examinations are not required, require the submission of any alternative integrative and evaluative means (e.g., term paper, final project report, take-home examinations, or studio projects) no earlier than the first day of the final examination period unless an exception for educational reasons has been authorized by the faculty of the department or division offering the course.

Postscript

The committee believes that the coupling of a general examination policy with the final examination policy clarifies the entire role of examinations. Clearer specifications of conditions and approaches which protect the last week of instruction while simulteneously permitting a diversified approach to evaluation of student performance is appropriate to the diversity of courses and programs of the University.

SUMMER TERM

Background

At the December meeting of the Senate, President Osweld asked the Senate to advise him jointly with administrative and student representation end input as to whether the University should retain the ten-week Summer Term or should, beginning in the Summer of 1977, move to an eight-week Summer Term. A subsequent motion to require the Senate Committee on Undergraduate Instruction to prepare a motion for Senate action et the February 3, 1976, meeting was made and passed.

Consideration ot the Committee

The committee has studied previous reports on the Summer Term and received input from eppropriate student and administrative groups. A primary assumption of the committee was that there was no conclusive evidance that the length of the Summer Term within an eight- or ten-week period would have any appreciable effect on teaching and learning.

The committee considered the following items as important to eny final decision.

1. The effect of the Summer Term length on the four major categories of students enrolled in the Summer Term.
2. The effect of the Summer Term length on political and budgetery items such as stete appropriations, granting agency reimbursement of salaries and overhead, possible tuition reduction and toss of income, and possible problems with faculty contracts and saleries.

With respect to students served it is interesting to note the approximate numbers and percentages of students involved in Summer Term 1975 at University Park by category as shown below. The percentages have not changed appreciably over the past several years.

	Summer Term '75 Approximate Enrollment	Pct.
1. Beginning Freshmen	880	8
2. Continuing Undergraduates	5500	50
3. Continuing Graduate Students	4000	36
4 Summer Graduate Students in the College of Education	600	6
TOTAL	10,980	100

In reviewing each of these groups the advantages and disadvantages to each become apparent. However, data which lead to a definite conclusion of which system is preferable do not emerge.

1. For beginning freshmen and continuing undergraduates the ten-week term has the advantage that a full schedule of 6 to 13 credits is possible rather than a reduced load of 6 to 10 credits under the eight-week module. For continuing graduate students a simlar reduction from 10 credits maximum to 8 credits maximum is not necessary.
2. For continuing students the only disadvantage of the ten-week module is that the rest and retaxation period in the summer is minimal.
3. For beginning freshmen the major disadvantage is that many high school graduations do not occur until mid-June. The latest possible starting date might overlap with these events. (e.g., In Summer, 1977, the latest possible starting date for orientation and advising would be June 8 even if Penn State summer commencement was held concurrent with fall registration week.) However, these students are only eight percent of the summer enrollment end mey decrease further as the college-age population decreases.
4. For the primary end secondary school teachers, the eight-week module has the decided advantage of not overlapping with public school schedules and also allowing some time for summer vacation.

The political and budgetary remifications of a change in basic schedule are even less well-defined. It appears that the University could lose en appreciable amount of income as a result oi a change and that problems with faculty salaries and contracts could be severe. The time limit on consideration of these effects was too short to come to any definite conclusions.

Thus, the committee came to the conclusion that since the basic ten-week Summer Term calender serves many students well and that the other effects on the University are undetermined at this time, that no change should be mede at the present time. However, the committee strongly believes that experimentation with other calendars where appropriate and offering timited numbers of courses to spaciel groups in a closad system are desireble and should be encouraged. Thus, an interim plan of action is recommended.

Recommendations

The committee makes the following re commendations for Senate action to b transmitted to the President as the Senate advice on the Summer Term calendar.

1. The Universlty should continue for th next several years to offer the basi ten-week Summer Term starting a late as possible in June and endin prior to Fall Term registration. Cas sideretion should be given to holdin Summer Term commencement on th Saturday before Labor Dey followin Fall Term registration to accompli this later starting date.
2. Limited offerings to restricted pop lations (e.g., primary and seconda school teachers) with restricted cour offerings in a shorter time perio should be encouraged during the sum mer period. The course offering would be limited to those offered as arranged with other units by the spa soring academic unit. NO cross-re istration is to be allowed between th shorter time period and the basic te week Summer Term.
3. Experimentation with alternate Sum mer Term calendars at campuses o her than University Park should be pe mitted for clearly stated objectiv which can be evaluated.
4. It is clear that any soundly based re commendation for revision to th above policies requires a sophisticat evaluation of budgetary and politic problems associated with the chan as well as the academic suitability the calendar. This cannot solely b done by a Senate Standing Commit tee as early recognized. It is recom mended that the Faculty Advise Committee to the President advis on the method of study for full Inp of faculty, students, and administration. Results of this study should b made available to the University Fa ulty Senate for discussion.

Report issued on Black enrollment

The President's Task Force on Increasi Black Enrollment has submitted its rep to Dr. Oswald.

In a preliminary review of the report, Oswald said the Task Force has done excellent job. He said he now plans to c tact leaders of the state's Black commu ties, especially in the Philadelphia a Pittsburgh areas, asking further advi on how best to implement it.

In its report, the Task Force made number of specific recommendatio which will be the subject of detailed study during the next two months before the report is submitted for review by the Affirmative Action Committee of the Board Trustees at its March meeting.

Between now and then, each dea Campus director and member of the Pres dent's staff will be asked to consider ho they could best proceed to implement th several recommendations.

The Task Force on Increasing Black E rollment was appointed on May 20, 19 by Dr. Oswald and was charged specifica to:

—Consult with various groups such the Black Student Caucus, the Forum Black Affairs, Black alumni, and vari community groups.

—Study enrollment trends of Black st dents by campus at Penn State, across t Commonwealth of Pennsylvenia, and i similer institutions in the country.

—Consider both short-range and lo range goals together with suggested mod operandi.

—Propose specific recommendati which will lead to increased enrollment Black students at various campuses the University.

Dr. Robert E. Dunham, vice president f undergraduate studies, and Dr. Raymo O. Murphy, vice president for student f fairs, were co-chairmen of the 10-membe Task Force.

They said the focus of the group's e fort, from its outset, was on ways i means of increasing the number of Bl students through regular admission chi nels of the University.

University Park Calendar

January 29—February 8

Items to be included in this calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, Jan. 29
Commons Videotape, 12 noon, Kern lobby. Consumer Survival Kit, "Sure Lock Homes."
FSHA 410 dinner, "Central America," 5:30 p.m., Maple Room, Henderson Human Development.
University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.
Free U, "Alternatives in Learning," 1-4 p.m., 7:30-9:30 p.m., HUB ballroom.

Friday, Jan. 30
Sports: Men's fencing, vs. Baruch and NYU, 3:30 p.m., Rec Bldg.
University Readers, 7:30 p.m., Room 112 Kern.
Episcopal Student Assoc. Square Dance with the Buffalo Chipkickers, 7:30 p.m., HUB ballroom.
GSA Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.
Sharon Brook, piano, 8:30 p.m., Music Bldg. recital hall.

Saturday, Jan. 31
Sports: Men's fencing, vs. Army, 1 p.m., Rec Bldg.
Campus Crusade for Christ Square Dance, 7:30 p.m., HUB ballroom.
University Theatre, "Hay Fever," 8 p.m., Playhouse Theatre.

Sunday, Feb. 1
Chapel Service, 11 a.m., Eisenhower Chapel. Rev. Robert C. Fox, State College.
Black Christian Fellowship worship service, 11 a.m., Cultural Center, Walnut.
University Readers, 7:30 p.m., Room 112 Kern.
Eastern Orthodox Christian Fellowship, 9 a.m., HUB assembly room.

Monday, Feb. 2
Library Seminar, "Term Paper Workshop," 7 p.m., Room W110 Pattee.
African Studies Forum, 7:30 p.m., Cultural Center, Walnut. John J. Williams, graduate student in accounting, and Dr. William J Schrader, professor of accounting, on "Economic and Political Conditions In Kenya and Tanzania."

Tuesday, Feb. 3
Library Seminar, "Environment Reference Materials," 7 p.m., Room W110 Pattee.

Wednesday, Feb. 4
"Noondays," devotional period, 12 noon, large chapel, Eisenhower Chapel.
Sports: Men's basketball, vs. Temple, 8 p.m., Rec Bldg.

Thursday, Feb. 5
Commons Videotape, 12 noon, Kern lobby.
Friday, Feb. 6
Folk and Square Dance Roundup, 7:30 p.m., south gym, White.
GSA Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, Feb. 7
Sports: Men's fencing, vs. New Jersey Tech., 1 p.m., Rec Bldg. Men's swimming, vs. Bucknell, 2 p.m. Women's basketball, vs. Cortland, 2 p.m., White. Women's swimming, vs. West Chastar, 7 p.m. Wrestling, vs. Navy, 8 p.m., Rec Bldg.

Sunday, Feb. 8
Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Gerald E. Gipp, education.
Black Christian Fellowship worship service, 11 a.m., Cultural Center, Walnut.
Penn State Slalom, Canoe and Kayak Competition, Natatorium, team finals, 2:30 p.m.

Seminars

Thursday, Jan. 29
Chemistry, 12:45 p.m., Room 333 Whitmore. James S. Matthew, University of Miami, on "Infrared Spectroelectrochemical investigations of Blood Protein Adsorbed at Solid-Solution Interfaces."
Anthropology, 3:30 p.m., Room 107 Social Science. James S. Dutt, project research associate, on "Environment, Migration and Perceived Health in Southern Peru."
Physics, 3:50 p.m., Room 117 Osmond. R. T. Schumacher, Carnegie-Mellon University, on "The Bowed String and the Bow on Violins."
Philosophy, 4 p.m., Room 167 Willard. Alphonso Lingis on "DEATHBOUND THOUGHT, Authenticity in Heidegger."
Meteorology, 4 p.m., Room 26 Mineral Sciences. Dr. Ariel Cohen, Drexel University on leave from the Hebrew University, Israel).
Computer Science, 4 p.m., Room 325 Whitmore. Dr. Zvi Galil, IBM Research Center, on "Real Time Algorithms for String-Matching and Pallndrome Recognition."
Computation Center, 7:30 p.m., Room 105 Osmond. "PSU Structured WATFIV (4)."
Population Issues Research Office, 2:30 p.m., Room 101 Kern. Dr. John Knodel, sociology, University of Michigan, on "Some Current Research Topics in Historical Demography."
Microbiology and Cell Biology, 4 p.m., Room S2 Frear. Robert A Schlegel, biology, University of Utah, on "The Microinjection of Macromolecules into Culture Cells by Fusion with Red Blood Cells."

Monday, Feb. 2
Entomology, 4 p.m., Room 204 Patterson. Dr. Donald H. Petersen, plant pathology, on "Insect Control and Plant Protection Programs in the Soviet Union."
Computation Center, 7:30 p.m., Room 105 Osmond. "Text Processing (1)."
Organic Chemistry, 8 p.m., Room 333 Whitmore. Dr. Robert Minard.

Tuesday, Feb. 3
Plant Pathology, 9:45 a.m., Room 213 Buckhout. Sadhana Neurgaonkar on "Genetics of the Host."
Analytical Chemistry, 12:45 p.m., Room 333 Whitmore. C. Roland Jr. on "Raman Spectroscopy."
Water Pollution Control, 2:20 p.m., Room 101 Chambers. "Alternative Disposal Systems."
Nuclear Engineering, 3:55 p.m., Room 228 Sackett. William Hannum, assistant director for Reactor Safety, Energy Research and Development Administration, Washington, on "Liquid Metal Fast Breeder Reactor Safety."
Philosophy, 4 p.m., Room 167 Willard. Ernesto Grassi, University of Munich, on "The Polity of Common Sense and Imagination."
Aerospace Engineering, 4 p.m., Room 232 Hammond. George Seikel, Chief, Plasma Physics Branch, NASA Lewis Research Center, Cleveland, on "Energy Conversion and Space Propulsion at NASA Lewis — Programs and Projections."

Tuesday, Feb. 3
Biochemistry and Biophysics, 4 p.m., Room 101 Althouse. Jean Brenchley, microbiology and cell biology, on "Regulation of Ammonia Assimilation in Klebsiella and Salmonella."
English, 8 p.m., Room 101 Kern. Stanley Weintraub on "Autobiography and Authenticity: Memoir Writing among Some Late Victorians."
Inorganic Chemistry, 8 p.m., Room 333 Whitmore. Dr. Wolfgang Hermann, University of Regensburg, on "Reaction of Transition Metal Hydrides with Diaze Compounds."

Wednesday, Feb. 4
Fuel Science, 4 p.m., Room 244 Deike. James Reuther, graduate student, on "Limiting Equivalence Ratio in Premixed, Quenched, and Fuel-Rich Hydrocarbon/Air Flames."
Biochemistry, 4 p.m., Room 101 Althouse. Lata Ramanathan on "Chemical Modification and Labeling of Antibodies."

Thursday, Feb. 5
Chemistry, 12:45 p.m., Room 333 Whitmore. Samuel Danishefsky, University of Pittsburgh, on "Recent Progress in Total Synthesis."
Meteorology, 4 p.m., Room 26 Mineral Sciences. Daniel Keyser, graduate student, on "Sensitivity Tests with a Parameterized Mixed-Layer Model Suitable for Air-Quality Simulations."
Computation Center, 7:30 p.m., Room 105 Osmond. "Text Processing (2)."

Exhibits

Museum of Art: Recent Sculptures by John Cook. Hugo Weber, A Retrospective Exhibit.
Zoller Gallery: Student Sculpture Exhibition, through Jan. 30. David Hare Exhibition, opening Feb. 1.
HUB Gallery: Jack Tar, American Profiles of Merchant Seafarers, 1794-1803 (Smithsonian Institution).
Kern Gallery: Central Pa. Scholastic Art Show through Feb. 1. Colombian Crafts, through Jan. 31. Nick Ruggieri Bicentennial Art Exhibit, sponsored by the Harrisburg Patriot News.
Pattee Library: Main lobby and Rare Books Room, Charles Blockson, "The Black Experience in America — from Colonial Times to the Present," opening Feb. 2.
Cultural Center, Walnut: Charles L. Blockson, "Post Cards on Black Life," and "Books on Black Pennsylvanians," opening Feb. 2.
HUB, Main Lounge: Charles Blockson, "Athletes," "Literature," "Music," and "Politics," opening Feb. 2.
Chambers Gallery: Musical Instruments, through Jan. 29. Graduate Student Exhibition, all media, opening Jan. 30.
Pattee Library: East Wing Corridor, "Paintings and Drawings," Maureen Russell Neil. Main Lobby, "Be Glad Then America" exhibit, through Jan. 31.
Sackett Gallery: "Penn State — Architecture," drawings, models and publications by Penn State architecture students.

Films

Wednesday, Feb. 4
GSA Commonsplace Theatre, "The Harder They Fall," 7:30 and 9:30 p.m., Room 112 Kern.

University Schedule

Monday, Feb. 2
First day of signing Spring Term NDSL, BEOG, and University Long Term Loans, Room 108 Shields.

Meetings

Thursday, Jan. 29
Penn State Federal Credit Union annual meeting, 7:30 p.m., Room 101 Kern.

Monday, Feb. 2
College of Health, Physical Education and Recreation faculty, 7 p.m., Room 109 White.
A.P.E.S., 7:30 p.m., Room 107 Social Science. Willard Martin on "Pennsylvania Dutch Culture."

Thursday, Feb. 5
College of Business Administration faculty, 10 a.m., Room 201 Business Adm.

Faculty notes

Emeritus rank has been conferred by the University's Board of Trustees on four faculty members who retired Jan. 1.

They are. **Lloyd E. Adams,** professor emeritus of entomology extension; **Charles C. Dillio,** professor emeritus of mechanical engineering; **Dr. Samuel B. Guss,** professor emeritus of veterinary science extension; and **Dr. Harold J. O'Brien,** associate dean emeritus for Commonweith Campuses in the College of the Liberal Arts.

Dr. Leonard R. Kyle has been appointed to the University faculty as professor of agricultural economics in the Bahamas for two years.

He will serve as agricultural economist for the Bahamas Agricultural Research, Training and Development Project (BARTAD), a program funded by the U. S. Agency for International Development.

Dr. Kyle, whose appointment became effective Jan. 1, has been serving as professor and extension specialist at Michigan State University since 1953. He had previously served on the faculties of the University of Illinois, Purdue, and Ohio State.

He earned the B.S. degree in agricultural engineering from Michigan State and advanced degrees in agricultural economics from Purdue.

Dr. Kyle is a member of the American Agricultural Economics Association, the American and Michigan Societies of Farm Managers and Appraisers, and Phi Beta Kappa.

Former football coach **Charles "Rip" Engle** is the second recipient of the "Babe" Hollingberry Award from the East-West Shrine Game.

The award is given to the former player or coech in the East-West Shrine Game who has "distinguished himself in American life." President Ford, a former center and linebacker at the University of Michigan, won the award when it was instituted last year.

Engle, who never had a losing season in 16 years as head coach at Penn State, serves as selection chairman of the East team for the annual charity game. He is a member of the National Football Foundation Hall of Fame.

Engle recorded more victories than any other Penn State football coach, roiling up a record of 104 wins, 48 losses and four ties before turning over the coechlng reins to Joe Paterno in 1966.

The award is nemed in honor of Hollingbery, who was one of the founders of the East-West Shrine Game and coeched the first 20 West teams.

Dr. Samuel M. Curtis, associate professor of agricultural education, is co-author of a new textbook for junior high school students entitled, "Careers in Focus: Exploring Occupations in Agribusiness and Natural Resources."

Designed for career exploration, the book examines 27 areas of agribusiness and natural resources. A unique phase involves the student in performing a task common to the career under discussion. For the occupation "seedsman," for example, the student conducts e germination test. For veterinarian, the student uses a microscope to look for internal parasite eggs.

Co-author is Dr. R. J. Mercer, of Clemson University.

Dr. Robert E. Newnham, chalrman of the solid state science section In the College of Eerth and Mineral Sciences, has been nominated by the National Committee for Crystallography of the National Research Council to serve as one of its members for a three-year term. The committee, which selects four members each year, meets annually to meintein relations between the International Union for Crystallography and the crystallogrephers of the United Stetes.

Dr. Geoffrey Godbey, essociete professor of recreetlon and parks, is the coauthor of a new book, "Leisure Studies and Services: An Overvlew," publshad by W. B. Saunders Press or Philedelphie.

The book is designed to be an introduction to the study of leisure behavior, utilizing theories and research findings to examine relationships between leisure end work, education, religion, the family, the life cycle, sexual behavior, the community, and government.

Dr Joseph Pedulla, assistant professor of physics at Capitol Campus, has been awarded a $1,500 research grant by Hershey Foods Corporation.

Dr. Pedulla plans to use this support for his research of electronic and surface properties of the amnoacids. This investigation of the amino eclds is being undertekeen to gain e fundamental understanding of the rotes proteins and enzymes play In biologlcet processes and systems. His long-range plan is to set up a laboretory for the continuing eresrch of these topics that would also be a source of expertise in the field of physics available to local industries.

Edward H. Browder, assistant professor of naval science, was recently promoted to the rank of captain in the United States Navy. Capt. Browder has been e navel officer for 18 years and was a commending officer of a Poseidon bellistic missile submerine, prior to joining the faculty.

Two administrative posts open

Applications and nominations of candidates for the position of director of the Center for the Study of Higher Education have been requested.

The Center, established in 1969, has a full-time professional staff of six, to whom the director has a collegial relationship, and a number of part-time appointments. Primary attention is devoted to research and to public and university service in higher education. The staff contributes significantly to the graduate program in higher education through teaching and research supervision. The director of the Center reports to the Provost of the University.

Candidates should have substantial accomplishments in the field of higher education or in related disciplines. In addition to a university background, some experience at the state, regional or national levels working with leaders involved with research and policy formation in higher education is desirable.

Nominations and applications are invited from persons who have had experience as faculty members, researchers, and administrators in a university setting; as major officials with responsibilities in higher education at the state, regional or national levels; or as professionals with extensive involvement in foundations or associations.

The deadline for nominations is Feb. 17. Nominations should be sent to: Dr. James B Bartoo, dean of the Graduate School and chairman, Search Committee, 203 Kern Graduate Bldg.

Applications and nominations are also being accepted for the position of assistant vice pres dent for student affairs for branch campus liaison and coordination.

The position, available July 1, involves liaison communications and coordination of system-wide policies and procedures, and programs and services in the Office of Student Affairs; selection, development and evaluation of branch campus staff; program development, coordination and appraisal.

The qualifications: a doctorate is preferred, plus significant experience in university administration in the student personnel area. Experience preferably includes involvement in a multi-campus university setting and/or in two-year institutions.

Applications or nominations, including a resume and references, should be sent, before March 1, to Ms. Jane E. McCormick, assistant to the Vice President for Student Affairs, 235 Boucke Bldg.

Provost hunt

(Continued from page one)

Individuals should have an understanding of the functions, missions, and goals of a large, multi-campus, land-grant university. Candidates must have a commitment to programs of equal opportunity and affirmative action. They also must have the proven ability to communicate well with the University community and the public.

Applications with resumas and references should be submitted to:

Dr. John J. Coyle, Chairperson,
Search Committee, University Provost,
201 Old Main.

Dr. Coyle said applications are requested by March 1.

Funding opportunities

(212-1) Special Health Career Opportunity grant applications are now being accepted by the Health Resources Administration to increase admissions in school of medicine and public health by persons who will serve shortage areas and persons who are disadvantaged. Applications must be submitted to regional offices by March 1. Call 215-596-6475 for application material (Ref. 41FR-2104-05, 1/14/76)

(212-2) Proposed guidelines and a March 17 deadline date have been announced by the **Office of Education** for its **Bilingual Vocational Training** program. Projects include grants and contracts for training post elementary and secondary persons, persons in the labor market, and training allowances for participants. (Ref. 41FR2351-53, 2271, 1/15/76) (CFDA 13.556)

(212-3) The **Environmental Protection Agency (EPA)** has issued guidelines for federal agencies use of recycled materials, including procedures for **consultation.** Also issued were guidelines for solid waste management by federal agencies including **planning and analysis consultation** on recovery procedures. (Ref 41FR2255-63, 1/15/76)

(212-4) The **U.S. Department of Housing and Urban Development** has issued regulations for its **Community Development Block Grants** program which includes activities to develop community development plans and policies, evaluate programs, and implant activities. (Ref. 41FR2765-68, 1/19/76).

(212-5) The **National Institute of Education (NIE)** is now accepting **unsolicited proposals** (eff. 1/8/76) and policy information is available. Also available are preliminary program **plans for FY 1977,** including six major programs dissemination, basic skills, finance and productivity, education and work, school policy for problem solving, and educational equality (Ref. NIE summaries).

(212-6) The **Office of Federal Programs** (OFP/AASCU) has issued a special report on **federal support for preservice and inservice teacher training.** Agencies covered include: HRA, NSF, OE, and OHD. Six subject areas are included within the OE coverage: elementary and secondary, higher education, international studies, special project eci programs, special target groups and areas, and vocational education. (Ref. lold)

(212-7) The **Office of Education** has issued regulations for its **Desegregation of Public Education** program and announced a March 5 **deadline date** for applications. The program includes: technical assistance arrangements with State education agencies, general assistance centers, training institutes, and grants to school boards which provide for the employment of specialists. (Ref 41FR1875-84, 1/12/76) (CFDA 13.405).

Staff vacancies

Staff vacancies contained in this publication are those which generally require at least a baccalaureate degree or equivalent as a minimum educational qualification. Staff vacancies requiring less than the baccalaureate degree as well as those announced in the intercom may be found in the Penn State Reporter.

This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network Line 475-1387). Applications for these staff vacancies will be received until 5 p.m.,

Thursday, Feb. 5. Do not contact the area that has the vacancy

MANAGER — COMMUNICATIONS, OFFICE OF BUSINESS SERVICES ... University Park

Responsible to the Director, Printing and Communications, for the planning, development and administration of the Communications Department, including University Addressing, Mail, and Telephone Services. A bachelor's degree plus four to seven years of effective management or similar administrative experience in the telecommunications field is required.

Black enrollment

(Continued from page two)

In fulfilling its charge, the Task Force consulted with various groups from within the University and with groups from communities in greater Pittsburgh and Philadelphia. Reactions were solicited from students, faculty, staff, alumni, high school counselors, and Black community leaders during meetings held at the Ogontz Campus, at the University Park Campus, in Philadelphia, New Kensington, McKeesport, and Pittsburgh.

The Task Force recommended establishment of goals for increasing enrollment of Black students and an operational plan for implementing the goals.

In developing an overall plan for increasing Black enrollment at Penn State, the group examined a broad number of areas, including student recruitment, admissions policies, financial aid, academic support services, expansion and role of Black faculty and staff.

Members of the Task Force, in addition to Dr. Dunham and Dr. Murphy, are Dr. James B. Bartoo, dean of the Graduate School; Dr. Glenn G. Carter, director of the Office of Secondary School Relations; Joseph F. Douglas, associate dean of academic instruction for Commonwealth Campuses; Dr. Edward V. Ellis, associate dean for continuing education at the College of Human Development; Dr. Patricia Ferrell, associate professor of recreation and parks and former affirmative action officer; Dr. Herbert G. McGibbney, director of the McKeesport Campus; Dr. Nunzio J. Palladino, dean of the College of Engineering; and Mrs. Thelma T. Price, assistant vice president for student affairs for special program and services.

News in brief

(Continued from page one)

through telescopes under the guidance of astronomy club members. Each viewing session is preceded by a briefing in room 445 Davey Lab.

No tickets are required, but the show goes on only if it is possible to see most of the brighter stars with the unaided eye. If the sky is cloudy, the program will be re-scheduled for the following night, Saturday, Feb. 7.

"Black Experience" exhibit

Charles L. Blockson, a former Penn State football player and track star (he once held the discus and shot put records), will present his noted exhibition, "The Black Experience in America — From Colonial Times to the Present," Feb. 2-15 at the University.

The exhibition includes books, pamphlets, photographs and manuscripts from Mr. Blockson's personal collection, recognized as one of the largest private African-American collections in the United States.

The exhibition will be held at three locations: Pattee Library, in the main lobby and in the Rare Books Room; the Cultural Center, Walnut Bldg.; and the main lounge of the Hetzel Union Bldg.

The new lobby of Pattee will feature three topics: "West Indies," "Black Women" and "Theatre and Art." In the Rare Books Room, the following topics will be highlighted. "Early Views of African Life," "Slavery and Abolitionism," "The Revolutionary War Years," "The Civil War Years" and "Religion."

Featured in the main lounge of the Hetzel Union Bldg.: "Athletes," "Literature," "Music" and "Politics."

At Walnut Bldg.: "Post Cards on Black Life" and "Books on Black Pennsylvanians."

The exhibition is sponsored by the Black Studies Program at the University.

Musica da Camera concert

Musica da Camera, University chamber orchestra conducted by Dr. D. Douglas Miller, associate professor of music, will perform a benefit concert for the group's tour fund at 8:30 p.m. Sunday, Feb. 15, in the Museum of Art.

Proceeds from the concert, which will also feature performances by the Alard and Atherton string quartets, will benefit a fund for the chamber orchestra's projected May, 1977, European performance tour.

The program will include chamber pieces by such noted composers as Mozart, Heydn, and Shostakovich.

Tickets are available at Room 232 Music Bldg. from 8 a.m. to noon and 1 to 5 p.m. Monday through Friday. Mail orders accompanied by payment will be accepted.

The donation requested per person will be $5.00, which is a tax-deductible gift to Musica da Camera.

Surrealist show in Zoller

David Hare, American Surrealist sculptor and painter, will exhibit painting and drawings executed at various times during his career in an exhibit opening Sunday, Feb. 1, in Zoller Gallery.

Mr. Hare, among this country's artists associated with Andre Breton and the Surrealist movement in America in the 1940s, will also visit the University to conduct seminars for art students and for the public; reception for the exhibition at 7:30 p.m. Monday, Feb. 9, in the gallery.

A student of analytical chemistry in schools in New York, Arizona, and Colorado until 1936, Mr. Hare was one of the important pioneer artists attending the 1937 Surrealism conference at Penn State and exhibiting in the group Surrealism show held in conjunction with the conference.

His work was the subject of one-man shows in the 1940s in galleries in San Francisco, New York, and Paris, and he has had works shown in Latin America.

Architect Percival Goodman commissioned him to do an Eternal Light and Menorah for the Temple Beth Al building in Providence, R.I.

Work by Mr. Hare has been widely reproduced in newspapers, magazines, art books, and art periodicals, and included in virtually every exhibition of important American sculpture since 1946.

In recent years, Mr. Hare has turned primarily to paintings, which "continue his symbolic thrust directed toward the universalities of life," according to "Art in America."

The Zoller Gallery exhibit, on view through Feb. 20, was shown previously at the Alessandra Gallery, New York, and will travel to galleries in Massachusetts, Texas, and Ohio.

Renaissance Fund annual report

Dr. James B. Bartoo, dean of the Graduate School, and Dr. Joseph F. Spiegel, director for financial aid, have been elected to the executive committee by the Board of Directors of the Renaissance Fund at the Board's annual meeting.

Presenting the scholarship report at the meeting, A. M. Wellington, professor of counselor education and program director, reported that of 84 Renaissance Scholars enrolled for the fall term, 14 had 4.00 averages, 25 made the dean's list, and 42 maintained averages above 3.00.

Each Renaissance Scholar receives $325 per term as a budget base that is applicable for these very able and demonstrably needy students to attend Penn State.

Renaissance, with Scholars on 10 campuses and in 10 Colleges, is identified as the only major scholarship program open to both two- and four-year degree candidates and operating throughout the University system.

An additional $14,000 in gifts to Renaissance is needed to meet the expenses of the present Scholars for the 1976 spring and summer terms. University associates may send checks payable to the Renaissance Fund to 100 Old Main.

Lions-Panthers TV hit

The televised Penn State-Pittsburgh football game lost fall attracted more viewers than any other game on the ABC TV college football package.

Statistics released recently by the National Collegiate Athletic Association television committee show that the Penn State-Pitt game had the best rating (17.0) and most homes (11,800,000) of the year.

Council: resolving student allegations

University Council, meeting Jan. 22, continued discussion of its revision of the interim procedures for resolving student allegations of discrimination as required by Title IX of the Education Amendments of 1972, the interim procedures having been published last August.

The subcommittee, headed by Dr. Richard F. Reynolds, assistant professor of mathematics of the McKeesport Campus, discussed its recommendations for the formal procedures to be followed if discrimination charges reach the formal proceedings rather than terminate with informal action. The preliminary steps or informal procedures were reviewed at the last meeting.

Following the review at the meeting last Thursday, the subcommittee decided to prepare its recommendations in draft form for further and possibly final consideration by Council at the Feb. 5 meeting.

At the meeting, William J. Murphy, of Levittown, N.Y., graduate student in anthropology, was introduced as the new graduate student member of the Council, succeeding Kevin N. Wright, of State College, graduate student in community system planning and development. Mr. Wright will conclude his service upon the completion of the work of the subcommittee on revision of procedures for resolving student allegations of discrimination.

Dr. Russell E. Larson, provost, as chairman of the Council, presided at the meeting, and informed Council members that the recommendation of the Council that additional tuition should not be charged to students carrying more than 13 credits in a term will be forwarded to the President within the next few days. Council at its last meeting expressed the concensus that from an academic point of view, and without consideration of the financial side, no additional charges should be made.

NAS study puts Material Sciences and MRL at top of their fields

The program of the Department of Material Sciences and the Materials Research Laboratory at the University rank at the top of their fields, according to a new National Academy of Science study.

The department, which is headed by Dr. Phillip L. Walker Jr., Evan Pugh Professor of Materials Science, is a unit of the College of Earth and Mineral Sciences. It consists of sections in carbon and polymer science, ceramic science, fuel science, metallurgy, mineral processing and solid state science.

The Materials Research Laboratory is one of the oldest of the Intercollege research programs on the campus, involving faculty from eight departments with major representation from the University's Departments of Material Sciences, Physics and Electrical Engineering. Dr. Rustum Roy, professor of the solid state, is the director of the laboratory.

In the release of the four-year study by the National Academy of Sciences, it was noted that the interdisciplinary field of materials science was not covered in the American Council on Education or Roose-Anderson surveys of graduate education. The NAS study, therefore, may become the major national evaluation of departments in this field.

The evaluation by the NAS "COSMAT" study group was conducted using some of the new quantitative methodologies (1, 2) gaining increasing acceptance. The figures show the results of the committee's studies regarding the "strength" of the graduate programs of materials science departments. For both, it is found that the same ten departments occupy the upper-strength regions of the two diagrams.

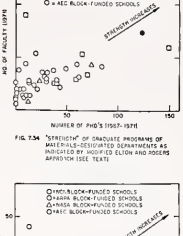

FIG. 7.34 "STRENGTH" OF GRADUATE PROGRAMS OF MATERIALS-DESIGNATED DEPARTMENTS AS INDICATED BY MODIFIED ELTON AND ROGERS APPROACH (SEE TEXT)

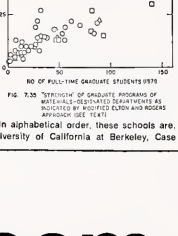

FIG. 7.35 "STRENGTH" OF GRADUATE PROGRAMS OF MATERIALS-DESIGNATED DEPARTMENTS AS INDICATED BY MODIFIED ELTON AND ROGERS APPROACH (SEE TEXT)

In alphabetical order, these schools are. University of California at Berkeley, Case Western Reserve, Illinois, Lehigh, Messechusetts Institute of Technology, Northwestern, Ohio State, Penn State, Rensselaer Polytechnic Institute and Stanford. Penn State, the study shows, is essentially tied for first place with M.I.T. (Dark circle shows Penn State on the figures.)

The report on the Materials Research Laboratories of the nation is the first national evaluation of the concept of interdisciplinary institutes and centers on university campuses. Insofar as such centers have grown very rapidly at all major universities, and the demends by Federel and State governments for societally relevant research are likely to accelerate this trend, the COSMAT study is of considerable interest to university administrations, according to Dr. Roy. He notes that of some 30 interdisciplinary materials laboratories, the majority (not including Penn State) were "block funded" since about 1962. The study evaluates the "productivity" of the laboratories in terms of graduate degrees, research papers and the cost of each. It evaluates the degree of interdisciplinary fusion achieved and the "coupling" with industry. On these parameters, the Penn State MRL stands very high.

While no exactly analogous ranking was conducted of the Intercollege Materials Research Labs, the Academy report grouped all labs into three groups. The first of these contened what was called the Major Materials Institutions. The report reads:

"Group A. Major Materials Institutions (MMI). Institutions which have a materials-center building providing a physical and intellectual focus for major materials research programs, relatively strong centralization of administration, a major degree program in materials, together with strong materials research in solid-state physics and chemistry."

In this category, Cornell was added to the ten universities previously identified.

An even more important evaluation of the Materials Research Labs comes from the fact that Penn State is one of only four labs newly selected for support by the National Science Foundation, Dr. Roy says.

The NAS study was directed by Dr. William O. Baker, president of the Bell Telephone Laboratories, and Dr. Morris Cohen, of M.I.T., with Dr. Roy serving as chairman of the panel conducting the University study.

In commenting on the University's high standing in the materials field, Dr. Roy noted thet one of the most important end definitive results of COSMAT was to show, thet at Penn State (and elsewhere), intercollege efforts on the campus are nearly always synergistic and not competitive with departments. Both the academic departments and interdisciplinary research units involved were enabled to attain excellence by active cooperation.

Black Studies offers 3 options

Three options are now available in the University's Black Studies Program to undergraduates in any major in any college. Options offered in the interdisciplinary, intercollege program are African Studies, Afro-American Studies, and the cross-cultural Black Studies.

Each of the three options has a specific emphasis. The African Studies Option is designed for students with special interests in Africa; the Afro-American Studies Option is slanted toward students interested in Afro-American culture and black people's development in the U. S., and the Black Studies Option is designed for students who may not wish to specialize in African or Afro-American Studies but combine courses from both areas.

Undergreduates can combine one ot the options with eny approved major field of study, according to Dr. Cyril E. Griffith, director of the Black Studies Program, and receive from the Black Studies Committee a certificate in addition to a diploma upon graduation.

The objectives of the program are to provide students with courses containing specific data about black culture and progress in Africa, the Caribbean, and the United States; to evaluate the relationships between Afro-Americans and black people in other parts of the world; to evatuete the relationships between the new states in Africe, the Caribbean, and other independent nations; and to make students aware of the contributions Afro-Americens have made to Americen culture.

The options are designed to help students understand the relationships between Afro-Americens, other minorities and the white majority in America; to provide black students attending a predominantly white institution with courses that will give them specific information about their heritage; and to provide students in all colleges with some academic training that will prepare them to deal more effectively with race relations in various professions.

News in brief

LaMontaine text issued

John LaMontaine's text of "Be Glad Then America" has been published by Penn State's Press. The 44-page book contains the libretto and extensive bibliographic notes on the sources ot the text, which was drawn entirely from actual pre-Revolutionary materials. Designed by Glenn Ruby and edited by Carole Schwager, the richly illustrated book reproduces a number of these original sources. It is available in soft-cover for $2 at Room 105 University Auditorium from 8 a.m. to 5 p.m. through Feb. 6 or at the Feb. 6, 7 and 8 performances.

Aging is lecture topic

Dr. Robert R. Kohn, professor of pathology at Case Western Reserve School of Medicine, will present a public lecture on "Biomedical Aspects of Aging" at 7:30 p.m., Monday, Feb. 9, in Room 108 Forum Bldg. The talk is sponsored by the Gerontology Center, Institute for the Study of Human Development, in cooperation with the Department of Biology.

Dr. Kohn, who teaches a graduate course in Principles ot Mammalian Aging and has published a popular text of the same title, has been actively involved in aging research for the fest 15 years. Most of his many research publications deal with human aging and disease, changes in connective tissue as a determinent of rete of aging and the characteristic age-incidence of some cancers.

Church historian to speak

Dr. Robert J. Bull, professor of church history at Drew University, will eddress the Centret Pennsylvenia Chapter of the Archeological Institute of America at 8 p.m. Tuesday, Feb. 10, in Room 112 Kern Graduate Bldg. The subject of his public lectura is "The Excavetions at Caesarea Mertima."

Dr. Bull is a distinguished scholar with long experience in Biblcel studies end Neer Eastern archaeology. Ha has su-

Trustees named for provost review

An ad hoc trustee committee has been appointed of the Universlty to work with President Oswald in the review of candidates for the position of provost as recommended by the University Screening Committee.

The committee, which was named by W. K. Ulerich, of Clearfield, president of the Board, includes the chairpersons of the standing and special committees of the Board and the officers of the Board.

The members are: Michael Baker Jr., of Beaver, chairman; George H. Deike, Pittsburgh; Ralph Hetzel, Kent, O.; Samuel F. Hinkle, Hershey; J. Lewis Williams, Uniontown; and Or. Helen D. Wise, State College; Mr. Ulerich and Dr. Oswald will serve as exofficio members.

The ad hoc trustee committee, Mr. Ulerich said, will be convened upon the receipt by President Oswald of the report of the University Screening Committee.

Appointment of an ad hoc committee of trustees to work with the President and the University Provost Screening Committee was recommended to the Board at the Nov. 7 meeting by Mr. Baker, who suggested the appointments should be made after the election of officers of the Board at the January meeting. The Board voted to authorize the President of the Board to eppoint the ad hoc committee.

Faculty asked to conserve energy

The Executive Energy Conservation Committee at the University, headed by Ralph E. Zilly, vice president for business, has nearly completed an important initial phase of its duties — overseeing the operational changes, minor repairs, maintenance and installations that have resulted in savings estimated between $150,000 and $250,000 per year.

However, to be truly effective, things like installation of water flow restrictors and light timers and the removal of fluorescent tubes must be accompanied by energy conservation efforts by faculty, staff and students.

"The theme we've played over and over is that the Executive Energy Conservation Committee end the Office of Physical Plant can only be as successful as the cooperation from people permits," says J. Carroll Dean, manager of the energy conservetion programs. "The energy conservetion program at Penn State will be only 50 percent effective unless the whole University tamily gets concerned about it."

Mr. Dean points out that, despite reminders from the committee, windows are still left open at night and lights remain on long after people have left their offices. Some people, too, refuse to keep the heat at levels dictated by policy.

"I'm not sure how we convince people that energy wasted on the campus is money out of their pockets," says Mr. Dean, "but, believe me, that is the case. With fuel prices tripling, it's not difficult to see that taxpayers, those paying tuition and those working for the University will all be financially effected."

Mr. Dean stresses that channels exist for employees to participate in the energy saving ceuse, whether it be through complaints, requests for repairs or tips on conservatton. Repair requests should be made by celling the Service Desk at 865-4731. Suggestions on conservation, exclusive of repairs, can be made by calling on the "Energy Hotline" — 865-1117.

Mr. Dean also suggests that employees keep in contact with their individual building coordinators. Coordinetors are the leilson for faculty, staff and students with the Office of Physicel Plant. Coordinetors for a given building can be identified by contacting the Service Desk.

To those who think there is no energy crunch and that their individual efforts will be of no importance, Mr. Dean says: "Even if you choose to think there is no energy

(Continued on page four)

PENN STATE COLLECTION

Journal publishing may not be the road to riches,

Penn State's Press publishes five journals, all of which are edited by University faculty. In these articles, prepared by Nancy Miller of the Public Information staff, the editors describe their publications, and Press director Chris Kentera discusses some of the problems facing the field.

"When you publish most journals, you're guaranteed not to make money. In books you have more leeway; at least you can hope."

But even as he recognizes such grim economic realities, University Press director Chris K. Kentera is committed to journal publishing. "Journals perform an important function in the academic community," he says. "Someone has to publish them."

Most often the job falls on university presses. The Pennsylvania State University Press publishes five journals: "The Chaucer Review," "General Linguistics," "The Journal of General Education," "Philosophy and Rhetoric," and "The Shaw Review."

Mr. Kentera notes that only one of the five is managing to break even. The other four must be subsidized by the Press.

"This isn't unusual. Journals everywhere are in a financial bind," Mr. Kentera continues. "Manufacturing and distribution costs are rising. Average composition costs per page, for example, have risen from $7.80 to $20.00 in the past three years."

Because journals seldom make money, many commercial publishing companies won't take them on. As a result, most journals are published by either specialized journal publishing corporations or universities. And because university presses seldom expect to show a profit, they are rapidly taking over a large share of the job.

Although the financial squeeze has forced some journals to cease publication in recent years, the field is far from moribund.

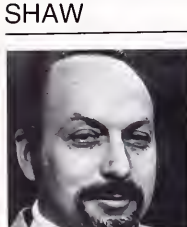
"We get 50 to 60 requests each year to publish other journals," says Mr. Kentera. "Some of them are already in existence, and the editors are looking for a new publisher, but many of the requests come from people wanting to start new publications."

The chances of getting such requests accepted are decreasing. "The number of journals published has been growing for the past 20 years," Mr. Kentera points out, "but now it's leveling off and may even decrease."

He admits that in his three years of directing Penn State's Press, he has seriously considered taking on only two new journals, and in the final analysis, both were rejected.

What makes a new journal attractive?

"It must be a first-rate and interesting idea," says Mr. Kentera, "and, of course, it must represent a sound risk economically."



Subscriptions play a major role in assessing economic feasibility, so some guarantee of subscribers is a prerequisite for proposed new journals. Ironically, at the same time that manufacturing and distribution costs for journals continue to rise, subscriptions are falling off.

"You feel you're ahead of the game just to keep what you've got," says Mr. Kentera.

Inflation has forced many libraries — which probably account for at least half of all journal subscriptions — to cut back on their orders. Individuals, too, are dropping subscriptions and relying more on library copies.

"The most economically successful jour-

SHAW

Stanley Weintraub

Last September, "The Shew Review" published its 25th anniversary issue. For 19 of those years, the journal has been a constant companion of Dr. Stanley Weintraub, research professor of English and director of Penn State's Institute for the Arts and Humanistic Studies.

"I think it must have been naivete that first got me involved with it," Dr. Weintraub reflects with a resigned chuckle. "Several of the previous editors found themselves unable to do the work, and the Shaw Society, which then published the journal, asked me to take over. I had no idea how much work would be involved."

The work has paid off. In two-and-a-half decades, "The Shaw Review" has grown from a mimeographed bulletin "with a lot of gossip in it" to a full-fledged scholarly journal with a worldwide circulation of about 800.

"I don't think anybody can write about Shaw without seeing the Review regularly," Editor Weintraub says. "It's the only place where a continuing bibliography of Shaw studies is published, and we publish pieces that couldn't be found anywhere else. For example, we're about to print a lecture given in 1908 by the woman who first played the title role in 'Major Barbara.' Shaw directed his own production, and she talks about him as a director."

The University Press took over "The Shaw Review" in the early 1960s just before the Shaw Society folded. "The involvement of the press is very minimal," Dr. Weintraub explains. "They make it possible to get cheaper printing rates and they take care of depositing the money. But all the editing work is done by volunteer labor."

This volunteer labor has helped make "The Shaw Review" the only Penn State journal operating in the black. "My wife Rodelle, the Review's assistant editor, and I do an awful lot of proofreading," Dr. Weintraub notes, "and I do a lot of the journal's correspondence by typing out letters in my usual way — with one finger. We cut corners where we can."

A few years ago Dr. Weintraub decided against having a summer issue of the journal and to keep it as "a quarterly without a summer edition."

"The summer quarter would have been the weakest issue in terms of reader response and the most difficult to put out due to shortages of personnel during that season," he notes. "Cost wasn't a factor in making the decision then, but it would certainly be now. A number of journals are going to three issues per year."

Another change in "The Shaw Review" is the appearance of special issues. Like many journal editors, Dr. Weintraub has found that these issues are favorably received.

"They contain a coherent mass of material and appeal to a specific interest that is often interdisciplinary," he says. "For instance, our special issue on Shaw and Woman, edited by Rodelle, might interest not just Shaw scholars, but people interested in women's studies as well."

Support for this supposition came in a letter from a woman scholar in California.

"She wrote to us that she had looked for our issue on Shaw and Woman in two university libraries, and at both it had been ripped off," Dr. Weintraub recalls. "We sent her a copy, and figuring that here was a way to make another sale, we wrote to the libraries and offered to sell them replacements. We got the new orders."

This kind of meticulous attention to detail characterizes Dr. Weintraub's long association with "The Shaw Review." If ignorance of the ramifications of the work led him to take the job, years of experience haven't dulled his commitment.

"The toughest part of editing the journal is finding the time to do it," he reflects. "A lot of the time has to come from what might otherwise be saved for personal reading or as a hobby. But by now the Review has become sort of second nature to me; so I guess it really is one of my hobbies."

LINGUISTICS

"Linguistics is a highly specialized field with many sub-fields, and our chief function is really to cover as much as we can in all areas," says Dr. William R. Schmalstieg in describing the aim of "General Linguistics."

Dr. Schmalstieg, who is professor and chairman of Slavic languages at Penn State, became associated with "General Linguistics" soon after it was founded at the University of Kentucky, nearly 20 years ago.

In the 1960s, both Dr. Schmalstieg and the journal came to Penn State, and he has been its editor since 1971. Last September, Dr. Phillip H. Baldi, assistant professor of classics and linguistics, became co-editor of the journal; he was formerly book review editor.

The quarterly has a circulation of about 700. Many of these subscriptions come from abroad, and of all of Penn State's journals, "General Linguistics" relies most heavily on a truly worldwide circulation. "Without the international basis, I don't know if we could function," Dr. Schmalstieg admits.

The bulk of the journal is in English, but it also accepts pieces in German, French and Russian. "A few years ago, we published a major piece in Russian," Dr. Schmalstieg recalls, "and chances are that most of the linguists interested in this particular article could read the language."

He finds that this international aspect of the journal often stimulates lively exchanges. "For example, in a recent volume there was a discussion between a professor at SUNY-Binghamton and one at Freiburg, West Germany," he notes. "In an earlier issue the German had reviewed a book by the man from Binghamton. The latter was so upset by the review that he decided to reply, and we had a very exciting issue."

Dr. Schmalstieg credits book reviews for much of the success of his journal. "I think a lot of our reader interest lies in the reviews," he says. "Our articles are so specialized that they are usually only of real value to a small portion of our readership, whereas the reviews are written at a level that the average linguist can understand, so they generate considerably more interest."

The specialized nature of articles poses some unique problems. "When I send out an article for refereeing, I try to maintain the anonymity of the judge in so far as possible," Dr. Schmalstieg says. "But that's not always easy in a field so specialized. Recently, for example, I received an article on Proto-Miwok phonology and sent it to a qualified reader. The notes he sent back were in longhand, so I had them typed to protect the reader's identity. But when I sent them to the author, he instantly recognized the referee. There just aren't that many people in Miwok."

William Schmalstieg and Philip Baldi

PHILOSOPHY

Penn State's newest journal is the product of reel interdisciplinary thinking and action.

"Philosophy and Rhetoric" was founded in 1968 by a member of the Department of Speech, with philosophy professor Henry Johnstone as its first editor. Today the journal is still a cooperative effort of speech and philosophy. Dr. Johnstone continues as editor, assisted by an associate editor, Dr. Carroll Arnold, professor of speech.

"Man is a rhetorical animal. Rhetoric is built into the human condition. Therefore it's a concept that needs to be looked at philosophically," Dr. Johnstone says, "and I suppose that's the mission of our journal."

In the eight years of its publication "Philosophy and Rhetoric" has amassed a subscription list of about 850. According to its editor: "Most of them are in speech, probably no more than one quarter are in philosophy, and we have a lot of libraries."

But despite a modest circulation, the journal has attracted an impressive number of contributors.

"We very rarely solicit articles," Dr. Johnstone explains. "We don't need to. They come to us on an average of two to three a day.

"Many are totally unrelated to the field," he adds. "But about half are relevant and to these we give careful consideration."

Like all journal editors, Dr. Johnstone relies on colleagues to serve as readers, or referees, in evaluating proposed manuscripts. ("Philosophy and Rhetoric" is a "refereed journal" in the sense that it accepts no articles that have not been approved by independent readers.) But Dr. Johnstone does much of the first reading himself.

"I probably spend two hours a day doing this, and I do enjoy reading a good manuscript when I get one," he says, adding with a note of resignation, "the converse is also true."

Deciding what to publish isn't easy. "As a quarterly we are limited to a maximu

it's still an important function for a university press

nals are those associatad with e professional organization," Mr. Kentere explains.

Probably tha largest journal is that of the Modarn Languaga Association, with 29,000 subscribars. When you join the association, you are automatically a subscriber to its publication.

Viewed topically, science journals are surviving bast. "They sell better bacausa of the pragmatism of tha fialds they report," Mr. Kentera notes. "In a rapidly developing disciplina you hava to raly on journals to stay current."

Ha adds that science journals tend to be more international than those in the arts and humanities, drawing on the entire world for subscribers.

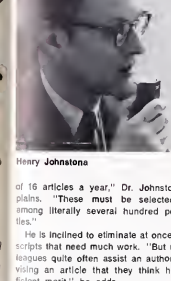
Science journals have another economic advantage. Traditionally authors pay the composition costs for having their works published in these periodicals. Composition costs represent a third of the total manufacturing costs in journal production.

Nona of the journals published by the Press has the advantage of guarenteed subscribers, which helps account for their losing money.

It is only ethical responsibility that keeps the University Press involved in journal publication?

"Not entirely," Mr. Kentera admits. "Publishing journals does sometimas have soma carry-over into the book business. Authors get to know the Press from its journals, so they send us othar manuscripts. We've gotten some interesting books this way."

Conversely, Mr. Kentera says, he sometimes gets book manuscripts that are weak in themselves but could be reduced to a good journal piece. Because he knows journals, he can make this recommendation to the author.



Being a journal publishar is not without its lighter moments. "Some of the proposals we get for new journals are kind of fun," Mr. Kentera reflects.

"We were once asked to do a scholarly quarterly on comic strips, and we regularly get requests for journals on pornography—most of them illustrated, of course. But I think my favorite proposal came from a New Englander who wanted to astoblish a journal devoted to literary criticism of science fiction, and he was certainly the man to do it. He claimed firsthand experience with extra-terrestrial material. Maybe someday someone will publish it — but it won't be The Pennsylvania State University Press."

Chris Kentera

RHETORIC

Henry Johnstone

of 16 articles a year," Dr. Johnstone explains. "These must be selected from among literally several hundred possibilities."

He is inclined to eliminate at once manuscripts that need much work. "But my colleagues quite often assist an author in revising an article that they think has sufficient merit," he adds.

"For example, I recently gave Carroll Arnold a manuscript with a note that said, 'Do not read this.' Ali I really wanted was help in writing the rejection letter. But he did read it and liked it, did the necessary work, and now we're going to publish it."

Dr. Johnstone shares with most editors the belief that good articles find publishers. "We think we've turned down very few manuscripts that should have been published," he says. "Because we are the only journal of its kind in the world, we like to feel that new ground has been broken in each of our articles.

"We have produced a genuinely interdisciplinary anterprise, and it's an important one. We think we are stimulating interest in a new field, and this interest has stimulated academic development."

JGE

"We like to think we publish for academics interested in things going on beyond thair own particular fields," says addtor Robert Eckhardt of "The Journal ot Genarel Education."

His wife, Caroline, who co-edits the publication, adds, "Contrary to what some people think, the true generalist isn't someone without a specialty — he's someone with a specialty and with a desire to know more about other fields. These are the people for whom we're publishing."

The Eckhardts fit this description. Both have interdisciplinary backgrounds. He is an assistant professor of anthropology; she holds a joint appointment as assistant professor of English and comparative literature.

Their journal is the only generalist periodical published by the University Press, and Caroline Eckhardt feels that the University needs such a journal: "It's a recognition that Penn State, as a state university, is more than a quality institution to train people in specific directions. It's a community of people who want to share ideas across disciplines as well."

JGE is also Penn State's longest running and largest subscribed journal. It began at the University of Chicago in 1946 and moved to Penn State in 1961 under the guidance of Howard A. Cutler, Ben Euwema, and Henry and Carol Sams. The quarterly now has about 1,500 subscribers.

In the past 18 months, "The Journal of General Education" has bean undergoing a change in emphasis. Its once eclatic table of contents has been giving way to issues focusing on a single topic or theme.

This special issue approach isn't unique to "The Journal of General Education." Generalist publications across the country have turned to it as a possibilty for attracting new readers.

"But ours was a positive decision made without primary regard to economic consequences," Robert Eckhardt notes. "Selfishly, when we handle a number of papers all on one subject, we gain a feeling for the subject."

"Having a single focus gives each issue an identifiable personality," Caroline Eckhardt adds. "We have a distinct feeling about each one. And we get a nice cross-fertilization once in a while. Sometimes authors with different viewpoints on a subject will correspond, and out of that will come some revisions of the ideas they're working on."

Unlike other Penn State journal editors who rely wholly on unsolicited manuscripts, the Eckhardts solicit some of the articles for their special issues.

"In the future, we plan to announce topics for upcoming issues in the journal in order to give more readers a chance to contribute," Robert Eckhardt adds.

However, increased contributions bring increased headaches. Rejections are particularly difficult. "In terms of fairness, people are entitled to be told what's wrong," says Caroline Eckhardt. "Yet you can't sit down and give a tutorial in writing to everyone who sends you a poorly written manuscript, and that's often what's wrong — not the substance, but how it's put together.

"That's where editing and teaching intersect," she continues. "Editors and referees try to figure out not only why an article is bad, but also what can be done to make it better. But we cannot serve as unpaid professors of writing and logic for contributors."

Robert Eckhardt mentions one of the possible solutions: "We have occasionally thought about asking non-subscribers, at least, to pay a fee to cover the expenses of evaluating their submissions. We so far haven't done this, but some other journals have, or have limited the right to submit to subscribers. Some such procedure may eventually prove necessary for all journals that are trying to build a broader economic base."

But the Eckhardts argue that the best plan is for more contributors and readers to become subscribers.

Says Caroline Eckhardt: "I think that the academic community ought to be prepared to support its journals. I know it seems preposterous in these times to ask anyone to spend more money, but we really believe that if people want to publish, that if they regard journal publication as an important form of professional activity, then they ought to subscribe or in some other way be prepared to support the journals that make publication possible."

Caroline and Robert Eckhardt

CHAUCER

"The Chaucer Review" is celebrating its tenth birthday this year, and founder-editor Robert Frank recalls well its beginnings:

"I was a little skeptical at first, but we sent out flyers announcing our intentions to about 1,000 people. We needad 400 subscriptions in order to begin publication, and we got them. One of the first subscriptions came from a professor at Columbia; it included a note saying he had spent the past year studying the feasibility of publishing a journal devoted to Cheucer. He even had settled on a name for it: 'The Chaucer Review.' So, you see, if we hadn't done it, someone else would have."

In its first decade, "The Chaucer Review" has built up a circulation of about 1,400. Baceuse it is the only journal anywhere devoted exclusively to Chaucer, the quarterly attracts subscribers and contributors from around the world.

"My guess is that most of our readers are people who teach Chaucer," says Dr. Frank. "These people find it convenient to have a substential portion of the work being done on Chaucer available in one place."

Dr. Frank is currently professor and head of the Department of English, and editing "The Chaucer Review" adds additional hours to an already busy schedule.

"I do it, however, because I think it's a very important job. It is a service to tha profession," he says. "And it's one way of bringing some slight added distinction to the department and the University."

He adds: "My guess is that people make the association 'Chaucer Review'-Penn State ten times more often than they do 'Chaucer Raview'-Robert Frank, editor."

But there were personal challenges as well that initially attracted Dr. Frank to "The Chaucer Review." "One of the things that interested me was the chance to break away occasionally from the orthodox scholarly article — which seems particularly appropriate with Chaucer, since he wasn't all that orthodox himself," Dr. Frank explains. "We do sometimes publish translations of works connected with Chaucer and once in a while a high-flying piece just for fun."

Not so much fun are the routine chores of editing a learned journal. "What we ought to do is check every quotation cited in an article," Editor Frank notes, "but unfortunately, we don't have that kind of time.

"But we do check every single Chaucer quotation," he continues, "and you discover that nobody can quote Chaucer throughout a whole article without making at least one mistake. Finding the errors becomes sort of a game. Otherwise, it's very dull."

"Editing a journal is not the most glorified academic, scholarly kind of job," Dr. Frank reflects as "The Chaucer Review" approaches the end of its first decade.

"But it's exciting when something really good comes along by a scholar you've never heard of before — exciting to know that someone extraordinarily intelligent and creative is entering the field and you're the one who's enabling him or her to break into print."

Robert Frank

University Park Calendar

February 5–15

Items to be included in this calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, Feb. 5
Commons Videotape, 12 noon, Kern lobby.

Friday, Feb. 6
Folk and Square Dance Roundup, 7:30 p.m., south gym, White.
GSA Commonspiace Coffeehouse, 8 p.m., Room 102 Kern.
"Be Glad Then America," 8:30 p.m., University Auditorium.

Saturday, Feb. 7
Sports: Men's fencing, vs. New Jersey Tech., 1 p.m., Rec Bldg. Men's swimming, vs. Bucknell, 2 p.m. Women's basketball, vs. Cortland, 2 p.m., White. Women's swimming, vs. West Chester, 7 p.m. Wrestling, vs. Navy, 8 p.m., Rec Bldg.
Children's Winter Kernivel, 1-4 p.m., HUB ballroom. Sponsored by Volunteer Service Center.
"Be Glad Then America," 8:30 p.m., University Auditorium.

Sunday, Feb. 8
Chapel Service, 11 a.m., Eisenhower Chapel. Andrew P. Lawson, assistant director, Native American Program, P.S.U.
Black Christian Fellowship worship service, 11 a.m., Cultural Center, Walnut Bldg.
"Be Glad Then America," 3 p.m., University Auditorium.
AWS play, "Ms. Prime Ribs," 7 p.m., HUB ballroom.
Ice hockey, vs. West Chester, 7:30 p.m.

Monday, Feb. 9
Heart Association Coronary Risk Screening, 9 a.m.-5 p.m., Ag. Administration. For appointment call 238-0053.
National Lampoon Show, 8 p.m., University Auditorium. Sponsored by ARHS.

Tuesday, Feb. 10
Heart Association Coronery Risk Screening, 9 a.m.-5 p.m., Ag. Administration.
Artists Series film, "Nights of Cabiria," 8:30 p.m., University Auditorium.
Sports: Women's basketball, vs. East Stroudsburg, 8 p.m., White. Women's swimming, vs. Shippensburg, 3 p.m.

Wednesday, Feb. 11
"Noondays" devotional period, 12 noon, large chapel, Eisenhower Chapel.
Sports. Men's swimming, vs. Temple, 2:30 p.m. Men's fencing, vs. Temple, 4 p.m. Women's fencing, vs. Temple, 4 p.m., White. Men's basketball, vs. Syracuse, 8 p.m., Rec Bldg.
Gregory Donovskky, oboe, 8:30 p.m., Music Bldg. recital hall.

Thursday, Feb. 12
Commons Videotape, 12 noon, Kern lobby.

Friday, Feb. 13
University Theatre, "Norton I, Emperor of the United States," 7:30 p.m., Pavilion Theatre.
GSA Commonspiace Coffeehouse, 8 p.m., Room 102 Kern.

Friday-Sunday, Feb. 13-15
1976 Dance Marathon, HUB ballroom. Muscular Dystrophy benefit, sponsored by interfraternity Council.

Saturday, Feb. 14
Sports: Women's fencing, vs. Madison, Caldwell, Trenton, 9 a.m., White. Women's basketball, vs. Shippensburg, 1:30 p.m., White. Men's and women's gymnastics, vs. Southern Connecticut, 8 p.m., Rec Bldg.
University Theatre, "Norton I, Emperor of the United States," 10:30 a.m. and 2:30 p.m., Pavilion Theatre.
Phi Delta Kappa Ladies Night Social, 8 p.m., Room 102 Kern.
Artists Series, Alvin Ailey City Center Dance Theatre, 8:30 p.m., University Auditorium.

Sunday, Feb. 15
Chapel Service, 11 a.m., Eisenhower Chapel. Rev. Charles L. Coleman, program director, Religious Affairs.
Black Christian Fellowship worship service, 11 a.m., Cultural Center, Walnut Bldg.
University Theatre, "Norton I, Emperor of the United States," 2:30 p.m., Pavilion Theatre.

Seminars

Thursday, Feb. 5
Ceramic Science, 11 a.m., Room 301 Mineral Industries. Dr. Larry Anderson, Westinghouse R & D Laboratory, on "Analysis of the Time-Dependent Torsional Test and the Effect of Ellipsoidal Pores on the Elastic Modulus of Solids."
Chemistry, 12:45 p.m., Room 333 Whitmore. Samuel Danishefsky, University of Pittsburgh, on "Recent Progress in Total Synthesis."
Meteorology, 4 p.m., Room 26 Mineral Sciences. Daniel Keyser, graduate student, on "Sensitivity Tests with a Parameterized Mixed-Layer Model Suitable for Air-Quality Simulations."
Computation Center, 7:30 p.m., Room 105 Osmond. "Text Processing (2)."
Biochemistry, 12:30 p.m., Room 617 Life Science. Linde Stong on "Effects of Anesthesia on Cultured Beating Heart Cells."
Biology, 2:20 p.m., Room 101 Althouse. Dr. James B. Turpen, University of Rochester, on "Embryonic Origins of Skin Cells in the Amphibian Thymus."

Monday, Feb. 9
Computation Center, 7:30 p.m., Room 105 Osmond. "Text Processing (3)."
Genetics, 3:55 p.m., Room 106 Tyson. Toby Stout on "Regulation of Expression of Luxury Functions in Hybrid Cells."

Tuesday, Feb. 10
Plant Pathology, 9:30 a.m., Room 213 Buckhout. Vann Gregory on "Wheat + Rust = Less Wheat."
Biology/Gerontology Center, 9:30 a.m., Room 9 Althouse. Robert R. Kohn, School of Medicine, Case Western Reserve, on "Aging Mechanisms of Human Connective Tissues."
Analytical Chemistry, 12:45 p.m., Room 333 Whitmore. W. Smith on "Analysis of Silver Salts of Squeric Acid."
Water Pollution Control, 2:20 p.m., Room 101 Chambers. "Alternative Disposal Systems II."
Bioengineering, 3 p.m., Room 329 Electrical Engineering East. Dr. Greg Hleb, Emergency Care Research Institute, Philadelphia, on "The Purchase, Utilization and Maintenance of Instrumentation."
Biochemistry and Biophysics, 4 p.m., Room 101 Althouse. Anthony E. Pegg, physiology, Hershey Medical Center, on "Mammalian Polyamine Biosynthesis and Function."
Inorganic Chemistry, 4 p.m., Room 333 Whitmore. Mark Bradley on "Polymer Supported Transition-Metal Complexes."

Wednesday, Feb. 11
Biochemistry, 4 p.m., Room 101 Althouse. Patricia Weber on "Analysis of Serum Proteins: Biochemical Functions in Maintaining Homeostasis."

Thursday, Feb. 12
Chemistry, 12:45 p.m., Room 333 Whitmore. A Ian Scott, Yale University, on "Biosynthesis of Vitamin B-12."
Anthropology, 3:30 p.m., Room 112 Kern. Dr. Robin Fox, Rutgers University, on "The Search for Society: Darwin Legacy Durkeim."

Thursday, Feb. 12
Meteorology, 4 p.m., Room 26 Mineral Sciences. Dean Gulezian, graduate student, on "A.F.O.S. — Present and Future."
Mathematics, 4 p.m., Room 116 McAllister. Leo Harrington, University of California Berkeley, on "Another Generalization of Ramsey's Theorem, with an Application to the Model Theory of Peano Arithmetic."
Computation Center, 7:30 p.m., Room 105 Osmond. "Text Processing (4)."

Lectures

Monday, Feb. 9
Dr. Robert R. Kohn, Case Western Reserve Medical School, on "Biomedical Aspects of Aging," 7:30 p.m., Room 108 Forum.

Tuesday, Feb. 10
Centrel Pa. Archaeological Institute, Robert Bull, Drew University, on "Excavations at Caesarea Maritima," 8 p.m., Room 112 Kern.

Exhibits

Museum of Art: Recent Sculptures by John Cook. Hugo Weber. A Retrospective Exhibit.

Zoller Gallery: David Here Exhibition.
Chambers Gallery: Graduata Student Exhibition, ell media.
Kern Gallery: Nick Ruggieri Bicentennial Art Exhibit, sponsored by the Harrisburg Patriot News.
Pattee Library: Main lobby and Rare Books Room, Charles Blockson, "The Black Experience In America — from Colonial Times to the Present."
Cultural Center, Walnut: Charles L. Blockson, "Post Cards on Black Life," and "Books on Black Pennsylvanians."
HUB, Main Lounge. Charles Blockson, "Athletes," "Literature," "Music" and "Politics," opening Feb. 2. Lobby: Penn State Exhibit honoring the dedication of the Liberty Bell. First floor: "Jack Tar-American, Profiles of Merchant Seafarers, 1794-1803."

Films

Friday, Feb. 6 and Sunday, Feb. 7
GSA Commonspiace Theatre, "Sleeper," 7:30 and 9:30 p.m., Room 112 Kern.

Wednesday, Feb. 11
Free Shakespeare film, "Henry V" (Olivier), 6:30 p.m., Room 362 Willard.
GSA Commonspiace Theatre, "The Misfits," 7:30 and 9:30 p.m., Room 112 Kern.

Meetings

Thursday, Feb. 5
College of Business Administration faculty, 10 a.m., Room 201 Business Adm.
College of Liberal Arts faculty, 3:30 p.m., Room 121 Sparks.

University Schedule

Wednesday, Feb. 11
Last day for signing Winter Term NDSL, BEOG, and University Long Term Loans, Room 108 Shields.

Faculty notes

Alice M. Hoffman, assistant professor of labor studies, is the new president of the Oral History Association.

The association is an international organization of 1,500 members in North and South America with a goal of recovering and preserving significant events in the recent past through the collection of tape recorded interviews.

Mrs. Hoffman, who maintains an office at Penn State's King of Prussia Graduate Center, is the prime mover in the University's Labor Archives Project, the biggest component of which is the Steelworkers Archives.

William C. Cochrane, assistant Extension director and professor of agricultural extension retired last month with emeritus status after 30 years of service. He was supervisor of programs in the Southwest Extension Region, which includes Allegheny, Armstrong, Beaver, Butler, Fayette, Greene, Indiana, Washington and Westmoreland counties. A native of Clearfield County, he earned a B.S. from Penn State in 1933, majoring in agricultural education. In 1939 he received his M.Ed. from the University of Pittsburgh.

The retiring assistant director served as chairman of the Annual Extension Staff Conference for e number of years. He also helped to develop numerous multi-county educational programs in agriculture and family living in southwestern Pennsylvania and pioneered Extension television programming in western Pennsylvania. He worked closely with the Pennsylvania Farmer magazine in conducting the State Master Farmer Program and assisted in directing Extension programs at the Pennsylvania Farm Show.

Dr. Paul W. Welliver, professor of education, has been elected president of the Pennsylvania Learning Resources Association.

The organization, comprised of 600 members, brings together educators, media specialists, librarians, teachers and administrators who have professional interests in educational technology, instructional development, teacher education and individualized instruction at all educational levels.

Dr. Welliver joined the University faculty in 1969, after serving for two years as director of education for the Mississippi Authority for Educational Television.

Dr. Robert Lima, professor of Spanish and comparative literature, has received a Fulbright-Hays grant. He will serve as a visiting professor of comparative literature at the Universidad de San Marcos and at the Universidad Catolica in Lima, Peru. During his six-months stay, which will begin in July, he will be engaged in lecturing, translation projects and the production of a motion picture on literature and the creative arts. He will also present readings of his poetry. Dr. Lima is the author of numerous articles and four books of literary and dramatic criticism on Lorca, Valle-Inclan and Borges, and his poetry and translations of Hispanic poems have had wide international distribution.

Dr. Leon F. Lyday, associate professor of Spanish, has been awarded a Fulbright Fellowship for research in Brazil during the summer of 1976. The project for which Dr. Lyday received the grant is a critical study of the theatre of Brazil's foremost living playwright, Alfredo Dias Gomes. Under the terms of the grant, Dr. Lyday will spend most of the time in Rio de Janeiro interviewing the playwright and working with his manuscript materiels, but he will also travel to Sao Paulo, the theatre capital of Brazil, and to Bahia, the region in which many of the dramatist's plays are set.

News in brief

(Continued from page one)

pervised numerous field excavations dealing with the prehistoric, Hellenistic and Roman periods in both Jordan and Israel and is a former director of the American School of Oriental Research in Jerusalem. His long list of publications includes specialized studies and the excavation reports from the sites of Shechem, Tell er Ras (Mt. Gerizim) and Caesarea Maritima.

In his illustrated lecture, Dr. Bull will discuss the results of the American expedition to Caesarea Maritima on the Mediterranean coast of Israel. Caesarea was built on a grandiose scale by Herod the Great in 12 B.C. and thereafter, for over 600 years, was the Roman and Byzantine capital of Palestine until its destruction by the Arabs in A.D. 639. Refreshments will be served following the lecture.

Children's Karnival Feb. 7

All Centre County area children between the ages of 4 and 12 are invited to attend the second annual Children's Winter Karnival sponsored by the University's Volunteer Service Center. Between 1 and 4 p.m. on Saturday, Feb. 7, there will be carnival games, prizes, clowns, candy and balloons in the HUB ballroom. Cartoons will be shown, and the Nittany Lion will greet the children. Parents are welcome, too.

Conserve energy

(Continued from page one)

crisis, there is and will continue to be a financial crunch at Penn State. Your cooperation is needed."

Staff vacancies

Staff vacancies in this publication generally require at least a baccalaureate degree or equivalent as a minimum educational qualification. Staff vacancies requiring less than the baccalaureate degree as well as those announced in the INTERCOM may be found in the Penn State REPORTER. All University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network Line 475-1387). Applications for these staff vacancies will be received until 5 p.m., Feb. 12, 1976. Do not contact the area that has the vacancy.

ASSISTANT AUDITOR, CONTROLLER'S OFFICE — University Park

Verifies and analyzes transactions while conducting reviews of assigned organizational and functional activities. Evaluates the adequacy and effectiveness of the management controls over those activities. Assists in determining whether organizational units in the University are performing their planning, accounting, custodial or control activities in compliance with management instructions and applicable statements of policy and procedures. Reports audit findings on the results of the review of assigned segments of the audit and makes recommendations for improvements in operations and reduction in costs. Bachelor's degree in accounting or related field with one year of directly related experience in accounting areas.

Hearings continuing before PLRB examiner in Keller Bldg.

Hearings to determine the scope of the unit of individuals eligible to vote in a bargaining representation election resumed yesterday (Feb. 11) in Keller Building. News reports of previous hearings have raised many questions within the University community about the intent of the hearings. The following question and answer report, issued from the Office of the Provost of the University, is provided to help clarify the issues and objectives of the hearings.

Q. President Oswald, Provost Larson, and other members of the University administration have noted that faculty unionization, in their view, is not desirable at a university of the size, scope and academic quality of Penn State. Why, then, is the administration participating in hearings to determine e faculty bargaining unit?

A. In October, 1975, The Pennsylvania State University Professional Association (PSUPA) filed a petition with the Pennsylvania Labor Relations Board (PLRB) seeking an election to determine whether it would represent the faculty and non-teaching professional staff of the University in collective bargaining. Procedures require that PSUPA, as the petitioner, specify the composition of the bargaining unit it seeks to represent. The employer, in this instance Penn State, must respond to the petition through the PLRB. If the employer, and any intervening organizations seeking representation, mutually agree to the description of the bargaining unit as proposed by the petitioner, the PLRB will issue an order for an election.

Q. Is this the situation at Penn State?

A. In the case at hand, there is disagreement. The University, as well as the intervenor, the American Association of University Professors (AAUP), disagreed with the bargaining unit proposed by PSUPA. Therefore, the hearings that resumed Feb. 11 are being conducted so that the PLRB will be able to decide which employees will be eligible to vote in a representation election.

Q. Why is it important for Penn State faculty members to understand the procedures utilized by the Pennsylvania Labor Relations Board?

A. An informed faculty is more likely to understand what is at stake in an election and also more likely to vote. Several studies of faculty voting behavior in representation elections have shown that faculty members do not always have enough information on which to base their votes. For example, at some schools faculty members admittedly did not fully understand the procedures and issues involved when voting for or against collective bargaining. Consequently, they voted for what they later acknowledged, in their words, to be the "lesser of the evils" among the contending unions when indeed they were not in favor of collective bargaining.

Q. What is the role of the Pennsylvania Labor Relations Board (PLRB) in these hearings?

A. The PLRB is the state agency established by the Pennsylvania Employe Relations Act (Act 195) to guarantee that the provisions of the Act are applied. The Board, among other things, resolves differences between employer and employee groups over what employees should appropriately be included in a collective bargaining unit.

Q. What is the role of the hearing examiner in determining a bargaining unit?

A. The Board consists of three gubernatorial appointees, who are unable to handle the required case load. Therefore, the Board assigns hearing examiners to assist them. The hearing examiner serves much as a judge in a trial, except that, because hearings are an administrative procedure, strict rules of evidence do not apply. The hearing examiner is responsible for such things as ruling on the introduction of particular witnesses and/or testimony, controlling the introduction of relevant exhibits, determining the general conduct of the hearings and scheduling future hearings. At the conclusion of the hearings, the hearing examiner considers the facts presented and then makes his recommendations to the Board. The hearing examiner's recommendations to the Board are advisory.

Q. Can the PLRB rule, without an election, that there will be faculty unionization and collective bargaining at Penn State?

A. No. The PLRB simply decides who is eligible to vote in an election and the procedures governing the election. The faculty voting in an election decide either for or against collective bargaining.

Q. Who is entitled to participate in the hearings and to present testimony?

A. Generally, the active participants in the hearings are limited to the initial petitioner, intervening organizations and the employer. The petitioner must be able to demonstrate, through authorization cards, a 30 percent showing of interest on behalf of employees in the proposed unit. Intervenors wishing to participate in the unit determination process, such as AAUP, must be able to demonstrate a 10 percent showing of interest. Because the hearings are not formally a legal proceeding, it is the hearing examiner's prerogative to determine whether any other individuals or groups should participate and introduce testimony.

Q. Do the participating parties in Penn State's hearings agree on any unit issues?

A. The administration, of course, believes that unionization is not desirable at Penn State. But, following the first days of hearings in January, the parties involved have reached agreement on several points regarding the unit questions.

- First, the parties have agreed and stipulated on the record that a) The Pennsylvania State University is a public employer according to the provisions of Act 195, and (b) The Pennsylvania State University Professional Association and the Penn State Council of the American Association of University Professors Chapters exist, at least in part, to represent employees of the University in negotiations and are employee organizations under the provisions of Act 195.
- Second, it was agreed that all regular members in the professional research and librarian ranks at the University Park Campus, the 17 Commonwealth Campuses, the Capitol Campus and the Behrend College should be included in any unit to vote in an election.
- Third, all parties agreed in January to accept the definition of "regular" as prescribed in Penn State policy RS-5; only "regular" employees will be included in the voting unit. (A regular employee is a person who is appointed to a full-time position that will exist for six months or longer and who is eligible to participate in the University's fringe benefit program.)
- Finally, excluded by agreement in January from the voting unit would be all University executives and administrators, academic administrators at the college level, staff nonexempt employees, clerical and technical service personnel.

Q. What are the primary issues over which there is disagreement?

A. There are three primary areas of disagreement:

- The first is over the appropriate status of the College of Medicine at Hershey. Both PSUPA and AAUP are seeking to exclude the medical faculty from the proposed bargaining unit and participation in the election. Consistent with its argument during the PSUBRANCH hearings, the administration contends that any appropriate unit for the faculty of The Pennsylvania State University would include faculty at all locations, including those at the 22 campuses and any other off-campus research labs and Continuing Education centers;
- Second, PSUPA argues that the unit should include non-teaching professionals (i.e., Staff Exempt personnel) whose functions and responsibilities "relate to the teaching-research mission of the University." Both the AAUP and the University contend that an appropriate faculty unit for conducting an election should be comprised only of academic personnel — professional, research and librarian faculty;
- Third, AAUP and PSUPA want ec-

Top highschoolers to visit

Pennsylvania's best academic high school juniors will visit the University this spring as part of the second annual Penn State Scholars Program.

The program was initiated last year to recognize and encourage excellent academic scholarship records and achievements and provide an opportunity for the top students in the State to meet with Penn State faculty members and students.

The principal of each of the approximately 950 public and private schools in the State has been asked to nominate the top academic junior student to participate in the 1976 Penn State Scholars Program. The nominated students and their parents will visit the campus during two weekends. Students from the western half of the State have been invited on the weekend of April 9 and 10, while students from the eastern half will visit on the weekend of April 23 and 24.

During the Recognition Weekend, they will have the opportunity to experience college life through participation in social activities and as an overnight guest in a residence hall.

The high school students also will be introduced to two academic colleges of their choice, will attend seminars on college attendance, adjustment and financial aid, and will compete in a two-hour examination for one of 30 Penn State full-tuition, four-year scholarships.

The 30 scholarships offered to the highest achieving scholars will be drawn from several sources within the University. These include the Alumni Memorial Scholarships, College controlled scholarships, and general and specially endowed scholarships managed by the Senate Committee on Students Affairs, Awards and Scholarships.

At the same time, all of the participants in the program will receive special recognition, including an assurance of admission to Penn State.

A total of 657 students were nominated for the first Penn State Scholars Program held last April 18 and 19. A total of 575 students and approximately 700 parents took part in the event.

According to Dr. Glenn C. Carter, director of secondary school relations, the program has received positive responses from high school staffs and more than 330 of last year's Penn State Scholars have filed applications for admission to the University.

News in brief

Dr. Gervers to speak

Dr. Michael Gervers, professor of art history at the University of Toronto and research associate at the Pontifical Insiiiute of Medieval Studies, will address the Central Pennsylvania Chapter of the Archaeological Institute of America at 8 p.m. Thursday, Feb. 19, in Room 101 Kern Bldg.

The subject of his public lecture is "The Early Medieval Cave Church at Gurat (Cherente, southwestern France)."

Rock-cut church at Gurat

Prof. Gervers is a medieval scholar with specialized interests in archeeology and historicel ethnography, and he has published extensively. He is the beld director for the continuing excavations at Gurat in southern France.

The focal point of the excavations is the early medieval rock-cut church of St. George and its associeied hermitage end cemeteries. The site, which has also been the subject of a CBC television program, has much to tell about the early beginnings of monesticism in the West.

Libraries' nominations asked

March 1 is the deadline for nominations for the Award for Outstanding Contribution to the University Libraries. The award, consisting of a cash stipend end a Nittany Lion statue, is presented annually to e University Libraries staff member, a benefactor of the Libraries, a member of the teaching faculty or someone from the administrative or research staff. Nomination forms may be obtained from the Personnel Librarian, Room E505 Pattee, telephone 865-0401.

To be considered, an individual should have: 1) made a professional contribution which has a significant intluence on the operations of the University Libraries; 2) made a significant professional contribution which earns the recognition of the University community for the Libraries; 3) made a significant contribution to the profession which reflects achievement in librarianship at Penn State; or 4) shown excellence of service to the Libraries as evidenced by continuous leadership and innovation.

Spring calendar dete due

Information is being collected now for the spring term calendar which will appear in INTERCOM early in March. The deadline for receipt of such information is Feb. 20, and it should be sent to the Calender Editor, 312 Old Main. The calendar is prepared for University Park but e very limited number of events of unusual interest at other Campuses may be included.

Palestinian talk Feb. 18

"The Palestinians: Their Role in the Middle East Conflict" will be the subject of a public lecture by Fawaz Turki, a Palestinian writer, at 7:30 p.m. Wednesday, Feb. 18, in the HUB assembly room.

Born in Haifa in 1940, Mr. Turki left in the Arab refugee exodus of 1948 when the state of Israel came into being and grew up in e refugee camp in Lebanon. He studied at universities in England and Australia.

He is the author of "The Disinherited: Journal of e Palestinian Exile" and "Poems from Exile" and has contributed articles to major magazines in Europe and the United States. Last year he was director

PENN STATE COLLECTION

Faculty notes

Seven faculty members from the Department of Chemistry will present research papers at the 10th American Chemical Society Middle Atlantic Regional Meeting in Philadelphia Feb. 23-26. They include three professors — **Dr. Harry Allcock, Dr. Maurice Shamma** and **Dr. William A. Steele;** associate professor **Dr. Peter C. Jurs;** and three assistant professors — **Dr. Gregory L. Geoffroy, Dr. Lawrance B. Hendry** and **Dr. Terence H. Risby.**

Nine faculty members and students from the Department of Biochemistry and Biophysics are the authors of research papers to be presented at a meeting of the Biophysical Society in Seattle, Wash., Feb. 24-27. The faculty participants include: **Dr. Reginald A. Dazring,** professor of biophysics; **Dr. Thomas Smyth,** professor of entomology; **Dr. Alec D. Keith, Dr. Paul W. Todd** and **Dr. Richard S. Morgen,** associate professors of biophysics; and **Ronald P. Millito,** instructor in health education.

Dr. Herschel W. Leibowitz, professor of psychology, has been selected to receive the Senior U.S. Scientist Award from the Federal Republic of Germany. The award is given by the German Federal Ministry for Research and Technology through the Alexander von Humboldt Foundation to "outstanding U.S. scientists in recognition of past accomplishments in research and teaching, and thereby promoting scientific cooperation between institutions in the Federal Republic of Germany and in the United States of America." The award entitles Dr. Leibowitz, a renowned authority on visual perception, to conduct research of his choice for one year at a German research institute. Commencing in 1972 on the anniversary of the Inauguration of the Marshall Plan, the award was established to express appreciation for post-war American aid.

Dr. Leibowitz, a native of York, joined the University faculty in 1962. He had served on the faculties at the Universities of Maryland and Michigan and was manager of behavioral sciences for International Business Machines in Bethesda, Md. He visited Germany previously as a Guggenheim Fellow in 1957, conducting research at the University of Munich and at the Max Planck Institut fur Verhaltens Psychologie.

Dr. Charles L. Hosler, dean of the College of Earth and Mineral Sciences, has assumed his position as president of the American Meteorological Society for 1976, after having served as president-elect for 1975.

Dr. Hosler, who was elected a Fellow of the Society in 1969, has served the Society as Councilor and Secretary of the Council. He has been active on many AMS committees and has served as chairman of the Board of Radio and Television Weathercasting, chairman of the Education and Manpower Commission, and chairman of the Board of Professional Ethics. He received the AMS Seal of Approval for Television in 1960.

Dr. Hans A. Panofsky, Even Pugh Professor of Atmospheric Sciences, received the highest honor conferred by the American Meteorological Society, the Carl-Gustaf Rossby Research Medal, at the group's annual awards luncheon in Philadelphia last month. The medal is presented on the basis of outstanding contributions to man's understanding of the structure or behavior of the atmosphere. The 1976 medal was awarded to Dr. Panofsky "for his many fundamental contributions to knowledge of the statistical properties of turbulence throughout the atmosphere."

Dr. Panofsky joined the Penn State faculty in 1951 after teaching at Wilson College and New York University and was named Even Pugh Professor in 1966. He is noted for his research and publications on a wide range of topics, including air pollution, planetary atmospheres and atmospheric turbulence, especially in the planetary boundary layer. A Fellow of the AMS, he received the Society's Meisinger Award in 1965 for his achievements in aerology and meteorology.

Dr. Fred H. Lawia, professor of plant pathology and scientist in charge of the University's Fruit Research Laboratory at Biglerville, retired Feb. 5. He had been a member of the faculty since 1943. Born in Galivants Ferry, S.C., Dr. Lewis graduated from Clemson University with a B.S. in horticulture. His Ph.D. was conferred by Cornell. At the Fruit Research Laboratory, he has been heavily involved in the development of laboratory facilities and helped reorient the research program toward the detailed studies needed to permit minimum use of pesticides on fruit.

Dr. Lewis is the author of 159 publications on fruit diseases and their control. He was co-chairman of the Research Program Steering Committee for Fruit Research in the northeastern states and chairman of the American Society for Testing and Materials' subcommittee on fungicides.

Three faculty and staff members from the University will offer papers at the 142nd annual meeting of the American Association for the Advancement of Science in Boston, Feb. 18-24. **Dr. Allstair B. Fraser,** associate professor of meteorology, will present a paper on mirages during a session titled "Science for the Naked Eye: Dr the Physics of Everyday Experience." Dr. **George C. Shoffstall,** assistant director of continuing education, College of Science, will present a paper titled, "The Pennsylvania Academy of Science — 52 Years in Retrospect." Dr. Shoffstall is president-elect of the Academy. **Dr. Michael Szabo,** associate professor of education, will participate in the session titled, "Innovative Approaches Currently in Use in Undergraduate Science Education."

Nannette Veil Jewell, formerly assistant librarian with the American Philatelic Research Library, State College, has been appointed research assistant in the College of Business Administration. She is a 1976 graduate of Wells College, receiving the bachelor of arts degree in economics. She received the master of library science degree from SUNY-Albany.

Dr. Joseph M. Dulch, professor of turfgrass science, has been chosen to receive the 1976 Distinguished Service Award of the Golf Course Superintendents Association of America. He was recognized for his development of many of the specialized grasses used on golf courses today, his valuable research in soil modification and his supervision of the annual Penn State Turf Conference and Field Days.

Dr. Samuel S. Dubin, professor of psychology, has been appointed to the Task Force on Continuing Education of the American Psychological Association. The Task Force will look at Continuing Education in terms of: a) developing standards and guidelines for accrediting Continuing Education programs, b) a national system for record keeping of Continuing Education units, c) proposing model legislation for states, d) formulating a statement of philosophy regarding the maintenance of professional competence, and e) encouraging research on improved methods for evaluating Continuing Education.

Dr. Jean W. MacCluer, associate professor of biology, is one of ten biologists and behavioral scientists invited to participate in an interdisciplinary seminar on "Inbreeding, Outbreeding, and the Incest Taboo" at the Center for Advanced Study in the Behavioral Sciences, Stanford, Calif., March 15-17. Participants will examine and discuss the biological, psychological and cultural factors which promote and inhibit inbreeding. Dr. MacCluer will also present a talk titled, "Genetic and Demographic Determinants of Outbreeding." The seminar is sponsored by the Social Science Research Council's Committee on Biological Bases of Social Behavior.

Dr. Paul B. Baltes, director of the Division of Individual and Family Studies in the College of Human Development, has been invited to join one of the study sections of the National Institutes of Health. Study section members review applications for research and training grants, and survey, as scientific leaders, the status of research in their fields. Dr. Baltes will serve a four-year term, beginning in July, on the Developmental Behavioral Sciences Study Section.

Kenneth P. Wilkinson, associate professor of rural sociology, is co-recipient of the 1975 "best paper" award for an article published in the "Water Resources Bulletin," journal of the American Water Resources Association. The paper by Dr. Wilkinson and Dr. Raghu N. Singh, of East Texas State University, was entitled, "On the Measurement of Environmental Impacts of Public Projects from a Sociological Perspective."

Dr. Luis F. Gonzelez-Cruz, associate professor of Spanish at New Kensington, is the author of a new book, "Tirando a blanco / Shooting Gallery. Poemas / Poems," which has been published in a bilingual edition by Ediciones Universal. Dr. Gonzalez-Cruz is the author of two earlier books on literary criticism as well as of scholarly articles, reviews, short stories and poems. His current book contains 98 poems, 49 in Spanish and 49 English translations, and it is divided into four parts: "Places," "Corporal Poems," "Horses" and Mineral Poems." The author has been a member of the faculty since 1969, a year before he received his Ph.D. from the University of Pittsburgh.

Dr. Daniel Y. C. Fung, assistant professor of microbiology, has been appointed to a three-year term on the editorial board of the "Journal of Milk and Food Technology." The journal is the official publication of the International Association of Milk, Food and Environmental Sanitarians. Dr. Fung will review papers dealing with food microbiology, microbial toxins and diagnostic microbiology and techniques.

Dr. Peter B. Meyer, assistant professor of economic planning, Division of Community Development, is on leave winter term to serve as a Senior Research Associate with the Correctional Economics Center of the American Bar Association, Washington, D.C. He is conducting a study of the relative cost-effectiveness of different public and private criminal corrections services.

Dr. G. P. Patil, professor of mathematical statistics, receives the first Doctor of Science degree ever awarded by the Indian Statistical Institute. On leave from the University, Dr. Patil recently returned from his trip to India.

New book explores political terrain of higher ed

A new book to alert the community in higher education to the necessity of political involvement has been co-authored by **S. V. Martorana,** professor of higher education and research associate in the Center for the Study of Higher Education.

"The Political Terroin of American Postsecondary Education" does not deal with politics in the partisan sense. Rather, the authors have defined its purpose thus:

"If American postsecondary education is to remain viable, its practitioners must first understand the implications of the political terrain and the impact of political systems upon the educational enterprise and upon individual institutions and organizations. In order to develop this understanding, a body of research and knowledge must be developed. Without it the levers of power will consistently move away from professionals and into the hands of decision-makers who may well be both psychologically and physically remote from the campus scene."

The book, which was published by Nova University Press, traces the increasing involvement of outside political forces in the destinies of colleges and universities and considers political structures at the institutional, community, state and federal levels, as well as the roles of various educational groups.

Several major, current issues which may be expected to cause continued dissension among the various special interest groups operating in higher education are outlined by the authors, who include Clyde E. Blocker, founding president of the Harrisburg Area Community College, and Louie W. Bender, professor of higher education at Florida State University.

In discussing the first of these issues — educational missions — the authors question "whether the decision makers will accept distinct educational roles for different institutions and different segments of postsecondary education and will demonstrate their acceptance of this principle through the allocation of resources to sustain distinctively different types of institutions and educational programs."

Analyzing the problem of who will pay for postsecondary education, the authors predict that higher education, along with most other social services, will increasingly be financed by the federal government, which has far greater resources than those available to state or local governments.

The book foresees no decrease in the often bitter struggle for available resources between independent colleges and universities and proprietary schools, and it notes: "The most visible as well as the most far-reaching political debate will center around the distribution of costs between tax funds and student tuition."

Intersecting power struggles have paved the way for state intervention in the form of education boards with varying degrees of legal powers.

"The issue at the state level," the authors point out, "is no longer whether postsecondary education will be coordinated but how institutions can gain influence with government agencies in such a way that some power will remain on the campus level. Power struggles and relationships will continue with the legislature and the executive, but the state boards will gradually move to the center of the stage. That is the problems have not changed, but the arenas have."

To prevent further erosion of the status quo, professionals, in the authors' view, will move to strengthen faculty senates and unions. They odd: "Essentially, it is our belief that institutions of postsecondary education will move rather rapidly toward an industrial model as opposed to the collegial model of the past."

While Dr. Martorana and his colleagues believe that educators need to become more aware of the forces in the political process so they can better control them, they also feel strongly that, "A higher order of purpose needs to be attached to the activity than the simple outmaneuvering or overpowering of persons and organizations who take opposing points of view or contrary stands.

". . . political action needs to be marshalled and managed so that the larger social purposes of the enterprise are better achieved and not merely so that the narrower goals of particular postsecondary educational leaders or even the institutions that they lead are successfully promoted."

Dr. Martorana joined Penn State's faculty in 1972. He previously was Vice Chancellor for Community Colleges and Provost for Technical-Vocational Education with SUNY. Prior to that he was Assistant Commissioner for Planning, New York Board of Regents. He is the author of five previous books and also served on the faculty at Washington State University.

University Park Calendar

February 12—22

Items to be included in this calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, Feb. 12

Commons Videotape, "The Animals Nobody Loved," National Geographic special, 12 noon, Kern lobby.

Charles Blockson, author, on "Black Pennsylvanians," 7 p.m., Cultural Center, Walnut.

Friday, Feb. 13

1976 Dance Marathon, 7 p.m., HUB ballroom. Muscular Dystrophy benefit, sponsored by Interfraternity Council. Through Sunday.

Black Historical Films, 2-6 p.m., Cultural Center, Walnut.

Black Caucus, Joseph Rhodes, member Board of Trustees and State Representative; James Garner, Darrell Trent and Barry Reddish, former Penn State student leaders, on "Black Student History and Involvement at Penn State during the Black Power Movement," 7 p.m., HUB assembly room.

University Theatre, "Norton I, Emperor of the United States," 7:30 p.m., Pavilion Theatre.

GSA Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Artists Series, Alvin Ailey City Center Dance Theatre, 8:30 p.m., University Auditorium.

Saturday, Feb. 14

Sports: Women's fencing, vs. Madison, Caldwell, Trenton, 9 a.m., White. Women's basketball, vs. Shippensburg, 1:30 p.m., White. Men's and women's gymnastics, vs. Southern Connecticut, 8 p.m., Rec Bldg.

University Theatre, "Norton I, Emperor of the United States," 10:30 a.m. and 2:30 p.m., Pavilion Theatre.

"The Myth of Andro and Elnoria," play, 7:30 p.m., Cultural Center, Walnut.

Phi Delta Kappa Ladies Night social, 8 p.m., Room 102 Kern.

Artists Series, Alvin Ailey City Center Dance Theatre, 8:30 p.m., University Auditorium.

Cabaret, 10 p.m., Room 301 HUB.

Sunday, Feb. 15

Chapel Service, 11 a.m., Eisenhower Chapel. Rev. Charles L. Coleman, program director, Religious Affairs.

Black Christian Fellowship worship service, 11 a.m., Cultural Center, Walnut.

University Theatre, "Norton I, Emperor of the United States," 2:30 p.m., Pavilion Theatre.

Mortar Board alumnae and Penn State chapter brunch, 12:30 p.m., 534 Glenn Dance, 10:30 p.m., Cultural Center, Walnut.

Road For information call Nancy Miller, 355-3288.

Sports: Ice Hockey, vs. University of Pittsburgh, 7:30 p.m.

"The Myth of Andro and Elnorie," 7:30 p.m., Cultural Center, Walnut.

Monday, Feb. 16

Composers' Concert, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Feb. 17

Gallery talk, Hedy B. Landman, director of the Danforth Museum, on "The Paper on the Wall," 10:30 e.m., Museum of Art.

Sports. Men's swimming, vs. West Virginia, 2:30 p.m.

Wednesday, Feb. 18

"Noondays," devotional period, 12 noon, large chapel, Eisenhower Chapel.

Artists Series film festival, "Gone with the Wind," 8:30 p.m., University Auditorium.

Penn State Brass Chorale, 8:30 p.m., Music Bldg. recital hall.

Thursday, Feb. 19

Commons Videotape, "The Antarctic," 12 noon, Kern lobby.

Friday, Feb. 20

Sports: Women's basketball, vs. Pittsburgh, 7:30 p.m., White.

Folk and Square Dance Roundup, 7:30 p.m., south gym, White.

University Theatre, "Norton I, Emperor of the United States, 7:30 p.m., Pavilion Theatre.

GSA Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, Feb. 21

University Theatre, "Norton I, Emperor of the United States," 10:30 a.m. and 2:30 p.m., Pavilion Theatre.

Sports: Women's and men's bowling, PSU Invitational, 1 p.m., Rec Bldg. Coed rifle, vs. West Virginia, 2 p.m. Women's swimming, vs. East Stroudsburg, Clarion, Slippery Rock, 7 p.m. Men's basketball, vs. Pittsburgh, 8 p.m., Rec Bldg. Wrestling, vs. Pittsburgh, 2 p.m., Rec Bldg.

PSU Symphony Orchestra, 8:30 p.m., University Auditorium.

The Contemporary Dance Company in Concert, 8:30 p.m., Schweb.

Sunday, Feb. 22

Chapel Service, 11 e.m., Eisenhower Chapel. Dr. Eloise C. Snyder, sociology.

Black Christian Fellowship worship service, 11 a.m., Cultural Center, Walnut.

University Theatre, "Norton I, Emperor of the United States," 2:30 p.m., Pavilion Theatre.

The Contemporary Dance Company in Concert, 2:30 and 8:30 p.m., Schweb.

Artists Series, "The Marriage of Figaro," 8:30 p.m., University Auditorium.

Seminars

Thursday, Feb. 12

Population Issues Research, 1:30 p.m., Room 108 Deike. Dr. James Brackett, Office of Population, A.I.D., on "Recent Fertility Changes in Less Developed Countries."

Materiology, 4 p.m., Room 26 Mineral Sciences. Deen Gulezien, graduate student, on "A.F.O.S. — Present and Future."

Mathematics, 4 p.m., Room 116 McAllister. Leo Harrington, University of California, Berkeley, on "Another Generalization of Remsey's Theorem, with an Application to the Model Theory of Peano Arithmetic."

Computation Center, 7:30 p.m., Room 105 Osmond. "Text Processing (4)."

Monday, Feb. 16

Genetics, 3:55 p.m., Room 108 Tyson. Dr. Leslie Lieberman, Human Performance Research Lab., on "Diet, Selection and Digestive Enzymes in Human Evolution."

Biochemistry and Biophysics, 4 p.m., Room 101 Althouse. Earl R. Stadtman, National Heart and Lung Institute, NIH, on "The Significance of Covalent Modification Cascade Systems in the Regulation of Key Enzymes."

Entomology, 4 p.m., Room 204 Patterson. Dr. Wayne M. Bode, Fruit Research Lab., Biglerville, on "Bionomics of the Tutted Apple Bud Moth and a Study of Its Nuclear Polyhadrosis Virus."

Tuesday, Feb. 17

Plant Pathology, 9.45 a.m., Room 213 Buckhout. Richard Latin on "The Chondrilla Plant and the Rust Thereof."

Biochemistry and Biophysics, 11 a.m., Room 101 Althouse. Earl R. Stadtman, National Heart and Lung Institute, NIH, on "Cumulative Feedback Control of Glutamine Synthetase in E-coli."

Water Pollution Control, 2:20 p.m., Room 101 Chambers. "Systems Malfunctions and Repairs."

Nuclear Engineering, 4 p.m., Room 228 Sackett. Dr. Harvey Brish, Bechtel Corp., San Francisco, on "Nuclear Power Economics."

Inorganic Chemistry, 8 p.m., Room 333 Whitmore. Dr. Howard Tennett, Hercules, on "Chamistry of Transition Metal Alkyls."

Thursday, Feb. 19

Chemistry, 12:45 p.m., Room 333 Whitmore. Daniel V. Santi, UCLA, San Francisco, on "Mechanism of Thymidylate Synthetase Reaction."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Simon Cheng, graduate student, on "Some Experiments with an Axi-Symmetrical Hurricane Model."

Physics, Biochemistry and Biophysics joint colloquium, 3:50 p.m., Room 117 Osmond. Dr. Stuart Kauffman, Biophysics and biochemistry, on "Are Biological Clocks Nonlinear Oscillators?"

Biochemistry, 12:30 p.m., Room 617 Life Science. Richard Hippikka on "Suger Transport in Meture Bovine Spermetozoe."

Philosophy, 4 p.m., Room 167 Willard. Professors John Anderson, Carl Hausman and Carl Vaught will discuss Dr. Anderson's book, "The Realm of Art."

Exhibits

Museum of Art: Recent Sculptures by John Cook, Hugo Weber: A Retrospective Exhibit.

Zoller Gallery: David Hare Exhibition, through Feb. 20.

Chambers Gallery: Graduate Student Exhibition, all media.

Kern Gallery: Nick Ruggieri Bicentennial Art Exhibit, sponsored by the Harrisburg Patriot News.

Pattee Library: Main lobby and Rare Books Room, Charles Blockson, "The Black Experience in America — from Colonial Times to the Present."

Cultural Center, Walnut Bldg.: Charles Blockson, "Post Cards on Black Life" and "Books on Black Pennsylvanians."

HUB, Main Lounge: Charles Blockson, "Athletes," "Literature," "Music" and "Politics." Penn State Room Exhibit honoring the dedication of the HUB addition, HUB lobby. Jack Tar, American Profiles of Merchant Seafarers, 1794-1803 (Smithsonian Institution), through Feb. 15 Gallery: 26 paintings by M. Nabii El-Husseine.

Hammond Gallery: Drewings, paintings and prints by Kevin Fox, Joe Chapline and Manuel Schmettau, through Feb. 16.

Meetings

Monday, Feb. 16

Color Slide Club, 7:30 p.m., Room 112 Kern. David Palermo on "Australie."

Tuesday, Feb. 17

GSA Council, 7:30 p.m., Room 101 Kern.

Films

Wednesday, Feb. 18

GSA Commonspace Theatre, "The African Queen," 7:30 and 9:30 p.m., Room 112 Kern.

Friday, Feb. 20, and Sunday, Feb. 22

Free Shakespeare film, "King Lear" (Brook/Scofield), 6:30 p.m., Room 162 Willard.

Lectures

Tuesday, Feb. 17

Dr. Patricia Cross, visiting professor, University of Nebreska, on "New Ways to Work with Students," 8 p.m., Room 112 Kern. Sponsored by the Office of Student Affairs.

Wednesday, Feb. 18

Fawaz Turki, Palestinian writer, on "The Palestinians: Their Role in the Middle East Conflict," 7:30 p.m., HUB assembly room. Sponsored by the Middle East Studies Committee.

Thursday, Feb. 19

Central Pa. Chapter Archeeological Institute of America, 8 p.m., Room 101 Kern. Dr. Michael Gervers, University of Toronto, on "The Medieval Cave Church at Gurat (Cherente, Southwestern France)."

Arts roundup

Artists Series tickets

Tickets for the Alvin Ailey City Center Dance Company and the Curtis Opera Company performence of Mozart's "The Marriage of Figaro" are currently on sale under the auspices of the Artists Series.

The Alvin Ailey troupe will appear Friday and Saturday, Feb. 13 and 14, at 8:30 p.m. in University auditorium. The Friday night performance is sold out under the Theatre-Dance series, but tickets for Saturday are available at the HUB booth and the auditorium from 9 a.m. to 4 p.m. Saturday's program includes "Night Creature," "Hermit Songs," "The Road of Phoebe Snow" and "Liberian Suite."

Performing dances which combine modern, jezz end classical elements, Alvin Ailey has toured in America, Europe, Africa and the Far East to critical superlatives. In addition to their regularly scheduled performances, the company will conduct a dance workshop at 3 p.m. Sunday, Feb. 15, at the auditorium. Tickets, which will cost $1, will be available at the door.

The Curtis company will perform at 8:30 p.m. Sunday, Feb. 22, also in the auditorium. The production has been moved from Schwab to accommodate additional scenery, which was recently completed for the opera's premiere in Philadelphia.

The opera will be directed by Dino Yannopoulos, who has served as stage manager for numerous productions at the Metropolitan Opera as well as at the San Francisco Opera and the Cincinnati Summer Opera. He has also conducted in Athens, Buenos Aires, Mexico and Montreel. Tickets are available at the locations listed above.

Alvin Ailey dancers

Chorale to perform

The Penn State Brass Chorale, conducted by James Benshoof, assistant professor of music, will premiere two new works in its concert at 8:30 p.m. Wednesday, Feb. 18, in the Music Bldg recital hall. The 21-piece brass choir will present the first performances of "Two Movements for Brass" by Mark Vogler, a master's degree candidate at Temple University, and "Parelixe for Brass" by John Mitchell, a faculty member at Juniata College. Also to be performed are Copland's "Fantare for the Common Man," and Paul Shahan's "Spactrums."

The Brass Chorale's performance of Corwin Taylor's "Inscriptions in Brass" will be conducted by Ronald Renshaw, an MFA candidate in music. Completing the program will be Grieg's "Funeral March," written in memory of the composer's friend and fellow Norwegian composer, Richard Nordraak. Grieg thought so highly of the work that he requested that it be played at his own interment.

Wallpaper as art

"The Paper on the Wall" will be the subject of a gallery talk by Hedy Landmen, director of the Danforth Museum, Framingham, Mass., at 10:30 e.m. Tuesday, Feb. 17, in the Museum of Art. Mrs. Landmen, former director of the Busch-Reisinger Museum in Cambridge, Mass., is the organizer of a travelling exhibition of wallpaper for the New York Council on the Arts. She has also been curator of wallpaper at Cooper Union and curator of American and Decorative Arts at Princeton University. Her talk is sponsored by the Friends of the Museum of Art.

Composers' concert

Two pieces for chamber orchestre and works tor pleno and woodwind quintet will be among compositions by music students to be performed in the Composers' Concert at 8.30 p.m. Monday, Feb. 16, in the Music Bldg recitel hall. Senior Mark Leporte and graduate student Berbara Reeves have written chamber works to be performed by Musica de Camere, which will be augmented by several musicians and conducted by graduate student John Hall. The Claremont Woodwind Quintet will also perform e work by Mr. Laporte et the concert, which will feature work by several other student composers.

Lazorik photo show

An exhibition of photography by Wayne Lezorik, assistant professor of ert et the University of New Mexico, is on view Tuesdays and Thursdays from 1 to 5 p.m. In Room 212A Arts Bldg. Mr. Lazorik, the subject of several previous one-man shows, has included 15 very large black-and-white photographs in the exhibit, with six being

Be Glad Then Penn State

By ALLEN HUGHES
Special to The New York Times

UNIVERSITY PARK, Pa., Feb. 7—Pennsylvania State University has scored a major victory in the Bicentennial cultural-events race with the premiere here last night of John La Montaine's "Be Glad Then, America," a grand and moving opera-oratorio documenting and celebrating incidents that culminated in the Declaration of Independence.

Written on a $17,500 commission from the university's Institute for the Arts and Humanistic Studies, the new work is subtitled "A Decent Entertainment from the 13 Colonies," which is a quotation from a Pennsylvania historical document, and the entire text of the work derives from Revolutionary period sources — newspapers, broadsides, speeches, poems, laws and correspondence. Mr. La Montaine, who created both the libretto and the music, devoted more than a year to the read of these sources before selecting the excerpts he has pieced together with literary skill and sensitivity.

The identification of each quotation is documented, and in the spectacular production of the work created by Saran Caldwell each is identified in a projection on a screen as it is sung.

Mr. La Montaine has quoted only two musical works of the Revolutionary period in his colorful score, and both are by William Billings.

One, which recurs frequently and to fine effect, is the hymn "Chester"; the other is "An Anthem for Fast Day," from which the line "Be glad then, America" is taken.

Mr. La Montaine is a master of choral writing, and the 200-voice Penn State Chorus was the star of the production. Trained musically by Raymond Brown, director of choirs here, and turned into splendid singing actors by Miss Caldwell, these young people brought a marvelous vitality to the spectacle.

And spectacle it was! The amazing Miss Caldwell who was responsible for both the staging and conducting, spread the work all over the 2,600-seat University Auditorium. There was literally wall-to-wall music. The auditorium had six feet-hrough side walls for acoustical reasons, and the sensation of the evening came when, just as the Boston Tea Party was preparing, lights behond the walls suddenly went on and there, ranged on both sides and at various levels, were costumed members of the chorous organized into domestic tea parties and singing across the auditorium.

For the Battle of Lexington, Miss Coldwell had the British Redcoats firing straight out at the audience and the Colonists in the front row of seats firing back at the British—all right over the heads of Miss Caldwell and the Pittsburgh Symphony Orchestra in the pit.

Except for "We, the people," represented by the chorus, "Be Glad Then, America" has only two characters who appear throughout the work. One is King George III, portrayed by Richard Lewis, the English tenor, and the Town Crier, who was Davis American tenor Davis Lloyd. Donald Gramm, the bass baritone, appeared as eight different American patriots — Patrick Henry, Samuel Adams and Tom Paine among them. Odetta, the folk singer, had the somewhat incidental role of the Muse of Liberty. All were impressive.

"Be Glad Then, America" is definitely not an opera in the conventional sense, but it is filled with drama, both implied and overt, and it would be a herd-hearted American indeed who did not feel a lump in his throat as the singing of the Declaration of Independence began the climactic conclusion of the work.

Mr. La Montaine, Miss Cadwell, William Alison, the set designer, Constance Meilen, the costumer, and ell the people involved in "Be Glad Then, America" can be proud of their part in the creation of a vvid and eloquent celebration of a momentous era in the founding of the nation.

Since it would obviously be impractical for the production to tour, this staging of "Be Glad Then, Americe" will be seen only by those who can attend one of the three weekend performances being given now. But if the production could travel, it would certainly win friends and adherents wherever it went.

The above review, reprinted from the Feb. 8 "New York Times," is typical of the praise heaped on Penn State's production of "Be Glad Then America." Paul Hume in the "Washington Post" said: "Penn State . . . should be very proud of the entire production and for having helped bring about a fascinating creature." Writing in the Pittsburgh "Post Gazelle," Robert Croan noted: ". . . as lavish and brilliantly executed as anything currently feasible in American musicel theatre." And Daniel Webster in Philadelphia's "Inquirer" said ". . . the stage crackled with excitement end dash."

Caldwell and LaMontaine: "a great good time"

Discussing some of the elements that went into the writing and production of "Be Glad Then America" at a Saturday morning press conference following the premiere, composer John LeMontaine noted that he was still not quite sure what to call his work.

"We discussed whether or not to call it an opera," he said. "It's a short opera if it is an opera, but it's certainly a grand opera!"

Asked whether he considered the work complete, he responded: "Ask Miss Caldwell how many versions there are of 'Boris Godunov'." And he noted that four different endings for the lest act had evolved during reheersals, and he hasn't made up his mind which one he likes best.

Predicting that there will be other productions of the work — "although none as glorious as this" — artistic director Serah Caldwell praised the choir as "the great strength of the production." And she pointed out:

"It was very interesting to me to see how wholeheartedly they threw themselves into the work," she said. "A patriotic piece — if you went to use that term — can be very dangerous. It could have turned young people off if written and conceived differently."

That it did not Miss Caldwell attributed to the fect that the work is simultaneously both involved and distanced from its period.

Mr. LeMontaine amplified: "The music was chosen from contemporary idioms which would have been acceptable to the colonists. The scene leading up to the shots at Lexington, for example, has a tune in the files which of course I wrote, but it is in the character of fife and drum music end would have been easily intelligible in 18th century terms. As this led to the shots which resulted in a scream from the onlookers, it was followed by complex polytonel chords ell piled up on top of each other with brass fanfares. This is the orchestral equivalent of a scream, and that scream coming out of their material is something I believe the colonists would have understood."

Miss Caldwell was asked to comment on the reasoning behind some of her staging. She said she had chosen to use the spectacular fireworks at the conclusion because it was supposed to be the fourth of July. (And they were prescribed by John Adams, Mr. LaMontaine added.)

"The composer," Miss Caldwell said laughingly, "was a real bear about making all the elements in the production seem something the colonists might have done."

On this score, Mr. LaMontaine initially objected to the overhead screen projections which Miss Caldwell suggested in order to make the audience conscious of the original source materials behind each segment of the libretto. Mr. LeMontaine, however, was somewhat mollified when she agreed to call them "illuminations."

Of her much-applauded decision to put part of the choir in the side walls of the auditorium, Miss Caldwell said:: "I'd never seen side walls before where you could put people. I felt they would make marvelous resonating chambers, end I also felt the piece should have elements of being a bit of fun."

And she continued:

"I don't know anywhere else on earth where you could have produced e piece this way. There is incredible talent on the student and faculty level. I believe this work will be done again in many different ways because unusual pieces get done in a variety of ways, but the resources here made it possible to do this production in a vary special way. And I might add it was also done in an atmosphere of having a great good time."

To illustrate her last statement, Miss Caldwell described an assignment given the choir as part of a set of ecting and dance exercises. The whole group was to get together and decide on some kind of athletic match and then to watch end react to it — without telling the director what it was.

After conferring together, they ell came to the footlights end froze looking at one spot. Needless to sey, the dramatic coach was upset. He'd failed completely. There was no animation in the group. "What are you watching?" he finally ventured.

"A chess match," his charges replied!

WPSX highlights

Pianist Philip Dettre, assistant professor of music, performs three works by French impressionist composer Gabriel Faure on **Impressions in Music** Friday, Feb. 13, at 6:30 p.m. Selections are "Theme and Variations, opus 73"; "Impromptu no. 3 in A-flat mejor"; and "Nocturne no. 6 in D-flat Major."

Scientific research in the Antarctic is the subject of "Ninety Degrees Below" on **Nova** Sunday, Feb. 15, at 8 p.m. The hour-long documentary, filmed entirely on location in the Antarctic, examines the reasons why scientists from all over the world find the area a fertile ground for research and how it may hold clues to a possible future ice age. Nova may also be seen Saturday, Feb. 21, at 3 p.m.

Award-winning euthor-journelist Bill Moyers presents an hour-long conversation with philosopher and educetor Mortimer Adler on **Bill Moyers' Journal** Sunday, Feb. 15, at 10 p.m.

John Adams' tenure as America's first Vice President is the focus of **The Adams Chronicles** Tuesday, Feb. 17, at 9 p.m. During this period, he found himself caught in the middle of a philosophical battle between Jefferson and Hamilton.

Joseph Wiseman stars in "Zalmen, or the Madness of God" on **Theater in America** Wednesday, Feb. 18, at 9 p.m. The play is Elie Wiesel's mystical drama of one rabbi's impassioned rebellion against religious persecution in Russia.

Three Pennsylvania craftsmen are profiled on **Gifted Hands,** an hour-long special program, Thursday, Feb. 19, at 7:30 p.m. The Penn State Television production focuses on how professional involvement in crafts affects other aspects of a craftsman's life. Featured are Bill Strickland, Jr., a Pittsburgh potter; weaver Annette Hobbs, of State College; and Wilbert Leuter, a Reading tinsmith.

Jean Peters and Albert Salmi star in a television adaptation of Sherwood Anderson's "Winesburg, Ohio" on **Hollywood Television Theatre** Thursday, Feb. 19, at 9 p.m. The play centers around a mother's struggle to help her son escape the small town life that has stifled her.

Book donations asked

Book donations are being requested by the local branch of the American Association of University Women for its 15th annual used book sale, which will be held April 5-9 at the Wesley Foundation. Paperbacks and hardbacks of all kinds are welcome — reference books, music, crafts and hobbies, mysteries or classics — end special magazines such as "Gourmet" end "National Geographic." There lis always a demand for cookbooks and good children's books. Books may be left in special boxes in the rear entryway of the Schlow Library. Information on other collection centers or pick-up service is availebla from Sarabeth Croll, 237-8066.

Arts roundup

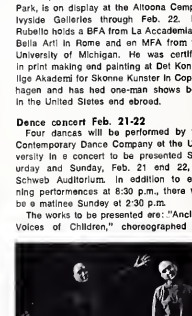
(Continued from page three)

shown at one time on a rotating basis. Educated at the University of Minnesota, the photographer has been director of the Westbank Gallery there. A participant in many group exhibitions, he worked from 1964 to 1966 on mathematics films under the support of the National Science Foundation. The show ends Feb. 24.

Children's play

Penn State's Children's Theatre is premiering a new musicel drame, "Norton I, Emperor of the United States," et 7:30 p.m. Friday, Feb. 13, in the Pavilion Theatre. Other performances are scheduled for Feb. 14, 15, 20, 21 and 22, and their times are listed in the University calendar. The play was written by a Penn State alumnus, Thomas Spivey, and Dr. Helen Manfull, assistant professor of theatre arts, with music end lyrics by Mr. Spivey. Dr. Menfull is directing the play, which is based on the life of a real person, Joshua A. Norton, who lived in San Francisco just after the gold rush of 1894. Dr. Menfull hes previously directed such successful plays es "The Blue Bird," "Five Minutes to Morning," "The Beeple," "Ofoif" end "The Second Shephord's Play."

Tickets may be purchesed at the Playhouse Box Office from 1 to 6 p.m. on nonperformance days end from 1 to 9 p.m. on performance days.



Rubello exhibits

An exhibit of paintings by David Jerome Rubello, instructor in art at University Park, is on display at the Altoona Campus Ivyside Galleries through Feb. 22. Mr. Rubello holds a BFA from La Accademia Di Bella Arti in Rome and an MFA from the University of Michigan. He was certified in print making and painting at Det Kongelige Akademi for Skonne Kunster in Copenhagen and has held one-man shows both in the United Stetes end ebroad.

Dence concert Feb. 21-22

Four dances will be performed by the Contemporary Dance Company at the University in e concert to be presented Saturday and Sunday, Feb. 21 and 22, in Schwab Auditorium. In edition to evening performences at 8:30 p.m., there will be e matinee Sunday et 2:30 p.m.

The works to be presented are: "Ancient Voices of Children," choreographed by

Contemporary Dance Company

LaRue Allen with music composed by George Crumb; "A Suite of Improvisations," choreographed by Patricle Helgel-Tenner end Niles Seyers; "Suite of Pre-Classic Dances," choreographed by Patricle Helgel-Tenner with music composed by Bruce Trinkley; and "The Brahms Waltzes," choreographed by Charles Weldman and reconstructed from the Labonetation score by Gail Devereaux.

The Contemporary Dance Company was formed at the University in 1973, and since then has been performing at University Park and touring the state, giving concerts and master classes. It is composed of about 15 dancers from the University faculty and student body and the State College community. Co-directors of the company are: Patricia Helgel-Tenner, assistant professor in dance; LaRue Allen, director of the Central Pennsylvania Dance Workshop; and Gail Devereaux, assistant professor in dance.

Tickets for the concert went on sele beginning Saturday, Feb. 7, at 105 While Building and The End Result, 109 S. Allen St., el $2 for general admission and $1 for students.

Metal maps—invisible landscapes revealed as contour maps

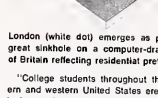
"There are really three 'languages,'" says professor of geography Peter Gould. "We have words, mathematical symbols, and graphic languages. Graphic language can often communicate with en immediacy which is absolutely impossible to get in verbal and algebreic forms. This is why geographers are so excited by the idee of maps."

Tha maps to which Dr. Gould refers are not the old projections remembered from schoolroom walls.

"Geographers todey are using maps in detailing with spacas that appear esoteric and unrealistic but are, in fact, the 'real' spaces," he explains.

"Distence, as it ralates to certain forms of human interaction, has been almost annihilated or, at least, tremendously compressed. Conversely, some spaces have been greatly expanded; for exemple, in a city with strong feelings about race, the communication spacas may be only e street apart, but to the people who live there the areas are widely separated. So maps today must be ruptured and torn versions of old notions of space," Dr. Gould concludes.

This kind of thinking exemplifies what is called the "new geography," and to this re-emerging discipline, Dr. Gould has contributed the mental map.



"A mental map is a contoured surface showing the topography of preferences for residential desirability," he explains. "It's an invisible landscape of human preferences shown as a contour map."

To make a mentel map, the geographer works with a conventional outline map asking people to rank-order on it their preferences for where they'd like to live.

"Usually," Dr. Gould explains, "we try to pose the question: "If you were completely free to choose, not bound by economics, what would be your set of preferences of where to live?"

Dr. Gould introduced his mental map concept in 1966, and one of his early and continuing efforts has been mapping Penn State's students' living preferences in America.

"Imagine the surface of the United States as a sort of contour map, where the high points are areas of perceived desirebility and the vallays are places which are disparaged," he suggests.

London (white dot) emerges as part of a great sinkhole on a computer-drawn map of Britain reflecting residential preferences.

"College students throughout the northern and western United States are surprisingly consistent in their mental maps. A typical one would show a high California ridge and a low sinkhole in the Dakotas, a Colorado high, then a southern trough, then another gradient rising up over New England. The only real variation is the dome which occurs in the area where a particular student lives. A State College student, for example, would have a central Pennsylvania high point on his map."

During a sabbatical in Sweden, Dr. Gould made mental maps of that country with subjects of all ages. Again, a homogeneity of response emerged.

"We discovered that there is a clear mental map of Sweden that seems to be shared by everyone there, the only differences being the particular local dome of desirability," he says.

"Mental Maps," a paperback which Dr. Gould wrote with his former graduate student Rodney White (now with the World Bank in Dakar, Senegal), contains mental maps of the inner-city of Philadelphia. The city in this case is mapped with peaks representing areas of perceived high stress and valleys, which are safe avenues through the urban environment.

"David Ley, who made this map, then charted people's actual movements through it," Dr. Gould explains, "and he found clear evidence that people did not necessarily move from point to point in a straight line. Their movements were conditioned by the invisible landscape so that when they encountered a high peak of perceived stress, they took a safe valley around it."

A preliminary study of truant children in Philadelphia revealed similar mental maps.

"We found that the school bus stops for these children were often located in high stress peaks — gang boundaries, for example — where the children knew they would be roughed up or shaken down. They refused to go to these stops, missed the bus, and ended up truant," Dr. Gould says.

Building on inferences made from mental maps, Dr. Gould has begun mapping what he calls "information surfaces."

"In Canada, we've made information surfaces of French and English-speaking children living just a few miles apart in Montreal," he continues, "and we've found that these surfaces are completely different for the two groups. The French children have a very strong warping and bias toward the Quebec area, and the English-speaking children, even though they live in Montreal, have a strong orientation toward the more English Ontario.

"The maps offer dramatic, graphic evidance that although people may live close together in geographic space, it's the streams of information which actually affect the way they perceive their world. You're sort of a prisoner of your information space," he concludes, "and that space is conditioned by language and culture — the sort of newspapers you read, the television programs you watch, and so on."

After a decade of working with mental maps, what began for Dr. Gould as "a kind of intellectual game" is emerging as a potentially important research tool.

"I've had letters from psychologists, sociologists, planners, communications people — a whole host of different disci-

Dr. Gould

plines," Dr. Gould notes. But he sees his new maps as perhaps most immediately applicable to the problems of planning.

"Since our work in Sweden was published," he says, "we've gotten a lot of inquiries from there. The Swedes have an extensive program of both regional and national planning, and their geogrephers are interested in talking to us about taking our academic work with mental maps and really beginning to use it for a lot of practical planning purposes.

"But I don't believe, nor should anyone else, that mental maps are 'riding to the rescue' to save mankind," Dr. Gould concludes. "They are one little thing that can perhaps increase people's awareness and sensitivity to the way their environment is changing. And, by being aware of this, perhaps we'll begin questioning ourselves about whether we really want to continue in the direction we're headed."

Hiring rules for aliens available

Department heads or faculty members who are contemplating the employment of foreign nationals are urged to contact Robert W. Dombrowsky in Room 118 Willard Bldg. (865-0423).

As meneger of the Personnel Procedures Division, he is the University official authorized to request the granting of exchange visitor visas for employment at Penn State.

The University may employ certain foreign nationals for limited periods of time provided they qualify for and are granted exchange visitor vises, Mr. Dombrowsky explains. But the employment must be a part of the alien's educational program, and upon completion of the training or experience, aliens are expected to return to their native land.

Mr. Dombrowsky notes that all persons receiving compensation from a U.S. employer must have a Social Security number, so when he needs the required visa forms to a foreign national, he also provides an application card for a Social Security number.

"When the card is returned," he continues, "we sent it to the proper Social Security Office with e statement from the University confirming and describing the type of employment and visa involved. A request is made that the granting of the Social Security number be expedited so that it will be available when the foreign national arrives at Penn State.

"Since the documentation necessary to have a foreign national admitted to the United States to accept employment and receive compensation requires some delays, it is essential that the Office of Personnel Administration be informed well in advance of the date when the foreign national is to arrive to teach and/or conduct research. Undue delays in salary peyments can thus be avoided."

The Office of Personnel Administration should also be contected in the event that an alien employed by the University wishes to eppiy for permanent resident status.

Mr. Dombrowsky gathers the information necessary to apply for a Labor Certification for the alien, which must be obtained before the University can submit a preference petition.

Hearings continue

(Continued from page one)

ademic administrators appointed in schools, departments and divisions included in the voting unit. The administration, on the other hend, contends that all academic administrators, including deparlment heads, should be excluded from the bargaining unit.

Q. On what basis is the administration seeking the exclusion of academic administrators such as department heads and directors?

A. According to the provisions of Act 195, all management level employees and supervisors should be excluded from a bargaining unit. The administration contends that all personnel classified as acedemic administrators should, therefore, be excluded.

In the initial experiences with collective bargeining, some college and university administrations agreed to bargaining units which included department heads and other administrators because they believed this would promote e vote for "no representation." Under the normal collegial arrangement of university governance, there is likely to be only minimet conflict for e faculty member between his or her role as faculty member and as academic administrator. This is not the case, however, in the bilaterel context of labor negotiations, where the law requires that the line between menegement and labor be clearly identified. The University's "Faculty Handbook," for instance, clearly describes the department head as a first level supervisor as the letter is defined by Act 195.

Q. What has been the experience at colleges and universities where administrators have been included in the bargaining unit?

A. It has created the necessity to reatign managerial responsibilities. Also, in some instences, a new level of supervision and management had to be created at increased cost. This has been the outcome in some institutions which had not contested inclusion of depertment heads in the bergaining unit. Although Penn State continues to believe that collective bargaining is neither desirable nor inevitable, it must strive throughout the unit determination hearings to achieve a workable unit for conducting labor negotiations in the event a faculty bargaining representative is elected.

Q. What is really at issue with respect to the non-teaching professionals?

A. The character and quality of the University's programs in teaching, research and public service are the sole responsibility of the University's faculty. Other University personnel, including executives, administrators, non-teaching professional and semi-professional personnel, clerical and technical service employees, provide the necessary support for these programs. These latter functions, however essential, are fundamentally different from the faculty functions.

Both the AAUP and Penn State have taken the position that an appropriate faculty voting unit for The Pennsylvania State University should include solely the University's faculty, those persons classified as "academic" employees. This includes professional, research and librarian faculty members. On the other hand, PSUPA seeks to include what has become known in the academic arena of collective bargaining as non-teaching professionals (personnel classified at Penn State as staff exempt personnel).

Q. What did the PLRB decide on the inclusion of department heads and non-teaching professionals at the University of Pittsburgh?

A. The Board, in the decision issued Jan. 22, excluded department heads, except for the School of Medicine, and non-teaching professionals.

Q. The unit determination hearings for the University of Pittsburgh began in October, 1974, and continued through July, 1975. Is it likely that Penn State's hearings will take as long?

A. Most likely the hearings will continue for at least several months to establish e record capable of defining and delineating the facts on which e unit decision can be made. Regardless of how anyone believes the outcome of an election would or should be, there is the possibility that e bargaining representative could be elected and that labor negotiations would be conducted. It is important that the members of the unit defined by the PLRB share an appropriate community of interest with respect to "wages, hours and other terms and conditions of employment." All of the positions being taken by the University administration with respect to the determination of en appropriate voting unit have been developed with the possibility that an election need not, but in fact could, lead to collective bargaining.

New exam policy

The University Faculty Senate hes adopted a final examination policy which requires that all end-of-term exams be given during the final examinetion period.

In a clarification of a previously passed policy, the Senate at its Feb. 3 meeting approved recommendations on a general examination policy and a final examination policy from its Committee on Undergraduate Instruction.

Under the final examination policy, a full ten weeks of instruction should be offered each term with no examinations scheduled during the last week of classes. Quizzes and narrowly limited tests in support of classroom instruction may be given during the final week.

Where end-of-term written examinations are not required, the instructor must submit an alternate means of evaluation "unless an exception for educational reasons has been authorized by the faculty of the program offering the course."

A number of senators objected to the policy, with one calling it too specific and intertering with an instructor's right to teach, while another said it was unenforceable.

Several amendments to the proposals were defeated, however, including one which would have reverted back to the policy in effect prior to March, 1975.

In other action, the Senate voted to continue to offer e ten-week summer term, with special shorter time period classes for primary and secondary school teachers.

The Senate also:

— Approved e recommendetion to drop the Academic Policy definitions of resident education and continuing education.

— Heard an informational report from Provost Russell E. Larson on the progress of program review.

— Heard an informetionel report on the effects of inflation on the University Libreries.

PSU gets 3.91 percent hike

Gov. Milton J. Shapp in his budget message presented in Harrisburg Feb. 4 recommended an appropriation of $106,730,000 for Penn State for 1976-77.

The amount is an increase of $4,022,000 or 3.91 per cent over the $102,708,000 appropriated for the current year.

University officials last September had requested $118,711,000 or an increase of 15.58 per cent over the 1975-76 appropriation. The request included $3,690,000 for medical education programs in the College of Medicine, urging an increase in the per capita amount for medical education from the level of $7,465 that has been in effect for a number of years to $10,000. The budget recommended by the Governor maintains the $7,465 per capita amount.

The recommended Penn State appropriation, as it appears in the Governor's Executive Budget for 1976-77, follows:

(Dollar Amounts in Thousands)

	1974-75 Actual	1975-76 Available	1976-77 Budget
Educational and General	$ ...	$ 71,593	$ 74,457
Instruction	63,189	.....	.....
Student Aid	1,760	1,760	1,760
Research	17,064	17,064	17,747
Extension and Public Services	9,626	9,626	10,011
Medical Programs	2,493	2,665	2,755
Sub-Total Penn State University	94,132	102,708	106,730

President comments on Shapp's message

The proposed appropriation increase contained in the Governor's Executive Budget recommendations for 1976-77 falls far short of meeting the basic needs of Penn State. The recommended increase is about one-quarter of the amount requested by Penn State.

The requested appropriation increase last September had placed a very high priority on avoiding a tuition increase in 1976-77 and was limited to funds necessary to deal with inflation. That request also reflected the fact that Penn State had already made internal budget cuts exceeding $9 million dollars over the last five years.

We recognize the very tight revenue situation of the State. However, we also recognize the potential implications an appropriation at this level could have for the effective functioning of the University, as follows:

1. The recommended increase does not meet the unavoidable inflationary costs and other increases over which the University has little or no control.

2. It would have an impact on our ability to maintain sound educational programs.

3. It would have an impact on our ability to provide needed salary increases for employees.

4. It would have an impact on tuition, although one of our highest priorities will continue to be to seek every means available to avoid a major tuition increase next year.

In the coming weeks, I will meet with members of the Legislature and State officials to emphasize the serious implications of the recommended appropriation.

At the same time, I must remind all members of the University community that we must be realistic about the budget, which is a reflection of the state of the economy. In the absence of new or expanded revenue sources, the State is limited in what it can do at the present time. We must continue to identify and implement internal cost-cutting measures and to reallocate funds to areas of greatest need. In this context, we will do everything possible to convince the Governor and the Legislature of the importance of increased support for Penn State.

Staff vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Feb. 19, 1976. Do not contact the area that has the vacancy.

DIRECTOR OF TRANSPORTATION SERVICES, OFFICE OF BUSINESS SERVICES — University Park

Responsible to the Assistant Vice President for Business Services for the development and administration of University transportation services, including the University Park Airport and Fleet Operations. A bachelor's degree plus seven to ten years of experience in motor fleet and/or fixed base general aviation operations management or related administrative experience is required. Related advanced postgraduate work and thorough knowledge of Federal Aviation Regulations is preferred.

ADMINISTRATIVE ASSISTANT FOR ACADEMIC SERVICES — Fayette Campus

Responsible to the Assistant Director for Resident Instruction for developing and maintaining a system of scheduling, registration, record keeping and processing for the Resident Instruction Office. Interacts with faculty, students and other administrative staff at the Campus and at other University offices in coordinating those aforementioned functions with the policies and procedures of the University. Bachelor's degree or equivalent with one to two years' administrative and computer experience basic knowledge of scheduling, records and registration procedures desired.

COLLEGE HEALTH NURSE, IN-PATIENT AND EMERGENCY ROOM, STUDENT AFFAIRS — University Park

Responsible to the Head College Health Nurse, In-Patient and Emergency Room, for providing nursing service in the In-Patient Service Area and in the Emergency Room and assisting licensed physician and dentist in-patient care. Graduate from an accredited nursing program or its equivalent and current licensure in Pennsylvania as a registered nurse, plus six to nine months of directly related experience.

ASSISTANT TO THE DIRECTORS, STUDENT AFFAIRS — University Park

Responsible to the Director of Student Activities and to the Director of Career Development and Placement for providing administrative support services in the areas of student program advising and student employment, respectively. A bachelor's degree or equivalent plus over one and up to seven including two years of directly related experience or a master's degree and over three months of directly related experience is required.

MEDICAL SOCIAL WORKER — Hershey

The Social Worker is responsible for providing basic in-patient and out-patient Medical Social Services within the Medical Center and serves as part of the house care team in providing practice help and emotional support to patients and their families. Master's degree in social work or equivalent from an accredited college or university plus two years' experience in hospital, health or family social work.

In addition to the above vacancies, there are positions that frequently are available because of the number of employees in them. They are not listed below and will not be listed on an individual vacancy basis. Applications for such positions may be made at any time, and you are welcome to make your interests known now to the Employment Division for future consideration when vacancies occur. These positions are:

Staff Nurses, Licensed Practical Nurses, Radiology Technicians, Research Technicians and Medical Technologists, all at the Hershey Medical Center; Assistant Food Supervisors in Housing and Food Service; Residence Hall Coordinators and Assistant Coordinators in Student Affairs; and Nutrition Assistants in Agriculture Extension in various counties.

Funding opportunities

For further information, call 865-1372

(213-1) An updated version of **"Awarding of Indirect Costs for NIH Research Grants"** has been issued through the NIH Guide, superseding the June, 1971, version. (Ref. NIH Guide, Vol. 5, No. 1, 1/30/76)

(213-2) The National Endowment for the Arts announces the ninth **Work Experience Internship Program** June 7 through Sept. 3. The application deadline is March 16. Interns are assigned to nearly all Endowment programs. One or two candidates are usually sponsored by a college or university. The stipend is $1050 for 13 weeks. Fall and spring programs will run from Sept. 20-Dec. 17, 1976, and Feb. 7-May 9, 1977. (Ref. NEA)

(213-5) Proposed grant program rules for **Nurse Practitioner Training** have been issued by the Public Health Service to provide additional training for registered nurses. Responses are requested by Feb. 23 (Ref. 41FR3551-76, 1/23/76)

(213-6) The Public Health Service has issued proposed regulations for **grants to assist agencies assigned National Health Service Corps** personnel including physicians, psychologists, nurses, dentists, planners and technicians (Ref. 41FR3821-4, 1/26/76)

(213-7) The new Federal Budget increases **research and development funds to colleges and universities** by 9 per cent to a $2.6 billion total. **Energy** (R&D (ERDA) is up 26 per cent, **defense** up 15 per cent and **NSF basic research** up 13 per cent. Defense basic research continues to be phased from "in-house" to universities (May 29, 2161-4). NSF basic research increases add about $40 million to MPE, $26 million to AAEO and $22 million to GSS. **Health Research** is also in for an increase (mostly for cancer research) and **agricultural research** will be increased about $20 million with focus on increased food production and crop and weather forecasting. (Ref. Chemical, 1/26/76)

(214-1) The Environmental Protection Agency announces a March 1 date for its **Air Pollution Fellowships**. Special fellowships are awarded to students in pollution control science, engineering, technology and specialty areas supportive of pollution abatement and control efforts. **EPA also funds research, development and demonstration grants.** Preapplication communications are encouraged. Solicited proposals are solicited. Commerce Business Daily. Unsolicited contract proposals are also available if they meet the FPR sole-source requirements. (Ref. EPA Announcement).

(214-2) OE Bilingual Education Fellowships have a March 23 deadline date (Ref. 41 FR2843-44, 1/20/76) (CFOA 13.403).

(214-3) A grantsmanship workshop to be held March 23 at the Remedy Inn, Arlington (Rosslyn), Va., will be sponsored by the Office of Federal Programs, an organization of the American Assn. of State College and Universities. Subjects covered will include location of grant and contract opportunities and proposal writing. Agency materials will be available. Attendance will be based on available space and the registration is $15. To register, contact Chris Olding at 202-293-7070 by Feb. 15 (Ref. OFP).

(214-4) Criteria for funding and a March 5 deadline date for **foreign language and area studies fellowships** have been announced by the Office of Education (Ref. 41FR4318-19, 1/29/76) (CFOA 13.434).

(214-6) EROA research and development programs and opportunities for colleges and universities were the subjects of a Special Report by the Office of Federal Programs, a unit of the American Assn. of State Colleges and Universities. Included are organization and policy R&D program descriptions, education and training program descriptions, and proposal procedures. Energy commodities distribution was made earlier. The report also includes an Energy Research and Development Administration staff directory. (Ref. OFP).

(214-7) The 1976 Summer Seminar Stipends program for college teachers has been announced by the National Endowment for the Humanities and carries a March 1 application deadline. Institutions throughout the country will host 77 seminars with 12 participants each. Seminar areas include: art history, classics, literature, language, history, music, philosophy, religion, political science and social science. Call Marjorie Berlincourt at 202-382-7140 for additional information. (Ref NEH announcement + OFP).

(214-8) Uniform methods for **reconsideration of proposals declined by NSF** have been announced. Information about a declination may be requested by letter, telephone or personal visit. The information will include verbatim comments from the peer reviews (if requested) with reviewer identity deleted. Reconsideration of the proposal may then be requested in writing and received by NSF within 180 days of declination date. NSF Important Notice No. 61. (ref. ibid).

(214-9) Service delivery research proposals are being solicited by NSF to help local governments make better decisions in solid waste management, urban water resources, fire protection and financial management. The proposal deadline date is March 29. Program solicitation 75-42, "Decision-Related Research in the Field of Urban Technology," is available at 202-632-4126 (Ref. NSF/PA/M(76-31)).

HUB carnations on sale

The Helzel Union Board will be selling carnations for Valentine's Day all day Friday, Feb. 13, on the first floor of the HUB next to the ballroom. The carnations will be sold at 50 cents apiece.

News in brief

(Continued from page one)

of a symposium on Palestinian nationalism at Tufts University and writer-in-residence at the Virginia Center for the Creative Arts.

His talk is sponsored by the Middle East Studies Committee as part of its series on the Arab-Israeli conflict.

Council recommends policies

Recommendations on policy and procedures, studied by two sub-committees of University Council, were approved last Thursday by the Council and forwarded to President Oswald for consideration.

One recommendation approved was that on the revision of the interim procedures for resolving student allegations of discrimination as required by Title IX of the Education Amendments of 1972.

Dr. Richard F. Reynolds, assistant professor of mathematics at the McKeesport Campus, who headed the sub-committee, explained that the revision encourages the resolution of charges in an informal manner rather than through the filing of a discrimination appeal form and review by a discrimination review panel.

The other policies reviewed were those proposed for use of University equipment, supplies and services and for use of the University mail service. Dr. John L. Lumley, Evan Pugh Professor of Aerospace Engineering, serving as chairman of the subcommittee reviewing the policies, said the revisions suggest that equipment, supplies and services owned, leased or operated by the University should be used only to further the interests of the University and that authority for approving such use should be delegated to the person responsible for the equipment, supply or service.

All three policies have also been undergoing review by other University committees.

Ulerich names committees

William K. Ulerich, of Clearfield, elected president of the Board of Trustees of the University on Jan. 17, has designated trustees to serve on the various committees of the Board.

Ralph Hetzel, of Kent, O., will continue to serve as chairman of the Committee on Educational Policy; Michael Baker Jr., of Beaver, was designated chairman of the Committee on Finance; and George H. Deike Jr., of Pittsburgh, was named chairman of the Committee on Physical Plant.

Special Committee chairmen continuing are Samuel F. Hinkle, Hershey, The Milton S. Hershey Medical Center Advisory Committee; and Dr. Helen D. Wise, State College, chairperson of the Affirmative Action Committee.

The Executive Committee chairman is the president of the Board, Mr. Ulerich.

Mr. Deike was designated also as trustee liaison with the Athletic Department and Walter J. Conti, of Doylestown, was designated as trustee representative to meetings of the Alumni Assn. Executive Board.

Free U. course openings

Anyone interested in starting a course or common interest group for the Free University in the spring term should register their intent by Friday, Feb. 20, so the course may be included in the Free U catalog. The information may be called in to 863-0038 or dropped off at Room 223 HUB.

Black History Week

Speakers, films, drama, a dance and exhibits are features of Black History Week which begins Feb. 15 at the University and will continue through Feb. 15.

Charles L. Blockson, of Gwynedd, a former Penn State football player and track star, will speak on "Black Pennsylvanians" at 7 p.m. Thursday, Feb. 12, in the Cultural Center. His exhibit, "The Black Experience in America — From Colonial Times to the Present," will be on display through Feb. 15 at the Cultural Center, Hetzel Union Bldg. and Pattee Library.

A series of black historical films will be shown from 2 to 5 p.m. Friday, Feb. 13, in the Cultural Center. A discussion of "Black Student History and Involvement at Penn State during the Black Power Movement" will be held at 7 p.m. in the HUB Assembly Room. Taking part will be State Rep. Glenn Grahame, of Pittsburgh, who is a member of the University Board of Trustees, and James Garner, Daniel Trent and Barry Reddish, former black student leaders at Penn State.

A dance will be held at 10:30 p.m. Friday in the Cultural Center. A play, "The Myth of Andro & Elnoria," will be presented at 7:30 p.m. Saturday, Feb. 14, in the Cultural Center, followed by a cabaret at 10 p.m. in Room 301 Hetzel Union Bldg.

The observance will close with a second presentation of "The Myth of Andro & Elnoria" at 7:30 p.m. Sunday, Feb. 15 in the Cultural Center. The winner of the Black History Week Essay Contest will be announced immediately following the play

Larson, Fortunato testify before PLRB hearing examiner

Pennsylvania Labor Relations Board hearings on the makeup of a faculty unit eligible to vote in a representation election at the University resumed on Wednesday, Feb. 11, at University Park.

The hearings, conducted before Hearing Examiner Sidney Lawrence, were called as a result of a petition filed by the Pennsylvania Professional Association (PSUPA) for an election to determine whether or not a bargaining egent should represent Penn State faculty and professional staff.

Another faculty organization, the American Association of University Professors (AAUP), is participating in the unit determination hearings as an intervenor.

PSUPA is seeking a unit to include all faculty, excluding those in the College of Medicine at the Milton S. Hershey Medical Center, and all non-teaching professionals directly related to the academic and research programs. The AAUP seeks e unit including only faculty, but also would exclude faculty in the College of Medicine.

"Pure" feculty unit sought

The University, on the other hand, feels the appropriate unit for an election should be a "pure" faculty unit made up of regular full-time faculty at all locations of the University.

A significant portion ot the testimony in last week's hearings focused on the differences between the University's Code 4 and Code 5 employe classifications. Code 4 employees are academic faculty of all ranks — professorial, librarian and research ranks. Code 5 employes include staff exempt professional employes.

At Friday's session, the University's second witness, Ray T. Fortunato, assistant vice president for personnel administration, testified that the University's position is that an appropriate bargaining unit, should a representative be elected, would consist of all faculty (professorial, librarian and research ranks) at all locations, but would exctude part-time faculty, first-level supervisors, special visiting, clinical and adjunct faculty, affiliate rank faculty, post doctoral fellows and scholers, and faculty associetes.

Under direct examination by University attorney Delbert J. McQueide, Mr. Fortunato emphasized the difference between the working conditions of faculty and staff exempt personnel. He reviewed the University's personnel policy manual, examining numerous policies that differentiate between the two classifications.

He told the hearing examiner that, while his office plays only "a monitoring role" in the hiring of faculty members, it has "full participation" in hiring staff exempt employes, including developing job descriptions and setting pay rates.

In describing the differences between the two classes of employes and the personnel policies concerning them, Mr. Fortuneto seid that staff exempt Code 5 employes are paid on the basis of thair classification and for the duties they perform, and that they are promoted into jobs with more complex duties. Academic employes, he said, are paid and promoted in relation to scholarly activity and who they are (disciplinary reputation), rether than what they do (assignment).

Dr. Russell E. Larson, provost of the University, was the University's first witness in the sessions and testified at length on the responsibilities and the administrative structure of the University and the makeup of the colleges and various administrative offices.

Dr. Larson noted that the University's faculty are located administratively only in the 11 academic colleges, in the University Libraries, and in various inter-college research activities and programs. Staff exempt personnel, on the other hand, are located in all administrative areas of the University as are all other classifications of employes.

Listing the three primary functions of the University's mission as education, research and public service, he indicated that the faculty are responsible for delivering these functions, while all other classifications of employes support the faculty in this mission.

Under cross examination by Ronald Watsman, PSUPA attorney, Dr. Larson said that the University does not have a standard definition of a full-time faculty workload, noting that faculty members in the various colleges are obligated for a variety of assignments in instruction and are expected to participate in research and also are involved in various forms of public service. Mr. Fortunato, in his testimony, said that the standard expectation for staff-exempt employes is a minimum of 40 hours per week.

Frequent consultetions

Also under cross examination, Dr. Larson pointed out that while the provost and dean of the Hershey Medical Center does not have line responsibility to the University provost as do the other college deans, he, and the provost of the medical center consult frequently, and he makes recommendations on the medical center to the president of the University.

Asked about the College of Medicine criteria for tenure, Dr. Larson said the standards for promotion and tenure are the same throughout the University, but noted that criteria may be different, depending on the type of assignment the faculty member has.

All University faculty being considered for promotion and tenure, including those in the College of Medicine, are reviewed by the University Promotion and Tenure Review Committee, he said. The committee's recommendations are forwarded to the University provost, who must review them and make his own recommendations before forwarding them to the president for final action.

Three more days of hearings are scheduled for Feb. 24-26.

Retirement act changes reviewed

In the Dec. 18 INTERCOM, a major change to the State Employes' Retirement Code under the provisions of Act 101 was described. This change dealt solely with members participating in the social security integration (SSI) coverage group who have now been given the option of continuing, freezing or withdrawing their SSI contributions and credit.

In addition to these new SSI options, Act 101 contains other changes to the retirement act which do not require any action on the part of active or retired members of the State Employes' Retirement System. Here are the highlights of those changes:

— Retirement prior to age 60

Members with 35 or more years of service who retire prior to age 60 were formerly guaranteed a full basic annuity (no actuarial reduction for age), but the total annuity was still reduced actuarially when there was an SSI benefit. Act 101 now guarantees a full totet annuity (basic plus SSI).

New reduction tables have been developed for members with ten or more years of credit who retire prior to age 60. The old tables featured a streight percentage reduction for each attained age under 60. The new tables appeer to provide less of a reduction for longer service.

— Disability retirement options

Disabled retirees, who formerly were limited to the single life option, may now also elect one ot the contingent annuitant options.

— Cost-of-living increase in annuity

Act 31, which was passed in March, 1974, provided cost-of-living increases to persons retired prior to July 1, 1972. Act 101 gives a five percent annuity increase to persons retired between 7/1/72 and 3/1/74.

— Annuity requirement of three years service credit

Under former provisions of the act, a member was eligible for an annuity at age 60 regardless of the years at service. Act 101 stipulates that an annuity is not payeble to a member who retires after age 60 with less than three years credit. This mem-

News in brief

New Feculty Handbook

A new edition of the Faculty Handbook is in preparation. Faculty members who have suggestions for deleting items which appeared in the present handbook or for adding new items are invited to send their suggestions to Leslie P. Greenhill, Room 211 Mitchell Bldg., University Park Campus.

Terrace Room closes for break

The HUB Terrace Room will close after the evening meal Friday, Feb. 27, and will remain closed Feb. 28 and 29. The cafeteria will, however, be open for lunch Monday through Friday, March 1-5, from 11:30 a.m. to 1:15 p.m. It will be closed Saturday, March 6, and reopen on a regular schedule with lunch Sunday, March 7.

Exam policy clarified

Because of a misunderstanding of the Feb. 12 INTERCOM article on the University Faculty Senate's final examination policy, the entire paragraph whera the confusion occurred is reprinted here. The entire policy was printed in the Jan. 29 issue of INTERCOM.

"Where end-of-term written examinations are not involved, ensure the submission of any alternative integrative and evaluational means (e.g. term paper, final project report, take-home examinations or studio projects) no earlier than the first day of the final examination period unless an exception for educational reasons has been authorized by the faculty of the department or division offering the course."

"Figaro" to be presented Feb. 22

Mozart's "Marriage of Figaro" will be sung in English by the Curtis Opera Company at its Sunday, Feb. 22, appearance at 8:30 p.m. in University Auditorium under the sponsorship of the Artists Series.

This will be a full-scale opera, accompanied by the company's orchestra, which is conducted by David Effron. Dino Yannapoulos, a veteran of the Metropolitan, San Francisco and Cincinnati Summer Opera Companies, is the stage director.

Ticket prices for this production have deliberately been held down to a price of $2.75 for any seat in the auditorium, and all seats are reserved. Tickets are currently available at the Artists Series HUB booth or at University Auditorium, with box office hours from 9 a.m. to 4 p.m.

Safety holding bikes

The Department of University Safety is holding 135 abandoned or impounded bicycles which may be claimed until Feb. 29 in the Grange Bldg. After that date, all unclaimed bicycles will be turned over to University Salvage and Surplus for sale on March 17.

Charity donations grow

In 1975, 1,353 employees of the University contributed $83,320 to the United Way, with 471 of them making contributions through the payroll deduction plan in the amount of $52,004. The contributions to a designated charity have shown steady growth over the past four years with contributions in 1972 amounting to $45,476 from 1,029 employees; in 1973, $64,594 from 1,194 employees; and in 1974, $72,265 from 1,167 employees. In 1972, the University authorized the use of payroll deductions for contributions to one major charitable fund-raising campaign each year.

(Continued on page two)

Faculty Club survey results announced

The Penn State Faculty Club has been an active organization for the past three years, even without a club facility. Now with its home to be completed by the beginning of the fall term, it is expecting an influx of new members.

Accordingly, the club's officers decided to seek member and potential member input to a number of key policy decisions facing the club as it enters this new stage in its life. The result was a survey of all potential members at all campuses (those with instructional, research and library ranks, plus administrators, extension and staff-exempt personnel).

Over 1,700 questionnaires had been returned by Feb 2 from the total of 4,750 eligible individuals to whom they were sent. The results reported here are based on the 1,548 questionnaires returned before the cut-off date. According to Peter O. Bennett, professor of marketing and vice-president ot the Faculty Club, this is a good return rate for a mail survey conducted in this manner.

Equal dues fevored

A large majority of those responding favor a policy where all members pay the same dues (64 percent), as opposed to having dues vary by rank or by salary. About three-fourths believe that dues should not be set to subsidize social events, preferring that each event pay its own way. A vast majority (88 percent) favor a special low dues rate for Commonwealth Campus members, a policy supported almost as strongly by University Park as by Commonwealth Campus respondents.

Other policy issues raised showed strong opposition (9 to 1) to a minimum monthly purchase rule, and fairly strong support for a policy of including a gratuity in the prices of meals (61 percent in favor).

Respondents were asked whether or not they favored the club accepting reservations for lunch or for dinner meals. For lunch, the potential members are about evenly split (44 percent in favor and 56 percent opposed), but a large majority (87 percent) favor reservations for dinner.

Opinions about a dress code are veried. Very little support (26 percent) is evidenced for a dress code for lunch in the main dining room, and even less (13 percent) for lunch in the lounge. A dress code for dinner in the main dining room received considerably more support (59 percent), however.

The survey was designed so that those respondents who had no interest in the club at all could say so and return the questionnaire after answering just the first few questions. Selecting that option were less than 1 percent of the current members and 26 percent of eligible non-members. By campus, these figures ranged from 16 percent for University Park to 49 percent for all other campuses.

Potential members' reactions to various possible dues structures were obtained by asking respondents whether they "definitely would," "probably would," "don't know," "probably would not," and "definitely would not" join et three different ranges of annual dues. At a level of $80 to $100 per year (the minimum the finance committee considers economically feasible), 90 percent of current members and

Calendar

February 19–29

Special events

Thursday, Feb. 19
Commons Videotape, "The Antarctic," 12 noon, Kern lobby.

Friday, Feb. 20
Sports: Women's basketball, vs. Pittsburgh, 7 p.m., White.
Folk and Square Dance Roundup, 7:30 p.m., south gym, White.
University Theatre, "Norton I, Emperor of the United States," 7:30 p.m., Pavilion Theatre.
GSA Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Teri Gamberling, piano recital, 8:30 p.m., Music Bldg. recital hall.

Saturday, Feb. 21
University Theatre, "Norton I, Emperor of the United States," 10:30 a.m. and 2:30 p.m., Pavilion Theatre.
Sports: Women's and men's bowling, PSU Invitational, 7 p.m., Rec Bldg. Coed riffle, vs. West Virginia, 2 p.m. Women's swimming, vs. East Stroudsburg, Clarion, Slippery Rock, 7 p.m. Man's basketball, vs. Pittsburgh, 8 p.m., Rec Bldg. Wrestling, vs. Pittsburgh, 2 p.m., Rec Bldg.
PSU Symphony Orchestra, 8:30 p.m., University Auditorium.
The Contemporary Dance Company In Concert, 8:30 p.m., Schwab.

Sunday, Feb. 22
Chapel Service, 11 a.m., Eisenhower Chapel, Dr. Eloise C. Snyder, sociology.
Black Christian Fellowship worship service, 11 a.m., Cultural Center, Walnut.
University Theatre, "Norton I, Emperor of the United States," 2:30 p.m., Pavilion Theatre.
The Contemporary Dance Company In Concert, 2:30 and 8:30 p.m., Schwab.
Artists Series, "The Marriage of Figaro," 8:30 p.m., University Auditorium.

Friday, Feb. 27
Sports: Wrestling, EWL Tournament.

Saturday, Feb. 28
Sports: Wrestling, EWL Tournament. Men's swimming, vs. St. Bonaventure.

Seminars

Thursday, Feb. 19
Chemistry, 12:45 p.m., Room 333 Whitmore. Daniel V. Santi, U. Cal., San Francisco, on "Mechanism of Thymidylate Synthetase Reaction."
Meteorology, 4 p.m., Room 26 Mineral Sciences. Simon Chang, graduate student, on "Some Experiments with an Axi-Symmetrical Hurricane Model."
Physics, Biophysics and Biophysics joint colloquium, 3:50 p.m., Room 117 Osmond. Dr. Stuart Kaufman, biophysics and biochemistry, on "Are Biological Clocks Nonlinear Oscillators?"
Biochemistry, 12:30 p.m., Room 617 Life Science. Richard Hippikka on "Sugar Transport in Mature Bovine Spermatozoa."
Philosophy, 4 p.m., Room 167 Willard. Professors John Anderson, Carl Hausman and Carl Vaudeh will discuss Dr. Anderson's book, "The Realm of Art."
Ceramic Science, 11 a.m., Room 301 Mineral Industries. Dr. Ray J. Bratton, Research and Development Center, Westinghouse Electric Corp., on "Progress in Ceramics for Industrial Gas Turbines."
HDSF Colloquium, 7:30 p.m., Room S-209 Henderson. Human Development. Robert Staples, University of California Medical Center at San Francisco, on "The Black Family: Past, Present, and Future."

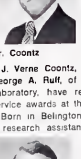
Friday, Feb. 20
Biochemistry and Biophysics, 4 p.m., Room 101 Althouse. C. Fred Fox, UCLA, on "Supra-molecular Organization of Proteins in Cell Membranes."

Monday, Feb. 23
Genetics, 3:55 p.m., Room 108 Tyson. Dr. Kenneth Goodwin, poultry science, on "Avian Tumor Viruses and Lymphoid Leukosis in the Fowl."

Tuesday, Feb. 24
ARL, 10:45 a.m., Eric A. Walker Conference Room, Applied Science. Richard B. Smith on "Propagation of a Chemical Reaction through Heterogeneous Lithium-Perfluoroethylene Mixtures."
Water Pollution Control, 2:20 p.m., Room 101 Chambers. "Permits and Enforcement."

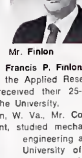
Thursday, Feb. 26
Biochemistry, 4 p.m., Room 101 Althouse. Nancy Schroedl on "Oxidative Titrations of Cytochrome 'c'."

University schedule



Wednesday, Feb. 25
Deadline for fate Drop-Adds.
Classes end.
Last day for signing Winter Term Emergency Loans, Room 108 Shields.

Thursday, Feb. 26 - Saturday, Feb. 28
Final examinations.



Exhibits

Museum of Art: Recent Sculptures of John Cook. Hugo Weber: A Retrospective Exhibit.
Zotter Gallery: David Hare Exhibition, until Feb. 20.
Chambers Gallery: Graduate Student Exhibition, all media, until Feb. 25.
Kem Gallery: Nicki Ruggieri Bicentennial Art Exhibit, sponsored by the Harrisburg Patriot News, until Feb. 26. Lanny Sommese, photography, opening Feb. 28. Ukrainian folk art, through Feb. 29.
HUB Gallery: Penn State Room Exhibit honoring the dedication of the HUB addition, lobby paintings by Nabil El-Husseine, gallery.
Room 212A Arts Bldg.: Wayne Lazorik, photography, Tuesdays and Thursdays, 1-5 p.m.

Faculty notes

Mr. Coontz

Mr. Finlon

J. Verne Coontz, Francis P. Finlon and **George A. Ruff,** of the Applied Research Laboratory, have received their 25-year-service awards at the University.

Born in Belington, W. Va., Mr. Coontz, a research assistant, studied mechanical engineering at the University of Akron. Following a stint as a draftsman at B.F. Goodrich, he moved to the Toledo area where he worked as a designer at Willys-Overland Motors, Toledo Scale, the Packard Motor Car Co. and the Owens-Illinois Glass Co. He served as a designer at the Garfield Thomas Water Tunnel for many years and currently coordinates hardware procurement there.

Mr. Ruff

Mr. Finlon, a professor of engineering research and a Carbondale native, earned his B.S. and M.S. in electrical engineering at Penn State and started part-time at the Lab in 1951. After receiving a degree work at Brown University, Mr. Finlon returned to ARL in 1950. As assistant director he headed up the Acoustics and Signal Processing unit and from 1968 to 1972 was associate director. Currently, as deputy for advanced systems, Mr. Finlon is concerned with the development of new areas of investigation.

Mr. Ruff, a Schuylkill native, obtained his B.S. from Penn State, too. He served in the Coast Guard during World War II and worked as a research chemist at the United States Leather Co. During his years at the Laboratory, he has racked a variety of research projects, done graduate work in physics, taught at several engineering seminars, and for many years was in charge of the calibration station at Black Moshannon.

Dr. Hellmut Hager, professor and head of the Department of Art History, presented a talk, "Carlo Fontana as a Designer of Chapels and Altar Pieces," at the Metropolitan Museum of Art in New York. The talk was given as part of a symposium held in conjunction with the current exhibition of architectural and ornamental drawings there. The show, "Juvarra, Vanvitelli, the Bibiena Family and Other Italian Draughtsmen," premiered at Penn State's Museum of Art last November.

Dr. Robert E. Dunham, vice president for undergraduate studies, has been appointed to the board of directors of the American Council on German Studies. Founded by the American Assn. of Teachers of German and the National Carl Schurz Assn., the council seeks to coordinate efforts to promote German studies in the United States. Dr. Dunham has also been named to represent Penn State on the Canal Zone Higher Education Coordinating Committee, an interagency coordinating organization composed of local representatives from each institution of higher education active in developing educational opportunities in the Canal Zone.

Linda Plotkin, assistant professor of art, has been awarded a fellowship to the Macdowell Colony in Peterborough, N.H. During her fellowship residency in March and April, she will work on a series of drawings and intaglio prints in preparation for a one-woman exhibit at the Impressions Gallery in Boston in May.

Dr. Richard A. Olsen, assistant professor of human factors in engineering, has been selected by the Society of Automotive Engineers as a recipient of the 1976 Ralph R. Teetor Award. He will be a guest of the SAE during the 1976 Automotive Engineering Congress and Exposition, Feb. 23-27, in Detroit, Mich. Dr. Olsen is one of 30 recipients of the award chosen from nominations made by colleges and universities throughout the country. He was selected on the basis of his interest and accomplishments in the area of human factors of transportation.

Dr. Patrick C. Fisher, professor and head of the Department of Computer Science, attended a meeting of the National Research Council of Canada in Ottawa earlier this month. He is a member of the Council's Grant Selection Committee for Computing and Information Science. Prior to joining the Penn State faculty in 1974, Dr. Fischer taught at Canadian universities for seven years.

Faculty Club

(Continued from page one)

54 percent of non-members said they definitely or probably would join (or retain their membership). At the $100 to $150 range, these proportions dropped to 51 and 15 percent, respectively. At the highest limit of $150 to $200 per year, they reached 22 percent and 3 percent.

Based on the answers to this question, a group of "most likely members" was chosen for those that answered "definitely would" or "probably would" join at the $80-$100 range. Special analyses were done on these as they represent the best evidence of the membership the first year the club facility is in operation.

The most likely members are in agreement with the total sample on all dues policies, i.e., that all members should pay the same dues, that each social event should pay its own way, and that there should be a low dues policy for Commonwealth Campus members. They are also in agreement with the total sample on dress code, minimum monthly purchase and reservations policies.

These most likely members eat about half their lunches in on-campus or off-campus establishments, with the other half eating at home, consuming machines or from "brown bags." They spend from $1 to $3 for lunch now, and from $3 to $8 for dinner eaten out.

The results of the survey are now being used by the officers, directors and various committees of the Faculty Club as they make their decisions about club policy for the coming year. Any eligible member wishing more information about the survey, or wishing to join the club may do so by calling 865-1982.

News in brief

(Continued from page one)

ociate professor of music, will perform four works in concert at 8:30 p.m. Saturday, Feb. 21, in University Auditorium.

The program will open with a overture to "Der Freischutz" by Weber, written in the early 19th century and considered perhaps the first romantic opera. Soprano Kyung Sook Kim, a music graduate student and an overall winner in the Young Artists Competition, will perform two arias, "Dove sono" from Mozart's "Marriage of Figaro" and "Vissi d'arte" from Puccini's "Tosca." The other overall competition winner, pianist Marcus Chubbuck, a senior music student, will perform Tchaikovsky's "Piano Concert #1 in B Flat Minor."

Completing the concert will be Dvorak's "Symphony #8 in G. Major," a late work which, with his New World Symphony, is among his most often performed pieces.

Winter commencement

Winter Term commencement exercises at the University will be held at 10:30 a.m. Saturday, March 6, in Recreation Bldg. with more than 1,750 graduates listed for degrees. President Oswald will be assisted in conferring the degrees by John R. Pitzer, representing the Trustees.

Retirement act

(Continued from page one)

ber will only qualify for a return of contributions plus interest.

—Definition of final average salary

This definition is used in the annuity formula and formerly applied to the average of the highest earnings received during any three non-overlapping periods of **12 consecutive months.** The black-faced words have now been changed to read **four consecutive calendar quarters.** This change may make it slightly less advantageous to retire on any date other than the first of a calendar quarter.

Questions regarding any of these changes should be directed to the Employee Benefits Division of the Office of Personnel Administration, Room 133 Willard Bldg.

Staff vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (Voice) or 814-865-1387). Applications for these staff vacancies will be accepted until **5 p.m., Feb. 25, 1976. Do not contact the area that has the vacancy.**

CAREER PLANNING AND PLACEMENT SPECIALIST — Capitol Campus

Responsible to the Coordinator, Career Planning and Placement, for assisting with the organizing of programs, developing working relationships with social and governmental agencies, students, faculty, etc., and administering the Career Planning and Placement Programs. Master's degree in administration, personnel, counseling, educational administration or related fields, or organized study in training or vocational education equivalent to the master's degree. Over two years and up to and including three years of directly related experience in business or government related activities.

SYSTEMS ANALYST, MANAGEMENT ENGINEERING — University Park

Analyze information needs for operations under the Vice President for Business and implement customer operated data processing solutions using time-sharing computers. Prepare complete operational documentation as well as data element dictionaries and recovery procedures. Evaluate new processing techniques or facilities as required. Bachelor's degree or equivalent required with emphasis on industrial, management or information systems, plus two to four years of experience with programming and implementation of business or engineering applications using modern data-processing techniques

News briefs

Ambassador to speak

Ambassador Miguel Burelli Rivas, of Venezuela, will present an address, "The Future of the United States — Venezuelan Relations," at 7:30 p.m. Tuesday, March 9, in Room 101 Kern Graduate Bldg.

His presentation, open to the public, is one of a series of events planned for the Ambassador during a five-day visit to the campus, accompanied by Senora de Burelli Rivas and Dr. Felix Rossi, minister counsellor for petroleum effairs, and Senora Rossi.

Their visit includes meetings with Venezuelan students es well as University faculty and administrators.

Ambassador Burelli received his doctorate in political science from the University of the Andes, where he holds the title of dean of humanities, having also served as professor of humanities, economics and public international law.

He was a candidate for the presidency of Venezuela in 1968 and in the diplomatic field has served as secretary of the Embassy, Bogota, Colombia, and later as ambassador to Colombia; ambassador to Great Britain; and since 1973 ambassador to the United States.

He had served also as secretary of Embassy, United Nations. He was president of the organizing committee, Third Conference on Law of the Sea.

"Pa. 1776" price to rise

The $12.50 introductory price of "Pennsylvania 1776," the University's official Bicentennial book, will remain in effect until March 1. After that, the regular price will be $15. For faculty, staff and students, "Pennsylvania 1776" will still be available at the University Press, Room 215 Wagner Bldg., for $10 until March 1. Subsequently, the price will be $12, reflecting the standard 20 percent discount on all Press titles. The book is available at many bookstores as well es at the Press office.

Medical claims due date

March 31, 1976, is the last date on which the Employee Benefits Division will accept charges for a 1975 major medical claim from University employees or their dependents.

A major medical claim is established once an employee reports $100 of eligible out-of-pocket medical expenses during the claim year period of January through December. If a major medical claim was not established in 1974 but charges were incurred in October, November or December of that year, these charges may also be included in the reporting of expenses for a 1975 claim.

Claim forms and other information on how to report major medical expenses are available at the Employee Benefits Division, Room 1, Shortlidge Bldg., the Business Offices at the Commonwealth Campuses and the Personnel Office at the Hershey Medical Center.

Next INTERCOM March 11

INTERCOM will not be published during term break. The next Issue, which will appear March 11, will Include the spring term calender. Any last minute items for the calender should be sent immediately to Room 312 Old Main, 865-7517.

Cafeterias open

A be reminder that the HUB Terrace Room will be open for lunch during term break, March 1-5, from 11:30 a.m. to 1:15 p.m. The cafeteria will be closed Feb. 26 and 29 and March 6, reopening on a regular schedule with lunch March 7. Kern Cafeteria will be open from 7:30 a.m. to 2 p.m., March 1-5.

Health center dedicated

Penn State's Evelyn G. Frederick Health Center, the first rural health care facility to be operated by a Pennsylvania university medical center, was formally dedicated last month. The $1.5 million model ambulatory health care facility is designed to respond to the need for providing health care in Upper Dauphin County and adjacent areas, while serving as an educational unit to train family physicians and other health care personnel for delivering medical care in small towns end rural areas. It was built with funds from the Howard G. Frederick estate and $842,000 in Hill-Burton

University Faculty Senate report

Remedial courses

The University Faculty Senate's Special Committee on Developmental Year Program has been conducting a thorough review of the program as well es considering the broader area of remediation within the University.

With a view to providing supportive services necessary to the instructional needs of entering students, and at the same time maintaining and hoping to strengthen the traditional academic quality of the undergraduate program, the committee, chaired by Thomas E. Daubert, has made the following policy and implementing recommendations. They will be acted on at the March 2 Senate meeting.

Policy Recommendations

1. The faculty of the University as represented by the University Faculty Senate affirms its belief in the need for remedial courses to be offered by the University in the areas of basic mathematics, writing and reading. (These courses should serve the purpose of eliminating the weaknesses of students entering college in order (1) to aid the student in later courses taken in the University and (2) to prepare students for everyday life in society.)

2. All entering degree-seeking students, except those rendered exempt by prior college-level study in the particular skills area, shall be tested in the areas of English, basic mathematics and reading. If a student's score indicates that a remedial course is necessary, the student will be required to remove the designated deficiency as early In the student's program as possible. Although removal of deficiencies may be prerequisite to taking courses required to meet the University baccalaureate degree requirements, the courses used for this purpose will not satisty or modity these requirements.

3. A second-level examination in the three basic skills areas should be established. This examination would be taken by all students before the end of the junior year. If as a result of these examinations, a student showed a deficiency, the student would be required to eliminate it prior to certification for graduation.

4. The Developmental Year Program as it presently exists should be terminated at the time a broader program is initiated. (A target date recommended is summer or fall, 1977.) It is intended that the expansion of remedial courses will serve not only the students now served by the Developmental Year Program, but all students needing such instruction. The non-academic support currently available to EDP students by the EDP Office and the non-academic support currently available to the veterans by the Veterans Affairs Office will be continued.

5. Remedial courses should be offered by the discipline involved (Ie., the Mathematics Department for remedial mathematics, the Englfsh Department for remedial English, and the Developmental and Remedial Reading group of the College of Education for remedial reading).

Collateral Implementing Recommendations

6. The Vice President for Undergraduate Studies, the Administrative Council on Undergraduate Instruction, and the Senate Committee on Curricular Affairs should develop a numbering and accounting system for remedial courses which will allow a student to receive necessary financial support but will not permit remedial course credits to fulfill any requirements of a baccalaureate or associate degree.

7. The Senate should approve a grading system for remedial courses which will provide incentives for students to do well, and yet which will not be recorded in the cumulative grade point average.

8. The administration of the University should provide financial support for the department(s) offering remedial courses. Remedial courses of necessity can be taught only in small sections by highly skilled instructors (which in general would not include graduate assistants) and will require substantial monetary support which must be provided by all departments of the University and not just by the departments offering such courses. The money previously allocated to the Developmental Year Program could provide a portion of this support. Additional monetary resources will need to be reallocated, although tuition payments alone will provide most of the required finances.

9 All University faculty should assumo responsibility for maintaining students' competence in writing, reading and mathematical skills in all courses taught.

10. The Vice President for Undergraduate Studies, in cooperation with the various academic units and with the support of the appropriate research office, should conduct a research program into the remedial program including courses, students, faculty and outcome. At least annual reports should be made to the administration and to the University Faculty Senate. Provisions should be made for disseminating information to appropriate secondary education officials in the areas from which the University draws students.

Double majors

At the March 2 meeting of the University Faculty Senate, the Senate Committee on Undergraduate Instruction will make recommendations on revision of policies on multiple degree programs and double majors. The current policies were originally passed in the 1950s and last revised in 1966.

In its study, the committee found that the only reel difference between double majors and simultaneous degrees is that a double major Is possible without acquiring the 30 additional credits required for a simultaneous degree. The committee believes that to acquire more than one academically viable major additional work should be required Thus, double major programs should be phased out end replaced by simultaneous degrees where desirable.

The committee also found academic merit in establishing e mechanism for allowing simultaneous degrees for associate degree programs.

It recommends that Policy 92-00, Multiple Degree Programs, be repleced by the following policies.

60-00 Simultaneous Degree Programs

Definition — A simultaneous degree program is a combination of two majors which combine two distinct fields where an unusual combination of background and breadth is desired by the candidate. Such an integrated program of study cannot combine a general major and a departmental major within the same college.

A degree candidate may undertake a program leading to two baccalaureate or associate degrees under the conditions listed below tor each type degree. More than two simultaneous degrees are not allowed.

60-20 Simultaneous Baccalaureate Degrees

1. Candidates must have at leest a 2.50 cumulative grade point average end be at least fourth-term standing and at most ninth-term standing when making application for such a program.

2. Any application must be approved by the program heads and dean(s) involved. If approved, an adviser will be assigned by each program.

3. Major, college, and University baccalaureate degree requirements in effect at the time of admission to each program must be met for each major and degree.

4. A candidate for simultaneous degrees must earn a minimum of 30 credits above the number of credits required for the degree with the lower total credit requirement.

60-50 Simultaneous Associate Degrees

1 Candidates must have et least a 2.50 cumulative grade point average and be et leest third-term standing end at most fifth-term standing when making application for such a program. Only degrees of Type I are eligible.

2. Any application must be approved by the program heads and dean(s) involved. It approved, an adviser will be assigned by each program.

3. Major, college, and University associate degree requirements in effect at the time of admission to each program must be met for each major and degree.

4. A candidate for simultaneous degrees must earn e minimum of 15 credits above the number of credits required for the degree with the lower total credit requirement.

60-80 Special Programs

Students enrolled in special simultaneous degree programs (such es the Liberal Arts-Engineering program) approved by the University Faculty Senate are exempt from sections 60-20 and 60-50 and instead are held to the particular requirements of the approved special programs.

92-00 Simultaneous Degrees

Candidates completing programs under Policy 60-00 shall receive two diplomas, one for each degree program.

61-00 Sequential Degree Programs

A graduate of the University desiring to acquire a second baccalaureate or associate degree shall be required to apply for readmission with advanced standing under the policies of Section 56-00. If admitted, the candidate shall be required to fulfill the major, college and University requirements for the second degree program end earn e minimum of 30 credits for the baccalaureate degree or 15 credits tor the associate degree.

The committee recommends that Policy 95-00, Double Majors, be phased out and unavailable to students admitted for summer term, 1976, and thereafter.

New rules set for drop-adds

A new rule on the dropping and adding of courses by undergraduate students at the University will be implemented effective with the spring term, 1976.

Under the rule, which was changed at the Nov. 11, 1975, meeting of the University Faculty Senate, a student may add e course during the first ten calendar days of the term and may drop a course during the first 21 calendar days of the term In accordance with procedures of the student's college or the Division of Undergraduate Studies.

Beginning with the 22nd day and ending on the last day of the eighth week, a student may, In accordance with procedures of the student's college or the

Staff vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 863-1347 (between the 475-1347). Applications for these staff vacancies will be accepted until **5 p.m., March 4, 1976. Do not contact the area that has the vacancy.**

PROGRAMMER/ANALYST, COLLEGE OF AGRICULTURE — University Park

Responsible to the Manager of Data Processing and Financial Services for assistance in the solution of complex data processing problems related to area research projects and for supervision of office staff. Supervise the work of Junior Programmers. Confer with project personnel to determine the objectives of the study, anticipated results, degree of confidentiality and use of project data. Advise researchers in the design of survey forms, types of sampling plans and time requirements. Develop new computer programs and upgrade, maintain and adapt existing programs. Advise and assist researchers in the efficient execution and the debugging of programs developed by researchers. A bachelor's degree or equivalent with a major in mathematics, statistics or computer science and from two to four years of directly related experience is required.

PROGRAMMER, MANAGEMENT ENGINEERING — University Park

Using interactive techniques, develop or modify programs, systems and document programs for on-line applications. Assist in the diagnosis and correction of problems in operational programs. Prepare operational documentation for customer operated systems. Bachelor's degree in a technical or business field or equivalent training in computer programming and two years of experience with modern data processing techniques.

DIRECTOR, AUDIO VISUAL SERVICE, CONTINUING EDUCATION — University Park

Responsible to the Vice President for Continuing Education for the administration, long-range planning, development, implementation, and day-to-day operation of the Audio Visual Service Department. Doctoral degree or equivalent in adult education, instructional materials, educational technology and/or systems communications or related areas with over five and up to seven years directly related experience in audio visual services operations

ADMINISTRATIVE ASSISTANT FOR ACADEMIC SERVICES — Gohrand College

Responsible to the assistant dean for undergraduate studies for all student records and registration operations, for preparation of course schedules and for a variety of admissions operations. The position involves supervision of the Records Office, staff, and contact with students as well as with faculty and staff. Bachelor's degree or equivalent required and two to four years of directly related experience.

(216-1) Educational television proposals for the Office of Education have on April 19 deadline. OE also issued guidelines for this ESAA-TV Program including scope, objectives, program distribution and pilot production. (Ref 41FR6111-14, 2/11/76) (CFDA 13.500)

(216-2) Regulations for the **Women's Educational Equity Act Program** have been issued by the Office of Education, which also announces a March 22 deadline for receipt of preapplications for general grants. Small grants ($15,000) will be assigned a later deadline date as will procurement contracts. General projects are to be organized around elimination of sex discrimination in educational programs and curricula and achievement of institutional responsiveness. Capacity-building projects must produce exemplary results usable by organizations other than the award recipient. Model projects must focus on systemic change, institutional change and supplementary activities for individuals. Projects may also include development and dissemination of educational materials; training and counseling; research and development, and continuing, vocational, career and physical education. (Ref 41FR6419-44, 6/26, 2/12/76) (CFDA 13.965)

(216-3) The National Endowment for the Arts has issued program solicitations and deadlines under **nine project categories.** These are: 1) feasibility study for an economic data program on the condition of arts and cultural institutions, April 6; 2) consumer demand analysis for arts and cultural services for the South, May 4, 4) analyses of economic impact of arts activities and cultural institutions on their communities, May 4, 5) planning study for a national survey of the visual arts, March 15; 6) planning study for a national survey of arts and cultural programming on commercial and public radio and television, March 5; 7) critical review and evaluation of audience studies of museums and performing arts organizations, May 4, 8) pilot study of education, training and careers of symphony orchestra musicians, April 6, 9) estimate of needs for musical directors and managing directors for American orchestras, April 6. (Ref NEA Solicitation)

(216-4) The Rockefeller Foundation and The Ford Foundation jointly announce **A Research Program on Population and Development Policy.** Not a graduate fellowship program, it is open to researchers at various career levels including junior scholars and graduate students. Many illustrative research areas are listed. The project period would be from about Jan 1, 1977, for two years. Awards will not exceed $30,000. Closing date is April 1, with a December, 1976, announcement later. (Ref. Announcement)

(216-5) The PHS Health Resources Administration announces that application materials are available for the second designation cycle in OHEW regional offices to entities interested in **designation as a health systems agency** (HSA) under the National Health Planning and Resources Development Act of 1974 (PL93-641). The goal is to provide planning and promote development of services, manpower and facilities in their area. Although letters of intent were required by Feb. 24, those received up to April 16 will be considered (Ref. 41FR6305, 2/12/76)

Appointments

William W. Asbury

William W. Asbury, director of human resource utilization at Kent State University for the past two years, has been named affirmative action officer and assistant to the provost at the University, effective June 1.

As affirmative action officer, he will succeed Dr. Patricia Farrell, who held the position from 1973 until last fall, when she chose to return to her duties as associate professor of recreation and parks.

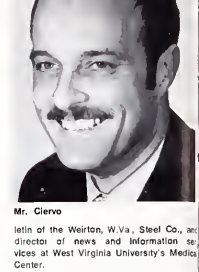
In announcing the appointment, Provost Russell E. Larson explained that the Affirmative Action Office has the responsibility for keeping abreast of state and federal regulations concerning equal opportunities and disseminating them throughout the University. It also monitors University personnel actions to make sure they are consistent with the commitment of the University in the matter of affirmative action policies as they pertain to minorities and women.

At Kent State, Mr. Asbury held responsibility for administering the Affirmative Action and Equal Employment Opportunity Programs.

From 1970 to 1974, he was contract compliance officer for the city of Akron, O., administering the city's Equal Employment Opportunity program on public contracts. Earlier, he had been a senior consultant with the employment agency, Sanford Rose Associates, of Akron.

He played professional football from 1966 to 1969 with the Pittsburgh Steelers.

Formerly from Cincinnati, O., Mr. Asbury attended Kent State where he received his B.A. in sociology and anthropology in 1966, and in 1973, his M.A. in sociology.



Arthur V. Ciervo

Arthur V. Ciervo, director of public relations at Georgetown University, has been named director of public information and relations at the University, effective March 1.

He succeeds Dixon Johnson, who held the position from 1962 until his death in 1974.

A native of Richeyville, Pa., Mr. Ciervo, who is 46, served six years in the U.S. Air Force. His B.S. in journalism was granted by West Virginia University and his M.A. in communications by American University.

Mr. Ciervo began his journalistic career as a reporter and photographer with the Brownsville, Pa., "Telegraph," and then worked for three years as a staff reporter at the Philadelphia and Pittsburgh bureaus of the Associated Press. He was an associate editor of the Employees Bul-

Mr. Ciervo

letin of the Weirton, W.Va., Steel Co., and director of news and information services at West Virginia University's Medical Center.

After serving as a medical-science writer at Georgetown from 1966 to 1968, Mr. Ciervo was named to his present position. He has also been a lecturer at American University in public relations, mass media and society, advanced feature writing and publicity writing. As a free lance writer he has written extensively for magazines.

William D. Moir

William D. Moir has been named contract negotiator and coordinator at the University, effective March 1.

He will succeed Ralph E. Montgomery, who plans to retire from the University staff after 33 years of service.

Mr. Moir has been assistant to the contract negotiator and coordinator since 1963. He joined the staff in 1956 as a research assistant in the Department of Engineering Research in the College of Engineering and from 1957 to 1963 he was an accountant in the office of the controller.

He served with the U.S. Navy in the Submarine Service from 1948 to 1952.

Mr. Moir is a Penn State alumnus, having earned the bachelor of science degree in business management in 1957.

News in brief

(Continued from page one)

program funds received from the Department of Health, Education and Welfare. It is named in memory of Mr. Frederick's daughter.

Pattee space available

Members of the faculty who wish to obtain "Study Space Assignments" in Pattee Library for the spring term should note that the assignments will be made on a first-come, first-served basis Monday, March 8, beginning at 7:45 a.m. in Room 106 Central Pattee. There are only 38 such spaces. Further questions should be directed to Cordella Swinton, 865-5420.

Retired staff to meet

The Penn State Retired Staff Club will hold its 175th meeting at 7:30 p.m. on Thursday, March 11, at the St. Andrew's Episcopal Church Parish Life Center, State College. Dr. Harold Dickson, professor emeritus of art history, will discuss the upcoming Bicentennial art exhibit at the University, "Portraits USA — 1776-1976." Reservations, which must be in by March 8, can be made by calling Mr. and Mrs. Ralph Nielson, 238-0954. New members are welcome.

New nature program

A year-round nature center program for age groups ranging from pre-schoolers to senior citizens is being started at the University's Stone Valley Recreation Area.

Developed under the auspices of the Department of Perks and Recreation, the new Shavers Creek Nature Center is being directed by instructor Corky Potter. An interpretive day program, it is designed to complement the previously established student program at Stone Valley. All events will be held at the Mineral Industries Bldg. at Stone Valley, with outdoor programs leaving from there.

A family film festival is planned for succeeding Sundays. "Birch Bark Canoe Builder," "The Maple Sugar Farmer" and "Beaver Valley" are to be screened Feb. 29, and on March 7 families can view "Jane Goodall and the Wild Chimpanzees," "Nature's Half Acre" and "The Wonderful World

Other upcoming events include a winter ecology walk Sunday, March 14, at 3 p.m. and on Sunday, March 21, from 1 to 3 p.m. a demonstration of maple sugaring fo show how the sap is tapped and boiled into syrup or candy. At 2 p.m., also on March 21, visitors will take a guided hike through the woods to discover old homestead sites, graveyards, charcoal mounds and an iron furnace. Finally, on Sunday, March 28, at 2 p.m. there will be an indoor house plant workshop, conducted by Tig Burnett of Hillside Gardens, Boalsburg.

Later on in the spring, there will be bird walks and a spring wildflower walk.

Programs will be free of charge with Saturday, April 17. After that date, a general parking fee of 50 cents per vehicle will be collected at the gate of the public Upparking lot.

Drop-add rules

(Continued from page one)

Division of Undergraduate Studies, drop a course, but e WP (Passing) or WF (Failing) or WN (No Grade) symbol will be entered on his academic record and transcript.

The rule stipulates that no student may drop a course after the last day of the eighth week of the term for any reason.

Hermanowicz named

Dr. Henry J. Hermanowicz, dean of the College of Education, has been named president-elect of the American Association of Colleges for Teacher Education (AACTE). He will assume his duties at the Feb. 25-28 annual meeting in Chicago, Ill., of the association, which consists of more than 860 collegiate institutions in the United States, Guam and Puerto Rico. A member of the AACTE Board of Directors, Dr. Hermanowicz is a past chairman of the Committee on Studies and a member of the Commission on Standards. He also served as president of the Illinois ACTE.

News in brief

Berks hosts series

In observance of the Bicentennial, Berks Campus and the Wyomissing Institute of Fine Arts are co-sponsoring a four-part lecture series, "The Native American: Indian Art and Culture." The lectures are scheduled March 17 and 31 and April 7 at 8 p.m. at Berks. (The first lecture was presented yesterday, March 10.)

Dr. Frederick J. Dockstader, director emeritus of the Museum of the American Indian, Heye Foundation, will speak on "Three Hundred Years of Indian Art" on March 17. He will be followed March 31 by Dr. William Powers, acting chairman of the department of anthropology at Livingston College, Rutgers University. His topic is "Contemporary Music and Dance." The last lecture on April 7 will be given by John Witthoft, associate professor in the department of anthropology at the University of Pennsylvania. He will speak on "American Indian World View and Philosophy" and will provide insights into Indian folklore, religion and mythology.

An exhibit of Indian artifacts from the University of Pennsylvania is on display through April 9 at Berks in conjunction with the lecture series.

Soil test kits available

With gardening season almost at hand, the College of Agriculture's Soil Testing Laboratory reminds faculty and staff that proper soil acidity and fertility are crucial to the success of gardens and lawns. University Park personnel interested in determining correct acidity and fertility levels for their yards may obtain a soil-sample mailing kit at the lab. (It is located in the northeast corner of the campus near the old orchards. Immediately after turning right off Fox Hollow Road on the road to Mountainview Hospital, it's the second building on the left and is open from 8 a.m. to noon and from 12:30 to 4:30 p.m.) At locations other than University Park, kits are available from county Ag Extension Services. A fee of $3 is charged to cover program costs. The kit contains instructions on how to take a correct sampling, a soil information sheet and a container in which to send the sample to the laboratory. Eight to 12 days are needed to process a complete report, which includes a balanced lime and fertilizer recommendation prepared by a crop specialist.

Marathon swimmers wanted

The Annual Faculty-Staff-Grad Student Swim Marathon will be held Saturday, Mar. 27, at the Natatorium, beginning at 7 a.m., when 25 participants will each swim one mile in an all day relay sponsored by the Penn State Aquatics Program. Last year's group swam the distance in 14 hours, 51 minutes, 21.1 seconds. The fastest time was 14 hours, 17 minutes, 1.5 seconds, established in 1974. Any member of the faculty or staff or any graduate student may volunteer to participate as a swimmer, timer or lap counter. Contact Dave Gustine, 237-7683, or Sid Bernard, 865-5491, to enter an application.

Anyone for volleyball?

The Intramural Office (in the new Intramural Bldg.) will take entries for Volleyball and Handball Singles from Monday, March 15, until Thursday, March 18, at 4:30 p.m. All male members of the University community (undergraduate and graduate students, staff and faculty) are eligible to participate in these sports.

Senate election schedule

The University Faculty Senate has approved the following schedule for Senate elections.

The elections began by voting unit this month. Election results are due no later than seven days after the April meeting of the Senate, which this year is scheduled for April 13.

The Senate electorate includes all professional ranks, all full-time instructors, all librarian ranks and all research ranks except non-continuing. Those pursuing a degree at Penn State are not members of the electorate.

According to Martha A. Adams, chairman of the Senate Elections Commission, every member of the Senate electorate must have the opportunity to be nominated and to vote. There must be at least two nominees for every Senate seat

Guatemalan relief drive

A Penn State Steering Committee has been organized to assist the American Red Cross in a special collection for Guatemalan disaster relief in the wake of the recent earthquake there. The collection is taking place the first week of this term. Faculty members of the committee are Dr. Jose Mendez, professor of health and applied physiology, chairman; Dr. Michael P. Hottenstein, professor of management; and Dr. John D. Daniels, associate professor of business administration.

3,045 gifts reported

The Office of Gifts and Endowments reports that 3,045 gifts totaling $779,004.02 were received by the University during January of this year. This brings the total of the current fiscal year to 12,589 gifts and $3,046,393.68. Of the latter amount, $947,210.53 was contributed by alumni; $457,534.43 by friends; $996,214.56 by corporations and businesses; $371,513.75 by foundations; and $373,911.41 by organizations. By the end of January, 1975, the University had received 10,158 gifts for a total of $3,106,609.09.

Winter 'JGE' out

The winter issue of "The Journal of General Education," published by Penn State's Press, concentrates on fiction and other imaginative works of major influence, past and present. Penn State contributors include W. T. Jewkes, professor of English, writing on "Mental Fight: Northrop Frye and the Teaching of Literature"; a poem by Jack McManis, assistant professor of English; and an article by Warren S. Smith, director of general education In the arts, titled "Ot Hoty Ambiguity."

Journel editors Caroline D. Eckhardt, assistant professor of English and comperative literature, and Robert B. Eckhordt, assistant professor of anthropology, invite readers to submit papers for a special fall JGE issue commemorating America's Bicentennial. Suitable topics include the status of educationel institutions, programs and academic disciplines at the time of the Revolution, the impact of the Revolution on American education and other subjects concerning 18th century education, arts and letters. Papers should be received by Aprll 1. An issue on innovation in higher education is planned for winter, 1977, with submissions due Aug. 1.

Nominations for provost asked

The Search Committee for a new provost at the University is seeking additional nominations from the faculty and staff.

Dr. Russell E. Larson, current provost of the University, has announced his plans to retire Jan. 1, 1977.

The provost, as chief academic officer and deputy chief administrator, is responsible to the president of the University for administration of the institution's instructional, research and public service programs.

Dr. John J. Coyle, Search Committee chairman, said candidates should have an established national reputation and an outstanding record of accomplishments as scholars, teachers, and administrators. Preferred qualifications for the position include significant experience in college and university teaching and administration.

Individuals should have an understanding of the functions, missions and goals of a large, multi-campus, land-grant university and must have a commitment to programs of equal opportunity and affirmative action. They also must heve the proven ability to communicate well with the University community and the public.

Nominations should be sent to Dr. Coyle at 201 Old Main.

'Radiothon' on air

A charity "radiothon," featuring radio hits from the 1940s, will be aired from 2 to 11 p.m. Sunday, March 14, on WDFM, the student radio station at the University. The broadcast, to originate from the new lounge at the HUB, will raise money for the Four Diamonds Fund, a charity coordinated at the Hershey Medical Center for the care and treatment of children with cancer.

The event is sponsored by WDFM and the Office of Student Affairs.

The broadcast — "Some Sunday" — will include radio shows popular in the 1940s, introduced by University and civic leaders. Telephones set up at the HUB will be manned with volunteers who will take pledges. The number to call with pledges is 238-3000. People are also encouraged to stop at the HUB to watch the activities, which will include e live drama. Donations can also be made at the HUB. The Phi Mu Alpha Jazz Band will play the "big band sounds" in the HUB ballroom from 8 to 11 p.m.

The Four Diamonds Fund was established by the University's Board of Trustees to provide relief from extraordinary financial burdens for the families of children with cancer who receive care and treatment at Hershey.

The fund was suggested by the parents of Christopher M. Millard, a young man who died ot cencer in 1972 soon etter his 14th birthday. The name of the fund is taken from the title of an essay Chris wrote that year. It will be read as part of the radio show.

The schedule for "Some Sundey" is:

2-2:30 — Sherlock Holmes; 2:30 to 3 — Fibber McGee and Molly; 3-3:30 — a reading of Christopher Millard's essay and Tom Mix; 3:30-4 — the Green Hornet; 4-4 30 — "live" drama; 4:30-5 — Jack Armstrong; 5-5 — War of the Worlds; 6-6:30 — Great Gildersleeve; 6:30-7 — Sgt. Preston of the Yukon, Bill Stern's Sports Newsreel; 7-7:30 — The Shadow; 7:30-8 — Lum and Abner; 8-8:30 — Phi Mu Alpha Band; 8:30-9 — Little Orphan Annie, Charlie Chan; 9-9:30 —Phi Mu Alpha Band; 9:30-10 — Eddie Cantor; 10-11 — Phi Mu Alpha Bend and Flash Gordon.

Middle States evaluation team to visit

An 18-member evaluation team from the Middle States Association of Colleges and Secondary Schools will visit Penn State April 4-8.

The team will be chaired by G. Bruce Dearing, vice chancellor for academic programs of the State University of New York.

Focus on planning

According to Dr. Dearing, the Penn State visit will be unlike conventional evaluations in that it will focus on planning procedures within the University rather than on its academic offerings.

The evaluation process will be concentrated on four major areas: (1) the undergraduate and graduate programs review process, (2) implementation of the 1972 Academic Policy Plan, (3) the Commonwealth Campus Planning process, and (4) review of recent efforts to strengthen faculty participation in University governance.

Team to travel

The team will use University Park as its base but will travel to other campuses to consult with faculty, administration and students there. Its itinerery includes Behrend College, Hershey, King of Prussia, Capitol Campus, Beaver, Hazleton, York and Ogontz. The last four campuses will serve as central meeting points for representatives of all the Commonweelth Campuses so that the evaluation team can telk to persons from every part of the University system.

Other members of the evaluation team are Robert A. Bernes, director of the Newark Campus, Ohio State University; W. Donald Bowles, professor of economics, The American University; John C. Buhner, vice chancellor and dean of the faculties, Indiana University-Purdue University; Richerd D. Challener, professor and chairmen of the department of history, Princeton University; Lavinia H. Cresciani, vice president for academic effairs, Inter-American University of Puerto Rico; Irving Engelson, vice president for Instruction, Union County Technicel Institute, Scotch Plains, N.J.; Morris A. Gelfand, chairmen of the library science department, Queens College of CUNY.

Committee members

Also Louise M. Helm, professor and chairperson of the division of biological sciences, County College of Morris, Dover, N.J.; David C. Knapp, provost of Cornell University; Anthony D. Knerr, vice chancellor for budget and planning at CUNY; Elmer J. Kuhn, dean of arts and sciences, Prince George's Community College, Largo, Md.; Thomas Mou, provost for health sciences, SUNY; Robert R. Rayma, dean of the graduate school of arts and sciences, New York University; James J. Ross, director at residence life, SUNY College at Buffalo; William L. Thomas Jr., vice chancellor for student affairs, University of Maryland; John R. Toll, president, SUNY at Stony Brook; and Richard E. Wilson, vice president tor programs, American Association of Community and Junior Colleges.

Working with the team will be George Marshall, assistant commissioner for tiscal and administrative management of Pennsylvania's Department of Higher Education.

PENN STATE COLLECTION

Faculty notes

Faculty Research Fellowship grants awarded by the Institute for the Arts and Humanistic Studies for the 1976 summer and fall terms have been announced.

Recipients from the College of the Liberel Arts are:

John A. Baleban, assistent professor of English, for creative work in poetry;

Dr. Donald E. Buckalew, associate professor of English, for e translation and critical study of AEIrfic's Letin-Old English "Grammer" and "Glossery";

Dr. Fred D. Crawford, assistent professor of English (Behrend College), for research and study of the influence of T. S. Eliot's "The Weste Lend" on the modern English novel;

Dr. Roslyn Gfazerman, assistant professor of religious studies, for the Art of "Faust": Religion and Aesthetics in Goethe, Schumann, Gounod and Mann; and

Dr. Joanne Trautmann, associate professor of humanities and English (Hershey), for continuing research end editing of "The Letters of Virginie Woolf."

Seven recipients were selected from the College of Arts and Architecture:

William H. Allison, professor of theatre orts, for trevel and maintenance to Hver, Yugoslevie, for research on the "Theatre Over the Arsenal";

James D. Benshoot, assistent professor of music, tor location, review and evelueation of contemporary brass ensemble music;

Philip Dettra, assistent professor of music, for support of an intensive pleno practice-study period under the guidence of Paul Doguereau;

Doris Hetzel, instructor in film, for preliminery research for a 16mm, 60-minute drametic film on the life and ideas of Gifford Pinchot;

Danial R. Jones, assistent professor of landscape architecture, for "A Survey of Living Historic Districts': A Contirmeation of their Exclusive In Working Class Cities, and en Investigation of their qualities";

Richard F. Rosine, assistent professor of landscape architecture, for "Requirements, Guidelines and Prototypical Design Solutions of Recreational Facilities for the Mentelly Relorded"; and

Lanny B. Sommese, associate professor of ert, for further research to provide the basic information necessery for ultimately designing e totel packeging system for the tour basic types of hazardous products.

Dr. Alan E. Kazdin, associate professor of psychology, has been ewarded e fellowship in behevlor therapy study by the Center for Advenced Study in the Behavior Sciences in Palo, Alto, Cal. A clinical psychologist, Dr. Kazdin is the author of "Behevior Modification in Applied Settings" and co-author of "Introduction to Behavior Modification." His fellowship will begin Sept. 1.

Dr. S. M. Farouq-Ali, professor of petroleum and natural gas engineering, recently gave e number of invited talks releted to computer simuletion of petroleum recovery techniques. He spoke to employees of Standerd Oil Company of Californie on edvances in thermal oil recovery and gave a joint seminar for graduate students and faculty ot the University ot Californie at Berkeley end Stenford University on in situ combustion modelling. In Cenade, he telked on physicel modeling criteria under the sponsorship of the Research Council of Alberte. Also he recently presented a paper on "Comparative Evelueation of the Strongly Implicit Procedure" et a numerical simuletion symposium sponsored by the Society of Petroleum Engineers of the American Institute of Mining, Metallurgical and Petroleum Engineers in Los Angeles.

Dr. Roland H. Good Jr., professor and heed ot the Depertment of Physics, has been reappointed to a second term on the eight-member nominating committee ot the Americen Physicel Society. The committee nominetes candidetes for the post of chairman-elect of the Society end for oll committee assignments. A specialist in theoretical physics, Dr. Good is e Fellow ot the Society.

Dr. Donald J. Willower, professor of education, has been nemed acting head of the Division of Educetion Policy Studies in the College ot Educetion, effective Merch 1. Dr. Willower, who came to Penn Stete in 1959, holds three degrees from the University of Buffalo and taught there in both philosophy and educational administretion, He also was e Kellogg Fellow at the University of Oregon in educetional administration and the social sciences. He has served on e number of netional committees, including the Netional Commission for the Preperetion of Professional School Administrators of the Americen Association of School Administrators, and the Board of Trustees of the University Council for Educetionel Administration, of which he wes elso president. The UCEA is composed of the mejor universities in the United Stetes and Canada having graduate programs in educetional administration. His research has dealt with the school as en organization and with the theory-practice relationship in educetion. He is author or co-author of more then 75 published papers on these topics.

Dr. Gerard J. Brault, professor of French, has been elected e Fellow of the Medieeval Academy of America. The introduction ceremony will take plece at the Academy's annuel meeting this monih in New Orleans. Founded in 1925, the Academy has for its purpose the promotion of research, publication and instruction in all aspects of medlaeval civilization. Fellows are elected for life and their number is limited to 75. The honor is bestowed on scholars who have made notable contributions to the furthering of the Academy's purpose. Internationally known for his research in medieeval French language end literature and in mediaeval heraldry, Prof. Brault is the author of four books, more then 60 erticles, and numerous reviews in leeding Americen and Europeen learned journals. He recently completed a fifth book, en edition ot the "Song of Roland."

Dr. Theodore M. Hollis, associate professor ot biology, has been invited lo serve as chairman of the Atherosclerosis I session at the annual meeting of the Americen Institute of Nutrition meeting scheduled for April in Anaheim, Calif. He is elso co-author of two research papers to be presented at that meeting by graduate students Jack M. De Foreest and Ronald A. Markle, doctoral candidates in physiology. A member of the University faculty since 1969, Dr. Hollis directs e research program on the role of histamine metebolism in etherosclerosis, a contributing cause in 90 percent of all artery end heart disease, which each year claim more than twice as many lives es cancer.

Dr. Erwin W. Mueller, Evan Pugh Professor of Physics, has been named an honorary member of the Vacuum Society of India. The Society has only three honorary members. Dr. Mueller, who is a member of the National Academy of Sciences, and two past presidents of the Americen Vecuum Society, Dr. Mueller was honored for his invention of the field emission microscope, field-ion microscope and the atom probe, which also involved advances in vacuum techniques. He visited indie in 1972 and has had many graduate students from that country study with him et the University. He is also a member of the Americen Vecuum Society and received its first M. W. Welsh Gold Medal Award for outstanding current research in 1970.

Dr. H. R. Hardy Jr., professor of mining engineering and director of the University's Rock Mechanics Laboratory, recently gave three invited lectures in the area of his research specialty, ecoustic emission in geological structures. His talks were delivered ot the Los Alamos Scientific Laboratory and at Drexel University, where he presented the Keystone Lecture end a telk before the Drexel Chapter of Sigme Xi.

Dr. Joseph A. Dixon, professor and head of the Department of Chemistry, has been invited to serve on e review panel for the National Science Foundation. He will evaluete proposals submitted for funding under the Comprehensive Assistence to Undergraduete Science Educetion (CAUSE) Program.

Dr. Charles Craypo, associate professor of labor studies, testified Feb. 19 in Washington, D.C., before the Labor Management Retetions Subcommittee of the House of Representatives Committee on Educetion end Lebor. Dr. Craypo, e specialist in the eree of impact of corporete conglomeration on the collective bergeining process, submitted a 40-page report on Litton Industries as a repeet violetor of the Notional Labor Relations Act. The subcommillee is considering two pieces of legislation. One would allow triple damages for violations of the National Labor Relations Act, and the other would deny federal contracts to repeat violators.

Dr. Thomas F. Megner, associate dean for research and graduate study in the College of the Liberal Arts and professor of Slavic lenguages, has been grented en International Research end Exchenges Board travel fellowship for Yugoslevia from April through June. The board is sponsored by the Americen Council of Leerned Societies and the Social Science Research Council. Dean Magner's project while in Yugoslavie is entitled "Sociolinguistic Aspects of Dialect Mixture in the Spilt Region of Yugoslavia." He will spend most of his time in the city of Spilt, with visits to neighboring islands for study ot their distinctive dialects.

Lt. Col. Kert Schwenzleier, currently head gymnestics coach et the Unlted Stetes Air Force Academy, has been named an assistant professor in the College of Health, Physical Educetion and Recreetion and will succeed Elmer Mitchell as the director of Penn Stete's gymnastics program. Head coach of the United Stetes Olympic gymnastics team, Col. Schwenzfeler is e 1955 Penn State greduate and helped the Nittany Lions win two NCAA team titles. As an Air Force officer, he was an alternate on the 1956 United States Olympic teams. He spent six years flying Strategic Air Command aircreft end coached the Air Force Academy gymnestics team from 1964 to 1966 before volunteering for a year's tour in Vietnam. At Penn State, he will oversee both the men's and women's programs.

"The Contemporary Middle East: Conscience, Confirmation, and Conciliation" was the topic of a public lecture presented at Colby College by **Dr. Arthur Goldschmidt Jr.,** associate professor of history, last week. His talk was part of the Guy P. Gannett lecture series, which was established in 1963 to supplement Colby's regular academic program. Gennett lecturers also speak to classes and meet informelly with students and faculty. Dr. Goldschmidt hes studied, conducted tield research end taught in several Arab countries, Turkey and Israel. A member of the University faculty since 1965, he received the Class of 1933 Award for Outstending Contributions in the Field ot Humenities in 1972. He is currently chairman ot the Middle East Studies Committee.

Five faculty members from the College of Engineering have been honored for their work. Excellence in Teaching Awards consisting of certificates and $500 checks were presented to **Edward A. Dreisbach,** associate professor of engineering at the Wilkes-Berre Campus; **Dr. Jenninga H. Jones,** professor of chemistry; end **Dr. Robert H. Notter,** assistent professor of chemical engineering. The College's annual award for outstanding echievement is research went to **Dr. Philip D. Cady,** professor of civil engineering, and **Dr. John A. Brighton,** professor of mechanicel engineering, received the Outstanding Engineer Award of the Central Pennsylvania Section of the American Society of Mechenical Engineers.

Dr. Gerhard Reethof, professor of mechanical engineering, has been invited to participate in e panel discussion on science and technology at a workshop on "Priorilies for University Research," organized by the U.S. Department of Transportation, March 18-19, at the National Academy of Sciences, Washington, D.C. The workshop is being held in cooperation with the Committee on Transportation, Assembly of Engineering, National Research Council, which plens to issue a report on priorities for university research this summer.

Dr. Carl S. Keener, associate professor of botany, is one of eight biologists from across the country who have been invited to offer courses this summer at the University ot Virginia Mountain Lake Biological Station. His course is titled, "Taxonomy of Seed Plants." The Mountain Lake Biological Station, located in the Allegheny Mountains of southwestern Virginia, was established in 1930 as an inland field station for research and advanced training in field biology.

University presents revised '76-'77 appropriations bid

University officials appeared on Feb. 25 and March 1 before legislative committees in Harrisburg to present their request for a State appropriation of $116,711,000 for 1976-77.

President John W. Oswald and Dr. Harry Prystowsky, Hershey provost and dean, made the presentations before the Senate Committee with Sen. Henry J. Cientrani, of Philadelphia, as chairman; and before the House Committee with Rep. Amos K. Hutchinson, of Greensburg, serving as chairman in the absence of Rep. Stephen R. Wojdak, of Philadelphia, the chairmen.

The revised request is $2 million under the initial request for $118,711,000 submitted last September. The revised amount was made possible by increased income from a larger-than-anticipeted enrollment during the fall end winter terms and because of new adjustments in indirect cost reimbursement rates for Federal government contracts, which reflect the recent rapid escalation in staff benefits costs paid by the University.

The appropriation increase requested, which amounts to $14,003,000 or 13.6 percent over the $102,708,000 received for the current year, is based primerily on the need to provide for inflated costs; maintein tuition levels; provide for equitable salary adjustments; and meet mendeted State retirement and social security cosls, Dr. Oswald explained.

University officials also emphesized the need for an increase to $10,000 in the per capita appropriation for medical education. For the past five years the amouni has been $7,465, which, because of inflation emounting to 40 percent over four years, has steadily decreased in real value.

Noting that a major tuition increase, averaging 12.5 percent was made last fall, Dr. Oswald told the legislators he fears Penn State has been losing some of its ability to serve middle and lower middle income families, the people for whom the University, as a land-grant university, was founded.

He explained that in 1971, 44 percent of all Pennsylvania families had family incomes ranging from $6,000 to $12,000 and in the fall of 1971, 46 percent of the new freshmen entering Penn State came from families in that income category.

Because of rapid inflation, only 35 percent of Pennsylvania families were in the $6,000 to $12,000 income category by 1974 For the tall term, 1974, only 24 percent ot the freshmen admitted to Penn State were from that income category, a decline ot 22 percentage points in three years.

By contrast, the proportion of Penn Stete freshmen from families under $6,000 annuel income fell by only tour percentage points (from 11 percent to 7 percent) between 1971 and 1974. The proportion of Pennsylvania families with incomes under $6,000 declined by five percentage points (from 22 percent to 17 percent) during the same three-year period.

Fuller finenciel aid support in relation to need is evailable for students of lower income categories but not for students in the lower middle and middle income categories who nevertheless have substantial needs for finenciel assistence.

While legislators were generally complimentary about the job Penn State has been doing, they pointed out the financial problems the State elso feces with e proposed budget by the Governor that includes as revenue $47 million for which no source of income has yet been provided.

Governor Shepp proposed an appropriation of $108,730,000 for Penn Stete in his budget.

Spring Term 1976 Calendar
The Pennsylvania State University

Thursday, March 11
Classes begin.
Focus on Nutrition '76," sponsored by the Nutrition Information and Resources Center, 9 a.m. to 9 p.m., Room 112 Kern and lobby.
Ballet Library tour, 9, 10, 11 a.m. and 2, 3, 4, 7 p.m., lobby
How to See No to Rape and Survive," 7 p.m., Room 301 HUB. Sponsored by Panhellenic Council.

Friday, March 12
Focus on Nutrition '76," sponsored by the Nutrition Information and Resources Center, 9 a.m. to 5 p.m., Room 112 Kern and lobby.
Sports: Gymnastics, NCAA Regionals.
Marriage Enrichment" program, Dr. Gerhard Lenski, human development and sociology, on "Trends in the American Family," 8 p.m., Room 112 Kern.
Classics Series, Nikolais Dance Theatre, 8:30 p.m., University Auditorium.

Saturday, March 13
Sports: Gymnastics, NCAA Regionals, Women's fencing, vs. Indiana, Pa., and Cornell, 9 a.m.
Marriage Enrichment" program, 9:30 a.m.-5:30 p.m., Room 101 Kern. Panel discussions and seminars
Marriage Enrichment" evening social, 9 p.m., Room 102 Kern. Phi Mu Alpha Dance Band.
Classics Series, Nikolais Dance Theatre, 8:30 p.m., University Auditorium.

Sunday, March 14
Chapel Service, 11 a.m., Eisenhower Chapel. Christian Fellowship worship service, 11:15 a.m. Eisenhower Chapel. Pastor Gerald G. Lloyd, Black Christian Fellowship Mass Choir.
Late Registration, 1-10 p.m., HUB ballroom.
Arboretum, Creek Nature Center, Winter Ecology Walk, 3 p.m., Mineral Industries Building. Meeting
Marriage Enrichment" seminars, 1:30-5:30 p.m., Room 101 Kern.
Dr. Anne Zajot, violin, and Leonard Feldmen, cello, recital in conjunction with "Recent Works by Stuart Frost," 3 p.m., Museum of Art.

Week of March 15

Monday, March 15
Blue Key Side Club, 7 p.m., Room 112 Kern.
Program of Oriental Karate Demonstration, 7:30 p.m., HUB assembly room.

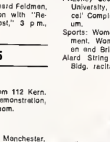
Tuesday, March 16
Professor Brooke, Univ. of Manchester, on "Policies and Strategies of European Multinational Companies," 12:45 p.m., Room 101 Ackhouse.
Lunar Pie, Archaeological Society lecture, Dr. Dennis Wertime, Smithsonian Institution, on "The Search for the Mystery of Phi: Early Bronze Age Metal-Working Industry in Israel and West," 6 p.m., Room 101 Carnegie.
Minor and Cadet Grading and the Setting Grading List — Location Boards and Individuals in Petites, 7 p.m., Room W110 Forum.
Black Council meeting, 7 p.m., Room 101 Kern.
Library talk by Stuart Frost, 10:30 a.m., Museum of Art.

Wednesday, March 17
Classics lecture, Dr. Fred Rapp, microbiology, Hershey Medical Center, on "Viruses, Sex and Cancer," 8 p.m., Room 05 Forum.
Film Classics film, "The Magnificent Ambersons," 8:30 p.m., University Auditorium.
Colleen Callahan-Dale, French horn, 8:30 p.m., Music Bldg. recital hall.

Thursday, March 18
Allen Elliott Invitational Conference, public lecture, Walter W. Heller, Regent's professor of Economics, University of Minnesota, on "The Economic Environment for Business," 10 a.m., auditorium, Hilliar Conference Center.

Friday, March 19
Classics Series, Mishe Dichter, pianist, 8:30 p.m., University Auditorium.
Walter Wells, baritone, and Paul Ferrone, piano, 8:30 p.m., Music Bldg recital hall.

Saturday, March 20
Sports: Ice Hockey, vs. University of Delaware (rematch), 7:30 p.m.
Faculty Club Dance, 8 p.m., Rooms 101 and 102 Kern.



Sunday, March 21
Chapel Service, 11 a.m., Eisenhower Chapel. Ms. Mary E. Marks, sanitor, Black Christian Fellowship worship service, 11:15 a.m., Eisenhower Chapel. Elder Harold McKenzie, Children's Choir.
Shavers Creek Nature Center, Maple Sugaring, 1-3 p.m.; Historic Walk — Reading the Landscape, 3 p.m., Mineral Industries Bldg., Stone Valley.
David Billings, organ, 3:30 p.m., Music Bldg. recital hall.
Penn State and Ohio State Glee Clubs, 6:30 p.m., Music Bldg. recital hall.

Week of March 22

Monday, March 22
Priestley Lecture, Henry Taube, Stanford University, on "Intramolecular Electron Transfer," 6 p.m., Room 105 Forum.
Late registration deadline.
Add deadline
Phi Beta Kappa lecture, Dr. Wayne Andrews, art history, Wayne State University, on "The Age of Stanford White," 4 p.m., Room 112 Kern.
Jerome Pasto, assoc. dean College of Agriculture, racreates talk by Evan Pugh, 6 p.m., auditorium, Atherton.
Free Shakespeare film, "A Midsummer Night's Dream" (Diana Rigg, Peter Hall), 6:30 p.m., Room 162 Willard
Russel Shipley, clarinet, 6:30 p.m., Music Bldg. recital hall.
"Wolfgang Flohr," artist in residence, 8 a.m.-4 p.m., Kern lobby.
French Film Series, "Zero for Conduct," 7 and 9 p.m., Room 121 Kern.

Tuesday, March 23
Priestley Lecture, Henry Taube, Stanford University, on "Mixed Valence Complexes," 6 p.m., Room 105 Forum.
Sports: Woman's lacrosse, vs. Central Penn and Bald Eagle Valley, 3 p.m.
Jerome Pasto, assoc. dean College of Agriculture, recreates talk by Evan Pugh, 4 p.m., auditorium, Atherton.
Free Shakespeare film, "A Midsummer Night's Dream" (Diana Rigg, Peter Hall), 6:30 p.m., Room 162 Willard.
GSA Garden Plot Workshop, 7:30 p.m., Room 112 Kern.
Artists Series, Preservation Hall Jazz Band, 8:30 p.m., Recreation Bldg.

Wednesday, March 24
Priestley Lecture, Henry Taube, Stanford University, on "Back-Bonding in Classical Complexes," 8 p.m., Room 108 Forum.
Sports: Women's basketball, AIAW Tournament. Women's lacrosse, vs. Lock Haven and British Universities, 2 p.m.
Alard String Quartet, 8:30 p.m., Music Bldg. recital hall

Thursday, March 25
Priestley Lecture, Henry Taube, Stanford University, on "Manifestations of Back-Bonding in the Chemistry of Ruthenium and Osmium Ammines," 4 p.m., Room 108 Forum.

Final examinations

Friday, May 21
Final examinations.

Saturday, May 22
Final examinations.

Saturday, May 29
Commencement.

Something for everyone — lectures, art, music and sports

Bicentennial concerts

The Bicentennial Festivol of Music in 18th Century Pennsylvania, another in the series of events celebrating the netion's Bicentennial at the University, will feature concerts at 8:30 p.m. on March 14, 15 and 16 in Schwab Auditorium.

Each concert in this festival, planned by special arrangement with the College of Arts and Architecture and the Department of Music, was programmed by Irving Lowens, musicologist, music critic for the Washington, D.C., "Star," and an authority on early American music.

The music will be performed as it was in 18th century Pennsylvania and will include works by early American composers and others such as George Handel, whose compositions were played during the period.

Mr. Lowens, whose residency is supported by the Institute for the Arts and Humanistic Studies at the University, will preface each concert with explanatory comments on the program and will conduct music seminars for students and other interested persons during his visit.

The festival will open on Sunday, March 14, with a concert of chamber music from the Moravian tradition written by John Antes, David Michael, John Peter, Jeremiah Dencke and Simon Peter and performed by the Afard String Quartet, violist Paul Yarbrough and Karen Scott, soprano.

The Penn State Singers, directed by Raymond Brown, will sing a selection of choral music by 13 composers from The American Harmony, published in 1793 by Nehemiah Shumway, composer and publisher of music, on Monday, March 15.

Completing the three-concert festival on Tuesday, March 16, will be a recreation of the concert of choral and orchestral music given on April 12, 1767, by the Uranian Academy in Philadelphia, Performing will be the Penn State Singers and Musica da Camera.

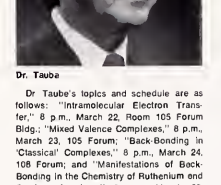
Much of the music to be performed in the festival exists only in microprint or in manuscript and rare editions in libraries in the United States and England. Performing scores were obtained by hand transcription from machine copies of the originals.

The public is invited to attend the concerts, for which no tickets are required, and there will be no admission charge.

Archaeology lecture

Theodore A. Wertime, research associate in archaeology at the National Museum of Natural History, Smithsonian Institution, will eddress the Central Pennsylvania Chapter of the Archaeological Institute of America at 8 p.m. Tuesday, March 16, in Room 101 Carnegie Bldg. The subject of his public lecture is "The Search for the Mystery of Tin: the Beginnings of the Early Bronze Age in the East and West." A specialist in the history of metallurgy, Mr. Wertime will discuss one of the pivotal periods in the development of human civilization, the transition from the age of stone tools to that of man's first exploitation of metals. His specific interest is the determination of the early sources of the tin used in the production of bronze, and his discussion will encompass archaeological evidence from sites in the Aegean, Turkey, Egypt and Thailand.

Talk on multinational companies



Prof. Michael Brooke, head of the International Business Unit at the University of Manchester, England, will deliver a public talk on "Policies and Strategies of European Multinational Companies" during fourth period (12:45-2 p.m.) Friday, March 19, in Room 101 Althouse Lab. A sociologist, Prof. Brooke is one of the leading authorities on organization, strategy and policy among European multinational corporations. His visit to Penn State is being sponsored by the College of Business Administretion and the University Committee on International Programs.

Viruses, Sex and Cancer

Dr. Fred Rapp, professor and chairmon of the Oepartment of Microbiology at Hershey, will deliver a public lecture on "Viruses, Sex and Cancer" at 8 p.m. Wednesday, March 17, in Room 108 Forum Bldg. His talk is being sponsored by Sigma Xi. Dr. Repp is internationally known for his research on viruses, viral genetics and immunology. He is a Fellow of the American Academy of Microbiology and an affiliate of the Royal Society of Medicine, London. He has served as editor of the "Journal of Virology" and the "Journal of Cancer Research."

Priestley lectures

The 15th annual series of Priestley Lectures will be presented Monday through Thursday, March 22-25, at the University by inorganic chemist Henry Taube, a mamber of the National Academy of Sciences and the American Academy of Arts and Sciences. The four lectures are open to the public free of charge.

Dr. Tauba

Dr Taube's topics and schedule are as follows: "Intramolecular Electron Transfer," 8 p.m., March 22, Room 105 Forum Bldg.; "Mixed Valence Complexes," 8 p.m., March 23, 105 Forum; "Back-Bonding in Classical Complexes," 8 p.m., March 24, 108 Forum; and "Manifestations of Back-Bonding in the Chemistry of Ruthenium and Osmium Ammines," 3 p.m., March 25, 108 Forum.

The Priestley Lectures are sponsored by the Mu chapter of the chemical honorary society, Phi Lambda Upsilon, and the chemistry-related departments of the University.

Or. Taube is professor and former chairman of the chemistry department at Stanford University. His career spans four decades and has been cited as contributing to a "renaissance of the science of inorganic chemistry."

His principel research accomplishments have been in the area of inorganic reactions in solution. Specifically, he advanced the understanding of solvation of ions, of the mechanisms of substitutional changes at metal ion centers and of the mechanisms of oxidation-reduction reactions.

For this work, Dr. Taube was honored with the American Chemical Society's Award for Nuclear Applications in 1955 and its Award for Distinguished Service in the Advancement of Inorganic Chemistry in 1967.

The Priestley Lectures were established in 1926 by the late Prof. Wheeler P. Davey. The series is named in honor of the 18th century pioneer chemist, Joseph Priestley, discoverer of oxygen.

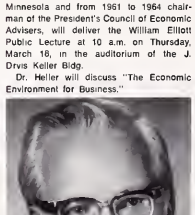
French horn recital

Chrsteen Caltahan-Dole, instructor in music, will present a French horn recital at 8:30 p.m. Wednesday, March 17, in the Music Bldg. recitol hall. Her program includes Pinkham's "Fanfare, Aria and Echo," "Parable VIII for Solo Horn" by Persichetti, "Till Eulenspiegel-einmal anders," Opus 28 by Richard Strauss, and the Brahms "Trio in E-flat." Assisting in the recital will be Ann Robinson, French horn; Rick Hoover, timpani; Smith Toulson, clarinet; William Dole, bassoon; James Carroll, double bass; Raymond Page, violin; and Steven Smith, piano.

Swimming-diving meet

The 1976 Eastern Intercollegiate Swimming and Diving Champlonships will be held this weekend, Thursday through Saturday, March 11-13, in the Natatorium. Trials will be at noon on Thursday and Friday, finals at 7.30 p.m. On Saturday the trials will move up to 10 a.m. and the finals to 4 p.m. Admission to the trials is $1 per session; $2 for the finals. Participating teams include: East Carolina, Marshall, Maryland, Niagara, Penn State, Pittsburgh, Rutgers, St. Bonaventure, St. John's, Syracuse, Villanova and West Virginia.

The boys from Preservation Hall



Preservation Hall band

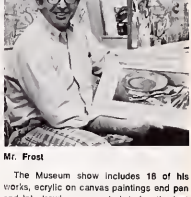
The world famous Preservation Hall Jazz Band will appear here in a concert sponsored by the Artists Series at 8.30 p.m. on Tuesday, March 23, in Recreation Bldg. The band, presently on tour from its home in New Orleans, consists of members who took part in the birth of our most American art form. The youngster in the group was born in 1910. But even though all of the members are over 60, there is no lessening of the spirit that is so much a part of their music. Touring extensively throughout the United States and the world, they have done much to preserve New Orleans Jazz as played by the people who created it over a half century ago. At their last Penn State appearance, many people in the audience were literally lifted from their seats and dancing in the aisles. Tickets will go on sale starting Thursday, March 11, at the HUB Booth from 9 a.m. to 4 p.m. On March 16, tickets will also go on sale at University Auditorium. The price of the tickets is $2.50, and there are no reserved seats.

William Elliott lecture

Dr. Walter W. Heller, Regents' Professor of Economics at the University of Minnesota and from 1961 to 1964 chairman of the President's Council of Economic Advisers, will deliver the William Elliott Public Lecture at 10 a.m. on Thursday, March 18, in the auditorium of the J. Orvis Keller Bldg.

Dr. Heller will discuss "The Economic Environment for Business."

Dr. Heller



The lecture is the highlight of the William Elliott Invitational Conference, sponsored March 16-19 by the College of Business Administration at the University. The conference was established at Penn State in recognition of Mr. Elliott, chairman of the executive committee of the Philadelphia Life Insurance Company, who has taken a keen interest in the business administration program at the University, endowed a chair in the College of Business Administration and was awarded the Penn State Medal in 1974. Two conference sections, one headed by Dr. Heller, will be featured at the conference. The other section will be chaired by Dr. Roger F. Murray, S. Sloan Colt Professor of Banking and Finance in the Graduate School of Business at Columbia University.

Dr. Helter, longtime spokesman on the national economy — he has appeared ten times on "Meet the Press" — serves as a consultant to the Executive Office of the President and is a member of the Federal Energy Office Advisory Panel.

Frost exhibit

Recent work by Stuart Frost, professor of art, is on display through April 11 at the Museum of Art and a retrospective, including 88 of his works, is being shown at the Zoller Gallery through March 27. There will be a recaption for the artist at 7:30 p.m. Monday, March 15, in the gattary.

A Fellow of the Institute for the Arts and Humanistic Studies, Mr. Frost studied at the Skowhegan School of Painting and Sculpture, Brooklyn Museum School and New York University and worked under such artists as Hobson Pittmen, Mex Beckmann and Ben Shahn. As a Penn State undergreduate, he assisted Henry Varnum Poor in painting the land-grant frescoes in Old Main and in 1951-53 assisted Allyn Cox in executing frescoes in the Capitol rotunda in Washington, D.C. He is represented in a number of private and public collections, has participated in group shows throughout the country and has also had several one-man shows.

Mr. Frost

The Museum show includes 18 of his works, acrylic on canvas paintings and pen and ink drawings, executed during the test four years. Mr. Frost will deliver a gallery talk on his work at 10.30 a.m. Tuesday, March 16, in the Museum. In conjunction with the exhibit, a recital of music for cello and violin will be performed by Leonerd Feldman and Joanne Zagst, associate professors of music, at 3 p.m. Sunday, March 14, in the Museum.

The printing of catalogs for the two shows was supported by the Institute.

Book show at HUB

The Penn State University Press will sponsor an exhibition of the 1975 Book Show of the Association of American University Presses on Monday end Tuesday, March 15 and 16, in the first floor HUB lounge area between 10 a.m. and 4 p.m. The 30 books in this traveling exhibit were chosen from over 200 books submitted by 53 AAUP member presses and represent the highest standards of schoierly book production. In addition, a special selection of books chosen for recognition because of special outstanding features will be shown. Display copies will be available for inspection, along with a catalog describing each entry. Among the books in the exhibition this year are two titles published by the Penn State Press: "Custer and the Epic of Defeat" by Bruce A. Rosenberg, professor of English and comparative literature at the University, and "The History and Decoretion of the Ponte S. Angelo" by Mark S. Weil. Both books were designed by Glenn Ruby, and their production was meneged by Janet L. Oletz.

Dichter piano recital

One of Amerlce's great pianists, Misha Dichter, will be presented in concert by the Artists Series at 8:30 p.m. Friday, March 19, in University Auditorium. Born in Shanghai of Polish parents, he was brought to the United States at age two and began studying piano when he was six. However, he did not decide to become e concert pianist until he took a Master Class with Mme. Rosina Lhevinne while he was an English mejor at UCLA. After completing his studies at Juilliard, he was ewerded the silver medal at the 1966 Tchelkovsky Competition in Moscow. Since then, he has been hailed in almost all the major music capitals of the world. Ticket sales open Tuesday, March 16, at the HUB booth and University Auditorium from 9 a.m. to 4 p.m.

Seminars, March 11-16

Thursday, March 11

Chemistry, 12:45 p.m., Room 333 Whitmore. William Graham, University of Alberta, on "Stereochemical Nonfrigd Six-Coordinate Metal Carbonyls."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Werner Heck, graduate student, on "Small Scale Atmospheric Mixing."

Computer Science, 4 p.m., Room 325 Whitmore. Ross Towle, University of Illinois, on "Program Transformations for Parallel Processing."

Statistics, 4 p.m., Room 75 Willerd. Richard Madsen, University of Missouri, on "Restricted Maximum Likelihood Estimators for Poisson Parameters."

Monday, March 15

New Communities, Architecture, 2 p.m., Room 320 Sackett. Dr. Allen V. Kneese, economics, University of New Mexico, on "The Economic Problems of Constructing Cities in an Arid Region."

Genetics, 3:55 p.m., Room 111 Tyson. Tom Murphy, Pesticide Lab., on "A Protocol Using DNA-DNA Hybridization to Determine Relatedness between Some Insect Deoxyribonucleic Acid Viruses."

Computation Center, 7:30 p.m., Room 108 Forum. APL (1).

Tuesday, March 16

Analytical Chemistry, 12:45 p.m., Room 445 Davey. T. H. Risby on "Topics in Analytical Chemistry."

Solid State Physics, 1 p.m., Room 339 Davey. Dr. Jean Schmit, physics, on "Three Body Effects in the Surface Energy, and in the Energy for Physisorption for Rare Gas Crystals."

Entomology, 4 p.m., Room 204 Patterson. Yusuf Ibrahim, on "Oviposition, Larval Activity, and Control of Seedcorn Maggot, 'Hylemya platura' (Meigen) (Diptera: Anthomyiidae), in Soybean."

Inter-Science, 4 p.m., Room 333 Whitmore. Harry Peck, biochemistry, University of Georgia, on "Evolutionary Significance of Inorganic Sulfur Metabolism."

Inorganic Chemistry, 8 p.m., Room 333 Whitmore. Dr. Jack Williams, Eastman Kodak, on "Boron Photochemistry: An Outgrowth of Printing Processes."

Wednesday, March 17

Fuel Science, 4 p.m., Room 301 Mineral Industries. Dr. Theodore A. Wertime, National Museum of Natural History, Smithsonian Institution, on "Man's Early Pyrotechnology."

Thursday, March 18

Chemistry, 12:45 p.m., Room 333 Whitmore. Sheldon Datz, Oak Ridge National Labs., on "Electron Transfer Reactions."

Air Pollution Control, 2:20 p.m., Room 145 Fenske. Paul H. Harris. Meteorology Research, Inc., on "Fugitive Aerosols in the Urban Environment."

Populations Issues Research, 2:30 p.m., Room 244 Deike. Dr. Thomas Burch, Western Ontario University, on "Household Deta and the Persistence of the Extended Family."

Physics, 3:50 p.m., Room 117 Osmond Dr. Douglas Osheroff, Bell Telephone Labs., Murray Hill, on "Magnetic Properties of Superfluid He³."

Mathematics, 4 p.m., Room 116 McAllister. Dr. Isadore Singer, MIT and the Institute for Advanced Study, on "Elliptic Operators on Non Compact Covering Spaces."

Microbiology and Cell Biology, 4 p.m., Room S2 Frear. William M. Spira, Food Microbiology Lab., U.S. Army Natick Development Center, on "The Role of Enterotoxin Production In 'Bacitus Cereus' Physiology."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Dr. Tsann-Wang Yu, Techniques Development Lab., NOAA, on "Numerical Study of the Atmospheric Boundary Layer."

Friday, March 19

Ecology, 4 p.m., Room 112 Kern. Dr. Fred L. Knopf on "Spatial, Temporal Aspects of Colonial Nesting of the White Pelican."

Senate study of remedial education set

The University Faculty Senate has approved appointment of a joint Senate-Administration committee to study the question of remedial education within the University.

The action came at March 2 Senate meeting following a lengthy discussion of a report from the Special Committee on the Developmental Year Program.

While not acting on the Committee's recommendations, the Senate voted 79-46 to receive the report, to establish a joint committee to assess the impact of present admissions standards on the quality of Penn State graduates; to study possible implementation of the Special Committee's recommendations, including costs; and to assess the impact of remedial education programs on students and faculty. A report is to be made to the Senate by Jan. 1, 1977.

Basic skills lacking

Stating that there is ample evidence that students are graduating without the basic skills in reading, writing and mathematics, Thomas E. Daubert, Developmental Year Committee chairman, emphasized that the Committee's recommendations (the recommendations appear in the Feb. 26 INTERCOM) were enabling and not implementing legislation. He said details of the program would have to be approved by the Senate before final implementation.

Dr. Daubert told the Senate that the recommendations were based on the position that the University should provide remedial services as a means of maintaining traditional academic standards.

John J. Cahir, chairman of the Senate Faculty Affairs Committee, said that the group had expressed some concern over the rapidity with which the proposal is being legislated and had questions as to the costs and source of funds and the professional implications for those who teach remedial courses. "We wish only to slow down the pace of the Senate and the University on this important question," he said.

Several other senators also raised questions concerning the cost of wide-scale remedial education, but several urged the Senate "to face the issue" by acting on the Committee recommendations.

William H Parsonege suggested that remediation be provided to students who need it before they are admitted to the University. Helen I. Snyder pointed out that the time has passed when curriculum planners in public schools see the greatest good coming from preparing students for admittance to a university. "It's unrealistic to expect that our expressing our dissatisfaction to the public schools will have any effect," she said.

President reports

In other business, President Oswald reported to the Senate on the budget situation and his appearances before the Appropriations Committees of the State Senate and House of Representatives.

Dr. Oswald also said University calendars are now being developed in accord with the Senate's action in February on the final examination policy and the summer term.

He said it appears that a period of four to four-and-one-half days will be required at University Park for final examinations each term and calendars will be developed in accordance with the estimate. The 1976 calendar, which already has been announced, provides for six days, but the first four-and-a-half days will be considered as the final examination period.

The Senate also:

—Approved changes in admissions policies in the Academic Policies and Procedures for Undergraduate Students.

—Gave final approval to a major revision of the student rules.

A report on multiple degrees and double majors was withdrawn and will be revised for submission at the April 6 meeting of the Senate.

PLRB hearings report

The Pennsylvania Labor Relations Board will resume hearings March 30 on the makeup of a faculty unit eligible to vote in a representation election at the University.

The hearings, conducted before Hearing Examiner Sidney Lawrence, were called as a result of a petition filed by the Pennsylvania State University Professional Association (PSUPA) for an election to determine whether or not a bargaining agent should represent Penn State faculty and professional staff.

PSUPA is seeking a unit to include all faculty, excluding those in the College of Medicine at the Milton S. Hershey Medical Center, and all non-teaching professionals directly related to the academic and research programs. Another faculty organization, the American Association of University Professors (AAUP), seeks a unit including only faculty, but also excluding faculty in the College of Medicine.

The University feels the appropriate unit for an election should be a "pure" faculty unit made up ot regular full-time faculty at all locations of the University.

Testifying at sessions held Feb. 24-26 at University Park were Dr. Richard G. Cunningham, vice president for research and graduate studies, and Dr. G. Gregory Lozier, University planning specialist in the Division of Institutional Research and Planning. Hearings on Feb. 24 were devoted to the cross-examination of Ray T. Fortunato, assistant vice president for personnel administration, who had testified earlier in the hearings.

Dr. Cunningham outlined the purpose and function of the intercollege research programs and described in detail the functions of Code 4 academic employees and Code 5 staff exempt employees, particularly at the Applied Research Laboratory and the Computation Center.

Dr. Cunningham indicated that faculty members are appointed because of their expertise in a particular body of knowledge; with the appointment goes an expectation that research problems will be identified and research conducted. However, he said, staff exempt personnel involved in research projects, while often highly skilled and very important to the overall research program, are hired to perform rather specific functions in support of the research and typically become associated with a research project after the problem has been identified for study.

Dr. Lozier shares responsibility for preparing the annual report to the State on the University's instructional programs and faculty activity in accord with the requirements of the "Snyder Amendment." He pointed out that the Appropriations Act distinguishes between faculty — those personnel responsible for delivering the University's teaching, research, and public service programs — and other classes of employees in that only academic personnel are required to tell out faculty activity cards.

Regarding the problem ot defining full-time and part-time employees, which had been raised earlier in the hearings, Dr. Lozier said that department heads justify the need for a full-time position and an employee is designated as full-time when appointed. A faculty member appointed in such a position, he said, is assigned responsibilities by the department chairman which collectively constitute a full-time workload.

A part-time faculty member is someone hired by a department or Campus to perform specific responsibilities which are something less than the responsibilities of a full-time assignment, he added.

Cross-examination by Mr. Fortunato was devoted to a review of each policy in the University Policy Manual to determine to which classes of employees each policy applies.

During the sessions, the hearing examiner received a petition signed by 70 of the 130 faculty members in the College of Earth and Mineral Sciences.

The petition expressed (1) the faculty's desire to be excluded from any collective bargaining unit formed to represent various employees of The Pennsylvania State University and (2) the faculty's belief that its strong disciplinery orientation and association responsibilities are such that the faculty can be better represented by existing collegial procedures than by a group attempting to serve the widely diverse University community.

Mr. Lawrence ruled that the group has a right to be an intervenor In the hearings and he heard for the limited purposes of why or why not they should be included in a unit.

Staff vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been filled with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 863-1387 (network line 475-3387). Applications for these staff vacancies will be accepted up to 5 p.m., March 18, 1976. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

RESIDENCE LIVING COORDINATOR
Capitol Campus

Responsible for the supervision and administration of the Residence Living Program in two residence halls; supervision of resident assistants in resident hall wide. A five-in position. This will be a full-time position for ten months in each year. Master's degree or equivalent in psychology, student personnel services, higher education or related fields, plus one to two years of directly related experience in residence living or student activity programs.

TREASURER, ASSOCIATED STUDENT ACTIVITIES, University Park

Responsible to the Director, Office of Student Activities, for the supervision, administration, formal control and accountability of the daily operations of the student organization financial accounts in the Associated Student Activities Office and for providing advisory assistance to student organizations in the maintenance of their accounts as well as providing educational programs to enhance student organization treasurers' skills in the area of financial management. The treasurer is to provide assistance and advice to the director in financial and administrative matters pertaining to the accounting for student organization. Bachelor's degree or equivalent in business, accounting or related area, with preference of three to four years of directly related experience. Should have demonstrated ability to supervise, train and direct clerical personnel. Should be able to function in an educating capacity when working with student organization officers (particularly treasurers).

EDITORIAL ASSISTANT, GRADUATE SCHOOL, University Park

Responsible for the operation of the Office of Theses and Publications and other related duties. A bachelor's degree or equivalent preferably in English or a communication field and one to two years of directly related editorial experience required

THE UNIVERSITY IS AN EQUAL OPPORTUNITY/AFFIRMATIVE ACTION EMPLOYER

Funding sources

For further information, call 865-1372

(217-1) In its last year of funding, SETI Science and Engineering Technician Education Program, NSF, announces a March 21 deadline for (effectively 3/22/76). Preliminary proposals is required in advance to be reviewed in 4(that as promised by the agency. Technician/technology education programs at the college level are eligible. For the best programs, continuations are possible under the NSF Alternatives in High Education Program. (Ref. 41FR7439-40, 2/18/76; C/TF)

(217-2) There is an April 1 deadline date for NSF Ecosystems Studies and Ecology Systematic Biology research programs.

(217-3) The American Seed Research Foundation has announced an April 15 deadline for seed research projects which will be furnished in four or five three-year grants ranging from $3500-$4500 per year, beginning Sept. 1. (Ref. Federal Register)

(217-4) The OHEW Office of Human Development announces a March 26 deadline date for long-term training projects in vocational rehabilitation. Also announced is a July 10 deadline for "in-service training" of state personnel. Projects include training in both established and experimental disciplines and continuing education. (Ref. 41FR7439-40, 2/18/76) (CFDA 13.626)

(217-5) FY 1976 selections for grants to establish an exemplary career education model program to demonstrate an effective working relationship between business, industry and labor and formal school community. RFP 76-50 will be available until about April 5 from Marion J. Wingrove, USOE, GPM Div., Room 3653, Regional Office Bldg. 3, 7th & O Streets, S.W., Washington, D.C. 20202 (202-245-2525). (Ref. C&U Reps. p.)

(217-6) FY 1976 selections for grants to establish an exemplary career education model program to demonstrate an effective working relationship between business, industry and labor and formal school community. RFP 76-50 will be available until about April 5 from Marion J. Wingrove, USOE, GPM Div., Room 3653, Regional Office Bldg. 3, 7th & O Streets, S.W., Washington, D.C. 20202 (202-245-2525). (Ref. C&U Reps. p.)

(217-7) FY 1976 selections for grants to establish an exemplary career education model program to demonstrate an effective working relationship between business, industry and labor and formal school community. RFP 76-50 will be available until about April 5 from Marion J. Wingrove, USOE, GPM Div., Room 3653, Regional Office Bldg. 3, 7th & O Streets, S.W., Washington, D.C. 20202 (202-245-2525). (Ref. C&U Reps. p.)

(217-8) FY 1976 selections for grants to establish an exemplary career education model program to demonstrate an effective working relationship between business, industry and labor and formal school community. RFP 76-50 will be available until about April 5 from Marion J. Wingrove, USOE, GPM Div., Room 3653, Regional Office Bldg. 3, 7th & O Streets, S.W., Washington, D.C. 20202 (202-245-2525). (Ref. C&U Reps. p.)

(217-9) FY 1976 selections for grants to establish an exemplary career education model program to demonstrate an effective working relationship between business, industry and labor and formal school community. RFP 76-50 will be available until about April 5 from Marion J. Wingrove, USOE, GPM Div., Room 3653, Regional Office Bldg. 3, 7th & O Streets, S.W., Washington, D.C. 20202 (202-245-2525). (Ref. C&U Reps. p.)

(217-10) The Newberry Library — Postdoctoral humanities fellowships for 1976-77 beginning April 1, 1976. (Rel. 76-2)

Court's decision rejects 'super-tenure review committee' role

A federal court decision that could have far-reaching implications for tenure rights and academic freedom of college and university faculty members has been handed down by the U.S. Middle District Court in Harrisburg.

The decision, by Chief Judge Michael J. Sheriden, says, in effect, that a court cannot substitute its judgment for that of the academic community on the substantive merits of tenure and other academic personnel decisions.

At the same time, the court addressed the extent to which the academic freedom of faculty members may be reasonably limited, setting forth six specific circumstances where limitations are reasonable.

The court's decision, issued Feb. 28, involved the case of Wells H. Keddie, former assistant professor of labor studies at the University. A University Ad Hoc Tenure Review Committee recommended in June, 1971, that Dr. Keddie not be granted tenure, and he was terminated in June, 1972.

Dr. Keddie subsequently brought suit against the University, charging that the Ad Hoc Committee's decision penalized him for his political and other extramural activities and therefore violated his constitutional rights. He had been active in political and student causes, serving as a member of a number of organizations and as faculty adviser to Students for a Democratic Society and to the Ad Hoc Committee for Student Rights.

Defendants in the case were President John W. Oswald, Dean Stanley F. Paulson of the College of the Liberal Arts, and the five members of the Ad Hoc Committee.

In his decision, Judge Sheridan found that the Ad Hoc Committee did not base its decision to recommend denial of tenure in whole or in part on Dr. Keddie's political and other extramural activities.

"The court finds that, after a thorough and impartial study of plaintiff's performance and qualifications, specifically his scholarship and professional growth, service to the University, continuing education activities, research and publications, and teaching performance, the committee unanimously decided that plaintiff's academic performance had been below the minimum necessary for retention as a tenured staff member."

In view of this finding, he said, the court "should not and will not" undertake a review of Dr. Keddie's academic performances and qualifications.

"This court," Judge Sheriden wrote, "is powerless to substitute its judgment for that of the University as to whether plaintiff's academic credentials are such that tenure should have been awarded. The judiciary is not qualified to evaluate academic performance.

"The courts do not possess the expert knowledge or have the academic experience which should enlighten an academic committee's decision. The courts will not serve as a Super-Tenure Review Committee."

In his suit, Dr. Keddie also alleged that the decision to deny him tenure and to terminate his employment was impermissibly predicated on his exercise of First Amendment rights.

But the decision said that, in view of the court's finding that the tenure denial was not based even in part on Dr. Keddie's political and other extramural activities and utterances, the court need not decide which of his activities and utterances were indeed protected by the First Amendment.

Judge Sheridan noted, however, that although academic freedom is a constitutionally protected right, "it is not a license for uncontrolled expression or activity at variance with established curricular content or job-related procedures and requirements."

Nor, he added, does academic freedom encompass activities which are internally destructive to the proper functioning of the university or disruptive of the educational process.

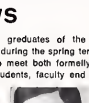
PENN STATE
intercom
Volume 5, Number 25 March 18, 1976



An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Five alumni to serve as Fellows

Five prominent graduates of the University will return during the spring term as Alumni Fellows to meet both formally and informally with students, faculty and staff.

Dr. Calhoun

Mr. Forrey

Dr. Berg

Mr. Casey

Dr. Lindsey

They include:

Dr. John C. Calhoun Jr., vice president for academic affairs at Texas A&M University, Fellow of the College of Earth and Mineral Sciences, Apr. 20-23.

William C. Forrey, director of the Pennsylvania Bureau of Parks, Fellow of the College of Health, Physical Education and Recreation, Apr. 25-29.

Dr. Paul Berg, Willson Professor of Biochemistry at Stanford University Medical School, Fellow of the College of Science, Apr. 25-29.

Samuel B. Casey Jr., president and chief executive officer of Pullman, Inc., Fellow of the College of Business Administration, May 3-6.

Dr. Margaret Lindsey, professor of education at Teachers College, Columbia University, Fellow of the College of Education, May 4-7.

The Alumni Fellows program was established in 1973 to bring outstanding alumni, leaders in their fields, back to Penn State to share their expertise in discussions with the academic community.

Thus far, 25 alumni have participated in the program.

News in brief

Phi Beta Keppe talk

Dr. Wayne Andrews, Archives of American Art Professor at Wayne State University, will deliver the annual Phi Beta Kappa lecture, "The Age of Stanford White," at 4 p.m. Monday, March 22, in Kern Auditorium.

Dr. Andrews is the author of five books, including "Architecture, Ambition and Americans," "Germaine: A Portrait of Mme. de Stael," "Siegfried's Curse: The Germen Journey from Nietzsche to Hesse," "Architecture in New England" and "American Gothic."

A graduate of Harvard, Dr. Andrews earned his Ph.D. at Columbia. Prior to joining the faculty at Wayne State in 1964, he was curator of manuscripts for the New York Historical Society and an editor at Charles Scribner's Sons.

Dr. Andrews will be on campus March 21-24 under the sponsorship of the Institute for the Arts and Humanistic Studies and Phi Beta Kappa. Arrangements for meeting with him are being handled by Prof. Daniel Walden (865-1989).

Donkin nominations esked

The committee appointed by President Oswald for the purpose of recommending candidates for the McKay Donkin Award requests assistance in nominating persons eligible for the award.

The award was established in 1969 in honor of the late McKay Donkin, who served as vice president for finance and treasurer of the University from 1957 to 1968. It is to be presented to the full-time member of the faculty or staff or the retiree who has contributed most to the "economic, physicel, mental or social welfare of the faculty" of the University.

The contribution of the nominee should be for duties or services which are above and beyond his regularly assigned duties. The award consists of $500 and a certificate. Previous recipients include William G. Mather, Ernest B. McCoy, Samuel C. Blezer, Eugene Wettstone, Kanneth L. Holderman and Patricie Ferrell.

Recommendations for the award should be sent to any member of the committee by Wednesday, April 7. Supporting information must be included.

Committee members are James M. Beattie, Room 201 Agricultural Administration Bldg.; John J. Cehir, Room 511 Delke Bldg.; and Rey T. Fortunato, Room 106 Willard.

St. Patrick's Candlelight Dinner

St. Patrick's Day will be celebrated at the HUB Terrace Room with two candlelight dinners from 4.45 to 7.15 p.m. Friday and Saturday, March 19 and 20. Featured on the menu are chicken cordon bleu, stuffed pork chops with herb dressing, prime rib of beef a jus, Irish stew with dumpling, seafood O'Brien and roast veal with mint sauce. There will be the usual assortment of vegetables, salads and desserts, plus a hospitality table and live entertainment.

Hetzel, Welker nemes due

Nominations for the Ralph Dorn Hetzel Memorial Award and the Eric A. Walker Award presented to graduating seniors at the spring term commencement exercises have been requested by Jane E. McCormick, assistant to the vice-president for student affairs.

The nomination deadline, Miss McCormick explains, is March 31. Nomination forms are available at her office, 235 Boucke Bldg.

The Hetzel Award, supported by income from funds given by the late Mrs. Ralph Dorn Hetzel, in memory of her husband, the tenth president of the University, is presented each year "to the senior class member, man or woman, whose achievement scholastically and in other activities of college life gives the highest promise of that kind of useful citizenship in national life expounded by President Hetzel."

The Eric A. Walker Award, supported by Dr. Eric A. Walker, who served as 12th president of the University from 1956 to 1970, is a trophy with the recipient receiving a replica of the original on which names of recipients are engraved.

The award was established "to recognize, during the academic year of graduation, a senior student whose activities and achievements have enhanced the public esteem end renown of The Pennsylvania State University."

Fact cards ready

New 1975-76 Penn State fact cards are now available from the Office of University Relations, 301 Old Main (865-2501). The cards briefly summarize information about the University's history, enrollment, organization, facilities, tuition, continuing education and cooperative extension services, and research and graduate studies.

Pitt holds representation elections

Elections were held on March 9 at the University of Pittsburgh to determine whether faculty at that University would adopt collective bargaining. Elections were conducted within four faculty units determined appropriate by the Pennsylvania Labor Relations Board. Results in three of the elections are final, while a fourth apparently will require a run-off election.

The Provost's area

In the election for the faculty in the school within the University Provost's area, the largest of the four voting units, none of the options on the ballot received a majority of the votes cast. With 88 percent of the eligible faculty voting, the results of the election were as follows:

	Votes	Percent
No Representation	544	48.4
Pitt Professional Union (PPU/AFT)	239	21.2
Pennsylvanie Stete Education Association (PSEA/NEA)	115	10.2
American Association of University Professors (AAUP)	228	20.2

In addition, there were 64 challenged ballots to be resolved this week. These were primarily ballots cast by individuals whose names did not appear on the voting rosters and whose eligibility to vote must be determined. Resolution of these challenged ballots could effect whether there must be a run-off election, and, if so, which of the unions (either the Pitt Professional Union or the AAUP) would be pitted against no representation. A union must receive 50 percent plus one of the votes cast in order to be elected, while no representation need only attain an even 50 percent.

Health Professions

In the election for faculty in the schools of the health professions, excluding the medicel and dentel schools, 93 percent of the eligible faculty voted. No representation received 122 (57.1 percent) of the votes cast, while AAUP and PSEA received 61 (28.5 percent) and 31 (14.4 percent) votes respectively.

Law School

In the seperate election for the faculty in the University's Law School, collective bergaining was defeated by a vote of 12 to 8, with all members of the faculty participating in the election. In this election,

(Continued on page four)

PENN STATE COLLECTION

Faculty notes

Prof. Bland

Richard E. Bland, associate professor of engineering research, has received a 25-year service award from the University. A native of Warren, O., Prof. Bland obtained a B.S. degree from Hiram College and his M.S. from the University of Michigan. Before coming to Penn State, he was an engineer at Warner and Swasey Co. of Cleveland, O., and before that served for two years with the U.S. Air Force.

Prof. Bland's research efforts have centered around underwater acoustics, noise and vibration control, and hydrodynamics. Currently, he is operations officer for the Applied Research Laboratory.

Dr. Gordon N. Fleming, professor of physics, has been invited to present a seminar at Queens College, CUNY, on March 22. He will discuss "The Quantum Pathology of Unstable Particles." Dr. Fleming is a specialist in theoretical high energy physics.

Two promotions have been announced at the University. **Rebecca H. Hotman** has been named an assistant professor of marketing in the College of Business Administration and **Thomas T. Werner** has been appointed assistant professor of meteorology in the College of Earth and Mineral Sciences.

A selection of work by **Lanny Sommese,** associate professor of art and head of graphic design in the Department of Art, will be included in the permanent collection of the Library of Congress. Mr. Sommese will provide a representative crosssection of the posters and other commissioned works he has produced. A member of the faculty since 1970, he holds a master of fine arts degree from the University of Illinois and bachelor of design and bachelor of fine arts degrees from the University of Florida.

Dr. Betty van der Smissen, professor of recreation, was the recipient of the Hedley S. Dimock Award at the National Convention of the American Camping Association held in Philadelphia March 2-6. Previous recipients of this award, given to individuals who have made significant contributions to the field of camping through related fields, include Gen. Abraham Ribicoff, William D. Rackelmann, Stewart Udall, Sigurd Olson and Julian Smith. Dr. van der Smissen was cited for her contributions to camping standards and research and her publications in outdoor education, outdoor programming and legal aspects of program activities.

Boris Dynin, a recent exile from his native Russia, is a Visiting Fellow of the Institute for the Arts and Humanistic studies during the spring term. A specialist in the philosophy, methodology, sociology and psychology of science, Dr. Dynin was a senior researcher at the Institute of Philosophy of the Soviet Academy of Science. He is teaching a course titled, "Marxism, the West and Contemporary Russian Thought" (Humanities 198), tracing the development of Russian thought, the internal conflict between Russian thought and values and the different perceptions of Russian thought in the West.

Dr. C. Wayne Bardin, professor of medicine and chief of endocrinology at Hershey, has been selected to receive a Macy Faculty Scholar Award for 1976-77. The award, presented by the Josiah Macy Jr. Foundation, is a competitive fellowship for senior medical faculty to provide the opportunity to foster intellectual renewal in a setting other than the recipient's medical school. Dr. Bardin will use his fellowship to study at the National Institutes of Health.

Dr. John Hayes has retired after 35 years on the faculty of the Department of Chemistry. He joined the department as an instructor in 1941 after obtaining M.S. and Ph.D. degrees at the University and was promoted to assistant professor in 1943 and associate professor in 1948. A native of Wisconsin, he obtained the B.S. degree at the University of Wisconsin.

Dr. Hayes is a specialist in analytical chemistry and the author of numerous scholarly papers on that research topic. He has also published on educational techniques in chemistry and developed new chemistry courses for a wide variety of students. In 1964 and 1970, he served as a collaborator in the preparation of the American Chemical Society's Quantitative Analysis examination. In 1966, he visited Aligarh Muslim University in Uttar Pradesh, India, where he taught for six weeks in a special Mathematics-Science Institute sponsored by the Ohio State University. Active in University affairs, he served on the University Faculty Senate and was chairman of the Academic Standards Committee for four years. He is a member of the American Chemical Society and served as secretary, vice chairman, and chairman of the Society's Central Pennsylvania section. He also served as a member of the Executive Committee of the Pennsylvania Association of College Chemistry Teachers. In the Department of Chemistry he was a member of the Curriculum Committee.

Two faculty members in the Department of Art Education, assistant professor **Albert A. Anderson Jr.** and associate professor **David B. Van Dommelen,** have been invited to teach at Arrowmont Crafts School in Gatlinburg, Tenn., during the 1976 Summer Session. Dr. Anderson teaches metal crafts and Mr. Van Dommelen, fiber crafts. Arrowmont Crafts School is a world famous crafts school which was established in 1912 by Pi Beta Phi, a national sorority, to enrich the life of the mountain craftsmen in Tennessee. In past years students and teachers have come from efi parts of the world in the fellowship and artistic companionship. The school is associated with the University of Tennessee's College of Home Economics and offers courses in all the contemporary crafts.

Dr. David B. Geselowitz, professor and head of bioengineering, has been appointed chairman of the committee on electrocardiography of the American Heart Association for a three-year term. The ten-member committee recently completed a set of recommendations for the standardization of electrocardiograms and the specification of instruments, and expects to direct much of its effort in the near future to developing standards for electrocardiographic aspects of patient monitoring such as occurs in hospital intensive care units, in transmissions from emergency ambulances and in stress testing.

Dr. John C. Johnson, director of the Applied Research Laboratory, arranged and presided over a symposium at the 142nd annual meeting of the American Association for the Advancement of Science in Boston last month. The symposium was entitled, "Putting Science to Work through University/Industry Interection." Theme of the meeting was "Science and Our Expectations: Bicentennial and Beyond."

Dr. Delfa M. Roy, professor of materials science, has been appointed chairman of the first Gordon Conference on basic research in cement chemistry to be held in Plymouth, N.H., July 18-23. Scientists from the United States and 12 foreign countries will participate in the conference, which is titled, "Solid-Liquid Interactions In Cement Hydration." Much of Dr. Roy's research effort has dealt with the basic chemistry of cement and was at first directed to understanding high temperature reactions in formation of anhydrous cement compounds. More recently, her research has been concerned with hydration reactions at room temperature and elevated temperetures and pressures, and with the development and characterization of microstructuras, areas closely related to the subject matter of the conferance.

Dr. John J. Docherty, assistant professor of microbiology, presented e seminar at the National Institutes of Health in Bethesda, Md., last week on Comparative Diagnostic Aspects of Herpes Simplex Virus Tumor Associate Antigens. The research was done wiih Dr. Mary Nottar, e post doctoral scholar working in Prof. Docherty's laboratory.

Dr. Tony A. Mobley, professor and head of the Department of Parks and Recreation, has been named dean of the School of Health, Physical Education, and Recreation on the Bloomington Campus of Indiana University, effective July 1. Before his 1972 appointment at Penn State, Dr. Mobley was chairman of the Department of Recreation and Park Administration at Western Illinois Univarsity. In 1970, ha was selected for the Academic Administrative Internship Program of the American Council on Education and spent a year in the Office of the Chancellor of North Carolina State University. His mastar of science and doctor of recreation degraes ware granted by Indiana. Ha also earned a master of religious education degree from Southern Seminary, Louisville, Ky., and tha bachelor of science degree from Georgetown College, Georgetown, Ky.

Hubert H. Smith, assistant professor of aerospace engineering, will participate in the 1976 National Business Aircraft Meeting and Engineering Display of the Society of Automotive Engineers which will be held in Wichita, Kansas, April 6-8. Ha will present a paper entitled, "Minimum Time Flight Trajectory Optimization for Piston-Engine-Powered Airplanes," during a session on Research, Development and Experimental Aircraft.

Dr. Gayle H. Davidonis, assistant professor of biology at Wheaton College, has been named research assistant in the Pesticide Research Laboratory at the University. A graduate of the University of Illinois, he received her M.S. and Ph.D. degrees from the University of Chicago and served on the faculty there as well as at Roosevelt University in Chicago. Dr. Davidonis's research has been in the field of plant physiology and plant development and resulted in the first isolation of allelopathic compounds in ferns.

Four members of the cultural foundations of education faculty at the University presented papers at a joint meeting of the International Studies Association and the Comparative and International Education Society last month in Toronto, Canada. Dr. **Beverly J. Lindsay,** assistant professor of education, spoke on "Social Factors Influencing Kenyan Women's Career Choices: Some Preliminary Findings," and Dr. **Joseph V. Alessandro,** professor of education, read a paper analyzing educational reforms in Peru. Dr. **Francis R. McKenne,** associate professor of education, discussed "Language Patterns of Uzbek Peoples of the U.S.S.R." and read a paper by Dr. **Yoshimitsu Takei,** assistant professor of education and sociology, on "Theoretical Issues in Studying Ethnic and Racial Relationships in Political Processes."

In print

A new book, "The Wiley Reader: Design for Writing," has been co-authored by Dr. **Caroline D. Eckhardt,** assistant professor of English and comparative literature, **James F. Holahan,** associate professor of English; and Dr. **David H. Stewart,** a former head of the English department. It was published by the College Division of John Wiley & Sons. A member of the faculty since 1971, Dr. Eckhardt is a graduate of Drew University and received her M.A. at Indiana University and her Ph.D. in comparative literature at the University of Michigan. Mr. Holahan is a 1959 graduate of the University with e B.A. in arts and letters. He joined the faculty in 1964.

Dr. William J. Dulker, associate professor of history, is the author of "The Rise of Nationalism in Vietnam, 1900-1941," published by Cornell University Press.

The book charts the development of the Vietnamese nationalist movement from its origins to its maturity in the 1920s and 1930s.

Dr. Duiker describes the evolution of tha anti-French resistance movement prior to World War II and relates the development of Vietnamese nationalism to the changing nature of Vietnam's response to the challenge of Western culture.

Founding his conclusions on source material in several languages, he shows that b '941 the major characteristics of nationalism had been established with communism firmly entrenched as the most potent political force opposed to French rule,

"In committing its influence and its power in the defense of non-communist forces in Vietnam," Dr. Dulker argues, "the United Statas was attempting to reversa the trend of history. As recent events in South Vietnam have confirmed, the non-communist forces in Vietnam never possessed the organization or will to guarantee the survival of e non-communist state in Vietnam."

Dr. Dulker, who received his Ph.D. from Georgetown University, was a foreign service officer with the State Department in Saigon in the mid-1960s.

Dr. Jeenne Chenault, associate professor of art history, has written the text and catalogue raisonne and compiled an extensive chronology and bibliography for an illustrated catalogue of paintings by Bradley Walker Tomlin, published jointly by Hofstra University and the Albright-Knox Gallery in Buffalo. The catalogus on Tomlin, an American abstract expressionist peinter, illustrates eli his extent work, including much that has never before been published. Hitherto unpublished archival documantetion is also incorporated. A year-long Tomlin exhibit opened at Albright-Knox and will travel to Hofstra, the University of Nebraska and the University of California at Berkeley. Dr. Chenault joined Penn State's faculty in 1974. She holds a B.A. from Bernard College and her M.A and Ph.D. from the University of Michigan. She is currantly conducting research on the Spanish Baroqua painter, Ribera.

Although intervention by military forces in the government of Pakistan is always a possibility, the long range prospect in that country is for regimes which are likely to be more representative of the rising middle class.

This is the conclusion of **Dr. Robert LaPorte Jr.** in a new book, "Power and Privilege. Influence and Decision-Making In Pakistan," which was published by the University of California Press.

Professor of public administration and assistant director of the Institute of Public Administration, Dr. LaPorte obtained the data bace for his book in the course of conducting more than 75 interviews both here and in Pakistan. His subjects included U.S. officials, businessmen and research consultants identified with such agencies as the U.S. Department of State and the Agency for International Development. He also interviewed officials at international agencies and foundations. All respondents were selected for interview because of their high level access to and experience with Pakistani decision-makers. Interview data was supplemented by extensive intention of pertinent government and other reports and publications.

Dr. LaPorte's examination of decision making focuses on the areas of manpower and resource allocation, and he looks at the relative contributions of prominent political, economic and government-based groups in Pakistan. The time span studied runs from 1947 through 1973, with particular emphasis on the last two years of this period.

A member of the faculty since 1966, Dr. LaPorte is the co-author of an earlier book, "Cultivating Revolution," an analysis of egrarian reform policies and movements in Latin America.

Obituary

Dr. Wayne A. Lee, professor of marketing end head of the business program at Capitol Campus, died Feb. 29. Prof. Lee began teaching at Capitol Campus in 1968. Earlier, from 1946 to 1960, he taught at University Park where he was e professor of marketing in the Department of Agricultural Economics and Rural Sociology.

University Park Calendar

March 18—28

Items to be included in this calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, March 18
Commons Videotape, 12 noon, Kern lobby.
Friday, March 19
St. Patrick's Day Candlelight Dinner, 4:45-7:15 p.m., HUB Terrece Room.
Artists Series, Misha Dichter, pianist, 8:30 p.m., University Auditorium.
Weiler Wells, baritone, and Paul Ferrone, piano, 8:30 p.m., Music Bldg. recital hall.
Saturday, March 20
Sports: Ice Hockey, vs. University of Delaware (rematch), 7:30 p.m.
St. Patrick's Day Candlelight Dinner, 4:45-7:15 p.m., HUB Terrace Room.
Faculty Club Dance, 8 p.m., Room 101 Kern.
Sunday, **March 21**
Chapel Service, 11 a.m., Eisenhower Chapel. Mary E. Marks, senior.
Black Christian Fellowship worship service, 11:15 a.m., Eisenhower Chapel. Elder Harold McKenzie, Children's Choir.
Shavers Creek Nature Center, Maple Sugaring, 1-3 p.m.; Historic Walk — Reading the Landscape, 3 p.m., Mineral Industries Bldg., Stone Valley.
Dave Billings, organ, 3:30 p.m., Music Bldg. recital hall.
Penn State and Ohio State Glee Clubs, 8:30 p.m., Music Bldg. recital hall.
Monday, March 22
Wolfgang Fior, artist-in-residence, 9 a.m.-4 p.m., Kern lobby.
Jerome Pesto, associate dean, College of Agriculture, recreates talk by Evan Pugh, 8 p.m., Keller Bldg. auditorium.
Russel Shipley, clarinet, 8:30 p.m., Music Bldg. recital hall.
Tuesday, March 23
Sports: Women's lacrosse, vs. Centrel Penn and British Universities, 3 p.m.
Jerome Pesto, associate dean, College of Agriculture, recreates talk by Evan Pugh, 4 p.m., Keller Bldg. auditorium.
GSA Garden Plot Workshop, 7:30 p.m., Room 112 Kern.
Artists Series, Preservation Hall Jazz Band, 8:30 p.m., Recreation Bldg.
Wednesday, March 24
Sports: Women's basketball, AIAW Tournament. Women's lacrosse, vs. Lock Haven and British Universities, 2 p.m.
Alard String Quartet, 8:30 p.m., Music Bldg. recital hall.
Thursday, March 25
Sports: Women's basketball, AIAW Tournament.
Workers' Day "Student-Trede Union Conference," HUB assembly room and ballroom.
Thursday-Friday, March 25-26
Delaware County Campus, 3rd Conference of the Colloquium for Social Philosophy, on "Revolution Revisited."
Friday, March 26
Sports: Women's basketball, AIAW Tournament.
Percussion Concert, 8:30 p.m., Music Bldg. recital hall.
Saturday, March 27
Annual Faculty-Staff-Grad Student Swim Marathon, beginning 7 e.m., Natatorium.
Sports: Women's basketball, AIAW Tournament. Finals at 2, 4, and 7 p.m.
Faculty Women's Club social, 9 p.m., Room 102 Kern.
Sunday, March 28
Chapel Service, 11 a.m., Eisenhower Chapel. A reflection through word, song and dance by Tenner, Coleman, Boyer and the University Chapel Choir.
Black Christian Fellowship worship service, 11:15 a.m., Eisenhower Chapel. Elder John Loyd, Jr., Black Christian Fellowship Mass Choir.
Colloquy program, "White Roots of Peece: Tracing Our Indian Heritege," ell day, 1st floor HUB.
Shavers Creek Nature Center, Indoor House Plant Workshop, 3 p.m., Mineral Industries Bldg., Stone Velley.
Katherine Kello, oboe, 3:30 p.m., Music Bldg. recital hall.
PSU Gifts and Endowments Telethon, 6 p.m., Room 101 Kern.
The Hampton Institute Choir in Concert, 8 p.m., Schwab.

Seminars

Thursday, March 18
Chemistry, 12:45 p.m., Room 333 Whitmore. Sheldon Detz, Oak Ridge National Labs., on "Electron Transfer Reactions."
Air Pollution Control, 2:20 p.m., Room 145 Fenske. Paul H. Herris, Meteorology Research, Inc., on "Fugitive Aerosols in the Urban Environment."
Populations Issues Research, 2:30 p.m., Room 244 Deike. Dr. Thomas Burch, Western Ontario University, on "Household Data and the Persistence of the Extended Family."
Physics, 3:50 p.m., Room 117 Osmond. Dr. Douglas Osheroff, Bell Telephone Labs., Murray Hill, on "Magnetic Properties of Superfluid He^3."
Mathematics, 4 p.m., Room 116 McAllister. Dr. Isadore Singer, MIT and the Institute for Advanced Study, on "Elliptic Operators on Non Compact Covering Spaces."
Microbiology and Cell Biology, 4 p.m., Room S2 Frear. William M. Spire, Food Microbiology Lab., U.S. Army Netick Development Center, on "The Role of Enterotoxin Production in 'Bacillus Cereus' Physiology."
Meteorology, 4 p.m., Room 26 Mineral Sciences. Dr. Tsenn-Weng Yu, Techniques Development Lab., NOAA, on "Numerical Study of the Atmospheric Boundery Leyer."
Ceramic Science, 11 a.m., Room 301 Mineral Industries. Kenl Bowen, metallurgy and materials science, MIT, on "Grain Growth In Ceramics."
Air Pollution Control, 2:20 p.m., Room 145 Fenske. Paul H. Harrison, Meteorology Research, Inc., Altadene, Cal., on "Fugitive Aerosols in the Urban Environment."
Agronomy, 4 p.m., Room 111 Tyson. George A. May on "Application of Landsat-1 Date for Land Cover Mapping."
Computation Center, 7:30 p.m., Room 198 Forum. (2).
Friday, March 19
Ecology, 4 p.m., Room 112 Kern. Dr. Fred L. Knopf on "Spetial, Temporal Aspects of Colonial Nesting of the White Pelican."
Physical Chemistry, 4 p.m., Room 333 Whitmore. J. H. Nibler, University of Oregon, on "Laser Spectroscopy of Matrix Isolated Molecules."
Aerospace Engineering, Fuel Science and Mechanical Engineering joint seminar, 4 p.m., Room 215 Hemmond. Dr. Normen R. L. Maccallum, senior lecturer, Glesgow University, on "Swirling Flemes in Furnaces: Aerodynamics and Fleme Stebilization."
Monday, March 22
New Communities, Architecture, 2 p.m., Room 322 Sackett. Dr. Helmut Landsberg, meteorology, University of Maryland, on "Planning for Habitable Micro- and Micro-Climate in Arid Regions."
Computation Center, 7:30 p.m., Room 108 Forum. APL (3).
Organic Chemistry, 8 p.m., Room 333 Whitmore. William A. Shores on "Charge Affinity Inversion Operators."
Tuesday, March 23
Analytical Chemistry, 12:45 p.m., Room 445 Davey. J. A. Clark on "Oil Sample Identification and Typing."
Solid State Physics, 1 p.m., Room 339 Davey. Dr. F. H. Fenton, Applied Research Lab., on "Solitons, a Phenomenological Review of Their Properties with an Assessment of Their Potential Application to Acoustics and Solid State Phenomena."
Engineering Mechenics and Acoustics joint seminar, 4 p.m., Room 323 Hammond. Christopher Gerding, greduete assistant, "Spectroscopy science and mechanics, on "Acoustic Radiation Fields with Mixed Boundary Conditions."
Inter-Science, 4 p.m., Room 333 Whitmore. William Paul, Laboratory of Immunology, National Institutes of Allergy and Infectious Diseases, on "X-Linked Control of Activation of Thymus Independent Lymphocytes."
Thursday, March 25
Chemistry, 12:45 p.m., Room 333 Whitmore. William A. Chupka, Yale University, on "Photoionizetion of Gases and Studies of Chemi-ionization and Ion-Molecule Reactions."
Physics, 3:30 p.m., Room 117 Osmond. Dr. Morton Sternheim, University of Massechusetts, on "Pion-Nucleus Interactions."
Air Pollution Control, 2:20 p.m., Room 145 Fenske James W. Chester, Department of Environmental Resources, Wilkes-Barre, on "Lead Contamination — a Case History."
Agronomy, 4 p.m., Room 111 Tyson. Larry Hepner on "Soil Inventory System for Land Use Planning."
Microbiology and Cell Biology, 4 p.m., Room S2 Frear, Reinaldo F. Gomez, nutrition end food science, MIT, on "DNA Damage end Repair in Thermolly Injured Salmonella Typhimurium."
Meteorology, 4 p.m., Room 28 Mineral Sciences. Dr. Jerome Spert, earth and planetery sciences, City University of New York, on "Response of the Atmosphere to Sea Surface Temperature Anomalies."
Computation Center, 7:30 p.m., Room 108 Forum. APL (4).
Friday, March 26
Geosciences, 11 a.m., Room 244 Deike. Dr. Yoshio Takeuchi, University of Tokyo, on "Crystal Chemistry of Silicate Minerals."
Physicel Chemistry, 4 p.m., Room 333 Whitmore. C. Hertzell, biochemistry.

Lectures

Thursday, March 18
William Elliott Invitetional Conference, public lecture, Welter W. Heller, Regent's Professor of Economics, University of Minnesote, on "The Economic Environment for Business," 10 e.m., Keller Bldg. auditorium.
Friday, March 19
College of Business Administration end the University Committee on Internetional Programs present Professor Mitchell Brooke, University of Menchester, on "Policies and Strategies on Europeen Multinetional Companies," 12:45 p.m., Room 101 Althouse.
Monday, **March 22**
Priestley Lecture, Henry Taube, Stenford University, on "Intremolecular Electron Transfer," 8 p.m., Room 105 Forum.
Phi Beta Kappa Lecture, Dr. Weyne Andrews, ert history, Wayne State University, on "The Age of Stenford White."
Tuesday, March 23
Priestley Lecture, Henry Teube on "Mixed Velence Complexes," 8 p.m., Room 105 Forum.
Wednesday, March 24
Priestley Lecture, Henry Teube on "Back-Bonding in 'Classical' Complexes," 8 p.m., Room 108 Forum.
Thursday, March 25
Priestley Lecture, Henry Teube on "Manifestetions of Beck-Bonding in the Chemistry of Ruthenium end Osmium Ammines," 3 p.m., Room 108 Forum.

University schedule

Monday, March 22
Late registration deadline.
Add deadline.

Films

Monday, March 22
Free Shakespeare film, "A Midsummer Night's Dream" (Diana Rigg, Peter Hall), 6:30 p.m., Room 101 Chambers.
French Film Series, "Zero for Conduct," 7 end 9 p.m., Room 112 Kern.
Tuesday, March 23
Free Shakespeare film, "A Midsummer Night's Dream" (Diana Rigg, Peter Hall), 6:30 p.m., Room 101 Chambers.
Saturday, March 27
Hillel Foundation film, "Diery of Ann Frenk," 8 p.m., HUB assembly room.

Exhibits

Museum of Art: Recent Works by Stuert Frost.
Zoller Gallery: Stuart Frost in Retrospect.
Item Gallery: William Davis, drawings, until March 23. After Images (photo-journalism). R. Logan Harrison, photography, opening March 24.
Chambers Gallery: Joelynn Snyder Ott, drawings. Lawrence Jorden, ceramics.
HUB Gallery: Selections from the Permanent Collection.
HUB Main Lounge: Americana in the Netherlands (Norwegian Information Service).
Pattee Library: Main Lobby — "The Library: Past, Present and Future," by Lee Stout, Penn State Collections. East Corridor Gallery — Drawings and Paintings by Janet Gallagher. Lending Services Lobby — Portraits by Sally Alexander.

Arts roundup

Glee Clubs combine voices

The Ohio State University Glee Club and the Penn State Glee Club will perform a duo concert at 8:30 p.m. Sunday, March 21, in the Music Bldg. recital hall. The Penn State group, recently returned from its annual spring performance tour — this year in southern and southeastern Pennsylvania — will sing the first section of the program. Directed by Bruce Trinkley, assistant professor of music, the Glee Club will perform two whole songs based on Melville's "Moby Dick": "You May Bury Me In the East" and "In That Great Gettin' Up Mornin'," and selections from the Pennsylvania Bicentennieil Wegon Trein Show co-written and arranged by Mr. Trinkley.

The 50-voice Ohio State Glee Club, directed by Norman Stelger, will perform a selection of pieces from its tour repertoire. The group hes toured end performed widely. The joint concert will include with the two groups' performence, directed by Mr. Steiger, of "A New Heart Will I Give You" by John Hess Beck. The work, with a text from "Ezekiel," was written for end dedicated to the Ohio State Glee Club.

Photos, drawings on exhibit

Photogrephs by Lenny Sommese, essociete professor of ert, and prints and drewings by William Devis, assistent director of the Museum of Art, are on view through March 23 in the Commons Gallery of Kern Greduete Bldg. The 28 recent color photogrephs by Mr. Sommese were teken in Nessou, Palm Beach and Key West. Mr. Devis's prints and drawings were exhibited previously at the Westmoreland County Museum, Greensburg, end will be shown March 28 through April 22 in the Kipp Gellery et the Indiene University of Pennsylvanie.

Alard to perform March 24

Three 16th century Spanish pieces written originelly for vihuela, e lute-like instrument, will open the concert by the Alard String Quartet at 8:30 p.m., Wednesdey, March 24, in the Music Bldg. recital hall. Arranged by Denis Stevens, a former University faculty member now at the University of Californie at Sente Barbera, two of the pieces are by Cebezon; end the composer of the third, "Fentasie VIII de Vihuela," is unknown.

Works by Grieg, Gershwin and Vaughen-Williams have also been selected for performence by quertet members Joenne Zegst and Donald Hopkins, violin; Reymond Pege, viole; end Leonerd Feldman, cello. Grieg's "Quertet in G Minor," opus 27, was very popular in the early 1900s and its recent revival coincides with renewed interest in Romantic music. George Gershwin's "Lullaby for String Quertet," published posthumously, was not performed publicly es it was written until a 1967 Library of Congress concert by the Juilliard Quartet. Vaughan-Williams' "String Quertet in A Minor" will complete the concert.

American art course

A special five-part Continuing Education course, "Art in America: A Survey of 200 Years," will be offered by Walton J. Lord, associate professor of art history, beginning Tuesday, March 23, on five successive Tuesdays from 7:30 to 9:30 p.m. in Ketter Bldg.

Lecture topics include: Art in America prior to the Declaration of Independence; The Arts of the Early Republic, 1800-1840; The Emergence of an American Art, 1870-1890; Revolt and Change in American Art: Transition to Modern Styles; and American Art in the Contemporary World: From Colonial to Imperial Status.

Further information about the course is available from Continuing Education at 865-3443.

Preservation Hall ticket sale

Tickets are still available for the Artists Series-sponsored Preservation Hall Jazz Band, which will perform at 8:30 p.m. Tuesdey, March 23, in Recreation Bldg. The tickets may be purchased at the Artists Series' HUB booth or at University Auditorium from 9 e.m. to 4 p.m. All tickets are priced et $2.50, and there will be no reserved seats.

Prof. Verene helps spark latest Vico scholarly renaissance

He influenced Coleridge, Goethe, Comte, Yeets, Marx and Edmund Wilson. James Joyce said of his work: "My imagination grows when I read (him) as it doesn't when I read Freud or Jung."

But despite this kind of testimony, for most of the 300 years since his birth, Giambattista Vico has remained an obscure Neapolitan Intellectuel. Herbert Reed called him "the most unacknowledged source of ideas in the history of philosophy."

"Vico is a figure whom a great number of important people have read," says Penn State associate professor of philosophy Donald P. Verene, "and he's had a great effect on many of his readers. Yet he has remained relatively unknown and has always had to be rediscovered by scholars in different eges."

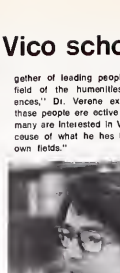
French scholars of the 19th century were excited by Vico, and early 20th century Italians rediscovered his works. The latest Vico renaissance has come in the English-speaking world, and early this year interest was focused by a major conference and an important new volume — all devoted to Vico's contributions to modern society.

Dr. Verene is co-editor and a contributor to the volume called, "Giambattista Vico's Science of Humanity," published by the Johns Hopkins University Press. The book's other editor is Giorgio Tagliacozzo, who also conceived and arranged the Vico conference, held last Jan. 27 to 31 at Columbia University. Dr. Verene delivered a major paper there.

"The purpose of the book and the conference has been to create a new basis for the interpretation of Vico's thought," Dr. Verene explains. "I think people in the humanities and social sciences have become interested in Vico because he somehow speeks to us today more than many of our contemporary writers."

What is the secret of the 17th century seventi's success?

Dr. Verene's explanation is: "We're living in en ege when everyone is thinking in specialized weys and our culture has become fragmented. Vico, on the other hand, wes e holistic thinker. He gives us e vision of how human culture originates, develops and can be held together, and this vision seems to suggest imeginative new ways of rethinking the fragmentation of our own culture and knowledge.



"Imegination plays e key role in Vico's philosophy," Dr. Verene continues. "His key idee was something he calls 'imeginative universals,' which are ways of forming concepts of things through the powers of the imagination."

Dr. Verene's papers for both the book and the conference deal with Vico's uses of the imagination. He contends that Vico's thought contains the basis for a humanistic theory of knowledge and for a philosophy of the humenistic disciplines.

"We have a philosophy of science," he says, "but a counterpart for this, a philosophy of the humanities, has not developed. I think that Vico may give us the foundation for developing a genuine philosophy of the humanities."

But the Vico renaissance is not limited to philosophers. Contributions for both book and conference were made by scholars from many other disciplines — linguistics, literature, history, education, psychology, psychiatry, rhetoric and sociology.

"What we really have is a coming together of leading people in almost every field of the humanities and social sciences," Dr. Verene explains. "Some of these people are active Vico scholars, but many are interested in Vico principally because of what he has to say about their own fields."

Dr. Verene

Among the participants at the conference were Sir Isaiah Berlin, who acted as commentator on Dr. Verene's paper, Max Fisch, Noam Chomsky, Sir Edmund Leech, Heyden White, Lawrence Kohlberg, Leon Pompa, Ernesto Grassi and Myer Schapiro. Some of these participants are also contributors to the new volume.

One of the curious things about the conference was that no one was paid to participate," Dr. Verene notes. "Yet all these people came and, in addition, there were 300 to 400 spectators at each session, ranging from students to very distinguished members of the academic world.

"I think it was the kind of event Vico would have liked."

It was certainly not the kind of event the Neapolitan would have inspired in his own time. Giambattiste Vico's life was plagued by failure.

"He actually had trouble supporting himself," Dr. Verene explains. "His only official position was as 'Professor of Latin Eloquence' at the University of Naples, a job which paid so poorly that most of the time Vico was forced to be a sort of practicing rhetorician, writing inscriptions and funeral poems for wealthy families and politicians — work without intrinsic literary interest.

"He was regularly passed by for appointments that would have given him a better living, and in his own time he was never widely recognized as an important scholar."

That recognition may be coming at last for Vico with Tagliacozzo and Verene's new volume and publishers clamoring for rights to the conference papers.

"There have been so many requests for the papers from journals that we don't exactly know how to begin to deal with them," Dr. Verene reports.

In addition to his work with Vico, Dr. Verene is the author of articles and essays on the philosophy of Hegel, Cassirer's philosophy of symbolic forms, and logics in the philosophy of culture. He is editor of two other volumes: "Man and Culture" (1970) and "Sexual Love and Western Mortality" (1973). Before joining the Penn State faculty in 1971, he taught at Northern Illinois University. He holds an A.B. from Knox College and his M.A. and Ph.D. from Washington University.

Pasto re-creates Evan Pugh talk

Dr. Jerome K. Pasto, associate dean for resident instruction in the College of Agriculture, will re-create a talk given by Dr. Evan Pugh, Penn State's first president, Monday, March 22, at 8 p.m. and Tuesday, March 23, at 4 p.m. in Keller Bldg auditorium.

The program, to which the public is invited, was developed by Dr. Pasto as a personal contribution to reviving America's past during the Bicentennial.

To re-create the address which Dr. Pugh originally delivered to the Cumberland County Agricultural Society in 1860, Dr. Pasto reduced the two-hour speech to 20 minutes but was careful to retain whole phrases and sentences which preserve the continuity of Dr. Pugh's thoughts. In the talk, Dr. Pugh discussed the role of science in agriculture, outlined a program of development for his young school and speculated upon the prospects for its success.

Dr. Pasto will appear in costume appropriate to the period, and the speech will be preceded by 20 minutes of slides and narrative on Dr. Pugh's extraordinary life, presented by Dr. James E. Van Horn, assistant professor of child development extension.

Although Penn State was founded to educate the sons of farmers, Dr. Pugh intended that it should eventually provide a far broader "industrial education of a scientific character." The son of a blacksmith, he himself had earned a doctorate in chemistry at Goettingen in Germany, and his research on nitrogen uptake by plants stands as a model to this day.

Dr. Pasto has already presented Dr. Pugh's speech to more than 25 audiences throughout Pennsylvenia. His programs next week are being sponsored by the College of Agriculture and the Centre County Historical Society.

Personnel conference held

The 3rd annual conference on faculty and staff personnel assigned to the Commonwealth Campuses of the University was held March 14, 15 and 18 at University Park.

The purpose of the conference was to fulfill general University policy requirements relating to the evaluation and development of personnel.

The director of each of the Campuses, accompanied by the associate director for academic affairs or assistant director for resident instruction, met with deans and heads of departments at University Park to discuss and evaluate the records and the progress of each faculty member on the Campus.

Directors also met with University administrators to discuss the work of first-line administrators on their Campuses and performance ratings.

Court rejects role

(Continued from page one)

Certain legitimate interests, the judge wrote, may limit the right of a public employee, specifically the right of a state university professor, to say and do what he pleases when there is:

— the need to maintain discipline or harmony among co-workers;

— the need for confidentiality;

— the need to curtail conduct which impedes the teacher's proper and competent performance of his daily duties;

— the need to encourage a close and personal relationship between the employee and his superiors, when that relationship calls for loyalty and confidence;

— the need to maintain a competition of different views in the classroom and to prevent the use of the classroom by a teacher deliberately to proselytize for a personal cause or knowingly to emphasize only that selection of data best conforming to his own personal biases; and

— the need to prevent activities disruptive of the educational process and to provide for the orderly functioning of the university.

Dr. Keddie's suit sought damages and declaratory and injunctive relief against the University for the alleged violation of his constitutional rights and for defamation and wrongful discharge arising from his tenure denial.

However, the court found that the University did not violate any constitutional or other legal rights of Dr. Keddie and ruled he was not entitled to damages.

Pitt election

(Continued from page one)

the contending union was the Independent Pitt Law Faculty Association.

Medical School

The only election in which a union was elected outright was in the Medical School in which 218 (62.1 percent) medical faculty voted for the Independent Faculty Association of the School of Medicine. One hundred eleven (31.6 percent) votes were cast for no representation, while 22 (6.2 percent) were for the PSEA. Only 74 percent of the eligible faculty voted in the Medical School election, the lowest percentage in any of the four elections.

According to the University's Director of Legal Services, the results in the Medical School may have been affected by a letter from the counsel for the Independent Faculty Association to the Medical School faculty the day before the election suggesting that their status as a separate unit, as agreed to by the Pennsylvania Labor Relations Board, would be best protected by the election of the Faculty Association. During the unit determination hearings for the University of Pittsburgh, the administration took the position that all schools of the University should be included in an overall voting unit.

The election run-off for faculty members in the schools in the Provost's area, required, will be conducted on Tuesday and Wednesday, March 30 and 31, with the results to be announced on Thursday, April 1.

Staff vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., March 25, 1974. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

PLANNING ANALYST, OFFICE OF BUDGET AND PLANNING — University Park

Responsible to the Division Director of Institutional Research and Planning or to a University planning specialist for portions of one or more major University policy and planning areas. Participates with a senior staff person from the Division in development of University planning policies, procedures and studies. Conducts research of pertinent literature in preparation for major policy studies. Participates in developing recommendations on strategic policy planning issues as they affect the University. Performs other duties pertinent to the continuous iterative process inherent in policy analysis and planning. A master's degree or equivalent in higher education or other related fields, such as business administration, economics, public administration, sociology, political science is required together with at least one year's directly related experience in institutional research, policy and planning activities. An earned doctorate in one of these areas would be preferred and, in such cases, a minimum of six months of directly related experience will be considered.

SENIOR PLANNING ANALYST, OFFICE OF BUDGET AND PLANNING — University Park

Responsible to the Director of Institutional Research and Planning for one or more major University planning and analysis functions; to develop University planning policies, procedures and studies; design and conduct major planning studies, make recommendations on policy and strategic considerations affecting University planning; serve as staff representative of the Office of Budget and Planning with various planning and study committees within the University; and plan and supervise development of data and preparation of special analyses and strategic planning proposals. A master's degree or equivalent in higher education or other education fields, business administration, public administration, economics or related fields is required, together with two years of appropriate and related experience. An earned doctorate in one of these areas is preferred; such cases, a minimum of one year of appropriate and related experience is required.

RECORDER, COLLEGE OF HUMAN DEVELOPMENT — University Park

Responsible to the professor in charge of Graduate Nursing Program for assisting with the development and implementation of a data system and for providing supportive services for the graduate program to the Department of Nursing. Bachelor's degree or equivalent and six to eight months of directly related experience.

GRAPHIC ARTIST, UNIVERSITY DIVISION OF INSTRUCTIONAL SERVICES — University Park

To prepare art work in the form of graphs, charts, illustrations, displays, biological and technical drawings to be used as slides, flipcharts, TV art, overhead transparencies, etc., for use primarily in the resident instruction programs. Associate degree or graduate of two year program from an art institute or equivalent in documented experience. Knowledge of television techniques and audio-visual aids is helpful.

PROGRAMMER, MANAGEMENT SERVICES — University Park

Responsible to designated project or task leader for participating in analysis, program design, coding, documenting and other programming tasks required to produce reports, make mathematical calculations or maintain information files. Bachelor's degree or equivalent in computer science or related field, plus one to two years of directly related experience.

PROGRAMMER, OFFICE OF BUDGET AND PLANNING — University Park

Under direction of a senior programmer/analyst, assists in developing program design, coding, documentation and other peripheral programming tasks required to produce management reports, mathematical computations and maintain information files. Capability of communicating with top level management personnel is essential. Bachelor's degree with training in computer-based information systems and one to two years of directly related experience in data processing required. Master's degree may be substituted for up to two years of directly related experience in appropriately related discipline.

PENN STATE intercom

Volume 5, Number 26 March 25, 1976

An internal communications medium for the ecedemic community of The Pennsylvenie State University published weekly during the four terms of the class schedule

Hampton choir, Ellington group in religion-arts week

Religion and the Arts Week, featuring a wide variety of music, lectures and exhibits, will be presented at the University beginning March 28. Special programs include:

Sunday, **March 28**

Reflections through Word, Song and Dance, 11 a.m., Eisenhower Chapel.

Tracing Our Indian Heritage: The White Roots of Peace, 1-5:30 p.m., HUB. This program offers discussions on the "Traditional Cultural Structure of Indian Life," 1 p.m.; "Problems with Reservations," 2 p.m.; "Wounded Knee and Treaty Violations," 3 p.m.; and "Indian Assimilation into a White Industrialized Society," 4 p.m. A videotape of Wounded Knee will be shown at 1 p.m., as well as films at 3, 3:30 and 4:30 p.m. There will be an arts and crafts demonstration at 2 p.m. in the main lounge and a crafts sale at 3:30 p.m. in the same area. Colloquy is sponsoring.

The Hampton Institute Concert Choir, 3 p.m., Schwab. The 40-member group, directed by Roland M. Carter, has a vast repertoire of vocal arrangements, including classics, spirituals and popular music. It has appeared throughout the United States and Europe, and admission to its Penn State performance is free. Sponsors are the Black Arts Festival and the Paul Robeson Cultural Center.

Monday, **March 29**

Joan Kennedy, creative dance instructor, discussion and demonstration, "A Christian in the Arts," 7 p.m., Eisenhower Chapel.

The Duke Ellington Orchestra in Concert, 8 p.m., University Auditorium. Conducted by Mercer Ellington, the orchestra will perform the Sacred Mass written by the late Duke Ellington and performed in Westminster Abbey. Sponsors are the University Concert Committee and the Paul Robeson Cultural Center.

Tuesday, **March 30**

Paul Harrison, professor of religious

(Continued on page four)

Enrollment up

A preliminary report on enrollment for the spring term indicates there are 43,323 students enrolled, exclusive of those at Capitol Campus and the Hershey Medical Center.

The incomplete figures reported as of March 12 show a gain of 945 over comparable figures of a year ago. They list 28,428 students at University Park; 13,375 at the Commonwealth Campuses; 1,342 at Behrend College; and 178 at the King of Prussia Graduate Center.

The totals also include 33,300 candidates for the baccelaureate degree; 3,188 for the associate degree; 4,436 graduate students; and 2,208 adjunct students.

Board reaffirms retirement policy

Trustees of the University approved a recommendation of the Educational Policy Committee of the Board to "reaffirm the present policy mandating retirement at age 65 and requiring that any extension on a year-to-year basis be the prerogative of the President when he deems it is in the best interest of the University."

The present policy states that "the July 1 coincident with or next following the 65th birthday shall be the mandatory retirement date for the faculty and staff of the University."

It provides, also, that under "unusual circumstances an administrative officer may request the continuance of an employee past age 65 on a year-to-year basis."

The unusual circumstances, it is emphasized, require among other things that continuation of an employee must be deemed to be in the best interests of the University.

The request for continuation beyond age 65 is initiated by the appropriate administrative officer and the decision on contin-

(Continued on page four)

Thelma Price named special assistant

Mrs. Thelma T. Price has been nemed special assistant to the President for six months, on e hall-time basis, to essist in implementing, es is appropriate and is possible, the task force report on increasing black enrollment at the University.

The appointment of Mrs. Price, who has been serving since 1972 as assistant vice-president for student affairs for special services and programs, was announced at last Saturday's meeting of the Board of Trustees.

"I am pleased that Mrs. Price has agreed to serve on my direct staff for this very important function," Or. Oswald said. "The report is now undergoing careful review by many groups within the University.

"Although there are different opinions on some of the specific recommendations, both as to their nature and priority, the report and its purposes have been well received in the University. There is a strong commitment to take what corrective steps may be feasible and appropriate.

"Practically all responses have urged that our principal aim should be to increase the number of black students going into higher education — not merely to shift them from one institution to another."

Mrs. Price, who will assume her new part-time duties on April 1, joined the Penn State staff in 1963 as assistant dean of students at the New Kensington Campus. She was named acting director of the Educational Opportunity Program at University Park in 1971 and assistant vice-president for student affairs the following year. She received her B.A. in social studies from Bennett College and her M.Ed. in history from the University of Pittsburgh.

Energy funding

The Gulf Oil Foundation has provided the University with funds to support alternative energy research. These funds are to be utilized as seed money to undertake an alternative energy project of a nature that subsequently could be eligible to be supported from other outside funding.

The purpose of the support is to develop alternative energy conversion ideas which might not have been economically viable before the recent energy crisis, but which, because of the rapid increase in the cost of conventional fuels, should now be brought forward and evaluated.

Penn State faculty at all locations of the University are eligible to apply for this limited support. For further information contact your College's (or Capitol Campus) representative on the Administrative Committee for Research (ACOR). If needed, faculty at the Commonwealth Campuses and the King of Prussia Graduate Center may obtain information as to the appropriate ACOR representative to contact from the Campus or Center director.

Trustee actions

The University's Board of Trustees at its meeting last weekend in Hershey took the following actions:

—Approved preliminary plans for air conditioning six University Park buildings most heavily used for summer instructional programs. Benefiting from the State Department of General Services $3,000,000 project will be Pattee Library and sections of Willard, Rackley, Hammond, Sackett and Chandlee.

—Authorized the employment of a Pittsburgh firm, Environmental Planning and Design, to plan site development for the Environmental Sciences Bldg. under construction along U.S. Route 322.

—Approved discontinuation of a 70-year-old water line from Musser Gap to the University Park Campus.

—Approved changes in the provisions of the Mason C. Gilpin Memorial Scholarship including making it available to students throughout the College of Agriculture rather than limiting it to students in certain designated majors.

(Continued on page four)

Senate chairman has served in all of that body's elected offices

With her past involvement in the University Faculty Senate, Sally Small felt she knew what to expect in her role as Senate chairman.

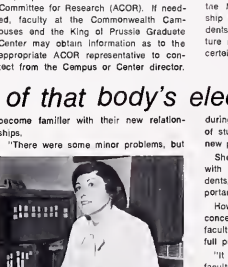
But, after completing the better part of her term as chairman, she is still awed by it all.

"After two years of working closely with the Senate chairman as secretary and vice chairman, I felt I knew what was coming," she says, "but the job is taking a great deal more time than I had anticipated."

Those close to the Senate office are impressed with Mrs. Small's knowledge of the Senate's structure, rules and procedures and her willingness to deal with problems on a personal level. A member of the Senate since 1971, she is the first chairman to have served in all of its elected offices.

"As a result," says Dr. Oscer C. Barkman, executive secretary of the Senate, "she is well versed in the mechanics and procedures of the Senate. She's able to get a lot more done than she expects because she's not spinning wheels so much."

Her knowledge and background has allowed her more time to spend on other problems.



"Her ability to solve problems on a personal basis is a real asset for e Senate chairman," Dr. Barkmen points out. "If someone has e question on a piece of legislation, she will track it in both directions and get an answer back to the person. She is willing to spend a lot of time and will follow through until she gets an answer."

A graduate of Dickinson College, Mrs. Small received a mester of science degree in library science from Drexel University. She served as a research librarian for Merck Sharp and Dohme Research Laboratories and joined the University in 1967 as librerian at the Berks Campus, where she also serves es an academic adviser to students.

Mrs. Small assumed her chairmanship after the Senate adopted the recommendations of its Governance Committee calling for e new committee structure, paralleling the University's administrative structure. One of her major goals es Senate chairman has been to shepherd the plan into operation.

"It's one thing to establish e new structure and another to get it working," she notes. "It involved some administrators and faculty members who had never worked together before and who had to become familier with their new relationships.

"There were some minor problems, but

Mrs. Small

now most committees meet regularly and function well. The new structure has promoted a better understanding of problems on both sides, particularly in the new Faculty Advisory Committee, where faculty members are beginning to understend the problems of the administration. At the same time, the administration is getting feedback from faculty that it never had received before."

Other accomplishments of the Senate during her term include a major revision of student rules and implementation of a new promotion and tenure policy.

She also hes been particularly pleased with participetion in the Senate by students, "who definitely now see the importance of their role."

However, she expresses a feeling of concern that some College and Campus faculty organizations ere not meeting their full potential.

"It seems that communication between faculty organizations and the Senate is not as strong as it should be," she points out. "There is not always a formal link, and there should be. At least one Senator should be a member of the College or Campus faculty organization and should report regularly to that group. This is important, particularly when it comes to understanding and implementing the intent of legislation passed by the Senate."

Mrs. Smell's Senate duties requife her to be in University Park 2½ days a week, but she says her family — which includes her dentist husband, Bill, and three sons, two in college and one in high school — have been extremely understanding and helpful.

PENN STATE COLLECTION

Faculty notes

Dr. Hunter

Kenneth Hunter, associate professor of civil engineering, is observing his 25th year at the University.

He joined the faculty in 1950 as the coordinator for Continuing Education programs in engineering mechanics, architectural engineering, civil engineering and general engineering. Prior to that time, he was a detailer with The American Bridge Division of U.S. Steel and held a position with the Department of Public Works for the City of Middletown, Connecticut. Prof. Hunter received his B.S. in civil engineering from Penn State and has taken advanced work in the areas of structures and engineering mechanics.

Prof. Hunter has been involved in the development of associate degree programs as well as review programs for those seeking registration as Professional Engineers. Since 1959 he has been administrator for the Engineer-in-Training and Professional Engineering Examinations for central Pennsylvania. While his primary duties have been in Continuing Education, Prof. Hunter has taught courses in descriptive geometry, engineering mechanics and surveying.

During the past 20 years, Prof. Hunter has assisted with 13 surveying conferences and has also served as a co-chairman for the conferences. He has also been an Engineers' Council for Professional Development Accreditation Visitor for Engineering Technology Programs and in 1964 was selected to participate in the American Society for Engineering Education-English Speaking Union Visitor Exchange Program, during which time he spent eight weeks visiting technical schools in various parts of England.

Laurent LeSage, professor of Romance Languages, will give one of the two major talks at a conference on French literary criticism to be held at the University of South Carolina March 25-27. At the conclusion of the three days of specialized papers, Prof. LeSage will give an overview with special emphasis on semiological criticism and its impact on teaching techniques.

John M. Harrison, professor of journalism and American studies, will be an invited participant in a Bicentennial symposium, "The Eighteenth Century Journalists," sponsored by West Virginia University, March 31-April 2. "The War of Words: The Role of America's First Editorial Writers In Making a Revolution" is the subject of Prof. Harrison's paper — one of 21 to be presented by scholars in journalism, history and literature from throughout the United States.

Dr. James F. Tammen, head of the Department of Plant Pathology, has been named dean of the University of Minnesota College of Agriculture. Dr. Tammen holds a B.S. and Ph.D. in plant pathology from the University of California at Berkeley. He has been at Penn State since 1956 and is an expert on causes and control of diseases of flowering plants.

Dr. Kenneth P. Mortimer, professor of higher education and research associate at the Center for the Study of Higher Education, has been elected vice president of the Association of Professors of Higher Education. He will automatically become president in March, 1977. The association was organized in 1974 and has some 300 members. Dr. Mortimer came to Penn State in 1969 and is a recognized national authority on university governence.

Dr. Herold V. Walton, professor of agricultural engineering at the University of Missouri since 1962, has been named professor and head of Penn State's Department of Agricultural Engineering, effective June 1. He succeeds Frenk W. Peikert who retired last September. Dr. Walton, prior to going to Missouri, was professor of agricultural engineering at Penn State, having been named to the Penn State faculty in 1947 as an instructor. At Missouri, he served from 1962 until 1969 as cheirman of the Department of Agricultural Engineering and from 1969 to 1971 was chief of party and adviser in university organization and administration serving under the U.S. Agency for International Development at Orissa University of Agriculture and Technology at Orisse, India.

After attending the George School, Dr. Walton earned a B.S. and M.S. in agricultural engineering at Penn State and a Ph.D. from Purdue. While at Missouri, he has been developing a food engineering emphasis within the agricultural engineering program and teaching a course for food science majors. His research has centered around the physical properties of poultry products, and he has been author or co-author of more than 30 publications.

Dr. Warren E. George, professor and head of the department of music education, was guest conductor at the Region IV State Band Festival March 19-20 at Mt. Lebanon High School. The band was composed of 177 students representing 95 school districts from the southwestern region of the state.

Edward M. Elias, director of the York Campus, was honored recently for his outstanding contribution to the United Way of York County. During his two years as head of that organization, the campaign raised $1,465,000 to serve 100,000 York Countians through 40 human care agencies.

"Shamokin," a lithograph by **Linda Plotkin,** assistant professor of art, has been awarded a purchase prize in the Second National Print and Drawing Competition at the College of the Siskiyous in California. The print was created under a grant from the Institute for the Arts and Humanistic Studies.

George W. Bierly, director of the Wilkes-Barre Campus, was presented a Plaque for the Outstanding Engineer by the Luzerne County Chapter Pennsylvania Society of Professional Engineers. The award was presented to Mr. Bierly by John Hychko, associate professor of engineering at the Campus and chapter president, at the Engineers' Week dinner-dance given by the Luzerne County Society of Engineers' Auxiliary.

Dr. Tom Hickey, associate professor of human development and associate chairman of the Gerontology Center, has been installed as president of the Association for Gerontology in Higher Education. Dr. Hickey is a keynote talk, "Educational Policy in Gerontology," at the group's annual meeting March 3-6 in Chevy Chase, Md. Also taking part in the session were **Dr. Joseph H. Britton,** professor of human development, who spoke on "Graduate Education in Aging and the Role of University Centers," and Dr. **Dennis R. Hamelster,** research assistant in human development, who discussed "Adult Education and Continuing Education for Professionals in Aging."

Recent sculpture by **Stephen Porter,** assistant professor of art, is on exhibit in a one-man show at Parsons-Truman Gallery, 24 W. 57th St., N.Y.C., through April 10. The exhibition consists of abstract sculpture executed primarily in wood, with some works rough-carved from green logs and others of laminated native hardwoods, and several earlier small polished metal sculptures. Mr. Porter, whose work has been featured in four previous solo New York exhibits, has also had one-man shows in Ithace and Buffalo, N.Y., New Orleans, and Washington, D.C. Before coming to Penn State in 1973, Mr. Porter taught at Silvermine College of Art and Cornell University.

Twenty-three faculty members and students from the University will present papers at the Pennsylvania Academy of Science's 52nd annual meeting at Shippensburg State College, April 7-10. **Jerome K. Pasto,** associate dean of the College of Agriculture, will present the main address, e recreated talk given in 1860 by Dr. Evan Pugh, first president of the University, titled "The Role of Science in Agriculture." **Adem Anthony,** professor of zoology, and his graduate students will present four papers at the meeting. Dr. Anthony's co-authors are Neli W. Brister, Glorie J. Colurso, Michael J. Durkot, Allen Deerry, Richard Mahniak and Thomas E. Bennett. **Ronald R. Kelpsh,** associate professor of biology, Mont Alto, and **Willlem H. Neff,** associate professor of biology, will each present two papers. Dr. Neff's co-authors are graduate students Thomas L. Ashcom and Jeffrey A. Brodsky and Penn State alumni James L. Dively and James E. Mudge.

Other Penn State participants include **James P. Deploey,** assistant professor of biology, York Campus; **George K. Schenck,** associate professor of mineral economics; **Roy E. Myers,** assistant professor of mathematics, New Kensington; **E. Willard Miller,** associate dean for resident Instruction, College of Earth and Mineral Sciences; **Theodore T. Ziegenfus,** assistant professor of biology, New Kensington; **Edward W. Wickersham,** associate professor of biology; and graduate students Sue A. Lesser, Deborah A. Matinek and Gary P. Killian.

Dr. Luis F. Gonzelez-Cruz, associate professor of Spanish at New Kensington, has been appointed to the editorial board of two scholarly magazines, "Mester" and "Caribe." The former is a literary review devoted to Spanish and Latin American literature and is published by UCLA. The latter, a new literary magazine published by the University of Hawaii, will be devoted to the literature of all Spanish speaking countries in the Caribbean.

Dr. Dagobert de Levie, professor of German and director, Office of Foreign Studies, is author of a new book, "Die Menschenliebe im Zeitalter der Aufklärung," published by Bern und Frankfurt/M.

The monograph is e contribution to the German history of ideas. It traces the development of the concept of "Menschenliebe," or love of mankind, in the writings of Samuel Pufendorf, Christian Thomasius and Christian Wolff, and underscores the term's significance for the German moral philosophy of the Enlightenment.

Viewed within the framework of the general secularization process that set in with the Renaissance and was intensified during the Age of Reason, "Menschenliebe" is regarded by the author as a secular surrogate for the Christian "agape" or "caritas" and as such gives evidence of the gradual secularization of Christian moral values in the 18th century.

As the cardinal virtue of "enlightened morality, this secular idea of "Menschenliebe" found its poetic glorification in the works of such popular poets as Gellert and Hegedorn and thereby became a familiar concept in the German world of ideas.

Dr. Edwin L. Herr, professor and head, Department of Counselor Education, has been selected to present one of the three theme papers to be read at the Seventh International Round Table for the Advancement of Counseling at the University of Wurzburg, Germany, April 10-15. Dr. Herr, immediate past-president of the Association for Counselor Education and Supervision and author of nine books and more than 100 articles dealing with counseling and career development, will address the topic, "Does Counseling Work?" He will also serve as consultant to an interdisciplinary seminar on the future of counseling to be conducted at the Round Table. During the summer term, Dr. Herr has been invited to serve as Visiting Scholar at the National Institute for Careers Education and Counseling, Cambridge, England, and at the Centre for Advenced Studies in Counseling, London.

"Montsouris 1975," an intaglio print by Harold Altman, professor of art, received a gold medal for the Best in Show award at the National Arts Club Graphics exhibition.

Funding opportunities

For further information, call 865-1372

(218-2) NIMH has announced that new or supplemental **mental health continuing education grant applications** are due April 15. Single or consortium-type applications are excepted. Priority goes to those applications that closely link educational and service agencies. Projects supported include: system resources development, pilot programs, special areas training and special projects. The program contact number is 301-443-4735 (Ref C&U 362 - NIMH Announcement)

(218-3) The Office of Education has announced proposed priorities and an April 23 deadline date for **Community Service and Continuing Education Programs.** Priorities include: programs paying attention to needs of women and older adults, regional or national problems of energy conservation, transportation and/or environmental pollution, demonstrations linking education, management and labor to problems of job security, productivity and working life quality, and career mobility. (Ref 41FR9246-0.08, 3/6/76) (CFDA 13.557)

(218-4) Funding possibilities and agency contacts for present and future projects are available through the PSU resource information service (M R Kahler, 865-1372). Projects processed include research, instruction and continuing education/public service. Sources searched include federal and state agencies, foundations, associations and industry. A selection of funding opportunities is also released in this column using selection criteria such as program emphasis, deadlines, program changes, program plans, funding actions and legislation.

(218-5) Final regulations have been issued by the Office of Education for its **Modern Foreign Language Training and Area Studies Program.** The program promotes research, study and training in foreign countries by U.S. teachers to improve their language skills and cultural knowledge. Visits by educational specialists from foreign countries for U.S. language training and area studies are also supported (Ref. 41FR10100-20, 3/9/76) (CFDA 13.438-441)

(218-1) The Office of Education has announced an April 16 deadline for small grants ($15,000) under its **Woman's Educational Equity Act Program (Feb. 20, #218-2) and a May 20** deadline for grant applications under that program (**pr applications** for general grants were due March 20) (Ref. 41FR10230-37, 3/10/76)

(218-6) The Office of Education announced an April 5 cutoff date for USOE Commissioner's receipt of written approvals from the State education agency (SEA) **Reading Improvement Project.** (Ref. 41FR10608, 3/12/76) (CFDA 13.533)

FELLOWSHIPS

(For additional information inquire at 317 Kern, 865-2514)

(218-8) Deutscher Akademischer Austausch dienst (DAAD) pre-dissertation fellowships — deadline April 2. (FO76-3)

(218-7) DAAD (ibid) three-month awards for recent U.S. Ph.D.s in social sciences — deadline April 10. (FO76-3)

University Park Calendar

March 25–April 4

Items to be included in this calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, March 25

Sports: Women's basketball, AIAW Tournament.

Workers Day "Student-Trade Union Conference," HUB assembly room and ballroom.

Commons Videotape, "The Willlemsburg File," 12 noon, Kern lobby.

Marine Corps Amphibious Warfare Presentation, 1 p.m., Schwab.

Thursday-Friday, March 25-26

Delaware County Campus 3rd Conference of the Colloquium for Social Philosophy, on "Revolution Revisited."

Friday, March 26

Sports: Women's basketball, AIAW Tournament.

GSA Coffeehouse, 8 p.m., Room 102 Kern.

Percussion Concert, 8:30 p.m., Music Bldg. recital hall.

Saturday, March 27

Faculty Women's Club social, 9 p.m., Room 102 Kern.

Annual Faculty-Staff-Grad Student Swim Marathon, beginning 7 a.m., Natatorium.

Sports: Women's basketball, AIAW Tournament. Finals at 2, 4, and 7 p.m.

Sunday, March 28

Chapel Service, 11 a.m., Eisenhower Chapel. A reflection through word, song and dance by Tanner, Coleman, Boyer and the University Chapel Choir.

Black Christian Fellowship worship service, 11:15 a.m., Eisenhower Chapel. Elder John Loyd Jr., Black Christian Fellowship Mass Choir.

Colloquy program, "White Roots of Peace: Tracing Our Indian Heritage," 1-5:30 p.m., 1st floor HUB.

Shavers Creek Nature Center, Indoor House Plant Workshop, 3 p.m., Mineral Industries Bldg., Stone Valley.

Katherine Kelto, oboe, 3:30 p.m., Music Bldg. recital hall.

The Hampton Institute Choir In Concert, 3 p.m., Schwab.

Monday, March 29

Joan Kennedy, "A Christian In the Arts," lecture-demonstration, 7 p.m., Eisenhower Chapel.

The Duke Ellington Orchestra In Concert, 8 p.m., University Auditorium.

Ronald Renshaw, tuba, 8:30 p.m., Music Bldg. recital hall.

Tuesday, March 30

Paul Harrison, "The Dramatic as Ethical," lecture-discussion, 7 p.m., Eisenhower Chapel.

Ciarlan Percussion Ensemble, 8:30 p.m., Music Bldg. recital hall.

Wednesday, March 31

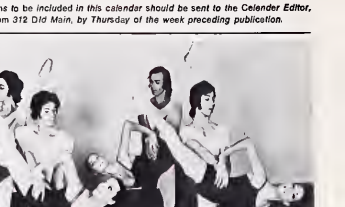
Father Vincent Crosby, "The God-Men Language," lecture-demonstration, 7 p.m., Eisenhower Chapel.

International Student Celebration, 6 p.m., HUB north lounge.

FSHA 410 dinner, An Ancient Roman Feast — dining in the style of Augustus, Maple Room, Henderson Human Development. Reservations required, 865-7441.

University Theatre, "When You Comin' Back, Red Ryder," 8 p.m., Pavilion Theatre.

David Brooks, violin, 8:30 p.m., Music Bldg recital hall.



Thursday, April 1

Commons Videotape, "Asleep and the Wheel and Leon Redbone," 12 noon, Kern lobby.

Sports: Men's golf, vs. Villanova, 1 p.m.

GSA Garden Plot Workshop, 7:30 p.m., Room 112 Kern.

University Theatre, "When You Comin' Back, Red Ryder," 8 p.m., Pavilion Theatre.

The Pennsylvania Ballet will perform April 2 and 3.

Friday, April 2

Folk and Square Dance Roundup, 7:30 p.m., White.

Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Artists Series, Pennsylvania Ballet, 8:30 p.m., University Auditorium.

Michael Powell, trombone, 8:30 p.m., Music Bldg. recital hall.

Saturday, April 3

Sports: Men's golf, vs. Navy, 1 p.m.

University Theatre, "When You Comin' Back, Red Ryder," 8 p.m., Pavilion Theatre.

Artists Series, Pennsylvania Ballet, 8:30 p.m., University Auditorium.

Sunday, April 4

Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Henry H. Mitchell, Ecumenical Center for Black Studies, Claremont, Cal.

Black Christian Fellowship worship service, 11:15 a.m., Eisenhower Chapel. Rev. Darry L. Miltner, the Jerry Loyd Ensemble.

Sports. Men's baseball, vs. Ithaca, 1 p.m.

Artists Series, An Afternoon with the Pennsylvania Ballet, 3 p.m., University Auditorium.

Colloquy program, Julian Bond, Georgia State Senator, on "Collision Course In a Divided America," 8 p.m., University Auditorium.

Seminars

Thursday, March 25

Ceramic Science, 11 a.m., 301 M.I. Dr. R. Carter, General Electric R&D, on "Mechanism of Pellet Pressing Flow."

Chemistry, 12:45 p.m., Room 333 Whitmore. William A. Chupka, Yale University, on "Photoionization of Gases and Studies of Chemionization and Ion-Molecule Reactions."

Physics, 3:30 p.m., Room 117 Osmond. Dr. Morton Sternheim, University of Massachusetts, on "Pion-Nucleus Interactions."

Air Pollution Control, 2:20 p.m., Room 145 Fenske. James W. Chester, Department of Environmental Resources, Wilkes-Barre, on "Lead Contamination — a Case History."

Agronomy, 4 p.m., Room 111 Tyson. Larry Hoover — Soil Inventory System for Land Use Planning."

Mathematics, 4 p.m., Room 116 McAllister. Thomas Starbird, University of Illinois, on "Operators at L^1"

Microbiology and Cell Biology, 4 p.m., Room 52 Frear. Reinaldo F. Gomez, nutrition and food science, MIT, on "DNA Damage and Repair in Thermally Injured Salmonella Typhimurium."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Dr. Jerome Spar, earth and planetary sciences, City University of New York, on "Response of the Atmosphere to Sea Surface Temperature Anomalies."

Computation Center, 7:30 p.m., Room 108 Forum. APL (4).

Geosciences, 11 a.m., Room 244 Deike. Dr. Yoshio Takeuchi, University of Tokyo, on "Crystal Chemistry of Silicate Minerals."

Physical Chemistry, 4 p.m., Room 333 Whitmore. Dr. Hartzell, biochemistry.

Friday, March 26

Veterinary Science, 3:45 p.m., Room 101 Althouse. J. Michael Kehoe, Mt. Sinai School of Medicine, on "Constraints on Variable Region Diversity In Antibodies ot Different Species."

Monday, March 29

New Communities, Architecture, 2 p.m., Room 208 Sackett. Paul Rasmussen, Department of Transportation, Washington, D.C., on "Planning of Transportation Systems and Their Maintenance in Arid Regions."

Organic Chemistry, 8 p.m., Room 333 Whitmore. Dieter Seebech, Justus Liebig University, West Germany, on "Novel Routes in C-C Bond Forming Reactions."

French, 8 p.m., Room 112 Kern. William M. Frohock, Harverd University, on "Jean-Jacques, Starobinski and the Picaresque."

Tuesday, March 30

Analytical Chemistry, 12:45 p.m., Room 445 Davey. J. E. Campana on "Computer Coupled Mass Spectrometers."

Comparative Literature, noon, State College Hotel. William M. Frohock, Harvard University.

Solid Waste, 2:20 p.m., Room 140 Fenske. Todd Giddings, Todd Giddings Consulting Hydrogeologists, State College, on "Eastern Diversified Corp. Environmental Impact of Bell Telephone Wastes."

Biochemistry and Biophysics, 4 p.m., Room 101 Althouse. Robert Matthews, chemistry, on "NMR Studies of Reversible Conformational Changes in Proteins."

Entomology, 4 p.m., Room 204 Patterson. James G. Kosteic, Ph.D. candidate, chemistry, on "A Sex Attractant of the Mushroom Fly, "Lycoriella mali" (Fitch) (Diptera: Sciaridae): Isolation, Identification, and Possible Origin."

Inorganic Chemistry, 8 p.m., Room 333 Whitmore. James Hoeschele, Engelhard Industries, on "Selected Aspects of the Chemistry of Antitumor Compounds."

English, 8 p.m., Room 101 Kern. William M. Frohock, Harvard University, on "Neo-Picaresque, Black Humor, Grotesque."

Wednesday, March 31

Operations Research Program, 2 p.m., Room 362 Willard. George B. Dantzig, C. A. Criley Professor of Transportation in Operations Research and Computer Science, Stanford University.

Fuel Science, 4 p.m., Room 301 Mineral Industries. Michael Boretsky, Office of Policy Development, U.S. Department of Commerce, on "Energy Conservation: Its Potentialities and Limits."

Thursday, April 1

Chemistry, 12:45 p.m., Room 333 Whitmore. Lauri Vatska, Clarkson College of Technology, on "Dioxygen-Metal Complexes."

Air Pollution Control, 2:20 p.m., Room 145 Fenske. Peter Preuss, Environmental Protection Service, Trenton, N.J., on "Air Pollution Control and Economics — New Jersey and Israel."

Meteorology, 4 p.m., Room 26 Mineral Sciences. James Frend, chemistry, Drexel University, on "The Global Atmospheric Nitrogen Cycle and Ozone."

Agronomy, 4 p.m., Room 111 Tyson. Roy Sjoblad on "Polymerization of Aromatic Compounds by a Phenol Oxidase from the Fungus 'rhizoctonia praticola'."

Engineering Mechanics, 4 p.m., Room 152 Hammond. Prof. Y. Weitsman, The Technion, Israel, on "Wave Propagation in Fiber Reinforced Materials."

Friday, April 2

Physics, 3:50 p.m., Room 117 Osmond. P.J. Stiles, Brown University, on "Quesi-Two-Dimensional Electron Systems."

Lectures

Thursday, March 25

Priestley Lecture, Henry Taube, Stanford University, on "Manifestations of Back-Bonding in the Chemistry of Ruthenium and Osmium Ammines," 3 p.m., Room 108 Forum.

Terrance Nearey, University of Connecticut and Haskins Lab., on "Acoustic Features of Vowels," 7:30 p.m., Room 351 Moore. Sponsored by the Department of Speech Communication.

Monday, March 29

History of Photography Week, Robert Doherty, director International Museum of Photography, George Eastman House, on the work of Lewis W. Hine, 8 p.m., Zoller Gallery.

Tuesday, March 30

Cottage of Engineering lecturer, Robert C. Stempel, Chevrolet Engineering Center, on "The Automotive Future — What's Next?", 4 p.m., Schwab.

Sociology Lecture Series, Dr. Robert Bellah, Ford Professor of Sociology and Comparative Studies, University of California, Berkeley, on "Civil Religion and the Crisis of the Republic," 2:45 p.m., Room 112 Kern.

Central Pa. Archeological Society, David Thompson, University of Georgia, on "Antinoes at Antinoopolis," 8 p.m., Room 112 Kern.

Wednesday, March 31

History of Photography Week, James Borcoman, curator of photography, National Gallery of Canada, on "Cheries Negre' The Painter as Photographer," 8 p.m., Zoller Gallery.

Berks Campus Lecture Series, Dr. William Powers, Livingstone College, Rutgers University, on "Contemporary Music and Dance," 8 p.m., Berks Campus.

Thursday, April 1

York Campus Lecture Series, Dr. Pauline Maier, University of Massachusetts-Boston, on "Understanding the Revolution," 3 p.m., York Campus.

Paul Zawadski, University of Iowa, on "Cinefluorographic Study of /r/ Articulations," 8 p.m., Room 73 Willard. Sponsored by the Department of Speech Communication.

Friday, April 2

Sir Edward Bullard, Cambridge University, on "The Floor ot the Deep Sea," 3:55 p.m., Room 22 Deike. Sponsored by the Graduate School and the Department of Geosciences.

History of Photography Week, Dr. Heinz K. Henisch, Professor of the history of photography, on "The Painterly Photograph and the Photographic Painting," 8 p.m., Zoller Gallery.

Films

Saturday, March 27

Hillel Foundation, "Diary of Ann Frank," 8 p.m., HUB assembly room.

Monday-Tuesday, March 29-30

Free Shakespeare film, "Romeo and Juliet" (Academy of Dramatic Art), 6:30 p.m., Room 101 Chambers.

Tuesday, March 30

Artists Series film, "La Dolce Vita," 8:30 p.m., University Auditorium.

Wednesday, March 31, and Friday, April 2

Commonsplace Theatre, "To Have end Have Not," 7:30 and 9:30 p.m., Room 112 Kern.

University schedule

Monday-Wednesday, March 29-31

File for Pass/Fail.

Wednesday, March 31

Drop deadline.

Preregistration deadline.

Course Repeat deadline.

Exhibits

Museum of Art: Recent Works by Stuart Frost.

Zoller Gallery: Stuart Frost in Retrospect, until March 27. Invasions, opening March 28. Lewis W. Hine, photography, celebrating History of Photography Week 1976.

Kern Gallery: "Afterimages" (photo journalism), until March 31. Logan Harrison, photography. W. C. Handy Jazz Exhibit, opening April 1.

Cultural Center, Walnut Bldg.: African Art and Paintings, March 28-April 4.

Chambers Gallery: Art Alliance Juried Exhibit, all media, opening March 29.

HUB (Main Lounge): Americana in the Netherlends (Norwegian Information Service).

HUB Gallery: Selections from the Permenent Collection at the Museum of Art.

212A Arts Bldg.: Photography exhibit, old photographs of Indians.

Room 221 Carnegie: "Robert Joyce: Photographs of the Turbulent '60s."

Pattee Library: Main Lobby — "The Library: Past, Present, and Future" by Lee Stout, Penn State Collections, until March 29. "The Ukranian Heritage in North America" by W. D. Lucow, opening March 30. East Corridor Gallery — Drawings and Paintings by Janet Gallagher, until March 29. "The Work of Wendell MacRae," photographer, opening March 30. Lending Services Lobby — "Portraits" by Sally Alexander. Rere Books Room-19th century miscellany: daguerreotypes, tintypes, and albums.

Arts roundup

History of Photography Week

History of Photography Week 1976, March 28 through April 3, will be marked at the University by three gallery factures in Zoller Gallery, five spacial exhibitions and two concurrent student photography shows.

The principal exhibition will be a show of the work of Lewis W. Hine, sociologist, social reformer and noted photographer, in Zoller Gallery. Lecturing on Hine's work at 8 p.m. Monday, March 29, will be Robert Doherty, director of the International Musaum of Photography at George East-

Hine's "Pennsylvanie Coal Miner."

man House, Rochester, from which the exhibit is on loan. "Charles Negre: The Painter as Photographer" will be the subject of a talk by James Borcoman, curator of photography at the National Gallery of Canada, at 8 p.m. Wednesday, March 31. Negre, who was a 19th century French artist, used photographs as studies for his paintings. Dr. Heinz K. Henisch, professor of the history of photography at Penn State, will lecture on "The Height of Flattery: The Painterly Photograph and the Photographic Painting" at 8 p.m. Friday, April 2.

In addition to the Hine exhibit, which includes photographs of the Empire State Building's construction, Ellis Island immigrants, and other early 20th century social documentations, old photographs of Indians from the Southwest will be displayed in 212A Arts Bldg. In Pattee Library, photographs by Wendell MacRae will be shown in the East Corridor Gallery and a 19th century miscellany, including daguerreotypes, tintypes, and albums, will be exhibited in the Rare Books Room. "Robert Joyce Photographs of the Turbulent '60s" will be on view in Room 221, Carnegie Bldg. These photographs and those by Wendell MacRae are from the photographers' personal archives in Pattee's Rare Books Room. In two concurrent shows of modern photographs, "Invisions," work by art faculty and students, will be exhibited from March 28 through April 10 in Zoller Gallery, and "AfterImages," by students of photojournalism, is on view through April 10 in Kern Commons Gallery.

History of Photography Week at the University is supported by the Institute for the Arts and Humanistic Studies. The program was arranged by Dr. Henisch in cooperation with University faculty and staff members Gerald Lang, Edward Leos, Marc Hessel, Charles Mann, Gregory Ramsey and David Rubetto.

Pennsylvania Ballet to perform

The Pennsylvania Ballet, which is well known to local audiences from its residency during the past two Nittany Mountain Summers, returns to campus Friday and Saturday, April 2 and 3, under the auspices of the Artists Series. It will perform at 8:30 p.m. in University Auditorium and also offer a special program, "An Afternoon with the Pennsylvania Ballet," at 3 p.m. Sunday, April 4, in the auditorium.

On April 3, the 38 dancers in the company, which has its own orchestra, will present Hans van Manen's "Opus Lemaitre," based on Bach's "Toccata and Fugue in D minor"; the Grand Pas de Deux from Tchaikovsky's "Nutcracker"; "Continuum," choreographed by Benjamin Harkervy to music by Jan Krzywicki; and George Balanchine's "Raymonda Variations," based on the music by Alexandar Glazounov.

Mr. Harkarvy, artistic director of the company, will provide commentery on the inner workings of a ballet troupe, assisted by the dancers, at the afternoon program.

Tickets for the April 3 performance (the April 2 program was sold out by subscription) will go on sala from 9 a.m. to 4 p.m. Tuesday, March 30, at the HUB booth and University Auditorium. Tickets for the Sunday afternoon program will be available one hour prior to the presentation at a charge of $1.

Percussion concerts

The first percussion concerts at the University in recent years will be performed by a dual ensemble of Penn State and Susquehanne University music students on Friday, March 26, and by the Clarion State Collage Percussion Ensemble on Wednesday, March 30, both at 8:30 p.m. in the Music Bldg. recital hall.

Timpani, snares, bongos, xylophone, marimba, vibraphone, bells, cymbals, gongs and tambourines are among the instruments to be heard in the concerts, which are manifestations of a recent and growing revival of interest in percussion music.

According to Richard C. Gipson, director of the duel ensembla, composers have recently become increasingly alert to the colors and timbres which percussion instruments are capable of producing and are writing more for this medium as a result. Mr. Gipson, music instructor and assistant band director at Central Missouri State University, is currently completing residence requirements for the doctorate in music education at Penn State

The dual ensemble program consists of 12 works with a maximum performance time of ten minutes. Among these works are two by welt-known percussion composer Michael Colgrass of New York.

WPSX highlights

The role of sports in American culture and how sports are influenced by society are discussed on Thursday, March 25, at 7:30 p.m. The program, produced by WPSX in cooperation with the Institute for the Arts and Humanistic Studies, features Joe Paterno, former CBS sports commentator Heywood Hale Broun, former Penn State and professional football player Mike Reid, associate professor of English Robert Weaver, associate professor of philosophy Alvin Goldman, and USC professor emerita of physical education Eleanor Metheny.

The lives and writing of six men of faith are examined on **The Third Testament**, premiering Sunday, March 28, at 4 p.m. Malcolm Muggeridge hosts the series, focusing on writers which may be considered a "third testament" for modern times. The series begins with an hour-long look at the contributions of Augustine, who gave the church new direction after the fall of Rome. Future programs will focus on Pascal, Blake, Tolstoy, Kierkegaard and Bonhoeffer.

The future of woman's sports is spotlighted on **Talkabout** Monday, March 29, at 10 p.m. Host Fran Fisher interviews participants in the Association of Intercollegiate Athletics for Women's national basketball championships. **Talkabout** may also be seen Tuesday, March 30, at 3 p.m. and Saturday, April 3, at 1:30 p.m.

Eight Pennsylvania state legislators will answar questions from public television viewers around the state on **Pennsylvania Hotline** Wednesday, March 31, at 9 p.m. Schaduled to appear on the live program are party leaders from both the House and Senate and from the Appropriations Committees of both houses. Viewers are invited to call in questions collect: (717) 534-2511.

The ethnic variety of Pennsylvania's citizenry and the contributions to Pennsylvenia's culture made by various ethnic groups are the focus of **Pennsylvanie: An Ethnic Portrait**, a five-part series premiering Thursday, April 1, at 7:30 p.m. The first program explores the religious and culturel heritaga of the Quekers, Germans and Scotch-Irish.

News in brief

Harvard Professor visiting

Dr. William M. Frohock, professor of romance lenguages at Harvard University, will be in residence at University Park from Sunday, March 28, to Friday, April 2, under the sponsorship of the Institute for the Arts and Humanistic Studies.

He will give a public lecture, "Jean-Jacques, Starobinski and the Picaresque" at 8 p.m. Monday, March 29, as a Department of French colloqulum. He will address the Comparative Literature luncheon at noon on March 30 in the State College Hotel and speak to the English Colloqulum at 8 p.m. in Kern Bldg that same evening on "Neo-Picaresque, Black Humor, Grotesque."

Dr. Frohock, who received his Ph.D. from Brown in 1935, taught at Columbia and Weslayan bafora going to Harvard, where he served as department chairman for several years. He is the author of "Andre Malraux and the Tragic Imagination," "Stranger to This Ground," "Rimbaud's Poetic Practice" and "Style and Temper."

Archaeological address

Dr. David L. Thompson, professor of classics at the University of Georgia in Athens, will address the Central Pennsylvania Chapter of the Archaeological Institute of America at 8 p.m. Tuesday, March 30, in Room 112 Kern Bldg. on "Antinoos at Antinopolis." Prof. Thompson is a classical art historian with specialized interests in the sculpture of the Roman Empire in the East. In addition to his editorial duties for "Archaeological News," he has written a monograph on mummy portraits of the Roman period in Egypt and contributed a number of articles to various scholarly journals. In his illustrated public lecture, he will examina the life and death of the Emperor Hadrian's favorite, Antinoos, and his unique position in human history. The discussion will be developed in the context of the excavations at Antinopolis, a town in Middle Egypt founded by the bereaved emperor to commemorate his deceased companion.

Auto future is talk topic

"The Automotive Future — What's Next?" will be the topic of a talk presented by Robert C. Stempel, director of engineering, Chevrolet Engineering Center, Warren, Mich., and the College of Engineering's 1976 honorary engineering lecturer, at 4 p.m. Tuesday, March 30, in Schwab Auditorium. Mr. Stempal will consider in detail the impact of current and future regulations on the design of vehicles and examine the requirements necessary to meet future stringent emission standards.

Dantzig to speak March 31

The Program in Operations Research will present Prof. George B. Dantzig at its inaugural colloquium at 2 p.m. Wednesday, March 31, in Room 362 Willard Bldg. Prof. Dantzig, internationally renowned for his work in linear programming, is the C. A. Criley Professor of Transportation in Operations Research and Computer Science at Stanford University. He received a B.A. in mathematics and physics from the University of Maryland, a M.A. in mathematics from the University of Michigan, and a Ph.D. in mathematics from the University of California, Berkeley. From 1960 to 1966, Prof. Dantzig was chairman of the Operations Research Center and a professor at Berkeley. He is the author of over 100 publications in operations research, statistics and biomathematics. The public is invited to attend the talk.

Civil religion lecture

"Civil Religion and the Crisis of the Republic Today" is the title of a public lecture to be dalivered by Prof. Robert N. Bellah at 2:45 p.m. Tuesday, March 30, in Room 112 Kern Bldg. The lecture is sponsored by the Department of Sociology as part of its Continuing Education program.

Dr. Bellah is Ford Professor of Sociology and Comparative Studies at the Berkeley Campus of the University of California. An internationally recognized scholar in the sociology of religion, he has authored numerous essays and monographs.

Research pool names solicited

The following announcement was prepared by the University's Employment Division:

The University annually receives grants for projects designed to fulfill specific research responsibilities.

Such research grants or projects are normally of fixed duration and sometimes relatively short duration. In most instances, University project administrators must react quickly in making selections of staff personnal for their projects. Therefore, it is desirable to have an available pool of faculty and staff members who are interested in applying for such research staff positions.

This announcement is made so that qualified individuals may make their interests known. The types of research staff positions typically available are: Senior Project Associate, Project Associate, Project Assistant, Senior Research Technologist, Research Technologist and Research Technician.

The types of discipline backgrounds required vary depending on the projects involved. They may include physics, engineering, agriculture, mathematics or chemistry, but are not limited to these areas.

If you apply, your name will be placed in the pool of candidates that will be considered as such opportunities arise. An announcement similar to this will be made each six months.

If you feel that you are interested in and have a background related to typical University research projects, you may apply now or in the future for such research support staff positions by calling the University's Employment Division, 865-1387 (network 475-1387).

Religion-arts week

(Continued from page one)

studies, a lecture-discussion on "The Dramatic as Ethical," 7 p.m., Eisenhower Chapel.

International Student Celebration, 8 p.m., HUB north lounge.

Wednesday, March 31

Father Vincent Crosby, O.S.B., lecture-damonstration on "Art: The God-Man Language," 1 p.m., Eisenhower Chapel.

In conjunction with these activities, several art exhibits have been scheduled during Religion and the Arts Week. Native African art and paintings will be on display in the Cultural Center, Walnut Bldg., from 9 a.m. to 9 p.m. March 28-April 4. Native American Indian art will be shown on the first floor of the HUB, and there will be a display of Navajo blankets in Eisenhower Chapel. On Wednesday, March 31, Father Crosby's work with fibers and fabrics may be seen in the Eisenhower Chapel's multi-purpose room.

Retirement policy

(Continued from page one)

uation is made by the President of the University. Any continuation is considered on a year-to-year basis and is approved only when deemed in the best interest of the University. A person becomes ineligible for any employment after age 70.

Trustees were advised that during the five-year period, July 1, 1970, to June 30, 1975, continuations were authorized in only 14 cases.

Trustee actions

(Continued from page one)

—Agreed to an increase in rental charges at University Manor, which provides 248 student-house officer apartments on the Hershey campus adjacent to the teaching hospital.

—Authorized added fuel oil storage facilities at Hershey.

Drama openings

There are still openings in the creative drama classes sponsored by the Department of Theatre and Film for children enrolled in morning kindergarten and fifth end sixth grades. Kindergarten age children attend class from 2:30 to 3:15 p.m. and older youngsters from 3:45 to 4:45 p.m., both in Room 6, Arts Bldg. Registrations may be made by calling 865-7586. Classes focus on developing the child's creativity rather then on technical theatrical training.

Double major under review

The University Faculty Senate will consider at its April 6 meeting recommendations on revision of policies on multiple degree programs and double majors.

The changes are recommended by the Senate Committee on Undergraduate Instruction which withdrew its March 2 report for further revision. The current policies were originally passed in the 1950s and were revised in 1966 and 1973.

In its report, the Committee says that the completion of simultaneous degrees and double majors applies to "a small but important portion" of the total graduating class.

It notes that in the year beginning May, 1975, and ending March, 1976, 7,550 baccalaureate degrees were granted by Penn State (excluding Capitol Campus). In this period 75 simultaneous degrees and 59 double majors were completed.

In making a study of the situation, the Committee found academic merit in, and recommends, establishment of a mechanism for allowing simultaneous degrees for associate degree programs.

According to the Committee report, a double major is different from a simultaneous degree in that it may be acquired by completing only the major requirements for the secondary major and that no additional credit requirements are necessary. The Committee said it believes that to acquire more than one academically viable degree additional credits must be required.

"Although considerable sentiment was expressed to phase out the double major in preference to the simultaneous degrees," the report says, "the small but important usage of the double major in certain areas of the University (especially for teacher certification and for certain programs in the College of the Liberal Arts) causes the Committee to recommend retention of double major programs.

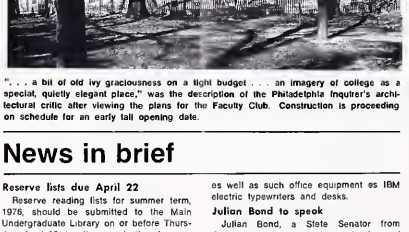
"However, changes in the wording of the policies to clearly define and differentiate between them must be proposed."

Among changes recommended for double majors is that candidates satisfactorily completing double majors shall receive one diploma for the primary major. The final academic record will indicate the completion of the requirements for the second major.

In other business, the Senate will receive a proposal for doing away with grades for proficiency examinations and e recommendation on prerequisites.

It also will:

—Receive an informational report on tuition reduction.



—Receive an informational report on research program review.

—Hear a report from its Subcommittee on Grading.

—Hear a progress report on the Penn State Faculty Club.

Vietnam described

"Vietnam Since the American Withdrawal" will be discussed by Dr. Thomas Hoskins, a Quaker Service worker recently returned from Vietnam at 3:30 p.m. Tuesday, April 6, in the HUB auditorium. The talk is sponsored by the Southeast Asia Studies Committee and Colloquy. A physician, Dr. Hoskins went to South Vietnam in July, 1973, under appointment from the American Friends Service Committee to help civilians disabled by the war. He remained until October, 1975, six months after the Communist take-over, working in Da Nang and later in Saigon.

". . . a bit of old ivy graciousness on a tight budget . . . an imagery of college as a special, quietly elegant place," was the description of the Philadelphia Inquirer's architectural critic after viewing the plans for the Faculty Club. Construction is proceeding on schedule for an early fall opening date.

News in brief

Reserve lists due April 22

Reserve reading lists for summer term, 1976, should be submitted to the Main Undergraduate Library on or before Thursday, April 22, to allow ample time for processing. Lists received after the deadline will be accepted only if material requested is not needed until the beginning of the third week of classes; all reserve lists will be processed strictly in order received. The April 22 deadline provides a reasonable amount of time to order books and to prepare available materials for reserve use.

Only required readings, which will circulate either for a two-hour period or for an overnight loan period, will be placed on reserve. Typewritten lists should be submitted on reserve forms which are available by mail or in person from the Undergraduate Library, W11 Pattee. Faster service can be provided for books which need to be ordered if the publisher, date of publication and price are included on the list.

Borosh Award nominations asked

Nominations have been requested for the 1976 Barash Award for Human Service. The award, created last year by the family of the late Sy Barash, will be presented to a full-time member of the faculty, staff or student body who has contributed most, apart from regular duties, to human causes, public service activities and organizations, or the welfare of fellow humans. Mr. Barash, a 1950 graduate of Penn State who died last year, was a State College businessman who devoted much of his energy and leadership to human causes. Deadline for nominations for the $1,000 award is Monday, April 5. Supporting statements should be included. Send nominations to Prof. Della Durant, chairman of the nominating committee, Room 113 White Bldg.

Penn State Room open Saturdays

The Penn State Room will be open Saturdays from 9 a.m. to 1 p.m. this spring term, in addition to its regular Monday through Friday, 8 a.m. to 5 p.m. hours. Saturday openings began March 13 and will continue to the end of the term.

University ouction April 3

There will be a public auction starting at 10 a.m. Saturday, April 3, at the University's Salvage and Surplus Warehouse. A number of fleet automobiles will be sold es well as such office equipment es IBM electric typewriters and desks.

Julian Bond to speak

Julian Bond, a State Senator from Georgia, who has been in the forefront of the New Politics movement, will speak on "Collision Course in a Divided America" at 8 p.m. Sunday, April 4, in University Auditorium.

His talk is sponsored by Colloquy, and admission is free.

Now 36 years old, Mr. Bond first came to public attention es a student at Morehouse College where he helped found the Student Non-Violent Coordinating Committee. He was elected to the Georgia House of Representatives in 1965 but was barred from taking his seat by legislators who objected to his anti-Vietnam war statements. He was eventually seated in 1967 after a U.S. Supreme Court decision in his favor. After serving four terms in the House he was elected to the Senate in 1974.

During the 1968 Democratic National Convention in Chicago, Mr. Bond led an insurgent group from Georgia and was nominated for Vice President.

Berks Appreciation Doy

The Berks Campus of the University will observe its first "Appreciation Dey" In celebration of the public opening of its new library building Sunday, April 4. Dr. Harold W. Perkins, Campus director, says the event is designed to solute all citizens in the Campus service area who have helped Penn State become an integral end vitel part of the community.

An open house of the library and other buildings at the Campus will be held. Among other events scheduled throughout the afternoon are the unveiling of the "Pennsylvania Lion," a gift to the Berks Campus sculptured by Ateko Kyriakos, and a talk by Charles W. Menn Jr., head of special collections at Pattee, on "Some Words for Books."

Gomes, gym closses begin

Games end educational gymnastics classes for children of University faculty and staff will egain be offered by the College of Health, Physicel Education and Recreation in White Bldg. Classes will meet from 4 to 5 p.m. Thursday afternoons beginning April 1 end continue through May 13. Children in grades kindergerten through fourth ere eligible to attend, and registration will teke place the first dey of class in White Bldg.

Self-study report ready

Faculty members are invited to inspect copies of Penn State's newly issued Self-Study Report, prepared for an evaluation team of the Middle States Association of Colleges and Secondary Schools.

The team will arrive et Penn State for e four-day visit Sunday, April 4, to conduct the 10-year reaccreditation review of the University.

Only about 400 copies of the report have been printed. At University Park, copies are available for review at the Senate office, Pettee Library and the Deans' offices. The Deans' offices and the libraries at Behrend College, Capitol Campus and Hershey have copies, as do the Directors' offices and libraries at each Commonwealth Campus and the King of Prussie Graduate Center.

The evaluation team will use the report as the basis for its review of the University. It consists of five sections: (1) general information about the University; (2) a review of the implementation of the 1972 Academic Policy Plan; (3) the process of undergraduate and graduate program review; (4) a review of the recent efforts to strengthen faculty participetion in University governance; and (5) a review of the Commonweelth Campus Planning process.

The report was prepared under the direction of a committee appointed by President Oswald. Its members include: Vernon V. Aspaturian, Evan Pugh Professor of Political Science; James B. Bartoo, dean of the Graduate School; John J. Cahir, associate professor of meteorology; Robert E. Dunham, vice president for undergraduate studies; Floyd B. Fischer, vice president for Continuing Education; Stuert Forth, dean of University Libraries.

Also: Thomas G. Fox, dean of faculty, Behrend College; James E. Harf, ACE Fellow in Academic Administration, Richard A. Keppeler, associate professor of agricultural engineering; Margaret B. Matson, professor of sociology; Joe A. Miller, associate professor of human development; Patricia M. Overdeer, associate professor of mathematics, Ogontz; Stanley F. Paulson, dean of the College of the Liberal Arts.

Also: Robert G. Quinn, dean of academic instruction for Commonwealth Campuses; Sally S. Smali, chairman, University Faculty Senate, associate librarian, Berks; Robert M. Smith, associate provost; George D. Wolf, dean of faculty, Capitol Campus; and Evin Pettishall, Jr., professor, associate provost of health education, Hershey.

Stanley O. Ikenberry, senior vice president for University development and relations, served as chairmen of the committee.

Debate on Canada

Should Canada become the 51st state of the Union?

Debate teems from the University of Toronto and Princeton University will argue this question at 8 p.m. on Tuesday, April 6, in Room 112, Kern Graduate Bldg.

The public debate, which will encourage audience participation, is sponsored by the Kern Graduate Commons and the Penn State Department of Speech Communications.

It is the first in a planned monthly series of parliamentary debates, called Commongrounds, which will attempt to rekindle a type of debate which stresses spontaneity and audience participation in discussion of current and emerging issues.

PENN STATE COLLECTION

Faculty notes

Dr. Satoshi Matsushima, professor of astronomy at the University, has been appointed head of the Department of Astronomy. He succeeds Dr. John P. Hegen, founder of the department, who retired last year as professor emeritus of astronomy.

A specialist in solor physics, the theory of stellar atmospheres, stellar spectroscopy and planetary astronomy, Dr. Matsushima joined the University faculty as e full professor in 1967.

A native of Japen, he previously served on the faculties of the University of Iowa, where he was director of the astronomy program and the observatory, and Florida State University. He became en American citizen in 1963.

In addition, Dr. Matsushima has been e visiting professor at the University of Tokyo and Tohoku University in 1974; a National Science Foundation visiting scientist at the Universities of Tokyo and Kyoto in 1965-66; a senior research fellow at the California Institute of Technology in 1959, 1960 end 1961; a consultant to the Naval Research Laboratory in 1963, a French Government Postdoctoral Fellow at the Dbservatory of Paris in 1955-57; and a Humboldt Fellow at Kiel University, Germany, in 1957-58.

He is e panel member of the evaluation board for NSF Fellows and research protposals and is a referee for papers contributed to the Astrophysical Journal and the European Journel of Astronomy.

The author of about 80 scholerly articles and a number of book chapters, he has supervised and developed the graduate program of the astronomy department at Penn State since 1968. He has also served on the University Faculty Senate.

Dr. Metsushima is a graduate of the University of Kyoto and holds a Ph.D. degree from the University of Utah and a D.Sc. degree from the University of Tokyo.

Dr. William J. Schrader, professor of accounting in the Department of Accounting and Management Information Systems, has been named head of the department. An authority in the area of financial accounting, he has been serving as acting department head since Feb. 1.

A native of Texas, Dr. Schrader joined Penn State's faculty in 1954 as an assistant professor of accounting. He earned his B.B.A. from Baylor University, his M.B.A. from Indiana University, and his Ph.D. at the University of Washington. He was an instructor in finance at Washington prior to coming here. From 1973 to 1975 Dr. Schrader held e Fulbright lecturehip in accounting at the University of Dar es Salaam, Tanzania.

Dr. Schrader's principal research is concerned with the formulation of theoretical models of financial accounting. He has served on the editorial board of The Accounting Review end on several committees of the American Accounting Association.

In addition to articles in the professional journals, he is co-author, with Dr. Robert Malcolm and Dr. John Winningham, of "Financial Accounting: An Input/Dutput Approach."

Dr. Peter C. M. Simons, who has been on the research staff of the Spelderholt Institute of Poultry Research, Beekbergen, The Netherlands, since 1963, is serving as visiting professor of poultry science at the University from Feb. 1 until Aug. 1. He will work with faculty members of the Department of Poultry Science on bone abnormalities and egg shell formation in poultry.

Dr. Mark Peaslee, assistant professor of history, chaired a session on "The Political Role of the Imperial Japanese Army in the 20th Century" at the 28th annual meeting of the Association for Asian Studies in Toronto, Canada, last month.

Dr. Steven Goldman, assistant professor of philosophy, is presenting a paper, "The Interpretation of Symbolic Devices in Judaic end Christian Thought," at the annual meeting of the International Society for the Comparative Study of Civilizations, which is being held at the University of Pennsylvania April 1-4.

A newly discovered mineral has been nemed brindleyite to honor **George W. Brindley,** professor emeritus of mineral sciences. The Commission on New Minerals and Mineral Names of the International Mineralogical Association has approved this name for a hydrous nickel aluminum silicate discovered end described by Dr. Zoran Maksimovic of the Department of Mining end Geology at the University of Belgrade, Yugoslevia. Dr. Maksimovic suggested calling the new mineral brindleyite as a lesting recognition of Dr. Brindley's pioneering research in nickel silicates — types of clays — which he has been conducting for more than five years. Brindleyite is described as a nickel-substituted analog of amesite. A member of the faculty from 1953 to 1973, Dr. Brindley received the Roebling Medal, the highest eward of the Mineralogical Society of America, in 1970. He remains active tin research in clay mineralogy.

Dr. Ernest B. Lowrie, associate professor of religious studies, has been nemed e Fellow of the National Humanities Institute, located at Yale University. He is one of 20 scholars from around the country selected to participate in the year-long colloqulum at Yale next year. The overall topic of the colloquium is "Values and Goals, Theory and Practice in Realization." Dr. Lowrie hopes to develop through his work an interdisciplinary set of courses in American Studies for Penn State. He also plans to write a series of articles on the development of the American mind. Author of "The Shape of the Puritan Mind," Dr. Lowrie joined the Penn State faculty in 1970. He received his B.A. at Baylor University and his B.D. and Ph.D. from Yale.

Dr. William Spackman, professor of paleobotany and director of the Coal Research Section in Earth and Mineral Sciences, has received the Joseph Becker Award of the Iron and Steel Division of the Iron and Steel Society of the American Institute of Mining, Metallurgical, and Petroleum Engineers. Presentation of the award was made March 30 at a luncheon at the Society's meeting in St. Louis, Mo. It recognizes Dr. Spackman's contributions to the advancement of the technology of the coking process through his research in the field of coal petrology.

Dr. H. L. Barnes, professor of geochemistry, has been appointed by the president of the National Academy of Sciences to serve as vice-chairmen of the U.S. National Committee for Geochemistry. Recently, he lectured on geothermal energy problems at a workshop sponsored by the National Science Foundation at Stanford University and at the University of California's Lawrence Livermore Laboratory. At the laboratory, he also served as a reviewer of geothermal programs being conducted with the support of the Energy Resources Development Administration.

Dr. Wilbur Zelinsky, professor and head of the Department of Geography, recently presented a seminar entitled "Are We Becoming More Alike? Cultural Convergence in the U.S." to the faculty of the Department of Geography at Northwestern University. He also gave a lecture on "Population and the World Food Crisis" at a conference on "Ethics In Crisis" at Kutztown State College.

Dr. John L. Lumley, Evan Pugh Professor of Aerospace Engineering, is presenting three seminars on Computational Modeling of Turbulence. The first was held Jan. 22 in the Department of Aerospace Engineering Sciences, University of Colorado. He will also speak April 5 in the University of Virginia's Department of Engineering Science and Systems; and April 29 in the Department of Chemical Engineering, University of Delaware.

Dr. Barnes W. McCormick, professor and head of the Department of Aerospace Engineering, gave a talk at Notre Dame March 31 on "The Generation of Lift at Low Speeds." On April 9, he will participate in a short course on airfoil technology at the University of Texas, Arlington, where he will speak on "The Fundamentals of Cavitation and Hydrofoil Technology."

Beverly Martelli Renford has been named assistant librarian in the Undergraduate Library. She has a BEd from Medaille College, Buffalo, and M.Ed. in mathematics education from SUNY, Buffalo, and an M.L.S. from Western Michigan University.

Dr. John A. Dutton, professor of meteorology, is the author of e new book, "The Ceaseless Wind, An Introduction to the Theory of Atmospheric Motion," just published by McGraw-Hill.

The book develops the theory of atmospheric motion through the presentation of the mathematical concepts and physicel principles necessary to comprehend, explain and predict the processes involved in the larger-scale flow patterns of the atmosphere. Designed as e textbook for both the undergraduate and graduate levels, the book includes e discussion of modern research in atmospheric dynamics.

A member of the University faculty since 1965, Dr. Dutton is particularly interested in dynamic meteorology and atmospheric energetics. He is active in the University Corporation for Atmospheric Research, of which he is e trustee, and its National Center for Atmospheric Research at Boulder, Colo. Penn State is one of the 44 universities that make up the University Corporation.

Dr. Marshall H. Kaplan, associate professor of aerospace engineering, will participate in a panel discussion on "Conventional Launchers vs. Space Shuttle" at the 6th Communications Satellite Systems Conference, sponsored by the American Institute of Aeronautics and Astronautics in Montreal April 5-8. He will also chair the 1976 annual convention of the Engineering College Magazine Association April 2-3 in Washington, D.C.

Twelve faculty and staff members from the University are attending a conference on national aspects of policy making in Caracas, Venezuela, March 26 through April 1. The meeting is the third annual trilateral conference sponsored by the Political Science Department at Penn State; the Political Institute of Christian Albrichs University of Kiel, West Germany; and the Instituto de Estudios Suplores de Administration in Caracas.

Dr. Robert E. Dunham, vice president for undergraduate studies, made the opening remarks at the conference and met with Venezuelan officials during the visit to discuss possible exchange programs between Penn State and Venezuelen universities.

Seven Penn State faculty members presented papers. They were **Dr. Robert S. Friedman,** professor and head of the Department of Political Science; **Dr. Stanley A. Kochanek,** professor of political science; **Dr. Charles D. Ameringer,** associate professor of history; **Dr. Parris H. Chang,** associate professor of political science; **Dr. Ronald W. Johnson,** assistant professor of political science; **Dr. David J. Myers,** assistant professor of political science; **and Dr. Larry D. Spence,** assistant professor of political science. Among faculty attending the conference as a commentator were: **Dr. Vernon V. Aspaturian,** Evan Pugh Professor of Polltical Science; **Dr. Henry S. Albinski,** professor of political science; **Dr. Edward Keynes,** associate professor of political science; and **Dr. James Eisenstein,** associate professor of political science.

Three members of the Institute for Research on Land and Water Resources will present papers at the World Environment and Resources Council conference in Brussels, April 5 and 6. **Raymond W. Eyerly,** assistant professor of business logistics and assistant to the director of the Institute, is speaking on "An Exploration of Interstate Highway Interchange Communities as Sites of Future Human Settlements." **Hays B. Gamble,** professor of agricultural economics and associate director of the Institute, will present a paper on "Effects of Highway Noise in Highway Communities." This paper was written jointly with **Owen H. Seuerlender,** professor of economics and assistant director in charge of the regional analysis center at the Institute.

Two aerospace engineering faculty members presented papers at the 21st Annual Gas Turbine and Fluids Engineering Conference of the American Society of Mechanical Engineers last week in New Orleans. Associate Professor **Roger E. A. Arndt** co-authored a paper, "A Note on the Inhibition of Cavitation in Dilute Polymer Solutions," with **M. L. Billet,** research assistant at the Garfield Thomas Water Tunnel; **J. W. Holl,** professor of aerospace engineering; and **C. B. Baker,** graduate assistant at ARL. His second paper, "The Influence of Gas Content and Polyethelene Oxide Additive upon Confined Jet Cavitation In Water," was written with Mr. Baker and Dr. Holi. He also gave a third paper, "Cavitation on Model Propellers with Boundery Layer Trips." **Prof. Budugur Lakshminarayana** presented a report on "Three Dimensional Potentiel Flow and Effects of Blade Dihedral In Axial Flow Propeller Pumps" written with a former graduate student, R. W. Howells.

Research grants

Twenty-five research initiation grants ranging from $2,848 to $5,000 have been awarded to University faculty members from e fund approved by President Oswald for the encouragement and support of research and other creative work.

These awards are presented to faculty members from all areas who have a service accumulation of two calendar years or less by September, 1976.

An ad hoc committee appointed by R. G. Cunningham, vice president for research and graduate studies, consisting of Thomas F. Magner (cheirman), Gordon F. Debong, John C. Flanagan, Maurice E. Bell, Harold E. Mitzel and F. J. Remick (ex officio, non-voting) received and reviewed 74 proposals. Those receiving grants include:

M. M. Baltes and R. L. Burgess, biological health and individual and family studies — Loss of independence with aging a short-term longitudinal study.

N. A. Brance, academic curriculum and instruction — The development and investigation of instruments and procedures for the study of mathematical problem solving.

T. H. Carter, microbiology — Isolation of regulatory mutants of human adenovirus type 5.

R. A. Chadderton, civil engineering — An investigation of methods to improve the efficiency of water quality data collection.

R. J. Cline, speech (Hazleton) — An empirical analysis of the distributional and sequential structure characteristic of communication of groups and individuals making risky and cautious decisions.

T. H. Cook, general engineering (New Kensington) — Methods for the mechanical characterization of human skin in vivo.

G. H. Davidson, Pesticide Research Laboratory and Graduate Study Center — Pesticide metabolism.

J. De Rooy, economics (Capitol) — Measurement of regional economic development in the U.S. and impact multipliers of social overhead capital.

M. H. Green, biological health — Relationship of cholesterol absorption to dietary cholesterol and the type and load of dietary fat.

T. A. Hale, French — Pitot version of a dictionary of Africanisms in African literature of Western expression.

D. Hetel, theatre and film — Making of a 16 mm dramatic film on the life and ideas of Gifford Pinchot.

J. A. Kurland, anthropology — Sociobiology of the Barbary Macecque ("Macaca sylvana").

J. Lynch, statistics — On the relationship of the density function to its index of large deviation.

C. R. Matthews, chemistry — Studies on the mechanisms of folding of globular proteins.

K. Dseo-Asare, materiel sciences — Application of activity-activity diagrams to ammonia hydrometallurgy.

T. Sakurai, physics — Chemisorption study by an atom-probe FIM.

W. J. Sauer, sociology — Adjustment to old age: a cross-cultural study of aging in the U.S. and New Zealand.

A. F. Shapiro, insurance and real estate — A pension cost simulation model.

S. J. Shochat, surgery (Hershey) — Lymphocyte stimulation by solubilized human neuroblastoma antigens.

K. G. Steiner, forest resources — Genetic variation in bud-burst timing of trees, relationship to habitat climate.

R. E. Shute and R. St. Pierre, health education — In vivo essessment of individualized, multiple treatment procedures for the self control of smoking behavior.

M. A. Vannice, chemicet engineering — The effect of catalyst preperetion variables on the dispersion of supported metals.

S. J. Waltner, horticulture — In vitro studies of cell separation in apple fruit tissue.

E. J. Walsh, sociology — Occupational status and its effects on incumbents.

J. S. Wicken, biochemistry — A vitamin analysis of apples efflicted with corking.

University Park Calendar

April 1—11

Items to be included in this calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, April 1

Commons Videotape, "Asleep and the Wheel and Leon Redbone," 12 noon, Kern lobby.

Sports: Men's golf, vs Villenova, 1 p.m.

GSA Garden Plot Workshop, 7:30 p.m., Room 112 Kern.

University Theatre, "When You Comin' Back, Red Ryder," 8 p.m., Pavilion Theatre.

Friday, April 2

Folk and Square Dance Roundup, 7:30 p.m., White.

Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Artists Series, Pennsylvania Ballet, 8:30 p.m., University Auditorium.

Michael Powell, trombone, 8:30 p.m., Music Bldg. recital hall.

Saturday, April 3

Sports: Men's golf, vs. Navy, 1 p.m.

University Theatre, "When You Comin' Back, Red Ryder," 8 p.m., Pavilion Theatre.

Artists Series, Pennsylvania Ballet, 8:30 p.m., University Auditorium.

Sunday, April 4

Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Henry H. Mitchell, Ecumenical Center for Black Studies, Claremont, Cal.

Block Christian Fellowship worship service, 11:15 a.m., Eisenhower Chapel. Rev. Darry L. Millner, the Jerry Loyd Ensemble.

Sports: Men's baseball, vs. Ithaca, 1 p.m.

Artists Series, An Afternoon with the Pennsylvania Ballet, 3 p.m., University Auditorium.

Colloquy program, Julian Bond, Georgia State Senetor, on "Collision Course in a Divided America," 8 p.m., University Auditorium.

Monday, April 5

Noontime Jazz Concert, noon, Kern lobby. Jazz Workshop, 3 p.m., Room 101 Kern.

Tuesday, April 6

Commons Videotepe, Jazz, noon, Kern lobby.

Sports: Men's tennis, vs. Georgetown, 2:30 p.m.

Delte Phi Alphs annual banquet, 6:30 p.m., Hotel State College. Dr. Leslie Wilson, chelman, Department of German, University of Texas, on "Arrivels and Departures: The Worlds of Heinrich Boll."

University Readers, "Poetry and Jazz," 8 p.m., Room 112 Kern.

Wednesday, April 7

Commons Videotepe, Jazz, noon, Kern lobby.

Sports: Men's tennis, vs. Columbia, 2:30 p.m. Men's lacrosse, vs. Franklin and Mershall, 8 p.m.

Overde Page, flute, 8:30 p.m., Music Bldg. recital hall.

Thursday, April 8

University Theatre, "The Balcony," 8 p.m., Playhouse Theatre.

Friday, April 9

Sports: Track, men's and women's Nittany Lion Relays, 12 noon.

University Theatre, "The Balcony," 8 p.m., Playhouse Theatre.

GSA Coffeehouse, 8 p.m., Room 102 Kern.

Theatre Department play, "Cool Town Breakers," 8 p.m., Room 112 Kern.

Nona Uhler, soprano, 8:30 p.m., Music Bldg. recital hall.

Artists Series, Don Cossacks of Rostov, 8:30 p.m., University Auditorium.

Saturday, April 10

Sports: Men's baseball, vs, Rutgers, 1 p.m. Men's tennis, vs. Rochester, 2 p.m. Track, men's and women's Nittany Lion Relays, 12 noon. Men's golf, vs. Lehigh, 1 p.m.

PSU Symphony Orchestra Tour Fund Benefit Concert, 1:30 p.m., University Auditorium.

University Theatre, "The Balcony," 8 p.m., Playhouse Theatre.

Theatre Department play, "Coal Town Breakers," 8 p.m., Room 112 Kern.

Sunday, April 11

Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Norman Graebner, Distinguished Visiting Professor of History.

Block Christian Fellowship worship service, 11:15 a.m., Eisenhower Chapel. Pastor Gerald G. Loyd, Block Christian Fellowship Choir.

Theatre Department play, "Coal Town Breakers," 2 p.m., Room 112 Kern.

Colloquy program, Senator Edmund Muskie on "The Environment: How Will We Survive," 8 p.m., University Auditorium.

Seminars

Thursday, April 1

Chemistry, 12:45 p.m., Room 333 Whitmore. Lauri Valska, Clarkson College of Technology, on "Dioxygen-Metal Complexes."

Air Pollution Control, 2:20 p.m., Room 145 Fenske. Peter Preuss, Environmental Protection Service, Trenton, N.J., on "Air Pollution Control and Economics — New Jersey and Israel."

Meteorology, 4 p.m., Room 26 Mineral Sciences. James Frend, chemistry, Drexel University, on "The Global Atmospheric Sulfur Cycle and Ozone."

Agronomy, 4 p.m., Room 111 Tyson. Roy Spiblad on "Polymerization of Aromatic Compounds by a Phenol Oxidase from the Fungus 'rhizoctonia praticola'."

Engineering Mechanics, 4 p.m., Room 152 Hammond. Prof. Y. Weitsman, The Technion, Israel, on "Wave Propagation in Fiber Reinforced Materials."

Friday, April 2

Physics, 3:50 p.m., Room 117 Osmond. P.J. Silles, Brown University, on "Quasi-Two-Dimensional Electron Systems."

Monday, April 5

Division of Individual and Family Studies, 1 p.m., Room S-131 Henderson Human Development. Karl G. Joreskog, statistics, University of Uppsala, Sweden, on "Statistical Models and Methods for Analysis of Longitudinal Data."

New Communities, Architecture, 2 p.m., Room 322 Sackett. Dr. Eliezar Kamon, human performance, on "Physiological and Psychological Stress and Human Behavior in Hot-Dry Climate."

Genetics, 3:55 p.m., Room 111 Tyson. Ken Rineer on "3 Nitro-Propionic Acid and Crown Vetch."

Physical Chemistry, 4 p.m., Room 333 Whitmore. Bruce Hudson, Stanford University, on "Coherent Anti-Stokes Raman Scattering."

Seminar on Education Reference Materials, 7 p.m., Room W110 Pattee.

Organic Chemistry, 8 p.m., Room 333 Whitmore. Blanche Garcia on "The Chemistry of Micelles."

Tuesday, April 6

Analytical Chemistry, 12:45 p.m., Room 445 Davey. G. J. Rosenberger on "Analytical Techniques Used in Activation Analysis."

Solid State Physics, 1 p.m., Room 339 Davey. R. Meyerson on "Dynamics of Symmetry Breaking Long Range Order In Farromagnetic Films."

Solid Waste, 2:20 p.m., Room 140 Fenske. Walter Malby, Resource Recovery Group, ALCOA, Pittsburgh, on "Resource Recovery in the Aluminum Industry."

Mathematics, 4 p.m., Room 118 McAllister. Manfred Knebusch, Institute for Advanced Study, on "The Spectrum of the Witt Ring of an Algebraic Variety."

Social and Behavioral Sciences, 3:50 p.m., Room S-130 Henderson Human Development. Dr. Gary Stollak, psychology, Michigan State University, on "NIMH Sponsored Research Program for the Identification of and Intervention for High Risk Families."

Engineering Mechanics, 4 p.m., Room 232 Hammond. Dr. D. J. Patel, National Heart and Lung Institute, Bethesda, Md., on "The Role of Hemodynamics in Atherosclerosis."

Seminar on Psychology Reference Materials, 7 p.m., Room W110 Pattee.

Wednesday, April 7

Biochemistry and Biophysics, 4 p.m., Room 101 Althouse. Daniel Branton, Biological Laboratories, Harvard University, on "Freeze-Fracture Studies of Macromolecular Mobility."

Astronomy, 4 p.m., Room 443 Davey. Thomas F. Adams, University of Chicago, on "The Morphology of Seyfert Galaxies."

Thursday, April 8

Air Pollution Control, 2:20 p.m., Room 145 Fenske. Claire M. Gesalman, graduate student in plant pathology, on "A Plant's Sensitivity to Ozone."

Physics, 3:50 p.m., Room 117 Davey. John Gilman, director, Materials Research Laboratory, Allied Chemical Corp., on "Metallic Glasses."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Zellman Warhaft, senior project associate, aerospace engineering, on "A Laboratory Study of Temperature and Humidity Structure In a Stable Stratified Maritime Boundary Layer."

Agronomy, 4 p.m., Room 111 Tyson. Sandra L. Russo on "Assessing the Validity of Current Laboratory Procedures for the Evaluation of Tropical Forage Species."

Philosophy, 4 p.m., Room 62 Willard. Steven Goldman on "On the Interpretation of Symbols in Judaic and Christian Thought."

Lectures

Thursday, April 1

York Campus Lecture Series, Dr. Pauline Maier, University of Massachusetts-Boston, on "Understanding the Revolution," 3 p.m., York Campus.

Paul Zawadski, University of Iowa, on "Ultrastructural Study of /r/ Articulations," 8 p.m., Room 73 Willard. Sponsored by the Department of Speech Communication.

Friday, April 2

Sir Edward Bullard, Cambridge University, on "The Floor of the Deep Sea," 3:55 p.m., Room 22 Deike. Sponsored by the Graduate School and the Department of Geosciences.

History of Photography Week, Dr. Heinz K. Henisch, professor of the history of photography, on "The Painterly Photograph and the Photographic Painting," 8 p.m., Zoller Gallery.

Monday, April 5

Dr. E. Bullard, Cambridge University, on "The Origin of Earth's Magnetic Field," 3:55 p.m., Room 112 Kern. Sponsored by the Graduate School and the Department of Geosciences.

Tuesday, April 6

Dr. Thomas Hoskins, Quaker Service worker, on "Vietnam Since the American Withdrawal," 3:30 p.m., HUB auditorium. Sponsored by the Southeast Asia Studies Committee and Colloquy.

Thursday, April 8

Dr. William Hadden Jr., president, Insurance Institute for Highway Safety, on highway safety measures, 2 p.m., Room 189 MRL.

Meetings

Monday, April 5

College of Health, Physical Education and Recreation, 7 p.m., Room 109 White.

Films

Friday, April 2

Commonsplace Theatre, "To Have and Have Not," 7:30 and 9:30 p.m., Room 112 Kern.

Monday, April 5

French Film Series, "Beauty and the Beest," 7 and 9 p.m., Room 112 Kern.

Sunday, April 11

Free Shakespeare film, "Hamlet," (Olivier), 6.30 p.m., Room 101 Chambers.

Exhibits

Museum of Art: Recent Works by Stuart Frost.

Zoller Gallery, Invisions, until April 10. Film Follies, April 11-13.

Kern Gallery: R. Logan Harrison, photography, until April 9. W. C. Handy Jazz Exhibit, until April 9. African Art, opening April 10.

Chambers Gallery: Art Alliance Invitational, all media.

HUB (Main Lounge): Americana in the Netherlands (Royal Netherlands Information Embassy), until April 9.

HUB Gallery: Selections from the Permenent Collection of the Museum of Art.

Pattee Library: Main Lobby — The Ukrenian Heritage in North America by W. O. Luciw. Main Corridor Gallery — The Work of Wendell MacRae, photographer. Lending Services Lobby — Sally Alexander, Portraits, until April 5. Drawings and Paintings, Bill Diaz, opening April 6.

Arts roundup

Orchestra benefit

The Penn State Symphony Orchestra, joined by the University Choirs, will perform a family concert of light classical music to benefit the orchestra's tour fund at 1:30 p.m. Saturday, April 10, in University Auditorium. The program, which will have no intermission, is planned for people of all ages.

Ives' "Variations on 'America'," arranged by William Schuman for orchestra from the original for organ, will open the concert, conducted by Dr. D. Douglas Miller, associate professor of music. Philip Dettra, assistant professor of music, will be featured pianist in Gershwin's "Rhapsody in Blue."

The 80-piece orchestra will be joined by the 200-voice University Choirs, directed by Raymond Brown, professor of music and University choral director, to perform excerpts from Wagner's "Lohengrin"—the famous orchestral introduction to Act Three, immediately followed by the equally well-known Bridal Chorus — and the Triumphal Scene from Verdi's "Aida." Completing the benefit concert will be Tchaikovsky's "Overture Solennelle," better known as the 1812 Overture.

Tickets, at $2 for adults and $1 for children and University students, will be sold from 9 a.m. to 4 p.m. April 5 through 9 at University Auditorium and on Saturday at the door, beginning at noon.

Spring theatre season

University Theatre's spring season will run the gamut from Genet to jazz. Opening at the Playhouse April 8 is Genet's "The Balcony," under the direction of Manuel Duque, assistant professor of theatre and film. Suggested for mature audiences, the play, which is set in a brothel, is a ritualized struggle between reality and fantasy. Curtain times are 8 p.m. for the April 8, 9, 10 and 13-17 performances.

"Unruly Children" by Roger Cornish, assistant professor of theatre and film, premieres at the Pavillion Theatre April 29, 30, May 1 and May 4-8. Another offering recommended for mature audiences, this Pennsylvania Bicentennial vaudeville is an eccentric view of some of the Commonwealth's more familier legends and figures told through comedy, drama, dence and song. Curtain times are 8 p.m.

Closing the season will be Jazz Dance Theatre in Concert, directed and choreographed by Jean Sabatine. This will be seen in the Playhouse May 12-15 al 8 p.m.

The box office for these shows will open Monday, April 5, and is open daily except Sundays from 1 p.m. to 6 p.m. on non-performance days and from 1 to 9 p.m. when the shows are running. Reservations may be made by calling 865-1884

Overde Page recital

Overde Page, flutist with the Clevemont Quintet and a member of the music faculty, will perform a recital of music for flute at 8:30 p.m. Wednesday, April 7, in the Music Bldg. recital hall. The opening section of the program will consist of Mozart's "Sonata V" and Bach's "Sonate I in B Minor," both for flute and harpsichord. Assisting will be June Hutter, associate professor of music. Jolivet's "Suite en Concert pour Flute end Percussion" will be performed by Mrs. Page end a percussion ensemble of four students conducted by Smith Toulson, assistant professor of music. Completing the program will be "Sonetine" by Henry Dutilleux, performed with pianist Steven Smith, essistant professor of music.

Jazz week planned

A campus-wide celebration, Jazz Week '76, has been planned for the University the week of April 4-10. Included in the series of events at various locations around campus are lectures, films, workshops, art exhibits, poetry set to jazz and o series of mini-concerts. Orgenizers are also planning e concert by e major jazz performer. Jazz Week '76 is sponsored by the P.S.U. Jazz Club, the University Concert Committee, the Graduate Student Association, the Paul Robeson Culturel Center, the Graduate Commons, the Hetzel Union Bldg. end Colloquy.

Leaves of absence granted for 1976-77

Dorothy Alfke, professor of education, to revise and expand inservice training program components developed in the Science for the '70s project. July 1, 1976—June 30, 1977.

John O. Almquist, professor of dairy physiology, to write up results of two projects on the reproductive capacity of beef and dairy bulls and to prepare a new course in Applied Reproductive Physiology of Farm Animals. Dec. 1, 1976—May 31, 1977.

Steve Armentrout, professor of mathematics, to be spent at The Institute for Advanced Study, Princeton, doing research in mathematics, particularly certain topics in topology. Sept. 1, 1976—May 31, 1977.

Gert Aron, associate professor of civil engineering, to be spent at the Terrain Analysis Branch of the Corps of Engineers' Waterways Experiment Station, Vicksburg, Miss., for study of the Corps' remote sensing interpretation methods. Sept. 1, 1976—Feb. 28, 1977.

Nathan N. Aronson Jr., associate professor of biochemistry, to work at Strangeways Laboratory, Cambridge, England, on the importance of lysosomal cathepsins in the liver degradation of both endocytized and endogenous proteins. Aug. 1, 1976—July 31, 1977.

Raymond G. D. Ayoub, professor of mathematics, to continue research in number theory and algebra in Italy and the United States. Dec. 1, 1976—May 31, 1977.

Eugenio Battisti, professor of art history, for research at Warburg Institute in London, Princeton University, the Vatican Library, the Hague and other institutions in preparation for a history of visual symbolism and a dictionary of symbols. Spring and Summer Terms, 1977.

Ernest Bleuler, professor of physics, for ionosphere research at the Institut fur Astrophysik und Extraterrestrische Forschung in Bonn, Germany. Sept. 1, 1976—Feb. 28, 1977.

Terry R. Bortz, county agent-agriculture (Schuylkill County), to work toward a Master of Agriculture degree at Penn State. Sept. 1, 1976—Aug. 31, 1977.

Alien C. Botaechi, assistant professor of horticulture extension, to study production of ornamental plants in containers in Lake County, O., as well as in New York, New Jersey, Virginia and West Virginia. July 1, 1976—Dec. 31, 1976.

Ralph W. Condee, professor of English literature and humanities, to do research for books on Milton and Houseman at the British Musaum, Glasgow University, Edinburgh University and the National Library of Scotland. Fall and Winter Terms, 1976-77.

Sybil Coble, extension home economist (Fulton County), to do graduate work at Shippensburg State College. Sept. 1, 1976—Feb. 28, 1977.

Richard Craig, associate professor of plant breeding, to work at West Virginia University on biochemical mechanisms involved in tissue resistance. July 1, 1976—March 31, 1977.

Paul H. Cutler, professor of physics, to continue research in the area of surface physics at the Universities of Liege and Namur, Belgium. Jan. 1, 1976—Sept. 30, 1977.

Marion R. Deppen, assistant director, Capitol Region, Cooperative Extension Service, to do graduate work at Penn State and to study personnel management systems in the Extension Services of several states. Sept. 15, 1976—Dec. 15, 1976; Sept. 15, 1977—Dec. 15, 1977.

David R. DonTigny, professor of art, to investigate contemporary raku, a ceramic arts process. Summer and Fall Terms, 1976.

Juris G. Draguns, professor of psychology, for research at the Universities of Mainz Marburg and Trier in West Germany on cross-cultural psychology of abnormal and normal behavior. Sept. 1, 1976—Aug. 31, 1977.

L. Leonard Fergus professor of botany, to do research at the E. Hauser Champignon Laboratorium, Gossau-Zurich, Switzerland, on thermophilic organisms. June 1, 1976—Nov. 30, 1976.

William L. Ferrara, professor of accounting and Price Waterhouse Faculty Fellow, to visit major universities, industrial and accounting firms and to develop a series of sophisticated computer simulations. Dec. 1, 1976—May 31, 1977.

Kent Forster, professor and head, department of history, to do research at the University of Shiraz on Iranian-German relations in World War II and in Finland on Finnish-Russian relations since World War II. Fall and Winter Terms, 1976-77.

Edwin V. Gafney, associate professor of microbiology and cell biology, for breast cancer research at The Imperial Cancer Research Fund Laboratories, London. June 1, 1976—May 31, 1977.

Trond Gilberg, associate professor of political science, to study appropriateness of USSR, Romania and North Korea as models for emulation by Kenya and Tanzania. Sept. 1, 1976—Feb. 28, 1977.

Howard Grotch, associate professor of physics, for research on Bethe-Salpeter Equation and two particle quantum mechanics in external fields at the University of Sussex. Fall and Winter Terms, 1976-77.

Henry D. Gerhold, professor of forest genetics, to study European research needs concerning threats to the survival and health of trees in metropolitan landscapes. June 1, 1976—Nov. 15, 1976.

Peter R. Gould, professor of geography, to work on research projects including mapping, geographic applications of structural topological language, and possibly the extent and impact of international television flows. Sept. 1, 1976—Aug. 31, 1977.

Leslie C. Hale, professor of electrical engineering, to study scientific and technological expertise in Europe concerning stratospheric and mesospheric measurements. Sept. 1, 1976—May 31, 1977.

Gerald R. Hauser, assistant professor of speech communication, to work on the problem of communication in a world where the participants have pluralistic perspectives to a common problem and where they are interdependent. Winter and Spring Terms, 1976-77.

Jack C. Hayya, professor of management science, to do research in the area of forecasting. Fall and Winter Terms, 1976-77.

Edwin L. Herr, professor and head of counselor education, to participate in careers research and counseling programs at Cambridge University and the University of London. Summer Term, 1976.

William Hetherington Jr., professor of chemistry, for research in bioinorganic chemistry at Stanford University. Fall and Winter Terms, 1976-77.

Robert E. Huff, assistant professor of mathematics, to continue research in vector-valued measure theory, at the Universitat Erlangen-Nurnberg, West Germany. Sept. 1, 1976—Feb. 28, 1977.

Gordon R. Johnston, assistant professor of chemistry, Beaver Campus, for postdoctoral traineship at MIT. Fall, Winter and Spring Terms, 1976-77.

Peter C. Jurs, associate professor of chemistry, for research in the application of pattern recognition to chemical problems at Stanford University and other research laboratories. Sept. 1, 1976—Feb. 28, 1977.

Michael Robert King, associate professor of political science, to co-author a book on American political parties. June 1, 1976—Dec. 31, 1976.

Frank J. Landy, associate professor of psychology, to continue study on the nature of evaluative declsions and to catalogue the systematic influences on each decision. June 1, 1976—Nov. 30, 1976.

Herschel W. Leibowitz, professor of psychology, for research on peripheral vision. Sept. 1, 1976—May 31, 1977.

Samuel H. Levine, professor of nuclear engineering, to study Israel's method for measuring neutron spectra at the Technion, Haifa. Oct. 1, 1976—Sept. 30, 1977.

Peirce F. Lewis, professor of geography, to study America's vernacular human landscape at the University of California at Berkeley. July 1, 1976—June 30, 1977.

James J. McKeehen, county extension director (Delaware County), to complete a Master of Agriculture degree in horticulture at Penn State. Sept. 1, 1976—Feb. 28, 1977.

John Warner Moore Jr., assistant professor of English, to complete a book on Edmund Spenser's "The Shepheardes Calendar." Sept. 1, 1976—Feb. 28, 1977.

Warren T. Morrill, professor and head of anthropology, to write a monograph on the population of St. Barthelemy, French West Indies, and to prepare a theoretical book on the interaction of culture and cognition. Dec. 1, 1977—Nov. 30, 1976.

Peter D. Morris, associate professor of mathematics, for research at the University of Washington in Seattle. Sept. 1, 1976—Feb. 28, 1977.

Torrence D Parsons, associate professor of mathamatics, to continue research in combinatorial mathematics and mathematical optimization and its applications. Dec. 1, 1976—May 31, 1977.

Sverker Persson, professor of agricultural engineering, to compile additional material for a textbook on the theory of agricultural machine elements in Europe. Feb. 1, 1977—July 31, 1977.

Thomas F. Powers, professor of organizational behavior, to study managerial Islam in the Parry Sound area in Ontario, northern Pennsylvania and Mexico. Fall, Winter and Spring Terms, 1976-77.

Rio Preisner, professor of German, for an Intensive Investigation of Johann Georg Forster. Spring and Fall Terms, 1977.

Gerhard Reethof, professor of mechenical engineering, to serve as a visiting professor in the Institute of Sound and Vibration Research, University of Southampton, England. Oct. 4, 1976—March 7, 1977.

Carolyn Schook, associate professor of home management extension, for research to develop more systematic educational programs for senior citizens. Sept. 1, 1976—Feb. 28, 1977.

Robert A. Secor, associate professor of English, to work on a book based on the papers of Violet Hunt. Dec. 1, 1976—May 31, 1977.

Alex Simirenko, professor of sociology, to do research on ethnic community studies. Winter and Spring Terms, 1976-77.

John W. Slocum Jr., professor of organizational behavior, to study how to improve leadership effectiveness in the current labor management courses by a comparative analysis of conceptual models of the management area. Dec. 1, 1976—May 31, 1977.

Ronald A. Smith, associate professor of physical education, to do historicel research on the causes for the origin and rise of college athletics in the 19th century. Fall and Winter Terms, 1976-77.

Martin S. Stabb, professor and head of Spanish, Italian and Portuguese, to begin work on a major study dealing with the sociology of literature in Spanish America. Fall and Winter Terms, 1976-77.

James E. Stephenson Jr., associate professor of art, to pursue architectually-oriented sculptural systems in clay and make a documentary on the remaining craftsmen in brick and tile in Spain and North Africa. Spring and Summer Terms, 1977.

Richard F. Stinson, professor of agricultural education and horticulture, to serve as a visiting faculty member at the University of Florida, Gainesville. June 1, 1976—Aug. 31, 1976.

Brian J. Turner, associate professor of forest management, to compare Australian and American management information systems in forestry and teaching methods and assess effects of metrication. Sept. 1, 1976—May 31, 1977.

Peter D. Usher, associate professor of astronomy, to undertake a program in photometry and identification of quasi-stellar objects in the Sandage-Luyten Survey Fields. Fall and Winter Terms, 1976-77.

David B. Van Dommelen, associate professor of art education, to implement a model crafts program in Guatavita, Columbia. April 1, 1976—Feb. 28, 1977.

Joseph H. Way, county agricultural agent (Montgomery County), to work toward a Master of Agriculture degree in horticulture. Sept. 7, 1976—March 11, 1977.

Stanley Weintraub, research professor of English and director, Institute for the Arts and Humanistic Studies, to examine the lives and work of expatriate American writers and artists in London in the decades prior to World War I. Sept. 1, 1976—Feb. 2, 1977.

Joachim F. Wohlwill, professor of man-environment relations, to do research on man-made and natural environments and the principles relating to land use and environmental design, planning and management. Sept. 1, 1976—June 30, 1977.

Paul J. Wuest, professor of plant pathology, to initiate and conduct research and extension programs related to the post-harvest pathology and physiology of commercial mushrooms. Oct. 1, 1976—March 31, 1977.

Fund honors Riley

The Ridge Riley Alumni Scholarship Fund to finance alumni memorial scholarships has been established at the University for undergraduate students with outstanding academic achievement.

The fund honors the late Mr. Riley, who served from 1947 until his retirement in 1970 as executive secretary of the Penn State Alumni Association, and from 1971 until his death on Jan. 6 as a trustee of the University.

He was largely responsible for the establishment of the Penn State Alumni Fund and he considered the launching of the Alumni Memorial Scholarship and Loan Program one of his major achievements.

With the aid of friends and associates of Mr. Riley and various organizations, an extensive campaign for support of the fund is in preparation.

The scholarships will be available to entering freshmen or entering advanced standing students with superior secondary or other preparatory school academic records who manifest promise of superior academic success in the University. Good character and leadership in high school and community activities will be considered. Awards may be renewed from academic year to academic year if the recipient maintains a cumulative grade average of B (3.00) and funds are available.

During the current academic year, 2 freshmen received Alumni Memorial Scholarships, amounting fo $21,084 and ranging from $400 to $1,000 per grant. At the same time, upperclassmen maintaining the required academic standard had their scholarships renewed at a cost of $52,764, so that during the year, 124 students benefited with aid totaling $73,848.

Oswald heads group

President John W. Oswald is serving as chairman of a special committee established to study the problems of rising indirect costs on federally sponsored grants and contracts at colleges and universities. The matter has been a concern of the Congress and the Executive Branch, and institutions are being criticized for failing to observe the guidelines for determination of these costs. Dr. Roger W. J. Heyns, president of the American Council on Education, says "there is a danger that unwarranted punitive actions affecting all colleges and universities may be taken because of allegations of delinquency in a small number of institutions."

Staff vacancies

Staff vacancies in this publication generally require at least a baccalaureate degree or equivalent as a minimum educational qualification. Staff vacancies requiring less than baccalaureate degrees as well as these announced in the INTERCOM may be found in the Penn State REPORTER, a University employees who are interested in promotion may apply by calling the Employment Division 865-1397 (network Line 475-1397). Applications for these staff vacancies will be received until 5 p.m. **April 9, 1976. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

ASSOCIATE HOSPITAL DIRECTOR/DIRECTOR OF FINANCIAL AFFAIRS — Hershey

Responsible to the Hospital Director for the development, implementation, coordination and administration of the Hospital's policies on finance, accounting, insurance, admitting, internal controls, auditing and preparation of annual financial statements. Bachelor's degree with major in accounting or equivalency with five to seven years of directly related experience (preferably in a university teaching hospital).

RESEARCH ASST. PESTICIDE RESEARCH LABORATORY — College of Agriculture

Utilize various microbiological and biochemical procedures in the isolation, identification and manipulation of microorganisms. Utilize various laboratory and greenhouse procedures in the culture, maintenance and manipulation of green plants. Operate and maintain electronic equipment used in the pesticide research program such as gas chromatographs, spectrophotometers, infrared recorders, ultraviolet spectrometers, etc. Use field pesticide application equipment and apply hazardous pesticides as required. Conduct experiments under direction of the supervisor such as studies on the interaction of pesticides with microorganisms and/or green plants and the development of pesticide resistance by microorganisms. Responsible for field work at locations other than at University Park. Necessary to be away from University Park on occasions. Bachelor's degree in biology (work in microbiology and biochemistry preferred) or equivalent plus 3-12 months of directly related experience in the utilization of microbiological and/or chemical procedures.

LABORATORY ASSISTANT, ENGINEERING — Capitol Campus

Will provide technical assistance to faculty and students using laboratory. This includes responsibility for the overall efficient and efficient daily operations of the chemistry laboratory facility. A bachelor's degree in chemistry, or equivalent plus over three months and up to and including 12 months of laboratory experience.

PENN STATE intercom

Volume 5, Number 28 April 8, 1976

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

News in brief

Top high schoolers to visit

Approximately 360 outstanding high school students will visit the University Park Campus Friday for the first portion of the 1976 Penn State Schofars Program.

The program was initiated last year to recognize and encourage excellent academic scholarship and to provide an opportunity for top students in the State to meet with Penn State faculty members and students.

The visitors, from the western part of the State, and an equal number of parents, will be on campus for two days.

Following a dinner at 6:30 p.m. Friday in the Helzel Union Bldg., the students will be hosted by University students in the residence halls and will meet at the colleges of their choice on Saturday.

Parents will attend a college orientation seminar Friday afternoon and a dinner Friday night in the Nittany Lion Inn.

A second group of approximately 314 students from the eastern part of the State will visit on the weekend of April 23 and 24.

Debate date corrected

The debate on whether or not Canada should become the 51st state of the Union will be held at 8 p.m. Tuesday, April 13, in Room 112 Kern Bldg., and not on April 8, as previously reported. Teams from the University of Toronto and Princeton will argue the question.

New architecture degree

A two-year program leading to the professional degree of master of architecture has been approved at the University, and it is expected that 15 to 20 students may be admitted to the program during the first year, beginning in fall, 1976.

Romero Corbelletti, professor and head of the Department of Architecture, explains that "the program is designed for students who have indicated a strong motivation and interest in a professional career during their undergraduate work in design and who hold an undergraduate degree with a major in architecture or environmental design. The course of study will be patterned to provide a program consistent with each student's previous experiences and degree of specialization."

With this degree, the Department of Architecture is shifting from a five-year undergraduate professional degree to a program leading to an intermediate professional degree after four years and to the awarding of the first professional degree in architecture at the graduate level.

Phi Psi racers wanted

The 8th Annual Phi Psi 500, sponsored by Phi Kappa Psi fraternity for the benefit of the Centre County Day Care Program, will begin at 2 p.m., Saturday, April 24. Last year over 200 runners competed along the 1.1 mile course, stopping to drink six beers (or cokes) at six bars along the route. Contestants have a choice of five divisions. Fraternity, Sorority, Independent, Masters (for those over 30) and Anything Goes. The Masters' category is open to both individual contestants and relay teams, so academic and staff departments may enter a slate of contenders. Last year's race raised over $3,000. The entry fee is $10 a person and $25 for a relay team, and all winners will receive trophies. Entries will be accepted right up to the day of the race. To register, call the Phi Kappa Psi house, 234-5555.

Help wanted

WANTED: Mature, responsible, devoted individual willing to serve as an advisor to Alpha Epsilon Phi social sorority. Only work involved is an interest in helping this small group of women to grow. If interested, call 865-5852 or 865-8044.

Bargaining unit hearings focus on role of College of Medicine

Hearings on the makeup of a faculty unit eligible to vote in a representation election at the University focused last week on the College of Medicine at the Milton S. Hershey Medical Center.

Dr. Harry Prystowsky, dean of the University's College of Medicine and provost of the Hershey Medical Center, was the only witness in three days of testimony before Pennsylvania Labor Relations Board Hearing Examiner Sidney Lawrence.

The hearings are being conducted on a petition by the Pennsylvania State University Professional Association (PSUPA) for an election to determine whether or not a bargaining agent should represent Penn State faculty and professional staff.

PSUPA is seeking a unit to include all faculty, excluding those in the College of Medicine, and all non-teaching professionals "directly related to the academic and research programs." The University feels the appropriate unit for an election should be a "pure" faculty unit made up of regular full-time faculty at all locations of the University. In his direct testimony, Dr. Prystowsky said the College of Medicine is a component of the Medical Center, which is a part of the overall University administration.

He described the major functions at the College of Medicine as teaching, research and public service, noting that all educational programs of the Medical Center are conducted through the College of Medicine. "The Medical Center, per se, does not conduct educational programs," he said.

Dr. Prystowsky testified that there are 247 faculty members in the College of Medicine, plus 17 department heads, who hold the same type of academic ranks as faculty members in other colleges of the University. Of the 264, 130 hold the M.D. degree and 76, the Ph.D., while another 9 hold both the M.D. and Ph.D. The remaining faculty members have a variety of other degrees, including the D.V.M. and J. D. Sixteen M.D. faculty have appointments in the basic science departments while 19 non-M.D. faculty have appointments in the clinical science departments. Dr. Prystowsky noted that only those faculty members with a doctor of medicine degree are involved with patient care.

He also said that the curriculum and faculty organization in the College of Medicine are governed by the policies and procedures of the University Faculty Senate as for all other colleges. Graduate programs in the College of Medicine fall under the jurisdiction of the Graduate Council.

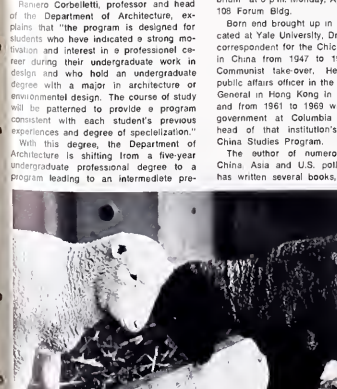
Dr. Prystowsky also testified on the academic relations that exist between faculty in the College of Medicine and other colleges of the University. He pointed to joint memberships on college and University committees and on doctoral committees, and commented upon a number of programs which require that University Park students study at Hershey. In addition, he reviewed in considerable detail 3 of 19 research projects developed jointly by faculty in the College of Medicine and one or more other colleges. Faculty members in 9 of 10 colleges at University Park are involved in these joint research projects.

Finally, he noted that the personnel policies in the University's Policy Manual are applicable to faculty at the College of Medicine as they are to all faculty in the University.

In cross-examination of Dr. Prystowsky, Ronald Watzman, PSUPA attorney, attempted to show that faculty members at the College of Medicine generated University income in a manner different from other faculty members, particularly in regard to

(Continued on page four)

U.S.—Far East relations talk Monday



An authority on contemporary China, Asia and U.S. policy, Dr. A. Doak Barnett, of Brookings Institutions, will present a public lect.re on "The United States, China and East Asia's New Four Power Equilibrium" at 8 p.m. Monday, April 12, in Room 108 Forum Bldg.

Born and brought up in China and educated at Yale University, Dr. Barnett was a correspondent for the Chicago Daily News in China from 1947 to 1950 during the Communist take-over. He served as a public affairs officer in the U.S. Consulate-General in Hong Kong in the early 1950s and from 1961 to 1969 was professor of government at Columbia University and head of that institution's Contemporary China Studies Program.

The author of numerous articles on China, Asia and U.S. policy, Dr. Barnett has written several books, including "Uncertain Passage," "A New U.S. Policy toward China," "Cadres, Bureaucracy and Political Power in Communist China" and "Communist China and Asia." Long before President Nixon and Secretary of State Kissinger took the concrete actions that changed U.S.-China relations, Dr. Barnett argued for a new China policy as a witness in the Fulbright Committee hearings in spring, 1966. He has been a Senior Fellow at Brookings Institutions since 1969.

In addition to his public address, he will conduct a seminar on selected research problems dealing with China and her relations with the U.S. and USSR from 2 to 4 p.m. Tuesday, April 13, in Room 124 Sparks Bldg. for interested faculty and students.

His visit is sponsored by the Graduate School, the East Asian Studies Committee and the Slavic and Soviet Language and Area Center.

What's black and white and bred all over? Little lambs like these — and they're a sure sign of spring to visitors at the University's sheep barns.

Cahir to chair commission set up to study effects of remedial education

Dr. John J. Cahir, associate professor of meteorology, has been appointed chairman of the Joint Presidential-Senate Commission to Study Remedial Education.

The University Faculty Senate at its March 9 meeting proposed establishment of the commission.

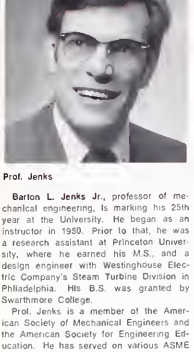
Commission members, appointed by Senate chairman Selby S. Small and President Oswald, have been charged with studying and proposing solutions to "the need by many students for instruction which is preparatory to college level courses in areas of quantitative and qualitative thought and articulation."

The Commission has been asked to consider:

— Impact analyses on faculty, students and the nature of the institution.

— Analysis of effects on student enrollments.

— Anatysis of economic effects, including tuition income and costs of remedial instruction and priority status in relation to other University programs.



— Such other factors members feel are pertinent to the problem.

In pursuing its charge, the Commission also has been asked to assess the possible effects involvement of Penn State in remedial work at this level would have on the attitudes of the public school systems and on the attitudes of the public in general.

The Commission is to report to the Senate by January, 1977. Commission members, besides Dr. Cahir, are Thomas E. Daubert, James Dungan, Robert E. Dunham, Wilma R. Ebbitt, Oscar E. Fox, Joseph L. French, Samuel M. Laposata, Eugene S. Lindstrom, Louise J. Marshall, Mary McCammon and John J. Romano.

PENN STATE COLLECTION

Faculty notes

Prof. Jenks

Barton L. Jenks Jr., professor of mechanical engineering, is marking his 25th year at the University. He began as an instructor in 1950. Prior to that, he was a research assistant at Princeton University, where he earned his M.S., and a design engineer with Westinghouse Electric Company's Steam Turbine Division in Philadelphia. His B.S. was granted by Swarthmore College.

Prof. Jenks is a member of the American Society of Mechanical Engineers and the American Society for Engineering Education. He has served on various ASME committees and organized and served as first chairman of the Pennsylvania ASME Council of Section Chairmen.

During his years at Penn State, Prof. Jenks has created and taught two senior elective courses, one in Engineering Analysis and one in Bearing Design and Lubrication. He has also co-developed several other mechanical engineering courses and was one of the early advocates in the Mechanical Engineering Department committed to the project method of teaching Engineering Analysis and Design, which resulted in the introduction of at least three courses in the curriculum. He has served on numerous committees, including the College of Engineering Ad Hoc Committee on Dynamic Systems, of which he was chairman.

Michael H. Begnal, associate professor of English and comparative literature, has been awarded a Fulbright-Hays Senior Lectureship at Charles University, Prague, Czechoslovakia, for 1976-1977. He previously held a Fulbright lectureship there in 1973-74. Dr. Begnal has specialized in James Joyce and Irish literature.

Dr. H. Seymour Fowler, chairman of the science education faculty and coordinator of the Division of Academic Curriculum and Instruction, received a Distinguished Service to Science Education Citation from the National Science Teachers Association at that group's recent annual convention.

Dr. Jean E. Brenchley, associate professor of microbiology, presented a seminar at the University of Pennsylvania on the "Regulation of Ammonia Assimilation in 'Klebsiella' and 'Salmonella'" March 30.

Dr. Charles D. Crawford, associate professor of rural sociology, recently presented a paper entitled "Community Support Systems: Some Considerations Related to Creating and Maintaining Independent Living for Older Persons" at a conference on "Total Health and Aging" held at Eckerd College, St. Petersburg, Fla.

Three faculty, an alumna and a retired professor will be honored tonight (Thursday) at the awards dinner of the College of the Liberal Arts Alumni Society. **Dr. Carroll C. Arnold**, professor of speech communication, will receive a Distinguished Teaching Award. An award for Distinction in the Social Sciences will be presented to **Dr. Charles N. Cofer**, professor of psychology, and **Dr. Arthur Goldschmidt**, assistant professor of history, will be honored as the Outstanding Faculty Advisor in the College. **Jo Fox Brosius** '49, founder of the Fairpress, Connecticut's largest weekly newspaper, is the recipient of a Service to Society Award, and **Dr. Jessie R. Bernard**, professor emerita of sociology, of the Emeriti Distinction Award. She retired in 1964 after 18 years at the University.

Donald P. Wharton, instructor of English at Altoona, will speak on "The Poet as Protestor: Richard Steere and the Rogerene Controversy in New London, 1695" at the Northeast Modern Language Association convention this week in Vermont.

Dr. Peter T. Luckie, director of research and development with McNally Pittsburg Manufacturing Corp., Pittsburg, Kansas, and its subsidary, Kennedy Van Saun Manufacturing and Engineering Corp., Danville, Pa., has been named adjunct associate professor of mineral processing at the University. The two firms are major manufacturers of coal and mineral processing equipment. Dr. Luckie, who assumed his position with them in 1972, holds three degrees from Penn State. He received his B.S. in fuel engineering in 1960, his M.S. in mineral preparation in 1969, and his Ph.D in mineral processing in 1972.

Dr. Kenneth D. Hickey, professor of plant pathology at The Virginia Polytechnic Institute and State University, has been named professor of plant pathology and scientist-in-charge of the University's Fruit Research Laboratory, effective May 15. He will succeed Dr. Fred H. Lewis, who retired on Feb. 15 after 36 years of service. The Biglerville Laboratory, established in 1918 at Arendtville and moved in 1971 to its present location, is located in the heart of the Pennsylvania fruit belt. Research is conducted in entomology, pathology, virology, physiology, plant nutrition, soils management, harvesting and handling, biological control of pests, propagation, and other studies as they relate to deciduous fruits and crop plants. Dr. Hickey is a graduate of Tennessee Polytechnic University with a B.S. in agronomy. His M.S. and Ph.D. in plant pathology were conferred by Penn State.

Dr. Robert W. Reed, assistant professor of physics, delivered a paper on "Magnetic Breakdown Orbits in Beryllium" at the American Physical Society meeting in Atlanta, Ga., last week.

Dr. John W. Slocum Jr., professor of organizational behavior, co-authored an article in the Winter issue of "Organization and Administrative Sciences" on "Tesling Causal Relationships of House's Path-Goal Theory of Leadership Effectiveness."

Dr. Paul Weener, acting head of the Department of Educational Psychology, delivered an invited paper on the development of auditory processing abilities in children at the California Speech and Hearing Association annual conference in Los Angeles on April 2-3.

Dr. John R. Thompson, since 1967 agronomist and superintendent of the Experiment Station at University of Hawaii, has been named professor of agronomy (Bahamas) at the University, effective March 1, to continue through next February. He will be affiliated with the Bahamas Agricultural Research, Training and Development Project (BARTAD), a program funded by the U.S. Agency for International Development.

Dr. Howard Grotch, associate professor of physics and a specialist in electrodynamics, has been awarded a North American Treaty Organization (NATO) Senior Fellowship. He will conduct research at the University of Susex, England, while on leave during fall and winter terms, 1976.

Richard D. Rowlands, professor of engineering research at ARL, will present a paper on "The Odd Discrete Fourier Transform" at the 1976 IEEE International Conference on Acoustics, Speech and Signal Processing, to be held in Philadelphia, April 12-14.

Dr. Thomas A. Ryan, associate professor of statistics, has been appointed an associate editor of the "American Statistician," a publication of the American Statistical Association. He will review papers in several areas, especially statistical computing and applied probability.

Basil E. Robbins, who has been a performance engineer with Pratt and Whitney Aircraft, East Hartford, Conn., for the past three years, has been named a research assistant with the Applied Research Laboratory. He received his B.S. and M.S. in aerospace engineering at Penn State in 1970 and 1974, respectively.

Two associate professors from the Department of Art Education will present papers at the International Child Art Conference sponsored by the Art Department of Illinois State University April 8-10 at Normal, Ill. **Dr. William Bradley** will speak on "Some Non-Exemplary Aspects of the Child Schema," and **Dr. Paul Edmonston**, on "Traditional Education of the Artist-Craftsmen in South India." Dr. Edmonston will also deliver a paper at the April 11-16 National Art Education convention in St. Louis, Mo., on "New Images-New Consciousness in Contemporary Art."

Dr. Roland H. Good Jr., head of the Department of Physics, gave a colloquium at the Department of Physics, Queens College, CUNY, on "Casualty and Dispersion Relations for Nonlinear Systems" March 29.

Della Durant, assistant athletic director and associate professor in the College of Health, Physical Education and Recreation, is the Centre County chairman for the 1976 Cancer Crusade. She will direct the activities of nearly 2,000 volunteers during the April educational and fund-raising campaign. Other members of the faculty taking active roles in the campaign are **Dr. Patricia Farrell**, assistant professor of recreation and parks, who is coordinator of Special Events; and **Robert H. McCormick**, professor of chemical engineering, the chairman of the Standing Crusade Committee for the Centre County American Cancer Society. Among those sponsoring Special Events to raise funds for the cancer effort are **Provost Russell E. Larson**; **Dr. John J. Coyle**, professor and head of the Department of Business Logistics; **Dr. Richard G. Cunningham**, vice president for research and graduate studies; and **Kenneth L. Holderman**, professor emeritus of engineering, vice president emeritus for Commonwealth Campuses and a University trustee.

Jack Hayya, professor of management science, and graduate student **William Joyce** are the authors of a paper, "On Two Related Problems in Regression: Sample Size and the Comparison of Several R2-s" in the "Proceedings" of the Western Regional Conference, American Institute for Decision Sciences.

Rodelle Weintraub, instructor in English, has been appointed a member of the publications committee of the American Business Communications Association. The committee's responsibilities include oversight of the Association's regular and special publications, particularly the "Journal of Business Communication" and the "ABCA Bulletin."

Dr. Robert L. Shrigley, associate professor of education, and **Dr. Theodore Johnson**, director of The Curriculum Materials Center in the College of Education, will present a set of papers at the annual meeting of the National Association for Research in Science Teaching April 24 at San Francisco, Cal. The papers center around the theme, "Generating Theoretical Bases for Attitude Research in Science Education."

Dr. John C. Snowdon, professor of engineering research at ARL, will become president-elect of the Acoustical Society of America following the Society's spring meeting in Washington, D.C. April 5-9. The Society comprises more than 5,000 members with such interests as architectural and musical acoustics, noise, speech communication, underwater acoustics, and vibration, which is Dr. Snowdon's specialty. An alumnus of the University of London, he is the author of a graduate-level text and editor of two other volumes on vibration reduction and noise control.

Dr. R. S. Brubaker, professor and head of the Department of Speech Communication, will discuss spectrographic analysis of infant vocalizations at a Howard University seminar April 12. Special reference will be made to the acquisition of segmental features in early vocalizations.

Dr. Karl E. Spear, associate professor of ceramic science, is the author of "Phase Behavior and Properties of Rare-Earth Borides," chapter two in "Phase Diagrams: Materials Science and Technology." Volume IV, which has just been published by Academic Press, New York, N.Y.

Michael Hankamer, instructor of electrical engineering, has been awarded a NASA-ASEE Summer Faculty Fellowship at the NASA Johnson Space Center, Houston, Texas, June 7 to August 13, for research characterizing the capability of the Space Shuttle telemetry command system.

Dr. Robert K. Murray, professor of American history, has been named treasurer of the Organization of American Historians.

Dr. Francis M. Dwyer, senior research associate of education and coordinator of instructional evaluations in the Division of Instructional Services, was recently elected vice president of the International Visual Literacy Association (IVLA) at the group's annual meeting held in Nashville, Tenn. The association membership is interdisciplinary in composition, having as their primary orientation a focus on visual learning. Dr. Dwyer, in areas related to visual literacy, has published more than 100 articles and presented more than 100 lectures.

Kenneth M. Kuhn, associate professor of art at Altoona, is serving as chairman of the steering committee for Arts '76, the annual spring arts and crafts festival sponsored by the Blair County Arts Foundation and the Altoona Campus on May 7, 8 and 9. Assisting Mr. Kuhn as vice chairman is **Roger R. Zeltner**, assistant professor of art at the Campus.

Obituary

Dr. J. Earl McCord, 83, who retired in 1958 as professor emeritus of agricultural extension, died March 10 at his home in State College. He joined the Penn State staff in 1916 as county agricultural extension agent in Jefferson County, and in 1920 was named assistant professor of farm management and agricultural extension. He was appointed professor of farm management and agricultural extension in 1928. Born Nov. 9 1892, in Berwinsdale, he was a graduate of Lock Haven State College. He earned both his M.S. and Ph.D. at Cornell University.

Award of Excellence was presented by United Way to Hazleton Campus employees. At ceremony, left to right, are Dr. Harold Aurand, associate professor of history and coordinator of the Campus solicitation; Campaign chairman William R. Shutt, of Hazleton; and Dr. William J. David, Campus director.

University Park Calendar

April 8—18

Items to be included in this calender should be sent to the Calender Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, April 8

Phi Mu Alpha Jazz Band, 12:15-2 p.m., HUB new lounge.

FSHA 410 Early French Banquet, 5:30 p.m., Maple Room. Reservations: 865-7441.

University Theatre, "The Balcony," 8 p.m., Playhouse Theatre.

University Concert Committee Jazz Week program, Keith Jarrett, 8 p.m., Schwab.

Friday, April 9

Sports: Track, men's and women's Nittany Lion Relays, 12 noon.

University Theatre, "The Balcony," 8 p.m., Room 112 Kern.

None Uhler, soprano, 8:30 p.m., Music Bldg. recital hall.

Artists Series, Don Cossacks of Rostov, 8:30 p.m., University Auditorium.

Saturday, April 10

Sports: Men's baseball, vs. Rutgers, 1 p.m.

Men's tennis, vs. Rochester, 2 p.m.

Track, men's and women's Nittany Lion Relays, 12 noon. Men's golf, vs. Lehigh, 1 p.m.

PSU Symphony Orchestra Tour Fund Benefit Concert, 1:30 p.m., University Auditorium.

University Theatre, "The Balcony," 8 p.m., Playhouse Theatre.

Theatre Department play, "Cool Town Breakers," 8 p.m., Room 112 Kern.

Sunday, April 11

Chapel Service, 11 a.m., Eisenhower Chapel. Dr Norman Graebner, Distinguished Visiting Professor of History.

Black Christian Fellowship worship service, 11:15 a.m., Eisenhower Chapel. Pastor Gerald G. Loyd, Black Christian Fellowship Choir.

Theatre Department play, "Cool Town Breakers," 2 p.m., Room 112 Kern.

Penn State Blue Band, annual concert, 3 p.m., University Auditorium.

Colloquy program, Senator Edmund Muskie on "The Environment: How Will We Survive?", 8 p.m., University Auditorium.

Monday, April 12

Steven Robbins, flute, 8:30 p.m., Music Bldg. recital hall.

Term Paper Workshop, 7 p.m., Room W110 Pattee.

Color Slide Club, 7 p.m., Room 112 Kern. Slide essays.

Tuesday, April 13

Sports. Women's tennis, vs. Lock Haven, 2 p.m.

University Theatre, "The Balcony," 8 p.m., Playhouse Theatre.

Commongrounds, debate teams from the University of Toronto and Princeton on "Resolved: That Canada Should Become the 51st State of the Union," 8 p.m., Room 112 Kern.

Wednesday, April 14

University Theatre, "The Balcony," 8 p.m., Playhouse Theatre.

University Theatre experimental production, "Jules' Gems," selected adaptations from Jules Feiffer cartoons, 5:20 p.m., Pavilion Theatre.

Thalia Trio, 8:30 p.m., Music Bldg. recital hall.

Thursday, April 15

Sports: Women's lacrosse, vs. West Chester, 2 p.m.

University Theatre, "The Balcony," 8 p.m., Playhouse Theatre.

University Theatre experimental production, "Jules' Gems," 5:20 p.m., Pavilion Theatre.

Friday, April 16

Sports: Men's lacrosse, vs. North Carolina, 8 p.m.

University Theatre, "The Balcony," 8 p.m., Playhouse Theatre.

University Theatre experimental production, "Jules' Gems," 7:20 p.m., Pavilion Theatre.

Saturday, April 17

Sports: Men's baseball, vs. George Washington, 1 p.m. Men's tennis, vs. George Washington, 2:30 p.m.

University Theatre, "The Balcony," 8 p.m., Playhouse Theatre.

Stone Valley Recreation Area, rental boat operations and private boat launchings begin. For information, call 238-5872.

Sunday, April 18

Chapel Service, 11 a.m., Music Bldg. recital hall. The University Chapel Choir's Easter Concert, Raymond Brown, director, Tommie Irwin, assistant director.

Black Christian Fellowship worship service, 11:15 a.m., Eisenhower Chapel. Pastor Gerald G. Loyd, Children's Choir.

Sports: Men's tennis, vs. East Stroudsburg, 2:30 p.m.

Shavers Creek Nature Center, Ecology Walk, 3 p.m., Mineral Industries Bldg., Stone Valley.

Seminars

Thursday, April 8

Air Pollution Control, 2:20 p.m., Room 145 Fenske. Claire M. Gesalmen, graduate student in plant pathology, on "A Plant's Sensitivity to Ozone."

Physics, 3:50 p.m., Room 117 Osvey. John Gilman, director, Materials Research Laboratory, Allied Chemical Corp., on "Metallic Glasses."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Zellman Warhaft, senior project associate, aerospace engineering, on "A Laboratory Study of Temperature and Humidity Structure in a Stable Stratified Maritime Boundary Layer."

Agronomy, 4 p.m., Room 111 Tyson. Sandro L. Russo on "Assessing the Validity of Current Laboratory Procedures for the Evaluation of Tropicel Forege Species."

Philosophy, 4 p.m., Room 62 Willard. Steven Goldman on "On the Interpretation of Symbols in Judeic and Christian Thought."

Ceramic Science, 11 a.m., Room 301 Mineral Industries. Dr. N. L. Peterson, Argonne National Laboratory, on "Correlation and Isotope Effects for Cation Diffusion in Simple Oxides."

Astronomy, 4 p.m., Room 445 Davey. Dr. Thomas F. Adams, University of Chicago, on "The Morphology of Seyfert Galaxies."

Friday, April 9

Statistics, 1 p.m., Room 302 Pond. Ronald Butler, University of Michigan, on "Sample Re-Use Criteria for Detecting Outliers."

Monday, April 12

New Communities, Architecture, 2 p.m., Room 323 Sackett. Dr. Stanley Gilman, architectural engineering, on "Planning Systems of Heating, Ventilation and Air Conditioning within an Arid Region City."

Organic Chemistry, 8 p.m., Room 333 Whitmore. William Herndon, University of Texas, on "Isospectral Molecules (an Application of Graph Theory to Organic Chemistry)."

Tuesday, April 13

ARL, 10:45 a.m., Eric A. Walker Conference Room, Applied Science Bldg. F. E. Kaprocki on "An Operational Data System for Determining the Range and Aspect of a Long Acoustic Reflector."

Analytical Chemistry, 12:45 p.m., Room 445 Davey. D. C. Thornton on "Electrode Kinetics of Antimony (V)."

Physical Chemistry, 12 45 p.m., Room 333 Whitmore. W. C. Herndon on "Structure-Resonance Theory (A Quantitative Application of Resonance Theory)."

Solid State Physics, 1 p.m., Room 339 Davey. Dr. N. R. Ranganathan, Matscience, Indie, on "Magnetic Bloch States."

Solid Waste, 2:20 p.m., Room 140 Fenske. Paul Cardenas, New York Poly Institute, Brooklyn, on "Composting Makes a Tree Grow in Brooklyn. Ecology Inc."

Astronomy, 4 p.m., Room 445 Davey. Dr. Paul L. Schechler, Institute for Advanced Study, Princeton, on "Standard Candles and the Luminosity Function for Galaxies."

Engineering Mechanics, 4 p.m., Room 232 Hammond. Dr. C. K. Lim, International Business Machines Corp., on "An Accelerated Fatigue Model for Metals."

Mathematics, 4 p.m., Room 102 McAllister. Tarlok Nath Shorey, Institute for Advanced Study, Princeton, on "Some Applications of Linear Forms in Logarithms."

Inorganic Chemistry, 4 p.m., Room 333 Whitmore. Ron Pierantozzi.

Biochemistry and Biophysics, 4 p.m., Room 101 Althouse. Bernard Rolzman, Committee on Virology, University of Chicago, on "Molecular Organization of Herpes Simplex Virus DNA."

Seminar on Environment Reference Materials, 7 p.m., Room W110 Pattee.

Wednesday, April 14

Fuel Science, 4 p.m., Room 301 Mineral Industries. Wesley Hoffmen, graduate student, on "Pyrolysis of Propylene over Graphon Surfaces."

Thursday, April 15

Chemistry, 12:45 p.m., Room 333 Whitmore. Jack Baldwin, MIT, on "Synthesis of Peptide Alkaloids."

Air Pollution Control, 2:20 p.m., Room 145 Fenske. Donald A. Orth, E. I. du Pont de Nemours, Brownsn River Plant, S.C., on "Sand Bed Filters."

Physics, 3:50 p.m., Room 117 Osmond. O. Pines, University of Illinois, on "Neuiron Stars."

Agronomy, 4 p.m., Room 111 Tyson. Gerald A. Mellish on "Some Effects of Soil Warming and Waste Water Application on Crop Growth and Persistence."

Friday, April 16

Entomology and Biology, 1 p.m., Room 101 Althouse. Dr. Richard D. Alexender, University of Michigan, Ann Arbor, on "Speculation in Acoustical Insects."

Biochemistry and Biophysics, 4 p.m., Room 101 Althouse. Ponzy Lu, chemistry, University of Pennsylvania on "Structure Function Correletion In the lac Repressor (Fluorescence and NMR Spectroscopy without Tears)."

Lectures

Thursday, April 8

Graduate School Lecture Series, Dr. Harold J. Leavitt, Kilpatrick Professor of Organizational Behavior and Psychology, Stanford University, on "Problem Solving and Management," 8 p.m., Nittany Lion Inn assembly room.

Richard Pordes, UNICEF, "How the Developing Nations Helped Themselves and How Best Can the U.S. Help Them?" 8 p.m., HUB assembly room. Sponsored by Food Day Committee.

Friday, April 9

Manfredo Tafuri on "Order end Disorder," 4 p.m., Schwab. Sponsored by Architecture and Art History.

Monday, April 12

Dr. A. Doak Barnett, Brookings Institutions, on "The United Stetes, China and East Asia's New Four Power Equilibrium," 8 p.m., Room 108 Forum. Sponsored by the Graduate School, East Asian Studies Committee and Slavic and Soviet Language and Area Center.

Films

Friday-Sunday, April 9-11

Hemlock House film, "Cool Hand Luke," 7 and 9:30 p.m., Room 102 Forum.

Sunday, April 11

Free Shakespeare film, "Hamlet" (Olivier), 6:30 p.m., Room 101 Chambers.

Artists Series film, "The Treasure of Serra Madre," 8:30 p.m., University Auditorium.

Exhibits

Museum of Art: Recent Works by Stuart Frost, until April 11. Portraits USA: 1776-1976, opening April 18.

Zoller Gallery: Invasions, until April 10. Student Drawing and Printmaking Exhibition, opening April 15.

Kern Gallery: R. Logan Harrison, photography, until April 8. W. C. Handy Jazz Exhibit, until April 9. African Art, opening April 10.

Chambers Gallery: Art Alliance Invitational Exhibit, all media.

HUB (Main Lounge): Americana in The Netherlands (Royal Netherlands Information Embassy), until April 9. Suiting Everyone (Smithsonian Institution Traveling Exhibition Service.

HUB Gallery: Selections from the Permanent Collection at the Museum of Art. Recent Works by Stuert Frost, opening April 18.

Pattee Library: Main Lobby — The Ukranian Heritage in North America by W. O. Luciw. East Corridor Gallery—The Work of Wendell MacRae, photographer. Lending Services Lobby — Orewings end Paintings, Bill Diaz.

Paul Robeson Cultural Center: Paintings end Sculptures by the WYSO, a Ukranian Club Exhibit, until April 15.

Hammond Gallery: 40 Architectural Drawings by Jullan Weiss, through April 10.

Arts roundup

Ned Deihl, left, and William Dole

Blue Band concert April 11

The Penn State Concert Blue Band will present its annuel compus concert at 3 p.m. Sunday, April 11, in University Auditorium. The 95-member organization, under the baton of Dr. Ned C. Deihl, professor of music education end acting director of the Blue Band, will perform works of Mekrls, Bonelli, Grainger, Sousa end William Schumen. "Chester," based on a Revolutionary War tune, end "Chorale and Shaker Dance," built on an old Shaker hymn, add e Bicentennlel flavor. Featured soloist is William Dole, a bassoon instructor at Penn Stete and member of the Claremont Woodwind Quintet. He will perform e saxophone solo, "Introduction and Samba" by Meurice Whitney.

Thalia trio concert

The Thelle Trio will perform "Trio," opus 100 by Franz Schubert, es one of three works in its concert at 8:30 p.m. Wednesday, April 14, in the Music Bldg recital hall. The Schubert work was used in the score for the recent Stanley Kubrick film, "Berry Lyndon." The Thalio Trio, with Leonard Feldmen, cello, Joanne Zagst, violin, end Robert Belsley, piano, all of the music faculty, will also perform Haydn's "Trio in F Major" end "Trio In E Minor" by the contemporary American composer Alan Hovhonness.

Tafuri to lecture

Manfredo Tafuri, historian, critic, author end lecturer on architecture and architectural history, will speak on "Order and Disorder" at 4 p.m. Friday, April 9, in Schwab Auditorium. A professor at schools of architecture in Venice and Rome, Mr. Tafuri will be at the University under the sponsorship of the Departments of Architecture end Art History.

Film Follies annual

The annual Film Follies presented by students of graphic design will be held at 8 p.m. Tuesday, April 13, in Zoller Gallery. The slide shows, film leaders and films to be shown are senior students' responses to creative problems posed in a graphic design course on time and movement taught by Lenny Sommese, associate professor of art. A typicel challenge put to the class was to describe a metamorphosis in 12 slides and a sound track, with instructions to express a particular point of point of view on e current social problem within that framework.

WPSX highlights

Sir Cedric Hardwicke heads an all star cast when **Theatre Three** presents en uninterrupted showing of "Nicholas Nickleby" Saturday, April 10, et 9 p.m. The faithful film adaptation of Dickens' novel also stars Dame Sybil Thorndike, Cathleen Nesbitt, Sally Ann Howes, and Stanley Holloway

J. S Bach's "Passion According to St. Matthew" will be presented on a special two-part **Great Performances** program Wednesday and Thursday, April 14 and 15, et 9 p.m. The program features Karl Richter conducting the Munich Bach Orchestra end Choir and the Munich Boys Choir. Solosts include Peter Schreier, Ernst Gerold, Siegmund Minsgern, and Helen Donath. The two-part special will be repeated on Thursday, April 15, at 1:30 p.m. end Friday, April 16, at 1 p.m.

Haggadah — A Search for Freedom, a new Passover orstorio based on the traditionel Passover Haggadah, will be presented Wednesday, April 14, at 10 p.m. It was written by Morton Gold.

"Wilson Theatre" by Stuart Frost

Junk is what you make it

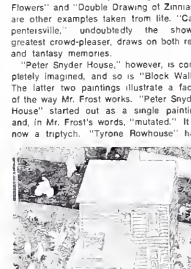
The attics of our minds are crammed with junk most of us would just as soon forget. Not so Stuart Frost. Confronted with a blank piece of paper or canvas, he calls forth a bewildering array of broken chairs and tables, dented plates, old tires, pitchers, pieces of railings, bricks, decaying automobiles, twigs, bent hangers and a host of considerably more ambiguous objects.

They are confronting viewers now in a remarkable series of paintings and drawings which will hang in the Museum of Art until April 11. Because of the enthusiastic response they have evoked, the show moves to the HUB April 18 in the new first floor gallery at the west end of the building.

Professor of art, Stuart Frost is almost a "local." He came to State College as a child — his father was professor of economic entomology in the College of Agriculture — and took his bachelor's degree at Penn State in 1949. As a student, he assisted Henry Varnum Poor in painting Old Main's land-grant murals and later worked with Allyn Cox executing frescoes in the Capitol Bldg. in Washington, D.C. This experience eventually brought him back to Penn State because, after studies at the Skowhegan School of Painting and Sculpture and the Brooklyn Museum School, he was asked by Dean Edward Steidle in 1953 to paint a mural showing the world's mineral resources. It still covers the walls of the Mineral Sciences Auditorium.

During some 23 years here, Mr. Frost has had a number of one-man shows and group exhibitions, both on campus and across the state, and a retrospective exhibit of his career has just been taken down from the walls of Zoller Gallery. But even those viewers who have followed his career with reasonable attentiveness will be unprepared for the scale of the Museum's paintings.

"I'd been working on some complex drawings and one of my feelings was that I'd like to see them larger," the artist explains. "The time was ripe; I had a grant from the Institute for the Arts and Humanistic Studies to take some time off to prepare a show.



"I had worked myself out of color stages. Rather than wanting to solve color problems, I had became interested in reality problems that seemed colorless. I decided to carry my drawing ideas to maximum size."

Another impetus was his desire to make a kind of reality out of field painting. Field painting, as exemplified by the large abstract canvases of Kenneth Noland or Mark Rothko, allows the viewer to move into the painting without seeing around the edges of it.

"I wanted to see what would happen," Mr. Frost continues, "if you couldn't see around the edges. Also field painting seems to have only one vantage point. I wanted my pictures to pose different meanings to a spectator examining them closely, to one standing at an intermediate distance and to one looking from far off. "Carpentersville" in the show offers an aerial view of a town and seems realistic on one level. But if you stand off, the way the light reflects on the white areas also gives it a feeling of abstraction."

Mr. Frost describes the 17 paintings in the show as both record and memory pieces. For some of them, he simply sat down in front of an object and drew it. He spent three afternoons in Tyrone working on his complex, evocative drawing of the "Wilson Theatre" (and in the process accumulating a good deal of information about the building's past history from passersby who stopped to chat). "Tyrone Rowhouse" and the lovely drawings of "Wild Flowers" and "Double Drawing of Zinnias" are other examples taken from life. "Carpentersville," undoubtedly the show's greatest crowd-pleaser, draws on both real and tantasy memories.

"Peter Snyder House," however, is completely imagined, and so is "Block Wall." The latter two paintings illustrate a facet of the way Mr. Frost works. "Peter Snyder House" started out as a single painting and, in Mr. Frost's words, "mutated." It is now a triptych. "Tyrone Rowhouse" had

"Carpentersville," a detail

sides added. As for "Block Wall," the artist originally made the lower right hand panel because he wanted to resolve the image ot a wall in his mind. Then he began to revise it, spreading it apart and putting a piece in the middle.

"I was two-thirds through the first panel when I thought of the second," he explains, "and two-thirds through the second when I thought of the third. I finished them all together because it was the only way to make a cohesive painting. I actually showed the three bottom panels at Kutztown two years ago and thought the wall problem was solved. Then just this year I looked at it and decided it needed a top half. I designed the three upper panels together to go with the lower ones. I had thought they would finish the wall and make an enclosure, but somehow the wall seemed to grow out of the picture so it's still open-ended.

"My things just seem to get bigger and bigger. I've even wondered whether 'Carpentersville' should have side panels!"

Some of Mr. Frost's memory pictures are begun without preconceptions. Three examples in his current show are "Town," "New Construction" and "Thicket."

"I began," he says, "by just making arbitrary marks on a canvas. They might be straight or curving lines. When I got enough down, I saw how they would make a picture. I had nothing in mind when I started "New Construction," for example. I made a lot of straight lines, which started to look like walls and houses, and that's what they developed into."

Mr. Frost denies any intention ot making a sociological statement with his art.

"I get a sort of visual enjoyment from an automobile junkyard," he comments, "but if I draw one, I'm not saying I want to live there or see it removed. I'm simply sharing my visual enjoyment. I think artists see things in a slightly different way from the general public because we are trained to use our eyes differently. I hope t encourage people to look at things a little more carefully or in different ways. That's my only message.

"I'm also more interested in being ambiguous than in being explicit. I can recall as a student that if an English professor wrote on a theme, 'That's ambiguous,' it was a criticism. But for me, ambiguity allows viewers to read into my work something of their own. The viewer thus becomes part of making a work of art. If you're too explicit it's hard to make your work live for another generation where people may have totally different concepts. I'm willing for people to make out of that junk what they will!"

Art symposium

A Symposium on American Portrait Painting will be presented Tuesday, April 20, in conjunction with the exhibition, "Portraits USA:1776-1976," opening April 18 at the Museum of Art.

Speakers and their topics are:

Wayne Craven, H. F. du Pont Winterthur professor of art history at the University of Delaware and author of "Sculpture in America," will lecture on "Reflections of America In Portraiture 1800-1900: Romantic, Realistic and Introspective."

Harold E. Dickson, professor emeritus of art history at Penn State, will speak on "Some That Got Away."

Walton J. Lord, associate professor of art history at Penn State, will discuss "The American Revolution in Art."

Further information about the symposium, a continuing education service of the College of Arts and Architecture, is available from Room 410 Keller Bldg. or at 865-7557.

Medicine is focus
(Continued from page one)

charges for professional services.

Much of the cross-examination dealt with the College of Medicine budget, which Dr. Prystowsky said is made up of four major components — general funds, University services, contracts and grants, and auxiliary enterprises.

Also under cross-examination, he outlined the procedures for accreditation of the College of Medicine.

During the hearings, the hearing examiner received a petition signed by 219 of 340 faculty members in the College of Agriculture asking "to be excluded from any collective bargaining organization formed to represent the faculty of The Pennsylvania State University."

Mr. Lawrence, es he had done earlier with a similar petition from the College of Earth and Mineral Sciences, ruled that the College of Agriculture faculty has a right to be an intervenor and be heard for the limited purposes of why or why not they should be included in a unit.

The hearings are scheduled to resume at 9 a.m. June 2 et University Park and will continue June 3 and 4.

Funding sources

For further information, call 865-1372

(221-1) The OHEW Public Health Service has issued proposed rules for **institutional health services** governing procedures and review criteria, grants, statewide coordinating council requirements and federal limits for capital participation. (Re 41 FR11687-711, 3/22/76)

(221-4) The Office of Education has issued funding criteria for **FY 1976 graduate and undergraduate international studies programs.** (Re 41FR12732, 3/26/76) (CFDA 13.435)

(221-5) The Public Health Service has issued proposed rules to require appropriate scientific peer review of PHS grant applications and contract proposals for biomedical and behavioral research administered by NIH and ADAMHA. Comments received prior to May 26 will be considered. (Ref. 41FR12985-86, 3/29/76)

FELLOWSHIPS

(For additional information inquire at 317 Kern, 865-2514, Ref. FO NO. 76-5)

(221-6) Bureau of Indian Affairs, scholarships.

(221-7) American Psychological Association, minority students, deadline April 20.

(221-8) National Institute of Law Enforcement and Criminal Justice, for research in Washington, D.C.

(221-9) North Atlantic Treaty Organization in public policy, deadline April 30.

(221-10) Pharmaceutical Manufacturers Association, doctoral dissertation research grants, comprehensive by Aug. 31.

Staff vacancies

This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1367 (network line 475-1367). Applications for these staff vacancies will be accepted until **5 p.m., April 15, 1976, DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

SENIOR SYSTEMS PROGRAMMER, MANAGEMENT SERVICES — University Park

Responsibility for OS/SVS and HASP. Other responsibilities will include system generation, maintenance, modifications, performance and configuration evaluations. Will also assist in directing the work program for systems programmers. Bachelor's degree or equivalent plus two to four years of directly related experience ot which one to two years should be at the Systems Programmer level. Additional desired qualifications: Knowledge of software system generation concepts and techniques, understanding of operating system concepts, general retrieval methods, and capability for independent problem solving software problems.

AREA REPRESENTATIVE — Penn Conservation

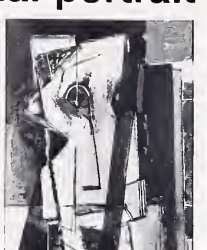
Responsible for the functions of development, organization, operation and administration of Continuing Education programs and activities within the assigned geographical district. Bachelor's degree or equivalent with two to three years of directly related experience in business, industry or education.

MEDICAL SOCIAL WORKER II — Hershey

Responsible to the Social Services Coordinator for providing inpatient and outpatient medical social services and provide practical help and emotional support to patients and their families. Master of Social Work degree from an accredited college or university, or equivalent, and two to three years of directly related professional experience.

THE UNIVERSITY IS AN EQUAL OPPORTUNITY/AFFIRMATIVE ACTION EMPLOYER

Housing listing available



University Park faculty or staff who want to rent their houses can contact Housing Referral Service, Room 313 Willard Bldg., 865-1538. A project of the Faculty Women's Club, the service is open Tuesday from 9.30 to 11:30 a.m. end Thursday from noon to 2 p.m. Fees for being included in the listing are $2 for Faculty Women's Club members and $4 for non-members.

Bicentennial portrait show opens Sunday

From Portraits USA, two paintings of George Washington. Above left, as portrayed in 1795 by Adolph Wertmuller; at right, by Allred Henry Maurer in 1932. Below left, Ivan Albright's 1935 "Self Portrait;" right, "Judge Stephen Mix Mitchell" painted in 1826-27 by Samuel F. B. Morse.

"Portraits USA/1776-1976," the special painting exhibition celebrating the Nation's Bicentennial, opens Sunday, April 18, in the Museum of Art.

Sixty portraits, each by a different artist, make up the exhibit, one of four major projects selected for support by the University Bicentennial Commission.

Drawn from private and public collections throughout the United States, the paintings were chosen less for the subjects depicted than for their quality, diversity and historical significance. Planning for the exhibition was begun over three years ago by William Hull, director of the museum, and Dr. Harold Dickson, professor emeritus of art history.

Portraiture was selected as the general category for the exhibition, according to Dr. Dickson, because it allows viewers to see the range of artistic treatments possible in the handling of a similar subject.

Portraits are especially appropriate for a Bicentennial exhibition, Mr. Hull noted, because they vividly reflect their time, not only in the clothes and accouterments of the period but also in the attitude of the artist, to the degree his style was influenced by the time in which he worked.

The earliest portrait in the exhibition is John Trumbull's "Self Portrait," painted in 1777, and the most recent, Andy Warhol's serial portrait of his mother, "Julia Warhola," done in 1974.

Works from the Federal era include Stuart's "Dr. William Samuel Johnson," Copley's "Mrs. John Montresor," and Sully's "Joseph Dugan."

Among the later works are Andrew Wyeth's "Day of the Fair," portraying a shy young girl dressed up to attend a May-time festival at school, and Larry Rivers' "Portrait of J.H.H.," a somewhat unconventional treatment of Joseph Hirshhorn, loaned by the Smithsonian's Hirshhorn Museum and Sculpture Garden.

Also on view will be two treatments of George Washington, one painted in 1795 by Adolph Wertmuller and one in a distinctly different style done in 1932 by Alfred Henry Maurer.

The Bicentennial exhibition is probably the only occasion when these 60 American paintings will be shown together in one exhibit, and one of its highlights is Samuel F. B. Morse's "Judge Stephen Mix Mitchell," termed by some art historians the single most notable American portrait.

Most of the subjects in the paintings are Americans, although there are three exceptions: Nathaniel Jocelyn's "Cinque," an African abducted and enslaved in the mid-nineteenth century slave trade and subsequently freed in the most significant Supreme Court slavery case prior to the Dred Scott decision; Marsden Hartley's Nova Scotian "Adelard the Drowned, Master of the Phantom;" and Jack Levine's "Six Masters: A Devotion."

Henry Varnum Poor, the painter of the Land-Grant frescoes in Old Main, is represented in the exhibit by a 1940 portrait of then-University president Ralph Dorn Hetzel, commissioned by the Board of Trustees. The portrait is tonally keyed to and was to be situated near the frescoes.

Mr. Hull and Dr. Dickson credit their very early start in contacting lenders for their success in putting together the exhibit in a year when many of the portraits were in great demand for exhibits elsewhere. Lenders included the National Academy of Design, the Wadsworth Atheneum, the New York State and Connecticut historical societies, the National Portrait Gallery, the National Gallery of Art and many other public and private collections.

"Portraits USA/1776-1976" will remain on view in the Museum of Art through June 6.

News briefs

Interdisciplinery colloquium

Eight prominent scholars from around the nation will join five Penn State faculty members for an interdisciplinary colloquium on "The Continuing American Revolution in World Perspective" Thursday through Saturday, April 22-24, in Keller Bldg.

Although related to the Bicentennial, the focus of the conference is contemporary, according to Dr. Gerard A. Hauser, associate professor of speech communication and associate director of the Interdisciplinary Graduate Program in the Humanities, which is helping to sponsor the colloquium.

The three-day conference is divided into four broad topics, each of which takes a different perspective on the ways in which recent developments are reshaping men's lives. Themes include The Arts and Revolutionary Consciousness, Politics and Government, the Political Economy, and Consciousness and Revolutionary Change.

The entire conference is open to the public without charge. A listing of speakers, times and dates appears in the weekly INTERCOM Calendar on page 3.

Pitt votes "No Rep"

The results of a run-off election held March 30 and 31 for the faculty in the provost's area at the University of Pittsburgh were announced on Thursday, April 8, by the Pennsylvania Labor Relations Board.

No Representation, the leader in last month's first election, received 662 votes (60.2%). The remaining contender in the election, the Pitt Professional Union (American Federation of Teachers) received 438 votes (39.8%).

The 1,100 faculty voting in the election represented 88% of the eligible voting unit and were just 26 short of the 1,126 unchallenged ballots in the preliminary election. The faculty in the provost's area joined the faculty in the Law School and in the allied health professions who had earlier rejected collective bargaining without a run-off election.

Patrons' renewals asked

The Artists Series reminds patrons that ticket renewals for the 1976-77 season are due by Friday, April 23. Those wishing to change their seat locations should get their requests in as soon as possible since they will be handled in the order in which they are received. For further information or assistance, phone the Artists Series office, 865-1871.

Bonis to lecture

Dr. George P. Bonis, a Visiting Fellow of the Institute for the Arts and Humanistic Studies during April and early May, will deliver two public lectures in his specialty area, the medieval and early modern legal and constitutional development of Eastern Europe.

A Hungarian, Dr. Bonis was formerly professor of legal history at the Universities of Kolozsvar and Szeged. He is currently a scientific advisor to the Institute for Literary Science of the Hungarian Academy of Sciences and serves as vice president of the International Commission for the History of Representative and Parliamentary Institutions. He is the author of more than ten books and 150 articles.

His lectures will be at 8 p.m. in Room 101 Kern Bldg. On Tuesday, April 20, he will discuss "Hungarian Representative Institutions in the Later Middle Ages and the Early Modern Era." His topic on Thursday, April 29, will be "The Hungarian Estates in the Hapsburg Monarchy in the 18th Century."

Alard concert April 21

The Alard String Quartet, which recently completed a concert tour of Georgia and Florida, will perform its final concert of the academic year at 8:30 p.m. Wednesday, April 21, in the Music Bldg. recital hall.

The program includes Mozart's "Quartet in B-Flat Major," Husa's "Quartet #3" and "Quintet for Piano and Strings" by Walter Piston.

Joining quartet members Joanne Zagst and Donald Hopkins, violins, Raymond Page, viola, and Leonard Feldman, cello, for the Piston work will be pianist Steven Smith.

Business Services' open house

There will be an open house at the new Business Services Bldg. from 10 a.m. to 4 p.m. Friday, April 23. The building contains Printing Services, the University's Mail and Addressing Services, Telephone Services' business office and the administrative offices for Copying Center Services. Lewis Mothersbaugh, director of printing and communication services, invites all members of the University community to tour the building.

New Form W-4E due

The Controller's Office reminds employees who filed a Withholding Exemption Certificate — Form W-4E for 1975 that this certificate will expire April 30, 1976, for taxpayers on a calendar year basis. The exemption claimed on Form W-4E must be renewed annually.

If you qualify and wish to continue your exemption, or if you are applying for the first time, you must file a new Form W-4E for 1976. You may claim the exemption from withholding if you had no income tax liability for 1975 and if you anticipate no income tax liability for 1976. Forms are available from the Payroll Department, Room 301 Shields Bldg.

In general, the elimination of the withholding applies only to those working part-time. The principal advantage is that it will eliminate the need to file an income tax return at the end of the year to obtain a refund of money withheld.

PENN STATE COLLECTION

Faculty notes

Frank C. Lordi, an instructor in accounting at the Delaware County Campus, has been named outstanding teacher of the year there. His selection was made after a poll of students, faculty, administrators and alumni of the Campus. A faculty member since 1972, Mr. Lordi holds a B.S. and M.B.A. in accounting from Penn State. He was cited for his "excellent teaching, high standards and concern for students, and his outstanding contributions to all aspects of Campus life."

Dr. Joseph L. French, professor and head of the Department of Special Education, has been awarded a certificate of recognition by the U.S. Office of Education for the Gifted and Talented for the significant contributions he has made to the education of gifted and talented youth.

Drawings and photographs by **Dr. Paul Edmonston,** associate professor of art education, are on exhibit through April 19 at the Harlan Ali Gallery of Seton Hill College, Greensburg. His show incorporates some of the drawings which he showed at Chambers Gallery in 1972, along with a number of new works, many derived from his studies in South Indian and Indian art and aesthetics. There are some 40 photographic images in color and black and white dealing with similar themes, with some landscapes and figures from the West as well.

Three papers co-authored by faculty members in the Department of Industrial and Management Systems Engineering were presented at the annual meeting of the Operations Research Society of America held in Philadelphia March 31-April 2. In addition to delivering a paper on "Approximate Solutions for Some Two-Storage Tandem Queues," **Dr. Matthew Rosenshine,** associate professor, chaired a session on Queueing Theory — Design and Control. **Dr. E. Emory Enscore,** assistant professor, co-authored the paper, "A Simulation to Determine the Initial Location of Automatic Switching Nodes in a Telephone System." "The Operational Evaluation of Social Service Delivery Systems," co-authored by **David L. Raphael,** professor, and students **Carol A. Kunig** and **Gordon D. Smith**, was also presented at the meeting.

Ruth L. Yealon, instructor in theatre arts, served as a theatre consultant in secondary education for the U.S. Department of State at a recent meeting of the Association for the Advancement of International Education in Atlantic City, N.J.

Two from CBA get chairs

Prof. Nelson

Prof. Devereaux

Dr. G. Kenneth Nelson, professor of accounting, and **John Paul Devereaux,** assistant professor of accounting, have received 25-year service awards from the University.

Dr. Nelson holds a B.S. degree from the University of Pennsylvania and M.S. and Ph.D. degrees from the University of Illinois.

A certified public accountant, he has held office in many local, state and national accounting organizations, including two terms on the board of directors of the National Association of Accountants. He is currently national vice president of that organization and regional vice president of the American Accounting Association. In 1960 he was selected for membership in the Stuart Cameron MacLeod Society.

Dr. Nelson's main area of academic interest is managerial accounting. He has written widely on that subject in accounting publications and is co-author, with Prof. Joe Cramer, of the book "Budgeting Problems." As a teacher he pioneered the development of the use of television for teaching accounting.

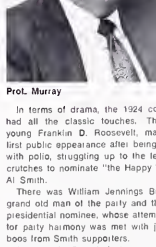
Dr. Charles L. Newman, professor of law enforcement and corrections services, has been invited to serve as a technical consultant for a national symposium on "Issues and Strategies for Dealing with Drug-Abusing Criminal Offenders," which will be held April 20-23 in Reston, Va. Dr. Newman headed a recent national study on drug programs in jails.

Dr. Frederick Hussey, assistant professor of administration of justice, is the author of an article published in the February issue of "Criminology" on "Perspectives on Parole Decision Making with Juveniles."

Murray recreates 1924 Democratic struggle

A Republican President is disgraced by scandal. His lackluster vice-president finishes his term and, disassociating himself from his predecessor, runs for reelection.

Meanwhile, the Democrats, in a perfect position to take over the White House, head for their nominating convention in Madison Square Garden. But the differences between the urban-liberal wing and the southern-conservative wing produce scores of candidates and scars of acrimony resulting in a Republican victory in November.



It could be 1976, but this scenario is based on the 1924 Democratic National Convention, which is vividly brought to life in "The 103rd Ballot: Democrats and the Disaster in Madison Square Garden," a new book by Dr. Robert K. Murray, professor of American history. It is being published by Harper and Row.

Dr. Murray describes his book as a popular history.

"I wrote it for the general public," he explains, "but, out of deference to my colleagues, I have put in the back of the book notes which refer to sources even though I dispense with footnotes."

Slated for publication April 21, the book has been selected by the History Book Club and drawn accolades from critics such as Theodore S. White, who termed it, "an exciting reconstruction of one of the most dramatic episodes in American political history."

An adaptation of one chapter of the book appears in this month's "Smithsonian Magazine."

Prof. Murray

In terms of drama, the 1924 convention had all the classic touches. There was young Franklin D. Roosevelt, making his first public appearance after being stricken with polio, struggling up to the lectern on crutches to nominate "the Happy Warrior," Al Smith.

There was William Jennings Bryan, the grand old man of the party and three-time presidential nominee, whose attempt to call for party harmony was met with jeers and boos from Smith supporters.

It was to be Bryan's last convention. The man who had dominated the party for a generation died the next year. Roosevelt, on the other hand, went on to become the hero of the convention, a man who had the respect of all factions of the party, and the man who was destined to dominate the party for the next generation.

According to Dr. Murray, the Madison Square Garden convention "involved more arguments, aroused more passion, left more wounds and shed more political blood than any other single incident" in the Democratic Party's modern history.

The 1924 convention was also a statistical wonder. It lasted longer than any other convention: 16 sweltering days. It was deadlocked for 102 ballots. It heard more speeches, experienced more fist fights, wrote the longest platform, spent the most money and went more deeply in debt. In terms of debris collected, hot dogs consumed and soda pop drunk, it also set a record.

And, because it was the first convention to be broadcast nationwide, the entire country was able to listen to the disaster on radio.

Could it happen again?

"Not likely," answers Dr. Murray.

In spite of the superficial similarities between the 1924 and 1976 conventions (this year's will also be held in Madison Square Garden), the advent of television has made the parties more conscious of their image, and reform in party rules has also lessened the chance of deadlocks.

Dr. Murray is the author of three previous books; "The Red Scare: A Study in National Hysteria 1910-1920," "The Harding Era: Warren G. Harding and His Administration," and "The Politics of Normalcy."

Obituaries

Donald Byrne, assistant professor of English, died April 8 at age 45. A native of Brooklyn, N.Y., Mr. Byrne was captain of the U.S. team in the 1966 Chess Olympics in Havana, Cuba, and won the U.S. Open Chess title in 1953. A member of the faculty since 1961, Mr. Byrne received his B.A. from Yale University and his M.A. from the University of Michigan. Before joining the faculty, he served as an instructor at Valparaiso University and at Olivet College. He was coach and advisor to Penn State's chess team.

Dr. Samuel W. Blizzard Jr., 61, former professor of sociology and rural sociology at the University, died April 6. Dr. Blizzard joined the Princeton faculty as professor of sociology in 1957 after teaching and conducting research in urban and rural community relations at Penn State for 10 years. Prior to joining the Penn State faculty, he taught sociology at the College of Wooster and at Cornell University.

Dr. James H. Moyer, who retired from the faculty as professor emeritus of education in 1962, died April 3. He came to Penn State in 1937, after obtaining a B.S. in agricultural economics at Kansas State and his M.A. and D.Ed. from Columbia Teachers College. Dr. Moyer headed the Department of Secondary Education from its inception in 1959 until he retired. He was a co-author of the book," Planning Co-Curricular Activities."

AAUP to meet

The University Park Chapter of the American Association of University Professors (AAUP) will hold its annual membership meeting at 8 p.m. Monday, April 19, in Room 101 Kern Bldg. The nominating committee will present nominees for the executive board and chapter officers. Nominations may also be made from the floor. Chapter President Robert Scholl will moderate a panel discussion on "After Pitt: Whither Collective Bargaining." A brief report will also be made on the progress of the PLRB unit determination hearings and the Pennsylvania Division meeting at Carlisle.

University Park Calendar

April 15—25

Items to be included in this calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, April 15
Sports: Women's lacrosse, vs. West Chester, 2 p.m.
University Theatre, "The Balcony," 8 p.m., Playhouse Theatre.
University Theatre experimental production, "Jules' Gems," 5:20 p.m., Pavilion Theatre.

Friday, April 16
Sports: Men's lacrosse, vs. North Carolina, 8 p.m.
University Theatre, "The Balcony," 8 p.m., Playhouse Theatre.
University Theatre experimental production, "Jules' Gems," 7:20 p.m., Pavilion Theatre.

Saturday, April 17
Sports: Men's baseball, vs. George Washington, 1 p.m. Men's tennis, vs. George Washington, 2:30 p.m.
University Theatre, "The Balcony," 8 p.m., Playhouse Theatre.
Stone Valley Recreation Area, rental boat operations and private boat launchings begin. For information, call 238-5872.

Sunday, April 18
Chapel Service, 11 a.m., Music Bldg. recital hall. The University Chapel Choir's Easter Concert. Raymond Brown, director, Tommie Irwin, assistant director.
Black Christian Fellowship worship service, 11:15 a.m., Eisenhower Chapel. Pastor Gerald G. Loyd, Children's Choir.
Sports: Men's tennis, vs. East Stroudsburg, 2:30 p.m.
Shavers Creek Nature Center, Ecology Walk, 3 p.m., Mineral Industries Bldg., Stone Valley.

Monday, April 19
Exercise Demonstration, Figure Control and Body Awareness, noon, Room 101 Kern. Paul Yarbrough, viola, 8:30 p.m., Music Bldg. recital hall.

Tuesday, April 20
Sports: Men's tennis, vs. Bucknell, 2:30 p.m.
Symposium on American Portrait Painting sponsored by the Friends of the Museum of Art in conjunction with "Portraits USA: 1776/1976," Keller Conference Center.
Poetry reading by Marilyn Hacker, 8 p.m., HUB reading room

Wednesday, April 21
Sports: Men's tennis, vs. Bloomsburg, 3 p.m.
Alard String Quartet, 8:30 p.m., Music Bldg. recital hall.

Thursday, April 22
Interdisciplinary Colloquium on "The Continuing American Revolution in World Perspective," panel discussion with speakers Murray Sperber, Indiana University, Philip Klass, and Bertrand Davezak, moderator, on "The Arts and Revolutionary Consciousness," 2 p.m., Keller. Banquet, 6 p.m., with Norman Graebner, University of Virginia, on "The American Revolution in World Perspective."
Sports: Men's baseball, vs. Gettysburg, 2:30 p.m. Women's tennis, vs. Maryland, 1:30 p.m.
Commons Videotape Lincoln, Kern lobby. "Bikini Season is Right around the Corner," (grooming tips).
Naiads water show, "To Every Thing There Is a Purpose," 8 p.m., Natatorium.
University Theatre's selections from Studs Terkel's "Working," 8 p.m., Room 112 Kern.

Friday, April 23
Business Services Bldg. open house, 10 a.m.-4 p.m.
"The Continuing American Revolution in World Perspective," with speakers William Gamson, University of Michigan, and William Hinton, U.S.-China Peoples Friendship Assn., and John Wilkse, moderator, on "Politics and Government," 9:30 a.m., Keller. Speakers Stanley Aronowitz, Staten Island Community College, CUNY, Manley Irwin, University of New Hampshire, and Charles Crappo, moderator, on "Economics," 2 p.m., Keller. Performance of Modern American music by Alard Quartet, 8:30 p.m., Keller.
Sports: Men's baseball, vs. Duquesne, 2:30 p.m. Women's EAIAW Regionals, 9 a.m.
Folk and Square Dance Roundup, 7:30 p.m., White.
University Readers, selections from Studs Terkel's "Working," 8 p.m., Room 112 Kern.
The Theatre of the Open Eye, 8 p.m., Playhouse Theatre.
Naiads water show, "To Every Thing There Is a Purpose," 8 p.m., Natatorium.
Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Penn State Symphonic Wind Ensemble, 8:30 p.m., Music Bldg. recital hall.

Saturday, April 24
"The Continuing American Revolution in World Perspective," with speakers George Gerbner, University of Pennsylvania, Marilyn Young, University of Michigan, and moderator E-Tu Zen Sun on "Consciousness and Revolutionary Change," 9:30 a.m., Keller.
Sports: Women's track, EAIAW Regionals, 9 a.m.
Fourth Annual Behrend College Colloquium in History on "Interpretations of the American Revolution: Two Centuries of Controversy."
The Theatre of the Open Eye, 8 p.m., Playhouse Theatre.
Naiads Water Show, "To Every Thing There Is a Purpose," 8 p.m., Natatorium.
"EMAX '76," College of Earth and Mineral Sciences Exposition and Open House, 1-5 p.m., Mineral Industries, Mineral Sciences, and Deike.

Szymon Goldberg

Artists Series, Netherlands Chamber Orchestra, Szymon Goldberg conducting, 8:30 p.m., University Auditorium.

Sunday, April 25
Chapel Service, 11 a.m., Music Bldg. recital hall. Rev. Norman O. Conway, First Baptist Church, North Vandergrift, Pa.
Black Christian Fellowship worship service, 11:15 a.m., Eisenhower Chapel. Rev. Samuel L. Jenkins, Black Christian Fellowship Mass Choir.
Shavers Creek Nature Center, Early Morning Bird Walk, 7 a.m.; Ecology Walk, 3 p.m., Mineral Industries Bldg., Stone Valley.
Sy Barash Country Regatta, 11 a.m.-5 p.m., Stone Valley. Sponsored by Beta Sigma Beta and Kappa Delta for the benefit of the American Cancer Society. Registration through April 23.
Sports: Men's baseball, vs. Rider, 1 p.m. Men's lacrosse, vs. Rutgers, 1 p.m.
Charles Nobel, piano, 3:30 p.m., Music Bldg. recital hall.

Seminars

Thursday, April 15
Chemistry, 12:45 p.m., Room 333 Whitmore. Jack Baldwin, MIT, on "Synthesis of Peptide Antibiotics."
Air Pollution Control, 2:20 p.m., Room 145 Fenske. Donald A. Orth, E. I. du Pont de Nemours, Savannah River Plant, S.C., on "Sand Bed Filters."
Physics, 3:50 p.m., Room 117 Osmond. D. Pines, University of Illinois, on "Neutron Stars."
Agronomy, 4 p.m., Room 111 Tyson. Gerald A. Mellish on "Some Effects of Soil Warming and Waste Water Application on Crop Growth and Persistence."
Ceramic Science, 11 a.m., Room 301 Mineral Industries. Dr. L. G. Van Uitert, Bell Telephone Lab., Murray Hill, on "Crystals, Films and Fibers."
Population Issues Research, 2:30 p.m., Room 341 Deike. Dr. John Kantner, Johns Hopkins, on "Teen-Age Sexuality and Fertility in the U.S."
Computer Science, 4 p.m., Room 325 Whitmore. David K. Hsiao, Ohio State, on "The Architecture of a Database Computer, Part I: Concepts and Capabilities."
Meteorology, 4 p.m., Room 26 Mineral Sciences. Dr. Hans A. Panofsky, Evan Pugh Professor of Atmospheric Sciences, on "Threats to the Ozone Layer."
Mathematics, 4 p.m., Room 103 McAllister. Kenneth McAloon, Rockefeller University, on "Completeness and Incompleteness in Mathematical Logic."
Biochemistry and Biophysics, 4 p.m., Room 101 Althouse. Ponny Lu, chemistry, University of Pennsylvania, on "Structure-Function Correlation in the 'Lac' Repressor (Fluorescence and NMR Spectroscopy without Tears)."

Friday, April 16
Entomology and Biology, 1 p.m., Room 101 Althouse. Dr. Richard D. Alexander, University of Michigan, Ann Arbor, on "Speculation in Acoustical Insects."
Computer Science, 4 p.m., Room 325 Whitmore. Nick Cercone, Old Dominion University on "Representing Word Meaning and Factual Knowledge."
Astronomy, 4 p.m., Room 445 Davey. Ira G. Nolle, University of Oregon, on "Infrared Observations of Saturn."

Monday, April 19
New Communities, Architecture, 2 p.m., Room 322 Sackett. Jerome Rothenberg, Office of Policy Development and Research, Div sion of Energy Building Tech., on "Design of Utilities and Their Implementation Process in An Arid City."
Genetics, 3:55 p.m., Room 111 Tyson. Richard Cleveland, agronomy, on "Goals in the Breeding of Red Clover."
Organic Chemistry, 8 p.m., Room 333 Whitmore. William Smolnycki on "Syntheses Involving Palladium Salts."

Tuesday, April 20
Analytical Chemistry, 12:45 p.m., Room 445 Davey. D. H Waugh on "Peak Enthalpometry and Thermometric Titrations of Thiols."
Solid State Physics, 1 p.m., Room 339 Davey. Dr. F. H. Fenton, ARL, on "Solitons, a Phenomenological Review of their Properties with an Assessment of their Potential Application to Acoustics and Solid State Phenomena."
Solid Waste, 2:20 p.m., Room 140 Fenske. Edward Vitunac, consultant, Pittsburgh, on "The Politics of Promoting Public Solid Waste Systems."
Physics, 3:50 p.m., Room 117 Osmond. Charles Shank, Bell Telephone Lab., Murray Hill, on "Ultra-short Optical Pulses and Semiconductors."
Astronomy, 4 p.m., Room 445 Davey. Dr. Janet R. Lesh, University of Denver Observatory, on "The Enigma of the Beta Cephei Stars."
Engineering Mechanics, 4 p.m., Room 232 Hammond. J. G. Kaufman, Senior Engineering Associate, ALCOA, on "High-Temperature Sustained Load Crack Growth (Creep Cracking) of Aluminum-Copper Alloys."
Inorganic Chemistry, 8 p.m., Room 333 Whitmore. Dr. A. P. Ginsberg, Bell Telephone Lab.

Wednesday, April 21
Chemistry, 12:45 p.m., Room 333 Whitmore. Donald F. Smith, Northwestern, on "On-line Fourier Transform Data Processing Applications in Electrochemistry."
Air Pollution Control, 2:20 p.m., Room 145 Fenske Jiri Tichy, architectural engineering, on "Methods of Measurement of Noise Emissions from Machines."
Anthropology, 3:30 p.m., Room 112 Kern. Dr. David Maybury-Lewis, Harvard, on "The Study of Dual Organizations in South America."
Physics, 3:50 p.m., Room 117 Osmond. Martin Klein, Yale, on "The Early Career of Willard Gibbs."
Agronomy, 4 p.m., Room 111 Tyson. J. Harold Stern on "Nitrogen Utilization by Several Irrigated Tropical Forage Grasses on Oolitic Limestone Soil on Andros, Bahamas."
Meteorology, 4 p.m., Room 26 Mineral Sciences. Dr. Robert Ellingson, Institute for Fluid Dynamics and Applied Mathematics, University of Maryland, on "Preliminary Results of a Gate Long Wave Radiation Study."

Friday, April 23
Geosciences, 4 p.m., Room 22 Deike. Dr. Malcolm Ross, U.S. Geological Survey, on "The Mineralogy and Petrology of Pyroxenes in Igneous and Metamorphic Rocks."

Lectures

Thursday, April 15
Fitzhugh W. Boggs Memorial lecture, 2 p.m., Room 112 Kern. Dr. Matthias Hubert, acoustics, Technical University, Berlin, on "Recent Developments in Architectural Acoustics."

Monday, April 19
York Campus Lecture Series, 2 p.m., York Campus. Alfred Kazin, Hunter College, CUNY, on "Images and the American Revolution in American Writing."

Tuesday, April 20
Department of History and Institute for the Arts and Humanistic Studies lecture, 8 p.m., Room 101 Kern. Dr. George Boniface, Visiting Professor of History and Fellow of the Institute for the Arts and Humanistic Studies, on "Hungarian Representative Institutions in the Later Middle Ages and the Early Modern Era."

Friday, April 23
German Department Lecture Series, 8:30 a.m., Room 101 Kern. Walter Picard on "Germany In a Changing World."

Films

Monday, April 19
Free Shakespeare film, "Hamlet" (Williamson, Richardson), 6:30 p.m., Room 101 Chambers.
French Film Series, "Children of Paradise," 8 p.m., Room 112 Kern.

Tuesday, April 20
Free Shakespeare film, "Hamlet" (Olivier), 6:30 p.m., Room 101 Chambers.
Artist Series film, "81/2," 8:30 p.m., University Auditorium.

Meetings

Friday, April 16
GSA, 8 p.m., Room 101 and 102 Kern.

Monday, April 19
AAUP annual membership meeting, 8 p.m., Room 101 Kern.

Tuesday, April 20
Senate Council, 2 p.m., Room 101 Kern.

Wednesday, April 21
Ag Advisory Council, 9 a.m., Room 101 Kern.
Grad Council, 2:30 p.m., Room 101 Kern.

Thursday, April 22
College of Education Faculty Council, 2:30 p.m., Room 101 Kern.
Penn State Chapter of Sigma Xi, initiation banquet, 6:30 p.m., Nittany Lion Inn. Provost Russell E. Larson on "Scientific Research at Penn State: Some Thoughts of Things to Come."

Exhibits

Museum of Art: Portraits USA: 1776/1976.
Zoller Gallery: Student Drawing and Printmaking Exhibition.
Kern Gallery: W. C. Handy Jazz Exhibit; Tom McKinney, paintings.
Chambers Gallery: American Evolution in Art by Art Alliance, until April 22.
HUB Gallery: Recent Work by Stuart Frost, opening April 18.
HUB Main Lounge: Sulling Everyone (Smithsonian Traveling Exhibition Service), opening April 17.
Pattee Library: Main Lobby — The Ukranian Heritage in North America by W. O. Luciw, until April 19. An exhibit from the Entomology Department by David Shetlar, opening April 20. East Corridor Gallery — The Work of Wendell Mac-Rae. Lending Services Lobby — Drawings and Paintings by Bill Diaz.

Poet to read

Marilyn Hacker, an award-winning poet and a feminist, will present a reading of her poetry Tuesday, April 20, at 8 p.m. in the HUB Reading Room. Ms. Hacker's first book of poetry, "Presentation Piece," published by Viking Press in 1974, won the Lamont Poetry Selection of the American Academy of Poets and the National Book Award for poetry in 1975. The reading is sponsored by the Department of English and the Institute for the Arts and Humanistic Studies.

Chamber orchestra

The Netherlands Chamber Orchestra, conducted by Szymon Goldberg, will appear in concert at 8:30 p.m. Saturday, April 24, at University Auditorium as the final event in the Artists Series' Music Series.

Founded in 1955, the 31-member company still includes most of the musicians who comprised the original group. Mr. Goldberg is a violinist as well as conductor and has appeared as a soloist with all the world's major orchestras.

The program will feature Bach's "Brandenburg Concerto No. 3 in G Major," "Violin Concerto No. 5 in A Major, K. 219" by Mozart, "Divertimento for Strings" by Bartok and "Symphony No. 57 in D. Major" by Haydn.

Tickets will go on sale from 9 a.m. to 4 p.m. Wednesday, April 21, at the HUB Booth and University Auditorium.

Week's highlights from Channel 3

Film producer and director Stanley Kramer talks to Edwin Newman on **Speaking Freely** Saturday, April 17, at 6 p.m.

Exiled Russian novelist Alexander Solzhenitsyn expresses grave doubts about the future of the West on **Firing Line** Saturday, April 17, at 7 p.m. Talking with Michael Charlton of the BBC, Mr. Solzhenitsyn reflects on world events since his exile and comments on what he sees as moral decay and self-deception in the West. Following the interview, William F. Buckley Jr. discusses the impact of the novelist's remarks with Malcolm Muggeridge and Bernard Levin.

John Cranko's ballet, "The Taming of the Shrew," is performed by Germany's Stuttgart Ballet in a 90-minute special program Sunday, April 18, at 10 p.m. The production features music by Domenico Scarlatti.

Conductor Antonia Brico is featured in two special programs. Monday, April 19, at 7:30 p.m., she talks to interviewer Jeanne Woll about being a woman in a profession dominated by men. Then, on Tuesday, April 20, at 9 p.m., WPSX-TV presents "Antonia: A Portrait of the Woman," an hour-long documentary produced by Judy Collins and Jill Godmilow, which has received widespread critical acclaim.

Archibald MacLeish narrates "The Eleanor Roosevelt Story" Tuesday, April 20, at 10 p.m. The Academy Award-winning documentary follows the life of Eleanor Roosevelt from her childhood through her role in the career of Franklin Roosevelt and her eventual international recognition for humanitarian efforts on behalf of the world's poor. Also appearing on the program are Eric Severeid and Mrs. Roosevelt's close friend, Mrs. Francis Cole.

A live performance of the New York City Opera's "The Ballad of Baby Doe" is presented on **Live from Lincoln Center** Wednesday, April 21, at 8 p.m. Written by composer Douglas Moore and librettist John Latouche, the opera is set in 1880 in Colorado and tells the story of Elizabeth "Baby" Doe, the first woman ever elected to work in an American mine. The special live performance stars Ruth Welting in the title role, Richard Fredricks as Horace Tabor, and Frances Bible as Augusta Tabor.

The world's most populous nation is seen from the perspective of the man who led it to a position of world power on "Mao's China," a two-hour special documentary Thursday, April 22, at 9 p.m. Included is rare footage of China in the early 20th century as well as the only known sequence of Chairman Mao giving a speech.

Funding sources

For further information, call 865-1372

(222-1) The **U.S. Environmental Protection Agency** (EPA), Office of Research and Development, has issued its **FY 1976 Program Guide** including: an organizational directory, research program descriptions in health and ecology, energy, industrial processes, public sector and technical support, and guidelines for grant applications and contract proposals. (Ref. lib)

(222-2) Proposed regulations on a May 14 agency deadline date have been announced by the Office of Education for **Domestic Mining and Mineral and Mineral Fuel Conservation Fellowships** (includes oil, gas, coal, oil shale, uranium). Fellowships will be allocated to institutions and will be for graduate study (new and continuation) or for doctoral dissertations. The stipend will be $3000 per year (12 months), plus dependency and travel allowances (dependency receipts: 150 per year (w/o dependency) (Ref. 41FR14364-66, 14423; 4/5/76) (GFDA lib)

(222-4) The National Science Foundation funds a **Climate Dynamics Program** to develop a basis for predicting climate variations and assessing their impact on human affairs. Four areas of research are defined: climate data assembly and analysis, climate index search, climate simulation and prediction and climate modification and impact assessment. Six months are required for proposal review. (Ref. NSF 76-6 — Guide for Preparation of Proposals)

(222-5) The U.S. Department of Justice has issued a Program Plan for FY 1976, in the form of an invitation to criminal justice practitioners and researchers to discover new and improved methods to reduce crime and make the justice system more effective and fair. Programs funded by the Office of Research, Evaluation, and Technology Transfer are discussed, and application procedures are provided. (Ref. lib)

Scientists not supermen

The conventional wisdom that scientists are superintelligent creatures of reason, blessed with objectivity, open-mindedness and humility is challenged by a Penn State psychologist in this month's "Psychology Today."

Dr. Michael J. Mahoney, associate professor of psychology, argues that "the image of the scientist is obviously due for reappraisal," in his article titled "The Truth Seekers."

Although he concedes that scientists tend to score higher on intelligence tests than non-scientists, he attributes this to the selective process of graduate schools. Recent studies indicate, according to Dr. Mahoney, "that superior intelligence plays a minor role in scientific contribution."

As for the rationality of scientists, Dr. Mahoney reports that a study which he conducted found few differences in the reasoning skills of scientists and non-scientists.

The Penn State psychologist disputes the picture of the scientist suppressing personal preferences and emotions in the interest of securing the truth. He cites a survey he conducted of 75 behavioral psychologists whom he asked to review a controversial psychological research paper. The reviewers "tended to recommend the article only when it reported evidence that supported their positions."

Dr. Mahoney also cites the University of Pittsburgh study concerning the reaction of geoscientists to new data brought back by the Apollo program — theoretical scientists often refused to change their views even "in the face of strong contradictory evidence."

Challenging the picture of the unselfish scientist seeking knowledge rather than advancement, Dr. Mahoney cites rivalries and fights for recognition among scientists in history, and says that, according to contemporary interviews, "secrecy, paranoia and the race for recognition are still integral parts of the profession."

The article is based on a book by Dr. Mahoney, "The Scientist: Anatomy of the Truth Merchant," to be published this spring by Ballinger. Dr. Mahoney is also the author of "Cognition and Behavioral Modification," co-author of four other books and editor of the journal, "Cognitive Therapy and Research." He holds a doctorate in experimental psychopathology from Stanford.

News briefs

(Continued from page one)

No action on double majors

The University Faculty Senate has approved changes in policies on simultaneous and sequential degree programs for undergraduate students.

Among the changes approved at the April 6 Senate meeting was a provision for allowing simultaneous degrees for associate degree programs.

Recommendations on double majors, however, were referred back to the Senate Committee on Undergraduate Instruction for resubmission to the Senate at a later date.

The Senate also heard a report from a special committee whose study of the tuition reduction program showed it is widely used by all types of employees and is not a benefit used predominately by faculty and other academic employees.

The study showed that similiar programs exist at virtually every institution where tuition is in excess of $900 a year and that the "cost" of the tuition reduction program to the University is substantially less than the cost of one percent salary increase across the board.

In other business, the Senate approved abolishing grades for proficiency examinations; approved changes in rules on course prerequisites, heard a report from the Subcommittee on Grading, and heard a progress report on the Penn State Faculty Club.

Provost to speak

The Penn State Chapter of Sigma Xi, the Scientific Research Society of North America, will hold its initiation banquet at 6:30 p.m. Thursday, April 22, at the Nittany Lion Inn. Provost Russell E. Larson will speak on "Scientific Research at Penn State: Some Thoughts of Things to Come." The affair is open to Sigma Xi members, initiates and their guests.

Readers perform April 22-23

Selections from "Working," Studs Terkel's best-selling book of interviews with people about their jobs, will be presented by the University Readers at 8 p.m. Thursday and Friday, April 22-23, in Kern auditorium. The readers have chosen approximately 15 interviews, highlighting the relationships of job prestige to employee pride and of income to job satisfaction. The program is open to the public without charge

New TV option

A new programming option, "Panorama," is being offered to cable television subscribers in northeastern Pennsylvania by the University's Worthington Scranton Campus. The Continuing Education service is presenting college credit and non-credit courses — Psychology 13 and The Business of Writing, for example — and special programs such as The Classical String Quartet Programming is scheduled from 9 a.m. to 5 p.m. with no commercial interruptions, and programs are rotated into different time slots to make them available to viewers at various times during the week

The concept for the television-instructional programming was developed over the past year by the Pennarama Advisory Council. Council members from the Campus include Robert W. Naismith, assistant professor of biology and Council chairman; Campus Director Dr. Edward K Kraybill; Ralph L. Mastriani, assistant director for resident instruction; Dr. Lawrence B. Golden, associate professor of physics; Dr. Basil Karp, associate professor of psychological science; Dr. Richard J. Fitzsimmons, librarian; Robert H. Sanford, assistant director for continuing education; two students, Patrick Judge and Gene Doud, Angelo Rosati, member of the Worthington Scranton Campus Advisory Board, and Joseph Gans, president of Northeastern Pennsylvania TV Cable Co.

Water show on tap

The members of the Nalads Synchronized Swimming Club will present their annual water show at 8 p.m. Thursday, Friday and Saturday, April 22-24, in the Natatorium. The show's theme is taken from a quotation in Ecclesiastes 1:9: "For Everything There Is a Purpose, and a Time for Every Season . . . ." The 12 routines, varying from a solo to a team routine with 12 swimmers, explore different times of life — a time to love, a time to dance, a time for war, etc. Five of the routines have already won prizes in eastern regional competition this year. Tickets, at $1, will be available at the door or in advance at SAS Sporting Goods, White Bldg. and the HUB desk

"Bikini workshops"

Kern Graduate Commons and the Graduate Student Association are sponsoring a series of workshops titled, "Bikini Season Is Just Around the Corner" for interested students, faculty and staff. The program opens Monday, April 19, and will run from noon to 1:30 p.m. in Room 101 Kern Bldg. Margaret Beldon and Dr. Dorothy Harris of the College of Health, Physical Education and Recreation will speak on "Figure Control and Body Awareness" and "The Importance of Lifetime Leisure Activities for Women." An exercise demonstration is planned. Subsequent programs on April 26, May 3 and May 10 will offer information on nutrition, health, hair styling and fashions.

Rare Books' exhibit

Five early published editions of "The Star Spangled Banner" and original letters from Benjamin Franklin, George Washington, Robert E Lee and Woodrow Wilson, as well as a sampling of sheet music from various periods of American history, are among more than 75 items on display in Pattee's Rare Books Room through April 23. The exhibit is on loan from Broadcast Music Inc. (BMI).

Time to check hospital charges

Faculty and staff members should periodically review the reduction which is taken from their paychecks for hospital coverage to be certain that they are paying for the correct coverage.

Changes in family status can affect costs and coverage; these may include getting married, having a child or having a spouse stop working for the University. Such alterations can result in an employee have inadequate dependent coverage.

Accordingly, the Employee Benefits Division suggests that coverage should be checked under the following circumstances:

1. When a spouse or child begins working for the University as a regular employee
2. If a spouse or only child dies.
3. When a divorce occurs.
4. If an only dependent child enters military service or has a 19th birthday (or 23rd birthday in the case of a full-time student).
5. When an only dependent child gets married
6. When a spouse reaches age 65

To determine proper coverage and payments, employees should compare the amounts shown on their salary check stubs with the amount they should be paying, as shown in the following table.

INSURED PERSONS	MONTHLY	BI-WEEKLY
Employee only	none	none
Employee, child, children	$1.75	$.80
Employee, spouse, child or children	$5.00	$2.30

(These rates apply when all insured persons are under age 65. Persons over age 65 are insured at a different plan at no cost.)

Employees wishing to make changes in their coverage should call, write or visit Employee Benefits, Room 113 Willard Bldg. 865-1473. Since the University has no way of knowing whether a change should be made, employees must take responsibility for seeing that their records are updated and accurate. No refunds for overpayment can be made unless it has been shown that the University was in error.

Staff vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been filled with the University Employment Division for listing. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, ext. 1387 (Outwork line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., April 26, 1976. **DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

AUDITOR, CONTROLLER'S OFFICE — University Park

Responsible for performing audits to ascertain compliance with policies and procedures, adequacy and reliability of management reports, soundness of accounting and operating controls and safeguarding of the assets of the University. Bachelor's degree in accounting or related management field together with at least 2 years of directly auditing experience in financial or operational facets of administration.

ASSISTANT MANAGER, ARTISTS SERIES — University Park

Responsible to the Manager for the operational aspects of the Artists Series to include budget control, ticket accountability, planning and staff supervision. Must have a minimum of 3 years of college or equivalent experience in management or equivalent managerial experience. Should have strong commitment to the arts.

ATOMIC ENERGY SPECIALIST, NUCLEAR ENGINEERING — University Park

Responsible for presenting "The Atomic World Program" to students in assemblies and classroom sessions and for developing, preparing, presenting and informing students and the public on the peaceful applications of nuclear power. Bachelor's degree, or equivalent experience or related area. Some teaching experience desirable.

ENERGY EDUCATION SPECIALIST, NUCLEAR ENGINEERING — University Park

Responsible to the Head, Department of Nuclear Engineering, for presenting various programs including Energy Today and Tomorrow to high school groups, civic and service organizations, employee groups, seminars, and institutes. Bachelor's degree, or equivalent, in a physical science with 3 to 5 years of directly related experience. Graduate advanced work in an energy related field or knowledge of teaching techniques and educational methods.

BUSINESS MANAGER — Schuylkill Campus

Responsible to the Director for the administration of Campus facilities, bookstore activities, custodial staff, maintenance of budget records, purchasing activities and related responsibilities. Baccalaureate degree, or equivalent. Business background or experience would be desirable

THE UNIVERSITY IS AN EQUAL OPPORTUNITY/ AFFIRMATIVE ACTION EMPLOYER

PENN STATE intercom

Volume 5, Number 30 April 22, 1976

An internel communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

News briefs

Fulbright-Hays visitor

A representative from the Council of the International Exchange of Scholars will be on campus Monday, April 26, to discuss the Fulbright-Hays Senior Fellows Program. He will be available to discuss the program and its application procedures at 8 p.m. in the Assembly Room at the Nittany Lion Inn. All interested faculty are invited to attend.

Faculty convocation May 11

President **John W. Oswald and Mrs. Sally Small, chairman of the University Faculty Senate, will address the faculty** of the **University at the third annual University-wide Faculty Convocation to** be held **at 4 p.m. Tuesday, May 11.**

University Park faculty members can attend **the program at University Auditorium, as schedules permit. To accommodate faculty at other locations,** a simultaneous broadcast will be made to each **of 21 other locations where** faculty **can gather in an area convenient** to them.

Since **construction of University Auditorium, President Oswald has held an** annual **convocation for the faculty.**

Berg to speak

Dr. Paul Berg, Alumni Fellow of the College of Science, will discuss "Genetic Engineering: Challenge and Responsibility" at 8 p.m. on Wednesday, April 28, in Room 108 Forum Bldg. Willson Professor of Biochemistry at Stanford University, Dr. Berg is a world renowned leader in the sometimes controversial field of "genetic engineering." Work on the genetic apparatus that directs the synthesis of proteins earned Dr. Berg the Eli Lilly Award in Biochemistry.

His current research is on the mechanism of gene expression in higher organisms, particularly the interplay of viral and cellular genes in regulating growth and division. In addition, he and his colleagues have been active in the research which made possible the recent advances in gene manipulations and in the attempts to consider the potential biohazards such experiments portend. These basic approaches are aimed ultimately at developing the basic knowledge for the prevention, management and possible cure of such heredity diseases.

Middle East lecture

"U.S. Intelligence and Diplomacy in the Middle East, 1950-1973" will be the subject of a public lecture by Dr. Gordon H. Torrey, professorial lecturer at the School of Advanced International Studies, at 7:30 p.m. on Monday, April 26, in Room 101 Kern Bldg.

Prof. Torrey received his B.A. and M.A. degrees from Oregon and his Ph.D. from Michigan. He has taught courses on Middle Eastern history and U.S. foreign policy in the Middle East at the Foreign Service Institute, the National War College, and the Naval War College. For many years he headed the Arab States/Israel Branch of the Office of Current Intelligence. He is the author of "Syrian Politics and the Military" and numerous articles. His lecture is sponsored by the Middle East Studies Committee.

Spring things

Israeli consul will talk

Emanuel Shimoni, consul general of Israel from Philadelphia, will speak on "The Middle East, the United States and the United Nations" at 8 p.m. on Wednesday, April 28, in the HUB assembly room. Mr. Shimoni has been in government service in Israel since 1952 and served as a member of the Israeli delegation to the United Nations' General Assembly. He is a close associate of former Secretary of State Abba Eban. His talk is sponsored by American Professors for Peace in the Middle East.

Mr. Shimoni will also conduct a joint political science and history graduate seminar at 4 p.m. on April 28. Further information is available from Prof. Arthur Goldschmidt at 863-0061.

Faculty women's luncheon

The Faculty Women's and Newcomers' Clubs are sponsoring a spring luncheon Thursday, April 29, in the HUB ballroom. Dr. Norman A. Graebner, distinguished visiting professor of history, will talk on "Philadelphia and the American Revolution." The 12:30 p.m. luncheon will be preceded by a reception in the HUB lounge at 11:30 a.m. Reservations are due today (Thursday).

President gets award

President John W. Oswald will return late this month to the scene of his boyhood days, La Grange, Ill., to receive the Honor Award of the La Grange Area Historical Society.

The award, explains Edward J. F. Young, president of the Society, is made to a person who is "related to the La Grange Area and who has either achieved prominence which reflects favorably on the area, or who has made considerable contribution to the community."

Dr. Oswald is a graduate of Lyons Twp. High School in La Grange, and he has been invited to visit the school on April 29, the day following the Historical Society Award presentation, to be honored by the school and also to address teachers and student leaders at the school.

Rubin on Colloquy

Jerry Rubin, co-founder of the Yippie Movement and a member of the Chicago Seven, will talk on "Growing Up," under the sponsorship of Colloquy, at 8 p.m. Sunday, April 25, in University Auditorium. Author of "Do It," Mr. Rubin will discuss the external politics of the 1960s and his internal exploration of the 1970s.

Nicholas to discuss India

Dr. Ralph W. Nicholas, professor of anthropology and of social sciences in The College of The University of Chicago, will present a public lecture at 7:30 p.m. Thursday, April 29, in the HUB main lounge. His subject is "The Indian Political Crisis and American Scholarship."

Dr. Nicholas is editor of the "Journal of Asian Studies" and vice president of the American Institute of Indian Studies. His lecture is sponsored by the South Asia Committee of the College of the Liberal Arts, the University Committee on International Programs and the Department of Anthropology.

Springtime HUB dinner

Since it's staying lighter longer, the HUB Terrace Room has decided to substitute a Springtime Serenade for its Easter Candlelight Dinner on Friday and Saturday, April 23 and 24, from 4:45 to 7 p.m. Phi Mu Alpha music fraternity will provide entertainment, and the menu features chicken divan, prime rib of beef au jus, veal cordon bleu, roast leg of spring lamb, shrimp Florentine, fruited pork chops, and an assortment of choice vegetables, fresh salads and desserts.

Caldwell is May speaker

Sarah Caldwell, artistic director of the Opera Company of Boston and one of the leading opera directors in the United States, will return to Penn State on May 29 as the commencement speaker.

The commencement exercises, with an estimated 35,000 persons in attendance, will be held in Beaver Stadium at 10:30 a.m., according to President John W. Oswald. Miss Caldwell was chosen as speaker in consultation with a selected group of student leaders.

Early in February, Miss Caldwell conducted the Pittsburgh Symphony Orchestra and was artistic director for the production, "Be Glad Then America," presented at the University as one of four major events in commemoration of the Nation's Bicentennial.

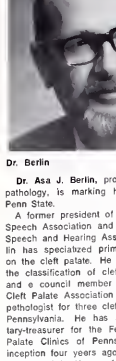
Miss Caldwell is the first woman to conduct at the Metropolitan, and her Opera Company of Boston has been called the most exciting of its kind in the country. Her latest venture, Opera New England, a regional company, is financially successful et a time when many arts groups face insolvency.

Harvard University a year ago honored Miss Caldwell with an honorary doctor of arts degree, and she also holds doctor of letters degrees from Boston College, Wheaton College, Northeastern University, Regis College and Smith College.

Black studies meeting set

A Conference on the Dimensions of Black Studies for Educational Institutions in Pennsylvania will be held at the University Friday and Saturday, April 30 and May 1.

A Continuing Education service of the Intercollege Undergraduate Program, the conference has been organized by the University's Black Studies Committee. It is designed to assist Pennsylvania teachers and administrators at all levels of education in using available opportunities to include materials on the black experience in courses offered at their schools.



The conference will begin at 8 p.m. Friday with a keynote address by Dr. Frank Brown, associate professor of education at SUNY, Buffalo. He will speak on "Black Studies, Values and Power in a Pluralistic Society." Dr. Brown, who has a Ph.D. and M.A. from the University of California at Berkeley, has published widely in his areas of specialization — educational policy, resource allocations, urban education, and minorities in higher education.

Dr. George French, director of social studies in the Philadelphia School District, will address a general session of the conference Saturday at 9 a.m. His talk will be followed by workshops on Black Studies and Curriculum Planning and on The Relationship of Black Studies to Intergroup Education. After lunch, workshops will be offered on Teaching about the Afro-American Experience and Teaching about Africa and the West Indies.

Penn State faculty and staff interested in attending the conference can obtain further information from Hubert S. Sharpe Jr. at the Conference Center, Room 410 Keller Bldg., or by calling 865-7557.

PENN STATE COLLECTION

Faculty notes

Dr. Berlin

Dr. Asa J. Berlin, professor of speech pathology, is marking his 25th year at Penn State.

A former president of the Pennsylvania Speech Association and the Pennsylvania Speech and Hearing Association, Dr. Berlin has specialized primarily in research on the cleft palate. He has published on the classification of clefts, was historian and e council member of the American Cleft Palate Association and was speech pathologist for three cleft palate teams in Pennsylvania. He has served as secretary-treasurer for the Federation of Cleft Palate Clinics of Pennsylvania since its inception four years ago. He also was a member of the House of State Representatives and chairman of the Nomenclature Committee of the American Speech and Hearing Association.

Dr. Berlin received his B.A. from Brooklyn College. His M.A. was granted by the University of Wisconsin and his Ph.D. by Northwestern, both in speech pathology. He worked as a speech pathologist in the Army during World War II and taught at Brooklyn College before joining the Speech and Hearing Clinic faculty here in 1950. During his 25 years on the faculty, Dr. Berlin was in charge of the Child Diagnostic Clinic and coordinated the Children's Residential Clinic every summer from 1951 until the conclusion of the program in 1972. He was active in the University Faculty Senate, chairing the committee on Academic Affairs and several of its subcommittees. He was also chairman of the University Calendar Commission from 1973 to 1975.

Dr. Nathan N. Aronson Jr., associate professor of biochemistry, has been awarded a British-American Research Fellowship for study at the Strangeways Research Laboratory, Cambridge, England. The Fellowship is supported by both the British and American Heart Associations to promote research in the field of cardiovascular function and disease and allied fundamental problems. Dr. Aronson's proposed program of research on the breakdown of proteins, which will be conducted while he is on leave from the University from September, 1976, to August, 1977, also recently won him a Guggenheim Foundation Fellowship, which he has declined.

A member of the faculty since 1969, Dr. Aronson is a graduate of Rice University and received his Ph.D. degree from Duke. He also was a Helen Hay Whitney postdoctoral fellow at Rockefeller University and Vanderbilt University.

Dr. William A. Steele, professor of chemistry, is among 300 scholars, scientists and artists from across the country honored with John Simon Guggenheim Memorial Foundation Fellowships. He plans to conduct research at the University of Bristol, England, under the Fellowship and will also serve as Unilever Visiting Professor there while on leave from December, 1976, to June, 1977. The professorship is reserved for overseas scholars who take part in a special postgraduate course in surface and colloid science. Dr. Steele will offer about 12 lectures in the program. A member of the faculty since 1955, Dr. Steele has also held a National Science Foundation postdoctoral fellowship at the Clarendon Laboratory of Oxford University, England; a National Science Foundation senior postdoctoral fellowship at the Free University of Brussels, Belgium; and an Overseas Fellowship at Churchill College, Cambridge University, England.

A specialist in the study of the thermodynamic and structural properties of liquids, he is the author of over 90 scholarly publications.

George Zoretich and **David Rubello,** both of the University art faculty, and **Yar Chomicky,** professor of art education, are each represented by three paintings in the 1976 Invitational Watercolor Exhibit at Millersville State College.

A paper by **Dr. Erwin W. Mueller, Evan** Pugh Professor of Physics, and **Dr. S. V. Krishnaswamy,** a research associate, was featured as the Plenary Lecture at the Discussion of Organic Coatings and Plastics Chemistry during the Centennial Meeting of the American Chemical Society, April 5, in New York City. The paper is titled "Surface Analysis at the Atomic Level Using the Atom-Probe."

John Balaban, assistant professor of English, has been awarded e Fulbright-Hays Lecturership in American Literature at the University of Cluj in Romanie for 1976-77. Mr. Balaban is the author of "After Our War," which won the 1974 Lamont Poetry Selection for a best first book of poetry. He is the second member of Penn State's English Department to be awarded a lecturership for next year. **Michael H. Begnal,** associate professor of English, will teach at Charles University, Prague.

Dr. Roger M. Herman, professor of physics, presented a colloquium at the University of Windsor, Ontario, April 7. He discussed, "Nonlinear Optical Phenomena in Germanium."

Dr. E. Michael Van Buskirk, assistant professor of surgery, will deliver a paper on "Changes in Facility of Aqueous Outflow Induced by Lens Depression and Intraocular Pressure" at the national meeting of the Association for Research in Vision and Opthamology April 26-30 in Sarasota, Fla.

Dr. Torrence Parsons, associate professor of mathematics, presented a talk at the Combinatorial Problems Semnar, Department of Mathematics, Princeton University, April 2. His topic was "Pursuit-Evasion in Graphs."

"Paradoxical Bronchospasm Induced by Aerosols" was the title of a paper presented by **Dr. Joseph J. Trautlein,** assistant professor of medicine, at the 57th annual meeting of the American College of Physicians April 8 in Philadelphia. His co-authors were **Dr. Joseph Allegra,** resident in medicine, and **Marilyn Gitlan, R.N.**

Dr. Wayne H. Scott, assistant professor of English at Behrend College, recently presented a paper entitled "Images of Independence. Popular Verse and the American Revolution" at the Western Regional Meeting of the Popular Culture Association in Las Vegas. He will participate in a panel on "The Fantasies of Edgar Rice Burroughs" April 23 at the Sixth National Popular Culture Association meeting in Chicago. His paper deals with "Burroughs' Venusian Fantasies and the Use of Myth." On April 24, he will speak on "American Independence and Popular Culture. A Revolution in Verse" as part of the Fourth Annual Colloquium in History at Behrend. Dr. Scott has also recently been selected as an abstracter for "Abstracts of Popular Culture," a publication of the Center for the Study of Popular Culture at Bowling Green State University.

Patrice A. Clemson has been named assistant librarian in the catalog department of the University Libraries. She is a graduate of Muhlenberg College, with a B.A. in political science, and received her M.L.S. at the University of Pittsburgh.

"The Cariogenicity of a Lysine-Deficient Diet" is the title of a paper written by **Dr. Ira Wolinsky,** associate professor of nutrition, graduate student **Jeffrey A. Senior,** and **Dr. G. Lynn Brinkman,** a former faculty member. The paper was presented April 15 at the annual meeting of the Federation of American Societies for Experimental Biology in Anaheim, Cal.

Dr. Kenneth D. Frandsen, professor of speech communication, discussed persuasion and human information processing at a public colloquium on the University of Nebraska-Lincoln Campus, April 12. He also presented a co-authored paper at the International Communications Association's Annual Conference in Portland, Ore., April 13-17. Others attending the ICA Conference in Portland included **Dr. Robert T. Craig,** assistant professor of speech communication, and **David Illig** and **Marcia Shaw,** graduate students in Speech Communication.

In print

Dr. James O. Whittaker, professor of psychology and social science at Capitol Campus, is the author of two psychology textbooks. "Psychology of Modern Life" is the title of a high school level textbook, and "Introduction to Psychology" is a college level text which is being published in its third edition. In "Psychology of Modern Life," Dr. Whittaker makes an effort to relate the problems under discussion to the life and problems of the American teenager. The book takes an interdisciplinary approach to the subject of psychology, stressing the fact that other disciplines such as history, economics, political science, religion and sociology are as important as psychology in developing a comprehensive understanding of human behavior. "Introduction to Psychology" is being published in its third edition and is already in widespread use around the world. It takes a cross-cultural approach to psychology, thus allowing students in the United States to benefit from a broader perspective on human behavior and making the text more relevant for foreign students.

Dr. Whittaker received his Ph.D. in social psychology at the University of Oklahoma under Muzafer Sherif, now professor emeritus of sociology at Penn State. He has published more than 35 articles in professional journals and also edited the book, "Recent Discoveries in Psychology."

Dr. Gerald M. Phillips, professor of speech communication, and **J. Jerome Zelko,** graduate student in the same department, are co-authors of a new book, "Structuring Speech." The book is a significant innovation in the pedagogy of communication for it activates "field theory" and assists students to arrange and organize their remarks by visual and tactile methods instead of by traditionel outlining. The book is published by Bobbs, Merrill as part of their communication series. It will also be used as a basic book in the I.T.T. vocational training series. In a series of studies done on the method of instruction contained in the book, it was discovered that blacks and whites and males and females tend to learn at the same rate, since there is neither a racial or male bias implied in the method. The illustrations for the book were done by James Visnovsky, a Penn State alumnus in art, and diagrams were done by Julie Epstein, currently an undergraduate student in graphics.

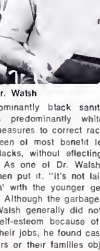
Obituary

Dr. Hummel Fishburn, who retired in 1965 as professor and head of the Departments of Music and Music Education after 40 years of service, died April 1 at the age of 75. A native of Washington, D.C., he enrolled at Penn State in 1919 and after graduation in 1922 was named assistant in music and assistant to the Dean of Men. He received his M.A. in 1928 served as director of music in the Chester, Pa., schools and returned to Penn State in 1933. He directed the Blue Band from 1938 to 1947 and continued designing formations until 1962. He conducted the University Symphony for 20 years, and also the Woman's Chorus and Men's Glee Club and was Chapel organist. Holder of a doctor of music degree from the University of Montreal, he was the author of a textbook on music appreciation. He was a member of the University Senate for 5 years, and served as e marshal at University commencements and other ceremonies as a member of the board of Thesplans and the Athletic Advisory Board. In 1970, he was honored with the Lion's Paw Medal.

Sociologist tries hand at garbage collecting

Most garbagemen are not concerned about the low-status stigma attached to their job, according to a Penn State sociologist who worked as a garbageman in order to study their attitudes.

Dr. Edward J. Walsh, assistant professor of sociology, collected garbage over a three-year period in Ann Arbor, Mich., and also studied garbagemen in Detroit and Minneapolis. His findings are reported in "Dirty Work, Race, and Self-Esteem," published by the Institute of Labor and Industrial Relations of the University of Michigan and Wayne State University.



Dr. Walsh, who says he found collecting garbage "very hard work," reports that most garbagemen either ignore or joke about their job's social stigma. He says they concentrate on the positive aspects of the job, such as regular pay and lack of direct supervision.

The sociologist says he found that, although most garbagemen are aware of the low status of their job, it does not necessarily affect their self-esteem. He found this to be true particularly among black garbagemen.

"Puzzling and incredible as the fact may be to some academics," Dr. Walsh writes, "a considerable number of garbagemen were reasonably happy with their work and have no desire to see it 'humanized' (read 'changed')."

On the other hand, Dr. Walsh points out that many did complain about being in a "dead-end job." He estimates that the majority of the garbagemen he studied would favor some improvement in the quality of their working life.

He also notes that in many cities past racial discrimination has produced pre-

Dr. Walsh

dominantly black sanitation departments in predominantly white cities. Recent measures to correct racial imbalance have been of most benefit to young, educated blacks, without effecting older blacks.

As one ol Dr. Walsh's feltow garbagemen put it, "it's not lair to do all the fixin' with the younger generation."

Although the garbagemen studied by Dr. Walsh generally did not suffer from lower self-esteem because of the low status of their jobs, he found cases where the workers or their families objected to published jokes or cartoons made at their expense.

"It has become unacceptable to most women, ethnic groups, racial groups or homosexuals, for example," writes Dr. Walsh, "but the manuel laborer is still fair game for shallow wit."

As e follow-up to his garbage-collecting career, Dr. Walsh spent last summer in California picking vegetables with the migrant farm workers involved in the unionization controversy with the United Farm Caesar Chavez's United Farm Workers.

"I wanted to see what was going on before I got too deep in academia," joked Dr. Walsh, who joined the Penn State faculty last fall.

Although his research on the migrant farm workers is still incomplete, Dr. Walsh says he noted a high degree of pride and a definite hierarchy among the migrant workers.

As an example he points out that lettuce cutters would only cut lettuce, refusing to switch to other vegetables or fruits.

In addition to being a garbageman and farm worker, Dr. Walsh has been a researcher and lecturer at the University of Michigan; an instructor of theology at the College of St. Thomes in St. Paul, Minn.; a reporter for the "National Catholic Reporter"; and a Roman Catholic priest.

He has a B.A. in philosophy and a Th.M. from Maryknoll Seminary and a ticentiate in sacred theology from Gregorian University in Rome. He received his Ph.D. in sociology from the University of Michigan.

University Park Calendar

April 22—May 2

Items to be included in this calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, April 22

Interdisciplinary Colloquium on "The Continuing American Revolution in World Perspective," panel discussion with speakers Murray Sperber, Indiana University; Philip Klass, and Bertrand Davezak, moderator, on "The Arts and Revolutionary Consciousness," 2 p.m., Keller. Banquet, 6 p.m., with Norman Graebner, University of Virginia, on "The American Revolution in World Perspective."

Sports: Women's tennis, vs. Maryland, 1:30 p.m. Men's baseball, vs. Gettysburg, 2:30 p.m.

Commons Videotape, noon, Kern lobby. "Bikini Season is Right around the Corner," (grooming tips).

FSHA 410, A Tribute to American Shaker Cuisine, 5:30 p.m., Maple Room. Reservations required: 865-7441.

Nalads water show, "To Every Thing There Is a Purpose," 8 p.m., Natatorium.

University Readers, selections from Stud Terkel's "Working," 8 p.m., Room 112 Kern.

Michael McCloskey, Executive Director of the Sierra Club, on "America's Environment: the Aftermath of 200 Years," 8:30 p.m., HUB ballroom.

Friday, April 23

Business Services Bldg. open house, 10 a.m.–4 p.m.

"The Continuing American Revolution in World Perspective," with speakers William Gamson, University of Michigan, and William Hinton, U.S.-China Peoples Friendship Assn., and John Wilkse, moderator, on "Politics and Government," 9:30 a.m., Keller. Speakers Stanley Aronowitz, Staten Island Community College, CUNY, Manley Irwin, University of New Hampshire, and Charles Craypo, moderator, on "Economics," 2 p.m., Keller. Performance of Modern American music by Alard Quartet, 8:30 p.m., Keller.

Sports: Men's baseball, vs. Duquesne, 2:30 p.m. Women's EAIAW Regionals, 9 a.m.

Springtime Serenade dinner, 4:45-7 p.m., HUB Terrace Room.

Folk and Square Dance Roundup, 7:30 p.m., White Hall.

University Readers, selections from Studs Terkel's "Working," 8 p.m., Room 112 Kern.

The Theatre of the Open Eye, "Moon Mysteries," 8 p.m., Playhouse Theatre.

Nalads water show, 8 p.m., Natatorium.

Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Penn State Symphonic Wind Ensemble, 8:30 p.m., Music Bldg. recital hall.

Saturday, April 24

Sports: Women's track, EAIAW Regionals, 9 a.m.

"The Continuing American Revolution in World Perspective," with speakers George Gerbner, University of Pennsylvania, Marilyn Young, University of Michigan, and moderator E-Tu Zen Sun on "Consciousness and Revolutionary Change," 9:30 a.m., Keller.

Fourth Annual Behrend College Colloquium in History on "Interpretations of the American Revolution: Two Centuries of Controversy."

"EMEX '76," College of Earth and Mineral Sciences Exposition and Open House, 1-5 p.m., Mineral Industries, Mineral Sciences, and Deike.

Cycle Saturday, 1 p.m., Parking Lot 80. Sponsored by the Penn State Cycling Club.

The Theatre of the Open Eye, mini-program matinee, Cocteau's "Orphee," 2 p.m.; "Primordial Voices," 8 p.m., Playhouse Theatre.

Phi Psi 500 Race, 2 p.m.

Springtime Serenade dinner, 4:45-7 p.m., HUB Terrace Room.

Nalads water show, 8 p.m., Natatorium.

Artists Series, Netherlands Chamber Orchestra, Szymon Goldberg conducting, 8:30 p.m., University Auditorium.

Sunday, April 25

Combined Protestant service with Black Christian Fellowship, 11 a.m., Music Bldg. recital hall. Rev. Norman O. Conway, First Baptist Church, North Vandergrift, Pa.

Shavers Creek Nature Center, Early Morning Bird Walk, 7 a.m.; Ecology Walk, 3 p.m., Mineral Industries Bldg., Stone Valley.

Sy Barash Country Regatta, 11 a.m.-5 p.m., Stone Valley, Sponsored by Beta Sigma Beta and Kappa Delta for the benefit of the American Cancer Society. Registration through April 23.

"EMEX '76," College of Earth and Mineral Sciences Open House, 1-5 p.m.

Sierra Club Traveling Exhibit, White Bldg. parking lot. Exhibits and Displays, HUB ballroom, until 5 p.m.

Sports: Men's baseball, vs. Rider, 1 p.m. Men's lacrosse, vs. Rutgers, 1 p.m.

Earth Week film, "Multiply . . and Subdue the Earth," 2:30 p.m., HUB assembly room.

Jerry Rubin on "Growing Up," 8 p.m. University Auditorium. Sponsored by Colloquy

Monday, April 26

Kathy Lewis, director of Nutrition Information, on "Questions on Nutrition?" 12 noon, Room 101 Kern.

Gerry Boyer, R.N., American Cancer Society, on "Health Care for Women Today?" and him, "How to Examine Your Breasts," 12:45 p.m., Room 101 Kern.

William Sprigg, organ, 8:30 p.m., Music Bldg. recital hall.

Tuesday, April 27

Sports: Women's softball, vs. Lock Haven, 3 p.m.

Paul West, PSU professor of English, reading from his unfinished work, "Brain Waves of a Stone Age Man," 8 p.m., Room 101 Kern.

"No Deposit-No Return Is No Good," 7:30 p.m., HUB assembly room. Pennsylvania Alliance for Returnables.

Wednesday, April 28

Sports: Men's tennis, vs. West Virginia, 2:30 p.m.

102nd John Henry Frizzell All-University Speech Contest, sponsored by the Penn State Forensic Council. Preliminaries and semi-finals, 7 p.m., Room 121 Sparks.

FSHA 410, A Swedish smorgasbord and dinner, 5:30 p.m., Maple Room. Reservations required 865-7441.

Musica da Camera, 8:30 p.m., Music Bldg. recital hall.

Thursday, April 29

Commons Videotape, noon, Kern lobby.

Faculty Women's Club and Newcomers Club spring luncheon, reception 11:30 a.m., luncheon 12:30 p.m., HUB ballroom. Speaker, Dr. Norman A. Graebner, Distinguished Visiting Professor of History, on "Philadelphia and the American Revolution."

FSHA 410, A Ukranian Easter Feast, 5:30 p.m., Maple Room. Reservations required: 865-7441

Orchesis Dance Company, "Opus 1976," 8:30 p.m., White Hall Dance Theatre.

Pennsylvania Vocal Ensemble, 8:30 p.m., Music Bldg. recital hall.

University Theatre, "Unruly Children: A Pennsylvania Bicentennial Vaudeville," 8 p.m., Pavilion Theatre.

Friday, April 30

University Theatre, "Unruly Children: A Pennsylvania Bicentennial Vaudeville," 8 p.m., Pavilion Theatre.

Orchesis Dance Company, "Opus 1976," 8:30 p.m., White Hall Dance Theatre.

Pennsylvania Vocal Ensemble, 8:30 p.m., Music Bldg. recital hall.

Artists Series, Boston Symphony Chamber Players, 8:30 p.m., Schwab.

Friday and Saturday, April 30-May 1

Conference on The Dimensions of Black Studies for Educational Institutions in Pennsylvania, Keller Bldg.

Saturday, May 1

Penn State Model Railroad Club Equipment Auction, 10 a.m.-6 p.m., Rooms 320, 214 HUB.

Orchesis Dance Company, "Opus 1976," 2:30 and 8:30 p.m., White Hall Dance Theatre.

Sports: Men's track, vs. Michigan, men's golf, Nittany Lion Invitational. Women's lacrosse, vs. Millersville, 1 p.m.

Dinner Theatre, 6:30 p.m., Rooms 102, 112 Kern. "Cole Porter Review."

Saturday, May 1

University Theatre, "Unruly Children: A Pennsylvania Bicentennial Vaudeville," 8 p.m., Pavilion Theatre.

Sunday, May 2

Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Rosemary R. Ruether, historical theology, Howard University.

Black Christian Fellowship worship service, 11:15 a.m., Eisenhower Chapel. Pastor Gerald G. Loyd, the Jerry Loyd Ensemble.

Sports: Men's baseball, vs. Mansfield, 1 p.m. Men's golf, Nittany Lion Invitational.

Shavers Creek Nature Center, Early Morning Bird Walk 7 a.m., Ecology Walk, 3 p.m., Mineral Industries Bldg., Stone Valley.

Katherine Kelly, piano, 3:30 p.m., Music Bldg. recital hall.

Dinner Theatre, 6:30 p.m., Rooms 102, 112 Kern. "Cole Porter Review."

Seminars

Thursday, April 22

Chemistry, 12:45 p.m., Room 333 Whitmore. Donald E. Smith, Northwestern, on "Online Fourier Transform Data Processing Applications in Electrochemistry."

Air Pollution Control, 2:20 p.m., Room 145 Fenske. Jiri Tichy, architectural engineering, on "Methods of Measurement of Noise Emissions from Machines."

Anthropology, 3:30 p.m., Room 112 Kern. Dr. David Maybury-Lewis, Harvard, on "The Study of Dual Organizations in South America."

Physics, 3:50 p.m., Room 117 Osmond. Martin Klein, on "The Early Career of Willerd Gibbs."

Agronomy, 4 p.m., Room 111 Tyson. J. Harold Grove on "Nitrogen Utilization by Several Irrigated Tropical Forage Grasses Grown on Oolitic Limestone Soil on Andros, Bahamas."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Dr. Robert Ellingson, institute for Fluid Dynamics and Applied Mathematics, University of Maryland, on "Preliminary Results of a Gate Long Wave Radiation Study."

Ceramic Science, 11 a.m., Room 341 Deike. Dr. A. Nowick, Columbia University, on "Dielectric and Anelastic Relaxations Due to Point Defects in Crystals."

Friday, April 23

Geosciences, 4 p.m., Room 22 Deike. Dr. Malcolm Ross, U.S. Geological Survey, on "The Mineralogy and Petrology of Pyroxenes in Igneous and Metamorphic Rocks."

Monday, April 26

New Carnegies, Architecture, 2 p.m., Room 322 Sackett. Dr. Courtney Cleland, sociology, University of Arizona, on "Social Character, Social Services and Community Organization in an Arid City."

Genetics, 3:55 p.m., Room 111 Tyson. Dennis Tavani on "Genetic Screening and Medical Therapy: Effects on the Incidence of Genetic Disease and Future Genetic Load."

Entomology, Biochemistry and Biophysics joint seminar, 4 p.m., Room 101 Althouse. Dr. Lawrence I. Gilbert, biological science, Northwestern University, on "Studies on the Transport, Control and Action of Ecdysone, the Insect Molting Hormone."

Organic Chemistry, 8 p.m., Room 333 Whitmore. Dennis Hoskin on "Chemistry of Annulenes."

Tuesday, April 27

Entomology, Biochemistry and Biophysics joint seminar, 11 a.m., Room 101 Althouse. Dr. Lawrence I. Gilbert, biological science, Northwestern University, on "Studies on the Transport, Binding and Titer Regulation of the Insect Juvenile Hormone."

Analytical Chemistry, 12:45 p.m., Room 445 Davey. Dr. Richard Doty, Monell Chemical Senses Center, University of Pennsylvania, on "Olfactory Studies in Humans".

Solid Waste, Environmental Pollution Control, 2:20 p.m., Room 140 Fenske. John Leporati, ERASCO, N.Y., on "ERASCO Gets Its Power from Organic Solid Wastes."

Engineering Mechanics, 4 p.m., Room 232 Hammond. Mohammed Shabara, instructor, engineering mechanics, on "Fatigue Crack Propagation in a Bi-Axial Stress Field."

Mathematics, 4 p.m., Room 103 McAllister. Lowell Jones, SUNY at Stony Brook, on "Smooth and Piecewise Linear Topology"

History, 3:30 p.m., Room 101 Kern. Dr. George P. Bonis, visiting professor of history, on "The Hungarian Holy Crown as Dualistic and Constitutional Symbol."

Astronomy, 4 p.m., Room 445 Davey. Dr. Joel A Eaton, University of Alabama, on Atmospheric Properties of Binary Stars."

Inter-Science, 4 p.m., Room 333 Whitmore. Phillip Strittmatter, biochemistry, University of Connecticut Health Center, on "Protein-Protein & Protein Lipid Interactions in a Membrane Bound Redox System."

Inorganic Chemistry, 8 p.m., Room 333 Whitmore. Dr. Arthur D. F. Toy, Stauffer Chemical Co

Thursday, April 29

Chemistry, 12:45 p.m., Room 333 Whitmore. David E. Evans, California Institute of Technology, on "Aspects of Natural Product Synthesis."

Gerontology Center, Individual and Family Studies, Psychology and Sociology Departments joint colloquium, 2:20 p.m., Room 101 Kern. Orville G. Brim Jr., president, Foundation for Child Development, on "Great Tales, Myths and Legends of Personality Change: The Tradition of Human Metamorphosis in the Western World."

Air Pollution Control, 2:20 p.m., Room 145 Fenske. Frank P. Partee, Ford Motor Co., Dearborn, Mich., on "Organization of an Environmental Control Function in a Large Corporation."

Anthropology, 3:30 p.m., Room 107 Social Science. Dr. Ralph Nicholas, University of Chicago, on "Smallpox, Malaria and the Disease Goddess in Bengal."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Dr. John Miller, NOAA, Silver Springs, Md., on "Global Monitoring for Climate Change."

Mathematics, 4 p.m., Room 103 McAllister. Harold Stark, MIT, on "Recent Progress in Number Theory."

Agronomy, 4 p.m., Room 111 Tyson. Ho Jin Lee on "Determination of Physiological Maturity in Oats."

Astronomy, 4 p.m., Room 445 Davey. Laura K. Hutton, University of Maryland, on "Very Long Baseline Interferometry of Radio Sources."

Lectures

Thursday, April 22

Dr. Fibret Yegut, Wellesley College, on "Bath and Gymnasium in the Ancient World — Social Institution and Architectural Form," 4 p.m., Room 112 Chambers. Sponsored by Art History and Architecture.

Friday, April 23

German Department Lecture Series, 8:30 a.m., Room 101 Kern. Walter Picard on "Germany in a Changing World."

Sunday, April 25

Dr. Richard Parizek, geology, on "Coal and the Environment: What Cost Must We Bear?" 1 p.m., HUB assembly room.

Dr. Peter Everett, man-environment relations, on "Physical Technology Will Not Solve Environmental Problems: We Must Change Our Behavior," 3:30 p.m., HUB assembly room.

Dr. Maurice Goddard, Secretary of Penna. Dept. of Environmental Resources, on "The Keystone State, Its Environment and You," 8:30 p.m., HUB assembly room.

Monday, April 26

Robert Porter Johnston, Western Michigan University, on "Black Artists in Pennsylvania," 8 p.m., HUB assembly room. Sponsored by Art History and Paul Robeson Cultural Center.

Middle East Studies Committee lecture, 7:30 p.m., Room 101 Kern. Dr. Gordon H. Torrey, School of Advanced International Studies, on "U.S. Intelligence and Diplomacy in the Middle East, 1950-1973."

Wednesday, April 28

Emanuel Shimoni, Israeli consul general, on "The Middle East, the United States and the United Nations," 8 p.m., HUB assembly room. Sponsored by American Professors for Peace in the Middle East.

Dr. Paul Berg, College of Science Alumni Fellow, on "Genetic Engineering: Challenge and Responsibility," 8 p.m., Room 108 Forum.

Thursday, April 29

Dr. Ralph W. Nicholas, anthropology and social sciences, University of Chicago, on "The Indian Political Crisis and American Scholarship," 7:30 p.m., HUB main lounge. Sponsored by the South Asia Committee, the University Committee on International Programs, and the Department of Anthropology.

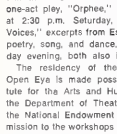
Dr. George P. Bonis, visiting professor of history, on "The Hungarian Estates in the Hapsburg Monarchy in the 16th Century," 8 p.m., Room 101 Kern.

Arts roundup

Open Eye Theatre

The Theatre of the Open Eye, with its troupe of dancers, actors and musicians under the direction of Jean Erdman, will be in residence from Thursday through Saturday, April 22-24, at the University, conducting classes and presenting three public performances.

Founded by Miss Erdman and author Joseph Campbell, Theatre of the Open Eye is dedicated to the creation of works of total theatre, uniting music, dance and drama with inspiration from the Japanese Noh theatre and the symbolic "Plays for Dancers" of the Irish poet, W.B. Yeats.



The Erdmen company will hold a master class in technique at 2:30 p.m April 22 in 132 White Hall. A music-for-the-stage workshop, with improvisational work conducted by Teija Ilo and Wendy Erdman, focusing on the ethno-musicology of the more than 75 percussion, string, and wind instruments used by the Open Eye, is planned at 2:30 p.m. April 23 in the Playhouse.

On Friday evening at 8 p.m. in the Playhouse, the company will perform "Moon Mysteries," three short dance dramas by William Butler Yeats. Cocteau's surrealist one-act play, "Orphee," will be presented at 2:30 p.m. Saturday, and "Primordial Voices," excerpts from Eskimo and Haitian poetry, song, and dance, at 8 p.m. Saturday evening, both also in the Playhouse.

The residency of the Theatre of the Open Eye is made possible by the Institute for the Arts and Humanistic Studies, the Department of Theatre and Film, and the National Endowment for the Arts. Admission to the workshops and performances will be free of charge, but tickets are required for "Moon Mysteries," "Orphee," and "Primordial Voices." Tickets are available at the Playhouse box office. Seating is limited, and telephone reservations will not be accepted.

Orchesis offers 8 works

Eight new dances headline the Orchesis Dance concert, "Opus, 1975," which will be presented at 8:30 p.m. on Thursday and Friday, April 29 and 30, and at 2:30 p.m. on Saturday, May 1, in the White Hall Dance

Theatre. Under the artistic direction of Patricia Heigel-Tenner, assistant professor of dance, student company members have employed various aspects of ballet, modern and jazz dance techniques in their choreography. Tickets, which cost $2 for general admission, $1 for students, are on sale at Room 105 White Bldg. and will also be available at the door.

Lecture on black artists

"Black Artists in Pennsylvania" will be the topic of a lecture by Robert Porter Johnston, associate professor of art at Western Michigan University, at 8 p.m. Monday, April 26, in the HUB assembly room. Co-sponsored by the Department of Art History and the Paul Robeson Cultural Center, Mr. Johnston has lectured and published widely on American black artists, including William Ellisworth Artis, sculptor-ceramicist, and Norman Lewis, painter. Mr. Johnston holds the bachelor's and master's degrees from Penn State and a master's degree from the University of Wyoming. A professional sculptor, he has taught at Hastings College and Mankato State College.

Ancient world is topic

Dr. Fibret Yegui, assistant professor of classical art at Wellesley College, will deliver an illustrated lecture on "Bath and Gymnasium in the Ancient World — Social Institution and Architectural Form" at 4 p.m. Thursday, April 22, in 112 Chambers Bldg. Sponsored by the Departments of Art History and Architecture, Dr. Yegui holds degrees from the Middle East Technical University, Ankara; Yale University; University of Pennsylvania; and a Ph.D. from Harvard University in art history, where his specialty was Greek and Roman art and architecture. Since 1963, Dr. Yegui has been a member of the Harverd-Cornell Sardis Archeeological Expedition. His architectural studies were under S. E. Rasmussen, Paul Rudolph, Serge Chermeyeff and Louis I. Kahn.

Boston Chamber Players

The Boston Symphony Chamber Players will appear in concert at 8:30 p.m. Friday, April 30, in Schwab Auditorium as the final performance in the Fine Arts Series presented by the Artists Series.

Since their formetion in 1964, under the management of the Orchestra as a distinct performing ensemble, the Players have given some 200 concerts. The 12 members of the group include the Orchestra's string, woodwind and brass principels and solo timpenist.

Their program features Mozert's Quartet in D for flute and strings K. 285, Ingolf Dahl's Allegro and Arioso for five wind instruments, Beethoven's String Trio in G, op. 9 no. 1, and Stravinsky's "l'Histoire d'un Soldat."

Tickets will go on sale Tuesday, April 27, at the HUB Booth end University Auditorium from 9 e.m. to 4 p.m.

Musica da Camera

Musica da Camera, University chamber orchestra conducted by Dr. D. Douglas Miller, associate professor of music, will perform its final concert of the year at 8:30 p.m. Wednesday, April 28, in the Music Bldg. recital hall. Handel's "Concerto Grosso," opus 6, number 5, with concertists Davis Brooks and Helen Steineker, violins, and Peter Brye, cello, and Stravinsky's "Pulcinella Suite," composed as a ballet after songs by Pergolesi, will be performed in the opening section of the program. Charles Ives' third symphony, "The Camp Meeting," with three movements titled "Old Folks Gatherin'," "Children's Day" and "Communion," will complete the program.

Organ recital

Guest artist William Sprigg, organist, associate professor, and chairperson of the music deparfment at Hood College, will piesent a recital at 8:30 p.m. Monday, April 26, in the Music Bldg. recital hall.

To be performed are Bach's Fantasy and Fugue in G Minor, Vogler's "Jesu, Leiden, Pein, und Tod," and Liszt's "Fantasy and Fugue on B-A-C-H." Also on Monday's program are Concert Variations on "The Star Spangled Banner" by Dudley Buck, one of several 19th century American pieces in the variation form, and Mr. Sprigg's own composition, Sonata II.

Mr. Sprigg is director of music and organist at the Frederick, Md., Evangelical Lutheran Church, one of the East's largest churches. A graduate of Eastman School of Music, he also studied at Boston and Harvard universities and the Peabody Conservatory of Music. As concert organist, he has performed at many colleges and churches in the East.

Wind ensemble

A retrospective program of highlights from the ten-year history of the Penn State Symphonic Wind Ensemble will be performed by the group, conducted by Smith Toulson, assistant professor of music, at 8:30 p.m. Friday, April 23, in the Music Bldg. recital hall.

Six of the most significant pieces performed in Symphonic Wind Ensemble concerts have been chosen for performance by the group, which includes both student and non-music majors. Opening the concert will be "Overture for Band," written by the 15-year-old Felix Mendelssohn and one of the very few wind pieces of the Romantic period. Polish pianist and composer Kazimierz Serocki composed the "Trombone Concerto," which will follow, and Karel Husa's "Prague," written in 1968 in commemoration of the Soviet invasion of the Czech capital, completes the opening half of the program.

Mozart's Serenade in C Minor, for two oboes, clarinets, French horns and bassoons; Hindemith's "Symphony for Band"; and Persichetti's "Masquerade" will be heard after the intermission.

Photographic exhibit

"The Whole World is Watching ..." an exhibit of photographs by Robert Joyce dealing with the social movements of the 1960s, is on display through April 30 in Room 221 Carnegie Bldg. A journelist, illustrator and photographer, Mr. Joyce was art editor of the "National Guardian," a weekly newspaper founded by a left-wing group of the Progressive Party.

The photographs, which depict various demonstrations, marches and protests from the 1960s, were selected, printed and mounted by Edward Leos, associate professor of journalism. The prints are made from negatives which are housed in the Labor Archives of Pattee. They were acquired by Penn State in 1973 after it was learned thet Mr. Joyce was seeking a repository for his photography.

The exhibit is sponsored by the School of Journalism and Sigme Delta Chi.

Cole Porter with chicken

A Dinner-Theatre featuring chicken cordon bleu and ... "Cole Porter Revue" will be offered Saturday and Sunday, May 1 end 2, in Rooms 102 and 112 Kern Bldg. The event is sponsored by the Kern Graduate Commons, the Department of Theatre and Film and Penn State's Hotel and Restaurant Society. The revue will feature selections and biography from Cole Porter's illustrious career, ranging from "Anything Goes" to "Can-Can." Dinner will be served at 6:30 p.m., and the show begins at 8 p.m. A limited number of theatre only tickets are available at $1.75 a person. Tickets for dinner and theatre cost $6. The show is available at the Kern Information Desk, and reservations may be made by calling 865-1878.

Week's films

Monday, April 26

Free Shakespeare film, "Macbeth" (Maurice Evans, Peter Schaefer), 6:30 p.m., Room 101 Chambers.

Wednesday, April 28

Free Shekespeare film, "Macbeth" (Orson Welles), 6:30 p.m., Room 101 Chambers. Eco-Action films, "Dust for a Small Planet," "Lest of the Dolphins," 7:30 p.m., Room 119 Bouske.

WPSX highlights

"The Agony of Independence: A Perspective on Angola and Southern Africa" examines the recent conflict in Africa Saturday, April 24, at 8 p.m. Included in the hour-long documentary are interviews with representetives from the State Department and Congress, journalists and academics.

"Sunset Song," Lewis Grassic Gibbon's novel about the life of a 16-year-old girl, begins a six-part dramatization on Masterpiece Theatre Sunday, April 25, at 9 p.m. Set in Scotland during the early 1900s, the story centers around Chris Guthrie and follows her intellectual and emotional development in a harsh rural village. The character is considered by many critics to be one of the most interesting in modern during in Scottish literature. "Sunset Song" may also be seen Fridays at 9 p.m.

"Why Me?" the acclaimed television special about breast cancer, returns for a repeat broadcast on WPSX-TV Monday, April 26, at 8:30 p.m. Lee Grant hosts the hour-long special, which features several breast cancer patients who describe their experiences before, during and after their mastectomies. It also explores the medical controversy currently surrounding breast cancer treatment and includes a demonstration of breast self-examination. At 9:30 p.m., Penn State Television is presenting "What If?", a local followup to the national broadcast.

"Opera Theatre," a series of five full-length operas, premieres Tuesday, April 27, at 9 p.m. with English language version of "La Traviata" by Verdi. Produced especially for television by the BBC and public television station WNET, the lavish production stars Elisabeth Harwood, John Brecknock and Norman Bailey. It features the Philharmonica Orchestra conducted by Alexander Gibson, and the Ambrosian Opera Chorus.

Staff vacancies

Staff vacancies in this publication generally require at least a baccalaureate degree or equivalent as a minimum educational qualification. Staff vacancies requiring less than the baccalaureate degree as well as those announced in the INTERCOM may be found in the Penn State REPORTER. All University employees who are interested in preference may apply by calling the Employment Division, 865-1387 (network Line 475-1387). Applications for these staff vacancies will be received until 5 p.m., April 25, 1975. **DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

ASSISTANT TO THE RISK MANAGER, CONTROLLER'S OFFICE — University Park

Responsible to the Risk Manager for providing assistance in the overall administration of the University's Workmen's Compensation program and associated programs relating to the function of the Insurance Office. Also act as liaison with the Division of University Safety in providing pertinent information in the areas of on-the-job injuries suffered by employees and take responsibility for insuring that the security of Shields Bldg is appropriately maintained. Bachelor's degree in business administration or equivalent, with one to two years of directly related experience

RESIDENCE AREA COORDINATOR — Behrend Campus

Responsible to the Dean of Student Affairs through the Residence Community Coordinator for assisting in the operation of the residence at the Office of Student Affairs by providing administrative, educational, cultural and personal services for the total residence hall program. Master's degree in college student personnel or related field of study, with up to one year of directly related experience, or bachelor's degree in related undergraduate major with one to two years of residence hall supervisory experience, or equivalent background and training

PROGRAMMER/ANALYST, INTERCOLLEGE RESEARCH PROGRAMS — University Park

Responsible for analysis, design, implementation and maintenance of programs and procedures necessary for the management accounting function of the Computelten Center. Other responsibilities include working with research staff in management information including accounting and other systems data; interface with faculty and staff with regard to problem related to the above areas. Bachelor's degree in business administration or computer science, or equivalent, with course credit or experience in a programming language, such as Fortran or PL/1, and business accounting equivalent to nine semester hours each. Potential for pursuence of master's degree is highly desirable.

APPLICATIONS ANALYST/PROGRAMMER, OFFICE OF BUDGET AND PLANNING — University Park

Under the guidance of the Project Leader or Systems Planning Specialist conducts information requirements analyses for administrative decision-making. Determines detailed requirements and formulates alternatives for solving the information/decision problems. Must be able to prepare computer programs to produce required information to satisfy problem solving objectives. Provide appropriate written and oral presentations of proposed solutions to problems. Assist in direction and control of junior staff members in the accomplishment of project objectives. Test, evaluate, modify and otherwise refine existing systems to meeting internal and external requirements for information. Bachelor's degree with training in computer-based information systems and one to two years of directly related experience in computer programming and systems analysis is required. Master's degree may be substituted for one to two years of directly related experience if it is appropriately related discipline.

ASSISTANT HOSPITAL DIRECTOR — MANAGEMENT SYSTEMS — Hershey

Responsible to Hospital Director for management engineering duties in planning and eversaeing utilization of hospital facilities and personnel. Bachelor of science degree in industrial engineering or equivalent, and four to seven years of directly related experience.

ASSISTANT FOOD SUPERVISOR, HOUSING AND FOOD SERVICE — University Park

Responsible for assisting in the supervision and directing food preparations. Duties include implementing public relations programs which support University goals and objectives. Bachelor's degree or its equivalent in journalism, public relations or marketing and three to four years of directly related experience or a master's degree or its equivalent in similar areas, plus one to three years of directly related experience. Extensive experience in all aspects of college public relations, with at least two years of supervisory experience desirable.

ADMINISTRATIVE ASSISTANT TO THE DEAN STUDENT AFFAIRS — Altoona Campus

Responsible to the Dean of Student Affairs for the coordination of a comprehensive student life service specialized administrative support to the Dean in a variety of areas. Bachelor's degree with major in education, business, human development, liberal arts, music, theatre or art and one year of directly related experience; or high school education and equivalent experience plus two years of college, plus two to four years of directly related experience. (Master's degree preferred.)

RESEARCH AIDE, COLLEGE OF AGRICULTURE — University Park

Responsible to a professor of entomology for conducting microbiological, chemical and histological experiments in pesticide research. Isolate and identify entomopathogens associated with biological means oil culturing and biochemical tests. Conduct chemical analyses and assist in devising new methods when necessary. Prepare plant and animal tissue and perform histological examinations. Prepare experimental plots at University Park and field locations for the study of biological control of insects. Compile and analyze data, using standard statistical methods. Perform other duties as assigned. Bachelor's degree in biological science (with courses in microbiology, chemistry and zoology) or its equivalent, plus up to one year of laboratory experience. Background in statistics and entomology desirable.

Remedial education – three points of view

In response to increasing concern, both at Penn State and nationally, over students with deficiencies in communication and arithmetical skills, the University Faculty Senate has undertaken to study the role of the University in remedial education. The following statements represent points of views of three senators on this issue. INTERCOM will be happy to consider for publication statements on this topic from other members of the University community.

Benjamin W. Niebel, professor and head of the Department of Industrial and Management Systems Engineering.

I'm not sure that the average student that applies to Penn State today is really much different than he or she was ten years ago, and I would like to see and challenge the statistics that indicate otherwise.

But let's assume that there are some basic skill deficiencies in our entering students. I do not think it is our business here at University Park to be concerned with such problems. Nor do I think that we should view ourselves as a corrective agency. If corrective work is needed, it should be done elsewhere and I would suggest three locations.

My first choice would be the high schools. If we are admitting students from the top two-fifths of the high school classes and they are unable to do first level work at Penn State, then we should make the Pennsylvania Department of Education aware of this so that in time they may bring pressure to bear on the public schools to get them to improve their instruction.

In the meantime, high schools might offer summer post-graduate remedial courses for their college-bound graduates. This would certainly be the least costly way of handling remedial education.

If this didn't work, then the community colleges might be called into service. These institutions have three advantages for this job as I see it. First, they are located throughout the state and give students a chance to save money by living at home. Secondly, their instructors are often former high school teachers who understand better than their University Park counterparts teaching at lower levels. Moreover, as faculty salaries are generally lower in community colleges, instruction can be had at a lower per-unit cost. Finally, community college instructors are accustomed to handling larger classes than are many of our faculty, and this, too, helps keep costs down.

My third and least personally acceptable choice for locating remedial programs would be our Commonwealth Campuses. We already have faculty involved in remedial work there, and I understand they're doing a good job. But it is not the job they are hired to do or should be doing unless this work can't be done elsewhere.

It has been made very clear that, given our current economic picture, no new programs will be added at Penn State unless corresponding cuts are made in existing programs. If we are now to engage in remedial education, we will have to pay for it by cutting ongoing programs. I really wonder what department is going to volunteer to have its graduate program reduced or its baccalaureate program modified in order to do remedial work.

Patricia M. Overdeer, associate professor of mathematics, Ogontz.

We all know that soon our regular admission students are going to fall off at the University because the high school population is falling off. We know, too, that we're now being urged to take in more minority students, blacks and others, who often come to us with problems engendered by inner city schools, where the level of achievement is not what it should be.

And we are getting increasing numbers of nontraditional students at Penn State — degree seeking adjuncts who bring much maturity and experience into the classroom but frequently lack appropriate academic backgrounds.

My feeling is that if we are going to admit these students, then we must be prepared to give them the opportunity for proper academic support, which means, in many cases, remedial work. Moreover, I think that the alternative to this is to lower the University's standards.

Right now, we have students coming into our freshmen classes lacking adequate background skills. As a result, the instructors in these classes are using much of their time providing remedial work rather than teaching new material. The students then go on to upper level courses where they and their instructors again face similar deficiencies, which are passed on to the next course. It's a constant struggle for everyone — the students who need initial remedial work, the instructors who must teach them under these circumstances, and the students who enter the courses prepared and end up finding the whole experience rather boring.

(Continued on page two)

Opinions solicited

Recently the University Faculty Senate was asked to endorse a proposal to provide remedial education courses to the increasing number of students who fail entrance proficiency examinations in basic mathematics and English. After a wide-ranging debate, during which concerns were raised about the effectiveness, cost, impact and appropriateness of such an effort, a Joint Presidential-Senate Commission to Study Remedial Education was suggested. The Commission is now at work and is arranging to obtain the counsel of representatives of all segments of the University. But such a search is inevitably imperfect; accordingly, the Commission solicits the opinions and advice of any interested members of the Penn State family on any aspect of this question. Written presentations can be made to Dr. John J. Cahir, Room 511 Oeike Bldg., University Park, or to the University Faculty Senate Office, Birch Cottage, University Park.

PENN STATE

Artist Series to sell tickets

Season subscriptions to the four series to be presented during the coming academic year by the Artists Series will go on sale beginning Tuesday, May 4, from 9 a.m. to 4 p.m. in Room 203 Schwab Auditorium.

Because so many of last season's programs were sold out, the Artists Series suggests that purchasing a season subscription now may prevent future disappointments. Although tickets will remain on sale throughout the summer, the best selection of seats will of course be available to those who purchase their tickets promptly.

The series and their programs are:

The **Fine Arts Series** — Gary Karr, double bass, Oct. 1; Philadelphia Composers' Forum, Jan. 21; Rampal and Veyron LaCroix, flute and harpsichord, Feb. 10; Guerneri String Quartet, March 26; Gregg Smith Singers, April 1; and Pittsburgh Chamber Orchestra, April 14.

The **Music Series** — Leonard Raver, organ, with percussion ensemble and electronic music, Sept. 17; Victor Herbert's "Naughty Marietta" with Cyril Richard, Oct. 10; Rudolf Serkin, pianist, Jan. 16; Leningrad Symphony, Feb. 5; Stuttgart Chamber Orchestra, March 19; Pittsburgh Symphony Orchestra with Barry Tuckwell, French horn, April 15.

The **Theatre-Dance Series** — "Equus" by Peter Shaffer, Sept. 26; Stars of the American Ballet with Violette Verdy, Peter Martins and Company, Oct. 17; Pilobolus Dance Theatre, Oct. 29; The Acting Company, "The Robber Bridegroom," a musical with John Houseman as artistic director, Nov. 5; The Young Vic Company with "Oedipus Rex," Dec. 3; and The Royal Winnipeg Ballet, Feb. 4.

The **Film Series** — Tuesday series, Hitch-

(Continued on page four)

Senate nominations announced

Nominations for officers of the University Faculty Senate for 1976-77 will be made by the Nominating Committee at the Senate's May 4 meeting.

Two Senate officers will be elected. John J. Coyle is serving as chairman-elect and will become chairman.

Nominated for chairman-elect are Thomas E. Daubert, Philip A. Klein and Winston A. Richards. Nominated for secretary are Isabel F. Knight, Thomas J. Knight, Stuart H. Mann, Miles T. Pigott and Lee W. Saperstein.

One faculty member is to be elected to a three-year term on the Faculty Advisory Committee. Nominated are Paul Axt, Roy C. Buck, M. Ronald Glaser, Benjamin W. Niebel, Guy E. Rindone, Albert N. Skomra, Hugh B. Urban and Lloyd W. Woodruff.

Two faculty members from University Park are to be elected to the Faculty Rights and Responsibilities Committee. Nominees are Donald M. Crider, Alfred J. Engel, Robert W. Frank, Joe A. Miller, and Theodore R. Vallance. Nominees for the one alternate faculty member to be elected are Frank Oachlite and John Lucas.

One dean is to be elected to the committee, with James M. Beattie and George O. Wolf as nominees. Nominated for the alternate dean member are Henry J. Hermanowicz and Harry Prystowsky. Nominees for the alternate faculty member from the Commonwealth Campuses are Lawrence B. Golden, Cara-Lynne Schengrund and Nancy M. Tischler.

Two members and two alternates are to be elected to the Standing Joint Committee on Tenure. Nominees are John Ayers, Ernest L. Bergman, Roy C. Buck, Alfred J. Engel, Evelyn Hovanec, Thomas J. Knight, William Rabinowitz and Betty Roy.

Also to be elected are three members, at least one of whom must be from University Park, to the University Promotion and Tenure Review Committee. Nominated are Robert O. Arbuckle, Arthur D. Brickman, Landon C. Burns, Jack F. Chapin, Oale Harris, Arthur J. Marsicano, P. Peter Rebane and Gerd Rosenblatt.

Additional nominations may be received from the Senate floor. Balloting is to be done by mail and the new officers and committee members announced at the June 1 meeting.

In other business, the Senate will reconsider recommendations on double majors from its Committee on Undergraduate Instruction. The committee recommends that the proposed policy be limited to the same baccalaureate degree with all requirements for each degree program being met.

It proposes changes in student rules to provide for baccalaureate degree candidates to undertake a program leading to more than one major under these conditions:

—Candidates must have as a cumulative grade point average at least the minimum grade point average as required by the added major for change to that major.

—Application for a multiple major program must be made prior to the term in which the candidate expects to graduate. Individual colleges and programs may require earlier application if necessary to meet their requirements.

—Any application must be submitted for approval to the program heads and dean(s) involved. If approved, an adviser will be assigned for each additional major.

—All requirements for each degree program in effect at the time of admission to each degree program must be met for satisfactory completion of the multiple major program.

In addition, the committee recommends

(Continued on page four)

Faculty Club drive begins

The Penn State Faculty Club has embarked on a membership drive in anticipation of the opening of its building in September.

Eligible for membership are all resident and nonresident faculty — including nondegree-seeking research assistants — staff exempt professionals, librarians, executives and administrators, and members of the University's Board of Trustees.

The Club's building, located just north of the Nittany Lion Inn, will have a complete kitchen, operated by its own chef. There will be dining facilities for 100 persons in the main hall, and private dining room space for about 50 more persons. A lounge area will seat 60, and there are two attractive smaller sitting areas.

The Club plans to offer seasonal and special programs such as football luncheons, dances, bridge tournaments, before-the-theatre dinners, teas and cocktail parties. Programs will be tailored to the desires of the membership.

Excluding special events, the club will be open from 11 a.m. to 9 p.m., Monday through Saturday, and from 11 a.m. to 2:30 p.m. on Sunday. Meals will be served from 11:30 a.m. to 2:30 p.m. and from 5:30 p.m. to 8 p.m. daily, and a Sunday brunch from 11:30 a.m. to 2:30 p.m.

A dues and fees schedule has been determined. Yearly dues, which may be paid in installments, will be $30 for resident University Park faculty and staff and $10 for nonresidents. There is a $25 joining fee for residents, $15 for nonresidents. An initial $25 deposit, which is refundable, is requested for residents, with a further $25 due Sept. 1. Nonresidents will pay $10. The joining fee will increase $10 after Aug. 31.

PENN STATE COLLECTION

Faculty notes

Dean Decker

A 25-year service award has been presented to **William S. Decker,** assistant dean for students and associate professor of marketing in the College of Business Administration.

A native of Evansville, Ind., Dean Decker received a B.S. in commerce and an M.A. in marketing from the University of Iowa and attended the Graduate School of Business at Columbia University. Prior to coming to Penn State, he was an instructor in marketing at the University of Connecticut and Columbia.

At Penn State he has been involved in curriculum revision for the associate degree program in Business Administration and recently served on the Task Force on Retention and Transfer of Students. Other committee memberships include the University Committee on Resident Education Procedures, the Associate/Assistant Deans for Commonwealth Campuses and the Administrative Council of Undergraduate Instruction.

Dean Decker is a member of the American Marketing Association, the American Academy of Advertising, Beta Gamma Sigma, Pi Gamma Mu (social science honorary), Alpha Kappa Psi and Alpha Delta Sigma (advertising). During World War II, he was a captain in the U.S. Air Force, and he retired as a lieutenant colonel from the U.S. Air Force Reserve.

Eight faculty members in the College of Science are authors of research papers to be presented at the 76th annual meeting of the American Society for Microbiology in Atlantic City, N.J., May-2-7. **Dr. Lester E. Casida Jr.,** professor of microbiology; **Dr. Jean E. Brenchley,** associate professor of microbiology; and **Dr. Paul E. Kolenbrander,** assistant professor of microbiology, will each contribute two papers. Dr. Brenchley and Dr. Kolenbrender will each also preside at one of the meeting's sessions. In addition, Dr. Casida has been invited to present a paper at a special seminar on the application of electron microscopy to the study of microbial ecology. **Dr. Walter S. Ceglowski,** associate professor of microbiology, will present a paper and also act as convener of the seminar on immunofluorescence in chemical microbiology and immunology. Other faculty members planning to contribute papers are **Dr. Allen T. Phillips,** professor of biochemistry; **Dr. Terence M. Joys,** associate professor of microbiology; **Dr. Christine F. Pootjes,** associate professor of microbiology; and **Dr. John J. Docherty,** assistant professor of microbiology.

Dr. Vernon H. Neubert, professor of engineering mechanics, has authored a chapter in "Shock and Vibration Computer Programs," a book recently published by the Shock and Vibration Information Center, Washington, D.C. His chapter, "Inertia Matrices," deals with techniques for representing the mass or inertia of vibrating structures in some of the major computer programs in use in the United States and Europe.

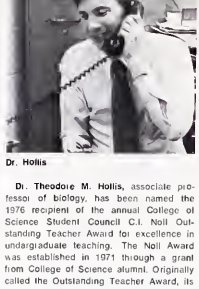
Lee Arnall Malid, M.D., has been named assistant professor of anesthesiology at Hershey. Dr. Malid received his B.S. at Penn State and an M.D. from Jefferson. He has been a clinical associate in anesthesiology at the National Institutes of Health.

Seven Penn Staters made it through the grueling heat and 26.2 mile course of this year's Boston Marathon. Leading the University pack last week with a time of approximately 2 hours, 51 minutes, was **Arthur Costantino,** a graduate student in sociology and North Halls coordinator. (Runners have not yet received their official times, so figures in seconds are not available.) **Torrence D. Parsons,** associate professor of mathematics, was 3:08, and **Daniel R. Toy,** graduate student in marketing, ran the course in 3,11. **Elwin Davis,** a visiting professor of mathematics, had a time of 3:28, and **Beinard R. Greene,** ed psych graduate student, was 3:25. **Michael Lilburn,** graduate student in animal nutrition, was 3:31. Competing in the over-40 age group were **Miles T. Pigott,** assistant director of the Applied Research Lab and professor of engineering research, who finished in about 4 hours, and **Dr. Herschel W. Liebowitz,** professor of psychology, who made it in 4:04. The 90 degree heat (in the shade) slowed everyone's time. The winner made it in 2:20:19.

Dr. Vilma R. Hunt, associate professor of environmental health, has been awarded a W. K. Kellogg Foundation Fellowship by the Hospital Research and Educational Trust, an affiliate of the American Hospital Association. Dr. Hunt will investigate the use of hospital records to monitor morbidity and mortality of certain diseases.

Dr. Melvin H. Woll, professor of humanities and English at Capitol Campus, is the compiler of the recently published catalog and set of indexes to a 300-year-old collection of materials relating to early printing. The collection, now held by the British Museum and Library, was first gathered by John Bagford in the late 1600s but has never been cataloged. It includes several thousand title-pages and fragments of English printed books published in the 15th through 17th centuries, and preserves a leaf from a copy of the Gutenberg Bible. This is the first catalog of the holdings of the British Library's collection of printed books to be produced with the help of a computer. Prof. Woll's research interests lie in the area of computer applications to the study of literature and the humanities.

Dr. Mary T. Strauss, assistant professor of English at the Beaver Campus, will participate in a conference on "The American Woman" at the Third Annual Spring Conference, City University of New York, May 1. She will present a paper titled, "A Study of the Women in Faulkner's 'Light in August.'"



Dr. Walter H. Walters, dean of the College of Arts and Architecture, will serve as chairman of the newly established Commission on the Fine Arts in the National Association of State Universities and Land-Grant Colleges.

The commission will focus the efforts of the association, with its 150 member institutions, on recognizing the activities of fine arts deans and will provide a mechanism within NASULGC for liaison between deans of arts and sciences with those of fine arts.

Dr. Gordon C. Godbey, associate dean for Commonwealth Campuses and Continuing Education, College of Education, has been approved as an Associate of the International Council for Adult Education. The council is active in developing leadership and programs in adult education, and it places special emphasis on applying continuing education to the problems of developing nations.

Dr. James R. Jenness Jr. has been named a research associate at the Applied Research Laboratory. He has been serving as a senior scientist with Marinco, Ltd., State College. Earlier he was a physicist with HRB-Singer, Inc., State College; U.S. Naval Air Development Center, Johnsville; and NASA, Langley Field, Va. Dr. Jenness is a graduate of Parsons College with a B.S. in physics. His M.A. in physics was conferred by Temple University and his Ph.D. in solid state science by Penn State in 1972.

Dorothy V. Harris, professor of physical education, recently participated in a symposium devoted to "Coping With Managerial Stress," conducted by the Institute for Public Service, University of Connecticut. Her paper was titled, "Coping with Stress by Being Physically Fit."

Dr. Hollis

Dr. Theodore M. Hollis, associate professor of biology, has been named the 1976 recipient of the annual College of Science Student Council C.I. Noll Outstanding Teacher Award to excellence in undergraduate teaching. The Noll Award was established in 1971 through a grant from College of Science alumni. Originally called the Outstanding Teacher Award, its name was changed in 1974 to honor Dr. C. I. Noll, first dean of the College of Science.

Dr. Hollis was chosen as this year's winner by a selection committee from over 500 nominations submitted by College of Science students. In their nominations, students most often cited Dr. Hollis's well organized lectures and willingness to give extra help to students as his most outstanding characteristics.

A specialist in the study of artery physiology, Dr. Hollis joined the biology department faculty as an assistant professor in 1960. He was promoted to associate professor in 1975. An active researcher, Dr. Hollis pioneered investigations into the role of histamine production in atherosclerosis, the disease in which cholesterol accumulates and forms deposits within the arteries obstructing the free flow of blood.

The Austrian PEN-Club has elected **Dr. Rio Preisner,** professor of German, to membership. An internationally known group of writers' organizations, the first PEN club (Poets, Playwrights, Editors, Essayists, Novelists) was founded in 1921 to combat racial hatred and political oppression. Though its national chapters, it strives to advance freedom of speech and open discussion of ideas in all countries. Dr. Preisner has an international reputation both for his work as a literary critic and his writing on political philosophies. His published works include a monograph on the Austrian dramatist J. N. Nestroy, a two-volume "Critique of Totalitarianism," and studies of Rilke, Kafka and Bloch.

John M. Shemick, associate professor of industrial arts education, presented a paper, "A Tentative Taxonomy of Psychomotor Skilled Tasks," April 20 at the 5th International Conference of the American Industrial Arts Association in Des Moines, Ia.

Dr. Osamu Nishikawa, associate professor of physics, will present a paper titled, "Field Emission and Field Ion Microscopy of Gallium and Tin on Tungsten," at the International Symposium on Application of FIM to Metallurgy in Lake Yamanaka, Japan, May 6-8. His co-author is **A. Reza Saadat,** a doctoral candidate in physics. He also presented the paper at the Surface Physics Seminar at Bell Telephone Laboratories, Murray Hill, N.J., April 16, and will deliver it before the Physical Science Colloquium at the T. J. Watson IBM Research Center, Yorktown Heights, N.Y., May 13.

Dr. Yupo Chan, assistant professor of civil engineering, has been elected treasurer of the Transportation Science section of the Operations Research Society of America.

Dr. Drew Hyman, assistant professor of community development, and **Dr. Richard Wunderlich,** research associate, will present a paper, "Using Citizen's Complaints as Social and Organizational Indicators," at the 1976 annual meeting of the American Sociological Association. The paper is based on their research on The Pennsylvania Governor's Action Center. Dr. Hyman, along with three other members of the Division of Community Development —

Abram Snyder, Larry Gamm and **Robert Sebring** — also participated in a symposium at the University of Missouri on "The Condition of Community in the United States — the Degeneration and Regeneration of a Society." The symposium addressed ways in which local-level energies can be mobilized toward addressing pressing social problems.

Dr. Dianne B. Seale, research associate in the Department of Biology, presented an invited lecture to the Section of Ecology and Systematics at Cornell University, April 8. She discussed "The Impact of Amphibian Larval Populations on ang ing social problems.

Remedial ed

(Continued from page one)

I don't want to see us lowering our standards for graduation from Penn State. I don't think it's improper or unrealistic to expect students to pass basic proficiency tests in mathematics and English before graduating.

Nor do I think that we have suddenly produced a generation of students who are academic dullards, incapable of learning. I do think that the University is now confronting new kinds of students and that we are seeing the results of the failure in recent years of high schools to stress basic skills.

Unless we accept the responsibility to providing remedial education in these skills, we are going to be forced into either lowering Penn State's standards or else turning our backs on many potentially able students.

Dr. Arthur O. Lewis, associate dean, Liberal Arts, and professor of English.

I believe we have a mission to serve society in this institution but am not sure what the level of service is anymore, and I don't see why this agency of the state should be expected to do something that another agency of the state — the public schools — ought to be doing. However, if no one else in the educational system is going to do it, then the University has got to help maintain those standards of communication and mathematical skill essential to the continuing of civilization in some form resembling the present.

If the students are already here, we must give them all the remedial help that they need to reach a level that we regard as appropriate to a college graduate. If we ever got to the point where we had to teach our students to tie their shoes and butter their shits, it would probably be our responsibility as a land-grant university. But we ought to ask why society sees it as our responsibility.

We are actually bootlegging remedial education now. I learned the other day that 38 sections of English 11 (remedial) were taught on the Commonwealth Campuses this year, and there have been seven sections on this campus as well. If we offered remedial English to everyone who ought to have it, according to our placement tests, we would need 145 sections through out the University next year for baccalaureate students alone.

I assume that we'll wind up with remedial courses not just in English, but in other areas as well. That means money, and we know our money pie isn't going to get any bigger in the future, so we'll have to slice it in a different way.

I know that the Faculty Senate isn't responsible for finances. But I think that we in the Senate need to remember that something else we also want may have to be eliminated from the University's offerings. I know, for example, a particular program here that is now costing almost exactly the same amount as it would to teach the remedial English courses needed on this campus.

I don't say we are going to eliminate that particular program in order to teach remedial English. But I am worried about how much the faculty will be involved in making the decision. I am not totally convinced that somebody sitting in a budget office is able to make the appropriate academic decision in a case like this. So I think before we go very far in commitment ourselves to remedial education, we have really got to figure out where the money for it would come from.

University Park Calendar

April 29—May 9

Items to be included in this calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday at the week preceding publication.

Special Events

Thursday, April 29

Gentle Thursday, 10-10, HUB lawn.

Dr. Robert M. Smith, assistant to the Provost, on "Some Observations on Academic and Administrative Program Review," 12:30 p.m., lunch 12 noon, HUB dining room A & B. Sponsored by the PSU branch American Society for Engineering Education.

Faculty Women's Club and Newcomers Club spring luncheon, reception 11:30 a.m., luncheon 12:30 p.m., HUB ballroom. Speaker, Dr. Norman A. Graebner, Distinguished Visiting Professor of History, on "Philadelphia and the American Revolution."

Commons Videotape, noon, Kern lobby.

PSHA 410, A Ukranian Easter Feast, 5:30 p.m., Maple Room. Reservations required: 865-7441.

University Theatre, "Unruly Children: A Pennsylvania Bicentennial Vaudeville," 8 p.m., Pavilion Theatre.

Pennsylvania Vocal Ensemble, 8:30 p.m., Music Bldg. recital hall.

Orchesis Dance Company, "Opus 1976," 8:30 p.m., White Hall Dance Theatre.

Friday, April 30

Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

University Theatre, "Unruly Children: A Pennsylvania Bicentennial Vaudeville," 8 p.m., Pavilion Theatre.

Orchesis Dance Company, "Opus 1976," 8:30 p.m., White Hall Dance Theatre.

Pennsylvania Vocal Ensemble, 8:30 p.m., Music Bldg. recital hall.

Artists Series, Boston Symphony Chamber Players, 8:30 p.m., Schwab.

Friday-Saturday, April 30-May 1

Conference on The Dimensions of Black Studies for Educational Institutions in Pennsylvania, Ketler Bldg.

Saturday, May 1

Breazeate Nuclear Reactor Facility Open House, 10 a.m. to 3 p.m. Transportation available every half hour from the parking lot behind the Mechanical Engineering Bldg.

Penn State Model Railroad Club Equipment Auction, 10 a.m.-6 p.m., Rooms 320, 214 HUB.

Antique aircraft fly-in, 10 a.m.-4 p.m., University Airport. Sponsored by Aerospace Engineering department.

Orchesis Dance Company, "Opus 1976," 2:30 and 8:30 p.m., White Hall Dance Theatre.

Sports: Men's track, vs. Michigan, men's golf, Nittany Lion Invitational. Women's lacrosse, vs. Millersville, 1 p.m.

Dinner Theatre, 6:30 p.m., Rooms 102, 112 Kern. "Cole Porter Review."

University Theatre, "Unruly Children: A Pennsylvania Bicentennial Vaudeville," 8 p.m., Pavilion Theatre.

Sunday, May 2

Chapel Service, 11 a.m., Elsenhower Chapel. Dr. Rosemary R. Ruether, historical theology, Howard University.

Black Christian Fellowship worship service, 11:15 a.m., Eisenhower Chapel. Pastor Gerald G. Loyd, the Jerry Loyd Ensemble.

Sports: Men's baseball, vs. Mansfield, 1 p.m. Men's golf, Nittany Lion Invitational.

Shavers Creek Nature Center, Early Morning Bird Walk, 7 a.m.; Ecology Walk, 3 p.m., Mineral Industries Bldg., Stone Valley

Katherine Kello, piano, 3:30 p.m., Music Bldg. recital hall.

Dinner Theatre, 6:30 p.m., Rooms 102, 112 Kern. "Cole Porter Review."

Monday, May 3

Haircut and Styling, demonstration, 12 noon, Room 101 Kern.

Ann Robinson, French horn, 8:30 p.m., Music Bldg. recital hall.

Tuesday, May 4

Symposium on "Think Small for 2076," 9:20 a.m. throughout day, Room 301 HUB. Sponsored by the Science, Technology and Society Program.

Gallery Talk, William Hull and William Devis on "Framing Original Art Works," 10:30 a.m., Museum of Art.

University Theatre, "Unruly Children: A Pennsylvania Bicentennial Vaudeville," 8 p.m., Pavilion Theatre.

Wednesday, May 5

"Travel Fair," exhibits, workshops, resources for summer travel, 9 a.m.-5 p.m., Kern.

Sports. Men's tennis, vs. Lehigh, 3 p.m. 102nd John Henry Frizzell All-University Speech Contest, finals, 7 p.m., Room 121 Sparks

Penn State Thespians, "South Pacific," 8:30 p.m., Schwab.

University Theatre, "Unruly Children: A Pennsylvania Bicentennial Vaudeville," 8 p.m., Pavilion Theatre.

Israeli Independence Day Celebration, 7 p.m., Hillel Foundation. Ruthi Navon, Israeli singer, and David Kriyoshi, Israeli pianist. Refreshments and folk dancing.

Penn State Brass Chorale, 8:30 p.m., Music Bldg. recital hall.

Thursday, May 6

"Travel Fair," 9 a.m.-5 p.m., Kern.

Commons Videotape, noon, Kern lobby.

Sports: Women's tennis, vs. Princeton, 2 p.m. Women's lacrosse, vs. East Stroudsburg, 3 p.m.

University Theatre, "Unruly Children: A Pennsylvania Bicentennial Vaudeville," 8 p.m., Pavilion Theatre.

Penn State Thespians, "South Pacific," 8:30 p.m., Schwab.

Friday, May 7

"Travel Fair," 9 a.m.-5 p.m., Kern.

Sports: Men's lacrosse, vs. Pennsylvania, 8 p.m.

University Theatre, "Unruly Children: A Pennsylvania Bicentennial Vaudeville," 8 p.m., Pavilion Theatre.

Penn State Thespians, "South Pacific," 8:30 p.m., Schwab.

Claremont Woodwind Quintet, 8:30 p.m., Music Bldg. recital hall.

Saturday, May 8

College of Agriculture Open House, celebratng the development of agricultural technology during the past 200 years, 8:30 a.m.-2 p.m., headquarters, lobby of Ag. Adm. Bldg.

Sports: Women's tennis, vs. Ohio State, 9:30 a.m. Golf, Lady Lion Spring Invitational. Women's lacrosse, vs. Cortland, 1 p.m.

University Theatre, "Unruly Children: A Pennsylvania Bicentennial Vaudeville," 8 p.m., Pavilion Theatre.

Penn State Singers' Music of American Composers, 8:30 p.m., Music Bldg. recital hall.

Howard Cosell, 8 p.m., Recreation Bldg Sponsored by Colloquy.

Penn State Thespians, "South Pacific," 8:30 p.m., Schwab.

Sunday, May 9

Chapel Service, 11 a.m., Eisenhower Chapel. Rev. Charles L. Coleman, program director, religious affairs.

Black Christian Fellowship worship service, 11:15 a.m., Eisenhower Chapel. "Today Is Women's Day." Mrs. Carrie Lucious, Pittsburgh, special women's day choir.

Shavers Creek Nature Center, Early Morning Bird Walk, 7 a.m.; Spring Wildflower and Ecology Walk, 3 p.m., Mineral Industries Bldg., Stone Valley

Penn State Glee Club Mother's Day Concert, 3 p.m., Schwab.

Seminars

Thursday, April 29

Chemistry, 12:45 p.m., Room 333 Whitmore. David E. Evans, California Institute of Technology, on "Aspects of Natural Product Synthesis".

Gerontology Center, Individual and Family Studies, Psychology and Sociology Departments joint colloquium, 2:20 p.m., Room 101 Kern. Orville G. Brim Jr., president, Foundation for Child Development, on "Great Tales, Myths and Legends of Personality Change: The Tradition of Human Metamorphosis in the Western World."

Air Pollution Control, 2:20 p.m., Room 145 Fenske. Frank P. Partee, Ford Motor Co., Dearborn, Mich., on "Organization of an Environmental Control Function in a Large Corporation."

Entomology, 3:30 p.m., Room 107 Social Science. Dr. Ralph Nicholas, University of Chicago, on "Smallpox, Malaria and the Disease Goddess in Bengal."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Dr. John Miller, NDAA, Silver Springs, Md., on "Global Monitoring for Climate Change."

Mathematics, 4 p.m., Room 103 McAllister. Harold Stark, MIT, on "Recent Progress in Number Theory"

Agronomy, 4 p.m., Room 111 Tyson. Ho Jin Lee on "Determination of Physiological Maturity in Oats."

Astronomy, 4 p.m., Room 445 Davey. Laura K. Hutton, University of Maryland, on "Very Long Baseline Interferometry of Radio Sources."

Ceramic Science, 11 a.m., Room 301 Materials Bldg. Dr. L. Austin on "Theory of Grinding Operations."

Monday, May 3

Organic Chemistry, 8 p.m., Room 333 Whitmore. Robert Lazarus on "The Secondary Isotope Effect: Mechanistic Applications."

Tuesday, May 4

Analytical Chemistry, 12:45 p.m., Room 445 Davey. Steven Prescott on "Chemical Ionization Mass Spectrometry of Betadiketonates."

Solid Waste, 2:20 p.m., Room 140 Fenske. L. J. Minnick, L. U. Conversion Systems Corp., Philadelphia, on "Fly Ash Utilization."

Astronomy and Physics joint colloquium, 3:50 p.m., Room 119 Osmond. William K. Rose, astronomy, University of Maryland, on "Theory of Pulsers and Compact X-Ray Sources."

Civil Engineering and Engineering Mechanics, 4 p.m., Room 232 Hammond. Dr. W. F. Chen, Lehigh University, on "Constitutive Relations for Concrete."

Inorganic Chemistry, 8 p.m., Room 333 Whitmore. Dr. F. Urbach, Case Western Reserve University.

Entomology, 4 p.m., Room 204 Patterson. Arthur A. Hower, PSU associate professor of entomology, on "Insect Pest and Parasite Management in Alfalfa"

Thursday, May 6

Chemistry, 12:45 p.m., Room 333 Whitmore. Gerl Mutterties, Cornell University, on "New Organometallic Chemistry."

Air Pollution Control, 2:20 p.m., Room 145 Fenske. Robert A. D'Dell, graduate student, on "Mechanisms and the Rate of Sulfur Dioxide Uptake by Vegetation."

Physics, 3:50 p.m., Room 119 Osmond. Dr. Thomas Appelquist, Yale University, on "Recent Developments in Weak and Electromagnetic Interactions."

Anthropology and Population Issues Research Office, 3:30 p.m., Room 107 Social Science. Dr. Alice B. Kasakoff, anthropology, University of South Carolina, on "Spatial Location and Social Organization: An Analysis of Tikopian Patterns."

Agronomy, 4 p.m., Room 111 Tyson. S. Setty on "Inheritance of Leaf Area In Corn."

Astronomy, 4 p.m., Room 445 Davey. Dr. Mark Reid, Harvard College Observatory, on "Stellar Masers."

Mathematics, 4 p.m., Room 103 McAllister. Joseph Schonfeld, Duke University, on "Some Results in Logic."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Morris A. Bender on "Temperature Gradients and Clear Air Turbulance Probabilities."

Lectures

Thursday, April 29

Dr. Ralph W. Nicholas, anthropology and social sciences, University of Chicago, on "The Indian Political Crisis end American Scholarship," 7:30 p.m., HUB main lounge. Sponsored by the South Asia Committee, the University Committee on International Programs, and the Department of Anthropology.

Dr. George P. Bonis, visiting professor of history, on "The Hungarian Estates in the Hapsburg Monarchy in the 18th Century," 8 p.m., Room 101 Kern.

Monday-Thursday, May 3-6

Frank C. Whitmore Lectures, Barry M. Trost, professor of chemistry, University of Wisconsin, Room 333 Whitmore. "New Approaches to the Design of Molecular Architecture I. The Framework," May 3, 8 p.m. "Molecular Architecture II. The Tools," May 4, 12.45 p.m. "Molecular Architecture III. The Finishings," May 5, 12.45 p.m. "Molecular Architecture IV. The Blueprint," May 6, 4 p.m.

Tuesday, May 4

Ernest C. Pollard Lecture, 4 p.m., Room 101 Althouse. Peter B. Moore, molecular biophysics and biochemistry, Yale University, on "Mapping the Locations of Proteins In the Ribosome by Thermal Neutron Scattering."

Wednesday, May 5

Doterer Lecture, 8 p.m., HUB assembly room. Dr. Hans-Georg Gadamer, University of Heidelberg emeritus, on "Hermeneutics: Between the Critical Rationalism of Popper and the Critique of the Ideologies of Habermas." Sponsored by the Department of Philosophy.

Films

Friday April 30

Four films on Japan, sponsored by the Japanese Speaking Society, 7:30-9:30 p.m., HUB assembly room.

Wednesday, May 5

Free Shakespeare film, "Henry V" (Olivier), 6:30 p.m., Room 101 Chambers.

Artists Series film, "Singin' in the Rain," 8:30 p.m., University Auditorium.

Friday, May 7

Student Film Organization, films produced by film majors, 10 a.m.-4 p.m., HUB assembly room.

Saturday-Sunday, May 8-9

Student films, 10 a.m.-4 p.m., HUB assembly room.

Hillel Foundation film, "I Love You Rosa," Saturday, 9 p.m.; Sunday, 7 p.m., HUB assembly room.

University schedule

Monday, May 3

Start preregistration for fall term.

First day for signing summer term NDSL, BEOG and University long term loans, Room 108 Shields.

Wednesday, May 9

Late drop deadline.

Last day for signing spring term NDSL, BEOG and University long term loans, Room 108 Shields.

Meeting

Monday, May 3

College of Health, Physical Education and Recreation faculty meeting, 7 p.m., Room 109 White.

Exhibits

Museum of Art: Portraits USA. 1776-1976.

Zoller Gallery: Graduate Show, opening May 1.

Kern Gallery: W. C. Handy Jazz Exhibit, until April 30. Tom McKinney, Paintings, until April 30. African Jewelry and Bronze Castings, until April 30. Bruce Johnson, Watercolors, opening May 1. 1st Annuel Graduate Sculpture Invitational, opening May 8.

HUB Gallery: Recent Works by Stuart Frost.

HUB Main Lounge: Suiting Everyone (Smithsonian Traveling Exhibition Service).

Pattee Library: Main Lobby — An Exhibit from the Entomology Department by David Shetlar. East Corridor Gallery — Drawings and Prints, Alten Larkin. Lending Services Lobby — Drawings and Paintings, Bill Diaz. Drawings, Nell Feather, opening May 4.

Chambers Gallery: Undergraduate Student Exhibition, att medle.

Singers offering "Americana"

"Americana," an evening of vocal novelties, will be performed at the fifth annual concert of the Pennsylvania Vocal Ensemble at 8:30 p.m. Thursday and Friday, April 29 and 30, in the Music Bldg. recital hall at the University. The ensemble, made up of 25 vocalists, including University students and singers from the State College area, performs under the direction of Bruce Trinkley, assistant professor of music.

The first portion of the program will consist of Randall Thompson's "Americana" to texts from "The American Mercury"; songs by Charles Wakefield Cadman from the University's Cadman Collection in the music department; Virgil Thomson's "Capital, Capitals" with text by Gertrude Stein; two southern folk hymns; and "General William Booth Enters Heaven" by Charles Ives. In the second portion, a selection of songs by Stephen Foster will be performed. Soloists In this segment will be soprano Karen Scott, assistant professor of music, and baritone Douglas Smith, a music graduate student and assistant director of the ensemble.

News in brief

Japanese films

An evening of films on Japan will be shown from 7:30 to 9:30 p.m. Friday, April 30, in the HUB assembly room.

The films are sponsored by the Japanese Speaking Society, a group organized by Hisako Tanaka, assistant professor of Japanese at the University.

Prof. Tanaka was brought in to direct the Japanese Lenguege and Literature Program, which was started lesi fall in the College of the Liberal Arts, with e grant from Japan Foundation.

Although lis offerings are not yet listed in the University Bulletin, the program now sponsors courses in elementary and intermediate Japanese, along with a survey of Japanese literature in translation. The latter runs the gamut from such classical works as the "Tale of Genji" to novels by Nobel laureate Mishima Kawabata.

Among the films to be shown on Friday are "Tokyo," "Festival Japan," "An Invitation to Japan" and "The Path: the Tea Ceremony."

New symposium

The Interdisciplinary Symposium on Value will hold its first program meeting at 7:30 p.m. Monday, May 3. Arrangements for a permanent location for meetings are underway. At the initial session, a paper developing "A Philosophical Defense of Relativism" will be presented by Dr. Joseph Flay, associate professor of philosophy. Two responses and general discussion will follow.

The recently organized Symposium brings together some 60 faculty members from various colleges and departments whose scholarly work and interests involve questions of value. The group will meet bi-monthly to discuss presentations by members or guests and for informal conversation. Faculty members and students who would like to participate on a regular basis are urged to indicate their interest by writing to James Martin, Room 439 Moore Bldg.

Faculty convocation May 11

President John W. Oswald and Mrs. Sally Small, chairman of the University Faculty Senate, will address the faculty of the University at the third annual University-wide Faculty Convocation to be held at 4 p.m. Tuesday, May 11.

University Park faculty members can attend the program at University Auditorium, as schedules permit. To accommodate faculty at other locations a simultaneous broadcast will be made to each of 21 other locations where faculty can gather in an aree convenient to them.

Since construction of University Auditorium, President Oswald has held an annual convocation for the faculty.

Brass Chorale to perform

The Penn State Brass Chorale, conducted by James Benshoof, assistant professor of music, will perform in concert at 8:30 p.m. Wednesday, May 5, in the Music Bldg. recital hall.

To be performed are Paul Winter's "Festfanfare" for three trumpets and trombones, a tuba, and timpani and Charles Knox's Symphony, a new contemporary work in one movement. "Three Intradas," short pieces for brass by Nelhybel, two ot which are performed by the Brass Chorale traditionally for the recessional at University commencement exercises, and Haulreich's Symphony for Brass and Timpani in three movements will complete the program.

'Think Small for 2076'

The second annual symposium sponsored by the faculty of the Science, Technology and Society Program will be held Tuesday, May 4, in Room 301 HUB. The topic is "Think Small for 2076."

The morning session will begin at 9:20 a.m , with a welcome from Robert J. Heinsohn, associate professor of mechanicel engineering. The keynote address, "Machinery, Organization and the American Mind: On Thinking ebout Worrying about Modern Life," will be delivered by Michael L. Barton, assistant professor of social science at Capitol Campus.

Donald P. Verene, associate professor of philosophy, will moderate a panel discussion, "A Question of Scale: Small vs. Large," with Prof. Barton; Peter B. Meyer, assistant professor of economic planning; Edwin J. Parrish, assistant professor of engineering (Altoona); and Kenneth P. Wilkinson, associate professor of rural sociology.

The afternoon session, which begins at 1:30 p.m., will be chered by Philip M. Becker, assistant professor of fuel science. Vincent C. Kevaloski, Interdisciplinary Program in the Humanities, and George B. Kleindorfer, associate professor of Management science, will talk on "The Imperialism of the Mind. Insirumental Reason and the Problem of Scele in Advanced Industriel Society." Roger D. Evered, assistant professor of management, will respsond.

Larry D. Spence, assisiant professor of political science, will speak on "The Politics ot Technology" at 2:15 p.m., and Marvin E. Rozen professor of economics, will serve as responder. A discussion period will follow.

Faculty, staff and studenis are invited to attend all of the sessions.

Bicentennial salute at HUB

The HUB Terrance Room will be doing its bit for the Bicentennial the week of May 3-8 with specially planned live musical entertainment keyed to a theme celebrating the various regions of the country. Monday is New England's day, so the menu includes boiled dinner, Yankee pot roast and Boston baked beans. On Tuesday, the scene shifts to the Deep South with Louisiana creole, plantelion chicken, Virginia baked ham and black-eyed peas. Travelling west ot the Mississippi on Wednesday, diners can sample Texas-style spareribs, Chinalown pepper steak or stuffed Pacific sole. The Mid-Atlantic region takes the spotlight on Thursday with Pennsylvania Dutch beef, fried bay clams and Maryland style chicken.

Friday and Saturday evening, there is a special All-American Dinner, including roast tom turkey with midwestern cornbread dressing, Mississippi River steamboat round, Chesapeake Bay crab imperiel, Hawaiian pork chop, Gulfstream shrimp and California braised lamb. Salads, vegetables and desserts have all been chosen to compliment the theme, from New York cheese pie to an Old Glory molded salad.

Terrace Room hours are from 5 to 6:45 p.m. Monday through Thursday and from 4:45 to 7 p.m. Friday and Saturday.

The heat's off

The University's Executive Energy Conservation Committee has announced that as of Sunday, April 25, heat systems in University buildings began to be turned off. Comfort air conditioning will be started beginning Monday, May 10. The Committee notes that since it takes approximately one week for 10 days for each operation to be completed campus-wide, it is not leasible to turn these systems on and off to accommodate daily weather changes. Exceptions wil be made to this schedule, with committee approval, primarily in cases involving research animals or equipment.

Whitmore lectures

Noted organic chemist Barry M. Trost, of the University of Wisconsin, will offer the first annual Frank C. Whitmore Lectures Monday-Thursday, May 3-6.

The new lecture series honors the late Dean of Penn State's School of Chemistry and Physics, a forerunner of the College of Science. An internationally known organic chemist, Dean Whitmore was a member of the National Academy of Sciences and a president of the American Chemical Society.

The series of luor lectures, sponsored by the Department of Chemistry, is open to the public.

All lectures will be presented in Room 333 Whiimore Dr. Trost's topics and schedule are as follows: "New Approaches to the Design of Molecular Architecture I. The Framework," May 3, 8 p.m.; "Molecular Architecture II. The Tools," May 4, 12:45 p.m.; "Molecular Architecture III. The Finishings," May 5, 12 45 p.m.; and "Molecular Architecture IV. The Blueprint," May 6, 4 p.m.

Dotterer lecture

Dr. Hans-Georg Gadamer, emeritus professor of philosophy at the University of Heidelberg, will deliver the seventh annual Dotterer Lecture sponsored by the Department of Philosophy at 8 p.m., Wednesday, May 5, in the HUB assembly room. His topic will be 'Hermeneutics. Between the Critical Rationalism of Popper and the Critique ol the Ideologies of Habermas." The lecture is open to the public. Dr. Gadamer, who studied under the famous German philosopher Martin Heidegger at Freiburg, specializes in philosophical hermeneutics on problems of interpretation of lexts, data and action.

Preceding the lecture, the Ray H. Dotterer Scholarship Award will be presented to Jean Kazez, as the most promising philosophy major in the junior year. Her father, Dr. Emil Kazez, is a professor of physics at Penn State. The lecture and scholarship honor the late Dr. Ray H. Dotterer, who for many years was the head of the University's Department of Philosophy.

Review your deductions

In a recent article which suggested that employees review the payroll deduction for hospital coverage, one of the deductions was inadvertently omitted. The following are all of the possible deductions for this coverage.

Insured Persons	Monthly	Bi-Weekly
Employee only	None	None
Employee, child, children	$1.75	$0.80
Employee, spouse	3.60	1.66
Employee, spouse, child or children	5.00	2.30

Employees wishing to make changes in their health insurance coverage should call, write or visil Employee Benefits, Room 133 Willard Bldg., 865-1473.

Fall preregistration

Students who are not planning to enroll at the University for the summer term and want to preregister for fall term, 1976, may file completed preregistration forms with the Records Office, Room 112 Shields Bldg., between May 3 and May 28. Preregistration forms may also be filed et summer term, 1976, registration or at Room 112 Shields Bldg. during the first 21 days oi summer term, June 8 through June 29.

Senate to meet

(Continued from page one)

that candidates satisfactorily completing multiple major programs under the policy shall receive one diploma for the original major. The final academic record will indicate completion of the requirements for additional majors.

The Senate also will receive an informational report from the Committee on Planning and Development on trends and current status information on the University's budget. The Subcommittee on Academic Planning will report on long-range enrollment prospects, while the Subcommittee on the Physical Plant Planning will present three reports on traffic control plans, housing at Commonwealth Campuses, and the status of construction projects.

In other business, the Senate will:

—Receive the annual report of the Division of Undergraduate Studies Advisory Committee.

—Hear the annual report on Faculty Rights and Responsibilities.

—Receive an interim report from the Task Force on Retention and Transfer of Students in Baccalaureate Program Majors.

—Hear a forensic report on program minors.

Artists Series

(Continued from page one)

cock, Wednesday series, Truffaut.

Non-student season ticket prices are $18, $22.50 or $27 for both the music and theatre-dance series, a savings of 25 percent. Combined tickets for these two series are also available at $33.50, $42 or $50. These programs will be presented in University Auditorium.

The Fine Arts Series will be held in Schwab, and tickets are $9 or $13.50. All seats for the three series are reserved. Film tickets are available at $6 for one series or $10 for both.

Staff vacancies

Staff vacancies in this publication generally require at least a baccalaureate degree or equivalent as a minimum educational qualification. Staff vacancies requiring less than the baccalaureate degree as well as those announced in the INTERCOM may be found in the Penn State REPORTER. All University employees who are interested in promotion may apply by calling the Employment Office, 865-1357 (eelworix Line 475-1367). Applications to these staff vacancies will be received until 5 p.m., **May 4, 1976. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

SUPERVISOR OF STOREROOM OPERATIONS, OFFICE OF PHYSICAL PLANT — University Park

Responsible to the Manager, Business Operations, for establishing, implementing, maintaining and evaluating procedures and methods for the procurement and distribution of a wide variety of building and maintenance materials and tools used by the Office of Physical Plant. Responsible for the overall efficient and effective operation of the storeroom Bachelor's degree in business administration, business logistics, industrial engineering or related field or equivalent, plus three to four years of directly related work experience in materials and inventory management is required.

MANAGER OF MEDICAL RECORDS — Hershey

Responsible to Assistant Hospital Director to the proper and efficient management of the administrative and professional functions of the Medical Records Department. Bachelor's degree or equivalent with specialized training in medical records and four to five years of directly related experience. Preferably a Registered Records Administrator.

SENIOR RESEARCH AIDE, COLLEGE OF AGRICULTURE — University Park

Supervise technical-service and part-time employees in seedbed preparation, fertilization, spraying, seeding, and care of experimental animals. Design and assist in the experimental work to determine the effect of management on the performance of forage and pasture species and livestock. Collect and statistically analyze data. Operate seeding, fertilizing and spraying equipment; use them. Collect and test soil and forage samples. Bachelor's degree or its equivalent in animal science, agronomy, with minor or strong interest in the related area, plus one to two years of experience, or in associate degree in animal science or agronomy with two to four years of related experience.

Funding sources

For lurther information, call 865-1372

(223-1) The National Science Foundation has announced a program of **Scientific and Technical Manpower Forecasting Activities** for support of studies relating to forecasts of requirements and supply of scientific and technicol manpowe. The deadline for FY 1976 proposals is May 10. Proposals must be limited to one of three categories: Improvement in projection methodology, development of information to fill currently existing data gaps, or pilot efforts of experimental forecasting manpower demand and supply. (Ref. Program Announcement, Ibid, NSF 76-12)

(223-2) National Endowment for the Humanities Foundation proposals for **Anthropological research** have fulur deadlines of Sept. 1, 1976, and Jan. 1 and Apr. 1, 1977. Programs in anthropological research include cultural and social anthropology, archaeology and physical anthropology. The program contact at NSF is Dr. Narcia Gonzalez (202-632-4209). (Ref. NSF 6uli., April 1976)

(223-3) The National Endowment for the Arts (NEA) announces a March 15, 1976, deadline for grant applications for **NEA Fellowship Grants for Composers and Librarilsts** under the NEA Music Program. These categories of support are funded as ara collaborative projects. Other NEA programs mentioned are **Jazz/Folk/ Ethnic Music, Visual Arts and Arts in Education.** Any including design of costumes, sets and posters (Jan. 1, 1977, deadline); and **Programming** in the Arts, including productions, tours and dissemination (Sept 15 deadline). Guidelines for these programs and the NEA Public Programs are available. (Ref. 41FR1494-51, 4/8/76)

(223-4) The Office of Education has announced deadlines for **Bilingual Education** programs' **basic programs — continuation** (May 10) — **initial awards** (May 24); **support services** (May 27) and **training programs** (June 1). Grant amounts are proposed rapsalitions for those programs are **teachar trainer fellowships, coordination of bilingual programs and materials development projects.** (Ref. 41FR14916-18, 14685-86; 4/8/76 (CFDA 13.403)

(223-5) The Office of Education has announced a May 7 deadline for resubmitted applications under its **Emergency School Aid** program including basic grants, pilot projects and bilingual projects. (Ref. 41FR15055-56, 4/9/76) (CFOA 13.525/526/528/529)

(223-6) The Department of Labor has announced proposed FY 1976 regulations for its **Comprehensiev Manpower Program and Oranta to Aid Areas of High Unemployment,** which is to be **implemented** through a system of hazard, state and local programs. The program includes: training; education; manpower services; research, training and evaluation of programs; and the establishment of a Job Corps. Comments are requested by May 10. Regulations will become effective July 1. (Ref. 41FR15161-228) (P.L. 93-203)

(223-7) Fulbright-Haya lecturing and research awards in Australia and New Zealand — July 1 for other countries. Special opportunities for study and research in Finland — students apply between May 1 and Sept 15.

(224-4) The National Institutes of Health announced seven more **cancer research emphasis grant (CREG) opportunities** (deadline Oct. 1), nutrition research grant (July 1), and one additional research award opportunity (July 1). (Ref. NIH Guido, April 1, 1976)

News briefs

Geography talks May 13, 14

Dr. Donald W. Meinig, Maxwell Professor of Geography at Syracuse University and a specialist in the historic geography of American culture, will present two public talks at the University on Thursday and Friday, May 13 and 14. He will dis-

Dr. Meinig

cuss "Symbolic Landscapes: Some Idealizations of American Community" at 4 p.m. May 13 in Room 112 Kern Graduate Bldg. He will also present an informal, public seminar at 4 p.m. May 14 in Room 301 Mineral Industries on "Contemporary Work on the American Culture."

Dr. Meinig has focused his studies on the western United States, although he is presently writing a book on the geography of culture throughout America. A Ph.D. from the University of Washington, Seattle, he is the author of several books, including "Imperial Texas," "Southwest: Three Peoples in Cultural Change, 1670-1970" and "The Great Columbia Plain." His paper, "The Mormon Culture Region," has been extremely influential, and he has been the recipient of numerous national awards.

Littell to speak on Holocaust

Dr. Franklin H. Littell, professor and new chairman of the Department of Religion at Temple University, will speak at 8 p.m. Wednesday, May 12, in the HUB assembly room on "Christianity and the Holocaust in the Age of Genocide."

Dr. Littell is the author of 14 books and more than 200 articles dealing with church history, religious education and modern Jewish history. His latest books are "The German Church Struggle and the Holocaust," co-edited with Hubert G. Locke, and "The Crucifixion of the Jews." A former president of Iowa Wesleyan College, Dr. Littell is president of Christians Concerned for Israel. His speech is sponsored by the Institute for the Arts and Humanistic Studies, in cooperation with the Episcopal Campus Ministry and the Jewish Community Council of Bellefonte-State College.

Ag to hold open house

The development of agricultural technology during the past 200 years is the theme of an Open House to be held from 8:30 a.m. to 2 p.m. Saturday, May 8, as part of the College of Agriculture's Bicentennial observance.

University faculty and staff are invited to take part in numerous tours of College facilities and observe demonstrations depicting the hardships our early settlers endured in producing food for survival. At headquarters in the lobby of the Agricultural Administration Bldg., visitors will receive a map showing the location of the various exhibits and demonstrations.

Some highlights of the Open House activities are:

—Inspection of early animal nutrition studies conducted by using the Armsby Calorimeter.

—Demonstration of a horse-powered thresher and hay baler near Jeffrey Field at 1:30 and 4 p.m. by Dr. Robert Cowan, professor of animal nutrition.

—Tour of the Mushroom Research Center.

—Exhibit of laboratory items belonging to Dr. Evan Pugh, first president of Penn State.

Media opportunities discussion

"Minorities and the Mass Media: A Review of Career Opportunities" is the subject of an informal discussion to be held at the Paul Robeson Cultural Center at 8 p.m. Tuesday, May 11. Lionel Monagas, director of the External Equal Opportunity Program of the Federal Communications Commission, will be the guest speaker. Among the topics open for discussion will be stereotypes of women and minorities, training programs for minorities in television and radio, career possibilities in the media, and the effects of affirmative action on mass media. Students, instructors, community organizations and interested individuals are invited to take part in the discussion, which is open to the public.

The event is being held as part of a Career Workshop conducted by the Minority Training Program at WPSX-TV. The workshop also includes a television production on the same subject, which will feature Mr. Monagas and minority grant employees from several stations of the Pennsylvania Public Television Network.

Food symposium text ready

The University has published and made available for purchase the proceedings of the "University-Wide Symposium on Food and Our Future" held last fall. The symposium was designed to provide a broad overview of the current situation in foods, energy and the environment. Speakers represented every College of the University and some outside agencies, and texts of the various speeches are included in the 281-page volume. Inquiries should be directed to Continuing Education Production and Stores, Keller Bldg., or 865-0449.

"Collegian" judged best

The "Daily Collegian" was judged the best student newspaper in the Northeast by Sigma Delta Chi, the Society of Professional Journalists, at its regional convention in Rochester, N.Y., last weekend.

Skywatch scheduled May 7

The last Skywatch of the 1975-76 series, presented by the Department of Astronomy and the Astronomy Club, will be held from 8:30 to 10:30 p.m. Friday, May 7, at the observatory on the roof of Davey Laboratory. The show goes on only if it is possible to see most of the brighter stars with the unaided eye. If the sky is cloudy, the program will be held Saturday, May 8.

Retired staff to meet

The Penn State Retired Staff Club will hold its 178th meeting at 6:30 p.m. on Thursday, May 13, in the St. Andrews Episcopal Church Parish Life Center. A roast beef dinner will be served at a cost of $3 per person. Reservations should be made promptly since seating is limited. After dinner, Dr. and Mrs. Wayne Webb will give an illustrated talk describing their motoring trip through Mexico.

Faculty convocation May 11

President John W. Oswald and Mrs. Sally Smalt, chairman of the University Faculty Senate, will address the faculty of the University at the third annual University-wide Faculty Convocation to be held at 4 p.m. Tuesday, May 11.

University Park faculty members can attend the program at University Auditorium, as schedules permit. To accommodate faculty at other locations, a simultaneous broadcast will be made to each of 21 other locations where faculty can gather in an area convenient to them.

Since construction of University Auditorium, President Oswald has held an annual convocation for the faculty.

Higher ed samplings

Penn State is not alone among universities feeling the state budgetary pinch, according to the latest newsletter of the National Association of State Universities and Land Grant Colleges.

Rutgers is among those hardest hit. Gov. James T. Byrne requested $16 million less for the University in his 1977 budget. He proposed lowering the state's contribution to Rutgers by $60 million, $40 million less than the State Board of Higher Education had recommended. The University's ag experiment station alone was faced with a $3 million cut, almost half its total budget.

Rutgers' officials estimate that without relief they will have to boost tuition fees by 38 percent, from $725 to $1,004, placing New Jersey among the five most expensive state schools in the country.

Little joy for SUNY

There was also little joy on the campuses of the 34 state-operated institutions comprising the State University of New York as they contemplated the $21.5 million budget cut called for by Gov. Hugh Carey. The new cutbacks followed a $10 million expenditure ceiling imposed on the University by the previous year's budget.

The reductions have already forced an enrollment decrease of some 5,000 students, the elimination of 1,000 faculty and staff positions, and a 15 percent pay cut for 2,000 university employees who were forced to shift from 12- to 10-month contracts. SUNY's trustees have voted a tuition increase for this fall, 17 percent for freshmen and sophomores, 12 percent for juniors and seniors.

In Michigan, the proposed 1976-77 general fund operation appropriation for Wayne State was held to a two percent increase. That added up to $1.35 million, instead of the $16.7 million increase the University's Board of Governors had requested. The budget for Michigan State called for an increase of only $2 million over last year, and President Clifton Wharton said this would not only mean enrollment ceilings but could also lead to further tuition increases (a 15 percent tuition rise has already been passed along to students and their families).

Georgia cut its appropriation for the University of Georgia by $6.2 million, and out in Washington, Washington State and the University of Washington, under pressure to raise additional funds, are contemplating tuition hikes of 24 percent.

Faculty asked to submit activities data

Members of the faculty who wish their publications and professional activities listed in the University's annual bibliographies should send this information to their department heads, research deans or intercollege research unit directors.

Detailed instructions for the submission of these listings are given in a May 3 memo from Dr. R. G. Cunningham, vice president for research and graduate studies, and copies of this memo are available from department heads or research deans.

Commonwealth Campus faculty should send their listings to the respective department head at University Park, with an informal copy to their campus director and Commonwealth Campus dean.

Contributions should be in the department offices in sufficient time to reach the Office of the Vice President for Research and Graduate Studies by July 31.

The bibliography is printed in two publications, "Research Publications and Professional Activities" and "University Publications and Reports to Agencies." To be included are research papers and articles, books reviewed and printed by established publishers, substantive and/or final reports sent to state and federal agencies, informational materials (articles and reports printed in non-standard journals), and novels, short stories, musical compositions, exhibits of fine arts, inventions, patents and any other activity that meets recognized standards of excellence in its field.

New procedure to compute grade point deficiencies

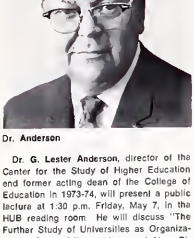
The University has adopted a new procedure for computing grade point deficiencies for undergraduate students when "no grades" or "deferred grades" are involved.

Under the procedure, which goes into effect in the summer term, 1976, the grade point deficiency is computed on the Grade Report, ignoring NG's and DF's.

In the past, if a student received a "deferred grade" or "no grade," no grade point deficiency was computed and no drop action or warning took place.

The new plan provides for a "Warning" or "Dropped" to be printed on the Grade Report along with the number of deficiencies. Term and cumulative averages will not be reflected on the Grade Report or the summary section of the academic records.

If drop action is warranted, the academic record will be annotated and the student would be notified of the drop action. If, on the other hand, drop action is not warranted, the grade report would be changed to "Warning" or no notation if the deficiency is less than six.



Other scholastic actions such as the Dean's List and class rankings will not be taken so long as a deferred grade or no-grade exists.

The Administrative Council on Undergraduate Instruction developed the new procedure with concurrence of the Senate Committee on Undergraduate Instruction.

Under present Senate rules, "a grade-point deficiency exists when total grade points are less than total credits times two . . . No grade-point deficiency should exist at the time of graduation."

PENN STATE COLLECTION

Faculty notes

Dr. Anderson

Dr. G. Lester Anderson, director of the Center for the Study of Higher Education and former acting dean of the College of Education in 1973-74, will present a public lecture at 1:30 p.m. Friday, May 7, in the HUB reading room. He will discuss "The Further Study of Universities as Organizations: Some Offbeat Ideas and New Dimensions." At 7 p.m. Dr. Anderson, who plans to retire July 1, will be honored at a dinner at the Nittany Lion Inn.

A nationally-known educator, Dr. Anderson joined the University faculty in 1969 after an 18-year career at SUNY, Buffalo, where he served as dean of administration, vice president for education affairs and distinguished service professor of higher education. Earlier, Dr. Anderson was dean of teacher education at the now City University of New York and professor of education at the University of Minnesota. A graduate of Nebraska State College, he received his M.A. from Colorado State College of Education and his Ph.D. degree in educational psychology from the University of Minnesota.

Dr. John M. Samuels, assistant professor of industrial engineering, has been selected a recipient of the Dow Outstanding Young Faculty Award of the Middle Atlantic Section of the American Society for Engineering Education (ASEE) for 1976.

Dr. Samuels, who joined the Penn State faculty as an instructor in 1968, received his bachelor's degree in industrial engineering from General Motors Institute, Flint, Mich., and his M.S. and Ph.D. degrees in industrial engineering from the University. He has been actively involved with local industry in developing innovative programs which allow undergraduate industrial engineers to do student term projects in industry, and he continues to work with state and local agencies on the problems related to the design of work centers for the handicapped.

Geoffrey L. Wilson, associate professor of engineering research at the Applied Research Laboratory, has been elected a Fellow of the Audio Engineering Society in recognition of his contributions in the field of acoustical measurements and his furthering of audio education. Born in London, Dr. Wilson received his B.A., M.S., and B.Sc degrees from Oxford University and his Ph.D. from the University of Technology in Loughborough. He joined ARL in 1959.

Dr. John C. Griffiths, professor of petrography, recently presented two talks, "Modeling the Petrology of Detrital Sediments" and "Exploration for National Resources" to the Department of Geology at the College of Charleston, S.C.

Dr. Ingeborg Chaly, assistant professor of speech communication (Behrend College), is the author of an article, "The Rhetoric of Obstruction: Parliamentary Tactics of the Irish Nationalists: 1877-1886," to be published in the June issue of the "Journal of the Speech Communication Association of Pennsylvania."

Dr. Rustum Roy, director of the Materials Research Laboratory and professor of the solid state, delivered the Fairchild Lecture at Lehigh University, April 21. The Sherman Fairchild lecture series in Solid State Studies is supported by an endowment from the founder of Fairchild Industries and brings to Lehigh leading scientists from industry and universities to describe advances in solid state science. Prof. Roy spoke on "Non-Crystalline Solids — the New Solid State Hosts."

Dr. Robert Lima, professor of Spanish and comparative literature, delivered an invited lecture on contemporary women poets of Spanish America at the International Conference on Women Writers of the Americas, held recently at San Jose State University. His talk discussed the precursory role of four poets in focusing attention on woman's sexuality and the inequity of a double standard which required its repression while permitting male sexual freedom.

Dr. Deane K. Smith, professor of mineralogy, has been elected to two national positions. He is serving as 1976-78 secretary of the American Crystallographic Association, and as 1976-77 vice chairman of the Joint Committee on Powder Diffraction Standards.

John D. Vairo, Delaware County Campus director and associate professor of journalism, was one of 50 persons in the State to receive the Pennsylvania School Press Association's Golden Keystone Award for outstanding contributions to the journalistic achievements of young Pennsylvanians. The award is the second presented to Mr. Vairo in two years.

Mrs. McWilliams

Dr. Fraser

Dr. Alistair B. Fraser, associate professor of meteorology, and **Emilie T. McWilliams,** Earth and Mineral Sciences librarian, have received the 1976 Matthew J. and Anna C. Wilson Outstanding Teaching Awards of the College of Earth and Mineral Sciences. This is the eighth year that the awards, each consisting of $1,000 and a plaque, have been presented. They are made possible through a trust fund provided by the will of the late Matthew J. Wilson, a 1918 Penn State mining engineering graduate, who died in 1963. The recipients of the teaching awards are selected by the dean of the College from nominations and petitions submitted by students.

Dr. Fraser has a B.Sc. in mathematics and physics from the University of British Columbia and a Ph.D. in meteorology from Imperial College, University of London. He came to Penn State in 1972 after four years on the faculty of the University of Washington. He has published research papers on the physics and dynamics of clouds, and, more recently, on meteorological optics. An avid photographer, he has amassed a large collection of photographs of meteorological phenomena.

Mrs. McWilliams received her B.S. from Carnegie-Mellon University in 1948 and then worked as a chemist at American Viscose Corp., the U.S. Quartermaster Depot, Philadelphia, and with Consolidation Coal Co. In 1957-58, she did her first library work, for an American Petroleum Institute Project at Carnegie-Mellon. She entered the University of Pittsburgh to earn her M.L.S. For the next two years she served as librarian of the science and technology department of Carnegie Library of Pittsburgh, coming to Penn State in 1966.

Dr. C. Dale Therrien, associate professor of biology, will present three research papers at the annual meeting of the Botanical Society of America in New Orleans, La., May 30-June 4. His co-authors include Dr. John J. Yemma, a Penn State alumnus, Barbara Paladino, 6th term biology major, Linda J. Bradley, former PSU graduate student, and Dr. Neil R. Collins, professor and chairman of the Department of Botany, Berkeley.

An endowed professorship in the physical sciences has been created at Cornell University in honor of **David C. Duncan,** professor emeritus of physics at Penn State. It is a gift from Floyd R. Newman, a 1912 graduate of Cornell, and is the fourth named professorship he has established. Dr. Duncan's wife, Mildred, is a cousin of Mr. Newman's. Dr. Duncan received his B.A., M.S. and Ph.D. from the University of Michigan and taught at Purdue from 1911 to 1917. He came to Penn State in 1918, retiring in 1953. After retirement, he was a part-time employee of the U.S. Intelligence Service for 13 years, and he is still an active member of Penn State's Retired Staff Club.

Dr. George W. Brindley, professor emeritus of mineral sciences, was invited to attend the Centenary Celebration of the Mineralogical Society in London, England recently, where he gave a lecture to the Society's Clay Minerals Group on "The Present Status and Future Trends of Clay Mineralogy." He was the first chairman of the Clay Minerals Group, which is celebrating its 30th birthday.

Three faculty members of the Division of Community Development are co-authors of "Three Models of Juvenile Justice," an article appearing in the spring issue of the "Criminal Law Bulletin." They are **Daniel Katkin,** associate professor of law; **John Kramer,** assistant professor of criminal justice; and **Drew Hyman,** assistant professor of community development. The study suggests that three irreconcilable action models coexist uneasily within the juvenile justice system and that their interaction causes conflicts and inequities resulting in further fragmentation of the system of justice for the young. Further documentation and a more detailed account is provided in the authors' book, "Delinquency and the Juvenile Justice System," published by Duxbury Press.

She who travels the seminar circuit must reckon with Midstate

By Barbara Hale, Science Writer, College of Science

Whatever you do, don't ask Jean Brenchley how to fly to Connecticut from here because she'll tell you.

"I had to give a seminar there," she says. "If took me seven airports because you can't get east from here and you can't get north. The only way you can get is west and south. To get to Connecticut turns out to be almost impossible."

Dr. Brenchley obviously thinks coming back via the silver bird of Black Moshannon is just as much fun. "I told the travel agency they'd have to carry me onto that Philipsburg flight on a stretcher. No way would I go on that flight again," she fumes.

What has turned a calm, no nonsense, young microbiologist into an angry militant who threatens to boycott our frequently foggy but still serenely sylvan aerodrome? The seminar circuit, that clamor for a scientist's physical presence which the invisible college puts up when it suddenly decides that your research is "hot."

Dr. Brenchley got onto the circuit about three years ago, when her work on the bacterium, Klebsiella, suddenly came into vogue. The story is a classic example of how basic science gets down to being applied.

Dr. Brenchley recalls that the work was begun when she was a postdoctoral student in Boris Magsanik's group at MIT. The group discovered that Klebsiella possesses an enzyme, glutamine synthetase, that has both a biosynthetic function and a regulatory function.

"This novel form of regulation was unknown before," she explains, "and it meant the cell could very economically control several metabolic pathways with just one enzyme that was also very centrally tuned into other cellular functions."

On its own, the finding was important enough to excite Klebsiella fans among the basic science community but probably wouldn't have jarred anyone else, except for one fact — one of the pathways the enzyme controls is nitrogen assimilation.

Nitrogen forms about 15 to 18 percent of most proteins, the basic building blocks of every living thing. Neither animals nor most plants are able to collect the nitrogen they need from the atmosphere but must, as Evan Pugh, first president of the University, demonstrated, rely on other sources. We rely on the plants and animals we eat. The plants rely on soil nitrates commonly called fertilizer or plant food. A few clever bacteria and algae have evolved the knack of using or "fixing" nitrogen directly from the air but, so far, nothing else has.

However, Dr. Brenchley says, with the new techniques that became available in genetic engineering, many researchers became interested in trying to take nitrogen fixing genes from those clever bacteria and algae to put them in other organisms, for example, wheat, corn, and rice. If they could do that, then those crops wouldn't need nitrogen fertilizers.

Dr. Brenchley

But in order to make the gene transplants a success, Dr. Brenchley explains, researchers have to "understand not only the segment of DNA responsible for making the nitrogen fixation enzymes but also how the process is regulated."

As yet, nobody has successfully transplanted a nitrogen fixing gene into a plant but the day will.

Meanwhile, Dr. Brenchley travels the seminar circuit spreading the word on regulation in Klebsiella while conducting a related project on Salmonella. In that project, she has learned that Salmonella controls the nitrogen assimilation process in a very different way from Klebsiella, and the alternate mechanism — when and if she can delineate it — could be just as useful to those who want to transplant nitrogen fixing genes into food crops.

Dr. Brenchley gets many more requests for seminars than she can meet, but she has a realist about that and about the phenomena of being "hot."

"I don't think I'm that 'hot,' per se," she says. "A lot of this could be a fad, partly because the control itself is so novel and because the experiments leading to it and ideas were very complicated. It's not the kind of thing that's easy for people to read one publication and understand. So I think that it's just natural for awhile

(Continued on page four)

University Park Calendar

May 6—16

Items to be included in this calendar should be sent to the Calender Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special events

Thursday, May 6

"Travel Fair," 9 a.m.-5 p.m., Kern.

Commons Videotape, noon, Kern lobby.

Sports: Women's tennis, vs. Princeton, 2 p.m. Women's lacrosse, vs. East Stroudsburg, 3 p.m.

Drug Awareness Days program, 7:30 p.m., HUB assembly room. "The Development of Drug Usage and Legality in the U.S.," with Alan Ellis and speakers from the Governor's Council and PSORML.

University Theatre, "Unruly Children: A Pennsylvania Bicentennial Vaudeville," 8 p.m., Pavilion Theatre.

Penn State Thespians, "South Pacific," 8:30 p.m., Schwab.

Friday, May 7

"Travel Fair," 9 a.m.-5 p.m., Kern.

Sports: Men's lacrosse, vs. Pennsylvania, 8 p.m.

University Theatre, "Unruly Children: A Pennsylvania Bicentennial Vaudeville," 8 p.m., Pavilion Theatre.

Penn State Thespians, "South Pacific," 8:30 p.m., Schwab.

Claremont Woodwind Quintet, 8:30 p.m., Music Bldg. recital hall.

Operation Research, 8:30-10:30 p.m., Davey Lab Observatory.

Saturday, May 8

College of Agriculture Open House, celebrating the development of agricultural technology during the past 200 years, 8:30 a.m.-2 p.m., headquarters, lobby of Ag. Adm. Bldg.

Sports: Women's tennis, vs. Ohio State, 9:30 a.m. Golf, Lady Lion Spring Invitational. Women's lacrosse, vs. Cortland, 1 p.m.

University Theatre, "Unruly Children: A Pennsylvania Bicentennial Vaudeville," 8 p.m., Pavilion Theatre.

Penn State Singers' Music of American Composers, 8:30 p.m., Music Bldg. recital hall.

Howard Cosell, 8 p.m., Recreation Bldg Sponsored by Collegiuy.

Penn State Thesplans, "South Pacific," 8:30 p.m., Schwab.

Sunday, May 9

Chapel Service, 11 a.m., Eisenhower Chapel. Rev. Charles L. Coleman, program director, religious affairs.

Black Christian Fellowship worship service, 11:15 a.m., Eisenhower Chapel. "Today Is Women's Day," Mrs. Carrie Lucious, Pittsburgh; special women's day choir.

Shavers Creek Nature Center, Early Morning Bird Walk, 7 a.m.; Spring Wildflower and Ecology Walk, 3 p.m.; Mineral Industries Bldg., Stone Valley.

Penn State Glee Club Mother's Day Concert, 3:30 p.m., Schwab.

"Baal-Yamen," produced by Circumstance Theatre, 8 p.m., Room 101 Kern.

Monday, May 10

"Fashion Today," fashion show, 12 noon; Virginia Palazzari, man-environmentel relations, on "Fashion Design and Style through the Ages," 12:45 p.m., Room 101 Kern.

Concert White Band pops concert, 6:30 p.m., Herman G. Fisher Plaza.

Valerie Ferrone, violin, 8:30 p.m., Music Bldg. recital hall.

Tuesday, May 11

University-wide Faculty Convocation, with addresses by President Oswald and Senate Chairman Sally Small, 4 p.m., University Auditorium.

"Minorities and the Mass Media: A Review of Career Opportunities," 8 p.m., Paul Robason Cultural Center. Informal discussion sponsored by WPSX-TV with guest speaker Lional Monagas, of the FCC.

Wednesday, May 12

Sports: Men's baseball, vs. Indiana, Pa., 1:30 p.m.

University Theatre, "Jazz Dance Theatre in Concert," 8 p.m., Playhouse Theatre.

Composers' Concert, 8:30 p.m., Music Bldg. recital hall.

Thursday, May 13

Commons Videotape, 12 noon, Kern lobby.

Sports: Women's softball, vs. Ursinus, 3 p.m. Women's lacrosse, vs. Ursinus, 3 p.m.

FSHA 410 dinner, a Tribute to the Cuisine of Don Quixote, 5:30 p.m., Maple Room. Reservations: 865-7441.

University Theatre, "Jazz Dance Theatre in Concert," 8 p.m., Pleyhouse Theatre.

Friday, May 14

Sports: Men's track, Penn State Open Invitational.

Folk and Square Dance Roundup, 7:30 p.m., White.

University Theatre, "Jazz Dance Theatre in Concert," 8 p.m., Playhouse Theatre. Collette Vonada, organ, 8:30 p.m., Music Bldg. recital hall.

Saturday, May 15

University Theatre, "Jazz Dance Theatre in Concert," 8 p.m., Pleyhouse Theatre.

PSU Symphony Orchestra, 8:30 p.m., University Auditorium.

Sunday, May 16

Chapel Service, 11 a.m., Music Bldg. recital hall. The Chapel Choir's Spring Concert.

Black Christian Fellowship worship service, 11:15 a.m., Eisenhower Chapel. "Today Is Men's Day," Rev. Leon B. Hall, Easton, Md.; special men's day choir.

Shavers Creek Nature Center, Spring Wild Flower and Ecology Walk, 3 p.m.; Mineral Industries Bldg., Stone Valley.

Penn State Symphonic Wind Ensemble Pops Concert, 3:30 p.m., Arts Courtyard.

Seminars

Thursday, May 6

Physics, 12:45 p.m., Room 333 Whitmore. Earl Mutterties, Cornell University, on "New Organometallic Chemistry."

Air Pollution Control, 2:20 p.m., Room 145 Fenske. Robert A. O'Dell, graduate student, on "Mechanisms and the Rate of Sulfur Dioxide Uptake by Vegetation."

Operations Research, 3:30 p.m., Room 160 Willard. Dr. Samual I. Gass, president, Operations Research Society of America, on "Quantitative Models — Their Acceptance and Utility."

Physics, 3:50 p.m., Room 119 Osmond. Dr. Thomas Appelquist, Yale University, on "Recent Developments in Weak and Electromagnetic Interactions."

Anthropology and Population Issues Research Office, 3:30 p.m., Room 107 Social Science. Dr. Alice B. Kasakoff, anthropology, University of South Carolina, on "Spatial Location and Social Organization: An Analysis of Tikopian Patterns."

Agronomy, 4 p.m., Room 111 Tyson. S. Selty on "Inheritance of Leaf Area in Corn."

Mathematics, 4 p.m., Room 103 McAllister. Joseph Schoenfield, Duke University, on "Some Results in Logic."

ARL, 3 p.m., Eric A. Walker Conference Room. Dr. Vijay K. Singhal, MIT, on "Acoustics of Ducts with Flow and Its Relation to Acoustically Induced Valve-Pipe Instabilities."

Astronomy, 4 p.m., Room 445 Davey. Dr. Fred Sanner, Kitt Peak National Observatory, on "Mass Loss ot Red Giants and Supergiants."

Meteorology, 4 p.m., Room 26 Mineral Sciences. Carl J. Oliver, National Environmental Satellite Service, Washington, D.C., on "A New Look at Hurricane Development and Quantitative Precipitation Forecasting from Satellites."

Monday, May 10

New Communities, Architecture, 2 p.m., Room 322 Sackett. Dr. Daniel Hillel, soil physics, Hebrew University of Jerusalem, on "Water Supply Systems for an Arid City."

Genetics, 3:55 p.m., Room 111 Tyson. Dennis Fitchen on "Possible Mechanisms Involved in Chromosome Inactivation."

Astronomy, 4 p.m., Room 445 Davey. Alan T. Koski, University of California, Santa Cruz, on "Spectrophotometry of Seyfert Galaxies."

Biochemistry and Biophysics, 4 p.m., Room 101 Althouse. Dr. Per P. Schollander, physiology, Scripps Institute of Oceanography, on "The State ot Water in Osmolic Pressure."

Organic Chemistry, 8 p.m., Room 333 Whitmore. Harold Gerdes on "Elementary Pattern Recognition in Organic Chemistry."

Tuesday, May 11

Analytical Chemistry,12:45 p.m., Room 445 Davey. Mrs. V. A. Spendel on "Electrochemical Studies in DMF-Water Mixtures."

Solid State Physics, 1 p.m., Room 339 Davey. Dr. W. B. White, MRL, on "Raman Gathering from Ordered and Disordered Crystals."

Solid Waste, 2:20 p.m., Room 140 Fenske. Louis A. Ravina, consultant, Thomas M. Riddick & Assoc., N.Y., on "How PL 92-500 Affects Wastewater Design and Solids Handling Systems."

Engineering Mechanics, 4 p.m., Room 232 Hammond. Ganta Reddy on "Computer Automated Minimum Weight Design of Structures."

Biochemistry and Biophysics, 4 p.m., Room 101 Althouse. Richard E. Dickerson, California Institute of Technology, on "The Cytochrome Fold and the Origin of Bacterial Energy Metabolism."

Inter-Science, 4 p.m., Room 333 Whitmore. Herbert Tabor, Biochemistry, Pharmocology, Metabolism and Digestive Division, NIH.

Inorganic Chemistry, 4 p.m., Room 333 Whitmore. Ron Epstein.

Wednesday, May 12

Fuel Science, 4 p.m., Room 301 Mineral Industries. Dr. Alan Davis, geology, on "Occurrence of Pyrite in Coals."

Thursday, May 13

Meteorology, 4 p.m., Room 26 Mineral Sciences. Fred House, Drexel University, on "Preliminary Results from the Limb Radiance Experiment on Nimbus 6."

Chemistry, 12:45 p.m., Room 333 Whitmore. Mary Good, University of New Orleans, on "Mossbauer and ESCA Studies of Heterogeneous Ruthenium Catalyst Systems."

History, 1:15 p.m., Room 124 Sparks, Dr. George P. Bonis on "The Military Communications of Alexander the Great."

Bioengineering, 1:30 p.m., Room 121 Noll. Dr. W. G. Kubicek, physical medicine and rehabilitation, University of Minnesota Medical School, on "Impedance Cardiography."

Air Pollution Control, 2:20 p.m., Room 145 Fenske. Ching-Ming Sheih, Argonne National Lab., on "Particulate Coagulation and Transport."

Physics, 3:50 p.m., Room 119 Osmond. Dr. H. Ehrenreich, applied physics and engineering, Harvard University, on "Theory of Alloys."

Mathematics, 4 p.m., Room 103 McAllister. Nathan Jacobson, Yale University, on "Some Algebraic Results."

Agronomy, 4 p.m., Room 111 Tyson. P. H. Williams on "Uptake of Cd, Zn, and Cu by Corn and Sorghum Herbage Grown on Sewage-Sludge Fertilizer, and Their Accumulation in Meadow Vole Tissues."

Friday, May 14

Geography, 4 p.m., Room 301 Mineral Industries. Dr. Donald W. Meinig, Maxwell Professor of Geography, Syracuse University, on "Contemporary Work on the American Culture."

Lectures

Thursday, May 6

Frank C. Whitmore Lecture, Barry M. Trost, University of Wisconsin, 4 p.m., Room 333 Whitmore, on "Molecular Architecture IV: The Blueprint."

Friday, May 7

Dr. G. Lester Anderson, director of the Center for the Study of Higher Education, on "The Further Study of Universities as Organizations: Some Offbeat Ideas and New Dimensions," 1:30 p.m., HUB reading room.

Tuesday, May 11

Walton J. Lord, associate professor of art history, on "Constable at Salisbury: Variations on a Theme," 8 p.m., HUB assembly room. Sponsored by Art History.

Wednesday, May 12

Dr. Franklin Littell, religious studies, Temple University, on "Christianity and the Holocaust In the Age of Genocide," 8 p.m., HUB assembly room.

Thursday, May 13

Dr. Donald W. Meinig, Maxwell Professor of Geography, Syracuse University, on "Symbolic Landscapes: Some Idealizations of American Community," 4 p.m., Room 112 Kern.

Exhibits

Museum of Art: Portraits USA. 1776-1976.

Zoller Gallery: MFA show by Brigitte Henry and William Diez, painters, and Fred Shitzer, sculptor.

HUB Gallery: Recent Works by Stuart Frost, until May 16. **HUB First Floor:** Retrospective exhibit of work by French architect Auguste Perret.

HUB Main Lounge: Suiting Everyone (Smithsonian Traveling Exhibition Service).

Kern Gallery: Bruce Johnson, Watercolors. First Annual Graduate Commons Sculpture Invitational, opening May 8.

Chambers Gallery: Undergraduate Student Exhibition, all media.

Pattee Library: Main Lobby — Entomology Department Exhibit by David Shetlar, until May 10. East Corridor Gallery — Drawings and Prints by Allan Larkin. Lending Services Lobby — Drawings by Neil Feather.

Films

Friday, May 7

Student Film Organization, films produced by film majors, 10 a.m.-4 p.m., HUB assembly room.

Saturday-Sunday, May 8-9

Student films, 10 a.m.-4 p.m., HUB assembly room.

Hillel Foundation film, "I Love You Rosa," Saturday, 9 p.m.; Sunday, 7 p.m., HUB assembly room.

Tuesday, May 11

Artists Series film, "Amarcord," 8:30 p.m., University Auditorium.

Friday, May 14, and Sunday, May 16

Free Shakespeare film, "King Lear" (Paul Scofield, Peter Brook), 6:30 p.m., Room 101 Chambers.

Meeting

Tuesday, May 11

GSA Council, 7 p.m., Room 101 Kern.

Singers offer "Billings to Barber"

Prof. Brown and Penn State Singers in rehearsal.

The Penn State Singers, directed by Raymond Brown, professor of music and University choral director, will present "Billings to Barber," a concert of American music, at 8:30 p.m. Saturday, May 8, in the Music Bldg. recital hall. In celebration of the Nation's Bicentennial year, the program is devoted to American composers, with special emphasis on early music. Much of the music had its last known performance in 1801 and has not been published since appearing in song books by singing masters in the late 1700s. The Singers was founded in 1957 by Mr. Brown in the tradition of a collegium musicum to perform choral works by composers from the Renaissance to the contemporary.

To be performed in the Saturday concert are works by Shumway, French, and other early composers, music by William Billings — including "The Rose of Sharon" and "Ba Glad Then America" — end music by such contemporary composers as Carter, Barber and Copland. No tickets are required.

Arts roundup

Claremont concert

The Claremont Woodwind Quintet will perform its final concert of the academic year at 8:30 p.m. Friday, May 7, in the Music Bldg. recital hall. The quintet, with music faculty members Christeen Callahan Dole, French horn; Overda Page, flute; Smith Toulson, clarinet; William Dole, bassoon; and Gregory Donovetsky, oboe, will perform four works by American composers. Selected for performance are Quintet #1 by Alvin Etler, who studied with Hindemith; Swedish emigre Ingolf Dahl's Allegro and Arioso; e quintet by Walter Piston; and Persichetti's Pastorale.

Constable commemorated

The 200th anniversary of the birth of John Constable, the great English landscape painter, will be commemorated with a public lecture by Walton J. Lord, associate professor of art history, at 8 p.m. Tuesday, May 11, in the HUB assembly room. Constable, born on June 11, 1776, is recognized for the profound influence of his work on English and European painting in the 19th century. Mr. Lord's talk, titled "Constable at Salisbury: Variations on a Theme," is sponsored by the Department of Art History.

Samuel Lovett Waldo's "The Independent Beggar," among works on view in "Portraits USA /1776-1976" in the Museum of Art through June 6, attracted an unusual amount of attention in the second annual exhibition held at the Boston Athenaeum in 1828. The picture is the only portrait in the Bicentennial exhibition painted on wood panel, a fairly common vehicle in the early 19th century when canvas was difficult to obtain.

Perret retrospective

A retrospective exhibit of the work of the French architect Auguste Perret will be on view through the end of the month in the first floor display area in the HUB, sponsored by the Departments of Architecture and French.

Auguste Perret, one of the greatest architects of the 20th century, was born in Brussels in 1874 and died in 1954 in Paris. The son of a building contractor, he learned through experience that the "art" of architecture was closely dependent on building materials, each of which required a specific architectural expression.

Perret pioneered the use of reinforced concrete, and his work became totally devoted, artistically as well as technically, to the application of this material to architecture.

In his notes, he wrote, "He who conceals a pillar makes a blunder," and, "By concealing even one part of the framework one temporarily architecture's sole legitimate and truest ornament."

The photographic documents in the retrospective illustrate Perret's life and works.

Behrend Arts Festival

The sixth annual Spring Arts Festival is being held this week at Behrend College. As indicated by its title, "Variations on a Theme," the festival includes a diversity of art forms. There are presentations by the Erie Philharmonic Chorus and the Erie Civic Ballet, and a poetry recital and opera workshop with members of the Eastern Opera Theatre of New York. Craft demonstrations and displays are scheduled for the weekend, along with folk, rock, bluegrass and jazz concerts. Works of art and photography are on exhibit, and there are daily film showings.

Left to right: Glee Club members Jon Lippard and Paul Anderson; Douglas Smith, assistant director; and Bruce Trinkley at the piano.

Mothers' Day concert

The annual Mothers' Day concert by the Penn State Glee Club, directed by Bruce Trinkley, assistant professor of music, will be performed at 3:30 p.m. Sunday, May 9, in Schwab Auditorium. No tickets are required. Highlighting the program of all-American music will be selections from the Pennsylvania Bicentennial Wagon Train Show, arranged by Mr. Trinkley who also collaborated on the composition, William Billings' hymn, "Chester," heard often in the La Montaine opera, "Be Glad Then America," and his "David's Lamentation" will open the program, with songs by Thompson, Persichetti, and Foster and folk songs and spirituals following. Selections will also be performed by the Hi-Lo's, and the concert will close with traditional Penn State songs. Soloists include music students David Booz, tenor; Edward Steele, baritone; and Douglas Smith, baritone and assistant director.

On the evening preceding the Mother's Day concert, the Penn State Glee Club will perform at the invitation of the Intercollegiate Musical Council, the national association of men's glee clubs, at its seminar at Union College, Schnectady, N.Y.

White Band offers pops program

The ex-member Concert White Band, back-up ensemble to the well-known Concert Blue Band, will present an outdoor pops concert at 6:30 p.m. Monday, May 10, on the plaza east of Kern Bldg. Included in the program will be marches by Bilik, Ostering, and Goldman; a musical tribute to the late Duke Ellington; selections from the musical "Oliver"; as well as compositions by Mitchell, Giannini and McBeth.

Directing the ensemble will be Stephen C. Wallace, doctoral candidate in music education. He will be assisted by Clay Conway at the Blue Band. The concert is open to the public at no charge, and it is suggested the audience may wish to bring folding chairs. In case of inclement weather, the concert will be held Monday, May 17, at the same hour and location.

WPSX highlights

The first months of life for a healthy, normal newborn baby are the focus of **Nova** Sunday, May 9, at 8 p.m. Subtitled "Benjamin," the hour-long documentary takes a close look at the infant's first six months to show how babies relate to their environment. For example, slow motion sequences demonstrate that babies are tuned in to human speech from birth, and the rhythm of adults speaking around them can be synchronized to their body movements. "Benajmin" may also be seen Saturday, May 15, at 3 p.m.

A travelling circus in Italy is the subject of "The Circus Moves on in Calabria," on **Piccadilly Circus** Monday, May 10, at 9 p.m. The documentary is an intimate glimpse into the tightly knit society of performers in the Embellnva Circus, owned by a widow whose seven children are members of the travelling troupe.

Wagner's "The Flying Dutchman" is featured on **Opera Theatre** Tuesday, May 11, at 9 p.m. Norman Bailey sings the title role, and Gwyneth Jones is Senta in this BBC-WNET co-production. The opera is sung in English and may also be seen Sunday, May 16, at 2 p.m.

Athletes who have overcome incredible physical or emotional handicaps to win Olympic medals are the focus of "The Persistent Ones," the second program in the ten-part **Olympiad** series Thursday, May 13, at 9 p.m. Among those featured on the program is Canadian runner Percy Williams, who was afflicted with rheumatic fever at the age of 15 and told he would never run again. Five years later, Williams became Canada's only double Gold Medal winner.

Poet and novelist James Dickey, author of "Deliverance," is featured in an hour-long conversation with Bill Moyers on **Bill Moyers' Journal** Thursday, May 13, at 10 p.m.

Seminar circuit

(Continued from page two)

people will want you to come and talk about it. Once they understand it, then there's no need for you to come back."

But not going back doesn't seem to be in Jean Brenchley's future.

"My students and I have some exciting things coming out of our other research projects on transfer-RNA," she says. "I hope by, say, next year that we'll start to publish And, once those papers are out, I expect there will be interest in those results."

There was a time, however, in Jean Brenchley's young life when the whole idea of working the seminar circuit and, indeed, even being an associate professor of microbiology at The Pennsylvania State University seemed pretty remote.

"I had one of the most unusual career paths you would ever want," she says. "I went to high school in northern Pennsylvania where most people, women in particular, were not encouraged to go to college at all."

She did make it to college, though — a state teacher's college — which trained her to be a biology teacher but didn't set her up for graduate training.

As a result, she says, "I was rejected by almost every graduate school I applied to."

"Eventually, through the good counsel of some friends, she got accepted at Scripps Institution of Oceanography. After two years, both she and Scripps agreed that she wasn't cut out to be an oceanographer, and she left for the University of California at Davis.

"I ended up getting my Ph.D. there," she says, "and it turned out to be a very suitable place."

After the Ph.D. came a year's postdoc at MIT and then an assistant professorship at Penn State.

"At the time that I was a graduate student I was told that I would never get a job because nobody would hire a woman," she adds. "Now I'm told that whenever I get seminar invitations, job offers, or grants it's **because** I'm a woman. I wish people would make up their minds."

It seems that they have in some cases. Dr. Brenchley reports that on one of her recent seminar trips she visited a research institution that had finally hired its first woman researcher. The woman had been employed there about a year when Dr. Brenchley arrived to find that the only special consideration deemed necessary was to add a "Wo" to a men's room door — a real sign of the times.

Library catalogs campus sounds

Although silence may be the golden rule of libraries, the sounds of a quarter-century of activities at Penn State com through loud and clear in a collection of audio tape recordings recently assembled and catalogued by the University Libraries.

Included are such diverse sounds as a poetry reading by Dylan Thomas in 1953 and a philipjic by radical activist Rennie Davis in 1970. A 1965 speech by Dr. Martin Luther King Jr. on the history of the civil rights movement has been preserved, as is a 1969 speech by consumer advocate Ralph Nader.

A catalog of the tapes, "Voices and Events," was published by the University Libraries last month.

The collection includes approximately 1,000 recordings and is being continually expanded Most of the recordings are of lectures, symposia, addresses and interviews conducted on campus in the last 25 years, and quality varies. Musical events are generally not included.

The collection is housed in the Rare Books and Historical Collections Department of Pattee Library and is administered by Dr. Ronald Filippelli, archivist of historical collections.

Staff vacancies

Staff vacancies in this publication generally r quire of least a baccalaureate degree or equivalen as a minimum educational qualification. Staff vacancies requiring less than the baccalaureate degree as well as those announced in the INTERCOM may be found in the Penn State REPORTER. All University employees who are interested in promotion may apply by calling the Employment Outlook 865-1357 (notwork Line 475-1357). Applications for those staff vacancies will be received until 5 p.m. **May 13, 1976. OO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

UNIVERSITY PHYSICIAN, RITENOUR HEALTH CENTER — University Park

Responsible to restore students medically to functioning condition of good health in a minimum amount of time to permit them to gain maximum benefit from their university education. Candidate must possess a degree of Doctor of Medicine from a school of medicine approved by the American Medical Association and a license to practice medicine in the Commonwealth of Pennsylvania. Four to five years previous effective related experience required.

ASSISTANT TO THE DIRECTOR, STUDENT AFFAIRS — University Park

Responsible to the Director of Religious Affairs for the fulfillment of essential support functions in the Office of Religious Affairs and of the Helen Eakin Thomhower Chapel & Student's deposit Social sciences or equivalent plus one to two years of directly related experience, or a master's degree in student personnel or higher education or equivalent, plus up to one year of directly related experience, is required. This will be a ten month appointment.

RESEARCH AIDE, COLLEGE OF AGRICULTURE — University Park

Responsible to an associate professor of poultry science and an associate professor of agronomy for the performance of research related to each discipline. Perform chemical analysis for various mineral elements in sewage sludge, plant and animal tissues. Perform biochemical analysis of various animal tissue, tissue fraction and body fluids. Collect tissues and body fluids and properly prepare for analysis. Summarize and report the results obtained in investigation. Perform other duties as assigned. Bachelor of science degree in science, preferably in chemistry or bio-chemistry plus 5-12 months of directly related experience required.

Funding sources

For further information, call 865-1372

(224-1) The Robert Wood Johnson Foundation has three major health emphases, improving access to health care, improved organization of health care services, and mechanisms for obtaining analysis of public policies in health. Projects are limited to health problems of national scope. In 1975, 141 grants committed $54.6 million. (From NWJ Fdt. Annual Report 1975)

(224-2) The new **FY 1976 National Science Foundation Guide to Programs** explains criteria for selection of research projects and contains program information under seven major headings: Scientific research projects; astronomical, atmospheric, earth and ocean sciences; research applications; science and technology policy research and analysis; international scientific and technological activities; opportunities; science education; and general programs, including travel and conference grants. (From ibid)

(224-3) Priorities for funding **FY 1976 Foreign Language and Area Studies Research Projects** proposals have been adopted without change by the Office of Education. (Ref. 41FR15437-38, 4/9/76) (CFDA 13.436)

(224-4) Proposed rules for **State Operating Programs for Handicapped Children** have been issued by the Office of Education (Ref. 41FR15331-4/13/76) (CFDA 13.427)

PENN STATE intercom

Volume 5, Number 33 May 13, 1976

An internet communicetions medium for the acedemic community of The Pennsylvenie State University published weekly during the four terms of the clees schedule

Commencement schedule

Commencement exercises for the University will be held on the following schedule:

Friday, May 21:

Hazleton Campus, 7:30 p.m. on campus. Merle E. **Campbell,** assistant vice president for student affairs, speaker. Seventy-seven degree candidates.

Saturday, May 22:

College of Medicine, The Milton S. Hershey Medical Center, 10 a.m. in Founders Hall of The Milton S. Hershey School. Speaker will be Dr. John A. D. **Cooper,** president of the Association of American Medical Colleges. Seventy-seven candidates for medical degrees and seven for graduate degrees.

Sunday, May 23:

Behrend College, 2 p.m. in Erie Hall. Dr. Russell E. **Larson,** provost of the University, speaker. One hundred degree candidates.

Schuylkill Campus, 2 p.m. in the Field House. Marc L. **Guttenplan,** president of the Schuylkill Campus Faculty Organization, speaker. Fifty-one degree candidates.

Thursday, May 27:

Ogontz Campus, 8 p.m. in Physical Education Bldg. Barbara Hackman **Franklin,** commissioner of the U.S. Consumer Product Safety Commission, speaker. Seventy-five degree candidates.

Friday, May 28:

Dutlois Campus, 2 p.m. in the Multi-Purpose Bldg. Speaker will be Samuel A. King, associate professor of history. One hundred and ten degree candidates.

York Campus, 8 p.m. in the new wing. Dr. Ray **Miller,** president of York College of Pennsylvania, speaker. Approximately 60 degree candidates.

Saturday, May 29:

McKeesport Campus, 10 a.m., Buck Union Bldg. Maurice L. Symington, president of the McKeesport Campus Advisory Board, speaker. Approximately 30 degree candidates.

Altoona Campus, 10:30 a.m., Adler Gymnasium. Speaker will be Dr. Norman A. Graebner, distinguished visiting professor of history at the University. One hundred and seventy-six graduates.

Berks Campus, 10:30 a.m., Library Bldg. Dr. Doris M. Seward, executive assistant to the President of the University, speaker. One hundred degree candidates.

Fayette Campus, 10:30 a.m. on campus. A student honor speaker. One hundred end twenty degree candidetes.

Mont Alto Campus, 10:30 a.m. outdoors on campus. Capt. Leonard S. **Baker,** director of the National Geodetic Survey, speaker. One hundred and two degree candidates.

University Park Campus, 10:30 a.m. in Beaver Stadium. Speaker will be Sarah Caldwell, artistic director of the Opera Company of Boston. A total of 5,043 degree candidates, including 15 for associate degrees, 4,355 for baccalaureate degrees, 534 for masters' degrees and 139 for doctorates.

Delaware County Campus, 11 a.m. in the Main Bldg. Dr. Robert G. Oulen, dean of academic instruction for Commonwealth Campuses, speaker. Eighty-five degree candidates.

Wilkes-Barre Campus, 2 p.m. outdoors on campus. Luzerne County Court of Common Pleas Judge Peter Paul Olszewski, speaker. One hundred and fourteen degree candidates.

Worthington Scranton Campus, 2 p.m. on campus. Speaker will be Father William J. Byron, president of the University of Scranton. Ninety-seven degree candidates.

Sunday, May 30:

Beaver Campus, 2 p.m. in the Gymnasium. Charles L. Sewall, president of Robert Morris College, speaker. Seventy degree candidates.

New Kensington Campus, 2 p.m. in the Little Theatre. Dr. Robert J. Scannell, dean of the College of Health, Physical Education and Recreation, speaker. Sixty-eight degree candidates.

Shenango Valley Campus, 2 p.m. on campus. Speaker will be Sharon Mayor Harold E. Bell. Ninety-one degree candidetes.

Saturday, June 12:

Capitol Campus, 2 p.m. In the Hershey Community Theatre. Jerrold L. Schecter, diplomatic editor for "Time," speaker. A total of 525 degree candidates, including 470 baccalaureate degrees and 55 masters' degrees.

Allentown Campus and **King of Prussia Graduate Center,** no commencement.

Chinese ambassador to speak

James **Shen,** embassador of the Republic of China to the United States, will visit Penn State on Monday end Tuesday, May 17 and 18.

Ambassador Shen

His visit will include the presentation of a public lecture, scheduled for 8 p.m. Monday, May 17, in the Kern Auditorium.

A reception by the Chinese Student Assn. will be held in the International Student Lounge, Kern Graduate Bldg., following the lecture.

Born in Shanghai, Ambassador Shen received his B.A. from Yenching University, Peiping, in 1932. His M.A. was conferred three years later by the University of Missouri.

Ambassador Shen, who also has hed a distinguished career as a journalist, was appointed in 1971 es Ambassador to the United States, following a long period of service with his government. He had been embassador to Australia from 1966 to 1968 and from 1968 to 1971, vice-minister of foreign affairs. He served from 1956 to 1959 as secretary to the President of the Republic of China at Taipei and from 1959 to 1961 as director of the Information Department, Ministry of Foreign Affairs, also at Telpei.

With the Ministry of Information, he was chief of the editorial section in Chungking and director of the Pacific Coast Bureau in San Francisco from 1943 to 1947. He also had served as director of the International Department of the Government Information Office from 1961 to 1966 and in 1947-48 was director of the International Department of the Government Information Office.

Perez gets Donkin Award

Dr. Oswald congratulates Prof. Perez

News briefs

Baker Lecture at Hershey

The second annual Michael and Myrtle Baker Lecture in Orthopaedic Surgery will be delivered at 4 p.m. Thursday, May 20, at The Milton S. Hershey Medical Center. The speaker will be Dr. Henry J. Menkin, professor of orthopaedic surgery at Harvard Medical School and chairman of the department at the Massachusetts General Hosplta! in Boston. His topic will be "What Good Are In-Training Exams, Anyway?" The lectureship, established in 1974, was made possible by a gift from Mr. and Mrs. Baker of Beaver, Pa. Mr. Baker is a former president of the Board of Trustees, an internationally prominent consulting engineer and chairman of the board and chief executive officer of Michael Baker Corp.

Summer calendar items due

A summer term calendar will be published in the June 10 issue of INTERCOM. Items for it should be sent to the Calendar Editor, 312 Old Main, by Friday, May 28.

Inn food service to shut May 31

No food service will be available at the Nittany Lion Inn on Memorial Dey, Monday, May 31. It will resume on Tuesday, June 1.

Decals installed

Decals designed to assist faculty members who mey encounter problems with classroom errangements ere being installed by Office of Physical Plant personnel in scheduled classroom and laboratories in University buildings. Their purpose is to inform faculty members who may encounter maintenance problems while assigned the use of a room where to call for assistance. The decals also list the number to cell should a classroom or laboratory door be locked. The telephone numbers are those of the Scheduling Office and the Service Desk of the Office of Physical Plant. The Service Desk is to be called only If the Scheduling Office cannot be reached.

The action to place the decals stems from a recommendation made last year by University Council.

New numbers for York

New telephone numbers, effective May 1, have been listed for York Campus.

Stone Valley planning, Borough Council duties cited by committee

Lawrence J. Perez of State College, who retired in 1970 from the faculty and staff of the University, has been chosen to receive the 1976 McKay Donkin Award.

The $500 award is given annually to the faculty or staff member, including retired personnel, who has "contributed most to the economic, physical, mental or social welfare of the University faculty."

It was established with contributions made by the family and friends of the late McKay Donkin, who prior to his death in 1968 had served for more than ten years as vice president for finance and treasurer of the University.

The award recognizes the extensive planning and work done by Mr. Perez in the development of the Stone Valley Recreation Area, now widely used by faculty and students of the University as well as others throughout the Central Pennsylvania area.

"His professional expertise and his devotion to the idea, even in the face of doubters, were largely responsible for the existence of the lake," the nomination committee pointed out in their recommendation to President Oswald.

The committee also cited the work done by Mr. Perez for the Borough of State College which directly and indirectly affected faculty members: "As president of Borough Council for fourteen years, he worked diligently to blend the interests of the University and the interests of the community to achieve a well-balanced fulfillment of goals. His leadership in working out traffic flow patterns for various University and town activities has benefited us all."

Mr. Perez joined the civil engineering faculty at the Universlty in 1945. He was named assistant dean of the College of Engineering in 1956, continuing both as assistant dean and professor of civil engineering until his retirement with emeritus rank six years ago.

Senate approves policy on majors

The University Faculty Senate has approved e policy for multiple major programs for undergraduate students.

The policy, adopted at the May 4 Senate meeting, defines a multiple major program as a program of two or more majors which combine two or more distinct fields of study leading to the same baccalaureate degree.

Under the new policy, candidates satisfactorily completing multiple major programs will receive one diplome. It will be for the major last designated by the student no later than the term before graduation. The final academic record will indicate the completion of the requirements for additional majors.

Nominations for 1976-77 Senate officers and committee memberships were made. Ballots are to be returned by May 27, with results to be announced at the June 1 meeting. Much of the meeting was devoted to informational reports from various Senate committees. Included were reports from the Senate Committee on Plenning Development on "Trends and Current Status Information on the University's Budget" and "Enrollment Prospects."

*Classes that would have met on Monday, July 4, 1983 will meet on Wednesday, Aug. 17, 1983.

Bus. Ad. launches drive for top ranking

Trees and shrubs in hand, campus landsceping crews have converged on the College of Business Administration to beautify the grounds around the building for its formal dedication June 5. While their cosmetic touches will certeinly enhence the occesion, they also should not obscure the fect that CBA is more then just a pretty face.

CBA has 80 full-time feculty members ot University Park. Last fell, 3,265 undergreduate business students enrolled in thair classes — 7 percent more then in 1974 and 25 percent more than in 1970. There were also some 270 graduate studants in the College, end about seven quelified epplicants bidding for each of the 100 places in the MBA progrem.

Herd times may be in store for higher educetion in general, but the College is optimistic about its future. It has just emerged from three yeers of intensive self-study, and the result is e strategy which it believes will make CBA, both in fact and reputation, one of the top 15 management schools in the country.

Dean Kelley —Steve Hardin photo

The drive began in 1973 with a conference on the changing roles of business schools. Dean Eugene J. Kelley then appointed two faculty task forces which subsequently visited several highly rated business schools. The task forces prepared rough drafts of proposals setting new directions for Penn State-CBA. Extensive hearings were held with the faculty in the College to refine the proposals, the task forces making a special effort to give younger faculty a voice. Geat care was also exercised to protect confidentiality — even to setting up a drop box for anonymous ideas. By the end of the process, a fair degee of unanimity had emerged.

One task force on external relations was led by William L. Ferrera, professor of accounting and Price Waterhouse Faculty Fellow. J. D. Hammond, professor of business administration, led a second on organization.

"We knew we couldn't move forward on ell the programs which had been suggested," Dean Kelley says, "because it was just too expensive. We had to concentrate on a reasonable number of goals."

Those finally selected include:

- **Providing the best possible Master of Business Administration program**

"The MBA is e business college's flagship program in terms of quality. Along with executive education, that's where distinction is echieved," according to Dr. Stewart W. Bither, MBA program director for the College. "Many leading business schools — Stanford, Harvard, Carnegie-Mellon and Northwestern emong them — don't even offer undergreduate business degrees."

Because programmatic excellence is based on getting the best available students, CBA actively recruits good candidates. An alumni committee of 18 persons located in the major cities of the northeast has been set up to contact and personally interview students who score top merks on the Graduate Management Examination. The College is also working hard at placing its students and tracking their careers.

Each student in last year's graduating class received two-plus job offers on average, and starting saleries averaged $15,200 — which helps account lor the fact that the MBA is the tastest growing professional degree in the country.

- **Expanding executive education programs**

"Pennsylvenia's business community does not now look first to CBA for man-egerial leadership or expertise. Yet it could, and from Penn State's viewpoint, it should," Dean Kelley comments.

"Feculty involvement has been relatively low in executive development programs, even though it is greetly to our edvantage to deal with executives in our fields of specialization. It keeps us ebreast of current practice and opens up evenues for potential research — and research funding. At the same time, we show the business community that we have talented faculty and students who can contribute to their organizations.

Translating these sentiments into action means replacing faculty from other schools with Penn State instructors in the summer resident Executive Management Program (EMP), now in its 19th year. It also means setting up 20 new executive education programs in 1976, extending the EMP concept to incorporate non-resident training sessions and developing an Executive Seminar series hosted by the Commonwealth Campuses.

- **Maintaining excellence in undergraduate instruction**

With more and more students turning toward professionally oriented majors, CBA has been deluged by undergraduate enrollments, making quelity control a genuine concern. New teaching techniques are being tried with the help of course improvement grants from the Office of the Vice President for Undergraduate Studies and from CBA alumni. A full-time instructional services specialist has been hired to help faculty deliver more etfective lectures and class presentations.

The College has also considered placing limits on undergraduate enrollments, a step it hopes can be avoided in view of Penn State's land-grant commitment.

"I reject the contention that land-grant concepts only mean large numbers of undergraduates and are inconsistent with quality education," Dean Kelley comments. "Excellence rather than mediocrity is more efficient and effective for learning by students at land-grant universities. But the problem of overcrowding is not likely to go away. Personally, I do not see any decline in demand for undergraduate or graduate admissions to Penn State-CBA in the next several years. All the leading business schools at land-grant universities without exception are experiencing an increase in admissions."

- **Improving external relations**

"The State will keep us in existence," says Donald C. Hambrick, CBA's first director of external relations. "But to achieve excellence, we need to seek support from the business community and from alumni with resources who have never been asked to help before. It's a 'quid pro quo' relationship. We initiate activities of benefit to alumni and corporation executives in return for their interest end involvement in CBA educational programs, student placement or research projects. Our programs will be substantive, not just public relations and mailings. They must also be cost-effective, with low start-up costs."

Among the activities already begun are an alumni tracing program to compile up-to-date addresses and professional information for the College's 18,000 alumni. An alumni renewal program on financial accounting is being offered at three Commonwealth Campuses, plus e two-dey general management conference for alumni in conjunction with the CBA building dedication. Other on-going projects include an alumni newsletter, an on-campus speaker-visitor clearing house and the development of a "portfolio of opportunities" (course improvement projects, learning resource center materials and alumni educational programs, for example) in which contributors can invest.

- **Beefing up the research program**

CBA's research program took off late in the 1960s. In 1966-67, the annual report on faculty publications showed 33; in the last five years, there have been 465.

"CBA is putting particular emphasis on opening up joint research efforts with other Colleges in the University," notes Dr. Paul H. Rigby, assistant dean for research. "Some of the information needed is old hat for our faculty but totally new for non-business areas. For example, we heve cooperated with Arts and Architecture to sponsor a conference on training people in arts management. This is an area with a need for administrative competence. We ere also working with Hershey to prepare an initiative in health care management. These are eforts to close the communications gap between those who know the technology and those who know how to organize it."

- **Internal reorganization to bolster programmatic strength**

"No professional college of business or management has achieved excellence by concentrating solely on departmental programs. What is needed is a programmatic orientation." Dean Kelley says.

The faculty task force on organization agreed, recommending that individual faculty directors be named to chair faculty advisory committees for the undergraduate, MBA and Ph.D./M.S. programs. They will concern themselves primarily with broad academic and policy considerations which cut across conventional department boundaries.

Program directors and department heads will serve three- to five-year terms, which may be renewed once, since CBA is determined to maintain a collegial approach with strong faculty leadership.

"I believe that we already have the faculty in place to take us to our goals," Dean Kelley says. "We are developing, particularly in the area of attempting to realize our research potential. As a professional school, however, our tests of faculty excellence are not necessarily the same as those in other colleges of the University. We place more emphasis on teaching ellectiveness, applied problem solving abilities and the relationship with the managerial world outside. Many of our present efforts have been consciously developed to utilize our faculty's potential most effectively. None of these plans would be achievable without our being eble to retain and add to a quality faculty."

And Dean Kelley concludes:

"CBA's distinction is functional to Penn State as a whole. As the demand for university services declines, clients will turn to those institutions which provide higher levels of excellence. I think distinction can come without exceeding by an unreasonable margin the expenditures necessary to attain across-the-board mediocrity. If selective excellence costs only a little more, then why not excellence and Penn State leadership?"

The company to keep —

How deans rank the academic quality of the top 15 graduate business schools

1. Stanford	6. Wharton	11. Purdue
2. Chicago	7. Tuck	12. Northwestern
3. Sloan	8. UCLA	13. Cornell
4. Harvard	9. Columbia	14. Michigan
5. Carnegie	10. Berkeley	15. Indiana

Elsewhere in academe

According to e nationwide survey conducted for the National Science Foundation, 75 percent of those interviewed said they thought science and technology had changed life for the better — 5 percent more than held this opinion two years ago. Only 5 percent polled said science had changed things for the worse — down from 8 percent in the earlier survey. Among 10 professions, scientists ranked second in "prestige or general standing." Physicians were first. Others, in descending order, were engineer, architect, minister, lawyer, banker, accountant, businessman and U.S. Representative.

The gap between the proportions of blacks and whites completing college was larger in 1974 than it was in 1960, according to newly released Bureau of the Census data. Although the percentage of blacks doubled, from 4.1 to 8.1 percent, the percentage of white students completing college grew from 11.9 to 21 percent. Despite earlier fears, black students do not seem to be ebandoning black colleges. Enrollments at these institutions, excluding private two-year schools, is growing significantly faster than the national rete. Between 1974 and 1975, the Institute for Services to Education found, total enrollment at the 88 four-year black colleges increased by 11.4 percent, almost double the 6 percent rate for all four-year schools.

Embattled President John R. Silber of Boston University received a vote of confidence from the school's trustees meeting to consider his tenure efter several faculty groups and 10 of the university's 15 academic deans requested his resignation. The trustees also voted to reorganize the governance of the university, with linal details to be worked out later this month.

Forty-seven percent of the Lehigh University students polled by their student newspaper acknowledged having cheated on a college exam. The newspaper claimed to have polled a scientifically selected sample, representetive of the entire student body.

The chancellor of the five Vermont State Colleges, William G. Craig, has resigned, citing lack of financial support by the state legislature. He also called the lack of coordination of higher education in Vermont "cumbersome and expensive."

Kelley deans' head

Dr. Eugene J. Kelley, dean of the College of Business Administration, has been elected chairman of the Council of Academic Deans at the University.

He succeeds Dr. Donald H. Ford, dean of the College of Human Development, who will serve as take chairman.

Dean Kelley also was recently named to the board ol directors of the American Assembly of Collegiate Schools of Business and serves that accrediting body as chairmen of its governmental relations committee. He joined the University faculty in 1963 as Research Professor of Business Administration efter serving as professor of marketing end associate dean of the Graduate School of Business at New York University. He was named dean of the College of Business Administration in 1973.

He also participated in the 1974 White House Summit Conference on Inflation, and the Business and Industry Conference on Inflation at President Gerold Ford's request. Dean Kelley was also nemed recently to the National Advisory Council of the Small Business Administration and continues to serve as en edvisor to the General Accounting Office.

He has served as edtor of the "Journal of Marketing" and the Foundations of Marketing Series.

Faculty notes

Dr. Gerard J. Brault, professor of French, will be awarded the degree of Doctor of Letters Saturday, May 15, at commencement exercises at Assumption College in Worcester, Mass. The honorary degree will be bestowed by his alme mater "in recognition of scholarly achievements as e professor of French and es e distinguished medievalist."

Prof. Brault received his B.A. degree from Assumption in 1950. He later obteined his M.A. degree in French from Leval University in Quebec and his Ph.D. in Romance languages from the Universily of Pennsylvanie. Author of four books and some 70 profeslional articles, he recently completed e two-volume edition of the "Song of Roland." He was e Fulbright Fellow to France in 1956, and e Guggenheim Fellow and Fulbright Research Scholar to the same country in 1968. He was awerded the Palmes Academiques by the French Ministry of Educelion in 1965 and promoted to the renk of officer in that order in 1975. He was elected e life-member of the Academie Internationale d'Heraldique in 1972, a Fellow of the Society of Antiquaries of London in 1972, and a Fellow of the Mediaeval Academy of Americe in 1976.

Dr. John J. Cahir, associate professor of meteorology, is serving on a Nationel Academy of Sciences-Nationel Research Council review panel appointed to evaluate the research progrems of the National Environmental Satellite Service (NESS). The review is part of an overall assessment being made of the research activities of the Nalional Oceenic and Atmospheric Administration of which NESS is a branch.

Dr. Jon P. Nelson, associate professor of economics, has been appointed to the National Academy of Sciences' Committee on Appreisal of Societal Consequences of Transportation Noise Abatement of the Assembly of Behavioral and Social Sciences. Dr. Nelson, a research associate with the Institute for Research on Human Resources, Is the author of e recent report on the effects of mobile-source air and noise pollution on residentiel properly values.

Dr. John F. Houlihan and **Dr. David P. Madacsi,** assistent professors of physlcs el Shenango Valley, presented papers at the April meeting of the American Physical Society in Atlenta, Ga. Dr. Houlihan's topic was "Crystal Field Splitting in $Ti_{1-x}O_x$ via EPR Spectroscopy," co-authored with Dr. Madecsi and Dr. L. N. Mulay, professor of solid state science at University Park. Dr. Madacsi presented the paper, "Unpeired-Spin Delocalization for nd¹ Impurity Cations in Tetragonal CrO_{2-x}" co-authored with M. Stapelbroek and O. R. Gilliem of the University of Connecticut. He also co-authored a second paper, "Paramagnetic Centers in Reactor-Irradiated Single Crystals of Tetragonel CrO_{2-x}" with the same authors.

Owen H. Seuerlender, professor of economics and assistant director of the Institute for Research on Land and Water Resources, will participele in an Internationel and Cross-Cultural Seminar on Education and Community Development in India from June to August. He will be part of e 21-member team sponsored by North Caroline State University. The seminar will be held at Tamil Nadu Agricultural University in South India, and the group will elso travel throughout the sub-continent.

Dr. Arthur O. Lewis, associate deen of the College of the Liberal Arts and professor of English, is guest editor of the spring issue of "The Journel of General Education," published by Penn State's Press. The issue includes nine of the papers presented at the Annual Conference of the Science Fiction Research Association held at Penn State in September, 1973.

Dr. Marshall H. Kaplan, essoclete professor of aerospace engineering, spoke et e workshop on Outlook for Spece Power at Princeton University May 6-8. This workshop was sponsored by the Technicel Committee on Electric Power Systems of the American Institute of Aeronautics and Astronautics (AIAA).

Dr. Doris M. Seword, executive assistant to Presidenl Oswald, received the Dislinguished Alumni Service Aword of Indiana University on May 8. The award, according to Indiana's president, Dr. John W. Ryan, provides recognition for outstanding achievements by Indiana Universily men and women in "their chosen fields of endeavor and significant contributions to the benefit of city, state and nation." It was jointly authorized by Indiana's Board of Trustees and the Executive Council of the Alumni Association and conferred for the first time in 1953.

Dr. Seword joined the President's staff in 1970 and holds the title of professor of human development. She had been professor of higher educetion, and dean of student affairs planning at the University of Kentucky, where she had also served as professor of education and dean of women. Earlier, she had taught and served on the administrative staffs of Purdue University and the University of Minnesota, and of Syracuse University, where she received her M.A. and Ph.D. in student personnel work in higher education. Her undergraduate degree al Indiana University was in psychology and philosophy. She is a former nationel treesurer and program cheirman of the Nationel Association of Women Deans and Counselors and a former president of the Southern College Personnel Association.

H. Eugene Goodwin, professor of journelism, has been elected president of the Pallett Prize for Free and Responsible Press. Prof. Goodwin has been a member of lhe board of directors of the fund since It was established in 1965 and served as Its vice president for the past two years. He succeeds Ben H. Bagdikian, the noted media critic.

The Washington-based fund is named for Lowell Mellett, the reporter, editor and columnisl who left $36,000 in Scripps-Howard Investment Co. stock to the American Newspaper Guild to be used to further press responsibility without impairing press freedom.

Prof. Goodwin worked as a reporter and columnist for the Washington "Star" before he came to Penn State in 1957 as director of the School of Journalism, a position he relinquished in 1969 to teach full time. He holds bachelor of arts and master of erts degrees from the University of Iowa

Dr. Joachim F. Wohlwill, professor of man-environment relations and psychology, will join a group of 13 scholars to design a research agenda on American Values and Models of Human Habitation in Washington, D.C., this summer. The project, sponsored by the American Association for the Advancement of Science, is supported by funds from the National Science Foundelion and the Nationel Endowment for lhe Humanities. The project will provide a unique opportunity for professionals from e broad spectrum of disciplines to work together to develop strelegies for interdisciplinary research in the field of habitat and human values.

Dr. Robert Scholten, professor of petroleum geology, gave an invited lecture in a symposium on The Idaho Batholith and Its Tectonic Setting at a meeting of the Cordilleran Section of the Geological Society of America held recently at Washington State University. At the same meeting, **Charles M. Onasch**, e geology graduate student, presented e paper on "Infrastructure - superstructure Relations and Structural Mechenics along the Western Margin of the Idaho Batholith."

Dr. Robert Zells, chief of cardiology and professor of medicine and pharmecology et Hershey, has been appointed to the editorial board of the "Annels of Internal Medicine."

Dr. Peirce F. Lewis, professor of geography, was guest of honor at the April 22 annual banquet of the Geographical Society of Philadelphia, where he spoke on "A Geographer Looks al Common Houses."

Dr. Gershon Hepner, assistenl professor of medicine at Hershey, presenled a paper coauthored with **Dr. Elliot S. Vesell,** Hershey's chairman of pharmecology, entitled "Veriability of Hepetic Microsomal Response to Stimulelion and Depression" al the May 2 annual meeting of the Americen Society for Clinicel Investigation in Atlantic City, N.J.

Another view of remedial ed

The question is not whether we are going to have remedial education at Penn State; we have it already. The question is instead the extent and form of commitment we ought to make. We have already made two kinds of curricular commitment: one official and one unofficial. The official commitment is reflected in the existence of courses such as English 11, Math 4, and Math 5, all Identified as remedial. The unofficial commitment consists of the gradual lowering of academic expectations and standards In courses not identified as remedial.

Let me speak for the moment as an instructor in English 1, the normal (nonremedial) English composition course required of most students at the University. Its title is "Composition and Rhetoric," Its description "Organizing and writing clear expository essays" (provisional description). In practice, much of that course is — and has to be — spent on elementary principles of English grammar, synlax, and punctuation. For much of the term, one class day out of three is devoted to teaching such matters as the uses of the comma, subject-verb agreement, complete versus Incomplete sentences, misplaced modifiers. Instructors in the sequential course English 3 continue to spend a substantial part of the term on these matters. As an instructor in English 117, "Technical Writing," I have had to go the same route. The choices when most of the students are unprepared are 1) fail the majority, 2) ignore their tack of proficiency and pass them anyway, 3) try to teach them what they need to know. The first alternative is inhumane and impractical; the second is ultimately dishonest; the third, in these times, is necessary.

This is not news. In other fields also, instruction becomes more and more basic. A recent Faculty Senate report (Special Committee on the Developmental Year, March Senate Agenda, 1976) has documented lhe national decline in students' academic preparation for college as reported by the College Entrance Examination Board, the American College Testing Program, and the National Assessment of Educational Progress. To be sure, I have talked with a few colleagues who deny that their students' decreased preparation has caused a corresponding downturn in the content and standards of their courses—but with only a few. Most faculty members, I think, know what has been happening in their classes, and see it as necessary, under present circumstances, although not desirable.

The question now is whether we should accept more and more unofficial remedialion — defined as remedial instruction in courses not so identified — or whether we should call a halt to this process at some point and insist that the gap between our students' academic preparation and college-level work be bridged by other means. I would like to call e halt right now. I do not believe, in conscience, that lhe courses I teach ought to become any more remedial than they already are if they ere to continue to carry college credit.

However, I also believe that we can lurn our backs on our unprepared students. We can't afford to, nor should we want to. If we are to both protect the integrity of a university degree and serve the needs of the people who come to us, we will have to increase our commitment to official remedlation, remediation through courses identified as such. We will need to seek speciel state or federal funding; some of us may need to retrain ourselves to teach differently. With special funding and some retraining, perhaps we can do this service ellegantly, as we have done other service jobs well, and we need not be ashamed of doing it. We ultimately will need to be ashamed, however, if we permit the downward pressure on our regular curriculum to continue indefinitely. That way nobody wins in the long run; everybody runs further and lurther behind.

Caroline D. Eckhardt
English and Comparative Literature

Dr. Volz

Dr. Carl Volz, professor of electrical engineering and director of electronic services, will retire June 30.

After earning his B.S., M.S. and Ph.D. from Penn State in electrical engineering, he was employed by Union Switch and Signal Co., where he was issued approximately 20 patents on signal systems and devices. He returned to Penn State In 1948 as an Instructor.

He has taught and developed senior and greduate level courses in the areas of, computation, control systems, instrumentation and non-linear analysis and has supervised over 40 M.S. and Ph.D. theses in electrical engineering during his 28 years at Penn State. Since 1970, Dr. Volz has directed the University's Electronic Services division. He is e co-inventor of an implantable, rechergeable, adaptive cardiac pacemaker that has over 30 times greater life between recharges than the pacemakers currently in use.

Dr. Volz received the College of Engineering's Outstanding Faculty Adviser award in 1971 and was named a recipient of the 1974 Excellence-in-Teaching award by the Penn State Engineering Society. He is the euthor of an Instructional text, "The Binory Number System," end is the coauthor of "An Introduction to Electrical Circuit Analysis."

A new textbook, "An Introduction to Old Church Slevic," by **William R. Schmalstieg,** professor and head of the Department of Slavic Languages, has just been published by the Slavica Press. Old Church Slavic is the most ancient attested Slavic language and is as important for the historical study of the Slavic languages as is Latin for the Romance languages. In addition to providing a description of the Old Church Slavic language, the new book supplies much historical information and emphasizes the relationships between the Baltic and Slavic languages. The new grammar also contains appropriate reading selections, including Bible translations, some Old Slovenian texts and several selections from the life of St. Cyril, the missionary who introduced Christianity to the Slavic peoples.

"Annotated Bibliographies of Mineral Deposits in Africa, Asia (Exclusive of the USSR), and Australasia," Volume II of a three-volume work by **Dr. John D. Ridge,** professor emeritus of mineral economics, has just been published by Pergamon Press, Oxford, England. Volume I, "Annotated Bibliographies of Mineral Deposits of the Western Hemisphere," was published in 1972 as Memoir 131 of lhe Geological Society of America. Dr. Ridge, who retired last year after 28 years on the faculty, is now adjunct professor of geology at the University of Florida.

Col. A. J. Grill, professor of Air Force aerospace studies, received The Distinguished Service Medal and The Honorary National Membership Certificate during the National Arnold Air Society Conclave In Philadelphia last month.

Dr. Terry J. Peavler, assistant professor of Spanish end comparative literature, fs the author of an article In the latest Issue of the "Latin American Literery Review" analyzing "Recourse of Method," the most recent novel by Alejo Carpentier, Cuba's leading novelist.

Dr. Karnig O. Mikaelian, assistant professor of physics, will visil the Theory Group al the Stanford Linear Accelerator Center from July 15 to Aug. 15. Dr. Mikaelten, a theoretical physicist, will work with the group on the study of new particles discovered during the past year.

University Park Calendar

May 13–29

Items to be included in this calender should be sent to the Calender Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special events

Thursday, May 13
Commons Videotape, 12 noon, Kern lobby.
Sports: Women's softbell, vs. Ursinus, 3 p.m. Women's lacrosse, vs. Ursinus, 3 p.m.
FSHA 410 dinner, a Tribute to the Cuisine of Don Oulxote, 5:30 p.m., Maple Room. Reservertions: 865-7441.
University Theatre, "Jazz Dance Theatre in Concert," 8 p.m., Pleyhouse Theatre.
Friday, May 14
Sports: Men's track, Penn State Open Invitational.
Folk and Square Dence Roundup, 7:30 p.m., White.
University Theatre, "Jazz Dance Theatre in Concert," 8 p.m., Playhouse Theatre.
Collette Voneda, organ, 8:30 p.m., Music Bldg. recital hall.
GSA Coffeehouse, 8 p.m., Rooms 101, 102 Kern.

Saturday, May 15
University Theatre, "Jazz Dence Theatre in Concert," 8 p.m., Pleyhouse Theatre.
PSU Symphony Orchestra, 8:30 p.m., University Auditorium.

Sunday, May 16
Chapel Service, 11 a.m., Music Bldg. recital hall. The Chapel Choir's Spring Concert.
Black Christian Fellowship worship service, 11:15 a.m., Eisenhower Chepel. "Today Is Men's Day," Rev. Leon B Hall, Easton, Md., special men's day choir.
Shavers Creek Nature Center, Spring Wild Flower and Ecology Welk, 3 p.m., Mineral Industries Bldg., Stone Valley.
Penn State Symphonic Wind Ensemble Pops Concert, 3:30 p.m., Arts Courtyard.

Monday, May 17
Peter Brye, cello, 8:30 p.m., Music Bldg. recital hall.

Tuesday, May 18
Sports: Men's baseball, vs. St. John's, 1:30 p.m.

Films

Thursday-Friday, May 13-14
Commonsplace Theatre, "Day for Night," 7:30 and 9:30 p.m., Room 112 Kern.
Friday, May 14, and Sunday, May 16
Free Shakespeare Ielm, "King Lear" (Paul Scofield, Peter Brook), 6:30 p.m., Room 101 Chembers.

University schedule

Wednesday, May 19
Last day for signing Spring Term Emergency Loans, Room 108 Shields.
Classes end.
Thursday-Saturday, May 18-22
Final Examinations.
Seturday, May 29
Commencement.

Meetings

Monday, May 17
Color Slide Club, 7 p.m., Room 112 Kern.
Dinner.

Exhibits

Museum of Art: Portraits USA, 1776/1976.
Zoller Gallery: End-of-Year Student Exhibition.
Kern Gellery: Bruce Johnson, watercolors, until May 22. First Annual Graduate Commons Sculpture Invitetional.
HUB Gallery: Recent Works by Steven Frost, until May 16. **HUB First Floor:** Retrospective exhibit of work by French architect Auguste Perret. **HUB Main Lounge:** Sulking Everyone, through May.
Chambers Gallery: Undergraduate Student Exhibition, all media.
Patlee Library: Lending Services Lobby drawings by Nell Feather.

Seminars

Thursday, May 13
Meteorology, 4 p.m., Room 26 Mineral Sciences. Fred House, Drexel University, on "Preliminary Results from the Limb Radiance Experiment on Nimbus 6."
Chemistry, 12:45 p.m., Room 333 Whitmore. Mary Good, University of New Orleans, on "Mossbauer and ESCA Studies of Heterogeneous Ruthenium Catalyst Systems."
History, 1:15 p.m., Room 124 Sparks. Dr. George P. Bonis on "The Military Communications of Alexander the Great."
Bioengineering, 1:30 p.m., Room 121 Noll. Dr. W. G. Kubicek, physical medicine and rehabilitation, University of Minnesota Medical School, on "Impedance Cardiography."
Air Pollution Control, 2:20 p.m., Room 145 Fenske. Ching-Ming Shieh, Argonne National Lab., on "Particulate Coagulation and Transport."
Population Research, 2:30 p.m., Room 244 Deike. Dr. Leon F. Bouvier, Population Reference Bureau, Washington, D. C., on "The Role of Nongovernmental Organization In Demographic Research and Population Planning."
Physics, 3:50 p.m., Room 119 Osmond. Dr. H. Ehrenreich, applied physics and engineering, Harvard University, on "Theory of Alloys."
Methematics, 4 p.m., Room 103 McAllister. Nathan Jacobson, Yale University, on "Some Algebraic Results."
Agronomy, 4 p.m., Room 111 Tyson. P. H. Williams on "Uptake of Cd, Zn, and Cu by Corn and Sorghum Herbage Grown on Sewage-Sludge Fertilizer, and Their Accumulation in Meadow Vole Tissues."

Friday, May 14
Geography, 4 p.m., Room 301 Mineral Industries. Dr. Donald W. Melnig, Maxwell Professor of Geography, Syrecuse University, on "The U.S.A. — A Historical Regional Approach."

Monday, May 17
New Communities, Architecture, 2 p.m., Room 322 Sackett. Dr. Leonerd Gordon, Arizona State University, on "Social Issues and Problems in an Arid City."
Genetics, 3:55 p.m., Room 111 Tyson. Lynne Lawton on "Heterozygote Advantage In Maintenance of Lethal Recessive Genes In Human Populations."
Organic Chemistry, 8 p.m., Room 333 Whitmore. Hans Schmitthenner on "Synthesis of DNA Using Organic Chemical Techniques."

Tuesday, May 16
Acoustics and Aerospace Engineering, 3:45 p.m., Room 75 Willard. Neil Molseev, graduate student in acoustics, on "Noise Due to Interaction of Boundary Layer Turbulence with a Propulsor Rotor."

Solid Waste, 2:20 p.m., Room 140 Fenske. Hervey Alter, NCRR, Washington, D. C., on "Resource Recovery in 1985."
Astronomy end Physics, joint colloquium, 3:50 p.m., Room 119 Osmond. William K. Rose, Astronomy, University of Maryland, on "Theory of Pulsers and Compact Z-Ray Sources."

Monday, May 24
Organic Chemistry, 8 p.m., Room 333 Whitmore. P. Chinnasemy on "The Ene Reaction."

Lectures

Thursday, May 13
Dr. Donald W. Melnig, Maxwell Professor of Geography, Syracuse University, on "Spatial Landscapes: Some Ideas and Explorations of American Community," 4 p.m., Room 112 Kern.

Monday, May 17
James Shen, Republic of China Ambassador, 8 p.m., Kern Bldg. auditorium.

Arts roundup

Orchestra concert May 15

The premiere of Symphony No. 3 by Burl Fenner, associate professor of music, will highlight the University Symphony Orchestra concert at 8:30 p.m. Saturday, May 15, in University Auditorium.

Prof. Fenner

The work, e three-movement symphony, was completed in 1975 under a grant from the National Endowment for the Arts. The NEA extended its support to the composition as part of its announced desire to help build an American musical legacy and to encourage the performance of new music.

Mr. Fenner's second symphony was premiered in 1974 by the Orchestre Society of Pennsylvania following its selection by the Pennsylvania Composers Project panel.

The 70-piece orchestra, directed by Dr. D. Douglas Miller, associate professor of music, will also perform Schubert's overture to "Rosamunde," for which he composed incidental music, and Brahms' Variations on e Theme by Haydn. "The Moldau," from Smetena's "Ma Valst," a tone poem describing the River Moldau, will complete the program.

"Suiting Everyone" exhibit

A special Bicentennial exhibition on costumes, organized and produced by the Smithsonian Institution Traveling Exhibition Service, Is on display through May 29 in the HUB. The exhibit, "Suiting Everyone," illustrates the key factors that led to the mass production and merchandising of clothing in America and shows how the availability of clothing for all of the people has affected our social relationships.

Jazz Dence Theater performs

University Theatre closes its spring season with the fourth annual Jazz Dance Theatre in Concert Thursday, Friday end Saturday, May 13-15, at 8 p.m. in the Playhouse Theatre. Directed by Jean Sabatine, assistant professor of theatre erts, the company explores the multiple roots and diverse influences that have given shepe to contemporary jazz dance. Dancers will perform to music by such greats as Stan Getz, Herbie Mann, Rick Wakeman, Duke Ellington, Miles Davis, Chubby Checkers, Glenn Miller, The Temptations and others. Ticket reservations may be mede by calling 865-1884.

WPSX highlights

Michael Redgrave stars as a public school teacher forced into early retirement in "The Browning Version" on **Theatre Three** Saturday, May 15, at 9 p.m.

Britfish economist E. F. Schumacher's alternative to industrialization is examined on **Nova** Sunday, May 16, at 8 p.m. His theory — tested in several Third World nations — centers around developing an "intermediate" technology that costs less than total industrialization and uses people more effectively.

"American Ballet Theatre: A Closeup in Time" peys tribute to America's oldest and one of her greatest dance companies Monday, May 17, at 8:30 p.m. The 90-minute **PBS Special of the Week** presentation includes a complete performance of Antony Tudor's "Pillar of Fire," as well as excerpts from "Rodeo," "Swan Lake," "The River" and "Les Sylphides." It also provides glimpses of the company backstage.

The D'Oyly Carte Opera Company presents Its classic rendering of Gilbert and Sullivan's "The Mikado" on **Opera Theater** Tuesday, May 18, at 9 p.m. The City of Birmingham Symphony Orchestra performs the score.

Annuel Pops Concert

The annual Pops Concert by the Penn State Symphonic Wind Ensemble will be performed at 3:30 p.m. Sunday, May 16, in the Arts Courtyard in front of the Arts Bldg. The program will include a variety of popular and light classicel pieces performed by the 40-piece band, directed by Smith Toulson, assistant professor of music. In case of rain, the concert will be performed in the Music Bldg. recital hall.

Staff vacancies

Staff vacancies In this publication generally recelve at least o baccalaureate degree or equivelent as e minimum educational qualification. Staff vacancies requiring less than the baccelaureate degree as well as those announced in the INTERCOM may be found in the Penn State REPORTER. All University employees who are interested in promotion may apply by calling the Employment Division, 865-3867 (network Line 475-1367). Applications for those staff vacancies will be received until 5 p.m., **May 20, 1976. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

ADMINISTRATIVE AIDE, COLLEGE OF HUMAN DEVELOPMENT — University Park

Assist Director In planning and preparing division budget, research miscellaneous fund budgets; monitor and approve expenditure as funds are allocated by Director. Responsible for maintaining divisional personnel information system, student record system, supply dete when needed to Director, faculty development and program planning and development committees. Maintains liaison with Office of Administrative Services, administer academic support functions such as class scheduling, registration, seminars and typing; supervise the clerical support staff. Have knowledge of PSU policies which effect the above actions. Bachelor's degree in business or related area plus over one year of directly related experience In an administretive/supervisory position in an academic setting.

HEALTH PHYSICS ASSISTANT, INTERCOLLEGE RESEARCH PROGRAMS — University Park

Radiation and contamination surveys of radiolsotope laboreiorto, nuclear reactor, and x-ray machines; calibration of radiation detection equipment; analysis of air and water samples for radioactive metrial; survey and delivery of radioactive material shipments; collection and processing of radioactive wesie materiel; operation and maintenance of various types of electronic and mechanical equipment. Bachelor's degree, or equivalent, in physical science, mathematics or engineering. Experience in health physics, chemistry or physics preferred.

SENIOR PROGRAMMER, MANAGEMENT SERVICES — University Park

Responsibility for technicel evelupation of (1) application programming and support facilities, (2) software development, and (3) programming concepts within Dete Base Management Systems and an environment of advanced telecommunications. Scope of responsibilities includes exploretory development and tooling of novel programming aids and techniques, specification of programming test procedures, and the technicel review and performance assessment of development processing systems. Bachelor's degree or equivelent in computer science or related field, plus four to six years of directly related experience. Individual should have a demonstrated ability in (1) developing, testing and evelusting programming innovations; (2) communicating with technicel specialists, and (3) designing software for third generation systems dealing with telecommunications and DBMS applications.

SUPERVISOR, COMPUTER OPERATIONS, UNIVERSITY LIBRARIES — University Park

Training, supervising, scheduling and evaluating progress of input operetors; correcting program machine performance and job control problems; establishing production schedules and reviewing operation manuals; programming. Bachelor's degree in computer science or equivelent plus one to two years of directly related experience.

Promotion and tenure rules sparked most interest, Chairman Small says

Implementation of the new Promotion and Tenure Recommendations was the item that generated most faculty interest during the past year, University Faculty Senate Chairman Sally S. Small told the University-wide Faculty Convocation held May 11.

Reviewing the events of the 1975-76 academic year, Mrs. Small pointed to the increase in faculty participation in University governance.

"Many faculty members are now involved in many ways in the decision-making processes of the University," she said.

"The Chairman, Chairman-Elect and Secretary of the Senate attend and participate in the committee meetings of the Board of Trustees. The Senate Chairman attends and participates in the Board meetings. The Faculty Advisory Committee to the President was established this year. Senate committees are serving in an advisory capacity to all major University officers. The Senate Committee on Committees and Rules has appointed or nominated faculty members to all types of administrative committees. In addition, faculty members are serving on the many academic review and planning committees and in faculty organizations."

This increased faculty involvement is not without its problems, the Senate chairman noted.

"Essentially, there is no reward for this service except that of self-satisfaction," Mrs. Small continued. "For the junior faculty member who carries a full advising, teaching and/or research load and attempts to meet scholarly growth requirements for promotion, the time and effort demanded can be detrimental to personal career development. Few colleges give weight to committee assignments performed for the "good of the University" when evaluating a faculty member for promotion and tenure.

"I realize the importance of individual scholarly growth for the academic health of the University. I also realize the necessity of good committee participation by all types of faculty members. I do not have the solution to that problem, but it is one the faculty must solve if we are to continue to involve young, energetic faculty members with new ideas in the governance of this University."

Mrs. Small, describing the activities of the Faculty Advisory Committee which convened for the first time on Aug. 5, 1975, noted that the group had discussed everything from the University's appropriation request and its security system to shifting enrollment patterns and the heat in Willard Bldg. The committee membership includes the President, the Provost,

(Continued on page four)

Balance, perspective cited by President as key words in convocation address

President Oswald identified "balance" and "perspective" as the key words in his remarks before the annual faculty convocation in University Auditorium on May 11. The event was transmitted simultaneously by telephone to all other campuses in the Penn State system.

In a little over 30 minutes, the President outlined major happenings at the University in the areas of enrollment, governance, program review, finances, accreditation and Bicentennial activities.

He prefaced his remarks with a brief report on his own activities over the past year as president of both the prestigious Association of American Universities and the Pennsylvania Association of Colleges and Universities.

"This has given me a wide view of problems and decisions at a number of institutions quite similar to our own," he said. "I speak today from that vista."

Citing present and future trends in enrollment as a major concern at many universities, Dr. Oswald described the situation at Penn State as "a great dichotomy."

"On the one hand are the real and growing pressures of some of the greatest enrollment increases and shifts that have occurred in the history of this University," he said.

"While on the other hand, we're equally aware of the demographic data that makes it clear that in as short a time as a decade from now, there will be 25 percent fewer high school graduates in our state, and that cannot help but have impact of quite a different type on enrollment here."

He noted that 1975 was the peak year for high school graduates in Pennsylvania, the peak having come earlier here than in some other states.

Drawing upon Englishman Eric Ashby's enrollment triangle — which views enrollment trends as a balance between student pressure for particular programs, the job needs of society, and the intrinsic nature of universities as viewed by academics — Dr. Oswald stressed the need for compromise between these three pressure factors in determining future enrollment plans for Penn State.

"As we look at these three angles for the next decade," he said, "we cannot ignore any of them in making our decisions."

In speaking of University governance, Dr. Oswald advocated a strong role for the faculty in personnel and curriculum decisions.

"A university is fundamentally its faculty and the faculty is fundamentally involved in the university's teaching, its research and its public service. Therefore only the faculty can be the judges of what

(Continued on page four)

PENN STATE intercom

Volume 5, Number 34 May 20, 1976

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Assisting President Oswald in ribbon cutting are, from left, Campus Director Vernon Shockley; Wilford W. Gregory, associate professor of chemistry; student Dawn A. Watkins, and T. D. Wilkinson III, assistant professor of engineering.

Mont Alto dedicates a new laboratory

The new Science-Technology Laboratory at the University's Mont Alto Campus was dedicated in ceremonies conducted at the campus on Friday, May 7.

As part of the dedication, President Oswald spoke at a buffet breakfast attended by approximately 150 persons from the community and campus. Also speaking were Dr. Vernon L. Shockley, Campus director, and Thomas J. MacBride, chairman of the Mont Alto Campus Advisory Board.

Ribbon-cutting ceremonies were followed by tours of the new facility.

The new building, constructed by the General State Authority, has administrative offices, a conference room, exhibition room, faculty offices and a photogrammetry laboratory on the first floor.

The second floor includes two biology laboratories, a 100-student classroom, two biology suites and a suite of offices for the associate degree program in forest technology.

The third floor has chemistry and physics laboratories, classrooms and faculty offices, while the fourth floor houses mechanery.

According to Dr. Shockley, the new offices and laboratories replace those in Science Hall, which was built in 1926 and designed to accommodate 250 students. Enrollment at the Campus is now approximately 900. Science Hall, to be renamed, will become a general studies building.

News in brief

Alumni giving increased

Alumni giving increased about 56 percent during the first ten months of the current academic year as compared to the same period in 1974-75. Donations thus far for 1975-76 total $1,049,654 as compared to $672,440 a year ago.

The greatest increase was registered in deferred gifts, which now total $464,613. Last year at this time the figure was $111,357.

Annual giving from alumni and friends increased 36 percent, from $627,393 to $852,627. The number of gifts rose from 14,057 to 18,153, a 29 percent rise.

Gifts from corporations and businesses were up 25 percent, from $1,203,423 to $1,500,414. However, because of a decline in foundation giving, due in part to the effects of the recent recession on foundation stock portfolios, total giving rose only four percent, from $4,227,505 to $4,413,598.

The total number of gifts received by the University's Office of Gifts and Endowments was up from 14,747 to 19,037, an increase of 29 percent.

Brown F to close May 27

The Brown F parking area at the HUB will be closed to faculty and staff members on Thursday, May 27, because of Delegate Election of Trustees. Vehicles displaying Brown F parking privileges are to be parked in any of the designated open faculty-staff parking areas.

Advisory Boards meet

The Advisory Boards of the University's Hazleton, Wilkes-Barre and Worthington Scranton campuses held their first joint meeting last week at the Wilkes-Barre Campus. Approximately 50 members of the three boards toured the Campus and were hosted at a reception and dinner. Guests at the meeting were Dr. Robert G. Quinn, dean of academic instruction for Commonwealth Campuses; Joseph F. Dougles, associate dean; and Dr. John L. Leathers,

(Continued on page three)

Dr. Larson

Provost receives Wilkinson award

Dr. Russell E. Larson, who joined the faculty in 1944 as assistant professor of horticulture and for the past four years has been provost of the University, has been chosen to receive the 1976 John E. Wilkinson Award for Administrative Excellence.

The $500 award was established in 1970 to be presented annually to an administrator at the University for outstanding achievement in the administrative field. It is made possible by friends of John E. Wilkinson, Bellefonte businessman, in whose honor it is named.

In the recommendation, Dr. Larson was cited for his "dedication, integrity, knowledge of the job, leadership, and his ability to inspire both confidence and excellence."

Dr. Larson, who plans early retirement in January, was named head of the Department of Horticulture in 1952, associate dean of the College of Agriculture and director of Cooperative Extension in 1962, and dean of the College of Agriculture in 1963.

PENN STATE COLLECTION

Faculty notes

Dr. Jessie R. Bernard, who is professor emerita of sociology, has been named the Kurt Lewin Award recipient for 1976 by the Society for the Psychological Study of Social Issues, a division of the American Psychological Association. The award, which is the nation's highest honor in the field of social psychology, is given each year for "outstanding contributions to the development and integration of psychological research and social action." In 1967, **Dr. Muzafer Sherif,** professor emeritus of sociology at Penn State, received the award.

Dr. Bernard retired in 1964 after serving for 18 years as professor of sociology. Since her retirement, she has been a scholar-in-residence for the U.S. Commission on Civil Rights and a visiting fellow at the National Institute of Education. The American Sociological Association recently established the Jessie Bernard Award to be given in recognition of a combination of scholarly and humane contributions by a sociologist. Dr. Bernard is the author or co-author of many books, the most recent of which is "Women, Wives, and Mothers." Others include "Future of Marriage," "Sociology and Community," "Future of Motherhood," "Women in the Public Interest," "The Sex Game" and "Academic Women."

Dr. J. D. Hammond, professor of business administration, was honored as a Distinguished Alumnus of Northwest Missouri State University, Maryville, Mo., during that institution's spring commencement exercises. A 1955 graduate of the Missouri school, Dr. Hammond joined the Penn State faculty in 1964. He is recognized for his contributions to the field of insurance and is the author of "Essentials of Life Insurance." He has served as president of the American Risk and Insurance Association as well as assistant editor of the "Journal of Risk and Insurance." A former faculty member at Ohio State and Penn, where he received his doctorate, Dr. Hammond was honored by his alma mater for "contributions to the field of education."

"Scindapsus Dyptich," an intaglio print by **Paul Harcharik,** instructor of art, has received an award in the 53rd Annual Spring Show at the Erie Art Center. The same print was accepted for exhibition in the Tenth Dulin National Print and Drawing Competition at Dulin Gallery, Knoxville, Tenn. Mr. Harcharik's "Five Toothpaste Tubes" is on view in the 10th Annual National Drawing and Small Sculpture Show at Del Mar College, Corpus Christi, Tex., and his "Configuration #2", was accepted for the Pennsylvania Printmakers Invitational at Lehigh University, Bethlehem, Pa.

Joseph J. Seltzer, instructor in business at the Beaver Campus, was awarded Best-of-the-Show in the Eleventh Annual Spring Art Exhibit. His sculpture, "Circles, Circles," was chosen from the exhibit's 472 art pieces. The prize-winning art works are on display through June 1 in the Campus Library Gallery.

Dr. **Ronald Abler,** associate professor of geography, presented an invited paper, "The Telephone and the Evolution of the American Metropolitan System," at a Massachusetts institute of Technology seminar marking the centennial of the invention of the telephone. He also delivered the paper at a session on the social impact of the telephone at a Conference on Telecommunications Policy in Airlie, Va. A second paper, describing the production of "A Comparative Atlas of America's Great Cities," a forthcoming work of which Dr. Abler is editor, was given by Dr. Abler at a Workshop on Automated Cartography sponsored by the National Center for Health Statistics.

Dr. **Ned C. Dellhi,** professor of music education, has been named director of the Penn State Blue Band, effective July 1. He has been serving as acting director of the Band since the death of Dr. James W. Dunlop last August and prior to that had served with Dr. Dunlop for 12 years as associate director. As director, he will have responsibility for the Marching Blue Band of 170 pieces and also for the Concert Blue Band of 95 members.

Dr. Delhi received his B.M.E. from Indiana University at Bloomington, Ind., his M.M. from the University of Michigan and a D.Ed. at Penn State.

Dr. Daniel R. Frankl, professor of physics, will present colloquiums next month at Battelle Institute, Columbus, O., and at Bell Telephone Laboratories, Murray Hill, N.J. His topic is "Diffraction and Selective Adsorption of Atomic Beams on Solid Surfaces." Dr. Frankl is co-author of a paper to be presented by **Michael P. Live,** a doctoral candidate in physics, at the 36th Conference on Physical Electronics, Madison, Wisc., June 7-9. That paper is titled, "Helium Atomic Beam Scattering from Clean (001) Surfaces of NaF."

Two papers by University biochemists will be presented at the American Society of Biological Chemists meeting in San Francisco, June 6-10. **Nancy A. Schroedl,** a doctoral candidate in biochemistry, and Dr. **Charles R. Hartzell,** assistant professor of biochemistry, will present a paper titled, "Intramolecular Electron Distribution in Cytochrome aa$_3$ as a Function of Reductant and Gaseous Substrate." **Linda J. Strong,** doctoral candidate in biochemistry, Dr. Hartzell, and Dr. **Richard L. McCarl,** professor of biochemistry, are the authors of the other paper, "Inhibition of Cyclic AMP Phosphodiesterase by Halothane and Diethyl Ether."

Jey C. Sheely, a graduate student in horticulture at the University, has been named a research assistant in horticulture. He holds a B.S. in biology from Elizabethtown College.

Dr. **Catherine Albanese,** associate professor of religion at Wright State University, Dayton, O., has been appointed visiting associate professor of religious studies for the coming academic year. She holds a B.A. from Chestnut Hill College, and an M.A. from Duquesne University. Her doctorate was granted by the University of Chicago, where she specialized in the religious thought of American transcendentalists.

Pat Sharpe, part-time assistant professor in general education in the College of the Liberel Arts, has been awarded a Fulbright-Heys grant to teach American literature at the University of the Punjab in Lahore, Pakistan, during the 1976-77 academic year. She has also received a research grant from the American Institute of Pakistan Studies to study women writers in Urdu during the summer of 1977. A graduate of Douglass College, she has an M.A. in English literature from Penn and a Ph.D. in American literature from Penn State.

Dr. **Gerald I. Susman,** associate professor of management science and organizational behavior, is the author of a new book which reappraises the assumptions underlying the way work is designed in advanced industrial societies and the role of the worker in the production process. The book, "Autonomy at Work: A Sociotechnical Analysis of Participative Management," is published by Praeger Publishers, Inc.

The study offers a comprehensive treatment of the "sociotechnical" approach to improving the quality of working life and builds on theory and research based on this approach, which began nearly 30 years ago at the Tavistock Institute of Human Relations in London. Dr. Susman argues that improving the quality of work means increasing productivity as well as opportunities for greater use of skills, continuous learning and meaningful engagement in work- and community-related activities.

In the forward to the book, Eric L. Trist, a founding member of the Tavistock Institute and current head of the Management and Behavioral Science Center at the University of Pennsylvenia's Wharton School of Business, comments that until the publication of Dr. Susman's book, the field lacked en overall conceptual account.

Dr. **Robert Stefanko,** professor of mining engineering and assistant dean for continuing education in the College of Earth and Mineral Sciences, was one of 14 experts in mineral production end energy needs from across the nation invited to present papers last week at a White House Conference on U.S. Energy and Mineral Supplies: Meeting National Needs. His topic at the conference, which was planned by the American Institute of Mining, Metallurgical, and Petroleum Engineers, was "Manpower Requirements." Dr. Stefanko was also recently appointed to a new 16-member committee set up to advise the Secretary of the Interior on coal mine safety research priorities.

Dr. Douglas E. MacDonald, assistant professor of engineering mechanics, has been appointed e Fellow to participate in a cooperative research and study program at the NASA Langley Research Center, Hampton, Va., from June 7 to Aug. 13. The host institution of the Aeronautics and Space Research program is Old Dominion University, Norfolk, Va. He will do research in the area of ultrasonic investigetion of metal fatigue.

Dr. L. N. Mulay, professor of solid state science, has been invited to be on the organizing and program committees of the Second International Conference on Amorphous Magnetism to be held Aug. 25-27 at the Rennseleer Polytechnic Institute, Troy N.Y. Prof. Mulay will present an invited paper on the magnetic properties of metal and metal oxide dispersions and will chair a session at the conference.

Dr. Philip L. Taylor, assistant professor of psychosocial science and social science at Capitol Campus, recently was elected president-elect of the Division of Community Psychology of the Pennsylvania Psychological Association (PPA). Dr. Taylor is a Harvard graduate with a Ph.D. in community psychology from New York University. He was director of research at New York Community Training Institute, Inc., a part of the New York City anti-poverty program, and director of criminology at the Criminal Justice Evaluation Project of the Mayor's Office of the City of New York.

Dr. William E. Mettis Jr., assistant professor of engineering, Delaware County Campus, recently presented a paper entitled, "Modeling and Minimum Energy Control of Traction Motor Systems," at the Seventh Annual Conference on Modeling and Simulation, at the University of Pittsburgh. Dr. Mattis also presented a paper, "Minimum Energy Control of a System With a Nonlinearity Using Functional Analysis," at the 1976 Conference on Information Sciences and Systems at Johns Hopkins University.

Dr. S. M. Farouq-Ali, professor of petroleum and natural gas engineering, recently presented a paper, "Development of Petroleum Engineering Research in Saudi Arabia," at a conference on science and technology at the University of Riyadh in Saudi Arabia. He also gave a paper on "Finite Analysis of Temperatures and Stresses Induced by Hot Water Injection" at a meeting of the European Society of Petroleum Engineers in Amsterdam, Netherlands.

Dr. H. R. Hardy Jr., professor of mining engineering and director of the University's Rock Mechanics Laboratory, recently presented two papers at the American Gas Association Transmission Conference in Las Vegas. Entitled "Microseismic Monitoring of Gas Reservoirs" and "Salt Cavity Design and Performance," the papers reviewed research currently being done at the University on the underground storage of natural gas.

Dr. E. Willard Miller, associate dean of resident Instruction of the College of Earth and Mineral Sciences, received the Special Award for service to the Pennsylvania Academy of Science at the Academy's annual meeting held at Shippensburg State College.

Dr. **D. W. Ricker,** research associate at ARL, is the author of a paper, "A Nonlinear Feedback System for the Normalization of Active Sonar Returns," which appeared in the February issue of the "Journal of the Acoustical Society of America."

Dr. William M. Smith Jr., professor of rural sociology, participated in a Fulbright-Heys Conference at Brown University May 8. The Board of Foreign Scholars and the Fulbright-Hays programs are holding ten regional conferences on the theme of "International Education." Dr. Smith received a Fulbright award in 1964-65 to The Agricultural University of The Netherlands. During 1973-74, under a "Distinguished Foreign Professor" Fellowship awarded by the same University, he conducted research in a traditional Dutch farming community.

Dr. Martin W. Sharp, assistant professor of education at the Delaware County Campus, is one of eight academics from across the country to be selected as participant in the Scholar-Diplomat Program on South Asia, sponsored by the U.S. Department of State. Dr. Sharp spent seven days in Washington during the first week of May attending briefings at the Department of State, the White House and the United States Information Agency.

During 1976-77, he will return to Washington to complete various assignments dealing with educational and cultural affairs between the Department of State and other executive-sponsored agencies. In return, speakers from the Department of State will visit the University at both the Delaware County and University Park campuses. A graduate of Glassboro, N.J., State College with a B.S. and M.A. in education, Dr. Sharp received his D.Ed. in secondary education at Penn State.

Dr. Herschel W. Liebowitz, professor of psychology, has been elected to membership in the Society of Experimental Psychologists. The group, which was chartered in 1929, consists of approximately 120 members and fellows, and only five new members are elected each year. **Dr. Charles N. Cofer,** professor of psychology, was the first Penn Stater elected to the society. He was chosen in 1966

"The Emerging Role of Local Governments" was the keynote topic for the Spring Convention of the Northampton County Association of Township Officials presented by **Guy Temple,** associate professor of agricultural extension. Mr. Temple also chaired a workshop session comprising four topics — Money Management, Home Rule Government, Federal and State Programs and Regional Municipal Associations.

Dorothy V. Harris, professor of physical education, participeted in a Conference on Athletic Discrimination sponsored by The DePaul Women's Law Caucus, DePaul University College of Law, last month in Chicago. The conference was the first of its kind structured to deal with legal aspects of discrimination against females in sports.

Education helps four Scholars

Contributions collected from College of Education faculty members are being used to support four education students, each of whom has been awarded a $750 Renaissance scholarship for 1976-77.

All Renaissance Scholars have the financial need certified to extreme by the College Scholarship Service. In the case of one of the education awardees, a sophomore in elementary education at a Commonwealth Campus, medical problems have compelled the student to seek aid. However, they have not affected her grade point average, which is 3.88.

The goal of the Renaissance Fund, according to its charter, is to provide aid to the financially neediest of the academically able.

A second education Scholar needs funds to supplement her retired father's income as she prepares to become a remedial reading teacher. A third seeks a degree in home economics education but needs support since she is one of two college-enrolled children in her family. The fourth Scholar will be a freshman next fall at University Park and is working as a dishwasher and kitchen helper to earn some of his expenses.

The College of Education faculty is the first in the University to select and support Renaissance Scholars, and they are currently raising funds to help a fifth one.

A. M. Wellington, professor of counselor education and director of the Renaissance Scholars program, will be happy to work with faculties of any other Colleges interested in selecting and supporting Scholars in whom they have a special academic interest.

Left to right: Mr. Romig, Dr. Hughes, Dr. Volz, and Mr. Brownlee.

Left to right: Mr. Romig, Mr. Anderson, Mr. Kjelgaard, Dr. Klaus, Mr. Lai, and Mr. Custard.

Left to right: Mr. Romig, Dr. Keith, Dr. Snipes, and Dr. Cunningham.

Invention incentive awards presented

Invention incentive awards, totalling $700, have been presented to 12 faculty and staff members at the University by the Pennsylvania Research Corp. under a policy that provides $200 to the inventors for each invention accepted for patenting.

The payments, authorized at the time of the filing of the first patent application, were made in checks presented by John L. Romig of Kennett Square, president of The Pennsylvania Research Corp. and a trustee of the University.

Three of the awards were for heart-related projects. They went to Robert R. Brownlee, staff systems engineer in the Department of Electrical Engineering and Dr. G. Frank O. Tyers, associate professor of surgery at The Milton S. Hershey Medical Center, for the ventricular programmed pacemaker; to Dr. Tyers, Mr. Brownlee, and Dr. Carl Volz, professor emeritus of electrical engineering, for the rechargeable cardiac pacemaker; and to Dr. Howard C. Hughes Jr., assistant professor of comparative medicine and research associate in surgery, also at Hershey, for the pacemaker electrode system.

A vapor deposited lubricant for metal casting brought checks to Dr. E. Erwin Klaus, professor of chemical engineering; and C. W. Lai, a former graduate student with Dr. Klaus.

William L. Kjelgaard and Paul M. Anderson, both associate professors of agricultural engineering, received awards for development of equipment and application methods for cold liquid ammonia as a low cost source of non-protein nitrogen in livestock feeds and possibly to reduce fuel requirements for applying ammonia to the soil.

Dr. Norman C. Deno, professor of chemistry, and Dr. Harry J. Spinelli, who worked with Dr. Deno as a graduate student, received an award for their work on the photochlorination of alkanols; while Dr. Alex Keith, associate professor of biophysics, and Dr. Wallace C. Snipes, professor of biophysics, shared an award for their research on a butylated hydroxytoluene antiviral agent.

Disclosures leading to the patent applications were handled through the University patent counsel, Robert F. Custard, in the office of Dr. Richard G. Cunningham, vice-president for research and graduate studies.

News briefs

(Continued from page one)

administrative director for Commonwealth Campuses.

Dean Quinn spoke to the group concerning Penn State's unique Commonwealth Campus system and the special contributions made by the Advisory Boards in the development of the system. He also discussed future opportunities for expanded services and interaction.

Plans are being made to have joint meetings at the other campuses in the future.

Summer Social Security benefits

University employees age 62 or older who will not be working during the summer months may qualify for social security benefits for one or more of the summer months, provided certain conditions are met. A provision of the Federal Social Security Act covers faculty and staff members whose contracts do not require service during the summer term or other employees placed on summer layoff. An employee does not have to be retired to qualify and may still be receiving salary payments. All employees age 62 and over who will not be working during the summer may wish to contact their nearest Social Security office to determine whether or not they qualify.

Fayette celebrates 10th year

President Oswald spoke at a luncheon Saturday, May 15, honoring founders and donors to the University's Fayette Campus in Uniontown in conjunction with the tenth anniversary of the Campus. Also speaking at the luncheon were Kenneth L. Holderman, vice president emeritus of Commonwealth Campuses and a University trustee, and James M. Driscoll, chairmen of the Fayette Campus Advisory Board. Special recognition was made to O. E. Eberly, who played a key role in establishment of the Campus. The Fayette County Commissioners proclaimed May as the Tenth Anniversary Month of the Fayette Campus "in recognition of the contributions of the Campus to the community."

INTERCOM schedule

INTERCOM will not be published during term break on May 27 or June 3. A summer term calendar will appear in the issue of June 10, and items for it should be sent to the Calendar Editor, 312 Old Main, by Friday, May 28.

Library assignments

Members of the faculty who wish to obtain "Study Space Assignments" in Pattee Library for the summer term should note that the assignments will be made on a first-come, first served basis Tuesday, June 1, beginning at 7:45 a.m. in Room 106 Central Pattee. There are only 45 such spaces. Further questions should be directed to Cordelia Swinton, 865-5420.

Chapel speakers sought

The Office of Religious Affairs is now accepting nominations for Chapel speakers for 1976-77. Interested persons are invited to nominate speakers whom they would like to hear and whom they believe would project perspectives of meaning and value for members of the University community. Please send the nominee's name, current address and any background information to Charles L. Coleman, Program Director, 110 Elsenhower Chapel. For further information, please call 865-6546.

Commencement rain schedule

Spring Term commencement exercises at University Park will be held at 10:30 a.m. Saturday, May 29, in Beaver Stadium with 5,000 students scheduled to receive degrees.

Speaker for the program will be Sareh Caldwell, artistic director of the Opera Company of Boston.

President Oswald will preside at the exercises and will be assisted in conferring the degrees by William K. Ulerich, president of the Board of Trustees.

In order to speed the movement of traffic, University Dr. and Park Ave. will be one-way streets, starting at 9:30 a.m. with traffic moving toward the stadium.

In the event of an all-day rain, a decision will be made at 7:30 a.m. as to whether to hold exercises at Beaver Stadium or at five different indoor locations.

The rain schedule calls for 10:30 a.m. exercises as follows: Liberal Arts, Human Development and Arts and Architecture in Recreation Bldg.; Education in University Auditorium; and master's and doctor's candidates from the Graduate School in Schwab Auditorium.

The afternoon commencements, scheduled for 2 p.m., will be held in Recreation Bldg. for Engineering, Science and Business Administration graduates; and in University Auditorium for Earth and Mineral Sciences, Health, Physical Education and Recreation, and Agriculture graduates.

Vacationers: check on home security

During last winter's Christmas break, State College was visited by a group of prison escapees from Philadelphia, and a number of homes in the area were burglarized.

The burglars were apprehended, but with vacation season again at hand, persons planning to leave town might do well to take some precautions, according to David E. Stormer, director of University Safety.

"Burglars always try to get in the easiest way first," Mr. Stormer points out, "and an open garage door is their favorite place. One of the easiest doors to force in many homes is the sliding glass patio variety. A wooden dowel laid in the track, or, better still, a special lock to prevent the door from being forced from the outside can forestall such attempts."

Good working locks in any house or apartment are a necessity, and deadbolt locks are the best kind, although Mr. Stormer cautions against using deadbolt locks keyed from both outside and inside. In case of fire, they could be responsible for trapping you in the house.

There are deadbolt locks and deadbolt locks, however. The length of the deadbolt is important; shorter ones are easier to force. Brass deadbolts can be cut with a hacksaw. The best locks have a hardened steel bearing in the middle of the bolt so anyone trying to saw through it finds the hacksaw riding — indefinitely — on a rolling bearing.

Mr. Stormer recommends having a safe-room somewhere in the house. By this he means an interior closet with a solid core door and a good deadbolt lock. Such a closet will be a lot safer if it's set in a plaster wall rather than in dry wall construction. In the latter instance, it should be sheeted inside with plywood paneling.

Leaving outdoor lights on may also help discourage thieves.

"I know several cases where neighbors have gone together and installed a street lamp at the junction of their back lots," Mr. Stormer says. "It probably is helpful in moving illegal activities to some other area!"

If you are using a timing device to activate lights, a radio or television in your absence, use more than one so lights go on and off realistically in various parts of the house at different times.

Be sure to tell your neighbors when you're leaving town. That way if they see a delivery truck or van parked by your house, they'll know something is wrong. (Burglars have been known to pull up to an unoccupied house and cart away entruckload of valuables.)

"Notify the police if you plan to be gone," Mr Stormer adds. "In State College, for example, police will stop by and check your house for you."

Other precautions include canceling the newspaper and dairy deliveries and not allowing mail to accumulate. The Post Office will hold mail if you fill out a form specifying when you plan to leave and when you will return.

Carry enough insurance to protect you in case something does happen, Mr. Stormer concludes, and know what you have. Valuables should be inventoried.

"Locally, there are not a lot of things 'fenced'," he notes. "Most burglars are amateurs, and they put what they've stolen to immediate use or sell it to another individual. Goods that are 'fenced' are taken to cities like Pittsburgh or Philadelphia, so it is important that you have a record of the serial numbers on your belongings to give police a better chance to recover them for you."

Social exchange study

Leading sociologists and psychologists from throughout the country will take part in a three-day Conference on Human and Family Development May 26-28 in Keller Bldg. University faculty and students are welcome to attend.

The conference, a Continuing Education service of the College of Human Development, will examine "Social Exchange in Developing Relationships."

It is designed to provide the foundations for examining the development and deterioration of social relationships.

President's talk

(Continued from page one)

Is a good course or a good curriculum. Similarly they have a tremendous stake in who their colleagues are going to be. They have no choice as to whether they play a role in the decisions made in these areas — they must play a role."

The President again urged balance in determining governance proceedings for the University and noted that the tast of these procedures will be presented on July 1, dealing with review procedures for academic administrative offices.

A major portion of Dr. Oswald's remarks were directed at program review, which is now underway throughout the University.

He reported that the project is progressing on schedule, with 48 of 110 undergraduate and 22 of 126 graduate program reviews already completed and the remainder to be executed by 1980.

"I know that there has been concern within the faculty about program review and the time that it takes," he observed, "but no other group could perform this vital function."

In responding to the concern over the intention of the reviews, the President noted: "Program review was basically conceived as, and still is, a qualitative inventory of our academic offerings at this University. It was not initiated with the intention of using it as a meet cleaver-budget cutting device."

But he acknowledged a potential connection between program review findings and curriculum decisions in the next decade in light of dwindling educational funding.

"In the next decade, new kinds of departments and courses will have to be created as new knowledge emerges and is looked at in new ways. In the past we have been able to create these offerings with the monies that come with growth, but we clearly won't have that kind of luxury in the years ahead," the President pointed out.

"I am being very direct with you on this. If we get into the position of having to develop new programs, and we will, we will have to make some judgments about existing programs and at some point we will probably have to drop some programs.

"This won't happen next year or the year after. But looking ahead farther, I think that the program review documents we're undertaking now will help us make those hard decisions."

In a fourth major area of reporting, Dr. Oswald outlined the University's financial picture for fiscal 1976.

Penn State initially requested a state appropriation of $116 million. The University later reduced its request to $114 million and the Governor recommended $104 million.

"There's a $10 million gap," the President explained, "and we don't expect to cover it all by tuition. But there will have to be some tuition increase.

"There is no question that we are going to provide a competitive salary increment for University employees. We may wish it could be a little higher, but we have to balance this priority with an equal priority to keep our tuition level from getting too high. I'm going to recommend to the Board of Trustees the best possible balance we can achieve."

The President added that the University hopes to act on its budget at the next trustee meeting scheduled for May 28.

There was a mood of optimism in Dr. Oswald's report on the recent accreditation visit by a Middle States evaluation team.

A final report has not been issued by the team but, according to the President, "I can report to you on the exit interview which I thought was most interesting and most encouraging."

He noted that this accreditation posed a particular problem for the evaluators because of the University's multi-campus system.

"First they had to decide whether they were going to try to accredit one campus or 22 campuses," he explained.

"Again it's a question of balance between the unity of the University on the one hand and the recognition, on the other hand, that each campus is different and does have its special problems."

Harkening back to the old story of the aerodynamically unsound bumble bee, the President reported that one of the evaluators had confided to him in leaving. "From the looks of it (the Penn State system), we don't see how it can fly, but it does."

Dr. Oswald ended the convocation address with praise for the University Bicentennial Commission and its major offerings to date — "Be Glad Then America," the Penn State Press book "Pennsylvania 1776," the current exhibit of American portraits at the Museum of Art, and the Freedom: Then, Now and Tomorrow project which is sponsoring forums and town meetings across the state.

Staff vacancies

Staff vacancies in this publication generally require at least a baccalaureate degree or equivalent as a minimum educational qualification. Staff vacancies requiring less than the baccalaureate degree as well as those announced in the INTERCOM may be found in the Penn State REPORTER. All University employees who are interested in promotion may apply by calling the Employment Division, 865-1367 (network Line 475-1367). Applications for these staff vacancies will be received until 5 p.m., **May 27, 1976. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

ASSISTANT TO CONTRACT NEGOTIATOR AND COORDINATOR, VICE PRESIDENT FOR RESEARCH — University Park

Directly responsible to the Contract Negotiator and Coordinator, with the primary responsibility at the central administrative level for the internal processing of proposals seeking sponsorship, of research, training, and continuing education projects and to supervise others in the office who have similar duties. This entails gaining and maintaining a working knowledge of the rules and requirements of various federal agencies and of university policy and procedures in the area of proposals and related activities. A secondary responsibility is to assist with the negotiation of grants and contracts. As a minimum, applicants should be a college graduate with accounting training, plus three to five years of related experience, preferably in the handling of proposals, contracts and grants.

TECHNICAL SUPERVISOR, COLLEGE OF ARTS & ARCHITECTURE — University Park

Responsible to the Production Coordinator of Department of Theatre and Film for providing supervision of University Theatre Productions in the areas of scenic construction, drafting, properties and scenic painting. In addition, the candidate will supervise and train the student production crews entrusted with the execution of the above areas. Bachelor's degree in fine arts or equivalent, plus a minimum of two years of directly related experience in either an academic or professional scenic studio is required.

SCIENTIFIC INFORMATION OFFICER, PUBLIC INFORMATION AND RELATIONS — University Park

Responsible to the Director of Public Information and Relations for providing newspapers, magazines, radio and television with story information as it relates to research efforts at the University. Bachelor's degree in a science or in a writing or communications field, including a familiarity with the sciences and an understanding of the terminology. Ability to interpret the research field and at least three years of science writing experience at another university or with a newspaper or magazine.

WRITER, PUBLIC INFORMATION AND RELATIONS — University Park

Responsible to Head Informal Communications for effectively covering a variety of writing assignments for Intercom, the Reporter, and Faces of Penn State, and, also, in cooperation with the News Bureau, cover one or two schools on a "beat" basis. Bachelor's degree in journalism or liberal arts, with two years of experience on newspapers or magazines in writing positions. Must have a specialized knowledge of the communications media and how they function, the ability to write well, fast and accurately. An interest in educational programs is desired.

COLLEGE HEALTH NURSE — STUDENT AFFAIRS — Ritenour Health Center

Responsible to Head, College Health Nurse, Inpatient and Emergency Room, for providing nursing service in the In-Patient Service Area and for the Emergency Room and assisting licensed physician and dentist in patient care. Hours are 12 midnight to 8 a.m. Graduate from an accredited nursing program or its equivalent and current licensure in Pennsylvania as a registered nurse, plus 12 to 18 months of directly related experience.

ASSISTANT ACCOUNTANT, CONTROLLER'S OFFICE — University Park

Responsible to the Director of Accounting and to assigned accounting personnel for assistance in a wide variety of duties, working toward the overall goal of obtaining well rounded accounting experience in all areas assigned within the Office of the Controller. Bachelor's degree or equivalent, preferably in accounting. Must have had over three months of directly related experience

GENERAL ACCOUNTANT — Hershey Medical Center

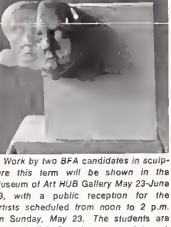
Responsible to Assistant Manager of Fiscal Affairs for the supervision and preparation of various accounting and financial reports pertaining to hospital fiscal matters. Bachelor's degree in accounting or equivalency, plus one to two years of directly related experience.

HUB to serve over break

Friday, May 21, will be the last day for complete food service at the HUB Tartaca Room until Sunday, June 6. The cafetaria will be open for lunch, howavar, during term break, May 24-28 and June 1-4. There will be no food service of any kind on May 22 and 23 and on May 29, 30 and 31.

Calendar

University schedule



Thursday-Saturday, May 20-22
Final Examinations.
Saturday, May 29
Commencement.

Seminars

Friday, May 21
Aerospace Engineering, 4 p.m., Room 232 Hammond. Dr. Mohamed Gad-el-Hek, Visiting Professor, University of Virginia, on "Dispersion Measurements at a Smoke Source in an Isotropic Turbulent Flow Field."
Monday, May 24
Organic Chemistry, 8 p.m., Room 333 Whitmore. P. Chinnasamy on "The Ene Reaction."
Tuesday, May 25
ARL, 10:45 a.m., Eric A. Walker Conference Room, Applied Science Bldg. M. W. Lengyel on "Past Problems, Present Requirements and Future Trends in Recording."
Wednesday, May 26
Agronomy, 3 p.m., Room 301-B Ag. Admin. Dr. P. F. Low, professor of soil chemistry, Purdue, on "The Nature and Properties of Water in Clay Systems."

Exhibits

Museum of Art: Portraits USA. 1776/1976.
Zoller Gallery: End-of-Year Student Exhibition.
Kern Gallery: Bruce Johnson, watercolors, until May 22. First Annual Graduate Commons Sculpture Invitational.
HUB Gallery: Works by two BFA candidates, until June 23. **HUB First Floor:** Retrospective exhibit of work by French architect Auguste Perret. **HUB Main Lounge:** Suiting Everyone, through May.
Chambers Gallery: Undergraduate Student Exhibition, all medie.
Pattee Library: Lending Services Lobby, drawings by Neil Feather.
Hammond Gallery: Building — U.S.A. Architectural engineering student exhibits.

Work by two BFA candidates in sculpture this term will be shown in the Museum of Art HUB Gallery May 23-June 13, with a public reception for the artists scheduled from noon to 2 p.m. on Sunday, May 23. The students are Micheal Flick, Downingtown, and Joseph Schiavo, Philadelphia. Above: Mr. Schiavo's 24-inch plester "Relationship 22."

Evening course sign up June 7, 8

Summer term registration will be held Monday and Tuesday, June 7 and 8, for Penn State's evening credit courses for part-time students.

Registration personnel and counselors will be on hand in Keller Bldg. from 9 a.m. to 9 p.m. on June 7 and from 9 a.m. to 5 p.m. on June 8. Classes begin June 9.

Most of the courses offered carry three undergraduate credits and meet two evenings each week for two hours. The credits may be applied toward a baccalaureate degree when the student has been admitted to the University as a degree candidate, or used to fulfill professional certification requirements.

High school graduates or those with equivalent diplomas may register for undergraduate or associate degree courses providing course prarequisites have been mat. Advanced credit courses are open to graduate students and others who have successfully completed at least 60 college credits.

Those interested may obtain a brochure listing all courses, credits, meeting dates, times and places, along with detailed registration information, by contacting Continuing Education, Room 309 Shields Bldg., 865-3443.

Senate review

(Continued from page one)

the four Senate officers and three faculty members elected by the Senate.

Referring to the Senate's Promotion and Tenure Recommendations, Mrs. Small explained that they "attempted to assure that each faculty member would receive a fair evaluation by peers as well as by administrators; that each would be informed annually of the assigned responsibilities in teaching, research and/or scholarly activity and would be evaluated on the basis of those responsibilities; that student evaluations would be considered for the teaching faculty, and that each faculty member would be apprised of the results of the evaluations and provided with guidance for improvement of performance."

Although there were many complaints about the policy initially, Mrs. Small said she believed they developed largely through a lack of understanding caused by the rush to get the review process underway.

"The Faculty Affairs Committee of the Senate is monitoring the effects of the implementation and is collecting criticisms and suggestions for improvement," she commented. "Steps have been taken to recommend and prepare any recommendations for change when appropriate.

"More detailed guidelines will ultimately be needed. Feedback mechanisms reportedly have not worked properly. A time table and flow chart for information back to the faculty member is just as important as the one for forwarding reviews. The consultation between the faculty member and the academic administrator completes the evaluation process and is where real faculty improvement occurs."

For the future, Mrs. Small suggested that the Senate should "develop recommendations for piloting new course and program proposals through the labyrinths of campus, departmental, college, Senate and administrative committees. There are many throughout the University who spend months or even years developing a bright new idea, only to loose it in the maze."

She also recommended a peer review policy to evaluate faculty members not on the tenure track and for faculty teaching on a a part-time basis.

And she concluded:

"Effects of future budget constraints should be carefully monitored by the Senate to ensure that necessary research and instruction programs are adequately maintained.

"However, the most important function of the Senate is to provide a balanced representative body to deal with matters to ensure academic excellence in teaching and research at The Pennsylvania State University and also ensures that the University continues to respond to the educational needs of the Commonwealth. This can best be accomplished with the continued support and cooperation of the University administration."

Pool schedule

The Outdoor Pool schedule for the 1976 season is as follows:

May 28 — 12 noon to 5 p.m., depending on weather.

May 23 — 10 30 a.m. to 6 p.m., open to all University students, faculty and staff and their families on a daily basis.

June 6 — 10:30 a.m. to 8 p.m.

Aug. 20 — 10:30 a.m. to 6 p.m., open after 6 p.m., weather permitting.

Sept. 1 — 12 noon to 6 p.m.

Oct. 1 — pool closes officially. May be open on a temporary basis beyond this date depending on the weather.

All University faculty, staff and students are considered members of the Outdoor Pool, which is available for their use on the following basis:

1. Admission: 50 cents per person daily or member may purchase a "special rate" swim ticket. The cost of this ticket is $5 for 15 swims.

2. A member must present an I.D. card upon request.

3. A member must accompany guests and be responsible for them.

4. Guest fee is 50 cents per person daily.

5. All guests must be college age, except when pool is open for members and their families.

6. All University family children under 18 years of age must be accompanied by an adult parent or guardian, who must remain with them.

The Outdoor Pool is heated.

PENN STATE
intercom
Volume 5, Number 36 June 10, 1976

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Senate elects new officers

John J. Coyle, professor and head of the Department of Business Logistics, has assumed the chairmanship of the University Faculty Senate.

Thomas E. Daubert, professor of chemical engineering, has been elected chairman-elect, and Lee W. Saperstein, associate professor of mining engineering, has been elected secretary.

Dr. Coyle

Dr. Daubert

Other election results, announced at the June 1 Senate meeting are:

Guy E. Rindone, Faculty Advisory Committee, Alfred J. Engel, Robert W. Frank and James M. Beattie, Faculty Rights and Responsibilities Committee, with John A. Lucas, Carol-Lynne Schengrund and Henry J. Hermanowicz as alternates.

Arthur J. Marsicano, Arthur O. Lewis Jr. and P. Peter Rebane were elected to the Promotion and Tenure Review Committee. Ernest L. Bergman was elected to a two-year term on the Standing Joint Committee on Tenure, with Evelyn A. Hovanec as alternate, while Roy C. Buck was elected to a one-year term, with William Rabinowitz as alternate.

Dr. Saperstein

Dr. Coyle succeeds Sally S. Small, Berks Campus librarian, as Senate chairman. In accepting the gavel, he urged the Senators to think about issues in the coming year, identify the most critical ones and come up with some solutions.

"I think it's quite important for us not to spend so much time being reactive, but to identify major issues and try to solve the problems which are presented," he said.

The Senate adopted a policy placing definitions to each letter grade and changing the C grade designation from "fair" to "satisfactory."

In other business the Senate:

—Received an informational report on distribution of grades by college and campus from 1973 to 1975. Noting the report indicated a halt in a tendency toward grade inflation, George W. Franz, chairman of the Subcommittee on Grading, said a wide divergence is seen among the colleges and campuses. "This is one area to which we will have to address ourselves in the future," he said.

Summer arts set

Nittany Mountain Summer 1976 will feature the Grimethorpe Colliery Band of Great Britain as a Bicentennial event in the third annual summer celebration of the visual and performing arts June 24-Aug 7 at the University.

The band will perform a concert of light classical music at 8 p.m. Sunday, July 11, in University Auditorium. The Penn State appearance is being supported by the Institute for the Arts and Humanistic Studies.

Another new feature of this year's Nittany Mountain Summer will be a joint reception

(Continued on page three)

175 faculty are promoted

Promotions have been announced for 175 Penn State faculty members. The promotions, effective July 1, are

TO PROFESSOR:

Dr. James B. Anderson, chemistry;

Walter L. Baker, engineering research, (Applied Research Laboratory);

Dr. Frederick Y. Borden, forest resources;

Dr. J. David Boyle, music education;

Dr. Emil J. Burcik, petroleum and natural gas engineering;

Dr. Lester A. Burdette, animal science extension;

Dr. Napoleon A. Chagnon, anthropology;

Dr. Parris H. Chang, political science;

Dr. K. Danner Clouser, humanities (Hershey);

Dr. Paul Edmonston, art education;

Dr. Howard Grotch, physics;

Dr. Kyong T. Hahn, mathematics;

Dr. Chiko Haramaki, ornamental horticulture;

Dr. Sabih I. Hayek, engineering mechanics;

Dr. George Heitmann, management science,

Dr. Samson T. Jacob, pharmacology (Hershey);

Dr. Donald G. James, mathematics;

Dr. Henry C. Johnson, Jr., education;

Dr. Alex D. Keith, biophysics;

Dr. Edward Keynes, political science;

Dr. Edward H. Klevans, nuclear engineering;

Dr. Gerald D. Kuhn, food science;

Dr. Gerard Lallement, mathematics;

Dr. Donald Langmuir, geochemistry;

Dr. Robert D. Lee Jr., public administration,

Dr. Leon F. Lyday, III, Spanish;

Dr. Lowell L. Manfull, theatre arts;

Dr. George J. McMurtry, electrical engineering;

Rex E. Melton, forestry;

Dr. James R. Neely, physiology (Hershey);

Patricia M. Overdeer, mathematics (Ogontz);

Dr. Gary W. Petersen, soil genesis and morphology;

Dr. Howard W. Pickering, metallurgy;

Dr. James D. Rodgers, economics,

Dr. Matthew Rosenshine, industrial engineering;

Dr. Mary E. Sanders, botany (Mont Alto);

Dr. Wayne A. Schutjer, agricultural economics;

Dr. Lila L. Schwartz, educational psychology (Ogontz);

Dr. Richard F. Stoufer, plant pathology (Biglerville);

Dr. Gereld I. Susman, organizational behavior;

Dr. Hoben Thomas, psychology;

David V. Van Dommelen, art education;

Dr. Daniel Walden, American studies;

Robert G. Weaver, English;

Dr. Judith Weisz, obstetrics and gynecology (Hershey);

Dr. Joseph A. Wigley, speech communication;

Dr. Carl H. Wolgemuth, mechanical engineering;

Dr. Sam Y. Zamrik, engineering mechanics;

Dr. John H. Ziegler, meat science.

TO ASSOCIATE PROFESSOR:

Dr. Carter L. Ackerman, engineering research (Applied Research Laboratory);

Dr. Robert D. Arbuckle, history (New Kensington);

Dr. John D. Baildon, mathematics (Worthington Scranton);

John B. Balaban, English;

Dr. Philip H. Baldi, linguistics and classics;

Robert G. Balla, engineering (Wilkes-Barre);

Dr. Gerald L. Bartlett, pathology (Hershey);

August E. Branding, dairy science;

Dr. Thomas A. Brewer, agricultural economics extension;

Dr. Leslie P. Bullock, comparative medicine (Hershey);

Dr. David E. Bull, speech communication;

Harry A. Cerey Jr., extension information;

Dr. Jerry B. Covert, biology (Hazleton);

Dr. Donald D. Davis, plant pathology;

Dr. John J. Docherty, microbiology;

Dr. Caroline Eckhardt, English and comparative literature;

Dr. Peter A. Ferretti, horticulture extension;

Dr. Robert J. Foster, engineering graphics;

Dr. Daniel D. Fritton, soil physics;

Dr. James D. Gallagher, physical education;

Dr. Larry Gamm, community development;

Howard H. Garver, engineering (Altoona);

Walter S. Gearhart, engineering research (Applied Research Laboratory);

Dr. Stephen R. Grecco, English;

Dr. Stanley G. Green, entomology extension (Philadelphia);

Dr. George M. Greene, III, pomology (Biglerville);

Dr. Cyril E. Griffith, history;

Dr. Louise F. Guerney, human development;

Or. Roy H. Hammerstedt, biochemistry;

Dr. George L. Hargrove, dairy science;

Dr. Ian R. Harrison, polymer science;

Dr. Ronald J. Harshbarger, mathematics (Beaver);

Dr. Nathan L. Hartwig, weed science;

Dr. Charles R. Hartzell, III, biochemistry,

Dr. James L. Hodgson, applied physiology;

Alice M. Hottman, labor studies;

Kenneth W. Holt, engineering (Delaware County);

Mervin Hostetler, engineering (Altoona);

Dr. Evelyn A. Hovanec, English (Fayette);

Dr. Robert E. Huff, mathematics;

Or. Ted L. Huston, human development;

Richard D. Ingram, engineering research (Applied Research Laboretory);

Dr. Gary P. Johnson, education;

Dr. Gerald L. Jubb, entomology (North East).

William G. King, landscape architecture;

Dr. Kenneth K. Kuo, mechanical engineering;

Dr. Joseph M. Lambert, mathematics (Berks),

Dr. Chong M. Lee, anesthesia (Hershey);

Dr. Alan A. MacNab, plant pathology extension;

Dr. Helen A. Manfull, theatre arts;

Dr. Richard B. Mansfield, mathematics;

Dr. Morris G. Masi, poultry science extension;

Dr. Peter B. Meyer, economic planning;

Dr. William R. Miller Jr., physics (Capitol Campus);

Dr. H. Arnold Muller, medicine (Hershey);

Dr. M. Eloise Murray, home economics education;

Dr. David J. Myers, political science;

Dr. Robert W. Naismith, biology (Worthington Scranton),

Dr. Robert F. Nicely Jr., education (McKeesport);

Dr. Richard T. Obermeyer, physics (McKeesport);

Dr. William H. O'Donnell, English;

Dr. John J. Olivero, meteorology;

Dr. Peter E. Ostrander, physics (Fayette);

Sara Clemen Parks, dietetics;

Dr. John S. Patterson, American studies and history (Capitol Campus);

Dr. Mark R. Peattie, history;

Dr. Robert A. Pitts, business administration;

Dr. Jerry H. Reybum, agricultural extension;

Emma S. Rocco, music (Beaver);

Alfred Scheub, management development (Berks);

Dr. Ravi Sethi, computer science;

Or. Ross Shiman, biological chemistry (Hershey);

Dr. Raymond F. Shipp, agronomy extension;

Dr. David Smith, chemistry (Hazleton);

Dr. Kathryn T. Starkey, educational psychology (Capitol Campus);

Dr. Bruce M. Stephens, humanities and religious studies (Delaware County);

Kenneth Swisher, forestry (Mont Alto);

Alfred D. Talvola, engineering (Beaver);

Dr. Vicki A. Tillson, sociology (Ogontz);

Smith C. Toulson, III, music;

Dr. Richard E. Tressler, ceramic science;

W. Bruce Trinkley, music;

Dr. Richard Twark, quantitive business analyses;

Dr. James S. Ultman, chemical engineering,

Dr. Beno Weiss, Italian;

T. D. Wilkinson, engineering (Mont Alto);

Laurence L. Yager, agriculturel economics extension;

Dr. Theodore Ziegenfus, biology (New Kensington);

Dr. Vickie L. Ziegler, German.

TO SENIOR RESEARCH ASSOCIATE:

Dr. Daniel L. Bernitt (Computation Center);

Albert F. Niessner Jr. (Applied Research Laboratory);

Or. Hervey S. Piper Jr. (Applied Research Laboratory);

Dr. Dennis W. Ricker (Applied Research Laboratory).

TO ASSISTANT PROFESSOR:

Charles L. Bechman, engineering (Mckeesport);

Linda O. Baltimore, psychology (Wilkes-Barre);

Margot D. Beldon, physical education;

Thomas Brouse, physicel education (Altoona);

John D. Eckman, physicel education (Ogontz);

Robert M. Fryer, business administration (Schuylkill);

Charles Gibbons, art (New Kensington);

Lynn M. Haskin, journelism (Delaware County);

Collen J. Hefferen, consumption and behavior economics;

Allen K. Henry, computer science (Altoona);

Malcolm D. Hill, sociology (Altoona);

Sandra Hinsley, physcal education (New Kensington);

John M. Infield, physical education (DuBois);

Deidre E. Jago, physical education (Hazleton);

Dr. Judith A. Karakewa, biochemistry;

Dr. Edward J. Kelley, physical education;

Kurt Oppelt, physical education;

Dr. James J. Reynolds, methemalics

(Continued on page two)

PENN STATE COLLECTION

Faculty notes

Dr. Klass

Dr. Merrill

Dr. William Merrill Jr., professor of plant pathology, and **Phillip Klass**, professor of English, received the Christian R. and Mary F. Lindback Awards for Distinguished Teaching at spring term commencement exercises. The awards consist of a plaque and a check for $1,000.

Dr. Merrill joined the faculty in 1965 as assistant professor of plant pathology and was named associate professor in 1970 and professor in 1975. His B.S. in forestry was conferred by the University of New Hampshire in 1958, and his M.S. and Ph.D., both in plant pathology, were granted by the University of Minnesota in 1961 and 1963, respectively.

Widely recognized for his teaching methods in the field of plant pathology, Dr. Merrill has developed a series of autotutorial crop disease courses to give students in-depth knowledge in the diagnosis and control of diseases in specific crop areas. These courses are unlike any offered anywhere else in the United States. Enrollments in his beginning classes have increased by 300 percent over the past seven years, and student evaluations of his courses have been the highest.

Mr. Klass was appointed assistant professor of English at Penn State in 1966, named associate professor two years later, and professor of English in 1974.

Widely known to science fiction readers under his pen name of William Tenn, he is the author of more than 150 short stories and articles and ten books, including two anthologies. This year his novel, "Of Men and Monsters," was re-issued as a paperback by Ballantine Books, and a story, "On Venus, Have We Got a Rabbi," has been selected for Best Science Fiction No. 4, an annual best of the year anthology by Terry Carr.

Born in London, Mr. Klass came to the United States at the age of two. While he has entered from time to time in college courses, attainment of an academic degree was never one of his goals, and he does not hold a degree.

As a teacher at Penn State, Mr. Klass inaugurated the Science Fiction course, which he teaches, and revised the course, Advanced Technical Writing and Editing. He played a leading role in setting up the Writing Option in the Department of English and directs the English internship program.

Dr. Joseph P. Giusti, director of the Beaver Campus, received an Honorary Doctor of Letters degree from Saint Vincent College at its May 15 commencement for his achievements in education and public service. Earlier that week, Dr. Giusti was presented with the Benjamin Rush Award of the Beaver County Medical Society for his contributions to health care delivery.

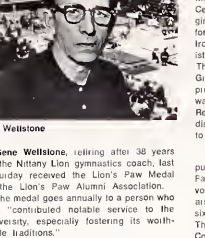
The citation from Saint Vincent hailed Dr. Giusti "as a civic leader and as an educator with an enviable record of publication and administration (who has) demonstrated exceptional professional ability and a strong personal commitment to service of others . . . ." In making the Benjamin Rush Award, the Medical Society noted that Dr. Giusti was being honored for both his local and national voluntary health care activities, which include a three-year term as president of the Board of Directors of the Beaver County Medical Center and his membership on the National Advisory Committee to the Hemolytic Disease Study Group of the National Heart, Blood and Lung Institute.

Dr. Giusti has been director of the Beaver Campus since its establishment in 1965. He has a B.A. from Villanova University and an M.S. and D.Ed. from Penn State.

Benjamin W. Niebel, professor and head of the Department of Industrial and Management Systems Engineering, has been presented the 1976 Frank and Lillian Gilbreth Award of the American Institute of Industrial Engineers. The highest honor bestowed by the AIIE, the Gilbreth Award is given to those individuals who have distinguished themselves by furthering the welfare of mankind through industrial engineering. Prof. Niebel was honored for his classic studies of work measurement and production design.

Prof. Niebel joined the faculty in 1947, and is the author of numerous technical articles. He has written nine books and has served as a consultant to many industries and branches of the government both in the United States and abroad. The AIIA is comprised of 70,000 members in more than 200 chapters throughout the the U.S., Canada and Mexico.

Dr. Barnes W. McCormick, professor and head of the Department of Aerospace Engineering, has been named the recipient of the 1976 Aerospace Division-Educational Achievement Award, sponsored jointly by the American Society for Engineering Education and the American Institute of Aeronautics and Astronautics. The award consists of a certificate and a check for $1,000, and it is bestowed nationally upon a distinguished contributor to aerospace engineering education in recognition of educational achievement and to encourage original, innovative improvements in the field of aerospace engineering. The committee considering nominations for the award cited Dr. McCormick for the new realism he has brought into aerospace education through the introduction of undergraduate courses that allow students to deal with engineering situations similar to those they will face when employed in industry.



Dr. McCormick has also responded to needs of the aerospace and aviation fields through origination of a two-year associate degree program in Aerospace Engineering Technology at the Penn State Altoona Campus. His major research interests are in the areas of marine propeller design, hydrodynamics, low-speed aerodynamics in general, aerodynamics of vertical flight, aircraft propeller design, aerodynamic noise and the behavior of vortex systems. He is the author of the textbook, "Aerodynamics of V/STOL Flight" and is currently working on a new textbook, "An Introduction to Aeronautics."

Dr. E. Erwin Klaus, professor of chemical engineering, has received the 1975 American Society of Lubrication Engineers National Award. This is the society's highest honor and is given in recognition of outstanding contributions in the field of lubrication. Dr. Klaus received his B.S. in chemistry from Franklin and Marshall College and his M.S. and Ph.D. in chemistry from Penn State. He joined the faculty in 1943 as a research assistant in petroleum chemistry.

In his research, Prof. Klaus has studied temperature, pressure and shear effects on the viscosity of liquids and the mechanism of boundary lubrication using additives, activation analysis and thin layer chromatography to measure surface chemical effects. He has contributed to developing super refining processes for mineral oils and to studies of metal corrosion and the properties of liquids in severe environments. Prof. Klaus was also the first to demonstrate the true lubrication mechanism of tricresylphosphate additives by surface absorption of TCP impurities and subsequent reaction with bearing steels to form organometallic phosphates, contrary to the classical concept of forming low melting iron phosphate alloys.

Dr. Edward R. Fagan, professor of education, was elected vice chairman of the National Council of Teachers of English's Conference on English Education at the April meeting of the conference. He also presented a paper at that meeting entitled, "Using Community-based Resources to Teach Teachers Composition." Another paper, "Censorship: Word Storm," was published in the spring edition of "Journal of Research and Development in Education."

Dr. Drew W. Hyman, assistant professor of community development, and **Dan Griffiths**, research assistant in the Institute for the Study of Human Development, are coauthors of "An Advocate for the People," a monograph on the Pennsylvania Governor's Action Center. The report describes the Governor's Action Center as an innovative experiment in citizen's advocacy and suggests that it might serve as a model for similar programs throughout the nation.

Mr. Wettstone

Gene Wettstone, retiring after 38 years as the Nittany Lion gymnastics coach, last Saturday received the Lion's Paw Medal of the Lion's Paw Alumni Association.

The medal goes annually to a person who has "contributed notable service to the University, especially fostering its worthwhile traditions."

Mr. Wettstone's retirement marks the end to an era unparalleled in gymnastics history. His Nittany Lions have compiled a dual meet record of 201-39-11 and have won nine NCAA championships and 17 Eastern Intercollegiate Gymnastics League titles. Mr. Wettstone's gymnasts have captured 23 NCAA individual championships and 103 EIGL crowns. Nine Penn State gymnasts have been Olympians and three won the Nissen Award given to the country's outstanding graduating senior.

Mr. Wettstone's work is also recognized outside the United States. He was the Olympic coach in 1948 and 1956 and coached the U.S. World Games team in 1970. He will serve as the manager for the 1976 Olympic squad.

A luncheon honoring Gene Wettstone will be held at 12 noon on Saturday, June 26, at the Nittany Lion Inn. Tickets, which are $10 apiece, may be purchased at the Office of the Director of Athletics, Room 238 Recreation Bldg.; at the Office of Gifts and Endowments, Room 116 Old Main; and at Grahams on S. Allen St.

Statistics, though, don't begin to explain Mr. Wettstone's contribution to gymnastics. It is widely recognized that he is the world's number one promoter of the sport, repeatedly staging meets at the University that have mirrored what he thinks the sport is about.

"Gymnastics needs pompoms and rooting sections and bands and noise," he has said. "And it needs people who will promote spectators and not just winning. That's the soil of thing — organizing meets, promoting them — I'd like to get into after I retire."

Dr. Martin S. Stabb, professor of Spanish and head of the Department of Spanish, Italian, and Portuguese, presented a lecture at the University of Missouri on "The Mask of Eros: Notes on Donoso and the New Novel. He also participated in the annual Kentucky Foreign Language Conference at Lexington, Ky., chairing the Latin American Literature Section.

Promotions

(Continued from page one)

(Beaver):

Dr. James L. Rosenberger, statistics;
Gary K. Schwartz, physical education;
Dr. John E. Skeen, wildlife technology (DuBois);
S. Annette Thompson, physical education;
Julian D. Weiss, architecture;
Donald Wharton, English (Altoona).

TD AFFILIATE ASSISTANT PROFESSOR:
F. Lynn Christy, Russian (Dgontz).

TO RESEARCH ASSOCIATE:
Frederick J. Everly (Applied Research Laboratory);
Richard B. Smith (Applied Research Laboratory);
William H. Verily (Computation Center).

TO LIBRARIAN.
Elizabeth G. Ellis, librarian.

TO ASSOCIATE LIBRARIAN:
Nancy M. Cline, reference (documents);
Carole Franklin, arts and music library;
Gordon W. Rawlins, systems development;
Dr. Keith E. Roe, life sciences library.

Dr. Robert Ginsberg, associate professor of philosophy at Delaware County, organized a seminar on "Enlightenment Peace Theories" as part of the Seventh Annual Meeting of the American Society for 18th Century Studies at the University of Virginia in April. He also prepared a paper for the seminar, supported by a grant from the Institute for the Arts and Humanistic Studies, on "Alternatives of Peace Theory: Rousseau, the Abbe de Saint-Pierre, Diotus." **Dr. Bruce Stephens**, assistant professor of religious studies at Delaware County, gave a paper on "Pulpit and Revolution" at the meeting and directed a discussion on the Religious Background to Peace.

The Faculty Congress at Beaver Campus presented the first "Beaver Campus Faculty Award" at a recent Awards Convocation. The recipient of the $500 scholarship award was Jeffrey J. Weimer, a sixth-term chemical engineering student. The award was established by the Faculty Congress to recognize a full-time student with a high level of academic achievement and a promise of continued outstanding academic success. The initial principal was contributed by the Beaver faculty, staff and Campus Women's Association.

Obituaries

Jon N. Weber, professor of mainc geology, died at his home June 1, at the age of 40.

A native of Kitchener, Ontario, Dr. Weber received his B.S. and M.S. degrees from McMaster University, Hamilton, Ontario, and his Ph.D. from the University of Toronto.

He joined the Penn State faculty in 1981 as a research associate in geochemistry. His promotion to professor of mainegeology came in 1974.

Dr. Weber did extensive research on coral formation in the South Pacific and studied the use of coral and sea urchin spines as molds for making human bone, cartilage and coronary artery replacements.

He was the author of more than 150 research publications and in 1971 participated in a Smithsonian Institution expedition to British Honduras.

Dr. Ben Euwema, who served from 1946 to 1963 as dean of the College of the Liberal Arts, died May 22 at the age of 70. He had continued on the faculty as a professor of English until his retirement in 1969.

Dean Euwema also taught at the University of Chicago Evening School, Westminster College, Kent State and Michigan State. At the latter institution he was head of English and director of languages from 1937 to 1946. He held a B.A. in Greek and philosophy from Calvin College, an M.A. in philosophy and English from the University of Michigan and a Ph.D. in English from the University of Chicago.

From 1946 to 1948, Dean Euwema was chairman of the Division of Arts and Sciences of the National Association of State Universities and Land-Grant Colleges. He was the author of "The Social and Ethical Theories of George Eliot" and of "A Year's Work in Composition."

Clarice G. Taylor, director of the Institution Food Research and Services Program from its inception in 1956 until 1967, died May 22. Prior to her appointment at Penn State, where she was also professor of hotel and institution administration, Mrs. Taylor was chief of dietetic administration for the Veterans Administration. She received her baccalaureate degree at North Dakota State University and her master's in nutrition from the University of Maryland. North Dakota State also awarded her an honorary doctor of science degree.

Dale J. Jackson, associate Westmoreland County Extension agent, died May 16 at Greensburg. He was 56. A native of Homestead, Jackson was named to the Cooperative Extension Service staff in 1956. He was a 1942 Penn State graduate. In Westmoreland County, he was active in extension poultry and vegetable programs and youth work and was instrumental in the establishment of the county Interna-tional Farm Youth Exchange Program.

Mortimer selected to head higher education study center

Dr. Kenneth P. Mortimer, professor of higher education and research associate in the Center for the Study of Higher Education at the University, has been named director of the Center, effective on July 1.

He succeeds Dr. G. Lester Anderson, who will retire July 1 with emeritus rank after having served as director since the establishment of the Center in 1969.

A unit of the Office of the Provost, the Center was established to expand, complement, and consolidate the programs of research, education, and service in higher education which have been an integral part of the University's program for many years.

Center personnel are concerned with internal educational operations of the University, develop studies which will enhance the higher education programs of the Commonwealth, and work with the State Department of Education on matters of mutual concern in higher education. They also conduct studies of long-range state and national significance and actively participate in the University's programs of higher education leading to advanced degrees.

Dr. Mortimer has been affiliated with the Center since he came to Penn State in 1969 as assistant professor of higher education and research associate. He served in 1973 as a special consultant to the President of the University.

Before coming to Penn State, Dr. Mortimer was associated with the University of California at Berkeley as a post graduate research educator with the Center for Research and Development in Higher Education and as a U.S. Office of Education Research training fellow. Prior to that he

Dr. Mortimer

served as an administrative assistant in political science at San Francisco State College.

Dr. Mortimer holds an A.B. and a master of business education degree from the University of Pennsylvania. He did graduate work in political science at Hayward College and San Francisco State College and received his Ph.D from the University of California at Berkeley.

Dr. Mortimer is author or co-author of more than 60 publications in the field of higher education. He is a member of the Academy for Academic Personnel Administrators, American Assn. for Higher Education, American Assn. of University Professors, American Educational Research Assn., Assn. of Institutional Research, Assn. of Professors of Higher Education, and Phi Delta Kappa, professional education society.

Heads' duties explained by witness in PLRB hearing

The question of whether department heads should be excluded from any potential collective bargaining unit will continue to be examined when hearings resume Aug. 11 on the makeup of a faculty unit eligible to vote in a representation election at the University.

The hearings, conducted before Hearing Examiner Sidney Lawrence, were called as a result of a petition filed by the Pennsylvania State University Professional Association (PSUPA) for an election to determine whether or not a bargaining agent should represent Penn State faculty and professional staff.

In testimony last week, the question of where is the first level of supervision under Act 195, the public employes' bargaining act, was raised.

Exclude heads

The University's position is that department heads should be excluded as supervisors and managers when viewed in the context of Act 195.

PSUPA's position, as stated by attorney Ronald Watzman, is that "to be excluded from the bargaining unit one must be a supervisor of members of the bargaining unit."

Dean Nunzio J. Palladino of the College of Engineering testified to the responsibilities of department heads with regard to clerical, technical-service, stall exempt, and staff non-exempt personnel and graduate students who are unlikely to be included in a faculty bargaining unit.

He also noted that department heads supervise projects, recruit faculty and make recommendations on faculty hiring, promotions, leaves of absences and other faculty affairs.

Earlier in the hearings, cross examination of Dr. Harry Piyotowky, provost and dean of the College of Medicine, was completed and Robert A. Patterson, senior vice president for finance and operations, testified on the financial arrangements at the medical center and its integrated aspects to the University as a whole

Medical Center petitions

Hearing Examiner Lawrence received a petition from an unspecified number of College of Medicine faculty members stating that they were part of the total faculty of the University and asking that for whatever purposes, including a collective bargaining election, they be considered in that light.

PSUPA is seeking a unit to include all faculty, excluding those in the College of Medicine, and all non-teaching professionals directly retated to the academic and research programs Another faculty organization, the American Association of University Professors (AAUP), seeks a unit including only faculty, but also excluding faculty in the College of Medicine

The University feels the appropriate unit for an election should be a "pure" faculty unit made up of regular full-time faculty at all locations of the University.

Dean Palladino will continue his direct testimony when the hearings resume Aug. 11 in Room 404 Old Main. Mr. Lawrence has scheduled hearings for Aug. 11 through 13 and Aug. 18, 19 and 20.

1,350 were students

Summer term classes began yesterday with an estimated 1,350 new students at University Park. Total enrollment for the summer is expected to approximate that of a year ago when 11,367 resident credit students were attending classes Among the new students are 825 University Park freshmen, with another 90 beginning their work at the Altoona, Delaware County and Dgontz campuses Ninety students have been admitted to University Park with advanced standing status. 190 are former students readmitted; and 210 are transferring from a Commonwealth Campus to University Park.

Business building formally dedicated

The Business Administration Bldg. was formally dedicated on Saturday, June 5.

Dedication ceremonies included an address on Historical Perspectives and Excellence in Business Administration at Penn State: Comments on a Partnership" by Charles W. Shaefler, Baltimore, Md., retired chairman of the boaid of T. Rowe Price Inc., a University trustee, and chairman of the University Fund Council.

Dr. Dowald and Dr Eugene J Kelley, dean of the College of Business Administration, officiated The ceremony was "symbolic of past accomplishments and future opportunities in business and management education at the University," according to Dean Kelley.

The Business Administration Bldg. was first occupied in July, 1973. In addition to faculty and administrative offices, major learning facilities include the Behavioral Learning Center, Computation Center, Independent Learning Center, Case Study Rooms and the College Working Collection

The $2.5 million facility was authorized and funded by the General State Authority of the Commonwealth of Pennsylvania. The architect was Ingram, Kafka, and Maicv, Pittsburgh; general contractor was Boyd H Kline Corporation, Bloomsburg; mechanical contractor was Herre Bros., Inc., Harrisburg; electrical contractor was Harman Construction Co., Bellefonte; landscape architect was Environmental Planning and Design, Pittsburgh; and general landscape contractor was C. F. King, Sunbuiy

Art work offered

Art classes for children and teens began for this summer on Thursday, June 17, at 10:00 a.m. in Chambers Building and continue each Thursday through Aug. 5 at the University

A timited amount of registrations are still available and are being accepted for the six courses offered in this program, which is sponsored by the Department of Art Education Inquiries about and registrations for courses should be directed to Holly Ping, secretary of the department. She can be reached at 865-5601.

Courses offered for the summer program include Creative Arts for the Young, for children aged five and six; and Arts and Crafts, for children aged six and seven. For intermediates, aged eight to twelve, there are three courses: Exploring Sculpture, Drawing and Painting, and Arts and Crafts. For teens there is a special teenage Art Studio workshop.

In addition to full course offerings for children and teens, all students will be offered field experiences to artists' studios on campus and in the nearby State College area, museum and gallery experiences and a coordinated program with various special summer arts events on campus.

Summer arts

(Continued from page one)

from 3 to 5 p.m. Sunday, July 11, in the Museum of Art and the Central Pennsylvania Festival of the Arts, which will show its Juried Crafts Show in the Museum July 6 through Aug. 15. The Arts Festival will be held July 10-18.

The Museum of Art will open its special Nittany Mountain Summer show, "Prints by Pennsylvania Artists," on July 11, with the prints remaining on view through Aug. 22.

The Pennsylvania Ballet, returning for its fourth summer residency at Penn State, will perform a new work in each of its three weekend programs at 8 p.m. on Fridays and Saturdays, July 16, 17, 23, 24, 30, and 31, in University Auditorium.

On the first weekend, the Ballet will perform a stunsnitted work to music of Charles Ives by Lar Lubovitch, whose "Zig Zag" had its American premiere in the 1974 summer program at Penn State.

The second weekend's program will feature the premiere of "Sweet Agony," choreographed by Gene Hill Sagan to contemporary music of Jimi Hendrix and Richie Havens. On the final weekend of its residency, the company will dance the world premiere of a new work by its artistic director, Barbara Mahary, to music performed by the New York Renaissance Band, also returning for its third Nittany Mountain Summer to perform with the Pennsylvania Orchestra.

The nineteenth season of the Festival of American Theatre will include four classic American plays, "Bus Stop," "That Championship Season," "The Golden Apple" and "Little Mary Sunshine," presented in the Playhouse and Pavilion Theatres.

"Bus Stop" opens the season on June 24 and plays through July 4, with "The Golden Apple" July 1-17, "Little Mary Sunshine" July 22-Aug. 7, and "That Championship Season" July 29-Aug. 7. There will be no Monday performances. Saturday matinees at 2:30 p.m. are scheduled for "Bus Stop" July 3, "The Golden Apple" July 10, and "Little Mary Sunshine" and "That Championship Season" July 31 and Aug. 7.

Evening performances are at 8 p.m. except on Sundays, when there is a 7:30 p.m. curtain time. "That Championship Season" is recommended for mature audiences.

The Pennsylvania Orchestra, with the New York Renaissance Band, will offer Wednesday evening "Shirt-Sleeve Concerts" in University Auditorium at 8 p.m. on July 14, 21, and 28.

Also planned are the traditional free informal Nittany Mountain Summer sessions with the artists, actors, dancers, musicians, technicians, and directors.

"At Ease with the Pennsylvania Ballet" will be held at 4 p.m. on Saturdays, July 17, 24, and 31, in University Auditorium. Museum tours will be offered every Friday, Saturday, and Sunday at 1 p.m. July 16-31.

Brochures with detailed program and ticket Information may be obtained at the University Auditorium and Playhouse Theatre box offices or by calling 865-2242. The Festival of American Theatre box office in the Arts Bldg. will open on Monday, June 14, with daily hours from 10 a.m. to 9 p.m. Nittany Mountain Summer box office hours will be 9 a.m. to 4 p.m. Monday through Friday beginning Wednesday, June 16, in the University Auditorium.

Funding sources

For further information, call 865-1372

(220-1) The National Endowment for the Arts (NEA) has issued application guidelines for its **Public Media Program.** Included in the program is "regional development" (Aug. 1 deadline) and "programming in the arts" (Sept. 15 deadline). The NEA also supports "general" public media projects and will award up to $10,000 for them After fiscal 1976, pilot programs may be funded for short film showcasing and post-graduate fellowships. (Ref. 41FR19743-46, 5/13/76) (220-5)

(220-2) Research proposals related to the utilization of sucrose are now being accepted by **The International Sugar Research Foundation, Inc.** Research interests include nutrition and metabolic studies, food technology, development of products, and by-products utilization. Application summaries are due by July 21. (Ref. Foundation Announces)

(220-3) Final regulations for the **Career Education Program** have been issued by the Office of Education. Projects that demonstrate exemplary career education models and state plans for career education will be funded (Ref. 41FR-19635-41, 5/13/76) (CFDA 13 554)

(220-4) The Office of Education announces a June 30 closing date for receipt of special project applications under its **emergency school aid program.** (Ref. 41FR10747-48, 5/13/76) (CFDA 13.532)

(220-5) OHEW has published a "prospects for award notice" for **FY 1976 policy research grant funds.** The Federal Register will carry solicitations when funds are made available. (Ref. 41FR19748, 5/13/76)

(220-6) NASA has issued **Guidelines for Participation in Lunar Programs** (May, 1976). Guidelines include purpose, scope, policy on unsolicited proposals, and procedures for submission. (Ref. Ibid.)

Staff vacancies

Staff vacancies in this publication generally require at least a baccalaureate degree or equivalent as a minimum educational qualification. Staff vacancies requiring less than the baccalaureate degree as well as those announced in the INTERCOM may be found in the Penn State REPORTER. All University employees who are interested in promotion may apply by calling the Employment Division, 865-1367 (network Line 475-1367). Applications for those staff vacancies will be received until 5 p.m., **June 17, 1976. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

7:30 p.m. The Oance Band, Old Main steps band shell.
9.30 p.m. Outdoor film, "West Side Story," Old Main lawn (Rain: HUB ballroom).

Trustees approve budget, tuition hikes

Maintenance, operations costs estimated at $345,602,000

The Board of Trustees has approved a 1976-77 maintenance and operating budget for the total University of $345,602,000, up from the 1975-76 figure of $318,392,000.

Only 30 percent of the $345,602,000 budget comes from State funds, according to President Oswald.

He also noted that exclusive of funds for the Milton S. Hershey Medical Center, the increase from the current year to the budget proposed for 1976-77 approximates 6.1 percent.

The basic budget of the University, which supports its fundamental programs of teaching and research, amounts to $190,000,000 and is basically supported by tuition from students and from State appropriation funds.

The $190,000,000 figure is determined by elimination of all the self-supporting activities of the University, such as residence hall programs, Hershey's teaching hospital, intercollegiate athletic programs, and many other auxiliary enterprises and also after eliminating some $43 million that the University receives in the form of contracts, grants and gifts in support, primarily, of research.

The trustee action, explained Dr. Oswald, was taken in anticipation of a State appropriation for 1976-77 of not less than the Governor's recommendation of $106,730,000, which included $2,755,000 for medical programs. The University had requested $116,711,000, including $3,690,000 for medical education.

Should the final appropriation be different than the Governor's recommended amount, the budget will be revised accordingly and returned to the Board for its subsequent approval.

"This overall budget," President Oswald continued, "has been carefully constructed by putting together many inter-related building blocks of income sources and critically needed expenditures designed to achieve an appropriate balance to the best interests of the total University."

He said that "faced with a difference of almost $10 million between our appropriation request and the recommendation in the Governor's budget, we needed to achieve a sense of balance among competing priorities. These included unavoidable inflationary costs, the need to maintain sound educational programs, and equitable salary increases.

"The anticipated $10 million gap for the total University," President Oswald continued, "was closed by eliminating proposed expenditure increases of approximately $4.3 million; by making internal budget reductions of $1.4 million; by increased general revenue estimates of approximately $1 million, and by tuition increases estimated to yield approximately $3.3 million.

"In achieving appropriate balance among priorities, it was inevitable that many highly desirable program needs could not be met, but the budget, as approved, does provide for the mandated costs and many of the critical needs."

Provision has been made in the budget for salary increases for employees which approximate 5.25 percent of the current salary base and with the added related fringe benefits approximate a 6.4 percent increase in the compensation base. A portion of the increased funds for salaries will be applied to basic increases and a portion will go for merit increases and promotions. For the past saveral years, strong efforts have been made to correct inequities that may exist. If any remain, they will be corrected in this budget, President Oswald said.

Other urgent needs recognized in the budget, in addition to inflationary pressures, are those to meet changing enrollment requirements. Teaching workload provisions show a budget increase of $990,000; fuel and utility price increases are estimated at $499,000; operation of new facilities at $330,000; and other physical plant costs at $244,000. Other essential needs due to inflation show a $1,662,000 increase over last year's budget.

Effort made to keep tuition at the lowest possible level

Increases in tuition and in room and board charges at the University, effective with the fall term, have received trustee approval.

For Pennsylvania undergraduates at University Park, the tuition increase is $18 per term, or 4.9 percent, while for undergraduates at the Commonwealth Campuses, the increase is $17.

"This reflects a continuing determination I have had to keep any tuition increase to a minimum," President Oswald noted.

Rates for out-of-state undergraduates will be increased by $36 per term at all locations.

The increase for graduate students at University Park and The Milton S. Hershey Medical Center is $43 per term, while for graduate students who are not Pennsylvania residents, the increase at all locations is $61 per term.

The variation in rates between undergraduate and graduate students recognizes the substantially higher costs of graduate education.

For Pennsylvania undergraduates at Capitol Campus, where upperclass work is offered, rates are increased by $25 per term, while the increase for graduate students there and at King of Prussia and Behrend College Graduate Centers is $50 per term. The larger increase at Capitol, it is explained, represents the first step in a four-year program to equalize the Capitol Campus program with that at University Park. The King of Prussia and Behrend College graduate programs likewise will be equalized with those at University Park and at Hershey.

The new tuition schedule, President Oswald explained, is based on the anticipation of a State appropriation of at least $106,730,000, which is the amount recommended in Governor Shapp's budget. Noting that final action on the appropriation has not been taken by the Legislature, he said that any substantial variation in the final appropriation amount could force a later change in tuition rates, but added that he views this as highly unlikely.

Pointing out that three academic terms constitute the academic year at Penn State, President Oswald said that Pennsylvania residents now will pay $1,149 per academic year for undergraduate work at University Park; $1,056 at the Commonwealth Campuses and Behrend College; and $1,080 at Capitol Campus. Out-of-state tuition for undergraduates will be $2,403 per academic year at all campuses.

Pennsylvania graduate students will pay $1,224 per academic year, an increase of 11.8 percent, at University Park and at the Hershey Medical Center, and $1,155 at all other locations. Out-of-state graduate students will pay $2,478 at all locations.

While the Governor's recommendation is some $10 million under the $116.7 million requested, President Oswald emphasized that the tuition increases approved will account for only about a third of the total gap. He said that all possible options to hold tuition increases to a minimum were employed. These included finding new revenues, identifying areas where expenditures might be reduced, and reallocating from existing funds within the University.

"The amount of the tuition increase, therefore, was carefully determined as part of an effort to achieve an optimum balance of mandated and critically needed expenditures and at the same time, given the level of State appropriation, keeping the tuition increase at the lowest possible figure," President Oswald explained.

In the announcement of increases in room and board charges, it was emphasized that no State funds are used at Penn State either for amortization of resident hall facilities built by the University with borrowed money, nor for operating costs, nor to meet the rising costs of food and supplies used in the operation and maintenance of the residence hall units.

The increases announced for the fall vary with facilities, but for an undergraduate in a double room, the increase is $28 per term, bringing the rate for an academic year to $1,473. Single room rates are higher, although rates are lower for the three-person rooms which will be available this year for the first time to help meat the heavy pressure for residence hall accommodations.

Explaining the room and board increases, which amount to less than 40 cents per day, President Oswald said they were essential because of increased operating costs, which include mandated employee benefits. He re-emphasized that room and board charges paid by the student occupant are the only source of funds for residence hall operations.

In addition to the increased tuition rates for full-time students, the trustees increased per credit rates for part-time students. The cost for Pennsylvania residents for undergraduate credits moved from $45 to $48 at University Park; $36 to $41 at Capitol Campus; and $36 to $38 at other Campuses. For graduate credits, the increase is $45 to $51 at University Park and Hershey and $36 to $44 at other locations. Non-Pennsylvanians will pay $100 per credit for undergraduate credits and $103 for graduate credits at all campuses. The former rate had been $96 for both undergraduate and graduate credits.

20 new projects to be financed from undesignated contributions

An allocation of $92,983 in undesignated gift funds contributed to the University by alumni and friends has been approved by the Board of Trustees to make possible 20 different projects and programs.

The largest amount, $36,000, was allocated for financial assistance for students, with $300,000 designated for Alumni Memorial Scholarships and $6,000 for the Re-Creation group, sponsored jointly by the Department of Recreation and Parks and the Office of Religious Affairs. Serving as "ambassadors of Penn State," the group will present programs before recreation agencies, civic organizations, schools, clubs and religious groups throughout the State and the Northeast.

The Board approved $17,500 for enrichment and cultural offerings — $5,000 for the purchase of high quality plastic casts of fossil remains of early man and related primates; $3,000 to support a visit to Penn State on July 11 of an authentic Cotlery Indians Band, sent to this country by the British Bicentennial Secretariat of the Foreign Office; and $5,000 to match a National Endowment for the Arts grant to acquire two or more works by living American artists for the Museum of Art's permanent collection.

A $2,000 grant for the Shenango Valley Campus will support a Bicentennial Art Show in June and a $2,500 grant to the Wilkes-Barre Campus will be used to restore and preserve original works of art and rare objects in Hayfield House.

The trustees approved projects totalling $16,700 to improve the quality of the campus environment. With $2,500 a gazebo for promotion of the performing arts in an open-air setting will be built at the Altoona Campus, and trade union personnel have agreed to donate their time during construction.

A $3,500 grant to the Milton S. Hershey Medical Center will make possible a landscape project between the flag poles, utilizing shrubbery, flowers and benches, while the entrance to Mont Alto Campus will be beautified with a $5,000 grant.

A grant of $1,000 to Worthington Scranton will provide appropriate lighting for the life-sized, cast bronze sculpture, "The University and its Family," done by Oliver LaGrone, who had served as lecturer at Capitol Campus and special assistant to the vice-president for undergraduate affairs.

An outdoor study and picnic area will be made possible at Hazleton with a $2,500 grant for grading, landscaping and purchase of outdoor furniture. At Wilkes-Barre, a $2,200 grant will provide background and front draperies to improve the aesthetic and audio qualities of the auditorium.

New instructional techniques will be facilitated with $3,000, including $3,000 for purchase of photographs to initiate an archival collection for the Department of Art History and $4,000 to make possible publication of a volume of essays by Dr. Carroll C. Arnold, professor of speech communication who is widely known for his work in rhetoric.

A $3,000 grant for Capitol Campus will be used to develop a music studio and $3,000 to the Ogontz Campus will support work on the papers of President Martin Van Buren, conducted by Dr. George W. Franz, assistant professor of history at Delaware County.

Other grants approved provide $983 to purchase equipment needed for the Rite-nour Health Center ambulance and to upgrade the service; $3,800 to be distributed among the Commonwealth Campuses, Behrend College and Capitol Campus to sponsor awards dinner for the Kunkle Awards presentations; and $5,000 for Mont Alto to purchase a small van to transport students to hospitals, schools and social agencies for their internships.

Hershey budget set at $62,001,000

A budget of $62,001,000 for The Milton S. Hershey Medical Center, representing an increase of $10,938,000 over the $51,063,000 budget of the current year, has been approved by the Board of Trustees.

Of the $10,938,000 increase in the budget, only $119,000 comes from the anticipated State appropriation. Nearly all of the increase comes from the increased revenue generated by the teaching hospital and from other sources.

Of the entire $62,001,000 budget, President Oswald explained, only $3,284,000, or 5.3 percent, comes from the State appropriation. In the absence of a State appropriation at this time, the proposed budget was based on the amount per student recommended in Governor Shapp's budget message.

No State money, Or. Oswald reminded, goes into the teaching hospital, which is self-supporting and will have a $28,499,000 budget.

President Oswald explained also that the $62,001,000 budget approved lists $14,671,000 for the College of Medicine; $28,499,000 for the teaching hospital; $10,121,000 for auxiliary enterprises, which like the hospital, are self-supporting; and $8,710,000 in restricted funds, expenditures balanced directly by revenues for the same purpose.

The Board on Friday also approved a major tuition increase of $1,000 per year for medical students, bringing tuition to $3,001 for Pennsylvania students and $5,002 for out-of-state medical students.

"This sharp increase," President Oswald said, "was forced by the absence of any increase in per capita appropriation for medical education. This amount has continued at $7,465 per student for the past five years."

President Oswald noted that the new tuition rates for medical students greatly intensified the need for additional student aid funds and that the new budget includes a provision for this item. One-third of the increased tuition revenue at the Medical Center, or $135,000, will be devoted to student aid.

Salary increases budgeted at the Medical Center amount to 5.25 percent of the salary base, identical to the provisions contained in the over-all budget of the University.

After a number of years of financial difficulties, the teaching hospital now is operating in the black, according to President Oswald, who noted that the budget for the coming year allocates $1,415,000 for facilities and equipment depreciation, which represents 91 percent of the calculated depreciation. For the current year, only $803,000 or about 50 percent, was budgeted.

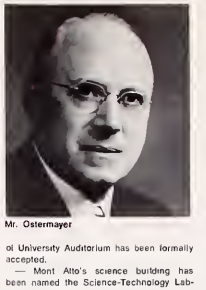
Buildings named for Carpenter, Ostermayer

The Social Sciences Bldg. at University Park, completed in 1970, has been designated the C. Rey Carpenter Bldg. in honor of the late Clarence Ray Carpenter who served on the faculty from 1939 until his retirement in 1970. Dr Carpenter died March 1, 1975.

He was an internationally recognized scholer in psychology and anthropology and a pioneer in the development of instructional television. His research and scholarly contributions in the area of primate behavior continue to be considered by social scientists as major classics in the field.

During his more than 30 years at Penn State, Dr. Carpenter served in numerous leadership positions. For seven years he was head of the Department of Psychology, and he directed the Instructional Television Research Program which later became the Division of Instructional Services. He played a major role in the planning and in the establishment of WPSX and was executive director of the Planning Committee for The Milton S. Hershey Medical Center.

In addition to approving the naming of the C. Ray Carpenter Bldg., the University's trustees also agreed to the following building designations:



— McKeesport's new science building

Dr. Carpenter

will be named the Ostermayer Laboratory in honor and memory of Robert W. Ostermayer Sr. '17 Former president and chairman of the board of the Pennsylvania Industrial Chemical Corp., Mr. Ostermayer was a member of the McKeesport Campus Advisory Board until his death last year, a "Distinguished Alumnus" of the University and a trustee from 1959 to 1963.

— At University Park, the designation

Mr. Ostermayer

of University Auditorium has been formally accepted.

— Mont Alto's science building has been named the Science-Technology Laboratory.

— An academic and recreational building now under construction at Capitol Campus will be known as the Multi-Purpose Bldg

— Berks' outdoor pavition has been named the Alumni Pavition.

HEW offers nursing ed building grant

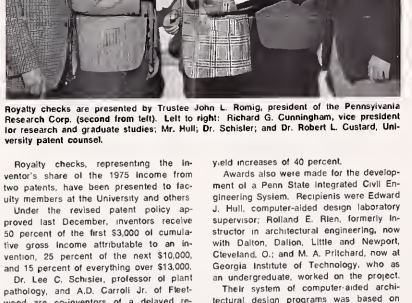
Officers of the University have been authorized by the Board of Trustees to accept a grant commitment of $3,563,012 for the construction of a nursing education facility at University Park

Acceptance of the grant, from the Public Health Service, Department of Health, Education, and Welfare, would obligate the University to attempt to identify and put together within a year $1,500,000 in matching funds.

"In view of the generous nature of the grant commitment, which would provide about 70 percent while the matching funds would amount to 30 percent, every effort will be made during the next year to try to put together the matching funds," President Oswald said. He noted that funds from other Federal sources, Appalachia funding, State funds, and also gifts and funds from University sources will be sought.

The construction grant would be offered after the results of bidding have been obtained, construction project costs reports have been submitted, and the Federal concurrence to award the construction contract has been issued.

At present, Penn State has no teaching, laboratory, or research facilities specifically designated for the expanding nursing education program. There are no research project spaces to support the faculty and graduate student scholarly projects essential not only to advance nursing knowledge and competence but also to provide the context essential for a strong graduate program.



Construction of the building would benefit not only the nursing program, it is explained, but the entire College of Human Development by releasing for other purposes space now used within the College for the nursing program. Approximately 15 percent of the institutional space in the new building would be available for assignment to other programs when not in use for the nursing program.

Space in the College of Human Development is severely limited, and the College is at the top of the priority list for additional building facilities.

The proposed building would include three large classrooms with seats for 100 to 200 students, seminar rooms, and faculty offices.

The award of this grant, commented Dr. Donald H. Ford, dean of the College of Human Development, "is a recognition of the significance of the special focus of Penn State's nursing program which emphasizes positive health care and prevention of illness, as well as care of the sick. The size of the award is a product of the rapid growth of both the undergraduate and graduate nursing programs."

Faculty members get royalty checks

Royalty checks are presented by Trustee John L. Romig, president of the Pennsylvania Research Corp. (second from left). Left to right: Richard G. Cunningham, vice president for research and graduate studies; Mr. Hull; Dr. Schisler; and Dr. Robert L. Custard, University patent counsel.

Royalty checks, representing the inventor's share of the 1975 income from two patents, have been presented to faculty members at the University and others

Under the revised patent policy approved last December, inventors receive 50 percent of the first $3,000 of cumulative gross income attributable to an invention, 25 percent of the next $10,000, and 15 percent of everything over $13,000.

Dr. Lee C. Schisler, professor of plant pathology, and A.D. Carroll Jr. of Fleetwood are co-inventors of a delayed release nutrient for mushrooms which was granted U.S. Patent 3,943,969 Mr. Carroll worked on the nutrient development as his master's thesis under Dr. Schisler. Spawn Mate, Inc., of San Jose, Calif., was granted a five-year exclusive license to develop, field test and market the product. Their field tests show mushroom yield increases of 40 percent.

Awards also were made for the development of a Penn State Integrated Civil Engineering System. Recipients were Edward J. Hull, computer-aided design laboratory supervisor; Rolland E. Rien, formerly Instructor in architectural engineering, now with Dalton, Dalton, Little and Newport, Cleveland, O.; and M. A. Pritchard, now at Georgia Institute of Technology, who as an undergraduate, worked on the project.

Their system of computer-aided architectural design programs was based on improvements of an earlier version developed at MIT and enables architects and engineers to use faster analysis programs in solving their design problems. Project Software Developments, Inc., Cambridge Mass., bought the marketing rights to the Penn State ICES programs from Research Corp., New York, N.Y

Plans accepted

In actions affecting the development of the University's physical plant, the Board of Trustees approved sketch-preliminary plans for site development of the Environmental Sciences Bldg and final plans for an addition to the WPSX-TV studio, both at University Park

Preliminary plans for the Library-Learning Center at Delaware County won approval, as did those for a laboratory building at Beaver Campus and sketch-preliminary plans for a York Campus community center.

The Trustees also agreed to development of a local fund-raising campaign by the Berks Campus Advisory Board for eventual construction of a human development and resources building at the Reading Campus.

Land purchase

Officers of the University have been authorized to purchase the right, title, and interest in, to and through the abandoned Bellefonte Central Railroad property running through University property. Included is the station building on North Atherton, now under a 20-year lease to the Borough of State College for use as a bus terminal. It is expected that the lease would be continued. The authorization granted by the Board of Trustees provides for the purchase in an amount not to exceed $12,500. It is expected funds expended will be restored from net rental income. Rails, ties, fittings, etc. of the railroad, which no longer uses the line into State College, are not included in the purcheses.

Trustee notes

Marsan Ungar "Mimi" Barash, State College businesswoman, and Barbara Hackman Franklin, a commissioner at the U.S. Consumer Product Safety Commission, Washington, D.C., have been elected by alumni of the University to three-year terms as trustees.

Re-elected was Michael Baker Jr. of Beaver, founder, owner, president and chairman of the board of Michael Baker Jr., consulting engineers, who has served for the past 12 years as a trustee and ex president of the Board from 1973 until last January.

Mrs. Barash '53, a native of Kingston, and Mrs. Franklin '62, a native of Lancaster, succeed George H. Deike Jr. of Pittsburgh, who had served on the Board since 1963, and Charles T. Douds of Camp Hill, a member of the Board from 1956 to 1963 and from 1967 to date.

Mrs. Barash is president of Barash Advertising and Morgan Signs of State College and publisher of "Town and Gown" magazine. Active in community affairs, she was the first woman president of the State College Chamber of Commerce and is a Pennsylvania Chamber board member.

Mrs. Franklin, who earned an M.B.A. from Harvard Business School, was elected as first vice-chairman of the U.S. Consumer Product Safety Commission and earlier served as a staff assistant to the President of the United States, recruiting women for top federal jobs. She was also an assistant vice-president of the First National City Bank of New York. In 1972, she was honored as a Distinguished Alumnus of the University.

Stanley G. Schaffer of Pittsburgh and Quentin E. Wood of Oil City were elected, along with two incumbents, to three-year terms on the Board of Trustees at the annuel meeting of delegates of Pennsylvania agricultural and industrial societies on May 27.

The two incumbents returned to the Board are J. Lewis Williams, a Uniontown dairy farmer who has been a trustee since 1955 and currently serves as vice president, and John R. Pitzer, Aspers orchardist and agricultural leader, a Board member since 1973. Mr. Schaffer, president of Duquesne Light Co., and Mr. Wood, president of Quaker State Oil Refining Corp., succeed Frederick J. Close of North Madison, O., and Charles E. Oakes of Allentown, neither of whom sought re-election.

Mr. Wood joined Quaker State as a petroleum engineer aiter graduation from Penn State in 1948 with a B.S. degree. He has served as president and chief executive officer since 1975. Mr. Schaffer, a 1941 graduate of the University with a B.S. in mechanical engineering, has been active in Penn State Alumni Council activities and in 1972 was named a Distinguished Alumnus.

Roberi L. Ruttenberg, of Stone Haven Farm, Limekiln, Berks County, has been confirmed by the State Senate as a member of the University's Board of Trustees. Appointed by Gov Shapp, he replaces Stephen A. Sheller.

Mr. Ruttenberg, who is president of Ruttenberg Travel Service, Reading, is a 1941 Penn State graduate with a B.A. in arts and letters. Active in community affairs, he served as vice chairman of the Reading Airport Authority and was a member of the Mayor's Committee for Industry Affairs in 1969-70. He currently is a member of the Board of Trustees of Kutztown State College.

University trustee Ralph D. Hetzel, who presently serves as dean of the College of Fine and Professional Arts at Kent State University, has been appointed provost oi the California Institute of the Arts. Dean Hetzel, a 1933 Penn State graduate, was assistant to the U.S. Secretary oi Commerce and assistant administrator of the Economics Stabilization Agency during the Truman administration. Prior to his appointment at Kent State in 1971, he served as executive vice president of the Motion Picture Association of America.

The institute is the nation's first and only degree granting private institute oi higher learning devoted exclusively to ell the performing and visual arts.

Press guidelines distributed

Guidelines for working with the press have been distributed by the Department of Public Information and Relations for use by University personnel involved in matters of current or potential public interest.

The guidelines, which were drawn up by Public Information Director Arthur V. Ciervo, outline suggested procedures for handling queries from representatives of the print and electronic media.

They note that in the event of controversy, as well as in routine matters, "It is the Director's responsibility to work with those most directly involved to coordinate the release of news items, respond to inquiries from the news media and to offer counsel as requested or required.

". . . Staff officers receiving a press query should feel free to respond directly, if the request pertains to a matter for which he or she has direct responsibility."

In responding to press queries directly, personnel are offered the following guidelines:

•Clearly identify reporter's name and affiliation. If you feel that the request for information is reasonable, give the press person your full cooperation.

•Be fair, friendly and factual in answering questions.

•Comment on matters only within your area of expertise. Refer the reporter to the public information office for experts in other areas.

•Unless you know the reporter, it is probably unwise to comment on a controversial issue even though the reporter promises not to use your name.

•Personal opinions should be clearly identified as such.

•Don't assume that you will see or hear a story before it is released. If scientific or technical data is involved, you might suggest that the reporter check his or her story with you for accuracy before it is released.

•Be aware that broadcast reporters are usually looking for short, succinct answers to a few questions and respond accordingly.

•If you are talking "off the record," make certain you preface your remarks with a clear statement of such.

Press queries should be referred to the Director of Public Information when:

•The public information office has already been provided information concerning the subject for which the information is being sought.

•The query deals with an area where responsibility lies with or is shared with another administrative area.

•The query deals with a matter of University-wide concern or policy.

The guidelines have been distributed to all members of the President's staff, academic deans and directors of Commonwealth Campuses. Additional copies are available from the Department of Public Information and Relations, 312 Old Main.

Elsewhere in academe

The president of the University of Idaho, Ernest W. Hartung, is resigning effective June 30, 1977, after a 12-year term. President Hartung, noting that the university's budget had failed to keep pace with inflation, said: "I've been increasingly restive over the decline, relatively, of funding for higher education in general, and this institution in particular." He added that he hoped "new leadership might be more successful" in attracting stale funds.

+ + + + +

A new report from the Carnegie Council on Policy Studies in Higher Education foresees that by 1980, 90 percent of the nation's colleges and universities will no longer have substantial building programs. By then, the survey said, all available building funds will be used to rehabilitate old structures.

+ + + + +

The University Council, the main advisory group to the University of Pennsylvania's trustees, defeated a proposal of the university's admissions committee to limit students termed high academic risks. Black and Chicano groups had protested, saying the policy would reduce Penn's commitment to recruiting minority students. The plan would have limited to 5 percent of an incoming class those students whose predicted grade point average was 2.0 or less. (Of this 5 percent, three-fourths would have been economically disadvantaged students, with the remainder drawn from special groups such as athletes, faculty or staff children and "special interest" cases.) Although about 70 percent of the so-called high risk students already admitted are doing passing work, the admissions committee said this was an "unacceptably high probability of failure." Opponents said that with better supportive services, more would pass.

+ + + + +

Freshman enrollments in engineering are up for the second year in a row. There were 75,343 freshmen studying engineering last fall, an 18.8 percent increase over 1974. The number of women entering engineering programs rose 60 percent.

+ + + + +

North Carolina State University has abandoned a policy allowing students to drop a course without penalty after nine weeks — or halfway through the semester. Previously students had had only four weeks' leeway. During the two-year period when the nine-week rule prevailed, the number of courses dropped by North Carolina State students increased from 1,500 to 9,000, and 28 percent of the students had fallen below the average course load needed to graduate in four years. In another policy change, designed to combat grade inflation, university officials restored D and F grades. Students had been receiving grades of A, B, C or "no credit."

+ + + + +

Tuition increases for the 1976-77 academic year have been "reluctantly" approved by Temple University's Board of Trustees. Full-time resident and nonresident undergraduate, graduate and law students will all pay $100 more a year. The increase means that Temple will cost in-state undergraduates $1,300 a year, and graduates, $1,400. Nonresidents will pay $2,500 for either a graduate or undergraduate education. Law school tuition will rise to $1,600 for residents and $3,100 for nonresidents, and the university's other professional schools will add from $150 to $200 to their bills.

+ + + + +

Trustees at the University of Pittsburgh have also voted tuition hikes ranging from $70 a year for undergraduates to $1,000 a year for medical students. Effective next fall, Pitt will charge in-state students $1,210 and out-of-staters, $2,420 at its Oakland and Johnstown campuses. Tuition at the regional campuses will be $1,060 in state and $1,700 for others. Graduate tuition will cost state students $1,280 or $140 more next year. Out-of-state students will pay twice that. Reflecting the higher cost of educating advanced degree students, tuition at Pitt's medical school was increased $1,000 — $3,000 for state students and $5,000 for those from outside Pennsylvania. The cost of a dental education will rise $500 a year — to $2,500 for Pennsylvanians, $4,500 for out-of-staters. Law school tuition will cost $1,400 or $150 more for in-staters and $2,800 or an extra $300 beyond state lines.

+ + + + +

Collective bargaining was rejected by faculty members at the University of Vermont and Northeastern University. The Vermont tally was 319 for no bargaining agent, 141 for the American Federation of Teachers, 10 for the American Association of University Professors and 2 for the National Education Association. No agent attracted 272 votes at Northeastern while 267 opted for NEA. The Northeastern vote was a runoff from an earlier election which eliminated the AAUP.

The Bicentennial Bridge designed and built by civil engineering students was dedicated on Saturday, May 29, at Spring Creek Park, Housersville. The footbridge, based on authentic old-Pennsylvania designs, was presented to College Twp. by Dr. Oswald.

News briefs

UNICARE change

As the costs of medical treatment have increased rapidly over the past few years, the University has absorbed very substantial premium increases in its UNICARE coverage. In 1975-76, alone, the increase for the University's UNICARE coverage amounted to approximately 24 percent.

This sharp rise in premium costs has caused the University to seek continued savings in its method of financing such payments with the University's insurance carrier — the Equitable Life Assurance Society. Under the direction of Robert A. Patterson, senior vice president for finance and operations, and with the assistance of Alexander and Alexander, Penn State's insurance consultant, University administrators have negotiated a new financial arrangement with the Equitable which will permit savings without adversely affecting in any way the benefits provided by UNICARE to faculty and staff members.

One facet of the program is that while all procedures for submitting claims to the Employee Benefits Division, Room 133 Wilfard Bldg., remain unchanged, such claims will be sent by Employee Benefits to the Pittsburgh office of the Equitable for processing. Benefit checks will be issued directly from Pittsburgh, as will notifications of payments made. As in the past, all questions regarding insurance coverage and claims payments should be directed to the Employee Benefits Division.

Junior tennis

The second annual Junior Tennis Tournament, sponsored by The Pennsylvania State University Tennis Club, will be held June 28 through July 2.

Categories for entry will be boys' and girls' 12, 14, 16 and 18 year old singles, and 14 and 18 year old doubles. There will be a double elimination policy. Cut-off date for entry is June 21. The tournament will be held on the hard courts east of the University Indoor tennis building.

Entry forms and information may be obtained through the Club or from Richard Lundy, 201 Ronan Drive, State College. Persons interested in housing out-of-town young people playing in the tournament should contact Dorothy Colton, 237-9527.

Stone Valley rates

Visitors to the University's Stone Valley Recreation Area are reminded of new rates, now effective. Hourly canoe and rowboat rental rates are $1 per hour for students and $1.20 per hour for non-students. Entrance to parking areas is 50 cents per vehicle Monday through Friday and $1 per vehicle Saturday, Sunday and holidays.

Sports entries

Entries will be taken at the Intramural Bldg. (across the street from Shields) from Monday, June 14, to noon, Thursday, June 17, for the following sports: men's fast and slow pitch softball, men's outdoor basketball, and co-rec slow pitch softball. Men's fast pitch will be played on a Tuesday-Thursday schedule. There will be a choice for the other sports of Monday-Wednesday or Tuesday-Thursday. Entrants should be prepared to indicate their preference when they register.

Gas up slowly

Drivers who are only planning to travel short distances on hot summer days would do better not to allow gas station attendants to fill their tanks to the top, Safety Division suggests. When cars are parked in the sun, the gasoline in the tank expands, and if the tank was filled when the temperature was lower, the extra gasoline will be forced out the filler pipe. In addition to wasting fuel, the gasoline is easily ignited by a spark or a carelessly tossed cigarette. Safety Division also suggests that in parking areas located on sloping land, drivers park so the rear of the car is higher than the front.

Golf lessons

Registration for boys' and girls' junior golf lessons will start the week of June 14. For information call the Blue Golf Course shop at 865-7462.

Medical film wins

The first prize in a national medical film festival has been awarded to "Evaluation and Treatment of Sleep Disorders," a 55-minute educational film, produced by the Sleep Research and Treatment Center at the Hershey Medical Center and Amram Nowak Associates of New York. The film was chosen from some 85 entries for the "Walnut Leaf Gold Award" for outstanding contribution to continuing medical education in the John Muir Memorial Hospital Film Festival in Walnut Creek, Cal.

The film is a comprehensive survey of frontiers in sleep research and their clinical applications in medical practice. Its primary goal is to educate and assist the physician in the management of patients with sleep disorders, according to Dr. Anthony Kales, chairman of psychiatry and director of Hershey's Sleep Research and Treatment Center. He narrates the film with his wife, Dr. Joyce Kales, who is co-director of the facility.

Convocation hails Bicentennial

The Philadelpha Convocation on Freedom, which will celebrate the Bicentennial with three lectures by nationelly prominent scholars, will be held in Philadelphia's Athanaeum on Thursday, June 17.

The speakers end their topics are: Dr. Paulina Maier, associate professor of history at the University of Messechusetts, on "Freedom, Revolution, and Resistance to Authority, 1776-1976"; Dr. Gordon S. Wood, professor of history at Brown University, on "Freedom and the Constitution"; and Dr. Merrill D. Peterson, Thomas Jefferson Foundation Professor at the University of Virginia, on "Freedom and the Crossroads of Politics: 1789-1801."

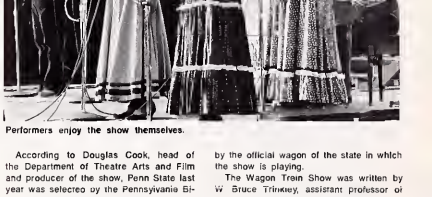
The speakers will be introduced by Dr. Norman A. Graebner, distinguished visiting professor of history at the University, who has been directing Penn State's Bicentennial program, "Freedom: Then, Now and Tomorrow." This program was designed to increase public awareness of the challenges confronting a free society and to further public participation in the political process by sponsoring e thousand town meetings throughout the Commonwealth this year.

The project, which is a continuing education service of the Department of History, has also sponsored more then 20 public lectures in Pennsylvania. These have examined a variety of historic and contemporary issues related to the nation's freedom.

Sponsoring the Convocation, in association with the Delaware County and Dgontz Campuses of the University, ere Academy of the New Church, Bryn Mawr College, Bucks County Community College, Cabrini College, Chestnut Hill College, Community College of Philadelphia, Delaware County Community College, Drexel University, Haverford College, Holy Family College, La Salle College, Saint Joseph's College and Temple University.

Wagon Train rolls into State College on June 21

Centre Countians will get their chance to see show



The Bicentennial Wagon Train Pilgrimage to Pennsylvania, accompenied by the colorful Penn State Wagon Train Show, will arrive in State College and University Park Monday, June 21.

Approximately 35 wagons will gether in the fields south of Beaver Stadium for the evening, with entertainment scheduled to begin at approximately 6:15 p.m. The Wagon Train Show, which has made the trek across the country with the Pligrimege, will be performed following e 7 p.m. community sing, led by 4-H members who will be at the University for their annual Leadership Congress.

The program will open with music by the State College High School Band. The Centre Squares will perform square dances at 6:45 p.m. After the Wagon Train Show, scheduled to begin at 7:30 p.m., the Nittany Knights will present a Barbershop Sing.

The Wagon Train Show, featuring a Bicentennial salute to "ordinary people, like you, like me," has been performed in most of the 50 states, as the wagons pulled into such towns es Silver City, Nev.; Mollala, Dre.; Boonville, Mo.; Stonewall, La.; Gila Bend, Ariz.; and Colfex, ia. Five wagon trains have been on the road, each accompanied by a Penn State troupe.

The wagons set out from various points in the country during the past year. Lest summer, the original trains started from Blaine, Wash., and Carson City, Nev. After "wintering over," five trains started again, leaving at various times from Los Angeles, Calif.; Houston, Tex.; Shreveport, La.; Orlando, Fla.; and Fort Laramie, Wyo. The trains picked up an additional wagon as they entered a new state. All five trains will converge July 4 on Valley Forge for a gala final celebration. Wagons from every state, including Hawaii and Alaska, will pull into Valley Forge for the concluding ceremonies.

Performers enjoy the show themselves.

According to Douglas Cook, head of the Department of Theatre Arts and Film and producer of the show, Penn State last year was selecteo oy the Pennsylvania Bicentennial Commission to put together a show that could "be performed for an audience of thousands or for a small group just coming to look over the wagons." The show has been performed before an audience of 25 persons in Mollala, and before 30,000 in a field outside Chicago.

Six college-age performers — in the five troupes, many are Penn State students — dance, sing, end play guitar and piano during the 40-minute salute, which features 12 original tunes.

The show touches on e variety of topics, including parodes, immigration and old-fashioned patriotism. The troupe, which is supervised by a stage manager, performs against e backdrop of wagons, highlighted by the official wagon of the state in which the show is playing.

The Wagon Train Show was written by W. Bruce Trinkley, assistant professor of music; Dr. Roger Cornish, assistant professor of theatre; and Don Tucker, a Broadway lyricist and composer serving as a consultant to the project.

Menuel Duque, assistant proiessor of theatre and tiim, has been responsible for staging the performances. "The finished performances, of course, had to be tlexible enough to adjust to the different locales," he notes. "Although the Conestoga wagons always provided a backdrop for the show, the scenery behind was constantly changing."

In fact, the locations have included Little League fields, rodeo arenas, football stadiums, high school auditoriums (in bad

University co-sponsors black history exhibit

The University is co-sponsoring a mobile exhibit of Pennsylvania's black history which is touring the State.

The mobile van contains rare artifacts, a chronology of black life in Pennsylvania, and an audio-visual exhibit of creative endeavors by the late Paul Robeson, Marian Anderson and other black Pennsylvanians. It is touring the State with the Pennsylvania Bicentennial Human Relations Congress being conducted by the Pennsylvania Conference of the N.A.A.C.P. and the Bicentennial Commission of Pennsylvania.

The exhibit is based on the book, "Pennsylvania's Black History," by Charles L. Blockson, a Penn State alumnus who as an undergraduate played football and held records in the shot put and discus throw. He now is advisory specialist in human relations and cultural affairs for the Norristown School District.

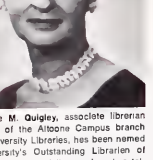
Portfolio Associates, Inc., of Philadelphia publishers of Mr. Blockson's book, designed and fabricated the moving exhibit, which is being displayed in Erie, Pittsburgh, Harrisburg, Scranton and Philadelphia in conjunction with the meetings of the Pennsylvania Bicentennial Human Relations Congress. The trailer was donated by Interstate Construction Co., a division of Westinghouse.

Mr. Blockson owns one of the world's most extensive collections of black memorabilia, including 6,000 rare first editions of books by end about blacks. His contributions to the exhibit include copies of "The Pennsylvania Freeman," e black newspaper published in 1850, slave shackles, end e portion of his rare book collection. A chronological history of blacks in the State recalls the story of black street vendors, who have been selling their wares on Philadelphia straets for more than 200 years.

House Majority Leader, K. Leroy Irvis, opened exhibit.

The exhibit also recounts the dramatic, ingenious, and often amazing escapes of slaves to Pennsylvenia, and tells the story of James A. Bland who wrote the Mummers' Theme, "Golden Slippers," and "Carry Me Back to Ole Virginny." Also included are photographs of the Civil War and an audio-visual exhibit of the works of creative black Pennsylvanians.

"The exhibit and the book, 'Pennsylvania's Black History,' offer blacks throughout the State the chance to become acquainted with our history," says Beverly Harper, president of Portfolio Associates.



The Pennsylvania Conference of N.A.A.C.P. branches has dedicated the mobile exhibit to the legacy of William "Bill" Powell, black reporter, activist, and member of the N.A.A.C.P., and other black women and men who have dedicated their lives to making Pennsylvania a better place for all citizens, according to Ms. Harper.

The Pennsylvania Bicentennial Human Relations Congress is convening in five communities throughout the state to review past human retations activities and recommend future programs.

The van will visit the New Kensington Campus June 6-8; the Fayette Campus at Uniontown, June 28-July 6; and the University Park Campus, July 15-19. Other locations scheduled are with the Pittsburgh School District, Western Penitentiary, Pittsburgh; Clairton; Johnstown; Federal Prison at Lewisburg; East Stroudsburg State College; Temple University and other locations in Philadelphia.

PENN STATE COLLECTION

Faculty notes

Marjorie M. Quigley, associate librarian and head of the Altoona Campus branch of the University Libraries, has been named the University's Outstanding Librarian of the Year. The award "recognizes her talent for organization, her commitment to serving the needs of students and faculty, and her generous giving of herself for the good of the wider University community."

Mrs. Quigley, who will retire on June 30, has been with the University since 1960, when she began as an instructor in library science at Altoona. Before coming to Penn State, she was an assistant librarian at the Boise, Idaho, Public Library, and the Oeschutes County Library, Bend, Ore. She holds a B.A. in English from the University of Oregon and a B.S. in library science from the University of Washington Library School.

Dr. Arnulf Muan, professor of mineral sciences, will become associate dean for research in the College of Earth and Mineral Sciences on July 1. He succeeds Dr. Maurice E. Bell who plans to retire on June 30.

Dr. Muan has been a member of the faculty since 1955. He headed the Department of Geosciences until 1974. At that time, he resigned as department head to devote full time to teaching and research. He received his diploma in chemistry at the Technical University of Norway at Trondheim in 1948 and a Ph.D. in geochemistry at Penn State in 1955. His major research interests include heterogeneous equilibria at high temperatures, thermodynamics at high temperatures with special emphasis on oxide systems, and the application of these principles to mineralogy, to slag and refractory problems and to the use of materials in high-temperature environments.

He is the author or co-author of more than 100 articles in technical journals and served as president of the Mineralogical Society of America in 1974-75

Dr. Moylan C. Mills, assistant professor of English, became the fifth recipient of the annual Ogontz Campus Award for Outstanding Teaching during commencement exercises, May 27, when 54 associate degrees and 23 baccalaureate degrees were awarded. The award was established in 1972, and recipients are selected by a committee of the Ogontz Faculty Senate from nominees submitted by students and faculty. A 1952 Penn State journalism graduate, Dr. Mills received his master's degree in English from the University in 1957. He worked as a newspaper reporter, book editor and advertising account executive before his appointment to the Ogontz faculty in 1959. He received his doctorate in English from the University of Pennsylvania in 1974.

A teacher of humanities and the arts, as well as English, Dr. Mills is also coordinator of the English department at Ogontz; Liberal Arts representative for the extended degree program in Letters, Arts and Sciences; and works with the Educational Opportunity Program. He has served as chairman of the Ogontz Faculty Senate, as a member of the University Senate and the University Council, and as co-chairman of the Eastern regional faculty development symposium.

Four additional sabbatical leaves have been approved at the University. **E. Lynn Miller,** associate professor of landscape architecture and assistant dean for research, Arts and Architecture, will be on leave winter and spring terms. He plans to do research in the United Kingdom on Humphrey Repton, a famous 18th century landscape architect and to work with the Civic Trust, a non-profit organization which encourages and provides expertise for community and neighborhood revitalization.

Benjamin H. Pubols Jr., associate professor of anatomy at Hershey, will be on leave from September, 1976, to March, 1977, to work in the laboratory of Dr. George L. Gerstein, a member of the faculty of the Interdepartmental Institute of Neurological Sciences.

Murray D. Budney, assistant professor of humanities and French at Capitol Campus, will revise his translation of Baudelaire's "The Spleen of Paris" during a fall and winter term leave. **George D. Wolf,** dean of faculty and professor of American studies and history at Capitol, plans to be on leave from July through December to complete a book on Pennsylvania politics in the Scranton era.

Dr. Patricia Farrell, associate professor of recreation and parks, has been named head of the Recreation and Parks program in the College of Health, Physical Education and Recreation. She succeeds Dr. Tony A. Mobley, who will become dean of the School of Health, Physical Education, and Recreation at Indiana University at Bloomington.

Dr. Farrell, who served for nearly three years as affirmative action officer at the University before returning to her faculty position last year, received her B.S. and D.Ed. at Penn State. She holds an M.Ed. from the University of Minnesota. She was the 1975 recipient of the McKay Donkin Award, given annually to a faculty or staff member who has contributed most to the economic, physical, mental or social welfare of the University faculty.

Before joining the Penn State faculty in 1967, she served as assistant director of public recreation in Harrisburg, program director of the Shawnee 4-H Northern Illinois University, and assistant professor at the University of New Hampshire.

Ray A. Grove, who has been a mechanical engineer with the Naval Surface Weapons Center, Silver Spring, Md., since 1968, has been named a research assistant with the Applied Research Laboratory. He is a graduate of the University of Rochester with a B.S. in mechanical engineering and has been enrolled for graduate work at the University of Maryland.

Dr. Robert J. Graham, associate professor of humanities and American studies, has been appointed program head in humanities at Capitol Campus effective July 1. He replaces **Dr. Richard Fichter,** professor of English and humanities at Capitol, who is returning to full-time teaching and research duties.

Dr. Lloyd A. Morley, associate professor of mining engineering, has been named chairman of a new mining safety standards subcommittee of the Standards Committee of the Industry Applications Society of the Institute of Electrical and Electronics Engineers, Inc. The subcommittee is to develop mining industry electrical safety standards to be used by the Federal Mining Enforcement and Safety Administration, which is responsible for safeguarding the health and safety of miners.

Dr. Francis M. Dwyer, senior research associate of education and coordinator of instructional evaluations in the University Division of Instructional Services, has been appointed to the National Science Foundation's Committee on appraisal of programs submitted in the Technological Innovations in Education Program. The program provides support for the development of innovative computer and related communication technologies and systems designed to improve the quality and efficiency at all levels of education.

Dr. Winston A. Richards, associate professor of mathematics and statistics at Capitol Campus, has been assigned by the Secretariat of the Organization of American States to offer technical assistance to the Government of Trinidad and Tobago this summer. He will advise the Ministry of Finance's planning and development staff and also offer a statistics course at the University of the West Indies. Dr. Richards has bachelor's and master's degrees in mathematics from Marquette and an M.A. and Ph.D. in mathematics from the University of Western Ontario.

Dr. John H. Pazur, professor of biochemistry, is presenting a paper at the annual meeting of the Canadian Federation of Biological Societies this week. He will discuss his work on the preperation and properties of antigalactose and anti-lactose antibodies specific for antigens from bacterie and tumors. The studies are of special importance in relation to the possible detection and treatment of some tumors by immunological means.

Three Berks County faculty members will spend the summer working on projects at University Park as part of the University's Faculty Interchange Program. **Dr. Stanley D. Furrow,** assistant professor of chemistry, will continue research on oscillating chemical reaction. **Denton A. Stetly,** assistant professor of engineering, will teach in a three-week practicum in industrial practices offered to associate degree candidates in Manufacturing Engineering Technology. "Adaptational Biology of the Feral Hogs of Ossebow Island, Georgia," is the title of the study which is being undertaken by **Dr. Siamalis M. Zervanos,** assistant professor of biology. He will collect data on energy metebolism, food requirements end water end salt balance for both captive animals at University Park and wild animals at the Georgia site.

Dr. Kenneth H. Messner, chief of ophthamology at Hershey, has been elected to a three-year term as director of the Pennsylvania Academy of Ophthamology and Otolaryngology, a statewide association of eye, ear, nose and throat physicians.

H. C. Neuhaus, instructor in journalism at Wilkes-Berre, received the ninth annual Heyfield Award of the Campus's Student Government Association. The award is presented to the faculty member whose academic and co-curricular contribution to the student body has been judged as "the most outstanding" for the academic year.

R. Thomas Berner, assistant professor of journalism, is assisting Ben H. Bagdikian, the noted media scholar, in a newspaper survival study. The study is aimed at describing what factors make for prosperity in American daily newspapers and what factors lead to decline. It is funded by the John and Mary R. Markie Foundation of New York City and administered by the American University of Washington, D.C. Mr. Berner is studying 13 newspapers in Pennsylvania and three in New York.

Dr. H. K. Henisch, professor of physics and a member of the staff of the Materials Research Leboratory, will be session chairman and keynote speaker at an International Conference on Thermally Stimulated Processes, to be held at Montpellier, France, June 22-26. The workshop is organized by the Center for Studies on the Electronic Properties of Solids, Academy of Montpellier. Dr. Henisch will speak on the design of experiments and their interpretation, in the light of recent findings on the behavior of relaxation semiconductors.

Dr. Henisch, who is also professor of the history of photography, has been elected a Fellow of the Royal Photographic Society of Great Britain. The society is the oldest photographic society in the world and was founded in 1853 by Roger Fenton, one of the early photo-journalists. Its object is to promote and maintain high photographic standards. Fellowship is the highest rank of society affiliation, and fellows are elected on the basis of a portfolio of 15 photographs, published research papers and books, and, where applicable, a record of educational and professional activity in the field.

Stanley J. Nowak Jr., instructor in English at Ogontz, has been named Chief Ogontz of 1976, the highest honor bestowed on a faculty member by the Ogontz Campus student government organization. He was awarded the Chief's medallion at Honors Convocation, together with a citation which recognizes "dedication, inspiration, educational ideals, active participation, and outstanding contributions to student life."

Emerson L. Grindell, professor of engineering research at the Applied Research Leboratory, has received a 25-yeer service award from the University.

A graduate of Olivet College with an A.B. in physics, Prof. Grindell earned an

M.S. in mathematics at Michigan State University. His research interests have encompassed applied mathematics, underwater ecoustics, underweter missile engineering and shock and vibration studies.

Active in area community activities, he served as president of the Optimist Club and is a member of the Juniata Valley Council Executive Board of the Boy Scouts. He was also a national council representative and Nittany Mountain District scout chairman. Prof. Grindall served as a member of the State College Area Schools' Self Evaluation Committee, of the State College Athletic Board of Control and of the Community Development Council.

Prior to coming to Penn State, he was a high school teacher and principal in Michigan.

Dr. Kent Forster, professor of European history and head of the Department of History, presented an invited lecture at the Army, Navy and Generals' Staff College at Fort Leavenworth, Kan., on "Finnish High Command Decision-Making, 1939-1944."

Dr. Robert C. Block, assistant professor of biology at Delaware County, is the author of an article, "Indoleacetic Acid Synthesis in Soybean Cotyledon Callus Tissue," published in the March issue of "Plant Physiology."

Stephen P. Lagoy, assistant professor of criminal justice at Delaware County, coauthored an article, "An Empirical Study on Information Usage of Prosecutorial Decision Making in Plea Negotiation," which appeared in a special symposium issue of the "American Criminal Law Review."

Eight faculty members from the Department of Biochemistry and Biophysics participated in the American Society of Biological Chemists meeting in San Francisco, Calif., June 6-10. They were: **Dr. Nathan Aronson,** associate professor of biochemistry; **Dr. Stephen Fahnestock,** assistant professor of biochemistry; **Dr. Roy Hamerstedt,** assistant professor of biochemistry; **Dr. Charles Hartzell,** assistant professor of biochemistry; **Dr. F. Frank Imlefte,** professor of biochemistry; **Dr. Richard McCarl,** professor of biochemistry; **Dr. Allen Phillips,** professor of biochemistry; and **Dr. Paul Werme,** assistant professor of biochemistry.

Dr. Irwin Richmen, professor of American studies and history at Capitol Campus, presented a peper, "The Vernacular House in a Changing Landscape," to the Society for Architectural Historians in Philedelphia last month.

"Time Deepening and the Future of Leisure" was the topic of **Dr. Geoffrey Godbay,** associate professor of recreation and parks, at the 103rd Annual Forum of the National Conference on Social Welfare, which is being held this week in Washington, D.C.

Dr. Luis F. Gonzatez-Cruz, associate professor of Spanish at New Kensington, presented an invited paper at the 1976 Spring Methodology Workshop on Foreign Language Teaching at Indiana University of Pennsylvania. His topic was "Guidelines and Idees to Boost College Enrollment in Foreign Language Classes."

Dr. A. James Liedtka, associate professor of medicine (cerdiology) at Hershey, presented a paper, "Hyperthermic Insult to Ischemic Myocardium: Implicetions of Fever as an Energy Draining Process in Myocardial Infarct," at the national meetings of the American Federation for Clinical Research.

300-year-old lost technique is rediscovered

When Dutch microscopist Antonie van Leeuwenhoek discovered bacteria in 1676, he reported the finding to the Royal Society of London but refused to reveal his technique and took the secret he called his "particular method of observing" to his grave.

Now, a Penn State microbiologist, Dr. L. E. Casida Jr., has rediscovered Leeuwenhoek's probable method and believes the lost 300-year-old technique might aid in the search for life on Mars.

Leeuwenhoek's secret, says Dr. Casida, was the use of a simple form of dark field illumination, a type of lighting that produces an image in which the background is totally black and the bacterie appear as bright, white, moving spots.

Dr. Casida has shown that Leeuwenhoek probably achieved this dark field by causing a beam of sunlight or candlelight to strike the sample from behind at a 45 degree angle. By holding the microscope (which was nothing more than a tiny magnifying glass mounted between two brass plates) close to his eye, the bridge of his nose would block out any stray, unwanted light, Dr. Casida explains.

Dr. Casida points out that in order to observe anything as small as bacteria, Leeuwenhoek must have used a technique for increasing the contrast between the bacteria and the water in which they were suspended in order to enhance the effectiveness of his exquisitely ground but very low power lens. Dark field illumination would be the best method for doing this, Dr. Casida says, but the proof that it was actually Leeuwenhoek's secret lies in the Dutchman's own words.

In describing his observation of red

L. E. Casida Jr.

blood cells, Leeuwenhoek wrote that they appear like "sand grains that one might bestow upon a piece of black taffety silk" or white on black — exactly the image produced by dark field illumination. Dr. Casida notes that Leeuwenhoek also stated that his secret did not concern his microscope design, but was related to his "particular method of observing" — additional support for the use of dark field illumination.

It is the ability of dark field illumination to enhance observation at low power magnifications that Dr. Casida believes might be able to aid in the search for life on Mars. Modern high magnification microscopes have been banished from the remote control Martian landings because they are heavy, bulky and difficult to manipulate by remote automation.

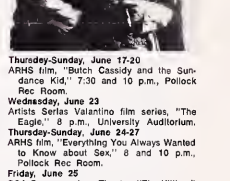
"Perhaps by using Leeuwenhoek's secret, we could send a lightweight, low power microscope that would get around the weight, complexity and automation problems," the Penn State scientist notes.

Dr. Casida, who is internationally known as the discoverer of several types of bacteria and as the developer of two widely accepted methods of sample preparation for the electron microscope, has been pondering Leeuwenhoek's secret for nearly 15 years. A lifelong photographic hobbiest, he originally thought that Leeuwenhoek must have projected the image from his microscope. Nevertheless, he eventually came back to the more widely accepted view that some form of dark field illumination probably was involved. But if was only after he abandoned efforts to apply modern microscope theory to Leeuwenhoek's tools that he found the Dutchman's method.

Dr. Casida says that while testing some other ideas, he suddenly had the notion that the secret was the precise placement of the light. "I shifted the light around to various ecute angles and finally it worked," he says.

Dr. Casida did his original experiments on a modern Leitz Orthoplan microscope set for 100 or 250 fold magnifications but with its condenser removed. He later repeated the observations with three low power magnifiers including an exact replica of a Leeuwenhoek microscope supplied by the American Society for Microbiology.

His results will be detailed in the June 25 issue of the journal, "Science." The project was supported, in part, by a grant from the National Aeronautics and Space Administration.



Calendar

Special events

Thursday, June 17
Commons Videotape, NDVA, "Inside the Shark," 12 noon, Kern lobby.
Friday, June 18
HUB Terrace Room, South Sea Isle Special Dinner, 4:45-7 p.m.
GSA Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Saturday, June 19
HUB Terrace Room, South Sea Isle Special Dinner, 4:45-7 p.m.
Monday, June 21
Bicentennial Wagon Train Pilgrimage to Pa., 6:15 p.m., field south of Beaver Stadium. Penn State Wagon Train show, 7:30 p.m.
Wednesday, June 23
Festival Theatre, "Bus Stop," student preview, 8 p.m., Pavilion Theatre.
Thursday, June 24
Commons Videotape, "Bob Woodward and Carl Bernstein," 12 noon, Kern lobby.
Festival Theatre, "Bus Stop," 8 p.m., Pavilion Theatre.
Friday, June 25
GSA Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Festival Theatre, "Bus Stop," Pavilion Theatre. Behind-the-Scenes program, 3 p.m.; performance 8 p.m.
Saturday-Sunday, June 26-27
Festival Theatre, "Bus Stop," Pavilion Theatre. Saturday at 8 p.m., Sunday at 7:30 p.m.

Films

Thursday, June 17
Artists Series Valentino film series, "Blood and Sand," 8 p.m., University Auditorium.

Thursday-Sunday, June 17-20
ARHS film, "Butch Cassidy and the Sundance Kid," 7:30 and 10 p.m., Pollock Rec Room.
Wednesday, June 23
Artists Series Valentino film series, "The Eagle," 8 p.m., University Auditorium.
Thursday-Sunday, June 24-27
ARHS film, "Everything You Always Wanted to Know about Sex," 8 and 10 p.m., Pollock Rec Room.
Friday, June 25
GSA Commonsplace Theatre, "The Killing," 7:30 and 9:30 p.m., Room 112 Kern.

University schedule

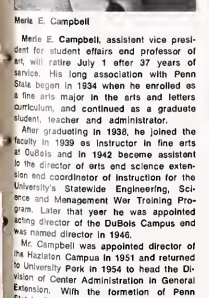
Friday, June 18
Add deadline.
Friday, June 25
File for Pass/Fail.

Meeting

Monday, June 21
Color Slide Club, 7:30 p.m.

Seminars

Friday, June 25
Materials Sciences, 10:45 a.m., Room 301 Mineral Industries. Dr. Dennis W. Ready, Energy Research and Development Administration, Washington, D.C., on "Materials Problems in Advanced Energy Systems."



Lectures

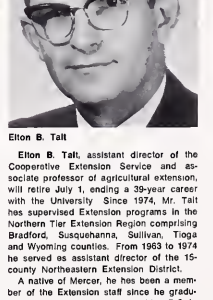
Wednesday, June 23
History Department Bicentennial Lecture Series, Dr. Norman A. Graebner, distinguished visiting professor of history, on "Colony Perceptions of Freedom," 8 p.m., Room 112 Kern.

Exhibits

Museum of Art: Selections from the Permanent Collection. American Paintings and Furniture from the Permanent Collection, opening June 22.
HUB Gallery: Renascence Gallery Multi-Medie Exhibit. The Hellmark Historical Collection, A History of Greeting Cards.
Chambers Gallery: Wayne Burns, Metal Sculpture.
Kern Gallery: "Artifacts of Penns Creek"; As collected by Robert Doyle and researched by James Hatch and Alan Snavely. Rebecca Kamen and Marilyn Weisensee, Sculpture and Stitchery. Steven Merville, Photography.

Retirements

Merle E. Campbell



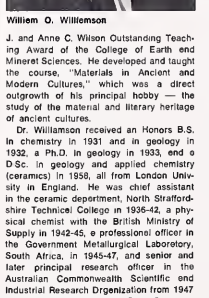
Merle E. Campbell, assistant vice president for student affairs and professor of art, will retire July 1 after 37 years of service. His long association with Penn State began in 1934 when he enrolled as a fine arts major in the arts and letters curriculum, and continued as a graduate student, teacher and administrator.

After graduating in 1938, he joined the faculty in 1939 as instructor in fine arts at DuBois and in 1942 became assistant to the director of arts and science extension and coordinator of instruction for the University's Statewide Engineering, Science and Management War Training Program. Later that year he was appointed acting director of the DuBois Campus and was named director in 1946.

Mr. Campbell was appointed director of the Hazleton Campus in 1951 and returned to University Park in 1954 to head the Division of Center Administration in General Extension. With the formation of Penn State's Commonwealth Campus system in 1958, he was appointed dean of student affairs for Commonwealth Campuses. In 1966 he was also named acting director of student affairs for the University. He was appointed to his present post in 1972.

Mr. Campbell's continuing involvement in the arts has been evidenced by his sponsorship of Artists Series programs and art exhibitions for the Commonwealth Campuses and by the continuing emphasis he has given to the support, improvement and expansion of locally-based cultural programming efforts. He has played a significant role in the growth and development of the Commonwealth Campus System in the area of student affairs, he has been the principal architect of staff planning and development for the campuses and of liaison-coordination arrangements between University Park and its branches.

His retirement plans include a vigorous return to the painting easel, travel, entiquing and the active pursuit of early Americana. He and his wife, the former LaGene McEntire of New Castle, plan to maintain their residence in State College.



Elton B. Tall

Elton B. Tall, assistant director of the Cooperative Extension Service and associate professor of agricultural extension, will retire July 1, ending a 39-year career with the University. Since 1974, Mr. Tall has supervised Extension programs in the Northern Tier Extension Region comprising Bradford, Susquehanna, Sullivan, Tioga and Wyoming counties. From 1963 to 1974 he served as assistant director of the 15-county Northeastern Extension District.

A native of Mercer, he has been a member of the Extension staff since he graduated from Penn State in 1937 with a B.S. in animal husbandry. He earned his M.S. in rural sociology at Cornell. Prof. Tall served for six years as assistant county agent in Centre, Huntingdon, Blair, Lycoming and Sullivan counties before becoming Extension radio editor in 1943. Later he also took charge of work in television, continuing with these duties until 1960, when he was appointed to the newly-created position of training director, where he served until his promotion to assistant director in 1963.

Dr. William D. Williamson, professor of ceramic science, will retire on June 30 with emeritus rank after 17 years of service. Last year he received the Matthew

Willem O. Willemson

J. and Anne C. Wilson Outstanding Teaching Award of the College of Earth and Mineral Sciences. He developed and taught the course, "Materials in Ancient and Modern Cultures," which was a direct outgrowth of his principal hobby — the study of the material and literary heritage of ancient cultures.

Dr. Williamson received an Honors B.S. in chemistry in 1931 and in geology in 1932, a Ph.D. in geology in 1933, and a D.Sc. in geology and applied chemistry (ceramics) in 1958, all from London University in England. He was chief assistant in the ceramic department, North Staffordshire Technical College in 1936-42, a physical chemist with the British Ministry of Supply in 1942-45, a professional officer in the Government Metallurgical Laboratory, South Africa, in 1945-47, and senior and later principal research officer in the Australian Commonwealth Scientific and Industrial Research Organization from 1947 to 1959, when he came to Penn State.

He has published in the fields of petrology, microstructure and rheology of explosives, surface phenomena, ancient material technology, and various aspects of ceramic science and engineering. His primary research interests are inorganic surface chemistry, the relations of microstructures to properties in ceramic materials, and the high-temperature reactions of such materials.

In retirement, Dr. Williamson plans to continue learning and teaching by sitting in on courses and seminars and making himself available to serve as an invited lecturer. He and his wife recently became U.S citizens and will continue to live in State College.

Elsewhere in academe

Total enrollment at state and land-grant universities increased 6.25 percent in the fall of 1975, according to a survey by the National Association of State Universities and Land-Grant Colleges' Office of Research and Information. An increase of 18.2 percent in the enrollment of first-time freshmen accounted for more than a third of the total increase. Together, state and land-grant schools enrolled approximately 3.3 million students in fall, 1975, almost 30 percent of the total U.S. higher education enrollment of 11,240,187.

+++++

The preportionete financial burden on individual families with children in college has eased, according to a report on "The States and Higher Education," compiled by the Carnegie Foundation for the Advancement of Teaching. The report, which compared outlays for higher education in 1929 with current levels, concludes that "the net cost of higher education per student to the family — for subsistence and tuition — has actually gone down in constant dollars by about 9 percent." This has happened during a period when per capita real income has nearly tripled. "Thus," the report continues, "the comparative burden, per student, on the average family now, compared with the average family with college students then, has gone down by about two-thirds." Tuition has risen, but only about one-third as fast as per capita real income, and taxpayers are assuming an increasing portion of higher education's financial burden as governments at both state and federal levels have boosted their outlays from $1.6 billion in 1929 to $25 billion today.

+++++

Thomas Jefferson University graduated 217 new physicians on June 11, the largest medical school class in Pennsylvania history. Thirty four of the new doctors were members of the Penn State-Jefferson five-year cooperative program.

+++++

The states in general get high marks for their support of higher education and will play even more important roles in the future, according to another report from the Carnegie Foundation. Wisconsin, the study found, ranks highest in effort — the percentage of state personal income spent on higher education. Alaska is first in concern — expenditures per full-time-equivalent student in public institutions. South Dakota led in competitive position — a comparison of activities supported by state expenditures; and neighboring North Dakota ranked first in an index of states' fiscal capacities to support higher education. In his analysis, the foundation said that support of public research universities in many states has declined in the past 15 years in relation to support for other institutions of higher education. States that have reduced their comparative expenditures on research universities are clustered in the Midwest and include Kansas, Kentucky, Michigan, Missouri, Tennessee and Wisconsin. States which have increased expenditures were mostly located in the South and include Arkansas, Georgia, Maryland and Mississippi.

+++++

George Dennis O'Brien will take office July 1 as 12th president of Bucknell University. Dean of the faculty and professor of philosophy at Middlebury College, Dr. O'Brien previously taught at the University of Chicago, Princeton and LaSalle. He succeeds Charles H. Watts 2d, who resigned after 12 years as president and who will become president and chief executive officer of the Wolf Trap Foundation, Vienna, Va.

(227-1) The OHEW National Institute of Education (NIE) has issued proposed regulations for the Basic Skills and Research Grants Program (deadline June 24) and the Education and Work Grants Program (deadline July 9). Basic Skills involves research in: teaching, learning, issues in the validity of educational measurement, design and analysis problems of educational research and evaluation, and law and education. Work Grants involves research in the career decision-making process and pre-occupational interests and occupational preferences. (Ref. 41FR18518-22, 18539; 5/5/76) (CFDA 13.579)

(227-2) The OHEW Office of Human Development (OHD) has issued proposed regulations for program and grants administration of head start, technical assistance and training, and research, demonstration and pilot projects. (Ref. 41FR76605-16, 5/5/76) (CFDA 13.600)

(227-3) The OHEW Office of Education (OE) has issued final regulations for its Program for the Gifted and Talented, including assistance to state and local educational agencies for planning, development, operation and improvement of programs; state and local education training, leadership personnel training, and model projects. (Ref. 41FR-18550-73, 5/6/76) (CFDA 13.562)

(227-4) The NFAH National Endowment for the Arts Visual Arts Program has issued guidelines for fellowships in crafts for FY 1977 and an application deadline and grant calendar. Deadlines range from Oct. 1, 1976, through Jan. 1, 1977, for 10 programs, each of which is discussed. (Ref. 41FR18720-29, 5/6/76)

(228-4) The U.S. Department of Justice Law Enforcement Assistance Administration (LEAA) will fund innovative programs to divert juvenile offenders from formal court processing and incarceration. Urban areas with large populations are the target (Ref. C&U Repts No. 570)

(229-4) Final criteria for the selection of applicants for the Career Training Program have been issued by the OHEW Office of Education. Criteria include: instructions program, community-based education; institutional application, multi-cultural orientation, diagnostic-prescriptive teaching, school-staff focus, collaborative decision making and training for systematic adaption of research findings. (Ref. 41FR17955-57, 4/29/76)

(229-1) The National Institutes of Health (NIH) have released a Guide to NIH Programs and Awards (March 1, 1976) containing program information and award mechanisms. (Ref. OHEW Pub. No. (NIH)76-33)

(229-2) A special report, Federal Funding for Agricultural Projects, has been issued by the Office of Federal Programs, a unit of the American Association of State Colleges and Universities. Programs of federal support for agriculture, in addition to those of the U.S. Dept. of Agr., are included. Program categories include: agricultural economics, education, and technology; animal science, range and wildlife management; and plant and soil sciences (Ref. C&U Repts. Sept. 1976)

(229-3) The OHEW Office of Education has issued final regulations for grants and contracts under the Consumer's Education Program. Included are: consumer demonstration, and pilot projects furnishing consumer education to the public. OE will also fund pre-service and in-service training programs for teachers, technical assistance projects, and distribution systems of educational materials. (Ref. 41FR21191-95, 5/24/76)

(229-4) The NFAH National Endowment for the Arts has published FY 1977 application guidelines Jazz Folk Ethnic Music. The application deadline is Dec. 1, 1976. The next deadline is expected to be October. (Ref. 41FR21225-57, 5/24/76)

(226-5) Architecture + Environmental Arts grants guidelines have been issued by NFAH/NEA, including a grant activities information chart for eight programs. Deadlines range from June to December (Ref. 41FR21419-32, 5/25/76)

(229-6) Final regulations for the National Reading Improvement Program have been published by the OHEW Office of Education. The program includes: reading improvement projects, state reading improvement programs, special reading projects, reading academy program, and state leadership and training projects. The closing date for this last program is June 28. (Ref. 41FR21453-75, 5/26/76) (CFDA 13.553)

(229-7) The OHEW Office of Education has published interim final criteria and a June 28 deadline date for FY1976 applications under its programs of Public Service Education Fellowship and Institutional Grants. (Ref. 41FR21501-04, 5/26/76) (CFDA 13.555)

(229-8) The Andrew W. Mellon Fellowship Program (Vatican Film Lib., Plus XII Memorial Library, Louisiana State Univ., 3655 W. Pine, St. Louis, Mo 63108) offers per diem and travel expenses to post-doctoral scholars wishing to work with the film library collection in St. Louis for a period of less then a month to a semester. A major portion of the Vatican's library of Latin, Greek, Arabic, Ethiopic and Hebrew manuscripts are available at the library. Applications consist of a budget, a curriculum vitae, a description of proposed research, a publication list (including samples) of the applicant's work and three letters of recommendation from persons qualified to judge the applicant's scholarship and technical skills. Application deadlines are Aug. 1 and Nov. 1, 1976, and April 1, 1977. For further information, write to address given above.

(229-9) Woodrow Wilson International Center for Scholars (Room 321, Smithsonian Institution Bldg., Washington, D.C. 20560) invites applications from post-doctoral scholars wishing to work in Washington using its facilities for 4-12 months. Space, facilities and sometimes stipends are available. The next application deadline is Oct. 1. For further information, write to address given above.

WPSX highlights

In 1936, black American track star Jesse Owens won four gold medals in the Berlin Olympics but was reportedly snubbed by Hitler. In 1951, Mr. Owens returned to Berlin, and the city gave him his overdue acclaim. Mr. Owens' experiences in both 1936 and 1951 are documented on **The Olympiad** at 9 p.m. on Thursday, June 17. The hour-long program, subtitled "Jesse Owens Returns to Berlin," may also be seen at 10 p.m. on Sunday, June 20.

"Should We Choose Our Presidents Differently?" That is the question raised when William F. Buckley, Jr., talks with political writer Richard Reeves on **Firing Line** at 7 p.m. on Saturday, June 19. Mr. Reeves believes that the faults of the political system, magnified by the use of television, push the least offensive candidate to the top. The discussion centers around his book, "A Ford, Not a Lincoln."

The Alec Guinness Film Festival continues at 9 p.m. Saturday, June 19, when **Theatre Three** presents "The Lady Killers." This 1956 film teams Guinness with Peter Sellers in a story about an improbable band of thieves, who find that the basis is thwarted by the refined lady with whom Guinness has taken lodgings.

A contest of wills is the focus of "Mozart in Seattle" at 9 p.m. on Monday, June 21. This hour-long documentary follows conductor Milton Katims and violinist Henryk Szeryng as they prepare for a performance of Mozart's "Sinfonia Concertante." The program may also be seen at 10 p.m. on Wednesday, June 23.

Scientist Paul Berg discusses his career and his research with host Gil Aberg on **Talkabout** at 10 p.m. on Monday, June 21. Dr. Berg, who recently came to Penn State as an Alumni Fellow, has done extensive research on genetics, cancer and hereditary disease. **Talkabout** may also be seen at 5 p.m. on Tuesday, June 22, and at 12 p.m. on Saturday, June 26.

Choreographer Eliot Feld's "Tzaddik" is featured on **Dance for Camera** at 10 p.m. on Tuesday, June 22. Set to music by Aaron Copland, the ballet features Mr. Feld in the title role of a bearded "tzaddik" or righteous men, accompanied by two disciples.

American poet Archibald MacLeish talks with Bill Moyers on **Bill Moyers' Journal** at 10 p.m. on Thursday, June 24. Mr. MacLeish discusses the spirit of the American republic, his impressions of the founding fathers, and such diverse subjects as the law, God, age and the city of Paris.

News in brief

Valentino film series

The great silent film star, Rudolph Valentino, will light up the screen in University auditorium during a Valentino Film Series sponsored by the Artists Series this month.

Thursday, June 17, he co-stars with Lila Lee and Nita Naldi in "Blood and Sand," the 1922 epic based on Ibanez's novel about a doomed Spanish matador. The second show, "The Eagle," will be screened on Wednesday, June 23. Vilma Banky and Louise Dressler can also be seen in this tale set in the court of Catherine the Great. Concluding the series on Wednesday, June 30, will be "Son of the Sheik" with Vilma Banky and Agnes Ayres. Produced in 1926, this film is acknowledged as Valentino's finest.

All showings will be at 8 p.m., and tickets for non-students are available at the door for $1.

Sports entries due

Entries will be taken at noon in the Intramural Office, Intramural Bldg., between Monday, June 21, and Thursday, June 24, for tennis singles' tournaments for both men and women and for mixed doubles. Registrations for men's handball singles and men's and women's racquetball singles will also be accepted.

HUB Billiard Room open

The HUB Billiard Room, which is air conditioned, is now open on the ground floor of the HUB. Faculty and staff are welcome. Phone 865-6839 for reservations.

Luau at the HUB

The HUB Terrace Room will be the scene of a South Sea Isle Luau from 4:45 to 7 p.m. on Friday and Saturday, June 18 and 19. Diners may sample Chicken Vaiiki (fruited chicken), Molokai Steak (pepper steak), Hehlau (baked flounder with coconut), Steamship Round of Beef, Leg of Lamb with Minted Sauce, or Hewaiian Ham Hui (fruited ham). Among the more unusual vegetabia dishes are Ula (sweet potatoes with pineapple) and Makamae (mixed vegetables with rice). There will be live entertainment, and the Terrace Room is air conditioned.

"Bus Stop" opens June 24

William Inge's comedy hit, "Bus Stop," opens the 1976 Festival of American Theatre's 19th consecutive professional season Thursday, June 24, in the Pavilion Theatre. The play, which ran for 60 weeks in New York in 1955, was Inge's third hit in a row, following his dramas, "Come Back, Little Sheba" and "Picnic."

"Bus Stop" takes place in a Kansas roadside diner where a busload of passengers have had to shelter for a night until snowplows can open up the road that's been closed by a severe snowstorm. The play focuses on the romance of Cherie, a slightly tarnished nightclub singer, and Bo Decker, e young cowboy who has his own ranch and his own strong-arm ideas about romance. Dorothy Ernster will play Cherie and Mark Robinson, Bo.

Others in the cast include Archie Smith, Sarah Rush, Deborah S. Steen, John Swearingen, Adrien Lanser and J. P. Bumstead. The play is being directed by Jim O'Connor, with costumes by Douglas Maddox, costume designs by Kurt Wilhelm, and lighting design by Charles H. Firmin.

"Bus Stop" runs June 24 to 27 and June 29 to July 4, with a matinee performance July 3. Curtain times are at 8 p.m. for Tuesday through Saturday evenings, 7:30 p.m. on Sundays and 2 p.m. for the matinee. Tickets may be reserved by phoning 865-1884 from 10 a.m. to 9 p.m. daily.

Wagon train

(Continued from page one)

weather), parking lots, fair grounds and shopping centers.

The vast technical details of the show have been the responsibility of Douglas Maddox, associate professor of theatre and film. He has designed and supervised the building of various portable stages that have been carried with the show. Nc technicians travel with the companies.

Costumes, designed to blend with the train and surroundings, were designed by Montez King, costumer at the University's Theatre Arts Production Studio. She created a "prints and ginghams look," with a color scheme of red, yellow, and brown.

The show has been well received end local media have praised both the songs end the performers.

Staff vacancies

Staff vacancies in this publication generally require at least a baccalaureate degree or equivalent as a minimum educational qualification. Staff vacancies requiring less than the baccalaureate degree as well as those announced in the INTERCOM may be found in the Penn State REPORTER. A University employee interested in any position may apply by calling the Employment Division, 865-1357 (network Line 475-1357). Applications for those staff vacancies will be received until 5 p.m. **June 24, 1976 DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

AREA REPRESENTATIVE, CONTINUING EDUCATION — The Campus

Responsible for the functions of development, organization, operation, and administration of continuing Education programs and services within assigned geographical district. Bachelor's degree or equivalent with two to three years of directly related experience in business, industry or education.

ASSISTANT PROGRAM COORDINATOR, COLLEGE OF AGRICULTURE — University Park

Coordinate and make arrangements for assigned programs, to include rooms and travel arrangements for participants, lecturers, and exhibitors. Monitor expenditures to the budget and keep budget and clear the same through the Contracts Office. Present information on program policies for staff, facilities are requested. Be responsible for planning program activities and publicity literature. Prepare, assemble and distribute program information and reports. Bachelor's degree or equivalent preferably in the field of social sciences, plus one to two years of directly related experience in the coordination and/or administration of education programs.

MEDICAL SOCIAL WORKER I — Hershey

Responsible to the Social Services Coordinator to serve as part of the health care team in providing practical help and emotional support to patients and their families. Bachelor's degree in social work or equivalent, with one to two years of experience in social work.

MANAGER, AMBULATORY SERVICES — Hershey

Responsible to Assistant Hospital Director for the administration and coordination of the Outpatient Department, the Emergency Care Unit and the Ambulant Care Unit. Bachelor's degree or equivalent, with 3 to 4 years of directly related experience.

Calendar

Special events

Thursday, June 24
Commons Videotape, "Bob Woodward and Carl Bernstein," 12 noon, Kern lobby.
Festival Theatre, "Bus Stop," 8 p.m., Pavilion Theatre.
Thursday-Sunday, June 24-27
ARHS film, "Everything You Always Wanted to Know about Sex," 8 and 10 p.m., Pollock Rec Room.
Friday, June 25
Interlandia Folk Dance Club, 7:30 p.m.-midnight. HUB terrace and ballroom.
U.S. Men's Final Olympic Trials, Rec Bldg. 7 p.m.: warm-ups; 8 p.m., compulsory exercise competition.
Festival Theatre, "Bus Stop," Pavilion Theatre. Behind-the-Scenes program, 3 p.m.; performance 8 p.m.
GSA Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
GSA Commonsplace Theatre, "The Killing," 7:30 and 9:30 p.m., Room 112 Kern.
Saturday, June 26
U.S. Men's Final Olympic Trials, Rec Bldg. 7 p.m., warm-ups; 8 p.m., optional exercise competition; 10 p.m., presentation of U.S. Men's Olympic Gymnastics Team and dance and celebration.
Saturday-Sunday, June 26-27
Festival Theatre, "Bus Stop," Pavilion Theatre. Saturday at 8 p.m., Sunday at 7:30 p.m.
Tuesday, June 29
Festival Theatre, "Bus Stop," 8 p.m., Pavilion Theatre.
Wednesday, June 30
Festival Theatre, "Bus Stop," 8 p.m., Pavilion Theatre.
Festival Theatre, "The Golden Apple," student preview, 8 p.m., Playhouse Theatre.
Artists Series film, "Son of the Sheik," 8 p.m., University Auditorium.
Thursday, July 1
Commons Videotape, NOVA "The Case of the Bermuda Triangle," 12 noon, Kern lobby.
HUB Terrace Room, Happy Birthday USA Special Dinner, 4:45-7 p.m.
Festival Theatre, "Bus Stop," 8 p.m., Pavilion Theatre.
Festival Theatre, "The Golden Apple," 8 p.m., Playhouse Theatre.
Friday, July 2
HUB Terrace Room, Happy Birthday USA Special Dinner, 4:45-7 p.m.
Interlandia Folk Dance Club, 7:30 p.m.-midnight. HUB terrace and ballroom.
Festival Theatre, "Bus Stop," 8 p.m., Pavilion Theatre.
Festival Theatre, "The Golden Apple," Playhouse Theatre. Behind-the-Scenes program 3 p.m.; performance 8 p.m.
GSA Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Saturday, July 3
Festival Theatre, "Bus Stop," 2:30 and 8 p.m., Playhouse Theatre.
Festival Theatre, "The Golden Apple," 8 p.m., Playhouse Theatre.
Sunday, July 4
Festival Theatre, "Bus Stop," 7:30 p.m., Pavilion Theatre.
Festival Theatre, "The Golden Apple," 7:30 p.m., Playhouse Theatre.

Seminars

Friday, June 25
Materials Sciences, 10:45 a.m., Room 301 Mineral Industries. Dr. Dennis W. Ready, Energy Research and Development Administration, Washington, D.C., on "Materials Problems in Advanced Energy Systems."

University schedule

Friday-Tuesday, June 25-29
File for Pass/Fail.
Tuesday, June 29
Drop deadline.
Preregistration deadline.
Course Repeat deadline.

L.A. gets two new programs

Two new bachelor of science degree programs have been established in the College of the Liberal Arts, one in economics and one in public service

Both of the new majors will be offered, beginning with the fall term, according to Dr. Stanley F. Paulson, dean of the College of the Liberal Arts. He points out also that both programs have been approved by the University Faculty Senate and both can be offered without additional financial support.

The new major in economics would provide students with a more technically oriented set of courses and experiences than the existing program that leads to the bachelor of arts degree, although the extensive requirements in the humanities, sciences and social sciences would be maintained.

The new program would not require the extensive course work in business areas which is presently mandated by the joint program with the College of Business Administration.

The bachelor of arts degree program in public service, as now offered through the Department of Political Science, has a strong liberal arts background. However, a significant and growing number of public service jobs require administrative, quantitative and conceptual skills that are not possible to incorporate in the bachelor of arts degree program.

The new bachelor of science degree in public service has been structured to coexist with the present bachelor of arts public service program, but with a stronger emphasis on quantitative and conceptual skills.

'The Golden Apple' opening July 1

"The Golden Apple" begins the musical portion of the 1976 Penn State Festival of American Theatre when it opens in the Playhouse at the University Thursday, July 1. The musical, which premiered on Broadway in 1954, won that year's New York Drama Critics Circle Award as best musical.

"The Golden Apple" is a unique musical in its complete use of music and dance to tell the Homeric legend of Ulysses and Helen of Troy in a 1900, turn-of-the century setting in Angel's Roost, Washington. In this updated version, Ulysses is a happy farmer, devoted to his loving and faithful wife, Penelope. Helen turns out to be their daughter, a girl who can't say no to men, especially Paris, the traveling salesman from the big, wicked city of Rhododendron. He whisks Helen away in his gaudy balloon, and Helen's family and friends, distraught at her leaving, send a group of Angel's Roost farm boys and Ulysses to fetch her home. Of course, all sorts of complications arise, including a war (in the form of a boxing match) between Ulysses and Paris, the appearence of Circe and her spellbinding golden apple, and the wrongdoings of Hector, the mayor of Rhododendron. But the two make it safely back, and Ulysses is reunited with his Penelope.

Paul Farin as Ulysses, Mergeret Benczak as Penelope/Circe, David Brooks as Hector, and Frances Barnes as Mother Hare, a gypsy-like character with prophetic powers, are members of Actors' Equity, the professional actors' union. Sheila McCarthy portrays Helen and David G. Hodge plays Paris.

(Continued on page two)

News briefs

HUB Bicentennial special

Happy Birthday, U.S.A., a special dinner in honor of the Bicentennial, will be offered at the HUB Terrace Room from 4:45 to 7 p.m. on Thursday and Friday, July 1 and 2. Typical American entrees will include steamship round of beef, barbecued chicken, fantail gull shrimp, braised lamb with wine sauce, roast pork with cornbread dressing and grilled chopped steak with blue cheese sauce. There will be fresh whipped potatoes and baked potatoes, plus sauteed Penn State mushrooms, stuffed tomatoes, broccoli with hollandaise and Indian squaw corn. As a bonus, the new Terrace Room is air conditioned.

July 3, 4 and 5 the HUB will shut down completely, so there will be no meal service at either the Lion's Den or Terrace Room.

Film critics wanted

Audio Visual Services is constantly in search of faculty or staff interested in evaluating preview films for possible purchase. If you are interested, please fill in the form below and send to Sam Graci, Room 17 Willard Bldg. Your name will be placed in a permanent file, and you will be notified when preview films arrive in your particular area of interest.

Maple Room serving

The Maple Room dining facility on the ground floor of Henderson Human Development will be open for lunch and, for the first time, dinner during summer term. Meals will be served Monday through Thursday, lunch from 11:45 a.m. to 12:45 p.m. and dinner from 5:15-6:15 p.m. Meals are prepared by students as part of the Food Service Program.

Fishing know-how offered

Faculty or staff interested in learning the techniques of fly tying, stream strategies, aspects of casting and the know-how needed to catch trout and enjoy fly fishing might like to register for a Fly Fishing Workshop, which will be held at the University Park Campus on Friday, June 25. The one-day workshop is a continuing education service of the College of Health, Physical Education, and Recreation.

Angling instruction will be supplied by Joseph Humphreys, assistant professor of physical education and a devotee of the fisherman's art for the past 40 years. The day will begin at 9 a.m. with a casting demonstration and individual basic instruction. Participants will then learn to build a leader and tie basic knots. Mr. Humphreys will also discuss water temperature — how it can help in locating fish — and deal with stream strategy. He will devote the remainder of the day to working with individuals.

To register, contact Continuing Education, Room 309 Shields Bldg., 865-3443.

Inn food service shut July 5

There will be no regular food service at the Nittany Lion Inn on Monday, July 5; however, a limited breakfast will be available for guests at the hotel.

Olympic trials this weekend

Thirteen semi-finalists are competing in the U.S. Men's Final Olympic Trials to be held in Rec Bldg. this weekend, Friday and Saturday, June 25 and 26. Warm-ups will begin at 7 p.m. both evenings, followed on Friday by the compulsory exercise competition at 8 p.m. Saturday at 8 p.m., the optional exercise competition will be held, and at 10 p.m. the 6-member U.S. Men's Olympic Team will be presented, and there will be a dance and gala to celebrate, with music by The Tarnished Six. One $4 ticket will gain you admittance to both evenings' events and may be purchased at the Rec. Bldg. box office or at the door.

Nittany Summer box office open

The Nittany Mountain Summer box office in University Auditorium is now open for sale of tickets for the Grimethorpe Colliery Band concert, Pennsylvania Ballet performances, and Shirt-Sleeve Concerts by the Pennsylvania Orchestra.

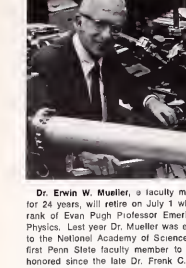
The box office is open weekdays from 9 a.m. to 4 p.m.

The Pennsylvania Ballet has announced a programming change for its Nittany Mountain Summer residency. In the first weekend of performances, the ballet "Eakins' View," choreographed by Rodney Griffin to music by Charles Ives, will replace the previously announced new work by Lar Lubovitch.

"Eakins' View" is a kaleidoscopic look at the world of Philadelphia painter Thomas Eakins, who was born in 1844. Today Eakins is considered one of America's greatest painters, but in his lifetime he suffered hostility and obscurity.

The Central Pennsylvania premiere of "Eakins' View" is one of three premieres scheduled on the three Nittany Mountain Summer programs of the Ballet, with the American premiere of Gene Hill Sagan's "Sweet Agony" to be danced in the second weekend's performances and the world premiere of a still undetited work by company artistic director Benjamin Harkarvy, in the final Friday and Saturday night performances.

Greeting card exhibit



The HUB Arts and Crafts Committee is sponsoring an exhibit from the Hallmark Historical Collection, A History of Greeting Cards, through July 9 on the HUB's first floor. The collection represents a history of the greeting card from the 16th century through 1910. Although Christmas, Easter and Valentine Day cards are featured, the exhibit also includes religious, birthday, friendship and memorial cards, English calling cards, and postcards. Of special interest are the English box valentines of the 1670s and the die-cut valentines made in London in the 1680s. The exhibit, which was on loan to the Smithsonian Institution, is being circulated by the Association of College Unions — International.

Retired staff to meet

The Penn State Retired Staff Club will hold its 177th meeting at 7:30 p.m. on Thursday, July 8, at St. Andrew's Episcopal Parish Life Center. This will be a dessert meeting, and Dr. Ernest Coleman, a retired physician from the University Health Center, will speak on "Pennsylvania's Canals." Reservations may be made by writing Francis Babione, 140 Hartswick Ave., State College (238-6281).

PENN STATE COLLECTION

Faculty notes

Dr. Erwin W. Mueller, a faculty member for 24 years, will retire on July 1 with the rank of Evan Pugh Professor Emeritus of Physics. Last year Dr. Mueller was elected to the National Academy of Sciences, the first Penn State faculty member to be so honored since the late Dr. Frank C. Whitmore, dean of the School of Chemistry and Physics, was named in 1946. He is one of two Penn State faculty members currently holding membership. He was named also in 1975 to the National Academy of Engineering.

Dr. Mueller is internationally known for his discoveries of field desorption, field ionization at surfaces and field evaporation of metals, fundamental effects in electron and atomic physics. He also invented the field emission microscope, field ion microscope and the atom-probe. The field emission microscope, conceived shortly after he had obtained his Dr. Ing. degree in Germany in 1936, enabled him to photograph the surface of submicroscopically small metal crystals for the first time at near atomic level. The field ion microscope, developed later at Penn State, made him the first man to see an atom by imaging the individual constituents of a crystal. The atom-probe, also developed at Penn State, is the most sensitive microanalytical tool ever devised. The instrument can focus on a single atom, pick it up from thousands of surrounding atoms and then identify it by its atomic weight. Field emission microscopy, field ion microscopy and atom-probe microanalysis are now important areas of research throughout the world and the subject of an annual conference held in the United States or abroad. The 23rd international Field Emission Symposium will meet at Penn State in August, and Dr. Mueller will be the honored chairman.

Dr. Mueller has received numerous honors and prizes for his contributions to science. Among them are the C. F. Gauss Medal (Germany); the Howard N. Potts Gold Medal of the Franklin Institute (Philadelphia); the Centenary Lectureship Silver Medal of The Chemical Society, London; the first M.W. Welsh gold medal Award of the American Vacuum Society; the John Scott Medal, America's oldest scientific award given annually in recognition of useful inventions benefiting mankind; and the Davisson Germer Prize of the American Physical Society. Besides his 1936 Dr. Ing. degree in physics, Dr. Mueller holds a Dr. Ing. habil degree of the Technical University of W. Berlin (1949), and honorary degrees from the University of W. Berlin and Claude Bernard University at Lyon, France.

He is the author of two books, four book chapters and over 200 articles published in scholarly journals. Nearly 30 graduate students and post doctoral associates have conducted research under his direction. He is on the editorial board of the scientific journals "Surface Science," "physica status solidi," "Crystal Lattice Defects" and "J. of Microscopy."

In retirement, Dr. Mueller plans to continue some of his research, finishing up a grant of the National Science Foundation, and to assist at a more leisurely pace his younger colleagues in the Field Emission Laboratory of the Physics Department.

Three additional promotions of faculty members in the College of Medicine have been announced, effective July 1. All are from instructor to assistant professor. They include: **Dr. James E. Crutcher**, family and community medicine; **Dr. Rodney K. Hough**, family and community medicine; and **Dr. Kap J. Lee**, comparative medicine.

Dr. Archibald Allen, associate professor of classics, has been named head of the Department of Classics, effective July 1. He succeeds Dr. Anthony J. Podlecki who resigned a year ago. Since that time Dr. Allen has been acting head of the department.

Dr. Allen, who is native of Derry, Ireland, joined the faculty in 1965. He is a graduate of The Queen's University of Belfast, Ireland, where he received a B.A. in classics in 1964 and a Ph.D. in Greek in 1970. Dr. Allen's research specialty is Greek elegiac poetry. He is currently working on a critical edition of the early Greek love elegist Mimnermus, and has published studies of textual problems in the writings of Callimachus, Lucretius, Catullus and Propertius. A member of the American Philological Association, he is associate editor of the Association's "Proceedings."

Dr. Stamatis A. Zervanos, assistant professor of biology at Berks, presented a paper on "Water and Energy Requirements of Free-Living Collared Peccaries" at the annual meeting of the American Institute of Biological Sciences at Tulane University on May 31.

Dr. Charles L. Newman, professor and coordinator of law enforcement and corrections services at the University, has been reappointed by Gov. Milton J. Shapp as a member of the Central Regional Planning Council of the Governor's Justice Commission.

Dr. Newman was reappointed to e term ending Dec. 31, 1977.

Dr. John M. Stevens, a consultant for the past year at Cornell University, has been named assistant professor of public administration in the Institute of Public Administration effective July 1. A 1964 graduate of Penn State with a B.A. in psychology, he received his M.S. in management from the U.S. Naval Postgraduate School. His M.B.A. and Ph.D., both with majors in management and organizational behavior, were conferred by SUNY at Buffalo. His research interests have been in the area of worker productivity, quality change and political implementation in public sector organizations.

Obituary

Dr. Frances M. Andrews, professor emeritus of music education, died June 18. A member of the University faculty from 1950 until her retirement in 1973, Dr. Andrews was the author of six books and numerous articles in the field of music education. She co-authored a text, "Guiding Junior High School Pupils in Music Experiences: A Guide to Effective Curriculum Development," which was selected in 1954 for the Peabody Best Book List. Born May 20, 1908, in Scranton, she received her bachelor of music degree from Marywood College and her M.Ed. and D.Ed. at Penn State. Prior to joining the faculty, she headed the junior and senior high school programs at the State College Area Schools. Active in many professional organizations, she was president of the Music Educators National Conference from 1970 to 1972.

'The Golden Apple'

(Continued from page one)

"The Golden Apple" is being directed by Garland Wright with the scenic designs by Anne A. Gibson, the costume designs by Kurt Wilhelm, and the lighting designs by Charles H. Firmin.

"The Golden Apple" will run in the Playhouse every evening but Mondays through July 17, with a matinee performance on July 10 at 2 p.m. All other curtain times are 8 p.m., except Sundays at 7:30 p.m.

A special Behind-the-Scenes program will be held at 3 p.m. on Friday, July 2, in the Playhouse. Free tickets for this event, sponsored by Nittany Mountain Summer, may be obtained at the University Auditorium or Playhouse box offices.

The Festivel's first production of the summer, "Bus Stop," continues now through July 4 in the Pavilion Theatre. Tickets for it, "The Golden Apple," "Little Mary Sunshine," and "Thet Championship Season" may be reserved by phoning 865-1884 from 10 a.m. to 9 p.m. daily. Out-of-town patrons may call collect (814) 865-0182.

Funding sources

For further information, call 865-1372

(230-1) The National Science Foundation (NSF) is seeking applications for grants in **Theoretical Computer Science, Software Systems Science, Software Engineering, Intelligence Systems and Computer Systems Architecture Design.** Deadline date is Nov. 1. (Ref. NSF Announcement NSF 76-20) (CAU Rep. 2576)

(230-2) NSF awards **Grants for Improving Doctoral Dissertation Research** in the environmental, behavioral, neural and social sciences and in the earth and ocean sciences. Guidelines have recently been updated. (Ref. NSF76-17) (NSF Bulletin, June, 1976)

(230-3) The OHEW Public Health Service has issued regulations for **Project Grants for Community Health Services.** Any public or non-profit private entity is eligible Grants will be made for planning, developing and operating community health centers primarily in regions detected in medical care. Deadlines for application will be announced later. (Rel. #1FR23851-58, 6/11/76)

(230-4) The DHEW Office of Education has issued interim guidelines and criteria governing grant awards for its **Bilingual Education Program.** Included are: basic programs, support services, training, fellowships for teacher trainers, technical assistance coordination, research and dissemination, and consultation. (Rel. #1FR23659-72, 6/11/76) (CAU Rep. 2576)

(230-5) Proposals for NSF's Mathematical Sciences Conferences may be made by host institutions directly to the NSF Mathematical Sciences Section. Conferences are to be of two days duration during summer, 1977, or a fall or winter recess period. Proposal deadline is Nov. 15. (Ref. NSF/CBMS announcement)

(230-6) NSF, through the Agency for International Development (AID), supports efforts of U.S. scientists and engineers who wish to apply their expertise to problems in developing countries. The grants program is called Scientists and Engineers In Economic Development (SEED) and furnishes travel funds to host country grants. The next closing date is Dec 15 for awards in April, 1977. Contact the Division of International Programs, NSF, 202-632-7865. (Rel. SEED announcement)

(230-7) U.S.-India Exchange of Scientists supports exchange visits and awards travel funds. Visits range from two weeks to a few months. Plans should be discussed with the Division of International Programs, NSF, 202-632-5796. Six months should be allowed for NSF selection and GSIR (Indian) concurrence.

FELLOWSHIPS

(For further information inquire at 317 Kern, 865-2341):

(230-8) NSF — two E. O. Gorgmon Memorial Research Grants (FO 76-10)

(230-9) NEA — fellowships for practicing professional designers (FO 76-10)

(230-10) American Heart Association — fellowships for physicians and scientists (FO 76-0)

(230-11) Oak Ridge National Laboratory — 5 two-year post-doctoral fellowships (FO 76-10)

Staff vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Service for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 P.M., July 8. DEPTS. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

DIETICIAN AND FACILITIES SUPERVISOR (INTERNSHIP HEALTH CENTER), STUDENT AFFAIRS — University Park

Responsible to the Assistant Director for Administration for management of the Food Services Department, Housekeeping Services, Janitorial Service and for planning and directing the Food Service Program in the Health Center. A bachelor of science degree, or equivalent, with specialized training in dietetics, institutional food management or a food related field is required. The employee is expected to be able to supervise kitchen, janitorial and general housekeeping support personnel. Up to one year's directly related experience is required.

DATA SYSTEMS COORDINATOR, GRADUATE SCHOOL — University Park

Responsible to the Dean of the Graduate School for providing planning assistance and systems analysis for the various divisions of the Graduate School and for collecting statistical records of Graduate School operations. Bachelor's degree or equivalent and two to three years of directly related experience is required. Position requires a knowledge of applications programming and analyses, with familiarity with data processing equipment and techniques, plus experience with systems programming in an educational setting.

RESIDENCE HALL COORDINATOR — Hazleton Campus

Responsible to the Dean of Student Affairs for assisting in carrying out the mission of Student Affairs by providing administrative, educational and cultural, and personal services for the total Residence Hall Program; also, for the welfare and security of the students in the residence hall. Master's degree in student personnel services, counseling or related field, or equivalent organized study or training, plus up to and including 12 months of directly related experience; or bachelor's degree or equivalent organized study or training in student personnel services, counseling or related field, plus over one year and up to and including two years of directly related experience.

PROGRAMMER, UNIVERSITY LIBRARIES — University Park

Responsible for analysis, program design and documentation of new and existing programs required to develop an operational on-line bibliographic data-base. Bachelor's degree or equivalent in computer science or related area, plus two years of elective experience preferably in data base design or on-line multi-access computer systems.

LIBRARY SYSTEMS SPECIALIST, UNIVERSITY LIBRARIES — University Park

Participate in the development of priorities of program timetables, flowcharts, report analysis, computer needs and capabilities. Analyze present methods and systems. Prepare detailed plans for the design and implementation of computerized library information systems and sub-systems. Develop performance specification requirements for new systems. Bachelor's or master's degree in appropriate field, 4 to 5 years project-related experience with medium and large scale time-share computer systems and/or significant experience in large university or special libraries.

ADMINISTRATIVE AIDE — ORUG EDUCATION PROJECT, COLLEGE OF EDUCATION — University Park

Responsible to the Assistant to the Director, Drug Education Project, for assistance in the administration of the Drug Education Project, including financial responsibilities, personnel and other related functions concerning the coordination of the project. A bachelor's degree, preferably in business administration or accounting or its equivalent, and 6 to 12 months of directly related experience is required.

ASSISTANT DIRECTOR FOR DEVELOPMENT — York Campus

Responsible to the Director of the York Campus for organizing and conducting a continuous development program, including fund raising efforts, handling public information, fostering public relations and organizing and conducting alumni activities. Bachelor's degree or equivalent, plus 4 to 4 years of directly related experience is required; candidate should have an understanding and appreciation of the goals of higher education.

WPSX highlights

Theatre Three's Alec Guinness film festivel continues at 9 p.m. on Saturday, June 26, with "The Lavender Hill Mob," a 1952 comedy starring Guinness as an unobtrusive bank clerk who plans the perfect crime — the theft of an armored car full of gold which Guinness and his accomplice (Stanley Holloway) melt down and cast into souvenir Eiffel Towers.

The history of dirigibles is explored on "The Great Airship Adventure" at 9 p.m. on Monday, June 28. The hour-long documentary includes newsreel coverage of famous airship launchings and of the Hindenberg disaster. The Hindenberg explosion is analyzed by the ship's captain and by the air traffic controller who was in radio contact with the ship during the fatal docking.

Dr. Robert Murray, professor of American history, discusses "The 103rd Ballot" in his new book about the 1924 Democratic National Convention, on Tuesday at 8 p.m. on Monday, June 28. Dr. Murray talks about the candidates, the issues and the atmosphere surrounding what was to become the longest presidential nominating convention in the nation's history. The show may also be seen on Tuesdays at 8 p.m. and Saturdays at 1:30 p.m.

The work of anthropologist Richard Leakey and his associate, Ronald C. Johanson, is documented on "The Three Ways to Your Clue" at 9 p.m. on Tuesday, June 29. The three-part documentary chronicles Leakey's search for the remains of man's ancestors in East Africa and his discovery of fossils dating back three million years.

The first live television broadcast of a full-length ballet will be featured when **Live from Lincoln Center** presents the American Ballet Theatre's "Swan Lake" at 8 p.m. on Wednesday, June 30. Natalia Makarova and Irwin Nagy star in the Tchaikovsky work, which will be performed in its entirety as it is presented before a live audience in New York's Lincoln Center.

"Reflections on a Revolution" is the subject when Bill Moyers presents a special essay on America during the bicentennial year on **Bill Moyer's Journal** at 10 p.m. on Thuisday, July 1. The program focuses on the relevance of the American Revolution for the 1970s. Also appearing will be historians Henry Steele Commager and Richard Morris, sociologists Daniel Bell and Amatai Etzioni, poets Gerge Gallup and Daniel Yankelovitch, and University of Texas philosophy professor Robert Solomon.

PENN STATE intercom

Volume 5, Number 39 July 1, 1976

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Press given ACLS award in humanities

In recognition of distinction in the publication of books in the humanities in the recent past, The Pennsylvania State University Press has been cited by the American Council of Learned Societies.

The award, announced by Thomas A. Noble, executive associate of the council, consists of a check for $15,000, made possible by a grant from the Andrew W. Mellon Foundation. It is to be used in support of publication of first or second books by scholars in the field of humanities.

Chris W. Kentera, director of the University Press, was advised that in addition to the strength of the publications by the Press of the past three years, the "committee of scholars" closely examined three titles: "Manet, Peintre-Philosophe," by George Mauner, of Penn State; "Kafka's Narrative Theater" by James Rolleston, of Yale; and "In This Most Perfect Paradise: Alberti, Nicholas V and the Invention of Conscious Urban Planning in Rome, 1447-55" by Carroll William Westfall, of the University of Illinois.

De Pauw to give Bicentennial talk

The second in the Bicentennial Summer Lecture series will be delivered by Linda Grant De Pauw, professor of American history at George Washington University, at 8 p.m. on Wednesday, July 7, in Room 112 Kern Graduate Bldg.

Prof. De Pauw's topic will be "Politicizing the Politically Inert: the Problem of Leadership in the American Revolution." She will explain how inarticulate groups, such as women and ethnic minorities that were not involved in politics, became involved in the movement that led to the Independence of Great Britain's North American Colonies.

Prof. De Pauw is the editor of the multivolume "Documentary History of the First Federal Congress of the United States of America," published by the Johns Hopkins University Press and sponsored by the National Historical Publications Commission. In addition, she is the author of several books, including "The Eleventh Pitter: New York State and the Federal Constitution" and "Four Traditions: Women of New York during the American Revolution."

Prior to joining the faculty at George Washington University, she taught at George Mason College of the University of Virginia. In 1964, she received the American Historical Association's Albert Beveridge award for her outstanding doctoral dissertation written at Johns Hopkins, from which she received her Ph.D. She completed her undergraduate studies at Swarthmore College in 1960.

'Be Glad Then' to air

Voice of America will broadcast the entire performance of "Be Glad Then America" on the Fourth of July to all Eastern European nations and the Soviet Union on its Russian language program and worldwide on its English language service. The stereo recording of the work was made during the premiere performances on Feb. 6, 7 and 8 in University Auditorium. Producing and directing the recording was Harold Boxer, musical director, Voice of America, with technical assistance from University Continuing Education professional staff members.

Photographer Steve Herlin used 59 sparklers to get this effect.

UNICARE plan improved

President Oswald has announced that effective today (July 1) an improvement has been made to the UNICARE group health insurance plan to provide 100 percent reimbursement of medical expenses after a total of $5,000 in medical expenses has been incurred in a calendar year.

The new provision — known as "stop loss" — will provide greater financial security to a faculty or staff member by eliminating the 20 percent major medical co-payment factor at that level of incurred expenses. Charges which are used in satisfying the $5,000 provision include all medical expenses which are presently reimbursable under UNICARE's basic and major medical plans. Charges incurred prior to July 1, may not be used to satisfy any part of the 1976 stop loss provision.

The change is superimposed on existing UNICARE benefits. This means that all charges submitted will first be paid under the provisions of UNICARE's basic and major medical plans. It total incurred covered expenses do not exceed $5,000 in a calendar year, there is no stop loss benefit due. When such charges exceed $5,000, however, the basic plan, the major medical plan, and the stop loss provision combine to pay 100 percent of covered expenses. Any restriction or limitation provided by the existing major medical plan also applies to the stop loss provision.

Here are two examples of how the stop loss provision will benefit employees: A major medical claim which took place in 1975 had covered medical expenses totalling $25,804. UNICARE benefits without the stop loss provision paid $20,662 and the employee's out-of-pocket expenses totaled $5,142. With stop loss benefits, UNICARE would have paid $24,623 and the employee's costs would have been reduced to $1,181.

In another example, covered expenses amount to $7,925. The total benefit under the former UNICARE plan would be $6,750, leaving $1,175 as the employee's obligation. UNICARE with stop loss benefits would reduce the employee's costs to $680 by paying benefits totalling $7,245.

Another important money-saving aspect of the stop loss provision provides that when the $5,000 stop loss expense has been incurred in any given calendar year, the plan will continue to pay 100 percent of all covered expenses incurred during the subsequent year. This means that no deductible is applied during the second calendar year.

The Employee Benefits Division will be happy to counsel faculty and staff members about the new stop loss provision, as well as all other UNICARE provisions.

Summer enrollments show slight increase over 1975

Preliminary figures for summer term resident instruction enrollment at the University total 13,587 at all locations, a slight increase from comparable figures of 13,412 a year ago.

Late registrations and registrations for programs starting later in the term will increase the total, which is expected to approximate the final figure of 14,892 at all locations last summer.

The preliminary figures reported Monday by Dr. Robert E. Dunham, vice-president for undergraduate studies, show 10,245 students at University Park; 2,037 at the Commonwealth Campuses; 101 at Behrend College at Erie; 977 at the Capitol Campus, Middletown; 138 at the Milton S. Hershey Medical Center; and 89 at the King of Prussia Graduate Center.

The 1976 preliminary figures include 7,142 baccalaureate degree students; 4,844 graduate/medical students; 552 associate degree students; and 1,049 adjunct students.

Decision on liquor license was expected

The decision by the Pennsylvania Liquor Control Board (PLCB) to turn down the Faculty Club's application for a liquor license was not unexpected, according to club president Donald R. Olson, professor and head of the Department of Mechanical Engineering.

"The PLCB has never granted a license under the resort area classification to any place outside of the Poconos," Dr. Olson commented, "and we knew that it was unlikely that the board would make an exception in our case.

"The directors of the club would, however, like to point out that the procedure through which we are now going is exactly the same one used by the Elks Club when it sought to obtain a liquor license. Harris Township was ultimately defined as a resort area by the Centre County Court."

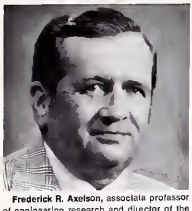
The PLCB is usually reluctant to judge whether or not a locality is a resort area, preferring to leave this decision up to the local courts, Dr. Olson notes, and accordingly, the Board of Directors of the club will now appeal to the Centre County Court as soon as possible.

Construction of the club is on schedule, with the opening set for September. According to Dr. Olson, if the appeal to the court is not completed before the opening date, the Board of Directors will seriously consider the possibility of allowing members to bring their own liquor into the club in compliance with the appropriate legal restrictions.

July 4 field trip to Philadelphia available by bus

The Bicentennial Summer at Penn State program will sponsor a field trip to Philadelphia to celebrate the nation's bicentennial anniversary on Independence Day, Sunday, July 4. A bus will leave the main entrance to the HUB (at the northwest corner of the building) at 6 a.m. and will return from Independence Hall (Chestnut and Sixth Streets) in Philadelphia at 9 p.m. There will be no stops for meals.

Tickets are available at the office of the History Department, 601 Liberal Arts Tower. The cost will be $10.30 per person (cash payment only — no checks). A ticket must be presented at the time of departure to Philadelphia and again at the time of return to University Park. Tickets will be sold until all seats are reserved.

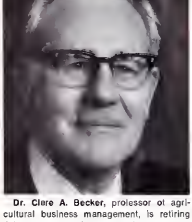


Although plans for the festivities in Philadelphia are not yet complete, they do include addresses by prominent officials, such as President Ford and Governor Shapp, a "Fourth of July" parade, and a display of fireworks. Participants in the trip will be free to wander about on their own.

Among the historic sites and artifacts on view are the Pennsylvania State House (Independence Hall) where the Congress passed the resolutions of Independence, Carpenter's Hall where the First Continental Congress met, Christ Church where many of the delegates worshipped, and the bell that proclaimed "liberty throughout the land."

All members of the University community, including faculty, staff and students, are welcome to sign up for the trip.

PENN STATE COLLECTION

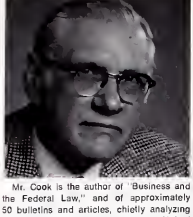


Retirements

Frederick R. Axelson, associate professor of engineering research and director of the College of Engineering's Institutional Engineering Advisory Services, will retire July 31 after 30 years of service.

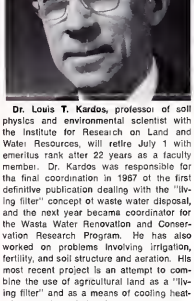
As director of Institutional Engineering Advisory Services since 1957, Prof. Axelson has supervised a group of professional advisers and consultants who work with approximately 78 state institutions on the operation and maintenance of steam and electrical power generating and distribution systems. This work with Commonwealth institutions, such as hospitals, colleges and correctional facilities, has resulted in appreciable savings to Pennsylvania taxpayers. Prof. Axelson has also served as adviser in the procurement of all fuels used in institutions operated by the Commonwealth. From 1953 to 1957 he was supervisor in Fuel Technology and Mining Extension in the College of Earth and Mineral Sciences. He also served as an instructor in chemistry and geology and developed and taught courses in fuels and combustion, institutional engineering management, energy conservation and air pollution control.

A native of DuBois, Prof. Axelson received his B.S. in fuel technology and his M.S. in mineral economics from the University. In 1953 he earned his Professional Degree in fuel engineering.



Dr. Clare A. Becker, professor of agricultural business management, is retiring July 1 with emeritus rank after 29 years on the faculty. Dr. Becker's major research interests have centered around improvement of farm business management practices and the problems and policies of farmer cooperatives. In 1975, he received the distinguished service award from the Pennsylvania Association of Farmer Cooperatives (PAFC) for his contributions to the Pennsylvania agricultural industry. Since its inception in 1961, Dr. Becker has played an important role in the PAFC's summer Youth Institutes, and he will continue to be active with the Institute when it is held July 11-14.

Dr. Becker has been business manager for the Department of Agricultural Economics and Rural Sociology since 1956 and in 1958-59 was also its acting head. Prominent in community affairs, he has served as chairman of the College Area Joint School Board.

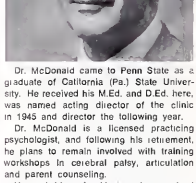


He holds a B.S. from Michigan State and a Ph.D. in agricultural economics from Cornell. He and his wife, Jane, will continue to live in their Lemont home after retirement.

Franklin H. Cook, professor of business law, at the University, will retire July 1 with emeritus rank after serving 39 years as a faculty member. An authority on the legal aspects of the power industries, Mr. Cook came to Penn State as an instructor in business administration in 1937, after receiving a law degree from Duke University. A 1933 graduate of Bucknell University with a B.A. in political science, he received an M.A. in economics from Penn State in 1940.

Mr. Cook is the author of "Business and the Federal Law," and of approximately 50 bulletins and articles, chiefly analyzing the electric power industry of the United States. Active in State College community affairs, he has served as president of Friends of the Library, the Council of Churches, and Mt. Nittany Park For the past 10 years he has been chairman of the State College Zoning Hearing Board.

Mr. Cook and his wife, the former Anna Martha Graybill, will continue to reside in State College. During winter term, 1977, Mr. Cook will teach a graduate course on Corporate Morality.

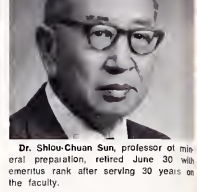


Dr. Louis T. Kardos, professor of soil physics and environmental scientist with the Institute for Research on Land and Water Resources, will retire July 1 with emeritus rank after 22 years as a faculty member. Dr. Kardos was responsible for the final coordination in 1957 of the first definitive publication dealing with the "living filter" concept of waste water disposal, and the next year became coordinator for the Wasta Water Renovation and Conservation Research Program. He has also worked on problems involving irrigation, fertility, and soil structure and aeration. His most recent project is an attempt to combine the use of agricultural land as a "living filter" and as a means of cooling heated water from industrial and nuclear or fossil fuel electric generating plants. In 1972, Dr. Kardos was co-chairman of a symposium on Recycling Treated Municipal Wastewater and Sludge through Forest and Cropland, co-editor of the published proceedings and co-author of four of the 32 papers presented. He participated in the preparation of an American Chemical Society monograph, "Chemistry of the Soil," and since 1952 has been an associate editor of the journal, "Soil Science."

A native of Perth Amboy, N.J., Dr. Kardos received his B.S. in chemistry from Rutgers University in 1932. He continued his graduate studies in soil chemistry in the College of Agriculture at Rutgers and received his M.S. in 1934 and his Ph.D. in 1937. Following faculty appointments at Washington State University at Pullman, Wash., and at the University of New Hampshire at Durham, N.H., he came to Penn State in 1954 as professor of soil technology. He will maintain his home in State College following retirement.

Dr. Eugene T. McDonald, research professor of speech pathology and former director of the Speech and Hearing Clinic, will retire July 1 with emeritus rank after 31 years as a member of the faculty. He has been internationally recognized for his work in developing alternative means of communications for non-vocal cerebral-palsied children, for his work with cleft-palated and cleft-lipped children, and for his diagnosis and treatment of articulatory disorders.

He is the co-author of the book, "Cerebral Palsy," and his book, "Understand Those Feelings: A Guide for Parents of Handicapped Children and Everyone Who Works With Them," was selected as a book of the year by the Child Study Association of America. "Bright Promise," a book which Dr. McDonald wrote to help the parents of children with cleft-palate and cleft-lip, is one of the most popular titles published in the United States by the National Society for Crippled Children and Adults. As a Liberal Arts Research Scholar at Penn State in 1962, he developed a text dealing with the sensory-motor approach to problem articulation diagnosis and treatment.

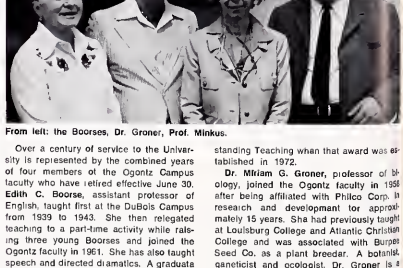


Dr. McDonald came to Penn State as a graduate of California (Pa.) State University. He received his M.Ed. and D.Ed. here, was named acting director of the clinic in 1945 and director the following year.

Dr. McDonald is a licensed practicing psychologist, and following his retirement, he plans to remain involved with training workshops in cerebral palsy, articulation and parent counseling.

He and his wife, Marie, who received her M.Ed. and later taught in Penn State's Department of Special Education, plan to remain in State College following his retirement.

George Shombert Jr., associate professor of engineering at the Beaver Campus, will retire on July 1. A member of the engineering faculty since 1967, he served on many Campus committees, chaired the Academic Affairs Committee, Commencement Committee, was co-chairman of the Campus Self-Study Task Force, and chairman of the Joint Faculties Liaison Committee of the Beaver County Council of Higher Learning.



Mr. Shombert, a registered professional engineer, holds a B.S.E.E. from Carnegie-Mellon University and the M.Litt. from the University of Pittsburgh. Prior to joining the faculty, he was employed by the Pittsburgh Transformer Plant of the Allis-Chalmers Company. He is an active member of the American Society for Testing and Materials and since 1955 has been station cal consultant to ASTM Technical Committee D27 on Electrical Insulating Oils and Gases.

Dr. Shiou-Chuan Sun, professor of mineral preparation, retired June 30 with emeritus rank after serving 30 years on the faculty.

Dr. Sun began his education in China, where he received a B.S. in mining and metallurgy at Pei-Yang University, Tientsin, in 1936. His M.S. in the same subjects was granted at Missouri School of Mines in 1938, and his Ph.D. in metallurgy at Massachusetts Institute of Technology in 1945. He joined the Penn State staff in 1946 as an assistant professor of mineral preparation. His current research interests include characterization of anthracite coal refuse, relative grindability of coal lithotypes, effective removal of sulfur from coal and coal refuse, electrokinetic study of the adsorption of water pollutants by coal lithotypes and mineral matters in coal mine refuse, utilization of anthracite coal refuse for the manufacturing of building materials, and the concrete block industry — national and regional approaches. He is the author of 70 articles in technical journals and has supervised the preparation of 10 doctoral theses and 23 master's theses. He is the co-holder of two patents.

He and his wife, Dr. E-tu Zen Sun, professor of Chinese history at the University, collaborated on a translation of "T'ien-Kung Kai-Wu, Chinese Technology in the Seventeenth Century" by Sung Ying-Hsing, which was published by The Pennsylvania State University Press in 1966.

From left: the Boorses, Dr. Groner, Prof. Minkus.

Over a century of service to the University is represented by the combined years of four members of the Ogontz Campus faculty who have retired effective June 30. **Edith C. Boorse,** assistant professor of English, taught first at the DuBois Campus from 1939 to 1943. She then relegated teaching to a part-time activity while raising three young Boorses and joined the Ogontz faculty in 1961. She has also taught speech and directed dramatics. A graduate of Wilson College, with a master's degree from Cornell University, Mrs. Boorse is a poet, playwright, and short story writer.

Lowell M. Boorse, associate professor of music, earned his baccalaureate degree at Penn State and his master's degree at the University of Rochester. Except for two years as music supervisor in the Ouakertown public schools and four years as a B-25 bombardier/navigator during World War II, he has directed the musical bent of Penn State students throughout his career. He began teaching at the DuBois Campus in 1939 and joined the Ogontz faculty in 1951. He was the first recipient of the Ogontz Campus Award for Outstanding Teaching when that award was established in 1972.

Dr. Miriam G. Groner, professor of biology, joined the Ogontz faculty in 1958 after being affiliated with Philco Corp. in research and development for approximately 15 years. She had previously taught at Louisburg College and Atlantic Christian College and was associated with Burpee Seed Co. as a plant breeder. A botanist, geneticist and ecologist, Dr. Groner is a graduate of Bucknell University and the University of Michigan.

Thomas W. Minkus, associate professor of political science, was on hend when the Ogontz Campus opened its doors in 1950 and has been the unofficial campus historian ever since. He divided his time that first year between Ogontz and the former Swarthmore Center where he had taught since 1947. He was also the first Ogontz Campus registrar. A graduate of the University of Delaware, he taught international relations and elements of American government for the U.S. Army information and education program for several years before enrolling at the University of Pennsylvania for his master's degree in political science.

Faculty notes

Dr. Eugene E. White, professor of speech communication, presented one of five distinguished lectures at a Louisiana State University conference in honor of Dr. Waldo W. Braden, Boyd Professor of Speech at Louisiana State. The conference topic was "Views of Rhetoric and Public Address," and Dr. White spoke on "Rhetoric as Historical Configuration" at the June 1 session.

Dr. Peeter Rebane, associate professor of history at Ogontz, has received one of three monetary awards from the Arthur Puksow Fund, established to encourage original research dealing with Estonian history before 1721. Dr. Rebane's paper, "St. George's Night Rebellion of 1343," dealt with an Estonian peasant uprising against their German overlords. Dr. Rebane was also named Outstending Adviser for 1975-76 at Ogontz.

An excerpt from "Gala," **Paul West's** eighth novel, to be published this fall by Harper and Row, appears in "TriQuarterly 36," published by Northwestern University. Mr. West is professor of English and comparative literature, and a Fellow of the Institute for the Arts and Humanistic Studies.

The James Jordan Award of teaching excellence at the Capitol Campus has been awarded by the Student Government Association to **Dr. William A. Welsh Jr.**, program chairman in civil engineering. The award is given in memory of Dr. James Jordan, a humanities professor who died in a boating accident in 1971. Dr. Welsh holds a B.S. in civil engineering from Swarthmore and an M.S. and Ph.D. in that field from the University of Illinois. He has conducted research on prestressed and reinforced concrete and has worked on computer-aided design of steel structures.

Dr. H. Arnold Muller, chief of emergency medicine at Hershey, has been elected president of the Pennsylvania Chapter of the American College of Emergency Physicians. The Pennsylvania chapter, with more than 530 members, is the third largest in the nation. Dr. Muller also presented a paper, "Emergency and Critical Care Delivery Systems Worldwide" at the 1976 International Congress on Emergency and Critical Medicine in Pittsburgh last month.

Dr. Winfred M. Phillips, associate professor of aerospace engineering, has received the College of Engineering's Outstanding Faculty Advisor Award. The award, which consists of a check for $500 and a certificate, is sponsored by the Penn State Engineering Society and made possible by alumni contributions. A member of the faculty since 1968, Dr. Phillips has been predominantly a teacher of undergraduate students. His research is concerned with physical gas dynamics and biomedical engineering. He holds a B.S.M.E. from Virginia Polytechnic Institute and a D.Sc. from the University of Virginia.

Richard E. Bland, associate professor of engineering research at ARL, has been elected a member of Underwriters Laboratories, Inc., for a term of three years. Underwriters Laboratories, founded and sponsored by the National Board of Fire Underwriters in 1894, investigates materials and products to determine whether they are hazardous to life and property, and it attempts to establish the means to make them safe. Prof. Bland is a former chairman of the National Commission on Fire Prevention and Control.

George L. Thuering, director of management engineering and professor of industrial engineering, has been elected chairman of the Management Division of the American Society of Mechanical Engineers. He assumed office June 22 at the annual meeting of the Society in Quebec, Canada. The Division, largest in the Society, annually sponsors the Management Executive Conference and also sponsors the annual Joint Engineering Management Conference. This year the Division will sponsor the recently established General Engineering Conference of the Society. Prof. Thuering came to Penn State in 1947 from Lockheed Aircraft Corp.

Dr. T. T. Tsong, associate professor of physics, presented a series of seminars in Belgium, France and Germany during the months of May and June. He discussed "Field Ion Microscope Investigations of Atomic Processes on Metal Surfaces" at the University of Namui in Belgium, the Universities of Rouen, Lyon and Aix-Marseille in France, and the Technical Universities of Munich and Clausthal in Germany. Dr. Tsong is on leave at the Fritz Haber Institute of the Max Planck Society in Berlin.

Dr. Craig S. Oliver, assistant dean for Extension in the College of Agriculture, has been elected president of the Board of Directors of the Extension Journal, Inc. This is a quasi-official body of the Association of Land-Grant Colleges and State Universities and the Extension Committee on Organization and Policy (ECOP). It is a non-profit corporation organized for the purpose of publishing a journal six times yearly for professional Extension staff, adult educators and community developers.

Dr. Nicholas A. Branco, assoate professor of education, has been awarded a travel grant by the National Research Council of the National Academy of Sciences to attend the third International Congress of Mathematics Education Aug. 16-21 in Karlsruhe, Germany. He will discuss "Mathematical Problem Solving." Following the Congress, Dr. Branca will present a lecture on "Important Considerations for Teacher Education Programs" at the Institute fu Didaktic der Mathemattik at the Universitat Bielefeld, Germany.

Dr. David L. Pearson, assistant professor of biology, began a study of tiger beetles in the Silver Spring Valley of Arizona last month. He is being accompanied by an undergraduate and five graduate students on the project, which is supported by a grant from the National Science Foundation. In the fall, he will go to Gabon, Africa, to pursue research on birds, with a grant from the National Geographic Society.

Capt. Larry Akers, head of the ROTC program and assistant professor of military science at Schuylkill, will receive a meritorius service award. The award, the second highest non-combat decoration, is presented to those distinguishing themselves by outstanding meritorius achievement. Under Capt. Akers' command, the ROTC enrollment at the Campus has risen from 17 to 51.

Dr. Otis E. Lancaster, associate dean and George Washingtonuse professor emeritus, has been elected president-elect of the American Society for Engineering Education for 1976-77. The Society has nearly 11,000 individual members, representing more than 400 academic institutions and about 150 industrial and governmental institutional members. Dr. Lancaster was a Penn State faculty member from 1957 to 1975.

Dr. Carol Gay, research associate in the Department of Biochemistry and Biophysics, has been appointed to the editorial board of the "Journal of Histochemistry and Cytochemistry." She is a specialist in cell biology.

Hershey assistant professors **Dr. Zvi Friedman** (pediatrics) and **Dr. Earl Palmer** (pediatrics and surgery) have been elected fellows of the American Academy of Pediatrics. To qualify as a fellow, a pediatrician must have been certified by the American Board of Pediatrics as a fully qualified child health care specialist. Certification requires at least five years of experience following medical school.

Robert B. Anderson, associate professor of mining engineering, has been given responsibility for continuing education services in mining engineering at the University, effective July 1. These services include more than 20 short courses, workshops and conferences each year; a new miners' pre-employment orientation program offered at several locations in Pennsylvenie; and a mine equipment school at Elders Ridge, Pa., which has trained more than 700 mine mechanics over the past 11 years. Prof. Anderson received a B.S. in mining engineering in 1948 and a B.S. in electrical engineering in 1952, both at Virginia Polytechnic. He worked in the coal end steel industry before joining the faculty in 1974.

Anthony J. Meta, assistant director for resident instruction at Beaver Campus, passes the gavel to **Jacqueline L. Schoch,** the associate director at DuBois. Dr. Schoch is taking over Dr. Meta's job as chairman of the Commonwealth Campus Council of Assistant Directors for Resident Instruction and Associate Directors for Academic Affairs. The council meets regularly to consider such topics as scheduling, registration, class section size, student transfer and faculty evaluation.

Two new associate directors for academic affairs have been appointed at the Fayette and DuBois Campuses. They are **Dr. Stephen M. Priselac,** Fayette Campus, and **Dr. Jacqueline L. Schoch,** DuBois Campus.

Dr. Priselac, who received his D.Ed. from West Virginia University, has been assistant director for resident instruction at the Fayette Campus since July, 1970. He has served on a number of major committees in the University and most recently served on the committee for review of the Division of Undergraduate Studies.

Dr. Priselac, who holds the academic rank of assistant professor of education, has presented papers at the World Assembly of the International Council on Education for Teaching in London in 1972 and in Singapore in 1974, and at numerous national and state conferences.

Dr. Schoch, who received her D.Ed. from Penn State with a major in counselor education and a minor in psychology, served as director of instruction in the DuBois Area School District before joining the DuBois Campus as assistant director for resident instruction in 1970.

She has served as a member of the University Faculty Senate, the Intra-University Relations Committee, and the University Senate Council.

Dr. Schoch has been a Middle States Accreditation evaluation team member, and she also serves as an evaluation team member for the Pennsylvania Department of Education and as a consultant for the Appalachia Project, Knoxville, Tenn.

Dr. Schoch, who holds the academic rank of assistant professor of education, is a member of two education honoraries, Pi Lambda Theta and Delta Kappa Gamma.

Two assistant librarians having been appointed at Paltee. **Linda A. Dapson,** named to the reference department, received her B.A. in English from SUNY at Albany and her M.L.S. from C. W. Post Center of Long Island University. **Kathryn L. Abbott** is a graduate of the College of Wooster with a B.A. in German. Her M.A.L.S. was conferred by the University of Michigan. She was named to the cataloging department.

Dr. Robert Stefanko has been promoted to associate dean for continuing education in the College of Earth and Mineral Sciences. He has been assistant dean since 1969 and also holds the rank of professor of mining engineering. From 1964 to 1969, he was head of the Department of Mining. In addition to overseeing the continuing education services of the College, he teaches courses in mine plant design and is director or co-director of a number of mining research projects. He serves on the Secretary of the Interior's Advisory Committee on Coal Mine Safety Research. A member of the faculty since 1957, he has a B.S. in naval science from the University of Virginia and three degrees in mining engineering from Penn State.

Calendar

Special events

Thursday, July 1
Commons Videotape, NOVA "The Case of the Bermuda Triangle," 12 noon, Kern lobby.
HUB Terrace Room, Happy Birthday USA Special Dinner, 4:45-7 p.m.
Festival Theatre, "Bus Stop," 8 p.m., Pavilion Theatre.
Festival Theatre, "The Golden Apple," 8 p.m., Playhouse Theatre.

Friday, July 2
HUB Terrace Room, Happy Birthday USA Special Dinner, 4:45-7 p.m.
Interlandia Folk Dance Club, 7:30 p.m.-midnight. HUB terrace and ballroom.
Festival Theatre, "Bus Stop," 8 p.m., Pavilion Theatre.
Festival Theatre, "The Golden Apple," Playhouse Theatre. Behind-the-Scenes program 3 p.m.; performance 8 p.m.
GSA Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, July 3
Festival Theatre, "Bus Stop," 2 p.m. and 8 p.m., Pavilion Theatre.
Festival Theatre, "The Golden Apple," 8 p.m., Playhouse Theatre.

Sunday, July 4
Festival Theatre, "Bus Stop," 2 p.m. and 8 p.m., Pavilion Theatre.
Festival Theatre, "The Golden Apple," 8 p.m., Playhouse Theatre.

Monday, July 5
Festival Theatre, "Bus Stop," 7:30 p.m., Pavilion Theatre.
Festival Theatre, "The Golden Apple," 7:30 p.m., Playhouse Theatre.

Tuesday, July 6
Festival Theatre, "The Golden Apple," 8 p.m., Playhouse Theatre.

Wednesday, July 7
Festival Theatre, "The Golden Apple," 8 p.m., Playhouse Theatre.

Thursday, July 8
Commons Videotape, 12 noon, Kern lobby.
Festival Theatre, "The Golden Apple," 8 p.m., Playhouse Theatre.

Friday, July 9
Interlandia Folk Dance Club, 7:30 p.m., HUB terrace and ballroom.
GSA Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Festival Theatre, "The Golden Apple," 8 p.m., Playhouse Theatre.

Saturday, July 10
Festival Theatre, "The Golden Apple," 2 and 8 p.m., Playhouse Theatre.

Sunday, July 11
Public reception, Prints by Pennsylvania Artists and CPFA Juried Crafts Show, 3-5 p.m., Museum of Art.
Festival Theatre, "The Golden Apple," 7:30 p.m., Playhouse Theatre.
Grimethorpe Colliery Band, 8 p.m., University Auditorium.

Lectures

Wednesday, July 7
Second Bicentennial Summer Lecture, Linda Grant De Pauw, professor of American history, George Washington University, on "Politicizing the Politically Inert: The Problem of Leadership in the American Revolution." 8 p.m., Room 112 Kern.

Seminars

Wednesday, July 7
Analytical Chemistry, 11 a.m., Room 333 Whitmore. Dr. V. Pichon, French National Science Foundation and the University of Paris, on "Thin Layer Electrochemistry."

Films

Friday, July 9
GSA Commonsplace Theatre, "Dr. Strangelove," 7:30 and 9:30 p.m., Room 112 Kern.

Sunday, July 11
Central Pennsylvania Festival of the Arts, "Film as Art 1976," 4 p.m., HUB assembly room.
Central Pennsylvania Festival of the Arts, dance films, 7 p.m., HUB assembly room.

Exhibits

Museum of Art: American Paintings and Furniture from the Permanent Collection, Gallery A. Central Pennsylvania Festival of the Arts Juried Crafts Show, Gallery B, opening July 6. Prints by Pennsylvania Artists, opening July 11.
Zoller Gallery: Central Pennsylvania Festival of the Arts, "Always at the Beginning," Pennsylvania Photographs from the 19th Century. Special hours, July 10-14, noon-5 p.m.
HUB Gallery: Renascence Gallery Multi-Media Exhibit, beginning July 2. The Hallmark Historical Collection, An History of Greeting Cards, through July 9. Central Pennsylvania Festival of the Arts: Elementary and Junior High Art, opening July 10.
Kern Gallery: Rebecca Kamen and Marilyn Weisenseo, Sculpture and Stitchery, through July 10. Constantine Kermes, Multi-Media Amish Theme, opening July 11.
Chambers Gallery: Four Goldsmiths; Ebendorf, Matzdorf, Lectzin, Skoogfor, opening July 5.

Musical has "everything"

"The Golden Apple," probably one of the most unusual musicals ever written for the American musical theatre, opens in the Playhouse this evening (Thursday) at 8 p.m., the second production of the Festival of American Theatre's 19th consecutive professional season.

The musical, which runs through July 17, has, according to director Garland Wright, just about everything.

Mr. Wright, who is currently enjoying the success of his Off-Broadway comedy hit, "Vanities," notes:

"The Golden Apple' has 140 different costumes, 15 different sets, balloons that carry people 40 feet off the floor, rocket ships, honky-tonk saloons, ships that take people oil to war, more music than three regular musicals combined, murders, suicides, true love, apple trees, country fairs, and, if I can imagine anything more, it will have that, too."

The critics were enthusiastic when "The Golden Apple" opened Off-Broadway in New York in 1954 and later when it moved to Broadway.

John Chapman of the N.Y. Daily News called it "the best that has happened in and to the theatre in a very long time. Every part of it is refreshing, tangy, delightful and intelligent."

William Hawkins of the N.Y. World Telegram said, "For invention, freshness, beauty and impudence, there is hardly a show that can touch 'The Golden Apple'. Naughty and funny. An out and out triumph."

Tickets are available at the Playhouse Box Office (open daily 10 a.m. to 9 p.m.) for "The Golden Apple"; "Bus Stop", which continues in the Pavilion Theatre through Sunday; and "Little Mary Sunshine" and "That Championship Season," which complete the season through August 7. Telephone reservations may be made by calling 865-1884

Housing data offered

Faculty seeking housing information for incoming graduate students can obtain information about off campus facilities from Residential Life Programs, Room 335 Boucke Bldg. The office is open from 8 a.m. to 3 p.m. on Saturday, with the exception of July 4. Information available includes maps; office hour, security deposit and application information for the major apartment owners and managers; OTIS housing lists; mobile home park information; and regularly updated vacancy information for the major local apartment owners and managers. Persons seeking to obtain a roommate or to rent or sublet apartments, houses and rooms may post notices on a bulletin board outside the office.

Staff vacancies

The following vacancies for positions classified as staff exempt are announced now in accordance with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1367 (network line 475-1367). Applications for these staff vacancies will be accepted until 5 p.m., July 8, 1976. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

BUYER, OFFICE OF BUSINESS SERVICES — University Park

Responsible to the Director of Purchases for the efficient and effective procurement of required items to best serve the interests of the University and the individual department involved. Specifically to evaluate specifications, giving consideration to quantity, quality, cost and delivery requirements; solicit quotations, interview vendors, expedite deliveries, handle adjustments and perform all necessary related purchasing service functions. Bachelor's degree or equivalent, plus two to three years of directly related experience.

COMPUTER OPERATOR, INTERCOLLEGE RESEARCH PROGRAMS — University Park

Operate computer console and input/output equipment; process computer jobs from submission by users to return to users, providing courteous service and maintaining alertness for error conditions. An associate's degree or equivalent, including two years of college mathematics or two years of college science or engineering is required. Familiarity with computer programming and operation of punch card equipment is helpful.

JR. COPY EDITOR, UNIVERSITY PRESS — University Park

Responsible for editing and proofreading book manuscripts in accordance with standard usage, Press style, and special requirements. Responsible for checking copyright permissions and for liaison with production, design and advertising personnel. Bachelor's degree or equivalent, plus one to two years of experience in editorial practices.

Grimethorpe Colliery Band to perform July 11

The Grimethorpe Colliery Band, 33 coal miners in a brass band directed by noted composer and conductor Elgar Howarth, will perform in a Nittany Mountain Summer concert at 8 p.m. Sunday, July 11, in University Auditorium.

The band, selected best of the colliery bands from the Yorkshire mining districts of England, is touring the United States under the auspices of the British Bicentennial Committee. The group will give a number of performances in and nearby the mining communities of Pennsylvania and West Virginia, as well as in America's major cities.

Mineworkers' National Champions in Great Britain for four years, the band, since Elgar Howarth became musical director, has become an even greater force in the brass band movement, particularly in reviving masterpieces of the brass band repertoire by such composers as Gustav Holst and Edward Elgar.

The original band was founded in 1917 by a group of workmen from the Grimethorpe Colliery who lived in the nearby town of Cudworth. They persuaded the Colliery Company and its Welfare Organization to sponsor the band until 1947, when sponsorship was taken over by the National Coal Board and ifs Coal Industry Social Welfare Organization.

Elgar Howarth, educated at Manchester University and Royal Manchester College, came to prominence as a conductor in 1969, when he was invited to conduct the London Sinfonietta, which he now directs regularly both in England and abroad.

Mr. Howarth's "The American Dream" and his arrangements of music from the Tudor Court, "Greensleeves," "Embraceable You" and "Jeannie with the Light Brown Hair" will be performed at the University. Also to be heard are Holst's "Moorside Suite," Wagner's "Lohengrin" Wood's "Three Dale Dances" and other works selected for a family concert.

The Grimethorpe Colliery Band will be at the University with the support of the Institute for the Arts and Humanistic Studies and through gifts from alumni and friends of the University. Nittany Mountain Summer is supported in part by grants from the Pennsylvania Council on the Arts, the National Endowment for the Arts and gifts to the University.

Tickets for the colliery band concert, at $2.50 for adults and $1 for students, children and senior citizens, are available at the Nittany Mountain Summer box office in University Auditorium from 9 a.m. to 5 p.m. weekdays.

WPSX airing Bicentennial specials

WPSX-TV, Channel 3, is airing a number of Bicentennial specials during the holiday week as a birthday present to area viewers, beginning at 7 p.m. on Friday, July 2, with "Eastward, Ho!," a half-hour Penn State Television special about the Bicentennial Wagon Train Pilgrimage to Pennsylvania.

The program follows a wagon train as it travels across western Pennsylvania, stopping in such towns as Franklin, Clarion, DuBois, Brookville and Clearfield to stage the Bicentennial show written by faculty of Penn State's College of Arts and Architecture. "Eastward, Ho!" combines music from that show with scenes of the wagon train itself to present a composite day along the wagon train trail. "Eastward, Ho!" may also be seen at 7:30 p.m. on Sunday, July 4, and at 10:30 p.m on Monday, July 5.

Yehudi Menuhin and the National Symphony Orchestra, conducted by Andre Kostelanetz, highlight a special "In Performance at Wolf Trap" program to be aired five from Wolf Trap Farm Park for the Performing Arts outside Washington, D.C. at 10:30 p.m. on Saturday, July 3. In addition to the live concert, the program features fireworks and, as midnight approaches, a countdown to the nation's third century.

At 3:30 p.m. on Sunday, July 4, "America, America, America" presents the Mormon Youth Symphony and Chorus in a 90-minute salute to American music. The 400-member group performs music by Stephen Foster, George M. Cohan, Leonard Bernstein, Aaron Copland and others.

A British perspective on the American Revolution is featured on "Good-bye America" at 8:30 p.m. on Monday, July 5. This 90-minute program, co-produced by the BBC and WNET-TV, N.Y., is a dramatic re-enactment of the debate in Parliament that eventually led to British military action against the colonists.

Penn State assistant professor of theatre and film Roger Cornish is the guest on "Talkabout" at 10 p.m. Monday, July 5. Mr. Cornish discusses his play, "Unruly Children," which takes a sharp look at Pennsylvania's history. The half-hour program also features scenes from the play, which was produced for the University Theater this spring. "Talkabout" may also be seen at 3 p.m. on Tuesday, July 6, and at 1:30 p.m. on Saturday, July 10.

WPSX-TV will carry live coverage of "The State Dinner for Queen Elizabeth II" at the White House. The dinner is a highlight of a visit by Queen Elizabeth and Prince Philip in honor of the Bicentennial. Coverage is hosted by Robert MacNeil. Julia Child will take viewers inside the White House kitchen for a culinery perspective on the event, and Jean Marsh of "Upstairs, Downstairs" will review the protocol of official state dinners and, with Mr. MacNeil, talk with guests. The program will also include a look at the history of the British monarchy since George III.

(231-3) The final rules on education records under **privacy rights of parents and students** has been issued by the Department of Health, Education and Welfare. Included are sections on student rights, institutional policy, education records, disclosure and enforcement. (Ref. 41FR24661-76, 6/17/76)

(231-4) The NFAH National Endowment from the Arts has issued FY1977 application guidelines for its **Artists-in-Schools Program** with an Aug. 1 deadline. Contacts and other program information are included for each component. Also FY 1978 application guidelines for the **NEA Expansion Arts Program** have been issued. Deadlines are Nov. 15 for instruction and training, arts exposure and state arts agencies, and Oct. 1 for summer projects, community culture centers and neighborhood arts services (Ref. 41FR26038-50, 6/21/76)

Oswald honored

The University of Kentucky's Board of Trustees has approved a recommendation by Dr. Otis A. Singletary, president of the University, to name the new Lexington Technical Institute building the John W. Oswald Bldg.

The name honors Dr. Oswald for his service with the president of Kentucky from 1963 to 1968.

"It is fitting that the new facility be named for Dr. Oswald as his foresight and strong commitment to the Community College concept laid the groundwork for the excellent Community College System we have today," said President Singletary.

The University of Kentucky Community College System now has 13 community colleges, including Lexington Technical Institute.

The John W. Oswald building is expected to be completed this summer and be ready for occupancy during the 1976 fall semester. It will include 13 classrooms, three laboratories, a library and offices and will cost about $4.6 million.

Elsewhere in academe

A Supreme Court decision may have opened a new door to states which have been trying to find a constitutional way to provide aid to sectarian colleges. The court held 5 to 4 that Maryland has achieved a formula for giving aid to qualifying colleges and universities, regardless of their sectarian affiliation, as long as that aid was not directly employed for sectarian purposes and recipient institutions did not have as a primary mission the awarding of theological or seminary degrees. Legal observers noted that the court seemed influenced by the fact that the sectarian institutions involved were privately funded, that most student and faculty positions were open to all on a nonsectarian basis, and that, except for a few compulsory religion courses, each institution permitted a high degree of academic freedom.

The U.S. Office of Education reports that, despite talk of college closings, from 1969 through 1975 the number of private small, four-year colleges increased by 10. And although tuition rates at such institutions often average five times that of state schools, the small colleges (those with 2,500 or fewer students) had a 9 percent increase in enrollment this year. They also noted an 11 percent increase in the number of students transferring from larger to smaller schools.

This year's college graduates found about 2 percent fewer jobs than last year, the College Placement Council reports. Job hunters could take consolation in the fact that this was an improvement on the 5 percent drop in job opportunities which the council had forecast earlier. Hiring by private businesses increased 10 percent, offsetting a 24 percent decline in hiring by federal agencies. Job prospects were better for those with graduate degrees. As the master's level, there were 6 percent more new jobs this year than last and 8 percent more for those with doctorates. For graduates with bachelor's degrees however, the number of jobs was down 3 percent from last year.

Agencies of the federal government obligated nearly $4.5 billion to institutions of higher education during the 1974 fiscal year, according to a report prepared by the National Science Foundation's Division of Science Resources Studies. This was a 17 percent increase in funding over 1973, but inflation absorbed about half this gain.

Administrative review policy

President Oswald, acting on the recommendations of the Joint Senate Administrative Committee on Faculty Participation, has developed an implementation policy for a review of academic administrative offices. Dr. Oswald has now considered and acted upon all the recommendations submitted to him by the committee 18 months ago. The overall objective of the present review is to improve the organization and functioning of the various academic administrative offices, and the President has asked that the process be completed by Jan. 1, 1977. The full text of the review policy appears below:

Definition: For the purposes of this policy, an academic administrative office is one which reports directly or indirectly to the Provost of the University.

Purpose

1. To describe the organization and functioning of an academic administrative office and to provide for the evaluation of the effectiveness of the leadership in carrying out the functions of the office in light of the organization and other factors which may impinge on the office
2. To provide guidance to the academic administrative officer as to strengths and weaknesses of the leadership of that office for the purpose of improving the functioning of the office.
3. To make recommendations, as deemed appropriate, to the next highest academic administrative officer based on the information developed on the organization and functioning of an academic administrative office and the resulting evaluation of the effectiveness of the leadership of that office. The recommendations are to be directed at the improvement of the office and its leadership. If there are instances where a change in leadership is proposed, this information is to be included.

Process

1. Because of the diversity of the University, the specific process for periodic review of academic administrative offices is not prescribed for each unit.
2. Each academic administrative officer directly responsible to the Provost shall, in consultation with the Provost and the appropriate administrative and faculty groups for that office, develop a process for the review of those academic administrative offices reporting to him or her within guidelines listed below.
3. The processes shall include mechanisms whereby faculty of the pertinent unit shall be informed when the review is started, when the review is completed, and that the next highest academic administrative officer has been informed of the results of the review.

Guidelines

1. Academic administrative offices of the University shall be reviewed at intervals of about five years so as to result in no more than twenty percent of the academic administrative offices being reviewed each year. Sometimes it may be desirable to initiate a review when a principal academic office is vacated, e.g., by resignation or retirement.
2. Responsibility for initiating and implementing the periodic review of academic administrative offices rests with the administrator at the next highest level.
3. Academic members of the unit being reviewed shall be significantly involved in the review process. Appropriate academic members from other related units and academic administrative peers are recommended to be included in the review process.
4. The general results of the review shall be made known to the responsible academic administrative officer by the next highest academic administrative officer. Confidentiality of personnel evaluations shall be maintained.

Ballet, theatre, music on campus

A joint public reception will formally open the Nittany Mountain Summer exhibit in the Museum of Art and the Central Pennsylvania Festival of the Arts Juried Crafts Show from 3 to 5 p.m. Sunday, July 11, in the Museum of Art.

"Prints by Pennsylvania Artists," an exhibition of works by some 30 artists living in the State, has been drawn together especially for Nittany Mountain Summer, and will be shown through Aug. 22. The CPFA Juried Crafts Show, which is now on view, may be seen through Aug. 15.

Walter H. Walters, dean of the College of Arts and Architecture, director of University Arts Services and producer of Nittany Mountain Summer, expressed the belief that all Nittany Mountain Summer events will enjoy the highest attendance in the celebration's three years of existence.

"Our efforts to extend the visual and performing arts to all Pennsylvanians rely heavily on the active support and attendance of area audiences," he said.

"Penn State is, during the summer months, developing into the principal arts center for the Commonwealth. It is Pennsylvania's only major arts center to feature both the visual and performing arts and to bring its audiences into informal contact with the artists."

"Increased participation and public support in sharing all these events is our only measure of progress, and Nittany Mountain Summer's future rests to a great extent on 1976," Dean Walters concluded.

Band to play

In the first full week of events, the Grimethorpe Colliery Band will perform its Nittany Mountain Summer concert at 8 p.m. on Sunday, July 11, in University Auditorium. The award-winning brass band of coal miners from Great Britain is performing as part of a Bicentennial tour which will also include a precedent-setting concert at the United Nations, an appearance at Queen Elizabeth's reception for President and Mrs. Ford during the monarch's U.S. visit, and a concert at the National Governors Conference at Hershey.

The Pennsylvania Ballet and Pennsylvania Orchestra will arrive for their annual three-week residency at Penn State on July 12. The first Shirt-Sleeve concert by the orchestra, featuring a wind octet by Beethoven, Ives' "Unanswered Question," Prokofiev's "Classical Symphony," and "Introduction and Allegro" by Ravel, will be performed at 8 p.m. Wednesday, July 14, in University Auditorium.

Due to injuries to dancers, the Pennsylvania Ballet will perform a slightly revised program, including "Eakins' View," the pas de deux from Act II of "The Nutcracker," "Continuum" and "Les Sylphides" at 8 p.m. on Friday and Saturday, July 16 and 17.

Also featured during the first week will be continuing performances in the Festival of American Theatre of "The Golden Apple," free museum tours at 1 p.m. on Friday, Saturday, and Sunday beginning July 16, and the free At Ease with the Pennsylvania Ballet program at 4 p.m. on Saturday, July 17, in University Auditorium.

Nittany Mountain Summer tickets are available at the University Auditorium box office, 865-2242, weekdays from 9 a.m. to 4 p.m.

Nittany Mountain Summer is supported in part by grants from the Pennsylvania State Council on the Arts and the National Endowment for the Arts and by gifts from friends and alumni of the University.

Art sales, films highlight CPFA

In celebration of its 10th anniversary and the nation's Bicentennial, the Central Pennsylvania Festival of the Arts will present a week-long festival, opening Saturday evening, July 10, and running through Sunday, July 18.

The featured performer for this year's festival will be Bob Dorough, a singer, pianist, composer and musical director of the ABC television show, "Schoolhouse Rock." Among the numbers he has written are "Devil May Care," which he recorded with Miles Davis, and a real jazz rarity, "Nothing Like You," sung by Mr. Dorough on Miles Davis's album, "The Sorcerer."

Mr. Dorough will give two performances for children in the festival tent on the Old Main lawn at 10 a.m. and 4 p.m. on Friday, July 16, and an evening performance for adults on Thursday, July 15, at 7 p.m. in the HUB ballroom. He will be assisted by Don Keat of the "Dance Band" and other local musicians.

The second annual fiddler's competition will begin at noon Saturday, July 17, also in the festival tent. The competition is restricted to fiddlers from Pennsylvania, and there will be cash prizes. Each player will bow three tunes of his own choosing.

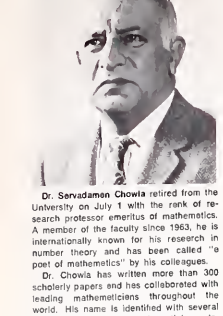
Fine art and craft shows

The juried fine art and craft exhibitions will run six weeks in University galleries, July 6 to Aug. 14. At the same time, a special invitational exhibition representing works of artists from each of the original 13 states will be held in the Zoller Gallery.

The film programming, which will run for the entire week, will feature American comedy, dance, crafts and children's films. Such film classics as "The Wizard of Oz," "Some Like it Hot," "One A.M." and "Steamboat Bill, Jr.," will be shown in the HUB assembly room or on Old Main lawn.

The expanded arts festival program will include a special Children's Day and an International Day, both centered on the South Allen Street mall. The expanded program will still include the Sidewalk Art Sale and Exhibitions, July 15 to 18, with 465 artists and craftsmen displaying and selling their work along the sidewalks of the University campus. This year the pattern of the sidewalk sale will be a rectangle to avoid confusion.

The Contemporary Dance Company of Central Pennsylvania and the Jazz Dance Theatre will present a joint concert at 6 p.m. on the opening day of the festival, July 10, at the University Auditorium. Jean Sabatine, LaRue Allen and Pat Heigel-Tanner will be in charge of the concert, with men and women from the area performing.



Also for music, the Opera Society of Central Pennsylvania and the State College Music Guild will present concerts in the Music Bldg. recital hall. The Madrigal Singers of the State College Choral Society will perform in the tent and stroll and sing along the sidewalk sale area.

A new feature of the festival this year will be the State College Municipal Band, led by Dr. Warren E. George, head of the department of music education, who has organized a band of adult members of the community to play a concert of American Band Music at 5 p.m. Sunday, July 11, on the Allen Street mall.

A complete program of activities with dates and times will be available at the festival information booth on July 10, and on-campus events are listed in this week's INTERCOM calendar.

PENN STATE COLLECTION

Faculty notes

Dr. Sarvadaman Chowla retired from the University on July 1 with the rank of research professor emeritus of mathematics. A member of the faculty since 1963, he is internationally known for his research in number theory and has been called "a poet of mathematics" by his colleagues.

Dr. Chowla has written more than 300 scholarly papers and hes collaborated with leading mathemeticians throughout the world. His name is identified with several ideas well-known to mathemeticians, including the Bruch-Ryser-Chowla Theorem and the Fekete-Chowla Method. A regular member and a visitor at the Institute for Advanced Study in Princeton, N.J., since 1948, Dr. Chowla's first stay at the Institute was during Einstein's tenure there.

Dr. Chowla was born in London but grew up in India where he received his early education. He holds an M.S. degree from Punjab University (India) and a doctorate from Cambridge University (England). He taught at several universities in India before coming to the United States in 1948 to teach at the University of Kansas. He also served at the University of Colorado before joining the Penn State faculty as research professor of mathematics. He is an honorary foreign member of the Royal Norwegian Academy and an editor of the "Journal of Number Theory." He is also a member of the American Mathematical Society, London Mathematical Society and the Indian Mathematical Society.

In retirement Dr. Chowla plans to continue research in mathematics and to maintain his contacts both at the Institute for Advanced Study and at the University.

The Gulf Oil Foundation has for a second year provided seed money to support research on alternative energy projects. The two projects, which were selected from six proposals by a peer faculty screening committee, are: "Transition Metal Cluster Complexes as Catolysts for the Conversion of Carbon Monoxide and Hydrogen into Organic Feedstocks and Fuels," by **Gregory L. Geoffroy**, assistant professor of chemistry ($5,098); and "Photocatalytic Production of Hydrogen: Investigation of Factors Determining Quantum Efficiency," by **J. F. Houlihan,** assistant professor of physics, Shenango Valley Campus ($5,457.20).

Dr. Geoffroy will examine metal carbonyl catalysts to determine if they will efficiently convert synthesis gas — carbon monoxide and hydrogen — into chemical feedstocks. Successful conversion would create a large non-petroleum source of organic raw materials.
